Alphabetical Index	2561 - 2595

Your partner for high-quality performance

With 5 plus points to your advantage:

Quality

All products in the ROTH product range are subjected to strict in-house checks. This enables us to ensure you receive consistently high product quality.

Logistics

Direct dispatch! Delivery fast, simple and reliable!

Special rates & Discount

Fair and calculable, i. e. a quantity discount of 5 % from 6 packs and 10 % from 24 packs of same items will be granted. Please check with us for special rates on bulk amounts or standing orders.

Customer advice

Customer proximity and competence, i. e. we are here to advise you before and after buying.

Returned & Take-Back Goods

You can take advantage of our 10-day exchange and take-back guarantee. Just send the goods to us in their original packaging together with a copy of the invoice or delivery note and your modified order. We are unfortunately unable to pay the costs for postage and packing. We request you to get in touch with us for any legitimate complaints which require goods to be returned. We shall then authorize our forwarding agent immediately to pick up the goods in question.

In the event of goods being returned independently and without prior notice, postage and packing costs can only be refunded for the same amount as agreed upon with our forwarding agent. Further information on returning goods can be found in the terms of sale and delivery at the back of this catalogue.

The new **ROTH online shop**

www.carlroth.com

A private enterprise with tradition

Best service for 140 years

1879

CARL ROTH is established as a “material goods, colonial goods and dyes merchant and chemists” in Karlsruhe.

1891

CARL ROTH is appointed as an “official purveyor to the Grand Duke of Baden“.

1899

ROTH publishes its first sales and mailorder catalogue.

1907

CARL ROTH operates the first delivery van in Karlsruhe.

1928

The laboratory chemicals department opens.

Quality, Environment, Safety

We take responsibility

Our QM system is celebrating its 25th birthday in 2020. Over this time, we have continuously adapted our QM system to the growing market demands in order to meet quality requirements and to continue to deliver a high standard of quality.

CERTIFICATE

The Certification Body
of TÜV SÜD Management Service GmbH
certifies that

Carl Roth GmbH + Co. KG
Schoemperlenstraße 1-5, 76185 Karlsruhe
Germany
An der Mole 5, 76187 Karlsruhe
Germany

has established and applies
a Quality and Environmental Management System
for the following scope of application:

Development, production and distribution of labware and chemicals.

Performance of audits (Order No. 70001407)
has furnished proof that the requirements under:

ISO 9001:2015
ISO 14001:2015

are fulfilled.

The certificate is valid from 2019-07-06 until 2022-07-05.
Certificate Registration No.: 12 100/104 20247 TMS.

Product Compliance Management
Munich, 2019-06-17

ZERTIFIKAT ◆ CERTIFICATE ◆ CERTIFICADO ◆ CERTIFICAT

The guiding principle for an environmentally conscious corporate management has always been a fundamental part of our business conduct. In addition to fulfilling our statutory environmental commitments, therefore, we always strive to define environmental protection targets and to optimise our operating procedures taking into account environmental aspects.

Our certified environmental management system helps us to systematically pursue this aim.

By participating in the *Responsible Care*® programme of the chemical industry, we have undertaken a commitment to meet the goals set by the programme.

These goals are to promote sustainability, to show product responsibility, to ensure safety, to improve health protection in the workplace and to better protect the environment.

Innovative use of combined heat and power technology when printing this product reduced CO_2 emissions by up to 52% in comparison to conventional methods in Germany.

minus 52% CO_2

TÜV SÜD ISO 9001

TÜV SÜD ISO 14001

ECOfit 2014

RESPONSIBLE CARE®
OUR COMMITMENT TO SUSTAINABILITY

SOLVAGREEN® - Green Solvents
Our brand for alternative solvents

Green Solvents serve as an alternative for environmentally hazardous and harmful reagents, and thus contribute to risk minimisation.

1945

The highly efficient manufacturing and bottling department enters service.

1958

ROTH unveils its proprietary high-pressure laboratory autoclaves at the ACHEMA Fair.

1971

ROTH is awarded a patent on its Mercurisorb-ROTH® high-speed mercury absorber.

1989

The „Association of Independent Businesses“ presents its award to ROTH in recognition of its environmentally friendly business practices.

1990

CARL ROTH publishes its first general product catalogue for its Labware, Life Science and Chemicals product lines.

Plastics – Technical data / Key to symbols

What about the packaging material?

We are making our contribution to the environment:

- By trying to use as little packaging material as possible. Unfortunately we cannot do without packaging completely as it has the important function of not only protecting the product, but also man and environment from any harm.

- By using environmentally friendly and recyclable packaging material as far as possible. As early as the beginning of the 80s, we stopped using polystyrene inserts for packing solvents, acids and alkaline aolution. We now use special boxes for hazardous goods made of 100 % recyclable corrugated cardboard. Paper is used as stuffing material.

Please also help by putting the **packaging in the recycling container after use**. Our boxes are labelled with the recy-symbol; they can be easily stored when cut open and pressed together without taking up much space, prior to being put out for recycling.

Our **plastic containers made of polyethylene (PE)** can also be turned in for recycling after they have been completely emptied and cleaned of all harmful substances.

The same applies to **tin flasks and canisters** once emptied and pollutent-free.

Sterilizing plastics – Autoclaving

Recommended autoclave cycle:
20 minutes at 121 °C, 1 bar

1. Clean autoclave goods thoroughly prior to sterilizing.
2. Rinse off used detergent with distilled water.
3. Unscrew caps to enable pressure compensation.
4. Only autoclave containers with stop-cock when empty, screw off stop-cocks.

   Following plastics can be autoclaved repeatedly:
   ETFE, PFA, PTFE, FEP, E-CTFE, PMP/TPX®, PP, SI, PVDF; PES, PSU

Note:
Polycarbonate PC and Polysulfone PSU are also autoclavable, however this reduces the mechanical stability. This can result in material failure particularly when under high mechanical strain, e.g. during centrifuging.

Please contact us should you have any further questions regarding packaging.

1993
Construction of a modern high-bay warehouse.

1995
First certification of the quality management system to DIN EN ISO9001.

2005
The chemicals department moves into modern premises on the Karlsruhe-Rheinhafen industrial estate.

2013
An extension with an automated small parts warehouse is added to the Chemicals and Life Science building, enlarging its area to approx. 8.000 m². CARL ROTH now stocks over 21.000 products in its warehouse.

Standard abbreviations for plastics

DIN-Abbrev.	Description	Application temperature (°C) from	to	
ABS	acrylic butadiene styrene copolymer	-40	+85	(+100)
E-CTFE	ethylene chlortrifluorethylene	-70	+150	(+170)
ETFE	ethylene tetrafluor ethylene	-100	+150	(+180)
FEP	tetrafluor ethylene perfluorpropylene	-100	+205	
HDPE	polyethylene high density	-50	+80	(+120)
LDPE	polyethylene low density	-50	+75	(+90)
MF	melamine	-60	+80	(+120)
NR	natural rubber	-40	+80	
PA	polyamide (PA6)	-30	+80	(+140)
PBT	polybutylene terephthalate	-50	+150	
PC	polycarbonate	-100	+135	(+140)
PE	polyethylene (see HDPE/LDPE)	-40	+80	(+90)
PES	polyether sulfone	-100	+150	
PETG	polyethylene terephthalate	-40	+65	
PFA	perfluoralkoxy	-200	+260	
PMMA	polymethylmethacrylate	-40	+85	(+90)
PMP (TPX®)	polymethylpentene	0	+150	(+180)
POM	polyoxymethylene	-40	+110	(+140)
PP	polypropylene	-10	+110	(+140)
PS	polystyrene	-20	+70	(+80)
PSU	polysulfone	-100	+150	
PTFE	polytetrafluor ethylene	-200	+260	
PVC	polyvinylchlorid	-20	+80	
PVDF	polyvinylidene flouride	-40	+105	(+150)
SAN	styren acrylonitrile	-20	+85	(+95)
SI	silicone rubber	-50	+180	(+250)
TPE	thermoplastic elastomer	-50	+121	

Temperature in ( ) short-term

All values given in this table refer to plastic raw material and can only be regarded as guidelines. As the temperature resistance may vary with different conditions of manufacturing or chemical influences, suitability tests by the user are highly recommanded.

No legal claims can be derived from this information; nor do we accept any liability for it.

Article numbers

Our Article numbers assemble themselves as follows:

4 digits:	**0000.1**
1 letter + 3 digits:	**X000.1**
2 letters + 2 digits:	**XX00.1**
3 letters + 1 digit:	**XXX0.1**

(before .1 .2 .3 etc.)

.1 .2 .3 etc. define the different packings.

Key to symbols

NEW — News and Programme extensions

Programme extension!

A 121 °C — All autoclavable products in our catalogue are identified by this symbol. Please also note any additional instructions when autoclaving.

Temperature Resistance:

- Safe to freeze (approx. -10/-20 °C)
- Suitable for low temperatures (approx. -70/-80 °C)
- Suitable for liquid nitrogen (gaseous phase / -196 °C)

See catalogue text for detailed information.

ready-to-use — Ready-to-use products and reagents

S — Sterile products

All products identified as being particularly temperaturesensitive are shipped **in special ice boxes with freezer packs or in dry ice.**

2014 — Succsesfull participation in the ECOfit programme sponsored by the state of Baden-Württemberg.

2014 — Participation in the Responsible Care® programme.

2015 — Relaunch of the new ROTH Online Shop.

2016 — Certification of the corporate environmental management system according to ISO 14001 for the sustainable environmental protection.

2019 — CARL ROTH 140 years Anniversary.

DURAN
WHEATON
KIMBLE

Excellence in your hands

DURAN Group is now DWK Life Sciences

Since the 1st June 2017, the companies DURAN Group, WHEATON Industries and KIMBLE Chase united under the new company name DWK Life Sciences. DWK Life Sciences is now a leading international manufacturer of premium laboratory products, packaging and storage solutions for a broad range of scientific and technical applications. The offer of DWK Life Sciences covers more than **25,000 laboratory products**, **which are manufactured at 12 locations** and marketed under the renowned brands **DURAN®, WHEATON®** and **KIMBLE®**. The leading global and field-tested range of laboratory products is supplemented by an innovative research and Life Science portfolio.

The material of glass

General properties

In comparison with other materials such as stainless steel or plastic, glass offers near-universal chemical resistance to water, saline solutions, acids, alkalis and other organic solvents. It is only affected by hydrofluoric acid and at increased temperatures by strong alkalis and concentrated phosphoric acids.
Glass is dimensionally stable and safe even at high temperatures and does not release harmful substances when heated. Glass also exhibits high transparency.
In the laboratory, various types of glass are used depending on application. These are chiefly soda-lime glass (AR®-glass) as well as various types of borosilicate glass.

Soda-lime glass has less chemical and thermal load capacity than borosilicate glass. Due to its high thermal expansion, soda-lime glass has a low thermal shock resistance and can incur stresses and crack when heated or cooled. Soda-lime glass is well suited to applications involving temporary chemical contact at room temperature as well as to disposable articles.

Borosilicate glass is to a large extent chemically inert and suitable for use up to very high temperatures. The various types of borosilicate glass mainly differ from one another in terms of their linear coefficient of expansion and hence their resistance to changes in temperature.
The most commonly used types of borosilicate glass are borosilicate glass 3.3 (DURAN®, SIMAX), borosilicate glass 4.9 (Fiolax®) and borosilicate glass 5.1.

The following factors are critical to the quality of laboratory glassware:

- The glassware and glass type
- The shape obtained during the production process
- Even distribution of wall thickness in all areas of the article (particularly in critical areas such as in the neck/shoulder area and at the transitions to the base). This ensures:
  - better mechanical stability
  - higher thermal shock resistance
  - freedom from stresses, which can cause the vessel to burst when heated

These quality characteristics not only increase safety for employees in the laboratory, but also extend the useful life of the laboratory glassware and protect valuable substances.

Comparison of DURAN® and soda-lime glass

Chemical properties:

	DURAN®	Soda-lime glass
Chemical composition	81 % SiO_2 13 % B_2O_3 4 % Na_2O/K_2O 2 % Al_2O_3 No added heavy metals	69 % SiO_2 1 % B_2O_3 3 % K_2O 4 % Al_2O_3 13 % Na_2O 2 % BaO 5 % CaO 3 % MgO
Hydrolytic resistance to DIN ISO 719	Class 1	Class 3
Acid resistance to DIN 12116	Class 1	Class 1
Alkali resistance to ISO 695	Class 2	Class 2

Physical properties:

Transformation temperature [°C]	525	
Coefficient of expansion α (20 to 300 °C) [10^{-6} K^{-1}]	3.3	9.1

Usage instructions:

Max. allowable usage temperatures	500 °C	approx. 100 °C
Maximum negative temperature	-70 °C	approx. 0 °C
Maximum temperature difference ΔT	100 K	30 K
Use in the microwave	Suitable	Unsuitable
Pressure and vacuum operation	Only products indicated as such are suitable for use under pressure/vacuum due to their geometry and wall thickness (e.g. suction bottles, dessicators, DURAN® pressure plus bottles)	Unsuitable
Cleaning in dishwashers	Suitable	Unsuitable

The **thermal shock resistance of glass** is dependent on the shape, wall thickness, surface characteristics and finish of the glassware used.

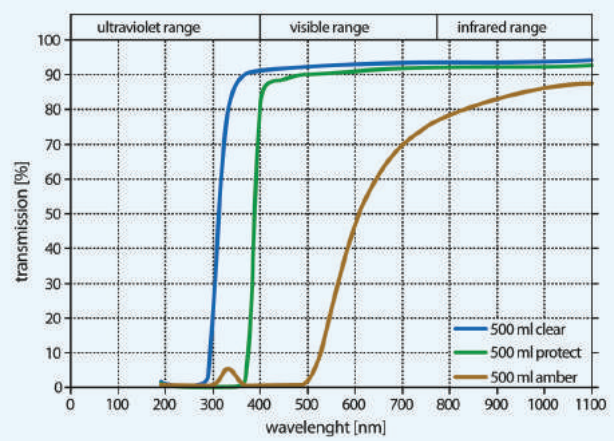
Rapid changes in temperature cause high temporary stress in the glass, meaning that rapid cooling processes are very dangerous, since in this case a thin outer layer of the glass is placed under tensile stress over the still hot inner core. Glass is much more susceptible to tensile stress than to compressive stress.

DURAN® is much more resistant to rapid changes in temperature than soda-lime glass due to its lower thermal expansion.

The special features of DURAN®
Very high chemical resistance, nearly inert behaviour, a high usage temperature, minimal thermal expansion and the resultant high resistance to thermal shock are its most significant properties. Excellent physical and chemical performance makes DURAN® the ideal material for use in the laboratory and for the manufacture of chemical apparatus used in large-scale industrial plants. It is also widely used on an industrial scale in all other application areas in which extreme heat resistance, thermal shock resistance, mechanical strength and exceptional chemical resistance are required. The properties of DURAN® meet the specifications of DIN ISO 3585. Compared to other types of borosilicate 3.3. glass, DURAN® is noted for its highly constant and technically reproducible quality.

Chemical properties
DURAN® glass is more chemically resistant that all other known materials. DURAN® borosilicate glass is highly resistant to water, acids, saline solutions, organic substances and halogens, such as chlorine or bromine. It also has good resistance to alkaline solutions. Only hydrofluoric acid, concentrated phosphoric acid and strong alkalis break down the glass surface (glass corrosion) at temperatures >100 °C. Their near-inert behaviour means that there are no interactions (e.g. ion exchange) between the medium and glass and it is thus possible to practically rule out any influence on the experiments.

Physical Properties:
Temperature stability under heating
The maximum permissible operating temperature for DURAN® is 500 °C. As it has a very low coefficient of linear expansion ($\alpha = 3.3 \times 10^{-6} K^{-1}$), a feature of DURAN® is its high thermal shock resistance up to $\Delta T = 100$ K. This is also dependent on the wall thickness and the geometry of the products.



Temperature stability under freezing
DURAN® can be cooled down to the maximum possible negative temperature and is thus suitable for use with liquid nitrogen (approx. -196 °C). When doing so, bear in mind the product geometry and the properties of any additional components used (e.g. screw caps). In general, DURAN® products are recommended for use down to -70 °C.
When cooling down and thawing, care must be taken to ensure that the temperature difference does not exceed 100 K. In practice, therefore, it is recommended that they be cooled and heated gradually.
When freezing substances such as DURAN® bottles, the container should only be filled to max. 3/4 full and frozen at an angle of 45 ° (in order to enlarge the surface area).

Use in the microwave
DURAN® laboratory glassware is suitable for use in microwaves. This also applies to plastic coated DURAN® products.

Conformity with standards and guidelines
DURAN® is a neutral glass with high hydrolytic resistance and therefore belongs to glass type 1 according to the European Pharmacopoeia (EP, Section 3.2.1), the Japanese Pharmacopoeia (JP, Section 7.01), the United States Pharmacopeia (USP, Section: 660) and the National Formulary. In addition to being in conformity with the DIN ISO 3585 international standard, in which the properties of borosilicate glass 3.3 are defined, many items of DURAN® laboratory glassware meet the standards for glass laboratory equipment.

DURAN
WHEATON
KIMBLE
Excellence in your hands

Optical properties
In the spectral range from approx. 310 to 2200 nm the absorption of DURAN® clear glass is negligibly low. In photochemical processes the light transmission of DURAN® in the ultraviolet range is of particular importance. The transmissivity in the UV range indicates the ease with which photochemical reactions, such as chlorinations and sulfochlorinations, can be carried out. The chlorine molecule absorbs in the range from 280 to 400 nm and thus serves as a carrier of the radiation energy.

Amber colouring of DURAN® laboratory glassware
The amber colouring allows the storage of light-sensitive substances in DURAN® products. In the wavelength band between 300 and 500 nm, light transmission compared to DURAN® clear glass is <10 %. Accordingly, the amber DURAN® glass meets USP/EP/JP guidelines. Since the amber diffusion ink is applied to the outside of the clear glass article by means of spray coating, the proven DURAN® properties inside the bottle remain unaffected; there is no contact or interaction between contents and amber coating.
The coating is then stove enamelled, and therefore is resistant to chemicals and cleaning in a dishwasher.

Safety instructions
DURAN® glassware is safe to use. The guidelines applicable for the use of special glass in laboratories in the country in question should always be observed. The following points should, however, always be observed:
- Before using DURAN® laboratory glassware, it should be checked to ensure that it is suitable for the intended purpose and that it will function properly.
- Faulty laboratory glassware can present a hazard (e. g. risk of cuts, burns, infection) which should not be underestimated. If appropriate repairs to any item cannot be carried out or cannot be justified on grounds of cost, it must be disposed of in the proper manner (as household waste or, depending on possible contamination, in accordance with the applicable guidelines; never as waste glass).
- Glassware should only be subjected to sudden changes in temperature taking into account a thermal shock resistance of $\Delta T=100K$. This applies in particular to thick-walled glassware, such as suction bottles or dessicators.
- Make sure that apparatus stands firmly and is not subjected to stress by using appropriate support material.

Glass beakers

A 121 °C

Rotilabo®-glass beakers

Made of borosilicate glass 3.3. Graduated, has spout.

The following factors are critical to the quality of laboratory glassware:

- The glassware and glass type
- The shape obtained during the production process
- Even distribution of wall thickness in all areas of the article (particularly in critical areas such as in the neck/shoulder area and at the transitions to the base). This ensures:
  - better mechanical stability
  - higher thermal shock resistance
  - freedom from stresses, which can cause the vessel to burst when heated

These quality characteristics not only increase safety for employees in the laboratory, but also extend the useful life of the laboratory glassware and protect valuable substances.

Beakers

DURAN WHEATON KIMBLE
Material DURAN®
A 121 °C

DURAN®-Super Duty glass beakers

- Proven DURAN® properties
- Glass type I, neutral glass in accordance with USP, EP and JP
- High mechanical stability due to increased wall thickness
- Reinforced, sturdy rim
- Uniform wall thickness distribution
- Autoclavable, sterilizable
- With retrace code
- Easily readable scale
- Fired-on highly durable labelling

Notes of use:
To avoid thermal stress in the glass, it is recommended that Super Duty products are slowly and uniformly heated. Standard DURAN beakers and Erlenmeyer flasks should be used when working at very high temperatures, or if rapid temperature changes are expected, as these, as these are characterized by excellent thermal shock resistance. However, their mechanical sturdiness is limited compared with the Super Duty range.

DURAN WHEATON KIMBLE
Material DURAN®
A 121 °C

DURAN®-Super Duty narrow neck Erlenmeyer flasks

- Proven DURAN® properties
- Glass type I, neutral glass in accordance with USP, EP and JP
- High mechanical stability
- Reinforced, stable rim
- Regular wall-thickness
- Autoclavable, sterilizable
- With retrace code
- Easily readable graduation
- Fired-on highly durable labelling

Notes of use:
To avoid thermal stresses in the glass, slow and gradual warming is recommended for Super Duty products. When working at very high temperatures, or if rapid temperature changes are expected, standard DURAN®-beakers and Erlenmeyer flasks should be used, as these are characterized by excellent thermal shock resistance. However, their mechanical sturdiness is limited compared with the Super Duty range.

DURAN®-Super Duty narrow neck Erlenmeyer flasks

The following factors are critical to the quality of laboratory glassware:

- The glassware and glass type
- The shape obtained during the production process
- Even distribution of wall thickness in all areas of the article (particularly in critical areas such as in the neck/shoulder area and at the transitions to the base). This ensures:
  - better mechanical stability
  - higher thermal shock resistance
  - freedom from stresses, which can cause the vessel to burst when heated

These quality characteristics not only increase safety for employees in the laboratory, but also extend the useful life of the laboratory glassware and protect valuable substances.

PFA Erlenmeyer flasks

Made of **PFA**. Graduated, highly transparent. Microwave safe.
Autoclavable.

- Temperature resistant in the range -196 to +250 °C
- Inert to virtually all chemicals, including hydrofluoric and nitric acid
- High purity, low metal ion content, ideal for use in trace analysis and for the storage of highly pure substances
- No memory effect
- Hydrophobic and anti-adhesive, extremely smooth surfaces allow easy cleaning

DURAN WHEATON KIMBLE

Material
DURAN®

A 121 °C

DURAN®-mixing cylinders

Made of DURAN®. Compliant with DIN EN ISO 4788. Standardised wall thickness across the full measuring range prevents wedge error. With hexagonal base, standard taper and line graduations. Calibrated to IN. Temperature stable up to 250 °C without change in volume. Autoclavable.
Delivery incl. PE stopper.

Class A with blue graduations. Conformity certified, with mark of conformity and enclosed batch certificate.

A 121 °C

Volumetric flasks with screw cap, class A

Individually ring-marked IN.
Tolerance class A in accordance with DIN EN ISO 1042. Autoclavable.

Note: exposure to temperatures up to 121 °C (autoclaving) will not cause tolerance limits to be permanently exceeded.

Made of **PFA**, with screw cap made of PFA.
High temperature and chemical resistance. Hydrophobic and anti-adhesive, extremely smooth surfaces allow easy cleaning.High purity, ideal for use in trace analysis and for storage of reference solutions.No memory effect.

DURAN®-Protect screw neck bottles

Made of DURAN®, **PU encased**. In acc. with ISO 4796-1. Freezable down to -30 °C. The plastic casing protects against mechanical damage (scratch protection), minimises loss of fluid in the event of glass breakage (leak and splash protection), prevents scattering of glass shards and provides light protection up to a wavelength of 380 nm. With retrace code.
Microwave safe. Autoclavable.

Note:
do not expose DURAN®-Protect bottles to naked flames or direct heat. Max. thermal load 135 °C. Avoid continuous thermal exposure for longer than 30 min.

DURAN®-Protect clear glass bottles
Delivery incl. pouring ring and screw cap made of PP.

DURAN® Premium bottles

Made of DURAN®, transparent. Thread GL 45. In acc. with ISO 4796-1. With pouring ring and lid made of TPCh260, without colour additives and colour pigments, temperature resistant from -196 to +260 °C. Screw cap with **PTFE**-coated silicone seal. Especially suitable for demanding sterilisation processes e.g. for hot air or dry sterilisation and for depyrogenizing due to the guaranteed thermal shock resistance of 160 K. Complies with USP/FDA standards. Scale exact up to ±5 %. Reverse scaling not only indicates current liquid level but also enables reading of removed volume. With retrace code. Autoclavable.
Delivery incl. pouring ring and screw cap.

DURAN® YOUTILITY laboratory bottles

Made of DURAN®. With retrace code. Autoclavable.

- Specially shaped recessed grips for easier and safer handling.
- Slim bottle shape allows more space-saving use
- Scale indicating total volume
- Predefined labelling space
- Ergonomically shaped screw cap with leak-proof sealing system for optimal handling, even by users with small or gloved hands
- Optimised thread (compatible with DIN GL 45 closures) for faster bottle opening and closing

Delivery incl. pouring ring and optimised screw caps made of PP.

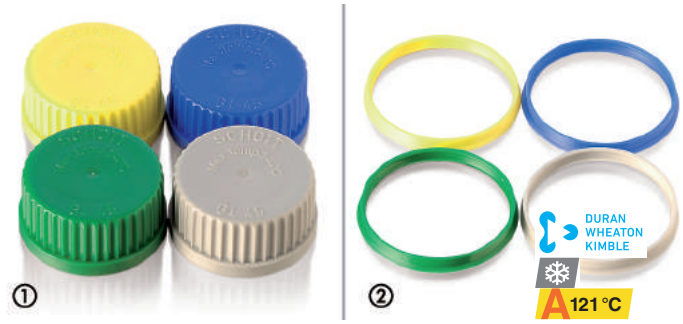
DURAN® GL 45 HPLC reservoir bottles



Made of borosilicate glass 3.3. Outstanding chemical resistance, extremely low profile of extractable inorganic ions; free from organic extractable substances. Safe and practical alternative to media bottles with a flat bottom. The central cavity in the base of the bottle enables mobile phases and solvents to be dispensed without having to tilt the bottle. The side opening on the base of the bottle prevents the bottle from floating during degassing in an ultrasonic bath and enables water to drain away after cleaning. GL 45 thread.
With retrace code. Autoclavable at 121 or 134 °C.
Delivery without lock.

Screw caps

DURAN® PURE Premium screw caps

Made of **TPCh260** (similar to PFA), without colour additives. Manufactured in ISO Class 7 clean rooms. Temperature-stable from -196 to +260 °C, high resistant to chemicals. For laboratory bottles with DIN standard thread. Characteristics ideal for application in pharmaceutical industry, for storing aggressive media as well as for demanding sterilisation procedures. FDA and USP-compliant. Autoclavable and hot-sterilisable.
With retrace code, batch certificates available.

STERICLIN® sterile barrier system packaging: Caps are sealed in packs of 5 and can be sterilised directly in the STERICLIN® packaging. No pre-cleaning necessary. Can be stored for up to 6 months after sterilising. Sterilizable by STEAM, EO and FORM sterilisation, the corresponding indicators are imprinted on the STERICLIN® packaging. Recommended sterilisation process: steam sterilisation with pre-vacuum, from 121 °C for 20 minutes up to 134 °C for 20 minutes.

Pressure equalisation sets

Screw cap made of **PPS** with **PTFE/silicon** gasket and interchangeable filter membrane (pore size 2.5 µm) made of **PTFE**. For pressure equalisation after the removal or addition of liquid samples from sealed containers or for the storage of out-gassing media. Pressure equalisation takes place when the pressure differential exceeds 0.1 bar. High chemical resistance since medium only comes into contact with PTFE.
Temperature stable from -200 to +250 °C, autoclavable.

Technical specifications:

Bottle multi-dispensers

Screw cap GL 45 with connectors

Made of **PP**. Temperature stable up to +140 °C, dishwasher safe. Features two continuous connectors, angled at the top to prevent kinking of tubes. Autoclavable.

- Designed for safe, sterile transfer of liquid media within a closed system
- The core rotates freely and allows a container to be replaced without twisting the fixed tubes
- Ideal for use with soft elastic tubes with ID 6-9 mm (Piton®, Tyron®, silicon), e.g. when using peristaltic pumps
- A filter attachment for sterile pressure equalisation is optional

Screw cap GL 45 with twin connectors, outer ∅ 6-9 mm

DURAN® breather screw caps with ePTFE membrane

Made of PP with welded-in PTFE membrane. The membrane, made of expanded PTFE with a pore size of 0.2 µm, enables sterile gas exchange and prevents aqueous liquids with high surface tension from passing through it.
During the autoclaving process, the caps can be securely screwed on to the laboratory glass bottles. Autoclavable at 121 °C (20 minutes) or 134 °C (3 minutes).

Applications:

- Pressure compensation during steam sterilisation/autoclaving of media or buffer solutions in bottles up to a volume of 5 litres
- Sterile gas exchange for aerobic microorganism, shaken and suspended cell cultures
- Short-term storage of sterilised media
- Storage of gas-forming substances

DURAN® GL 45 bottle stopper

Made of bromobutyl rubber. Can be used with all DURAN® laboratory glass bottles with GL 45 thread. Can additionally be secured by a screw cap with hole (only recommended for applications not involving pressure). Low permeability to air, gases and moisture.
Top with seven numbered semicircular indentations for piercing with needles, good self-sealing when pierced several times.
Temperature-stable from -50 to +121 °C, autoclavable.

Applications:

- Storage of oxygen-sensitive materials
- Applications which require gas flushing or samples to be decanted using a syringe
- Cultures with anaerobic microorganisms (the use of pressure-resistant bottles is recommended)
- Storage of anaerobic culture media (the use of brown glass bottles is recommended)
- Investigation of aerobic methane oxidation (MOx)

Bottle multi-dispensers

Bottle multi-dispensers

Screw cap GL 45 with 2 or 3 GL 14 threaded collars. Suitable e.g. for filling HPLC-automatic machines with solvents, for usage with titration equipment and for transferring sterile culture media in biological processes.
Can also be used in lieu of a Woulffe's bottle.
Multi-dispenser bottles can be connected to tubes with outer-∅ of 1.6 to 6.0 mm with a GL 14 laboratory screw joint. The sealing insert is freely rotatable and prevents hoses from twisting when changing the bottle.
Autoclavable.
Delivery without bottle, laboratory screw joints GL 14 for different tube diameters and a pressure compensation set. Please order separately.

Made of **PP**, high chemical resistance, temperature stable from -40 to +140 °C.

Version	Art. No.	Pack Qty.	€
2-way dispenser	**HX84.1**	2	45,05
3-way dispenser	**HX85.1**	2	48,15

Made of **PTFE** or **PFA** with screw cap made of **polyphenylene sulfide**. Multi-purpose, chemically inert and temperature stable from -50 to +250 °C.

Version	Art. No.	Pack Qty.	€
2-way dispenser made of PFA	**K094.1**	1	102,70
3-way dispenser made of PTFE	**K095.1**	1	130,05

Laboratory screw joints for 2- and 3-way dispensers

Consists of 2 threaded joint caps GL14 made of **PP** and 2 inserts for different tube diameters made of **PTFE** with silicone ring. Autoclavable.

Thread adapter

Made of PTFE. For bottles with thread S 38-430, for screwing on GL 45-adapters. Suitable for bottles, Art. No. AE00.3, for use with dispensers, bottle multi-dispensers or HPLC-bottle dispenser systems.

Art. No.	Pack Qty.	€
KY68.1	1	56,65

GLS 80 bottle multi-dispensers

Made of **PP** or **PTFE**. Screw cap GLS 80 ① with four GL 18 thread necks. Ideal for loading HPLC-equipment with solvents, for use with titration devices and for transferring sterile culture media in biological processes. Also suitable for use Woulff bottles. Tubes with an outer ∅ of 3.2 to 12.0 mm can be attached to the bottle multi-dispensers with a GL 18 lab screw fitting. Autoclavable.
Delivery without bottle (Art. No. XT02.1ff), laboratory screw joints (Art. No. KE53.1ff) and pressure equalisation set (Art. No. KE85.1). Please order separately.

① Made of **PP**. Temperature stable from -40 to +140 °C.

Art. No.	Pack Qty.	€
KE52.1	1	57,00

⑥ Made of **PTFE** with screw cap made of **PP**.

HT (high-temperature) laboratory screw joints with GL thread

By Bohlender. Black screw cap made of PPS, internal parts comprising clamping ring (PPS), sealing wedge and sealing plate (both made of PTFE) and additional O-ring (FKM) for screwed connections for hose/tube outer ∅ smaller than 3 mm (without coming into contact with flow medium). High chemical resistance since medium only comes into contact with PTFE. Temperature stable from -50 to +250 °C. Pressure stable up to max. 10 bar, suitable for use in a vacuum.

Applications:
For connecting apparatus and fittings with GL thread to hard-walled hoses or tubes made of glass, plastic or metal. For fixing in place probes, thermometers, immersion tubes and cable feeds that have been inserted in reaction vials.

Delivery incl. screw cap, clamping ring, sealing wedge and sealing plate as well as additional O-ring for laboratory screw joints for hose outer ∅ smaller than 3 mm.

GL connecting piece, straight

By Bohlender. Connecting piece made of PTFE with GL thread. Unlimited chemical resistance since medium only comes into contact with PTFE. Temperature stable from -200 to +250 °C.
Pressure stable up to max. 10 bar, suitable for use in a vacuum.

Application: For the distribution of liquids or gases.
As a reducer for connecting various tube and hose outer ∅.

Bottle multi-dispensers

Multiple distributor for bottles

By Bohlender. Screw cap made of PE and distributor element made of PTFE. Excellent chemical resistance, temperature stable from -50 to +80 °C.

Applications:
For drawing and filling aggressive or pure liquids and for inserting hoses, tubes and probes into balloon flasks or vacuum flasks by the manufacturer Nalgene® with thread types 53 B or 83 B.
Delivery without HT laboratory screw joints with GL thread, please order separately.

Suitable for thread	Neck	Art. No.	Pack Qty.	€

Barrel aeration

By Bohlender. Basic body made of PTFE suitable for R¾" internal thread, with GL 32 cap thread. With PTFE/silicone gasket and replaceable filter membrane (pore size 2.5 µm) made of PTFE, screw cap made of PPS. High chemical resistance since medium only comes into contact with PTFE. Temperature stable from -20 to +230 °C, autoclavable.
Pressure compensation from 0.1 bar differential pressure.

Maximum flow rate:
- At 0.5 bar differential pressure: 80 l/h
- At 1.0 bar differential pressure: 320 l/h

Applications:
For pressure compensation during liquid removal or when filling containers. The integrated filter membrane prevents contamination of the medium with dust or dirt particles.

Stirring magnet fish-clip® holders

Ideal for stirring sensitive liquids such as cell suspensions or tissue cultures. Magnet is placed into vessel with the flexible rotor clamp and can be fixed over the vessel base at the required height. When the magnetic stirrer is switched on the rod magnet will turn with controlled movements, protecting the substance and vessel. The support rod does not turn and the stopper remains gastight.

- Rotor and support rod made of PVDF
- Support rod: length 250 mm, ∅ 10 mm
- Stable to 160 °C, autoclavable

Delivery incl. magnetic follower.

Type	Art. No.	Pack Qty.	€

Stirrer reactors

Stirrer reactor sets

Significantly better mixing compared to standard magnetic stirring bars. Suitable for mixing solutions, dissolving solids, and fermentation processes. Driven by a magnetic stirrer. An additional media bottle or a sterile pressure equaliser can be connected using the DURAN® connector system.

- Materials used: PP/PTFE/PEEK/stainless steel/DURAN® glass
- Parts in direct contact with media are FDA-compliant
- Speed range: up to 500 rpm
- System is fully autoclavable
- Temperature stable up to +140 °C.

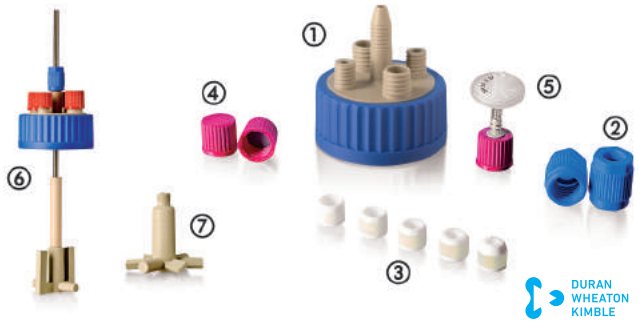
① **GL 45 stirrer reactors**

- 2 GL 14 connections
- Variable stirrer shaft, fits 500 ml and 1000 ml DURAN® GL 45 threaded bottles
- Compatible with the DURAN® connector system
- Suitable for hoses with diameters from 1.6 mm to 6.0 mm

Delivery incl. 500 ml or 1000 ml DURAN® GL 45 threaded bottle, 2-port GL 45 screw joint made of PP **with magnetic stirrer shaft**, 2 x GL 14 screw cap (PBT, red), (please order matching laboratory screw joints HX86.1-HX89.1 separately).

Type	Art. No.	Pack Qty.	€
GL 45 stirrer reactor set, 500 ml	**PK85.1**	1	254,00
GL 45 stirrer reactor set, 1000 ml	**PK86.1**	1	264,00

② **GLS 80 stirrer reactors**



- 4 connections: 2 x GL 18, 2 x GL 14
- Variable stirrer shaft, fits 1000 ml and 2000 ml DURAN® GLS 80 wide-neck threaded bottles
- Interchangeable stirrer element (anchor stirrer is standard, impeller stirrer is optional)
- Compatible with the DURAN® connector system
- Suitable for hoses with diameters from 1.6 mm to 12.0 mm

Delivery incl. 1000 ml or 2000 ml DURAN® GLS 80 wide-neck threaded bottle, GLS 80 4-port screw joint made of PP **with magnetic anchor stirrer** and GL 14 screw joint (PP, blue), 2 x GL 14 and 2 x GL 18 screw cap (PBT, red), (please order matching laboratory screw joints HX86.1-HX89.1 and KE53.1-KE57.1 separately).

Type	Art. No.	Pack Qty.	€
GLS 80 stirrer reactor set, 1000 ml	**PK87.1**	1	269,00
GLS 80 stirrer reactor set, 2000 ml	**PK88.1**	1	278,00

DURAN WHEATON KIMBLE
Material DURAN®

Desiccator bases

Made of DURAN® glass with ground flange. Without coating. The precision workmanship allows parts such as covers, bases, stopcocks and closures to be replaced and interchanged between all DURAN®-desiccators of similar type and size. By combining individual parts, the DURAN®-system enables the user to be flexible and work according to his individual needs.

DURAN®-desiccators are excellent for a wide range of applications: e.g. for drying and keeping substances dry; for culturing plants, bacteria, cell cultures; for vacuum manipulation; as mini clean-rooms for storage of sensitive substrates, components, high-purity metals; in the development or manufacture of semiconductors; in material and environmental research; in chip technology, etc. Designed for use up to the maximum technically possible vacuum (0 mbar).

DN = Nominal diameter

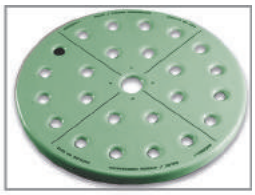
300	18,5	420	332	380 ±2	**ETT1.1**	1	581,00

Warning:
When working with glass, the limits caused by mechanical stress and changes of temperature must be considered and the utmost precaution must be taken:

Never subject glass equipment to sudden temperature changes, i.e. do not remove when hot from the drying cabinet and place on a cold or wet lab bench. This applies especially to thicker glass equipment, such as desiccators.

To avoid mechanical stress in the glass, evacuated vessels and/or vessels under pressure may not be heated on one side only or with a naked flame.



Glass vessels must be checked for flaws and defects prior to evacuation or pressure load (severe scratches, grooves, etc). Damaged glass vessels may not be used when working with vacuum or pressure.

Never expose glass equipment to sudden pressure changes, e.g. do not aerate evacuated vessels instantly. Laboratory glass vessels with flat base (e.g. Erlenmeyer and flatbottomed flasks) may not be put under pressure or vacuum.

▶ Lubricating grease on page 1184

▶ For drying agents, e.g. silica agents etc., see the Chromatography Chapter!

Polycarbonate dessicator

By Nalgene®. Made of **PC**, fully transparent. For normal pressure and vacuum applications to max. 10 mbar. Maintains a partial pressure of 0.95 bar (95 kPa) over a 24 hour period. Implosion safe if used properly. No greasing needed. Connections for tubes with inner-∅ from 6.35 to 9.53 mm in lid and base. Suitable for room temperature applications only.

Delivery incl. silicon O-ring, vacuum tap made of PP (removable) and 2 TPE plugs for sealing hose connections while not in use. Please order dessicator plate separately.

Desiccators

Star Vitrum desiccator

Panels made of **type 3.3 borosilicate glass**, frame made of reinforced aluminium. Door with all-round rubber seal and magnetic catch. Usable with up to 26 shelves. For drying and safe storage of moisture-sensitive products (e.g. reference solutions, retained samples, metallographic samples, tobacco leaves, DNA samples, etc.). Ideal for suitable for storing hot materials (max. 300 °C), excellent resistance to chemicals. Integrated digital thermal hygrometer with Min/Max function for monitoring actual temperature and moisture levels.

Technical specifications:

Total volume	45 l
Usable volume	42 l
Outer dimensions (W x H x D)	310 x 375 x 525 mm
Usable inner volume (W x D x H)	260 x 330 x 480 mm
Usage temperature	-20 to +150 °C
Max. all-over load per shelf	10 kg
Total all-over load	30 kg
Weight (approx.)	14 kg

Delivery incl. 4 variable height shelves made of stainless steel and 1 bottom pan for dessicants.

Art. No.	Pack Qty.	€
NX19.1	1	1185,75

Super Star inert gas desiccator

Panels made of transparent **PMMA**, frame made of reinforced aluminium. All-round rubber door seal with magnetic strip and barrel lock. Usable with up to 26 shelves. Nitrogen or noble gases can be introduced through two gassing connections with quick couplings and self-closing valves. This allows the safe storage of air and moisture sensitive substances as well as highly reactive or toxic chemicals in an inert gas atmosphere. Integrated large digital thermal hygrometer with Min/Max function for monitoring temperature and moisture levels.

Technical specifications:

Total volume	45 l
Usable volume	42 l
Outer dimensions (W x H x D)	310 x 375 x 525 mm
Additional space required for coupling	150 mm per side
Usable inner volume (W x D x H)	260 x 330 x 480 mm
Usage temperature	-20 to +70 °C
Max. all-over load per shelf	10 kg
Total all-over load	30 kg
Weight approx.	7.1 kg

Delivery incl. 4 variable shelves made of PMMA, bottom pan for desiccants and hoses with quick couplings for gassing.

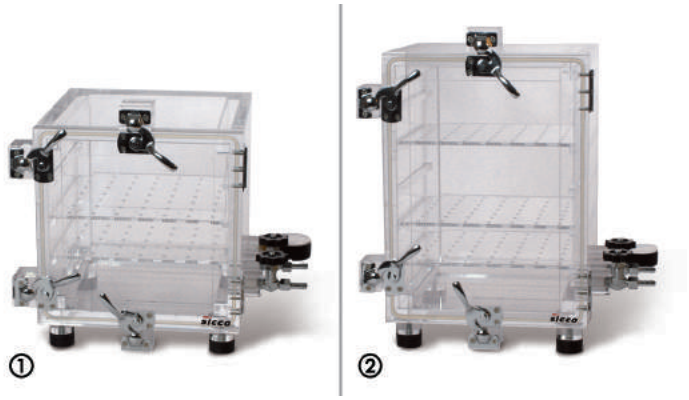
Auto-Star desiccator



Panels made of transparent **PMMA**, frame made of reinforced aluminium. Door with all-round rubber seal and magnetic catch. Usable with up to 26 shelves. For long-term storage of moisture-sensitive materials, reference samples, electronic components, photographic equipment, papers, cultures etc.
Automatic drying ensures a constant low humidity and compensates for frequent opening of the door. In case of power failure, the humidity level inside the desiccator does not increase for several hours thereby giving valuable samples extra protection. No need for manual regeneration of the silica gels, no need for frequent checks, space for desiccant dish can also be used. Digital thermal hygrometer with Min/Max function for monitoring actual temperature and moisture levels.

Technical specifications:

Total volume	45 l
Usable volume	42 l
Outer dimensions (W x H x D)	310 x 375 x 525 mm
Additional space required for drying unit	60 mm (back)
Usable inner volume (W x D x H)	260 x 330 x 480 mm
Working temperature	-20 to +70 °C
Max. all-over load per shelf	10 kg
Total all-over load	30 kg
Weight (approx.)	7.3 kg
Power supply	230 V, 50 Hz

Delivery incl. 4 variable shelves made of PMMA, drying unit and thermal hygrometer.

Art. No.	Pack Qty.	€
NP95.1	1	1565,20

Vacuum desiccators

Made of transparent **PMMA**, wall thickness 25 mm. All-round silicon door seal, with 4 or 5 hinged safety locks. For contamination-free storage of air, moisture and heat sensitive products as well as for gentle drying of easily degradable and reactive substances.

Technical specifications:

Model	1	2
Usable volume (l)	17.5	24.5
Exterior dimensions W x D x H (mm)	300 x 300 x 340	300 x 300 x 440
Additional space required for valves + vacuum gauge (mm)	150	
Usable inner volume W x D x H (mm)	260 x 260 x 260	260 x 260 x 360
Working temperature (°C)	-20 to +70	
Analogue vacuum gauge display	0.1 to 0.001 MPa = 1000 to 10 mBar	
Needle valves (connector outer ∅, mm)	9.0	
Number of shelves in scope of supply / max.	2 / 3	3 / 5
Connections for hoses with internal dia. (mm)	9	
Max. all-over load per shelf (kg)	9	
Total all-over load (kg)	30	40
Weight, approx. (kg)	15	18

Delivery incl. shelves made of PMMA, analogue vacuum gauge and needle valves.

Certified Vial Kits ND9

HPLC and GC certified, tested for blank values and impurities.
Kits comprising:
- 100 short-thread screw top vials ND9 made of hydrolytic class 1 borosilicate glass. Dimensions: ∅ 11.6 x H 32 mm
- 100 **PP** UltraClean screw caps, with 6 mm hole ∅ and fitted septa, white silicone rubber/red PTFE, hardness (shore A) 55°, thickness 1.0 mm

Type	Volume (ml)	Art. No.	Pack Qty. (set)	€
Clear glass, with labelling space	1,5	**XC64.1**	1	54,15
Brown glass, with labelling space	1,5	**XC65.1**	1	54,20

Rotilabo®-screw neck ND10 vials

Made of borosilicate glass, hydrolytic class 1. Thread 10-425.
Wide opening for easy filling. Flat bottom. Dimensions: ∅ 11.6 x H 32 mm.
CleanPack, bottles packed in a clean room under class 10.000 conditions.
Standard bottles for GC and HPLC. Suitable for automatic samplers.
Please order screw caps separately.

Type	Volume (ml)	Art. No.	Pack Qty.	€
Clear glass	1,5	**LC16.1**	100	16,00
Clear glass, with labelling area	1,5	**NN01.1**	100	17,00
Brown glass, with labelling area	1,5	**LC17.1**	100	18,45

Micro-inserts

Made of clear borosilicate glass. For screw thread ND10 vials.

Type	Volume (ml)	Dimensions L x ∅ (mm)	Art. No.	Pack Qty.	€
Tapered 15 mm tip	0,1	31 x 6	**LC07.1**	100	26,30
With plastic spring	0,1	29 x 5,7	**LC08.1**	100	70,85
Flat base	0,2	31 x 6	**LC09.1**	100	22,10

Screw caps closed

Made of **PP**, black. Without hole. For screw top vials ND10.
Delivery incl. septum, assembled.

Septum materials	Thickness (mm)	Hardness (shore A)	Art. No.	Pack Qty.	€
Natural rubber orange red / TEF transparent	1,3	60°	**TY76.1**	100	26,65

Screw caps with bore hole

Made of **PP**, black. Bore hole ∅ 7 mm. For screw thread ND10 vials.
Delivery incl. septum, mounted.

Septum materials	Thickness (mm)	Hardness (shore A)	Art. No.	Pack Qty.	€
Silicone white / PTFE red UltraClean	1,3	45°	**LC18.1**	100	35,65
Silicone white / PTFE beige	1,5	45°	**LC19.1**	100	36,45

ND11 Rotilabo®-welt rim vials

With flange rim. Made of borosilicate glass, hydrolytic Class 1. Wide opening for easy filling. Flat bottom. CleanPack, bottles packed in a clean room under class 10.000 conditions. Standard bottles for GC and HPLC. Suitable for automatic samplers. Please order micro-inserts and flange caps separately.

Type	Volume (ml)	Dimensions H x ∅ (mm)	Art. No.	Pack Qty.	€
Clear glass	1,5	32 x 11,6	**LC22.1**	100	13,40
Clear glass	2,5	41 x 11,6	**TY77.1**	100	21,85
Clear glass, with labelling area	1,5	32 x 11,6	**LC23.1**	100	14,55
Brown glass, with labelling area	1,5	32 x 11,6	**LC24.1**	100	16,40

Micro inserts

Made of borosilicate glass, clear glass.
For ND11 crimp top and snap ring vials.

Type	Volume (ml)	Dimensions L x ∅ (mm)	Art. No.	Pack Qty.	€
Tapered 15 mm tip	0,1	31 x 6	**LC07.1**	100	26,30
With plastic spring	0,1	29 x 5,7	**LC08.1**	100	70,85
Flat base	0,2	31 x 6	**LC09.1**	100	22,10

Flange caps with bore hole

Made of aluminium, with transparent coating. Bore hole ∅ 5.5 mm.
For welt rim ND11 vials.
Delivery incl. septum, mounted.

Septum materials	Thickness (mm)	Hardness (shore A)	Art. No.	Pack Qty.	€
PTFE red / silicone white / PTFE red	1,0	45°	**LC26.1**	100	38,40
Silicone white / PTFE red, UltraClean	1,3	45°	**LC27.1**	100	30,25
Natural rubber orange-red / butyl red / TEF transparent	1,0	45°	**LC28.1**	100	12,80
Natural rubber red-orange / TEF transparent, AGILENT-quality	1,0	60°	**LC29.1**	100	12,60
Butyl red / PTFE grey	1,3	55°	**LC30.1**	100	19,75
Silicone white / PTFE blue, slotted	1,5	55°	**NN02.1**	100	60,50

Magnetic flanged caps with bore hole

Made of aluminium, magnetic, painted gold. Bore hole ∅ 5 mm.
For ND11 rolled edge vials.
Delivery incl. septum, mounted.

Septum materials	Thickness (mm)	Hardness (shore A)	Art. No.	Pack Qty.	€
Silicone white / PTFE red UltraClean	1,3	45°	**PT63.1**	100	46,55
PTFE red / silicone white / PTFE red	1,0	45°	**PT64.1**	100	53,05

TPF crimp caps with bore hole

Free of halogens, elastomers, plasticisers, silicone, butyl rubber, PTFE, FEP, TEF. Recommended for GC/LC-MS, for the storage of standards and analysis of halogenated compounds, VOC's, plastics, phthalates, polymerisation catalysts and silicones.
For ND11 rolled edge vials.

Septum materials	Thickness (mm)	Art. No.	Pack Qty.	€
Aluminium (with O-ring seal)	0,06	**NN03.1**	100	38,75

Rotilabo®-snap ring vials ND11

Made of borosilicate glass of hydrolytic class 1.
Wide opening for easy filling. Flat base. Dimensions: ∅ 11.6 x H 32 mm.
CleanPack, vials packed in a clean room under class 10.000 conditions.
Standard vials for GC and HPLC. Suitable for automatic samplers.
Please order micro inserts and screw caps separately.

Type	Volume (ml)	Art. No.	Pack Qty.	€
Clear glass	1,5	**TY79.1**	100	15,00
Clear glass, with labelling space	1,5	**TY80.1**	100	16,45
Brown glass, with labelling space	1,5	**TY81.1**	100	17,60
TPX, with integrated glass-micro insert	0,2	**TY82.1**	100	70,45

Snap ring caps hard version

Made of **PE**, transparent. With bore hole. For ND11 snap ring vials.
Hard version for optimal leak tightness. No crimping tool is required.
Delivery incl. septum, assembled.

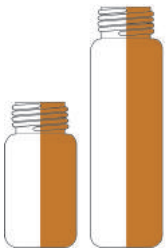
Septum materials	Thickness (mm)	Hardness (shore A)	Art. No.	Pack Qty.	€
RedRubber / PTFE beige, AGILENT quality	1,0	45°	**TY83.1**	100	20,45
Natural rubber orange red / TEF transparent	1,0	60°	**TY84.1**	100	19,30

Snap ring caps soft version

Made of **PE**, blue. With bore hole. For ND11 snap ring vials.
Soft version for easier push-on or removal. No crimping tool is required.
Delivery incl. septum, assembled.

Septum materials	Thickness (mm)	Hardness (shore A)	Art. No.	Pack Qty.	€
RedRubber / PTFE beige, AGILENT quality	1,0	45°	**TY85.1**	100	22,05
Natural rubber orange red / TEF transparent	1,0	60°	**TY86.1**	100	20,70

Push-on caps



Made of **PE**, blue, push-on type. For ND11 crimp top and snap ring vials.
No crimping tool is required. Closed, with thinned penetration area instead of a septum, for non-critical assays.

Art. No.	Pack Qty.	€
TY78.1	100	8,95

Crimping tools for autosampler vials

Rotilabo®-closing and opening pliers

Made of hardened steel with chemical resistant special coating. For sealing and opening standard aluminium crimp caps with ND 8, 11, 13 or 20 mm.

- Special surface coating for excellent grip
- Effortless working thanks to resetting spring
- Adjusting screws in crimping head and handle for optimal sealing and reproducible crimping results

Cleanroom crimping tongs

Made entirely of stainless steel, corrosion and heat resistant.
The tool is tolerant to repeated sterilisation for cleanroom use. Free of lubricant and uncoated; no particles are released during use and therefore no increase in particle density occurs in the cleanroom.
Crimping pressure and height are adjustable for optimal crimping results, even when using different types of vial. Autoclavable.

ND11 and ND20 cordless crimping tools

By Macherey-Nagel. Mobile electronic crimping tools for 11 mm and 20 mm aluminium crimp caps (unsuitable for magnetic or bimetal crimp caps).

- Consistent and reproducible crimping results
- Control unit for crimping pressure adjustment
- Longlife lithium batteries

Delivery incl. charging station and connector set.

High performance crimping tool ND11 and ND20

By Macherey-Nagel. For secure and reproducible crimping and decapping of crimp caps on sampling bottles and autosampler vials.

- Also suitable for magnetic and bimetal crimp caps thanks to very powerful motor.
- Exchangeable crimping and decapping heads
- Digital LED display
- Memory function for different crimp settings
- A stand is optionally available for convenient and safe handling

Delivery incl. power supply (12 V) and cable.
Please order crimping and decapping heads separately.

DURAN WHEATON KIMBLE

NMR-vials

Vials contain no paramagnetic substances. Outstanding straightness. Uniform wall thickness. Good regularity of diameter. Length 178 mm.
Two models available:

- **Economic:** made of DURAN®, with retrace code, for one-time use in fully automatic sample changers or for high throughput
- **Scientific:** made of borosilicate glass, for multiple use.
  Vials can be cleaned and sterilized. Optimal utilization of substance in extremely high-resolution range.

Technical specifications:

Model	Economic	Scientific
Length (mm)	178	178
∅ outer (mm)	4,95 ±0,05	4,97 ±0,013
∅ inner (mm)	4,20 ±0,05	4,20 ±0,025

S

Sterile culture vials

- Made of transparent **PS** or translucent **PP**
- With two-position **PE** closure for anaerobic and aerobic bacteria cultures
- **Sterile**
- With or without graduations and labelling space
- Available in space-saving box or economy-priced bag

	PS vials	PP vials
Temperature stability	up to +70 °C	-190 to +121 °C

Fluoroplastic test tubes

Made of **PFA**. Highly transparent. With or without ring mark, stopper joint made of PP or screw cap. Chemically inert to nearly all chemicals.

- Temperature resistant in the range -200 to +250 °C
- Hydrophobic and anti-adhesive, extremely smooth surfaces allow easy cleaning
- High purity, ideal for used in trace analysis and for storage of reference solutions
- No memory effect
- Autoclavable

Type	Volume (ml)	Height (mm)	Ø (mm)	Art. No.	Pack Qty.	€
With ring mark at 10 ml, with stopper joint made of PP	12	110	16	**YA25.1**	1	45,70
Without ring mark, without stopper joint	12	110	16	**YA26.1**	1	34,85
With ring mark at 10 ml, with screw cap GL 25	15	110	22	**YA27.1**	1	66,45
Without ring mark, with screw cap GL 25	15	110	22	**YA28.1**	1	55,45

PFA test tubes with plugs

Made of **PFA**. Highly transparent. Microwave safe. Autoclavable.

- Temperature resistant in the range -196 to +250 °C
- Inert to virtually all chemicals, including hydrofluoric and nitric acid
- High purity, low metal ion content, ideal for use in trace analysis and for the storage of highly pure substances
- No memory effect
- Hydrophobic and anti-adhesive, extremely smooth surfaces allow easy cleaning

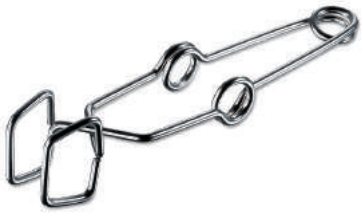
Rotilabo®-test tubes



Made of soda-lime glass. Standard design L 160 x Ø 16 x thickness 0.6 mm, with round base and straight rim, slightly narrowed at the top.

Art. No.	Pack Qty.	€
0486.2	250	28,60

Rotilabo®-test tube clamps

Wooden. Length 180 mm. For test tubes with Ø 12-20 mm.

Art. No.	Pack Qty.	€
0645.1	12	10,00

Rotilabo®-test tube holder with finger grip

Manufactured from nickel-plated steel. For test tubes with max. 30 mm Ø. Length 130 mm.

Art. No.	Pack Qty.	€
X114.1	1	5,30

Test tubes

A 121 °C

Rotilabo®-test tubes

Made of borosilicate glass 3.3. Thick or thin walled.
Good thermal fatigue resistance. Autoclavable.

Straight rim

Stoppers

Rubber stoppers with turn-up lip

For tight sealing of glass, plastic and metals containers with or without a flanged rim or NS. Tight fit prevents unintentional opening.
The rubber stoppers can be pierced for removal of sample and remain watertight even after being perforated several times.
Temperature stable from -20 to +100 °C.

Model	Bottom ∅ (mm)	Top inside ∅ (mm)	for ground glass joints	Art. No.	Pack Qty.	€

Silicone stoppers with turn-up lip

Ideal for impervious closure of glass, plastic or metal vessels, with or without flanged rim or Ns. Tight fit prevents unintentional opening.
The silicone stoppers can be pierced for removal of sample yet remain watertight even after being perforated several times.
Temperature stable from -60 to +220 °C. Autoclavable.

Metal Free centrifuge tubes

Made of highly pure **PP**, with white labelling area. PE lid, fitted. **Sterile**. **Heavy metal content <1 ppb**, suitable for sample preparation and storage for trace analysis, ICP-MS and other applications which require an extremely low metal content.
Nuclease and endotoxin free, non-cytotoxic.
Temperature stable from -80 to +122 °C. Centrifugable to 12 500 x g.

Volume (ml)	∅ x H (mm)	Packaging	Art. No.	Pack Qty.	€
15	17 x 120	50 in bag	**XX96.1**	500	162,35
15	17 x 120	25 in rack	**XX97.1**	500	179,55
50	29 x 115	50 in bag	**XX98.1**	500	179,55
50	29 x 115	25 in rack	**XX99.1**	500	205,35

Centrifuge tubes Eco

Made of **PP**. With raised graduation marking. **Sterile:** with red lid, gamma sterilized or **non-sterile:** with blue lid. Can be centrifuged up to 3000 x g.

Without vertical lip

Volume (ml)	Version	∅ x H (mm)	Art. No.	Pack Qty.	€
15	non-sterile	17 x 120	**AN76.1**	150	35,35

Flip-cap centrifuge tubes

Made of **PP**, lid of **HDPE**. **Sterile**.

- Screw/snap-on lid enables single-handed opening and also complete removal
- RNase-/DNase free, pyrogen-free
- With white labelling space
- Temperature stable from -80 to +120 °C

Volume (ml)	**15**	**50**
Graduations	1 to 15 ml	5 to 50 ml

50	**EKY2.1**	500 (20 x 25)	176,00

▶ Racks for centrifuge tubes see page 229

Centrifuge tubes

CELLSTAR®-centrifuge tubes

By Greiner Bio-One.
Made of PP. Blue **HDPE** screw cap. **Sterile.**
Excellent thermal, mechanical and chemical stability. Conical base.
Blue graduations and white labelling space.
DNase/RNase and human DNA free, non-pyrogenic and non-cytotoxic.
Temperature stable from -50 to +100 °C.

Type	Max. centrifugability (x g)	
	Fixed angle rotor	Oscillating rotor
15 ml tubes	15 000	4000
50 ml tubes	9000	3200
50 ml tubes with rim	11 500	2800

Transparent, without rim

50 ml centrifuge tubes

Made of optically clear **PS**, screw cap made of HDPE.
Graduated from 2.5 to 50 ml. Temperature stable from 0 to 90 °C.
Centrifugable up to 1000 x g, sterile test tubes are also suitable for storage of biological samples.

Version	∅ x H (mm)	Art. No.	Pack Qty.	€
Non-sterile, lid colour yellow	29 x 118	**AYY4.1**	500	151,50
Sterile, lid colour green, in rack	29 x 118	**AYY5.1**	500 (20 x 25)	260,15

Oak Ridge centrifuge tubes

By Nalgene®. Made of **PC, PPCO, PSF** or **FEP**.
For **high speed centrifugation**.
For use in cooled or uncooled centrifuges up to 50 000 x g. Before centrifuging, the tubes must be at least 80 % full and FEP tubes 100 % full.
Please note: screw closures with a seal are necessary for centrifuging hazardous substances or for centrifugal forces exceeding 10 000 x g.
Autoclavable. Before autoclaving, please make sure you always unscrew the lid.

Type 3115. Made of **PSF**, transparent.
Screw closure made of **PP** without seal.

Nominal capacity (ml)	Filling capacity (ml)	∅ x H (mm)	Art. No.	Pack Qty.	€
30	30	25,7 x 94,5	**ATC6.1**	10	82,75
50	43	29,0 x 107,7	**ATC7.1**	10	100,00

① Type 3118. Made of **PC**, transparent. Screw closure made of **PP** without seal.

Nominal capacity (ml)	Filling capacity (ml)	∅ x H (mm)	Art. No.	Pack Qty.	€
10	10	16,1 x 81,7	**PH26.1**	10	65,05
28	28	25,4 x 101,8	**PH27.1**	10	69,15

50	43	28,8 x 107,0	**PH29.1**	10	79,85
85	81	38,2 x 105,7	**PH30.1**	10	91,20

② Type 3119. Made of **PPCO** (polypropylene copolymer), translucent.
Screw closure made of **PP** without seal.

Nominal capacity (ml)	Filling capacity (ml)	∅ x H (mm)	Art. No.	Pack Qty.	€
10	10	16,0 x 81,4	**PH36.1**	10	51,50
28	28	25,4 x 101,9	**PH37.1**	10	57,15
30	30	25,5 x 94,3	**PH38.1**	10	55,35
50	42	28,8 x 106,7	**PH39.1**	10	72,15

③ Type 3114. Made of **FEP**, screw closure made of **ETFE** without seal.
Resistant to acids, bases and solvents. Ideal for chloroform and phenol extractions.

Nominal capacity (ml)	Filling capacity (ml)	∅ x H (mm)	Art. No.	Pack Qty.	€
10	10	16,0 x 81,5	**PH40.1**	2	56,55
30	30	25,7 x 93,7	**PH41.1**	2	86,70
50	46	28,8 x 107,7	**PH42.1**	2	114,25

Leak-tight closures for Oak Ridge centrifuge tubes

Screw closures from **PP**, with silicon seal.
These enclosures ensure leak-free use of Oak Ridge centrifuge tubes.
Recommended for centrifugal forces of 10 000 x g or higher. Autoclavable.

Size (mm)	suitable for	Art. No.	Pack Qty.	€
20	PH27.1, PH28.1, PH37.1, PH38.1, PH98.1, PK02.1	**PH43.1**	2	23,50
24	PH29.1, PH39.1, PH99.1, PK03.1	**PH44.1**	2	26,50

Centrifuge bottles

A 121 °C

Oak Ridge centrifuge tubes with leak-tight closure

By Nalgene®. Made of **PC, PSF** or **PPCO**. Screw closures made of **PP** with silicon seal. For **high speed centrifugation. Leak-proof.**
For use in cooled or uncooled centrifuges up to 50 000 x g.
Before centrifuging, tubes must be at least 80 % full.
Autoclavable. Before autoclaving, please make sure you always unscrew the lid.

Type 3137. Made of **PSF**, transparent.

Nominal capacity (ml)	Filling capacity (ml)	∅ x H (mm)	Art. No.	Pack Qty.	€
50	42	29 x 115,3	**ATC5.1**	10	176,65

Type 3138. Made of **PC**, transparent.

Nominal capacity (ml)	Filling capacity (ml)	∅ x H (mm)	Art. No.	Pack Qty.	€
10	10	16,1 x 82,3	**PH96.1**	10	84,60

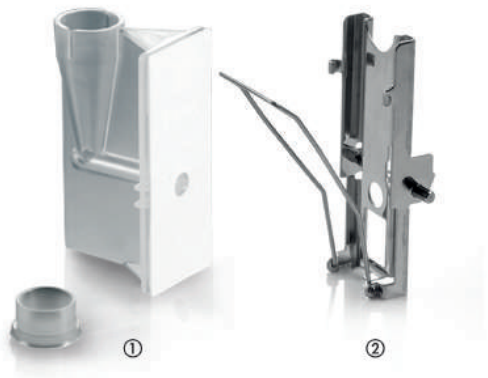
Accessories for centrifuge bottles



Leak-tight closures. Screw closures made of **PP** with silicon seal.

Size (mm)	suitable for	Art. No.	Pack Qty.	€
58	PH89.1, PH91.1	**PH93.1**	2	33,60
63	PH82.1, PH83.1, PH86.1, PH90.1, PH92.1	**PH94.1**	2	46,05

Centrifuge adapter for Sorvall GSA rotor.
Type DS 3125. Made of **LDPE**, white. For 250 ml centrifuge bottles.

Size (mm)	suitable for	Art. No.	Pack Qty.	€
∅ 61,5	PH79.1, PH84.1, PH88.1, PH89.1, PH91.1	**PH95.1**	6	80,55

To calculate the number of revolutions: $RCF = 1.118 \cdot 10^{-5} \times rpm^2 \cdot r$

Cytology hopper CytoSep™

Disposable sample chambers for manufacturing thin-layering preparations by means of centrifugation. For sample volume up to 0.5 ml. Cells are applied directly to a microscope slide. Cell application range approx. ∅ 6 mm (areas approx. 28 mm²).
With white filter cards to absorb excess liquid.
CE marking acc. to IVD directive 98/79/EC

- Suitable for the examination of blood, spinal chord fluid, saliva, urine and gastric fluids
- Disposable material, therefore no time-consuming cleaning necessary
- Prevents cross-contamination and contaminations through pathogenic samples

Compatible with the cyto centrifuges Thermo Cytospin™ 3 and 4, Tharmac Cellspin® as well as the Hettich Cyto system.

① **Cytology hopper CytoSep™**

Delivery incl. push-in plugs for closing the funnel.
Please order microscope slides separately.

Art. No.	Pack Qty.	€
HNY3.1	50 pieces	88,30
HNY3.2	10 boxes á 50 pieces	640,70

② **Metal clips for cytology hopper CytoSep™**

For fixing the microscope slide at the cytology funnel. Autoclavable.

Art. No.	Pack Qty.	€
HNY4.1	6 pieces	145,90

Safety barrels

Made of stainless steel 1.4571, seals made of PTFE. With removable flame protection made of stainless steel 1.4571 and 1.4301.
For safe storage transport or filling of flammable liquids.
Safety barrels with volumes 25 and 50 litres, stackable.

Safety barrels with screw cap and overpressure valve (opening pressure approx. 0.3 bar).

Volume (l)	Height (mm)	∅ (mm)	Weight (kg)	Art. No.	Pack Qty.	€

* Delivery times may apply to these products. Please check with our Sales Department.

Accessories for safety barrels

Spout 1½"

Made of stainless grades 1.4301 and 1.4305, seals made of PTFE. Rotatable, suitable for safety canisters and safety barrels up to a volume of 25 litres.

Art. No.	Pack Qty.	€
YE02.1	1	78,50

Plug-in funnel

Made of stainless steel 1.4571, staight. Wall thickness 0.6 mm.
Funnel ∅ 120 mm, plug-in tube ∅ 34 mm, height 120 mm.

Art. No.	Pack Qty.	€
HPP7.1	1	74,90

Tap 1½″

Made of stainless steel 1.4305, seals made of PTFE. Closes automatically after use. Suitable for safety canisters with pressure compensation screw PC09.1 to PC12.1 and safety transport barrels HPN9.1 and HPP0.1.

Art. No.	Pack Qty.	€
YE00.1	1	107,50

Spare tap ³/₄″

Made of stainless steel 1.4305, seals made of PTFE.
Closes automatically after use. Suitable for safety barrels with tap.

Art. No.	Pack Qty.	€
HPP8.1	1	150,00

Safety canisters

Made of stainless steel 1.4571, polished. 20-litre canister (Art. No. PC09.1), made of stainless steel 1.4301. Wall thickness 0.8 mm. Seals made of PTFE. For safe storage and decanting of flammable liquids. With removable flame arrestor in the filler. In models with a screw cap, the screw cap is secured against loss by a flexible shaft.

With screw cap and UN-X-approved
In compliance with GGVSEB, GGVSee, ADR, RID and IMDG Code requirements for transporting hazardous liquids. 20-litre canister (Art. No. PC09.1) also with venting screw for manual pressure relief.

Vol. (l)	H x W x D (mm)	Weight (g)	UN approval	Art. No.	Pack Qty.	€
5	310 x 130 x 200	1650	3A1/X1.6/300	**PC07.1**	1	247,25

Accessories for safety canisters

Replacement tap 1½″
Made of stainless steel 1.4305, seals made of PTFE.
Closes automatically after use. Suitable for safety canisters with pressure equalising screw PC09.1 to PC12.1.

Art. No.	Pack Qty.	€
YE00.1	1	107,50

Fine dispenser 1½″
Made of stainless steel 1.4305, seals made of PTFE. With vent.
Suitable for safety canisters PC07.1 and PC08.1.

Art. No.	Pack Qty.	€
YE01.1	1	82,80

Spout 1½″
Made of stainless grades 1.4301 and 1.4305, seals made of PTFE.
Rotatable, suitable for all safety canisters.

Art. No.	Pack Qty.	€
YE02.1	1	78,50

Replacement screw cap 1½″
Made of stainless steel 1.4305, seals made of PTFE.
Suitable for safety canisters with UN approval PC07.1 to PC09.1.

Art. No.	Pack Qty.	€
YE03.1	1	50,55

Screw cap 1½″
Made of stainless steel 1.4305, seals made of PTFE.
With pressure relief valve, suitable for safety canisters PC10.1 to PC12.1.

Art. No.	Pack Qty.	€
YE04.1	1	60,20

Funnel
Made of stainless steel 1.4571, angled, wall thickness 0.6 mm.
Funnel-∅ 120 mm, stem-∅ 34 mm, height 120 mm, weight 350 g.

Art. No.	Pack Qty.	€
PC13.1	1	68,80

Salzkotten safety lab canisters

Made of stainless steel 1.4571, flame arresters made of 1.4401, seals made of PTFE. With pressure control valve.

With screw cap, UN-approved 3A1/X2.0/600

Volume (l)	H x W x D (mm)	Weight (g)	Art. No.	Pack Qty.	€
20	450 x 340 x 175	4500	**1223.1**	1	414,95

Accessories for safety laboratory cans

Fine dispenser 1¼″

Made of stainless steel 1.4305, seals made of PTFE. Self-closing. With pressure relief valve. Suitable for safety laboratory cans 1192.1 to 1194.1, 5791.1 to 0157.1 and PC01.1 to PC03.1.

Art. No.	Pack Qty.	€
YE05.1	1	74,20

Replacement screw cap 1¼″

Made of stainless steel 1.4305, seals made of PTFE.
Suitable for safety laboratory cans with UN approval PC01.1 to PC03.1.

Art. No.	Pack Qty.	€
YE06.1	1	45,15

Replacement screw cap 1¼″

Made of stainless steel 1.4305, seals made of PTFE. With pressure relief valve, suitable for safety laboratory cans 1192.1 to 0157.1.

Art. No.	Pack Qty.	€
YE07.1	1	50,55

Funnel
Made of stainless steel 1.4571, wall thickness 0.6 mm.
Funnel-∅ 120 mm, stem-∅ 23 mm, height 120 mm, weight 300 g.

Art. No.	Pack Qty.	€
PC04.1	1	62,35

Moistener with pump for safety laboratory cans
Made of stainless steel 1.4301. For economical soaking of cleaning cloths. Minimizes hazardous solvent vapours; liquid that is not required runs back into the can. Spring-mounted soaking tray.
Delivery without safety can, please order separately.

Type	Art. No.	Pack Qty.	€
Moistener for 1-litre safety laboratory cans	**PC05.1**	1	126,85
Moistener for 2-litre safety laboratory cans	**PC06.1**	1	129,00

Rotilabo®-UN-wide neck barrels

Made of **HDPE**. UN-X-approved in compliance with GGVSE requirements for transporting solid materials with a density of at least 1.5 g/cm³. Coloured blue. Approved for foodstuffs.
Delivery incl. PE lid and galvanized tension ring. 30 l and 60 l barrels come with handles.

Correct fit

To determine if the different stopcocks and adapters will fit your container, please check container thread type. Plastic barrels and containers have all sorts of thread types, e.g. standardized according to DIN or manufacturer-specific threads. We'll be delighted to assist you with any containers which you purchase from us. However we do ask you to understand that we are unable to give you any information with regard to them fitting containers from other suppliers. Information on the size of the diameter is unfortunately not sufficient.

Metal fuel canister

Made of powder-coated steel with inner coating, wall thickness 0.9 mm.
With safety cap, prevents unintentional opening of the canister.
UN approval 3A1/Y/100/... for transporting petrol, diesel, E10 and other hazardous goods.

Compact canister, electrically conductive

By Bürkle. Made of **HDPE**, black, anti-static.
Electrically conductive compact canister with litre scale, specifically for use in explosion-proof areas. High electrical conductivity at a specific surface resistance of > 10^5 ohms. When correctly earthed, this eliminates the risk of ignition due to electrostatic charge. For filling and storing flammable and easily ignitable liquids in explosion groups IIA, IIB and IIC.
Especially space-saving, suitable for use in small rooms.
Can be stored lying down.
Note: When working with flammable liquids, the canister must be earthed! Use anti-static set (Art. no. 0213.1).
Delivery without stopcock. For type with ¾" threaded coupling, please order stopcock separately.
Delivery incl. sealing cap.

Fluorinated canisters with draincock

By Nalgene®. Type DS 2327. Made of fluorinated **HDPE**, stopcock made of ETFE, screw cap made of fluorinated PP, thread 100 mm. Ideal for the safe storage and dispensing of solvents or distilled water. Comes in a rectangular, space-saving design. Transparent. The fluorinated outer and inner surfaces improve the barrier properties and reduce solvent absorption and permeation. **Leakproof**. With graduation, and stainless steel handle. The 20 l-container additionally has robust handles.

Volume (l)	L x W x H (mm)	Art. No.	Pack Qty.	€
9	216 x 146 x 343	**E189.1**	1	195,50
20	318 x 219 x 381	**E190.1**	1	227,65

Fluorinated canisters

By Nalgene®. Type 2242. Made of **HDPE**, fluorinated inside and out, screw cap made of fluorinated PP. Provides good barrier properties, high resistance to chemicals and reduces solvent diffusion and penetration. Very robust. Excellent for working under extreme conditions with acids and aggressive solvents. With wide base for extra stability.
Long spout and integral handgrip in base enable easy pouring. Graduated in litres and gallons. **Leakproof**. Thread 53 B.

Dual tubing olive assembly sets

For upgrading Nalgene® vacuum bottles (PK40.1 f.) or carboys with 53 mm or 83 mm screw caps.
For this purpose, two holes (∅ 10 mm for PP13.1 or ∅ 16 mm for PP14.1) must be drilled in the screw cap and those connectors fitted. Autoclavable.
For tubes with ∅ inside 6 mm or 13 mm.
53 mm screw caps only be used with 6 mm tubing olives;
83 mm screw caps with 6 mm and/or 13 mm tubing olives.

Delivery incl. tube connections made of **PP**, nuts made of **azetal**, **silicone** seals, caps made of **TPE**. (**Delivery without** screw caps).

For hose with inner ∅ (mm)	Art. No.	Pack Qty.	€

Plastic bottles, PFA/PTFE

PFA bottles

Made of **PFA**. Graduated, highly transparent, **leak-proof**.
Microwave safe. Autoclavable.

- Temperature resistant in the range -196 to +250 °C
- Inert to virtually all chemicals, including hydrofluoric and nitric acid
- High purity, low metal ion content, ideal for use in trace analysis and for the storage of highly pure substances
- No memory effect
- Hydrophobic and anti-adhesive, extremely smooth surfaces allow easy cleaning

▶ Screw caps made of PFA see page 46

Wide neck bottles

Made of highly pure **PFA**. With tight closing PFA screw cap.

For trace analysis and long-term storage of highly pure oxidants, acids and alkalis, as well as hydrocarbons, solvents and standards.

- High thermal stability from -200 to +260 °C, autoclavable
- Chemically inert and resistant to virtually all chemicals
- Good transparency and dimensional stability
- Entrainment and cross-contamination are practically eliminated by highly hydrophobic, anti-adhesive and smooth surfaces
- Long shelf life of low concentration reference solutions in PFA vessels
- Easy to clean
- No memory effect

Stainless steel bottles with GL 45 thread

Made of stainless steel 1.4404. With smooth inner surface (in acc. with IIIc DIN 17441) and rounded inside edges for complete drainage and easy cleaning.
Temperature stable up to +500 °C, autoclavable.

- Shatterproof
- Light-impermeable
- Chemical resistant (except halogen-containing media)

① **UN approved transport bottle 1A1/X2.0/1000**

For safe transportation of hazardous and flammable liquids, for storage of high-quality materials such as fine chemicals, pharmaceuticals or cosmetic products as well as light-sensitive materials.
No additional outer packaging required, as UN-approved. Approved for the conveyance of liquids with a relative density of up to 2.0 classified into UN packaging group I, II or III as hazardous goods.

Delivery incl. screw cap made of stainless steel with PTFE gasket.

Volume (ml)	Art. No.	Pack Qty.	€
1500	**AAC4.1**	1	513,00

② **Non-UN-approved storage bottle**

For the storage of aggressive media, high-purity fine chemicals, pharmaceuticals and cosmetic products as well as light-sensitive materials.

Delivery without cap. Please order separately.

Volume (ml)	Art. No.	Pack Qty.	€
1500	**AAC5.1**	1	465,00

Rotilabo®-wide neck wash bottles

Made of **LDPE**. Comes with contents label printed in three languages, danger identification mark in accordance with the GHS. Screw cap colour-coded. Non-scratch ink. Movable suction tube enables total emptying.
Note: The chemical resistance of the spray bottles is limited when aggressive filling media are used. The bottles should therefore be replaced regularly and not used for analytical or critical applications.

Rotilabo®-safety wash bottles

Bottle made of **LDPE** or **PP**, screw cap and spray tube made of PP.
A pressure relief valve in the screw cap stops discharge, dripping or leakage of liquid through the spray tube, e.g. due to temperature fluctuations.
With indelible contents label in four languages (German, English, French and Spanish) and hazard warning label in accordance with GHS.
Note: The chemical resistance of the spray bottles is limited when aggressive filling media are used. The bottles should therefore be replaced regularly and not used for analytical or critical applications.

Rotilabo®-lab dishes, PVC

Made of breakproof **PVC**. Temperature stable to +70 °C. The tray with ridges on its base is ideal for use as developing tray or for staining electrophoresis gels. Ridges prevent gels from sticking to bottom. Liquids can be poured out easily over edges of tray. The tray without ridges is ideal for general lab and storage purposes, especially when colour coding is required.

Information on the care of stainless steel
Stainless steel is rustproof, durable, hygienic and non-toxic. Stainless steel generally has a higher resistance to corrosive media than mild steel.

Care: stainless steel is easy to maintain and can be cleaned either by machine or manually using mild detergents. Extraneous rust can easily be removed using a stainless steel cleaner, while lime scale deposits can be removed using acidic products (e.g. descaling agent). Do not use steel wool and avoid shock cooling after heating. Concentrated disinfectants and bleaches or diluted agents of this kind can attack stainless steel if allowed to react for a lengthy period of time. After contact with aggressive media or solids such as salts, the stainless steel must be cleaned thoroughly.
Extraneous rost: the passive protective layer of the stainless steel can be destroyed by base metal particles if they adhere to the surface of the stainless product. The chemically active particles can cause the entire steel to corrode. For this reason, do not clean, use or store stainless steel together with steel or iron particles (particularly steel wool pads).
Caution: stainless steel is not resistant to prolonged contact with chlorides and acids.

Instrument dishes and trays

A 121 °C

Glass instrument trays

Made of soda-lime glass with stainless steel lid. Autoclavable and hot air sterilisable up to +180 °C. **Note:** do not expose glass trays to abrupt changes of temperature. Trays must be heated and cooled slowly as soda-lime glass has limited thermal shock resistance.
Do not sterilise with lid attached.

Buckets

By Nalgene®. Made of **LDPE**. Air-tight. With nylon coated wire handles. The close-fitting and airtight lids enable the bins to be used for storage of samples in formalin and other preservatives. Bins comply to OSHA-Norm 29 CFR part 1910.1030 for use as protection against haematogen pathogens. Suitable for safe handling of biologically harmful substances.

Vol. (l)	Colour	Innner ∅ (mm)	Height with lid (mm)	Height without lid (mm)	Art. No.	Pack Qty.	€

Standard ground joint flasks

Round bottom flasks, PFA

Made of **PFA**, transparent.
- High chemical resistance
- Temperature resistant in the range -200 to +260 °C
- Hydrophobic and anti-adhesive, extremely smooth surfaces allow easy cleaning
- High purity, ideal for used in trace analysis and for storage of reference solutions
- No memory effect
- Also suitable for use in rotary evaporator as safety flask
- Autoclavable

Standard ground joint flasks

Round bottom flasks, PFA, centre neck NS 29/32

Made of PFA. Highly pure, chemically inert. Hydrophobic, anti-adhesive surfaces. Centre neck NS 29/32. Temperature stable from -200 to +250 °C. Transparent and pore-free, partially suitable for vacuum (e.g. 30 mbar at 50 °C).

Single neck flasks

Volume (ml)	Height (mm)	Flask outer ∅ (mm)	Art. No.	Pack Qty.	€
100	117	67	**NY39.1**	1	119,60

A 121 °C

Rotilabo®-sealing sleeves

Made of **PTFE**, for gas-, liquid- and vacuum-tight ground glass joints. Joint rings on the outer side of the conical sleeves ensure a high vacuum-tight seal (Leakage rate <1 x 10^{-1} mbar l s^{-1}) and prevent the ground glass joints from sticking. Easy to remove with thick rim. Reusable. Practically resistant to all chemicals. Temperature stable from -200 to +260 °C.
No grease necessary. Autoclavable.

A 121 °C

Rotilabo®-spherical ground glass joint sleeves

Made of **PTFE**. For gas-, liquid- and vacuum-tight ball-and-socket joints. With sealing grooves for sealing in high vacuums
(leakage: <1 x 10^{-2} mbar l s^{-1}). Easy to remove and reusable.
No grease necessary. Temperature stable from -200 to +260 °C.
High chemical resistance. Autoclavable.

Reducing adapters

Rotilabo®-seals for conical ground glass joints

Made of **PTFE**. Can be used to seal the equipment and containers.
For gas-, liquid- and extremely vacuum-tight standard ground joints (Leakage rate <1 x 10^{-6} Pa l s^{-1}). Prevents seizing of joints. Joints remain clean and free of grease. Temperature stable up to +250 °C.
Seals are wafer-thin and can be combined with joint clips. Autoclavable.
Delivery incl. cartridge with 50 fitted gaskets.

Material DURAN®

Bubble counter

Made of DURAN®. For monitoring gas flow.
∅ 32 mm, overall height 120 mm, hose connection ∅ 8 mm.

Length (mm)	Art. No.	Pack Qty.	€
100	**KX54.1**	1	28,65

Bubble counters with ground glass joint

Made of type 3.3 borosilicate glass. For monitoring the gas flow in apparatus. Suitable for excess pressure and vacuum.
With ground glass joint and GL 32 screw cap with PTFE-coated seal.
Overall height without ground joint approx. 145 mm, ∅ approx. 30 mm.
Temperature stable up to +200 °C.
Delivery without GL 14 connectors, please order separately for bubble counters with GL connection.

Connections	Cone (ground glass)	Art. No.	Pack Qty.	€

① Rotilabo®-fermentation tube

Made of soda-lime glass. With 2 spheres and extension.
Overall length 200 mm, tube ∅ approx. 10-11 mm. Autoclavable.

Art. No.	Pack Qty.	€
CKY8.1	1	3,80

② Rotilabo®-fermentation tube

Made of borosilicate glass 3.3. With NS 29/32 ground glass joint.
Height 200 mm. Autoclavable.

Art. No.	Pack Qty.	€
ACL2.1	1	35,80

Capillary tubes

CFS battery capillary filling device

To quickly and safely fill melting-point determination capillaries. Suitable for capillaries with a diameter of 1 to 1.5 mm and a length of 60 to 100 mm.

- Lengthy stoking and tapping are no longer required, the capillaries are cleanly and repeatedly filled to the bottom
- No direct contact with dangerous substances
- Clear housing protects against glass breakage

Usage:
The capillaries are carefully inserted into the filling funnel until their open side matches the lowest point of the funnel. Insert the funnel containing the capillaries into the unit. By turning the funnel guide, the height is adjusted until the capillaries touch the bottom and the funnel overlaps the guide by a few millimetres (see figure). The funnel is filled with a spatula tip's worth of the sample, and the unit switches on. The capillaries are filled using powerful vibrations. The unit switches off automatically after 10 seconds. The filling process can be repeated as often as required.

Note: The samples must be dry and finely powdered.
Unit dimensions: ∅ 80 x height 140 mm.
Delivery incl. AC-adapter.

Art. No.	Pack Qty.	€
YT60.1	1	NLA

Material
DURAN®

Thiele melting point measuring apparatus

Made of DURAN®.

Usage:
Fill apparatus with silicone oil. Insert a melting point capillary (outer-∅ max. 2 mm) into one of the side tubes so that the molten end touches the ball of the thermometer. The other side tube is for ventilation purposes. If the apparatus does not have side tubes, a long capillary must be inserted from above. This apparatus also has to be ventilated from above. The apparatus should be heated at the elbow to ensure a uniform rise in temperature.

Type	Art. No.	Pack Qty.	€
Without side tubes	**TH23.1**	1	42,05
With side tubes	**TH24.1**	1	54,80

Rotilabo®-capillary tubes

Separating and dropper funnels

A 121 °C

Separating funnels acc. to Squibb

Made of **PP**, with **PTFE** plug **PP** screw cap. Graduated. Transparent (to allow easy recognition of phase transitions). Plug NS 14.5, hole ∅ 4 mm. Temperature stable up to max. 135 °C. High chemical resistance, max. 60 % hydrofluoric acid. Autoclavable without stopcock and closure.

Volume (ml)	Art. No.	Pack Qty.	€
100	**YA73.1**	1	105,20
250	**YA74.1**	1	110,75

Separating funnels

Made of **FEP**. Highly pure, chemically inert, temperature stable from -200 to +250 °C. Hydrophobic, anti-adhesive surfaces. With fine metering tap and NS 29/32 ground glass cone made of **PTFE**, screw cap and integrated combination nut for easy attachment and detachment of the conical ground joint.

Volume (ml)	Art. No.	Pack Qty.	€
125	**NY53.1**	1	410,65
250	**NY54.1**	1	480,55
500	**NY55.1**	1	614,90

Separating funnel holder

Made of **PP**. For separating funnels from 125-500 ml.
With clamp for attaching to stand rods with ∅ 8-14 mm.

Art. No.	Pack Qty.	€
PY61.1	1	13,10

Cytology hopper CytoSep™

Disposable sample chambers for manufacturing thin-layering preparations by means of centrifugation. For sample volume up to 0.5 ml.
Cells are applied directly to a microscope slide.
Cell application range approx. ∅ 6 mm (areas approx. 28 mm²).
With white filter cards to absorb excess liquid.
CE marking acc. to IVD directive 98/79/EC

- Suitable for the examination of blood, spinal chord fluid, saliva, urine and gastric fluids
- Disposable material, therefore no time-consuming cleaning necessary
- Prevents cross-contamination and contaminations through pathogenic samples

Compatible with the cyto centrifuges Thermo Cytospin™ 3 and 4, Tharmac Cellspin® as well as the Hettich Cyto system.

① **Cytology hopper CytoSep™**

Delivery incl. push-in plugs for closing the funnel. Please order microscope slides separately.

Mini-Cryo mortar with pestle

Container made of stainless steel with PE insulating jacket, reaction vial holder made of stainless steel with insulated, removable handle (L 102 mm). For filling with liquid nitrogen. Allows the homogenisation of plant material or tissue directly inside the 1.5 ml reaction vial.
Dimensions: ∅ 165 x H 114 mm.
Delivery incl. pestle (∅ 9 x L 127 mm) with PE handle.

Art. No.	Pack Qty.	€
CXX6.1	1	552,55

Cryo mortar

Container made of stainless steel with PE insulating jacket, mortar and pestle insert made of stainless steel with insulated, removable handle (L 102 mm). For filling with liquid nitrogen; cooling aids, for example, the shredding and homogenisation of plant material and similar samples.
Dimensions: ∅ 165 x H 114 mm.
Inner ∅ of mortar and pestle insert 100 mm, 48 mm deep.
Delivery without pestle; can be used with porcelain pestles (Art. No. 3836.1 or XL92.1), for example.

Evaporating dishes with snap-on lids

Made of highly transparent **PFA**, lid made of **PE**. For contamination-free sample preparation and for transporting samples.

- Temperature resistant in the range -200 to +250 °C
- Chemically inert to nearly all chemicals
- Hydrophobic and anti-adhesive
- High purity, ideal for used in trace analysis and for storage of reference solutions
- With conical recess in base, to hold small quantities of solvent for absorption of evaporated samples
- Extremely smooth surfaces allow easy cleaning, no memory effect
- Autoclavable

64	29	12	**XX57.1**	10	28,40

Weighing funnels

Made of antistatic **PP**, resistant to static charge. With wide mouth for easy access. Tapered neck for use with volumetric flasks in sizes from 10 to 250 ml. Extended metering neck for direct transfer of samples and liquids to flask, ventilation slot between funnel and vessel prevents accumulation of liquid.

Technical specifications:

Typical metering quantity	1 mg - 5 g
Suitable for volumetric flasks	5 (wide mouth), 10, 25, 50, 100 and 250 ml
Suitable for ground glass joints	10/19, 12/21, 14/23
Dimensions	L 75 x W 30 x H 26 mm
Nozzle outer ∅	Tapered, 9-15 mm

Art. No.	Pack Qty.	€
CET4.1	50	105,90

Operating load is the greatest dynamic load at which the jack can be lifted out of any position.

Static load is the maximum static load which can be applied to the jack.

Example:
the Rotilabo® Mini jack (Art No. YT68.1) can carry a max. load of 2 kg and be moved up or down (= operating load). A maximum weight of 15 kg may be applied to the jack, but it will no longer be possible to screw the jack up or down (= static load).

Rotilabo® Mini jack

Plates made of stainless steel. Aluminium scissors frame.
Compliant with DIN 12897. Rubber feet for stable standing position.
Dimensions: L 75 x W 80 mm. Height adjustable 49-147 mm.
Moveable load 2 kg. Static load 15 kg. Weight 415 g.

Art. No.	Pack Qty.	€
YT68.1	1	123,80

MAXI lab jacks

Manufactured in accordance with DIN 12897. Height adjustment using a hand-wheel. Increased height (30 %) using extended scissor lift. **Height adjustable 75-400 mm.** Moveable load 7 kg. Maximum static load 30 kg.

Made of 18/10 stainless steel

Test tube and drying racks

By Nalgene®. Made of reinforced **PP**. Provides a secure hold for sample vials and centrifuge tubes, e.g. when used to secure sample while shaking. Racks allow full view of tube contents and do not float in water bath. Also excellent as drying rack for tubes, electrophoresis and chromatography plates. Autoclavable.

A 121 °C

Rack for NMR-test tubes

Made of **PP**. With 72 slots and 2 side handles for easy transportation. Stability is provided by hemispherical holes in the lower level.
For NMR test tubes L 178 mm, outer ∅ 5 mm.
Dimensions: L 210 x W 110 x H 220 mm. Autoclavable.

Art. No.	Pack Qty.	€
YA94.1	1	64,95

Rotilabo®-test tube trays

Made from foam **PS**. Ideal for a large number of centrifuge tubes or test tubes. Holes are deep enough to keep test tubes, vials, etc. stable. Stackable. Extremely light. With finger recesses for easy lifting.
K828.1 is ideal for 1.5 ml vials. Dimensions: L 218 x W 218 x H 33 mm.

Combined test tube racks and grid inserts

Made of **POM**. Versatile frame racks with interchangeable grid inserts.
- Grid inserts in 5 colours for different test tube sizes
- 2 different test tube sizes are possible per rack
- Fast replacement of individual grids
- 3 levels for stability
- Slip-resistant rubber feet
- Stackable

Dimensions: L 318 x W 111 x H 67 mm.
Temperature stable from -80 to +121 °C. Autoclavable.

Delivery incl. frame rack and a set of 4 grids.

Slanted racks

By Nalgene®. Made of white **PC**, for simple and speedy preparation of angular agar with two different inclination angles.
The side supports on the rack enable on the one side the preparation of a culture medium with a 5° angle of inclination, i.e. with a steep slope and therefore with a larger surface, e.g. for aerobic cultures, and on the other side with a 20° inclination angle, i.e. with a flat slope and smaller surface, e.g. for anaerobic cultures. The 20° angle helps prevent the drying out of nutrient media during long-term storage.
Also excellent for incubating liquid tissue cultures and for use in water baths - do not float. Nutrient media tubes can be autoclaved in rack in a vertical position. With 40 alphanumerically marked holes (4x10).
Dimensions: L 285 x W 115 mm.

Rotilabo®-combi racks 4 in 1, oblong shape

Made of **PP**. Space saving and ideal for use on the laboratory bench, under a hood, in the water bath and freezer (max. -90 °C).
For centriguge tubes, test tubes, microcentrifuge tubes, PCR-tubes.
Dimensions: L 174 x W 95 x H 52 mm. Autoclavable.
Four different side can be fitted:

- Bore holes-∅ 30 mm - 4 centrifuge tubes 50 ml
- Bore holes-∅ 17.5 mm - 12 centrifuge tubes 15 ml
- Bore holes-∅ 11.6 mm - 32 centrifuge tubes 1.5/2 ml
- Bore holes-∅ 8.2 mm - 32 centrifuge tubes 0.5/ml

Rotilabo® combi racks 4 in 1, for ∅ 13/16 mm

Made of **PP**. For round, flat and conical blood collection and culture tubes from 3.5 to 10 ml, and for 15 ml centrifuge tubes. Suitable for ∅ 13 to 16 mm. Recommended tube sizes: 13 x 75 mm, 13 x 100 mm, 16 x 100 mm, 16 x 125 mm, 17 x 120 mm.
Dimensions: L 232 x W/H 70 x W/H 95 mm.
- Can be combined individually by fitting them together
- Alphanumerically coded
- Suitable for use in a water bath
- Autoclavable

With four sides which can be equipped as required:
- Side A: 12 x hole ∅ 13 mm
- Side B: 18 x hole ∅ 13 mm
- Side C: 12 x hole ∅ 17 mm
- Side D: 18 x hole ∅ 17 mm

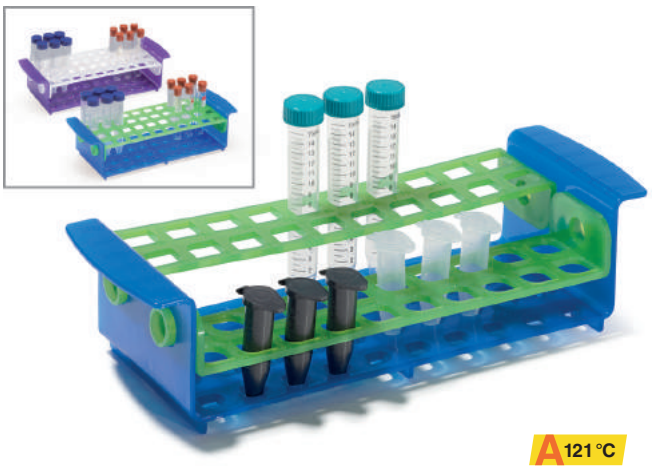
Centrifuge tube racks

121 °C

Rotilabo®-racks, revolving

Made of **PP**. Four colored models (violet, blue, green and yellow) are connected together, can however be turned individually, thus allowing centrifuge tubes and vials of different size to be stored and transported in one rack. Autoclavable.



Model 1 for large vials:
- Hole-∅ 29.6 mm - 2 vials 50 ml
- Hole-∅ 16.4 mm - 8 vials 15 ml
- Hole-∅ 20.5 mm - 6 vials ∅ 16 to 20 mm
- Hole-∅ 13.5 mm - 10 vials ∅ 10 to 13 mm

Dimensions: L 112 x W 112 x H 224 mm

Model 2 for centrifuge tubes:
- Hole-∅ 16.4 mm - 6 centrifuge tubes 15 ml
- Hole-∅ 11.2 mm - 9 centrifuge tubes 1.5 to 2 ml
- Hole-∅ 8.0 mm - 12 centrifuge tubes 0.5 ml
- Hole-∅ 6.5 mm - 32 PCR-centrifuge tubes or 4 centrifuge tube strips at 8 tubes each

Dimensions: L 100 x W 100 x H 208 mm.

PCR cooling boxes

Made of **PP**, lid made of **PC**. Ice-free cooling system for preparing and storing PCR single vessels, strips and plates. For heat-sensitive applications, PCR- or cell-based assays as well as for gentle thawing of samples and stopping reactions. After two hours of pre-cooling at -20 °C, a sample temperature of 0 °C is maintained for over one hour or below 5 °C for up to three hours. Colour change if the temperature limit of 6 °C is exceeded.

- Constant and reliable
- Modern design cools down more quickly in freezers and remains colder for longer
- Temperature stable up to -80 °C
- Vented lid for faster cooling of samples in a freezer compartment
- Lid can be removed completely and can be used as a stand by rotating by 180°
- Alphanumerically coded
- 96 slots (8 x 12 format)

Cryogenic racks for cryogenic boxes, aluminium

Made of aluminium, with carry handle. At least 30 % lighter than stainless steel racks. For the storage of cryogenic boxes in deep freezer chests or deep freezers, less effort is required for removal and insertion. Improved design for faster cooling rate. Suitable for cryogenic boxes in sizes from 130 x 130 to 136 x 136 mm.

① Wide version for deep freezers

For box height (mm)	L x W x H (mm)	Compart-ments	Art. No.	Pack Qty.	€
50	566 x 140 x 274	4 x 5	**CLL6.1**	1	211,80

② High version for deep freezer chests

50	140 x 140 x 550	1 x 10	**CLL8.1**	1	132,95

Cryogenic racks for cryogenic boxes, cabinet modules

Made of stainless steel with polished surface, easy to clean. With drawers made of aluminium. For the storage of cryogenic boxes in deep freezers, less effort is required for removal and insertion.
Cabinet modules without pull-out stop.
Suitable for cryogenic boxes in sizes from 130 x 130 to 136 x 136 mm.

For box height (mm)	L x W x H (mm)	Compart-ments	Art. No.	Pack Qty.	€

Rotilabo®-cryogenic boxes made of cardboard

Made of low temperature resistant cardboard. Flexible storage of cryo vials and other sample containers through variable configurations using different dividers. Also suitable for larger contains without grid dividers.
Dimensions: L 136 x W 136 mm.
Delivery without dividers, please order dividers separately.

Fitting table for **Rotilabo®-cryo boxes:**

Sample vessel type	Cryobox	Divider
0.5 ml reaction vial	Y054.2 / CLE8.1	Y050.2
1.5/2 ml reaction vials	P895.3 / CLE9.1	P900.2

Cryo boxes / storage boxes

Rotilabo®-cryo storage box

Made of **PC**, transparent, with hinged lid and coloured insert.
For cryo vials, screw vials and reaction vials up to 5 ml.
Also suitable for storage of larger vials thanks to removable insert.

- 81 slots
- For vial ∅ 12-13 mm, heights up to 93 mm
- With embossed numeric coding
- Stackable

Dimensions: L 145 x W 142 x H 97 mm.
Temperature stable to -196 °C. Autoclavable.

Art. No.	Pack Qty.	€
ACL7.1	1	12,00

Rotilabo®-cryo storage boxes

Made of **PP**. With **100 holes** (12.4 x 12.4 mm). For 0.5 and 1.5/2 ml centrifuge tubes and for cryo vials. Max. tube height 53.3 mm. Transparent lid with alphanumerically coded index card for speedy identification. Black box with black lid for the storage of light-sensitive samples. Stackable.
Dimensions: L 140 x W 140 x H 60 mm.
Suitable for Rotilabo®-stainless steel rack P959.1.
Temperature stable from -90 to +121 °C. Autoclavable.

Cryo-freezing device Mr. Frosty

By Nalgene®. Made of **PC**, lid and vial holder made of HDPE.
With foamed lining.
Simple application: only 100 % isopropylalcohol and a freezer are required. For 18 cryo-vials 1.2 / 2 ml. For reproducible, repeated cooling of specimens by approx. -1 °C/min. Optimal cellular yield after storage at very low temperatures. The vial holder prevents direct contact of the vials to the alcohol, the writing on the vials remains readable. The vial holder can be used additionally as a floating stand to defrost the samples in the water bath. Dimensions: H 86 x ∅ 112 mm. Lid-∅ 120 mm.

Art. No.	Pack Qty.	€
AC96.1	1	130,20

Rotilabo® storage box, slim version

Made of black **PP**. For 0.5 ml to 2 ml reaction vials and cryo vials
- 100 slots (12 x 12 mm)
- For tube ∅ up to 12 mm, heights up to 50 mm
- Slip lid with alphanumeric coding
- Loose fitting lid, height-adjustable
- Stackable

Dimensions: L 287 x W 76 x H 38-52 mm.
Temperature stable from -80 to +135 °C. Autoclavable.

Art. No.	Pack Qty.	€
ACN0.1	1	9,65

Labtop freezing boxes

By Nalgene®. Made of **PC**. For cooling heat-sensitive samples in the laboratory.
- Usable up to -20 °C (min. -40 °C)
- Protects against temperature fluctuation and power failure
- Markable grid surface on lid
- Breakproof and stackable, with non-slip feet
- With white PC lid with non-toxic gel filling or with transparent PC lid without gel filling

Labtop box -20 °C:
Bottom part made of blue, gel-filled PC.

Labtop freezer boxes 0 °C:
Bottom part made of green, gel-filled PC.

*Delivery incl. 16 adapters for remodelling the 1.5 ml holes into 0.5 ml holes for 0.5 ml tubes.

For 12 vials (3 x 4), lid without gel filling

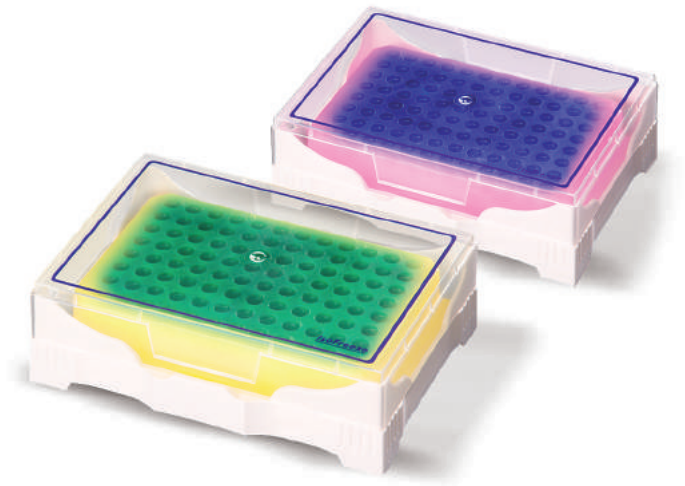
Freezing box

By Nalgene®. Made of **PC**, with non-toxic insulating liquid. Excellent for speedy and repeated cooling of samples. Can be used repeatedly for max. 45 min. Cools up to 2 ml alcohol-based solution in less than 3 min to -20 °C or up to 2 ml water-based solution in less than 4 min to 0 °C. 12 holes for 0.2 ml tubes (with adapters) to 2 ml. Holes have 3 x 4 array. Labels and markings do not dissolve as there is no direct contact between tube and dielectric liquid. Breakproof and stackable. Rubber feet on base prevent slipping. Comes with 16 adapters. Dimensions: L 151 x W 108 x H 125 mm.



Art. No.	Pack Qty.	€
L249.1	1	196,75

Rotilabo®-cooling boxes

Double-sided, made of **PC**, for 20 centrifuge tubes 0.5 ml on one side and 20 vials 1.5 or 2 ml on the other. Ideal for cooling heat-sensitive samples on the lab benchtop. Also excellent for transporting frozen samples or as a storage box in refrigerators to protect against temperature fluctuation or power failure. Holes (∅ 8/12 mm) are alphanumerically coded on both sides. Comes with gel filling and transparent lid. Once they have been removed from the refrigerator, the boxes maintain a temperature of 0 °C (white box) for 5 hours or -15 to -20 °C (blue box) for approx. 2 hours. Dimensions of boxes (with lid): L 170 x W 110 x H 105 mm.

Rotilabo®-ice boxes for PCR-plates

Made of **PP**. Filled with non-toxic gel filling. 96 slots ∅ 6 mm in 8 x 12 array. Ideal for cooling heat-sensitive samples on the laboratory desk.

Suitable for 0.2 ml PCR-vials, plates and centrifuge tube strips.

- Keeps the temperature at 4-7 °C for approx. 3 hours
- The rack changes its colour at approx. 7 °C
- Recommended storage temperature: -20 °C

Dimensions: with lid: L 141 x W 99 x H 44 mm,
without lid: L 141 x W 99 x H 38 mm.

Dry ice machines

To make a block of -79 °C cold dry ice
- A weight of 50 g in ~0.5 min
- A weight of 250 g in ~1 min

Multi-range unit, e.g. for lowering temperature in cooling baths or traps, precooling of tissue samples, transporting or storing biological substances, freezing blood or tissue samples, research in chemistry and physics etc.
Fits all standard short CO_2-gas bottles with top valve (W 21.80 x 1/14" acc. to DIN 477 no. 6).

Instructions:

Fit ice machine to CO_2-bottle, open valve, allow CO_2 to enter ice machine, close valve, open fastener and take out ice block.

Dry ice machine for 50 g blocks

H 30 x ∅ 50 mm. Protuctiveness with 22 kg gas canister for approx. 90 blocks.

Art. No.	Pack Qty.	€

Sample bags Whirl-Pak®

- Made of LDPE
- Sterile
- With wire-tie closure for leakproof and airtight seal of bags
- Temperature stable from -196 to +80 °C
- FDA-approved

Liquid sample bags

By Nasco. Whirl-Pak®. Made of **LDPE**. **Sterile**.
Ideal for storing liquid and solid samples.

Procedure:

1. Can be opened easily by simply tearing the plastic along the perforation. The bag interior is therefore protected against contamination, as long as the bag is not used.

2. Practical pull-open loops enable easy opening of bag, without contact to the interior. The bag remains open when filling.

3. The wide-neck opening of the bag makes filling easier. Hold the bag as indicated and fill approx. 2/3 full.

4. The bags are closed by pulling on the outer loops.

5. Hold the bag at a distance and spin it at least 3 times (bag with volume >2500 ml, fold 4-5x to seal).

6. The bags are sealed tightly by bending the loops.

With labelling space

Liquid sample bags with sponge

By Nasco. Whirl-Pak®. Made of **LDPE,** sponge and bag. **Sterile**. Speci-Sponge® for sample taking from laboratory benches, furniture, equipment and all other areas which must be tested for listeria, salmonella, *E.coli* and other pathogens. Sponge and bags are sterile. Sponge is free from bacteria and not growth-inhibiting. After "wiping" the sample, return the sponge to the bag. Add medium and if required incubate directly in the bag. Bags come with wire ties and large labelling area. Dimensions of sponge when wet: L 76 x W 38 x H 16 mm.

Volume (ml)	Filling quantity (ml)	W x H (mm)	Art. No.	Pack Qty.	€
540	360	115 x 230	**T263.2**	100	129,90

Replacement blades for Rotilabo® dispenser box	**KLA6.1**	3	16,60

PARAFILM® M

Ideal for sealing vessels, petri dishes, cells etc. High flexible (stretches up to 200 %). Clings even around irregular shapes and surfaces.

- The sealing film is free of plasticisers, and consists largely of polyolefin's and paraffin waxes
- PARAFILM® M complies with the general requirements of the FAD (Food and Drug Administration) for use under 55 °C, as well as satisfying GMP (Good Manufacturing Practice)
- PARAFILM® is resistant up to 48 hours against many polar substances, e.g. saline solutions, inorganic acids and alkaline solutions; after this period embrittlement may occur

Gas permeability in 24 hours at 23 °C with 50 % relative humidity for:
Oxygen: 350 cm^3/m^2
Nitrogen: 105 cm^3/m^2
Carbon dioxide: 1100 cm^3/m^2
Water vapor permeability in 24 hours at 37 °C and 90 % relative humidity for: 0.8 g/m^2.

Technical specifications:

Film thickness	120 µm
Temperature stability	-45 to +50 °C
Melting point	60 °C
Elasticity	200 %

Foil Overview

Foil type	Parafilm®	Dura Seal®	Barriofilm®-foil
Art. No.	H666.1 f.	E364.1 f.	HCL0.1
Material	primarily polyolefine and paraffin wax	on a LDPE-base	on a vinyl chloride-base
Starch (µm)	approx. 120	100	11.5
Temp. stability	45 to +50 °C	up to approx. +100 °C	-20 to +100 °C
Elasticity	200 %	500-800 %	60 %
Anti-adh. paper	yes	no	no
Suitable for microwave	no	yes	yes
Transparency	semi	yes	yes

Dura Seal®

Highly transparent stretch cling film on a LDPE-base. Ideal for covering beakers, Erlenmeyer flasks, test tubes, etc. Chemically resistant against most aliphatic, aromatic and chlorinated solvents as well as acids and alkaline solutions.

Excellent heat resistance (softening point at approx. 110 °C). Approved for microwave.

Application: Stretch the film and pull it over the container rim. The film clings automatically to the rims.

Technical specifications:

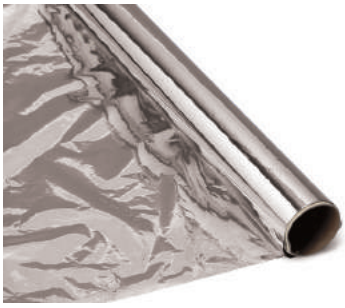
Foil thickness	38 µm
Temperature stability	up to approx. +100 °C
Elasticity	500-800 %

Delivery on rolls in a roll-off carton without layers of paper.

Width (mm)	Length (m)	Art. No.	Pack Qty. (roll)	€
102	150	**E364.1**	1	99,15
127	45	**Y701.1**	1	65,60

Barriofilm® film

Based on vinylidene chloride, foil thickness 10 µm. With very good battery properties. Excellent for covering gel-electrophoresis plates, particularly with DNA- and RNA-sequencing gels. Foil does not stick and is easy to roll. Non-flammable, self-extinguishing High water vapour and oxygen barrier. Food-safe and microwave-safe. Temperature stable from -60 to +140 °C. **Delivery incl.** foil cutter, in box.



Width (mm)	Length (m)	Art. No.	Pack Qty. (roll)	€
295	300	**HCL0.1**	1	49,35

Clear cling foil

Made of LDPE, fully transparent. For wrapping and covering containers.
Very flexible.
Inert to odour and taste. Water and greaseproof. Approx. 14 µm strong.
On rolls: W 30 cm, L 300 m. In tear-off box.
Temperature stable from -20 to +70 °C.

Art. No.	Pack Qty. (roll)	€
1255.1	1	19,30

Tin foil

(Tin foiling) 98 %. 8 µm thick. Very soft and adaptable.
Mostly resistant against chemicals. On rolls of 40 cm width.
Length about 11 m. 250 g net weight.

Art. No.	Pack Qty. (roll)	€

Sterilisation monitoring

Machine monitoring

System-independent function test for air extraction and steam penetration. Must be performed once per steriliser every day according to DIN EN 17665.
Not a direct indicator of sterilisation performance (= Performance Test).

Treatment monitoring

Sterilisable materials are labelled with external indicators to allow differentiation between sterilisable materials and sterile materials.
This minimises the risk of using non-sterilised goods.

Load/batch monitoring

A meaningful chemo-indicator is treated together with the load. This may be inserted in a special test piece.

Indicator selection aid

Monitoring step	Class*	Application	Product type	Art. No.
Treatment monitoring	1	Process indicators (treatment indicators) for differentiating between treated goods and untreated goods	Sterile indicator strips	XC20.1 XC21.1 8221.1 H590.1 HXE6.1 HXE7.1 HXE8.1

stericlin® sterile indicator labels for thermal printers

Made from paper, double-sided adhesive (sandwich).
With STEAM indicator (type 1 indicator as per ISO 11140-1).
For sterilisation-resistant labelling and documenting. Suitable for all common thermal transfer printers such as Zebra, CAB and GoDex.

- Colour change from pink to brown
- 1000 labels per roll
- Size: 70 x 35 mm
- Core ∅ 40 mm
- 3 mm-wide revenue stamp for printers on the reverse
- Roll width: 73 mm

Art. No.	Pack Qty. (roll)	€
HXC7.1	1	87,60

stericlin® Bowie-Dick disposable test pack

Steam penetration test for daily function monitoring and quality assurance of the steam steriliser according to DIN EN ISO 11140-4.
Free from heavy metals and toxic substances.

Application:

- Place the test pack in the steriliser
- Carry out the Bowie-Dick test procedure
- Remove the test sheet
- Review the result: in the event of complete steam penetration, the indicator will evenly change colour from blue to pink. In the event of a malfunction, however, no even colour conversion will occur. Following a successful colour conversion, the colour hue of the indicator will no longer change. This ensures complete reliability of documentation.

Art. No.	Pack Qty.	€
HXC6.1	20	116,15

A 121 °C

Indicators for autoclave monitoring

By 3M. Bowie-Dick disposable test pack. Heavy-metal-free indicators for daily air extraction and water vapour permeability test in accordance with DIN EN 17665. Meets EN 867-1 1997, EN 867-4:2000, ISO 11140-1:1995 and ISO 11140-4:2001. Simple interpretation and fault detection through colour change from blue to pink, as well as non-reflective surface. No subsequent change of colour for safe storage and transparency of results. Reproducible.

Art. No.	Pack Qty.	€
ANX4.1	20	212,85

A 121 °C

Comply™ SteriGage™ chemo-indicators

By 3M. Class 5 integrating indicators (integrators) for monitoring the sterilisation process within individual packaging. "Moving Front" technology ensures clear results: As the sterilisation process progresses, a dark strip forms, stopping either within the "Accept" band (pass) or within the "Reject" band (fail). The result can be read directly off the indicator without any need for interpretation. Suitable for steam sterilisation at +121 °C and +134 °C. High performance: reaction is identical to that of an bioindicator strip in the sterilisation process.

Art. No.	Pack Qty.	€
ANX5.1	100	78,15

stericlin® type 5 indicator strips (STEAM)

Absorptive indicators for package monitoring in accordance with DIN EN ISO 11140-1. Review of the sterilisation process to sufficient influence of steam (steam, temperature and time) in the interior of packaging or in other selected areas. Free from heavy metals and toxic substances.

Application:
- Place in the desired areas of the load (in transparent packaging, wrapping materials, containers, etc.)
- Carry out the sterilisation program (121 °C/134 °C)
- Remove the indicator strips
- Review the result: in the event of sufficient influence from vapour, the indicator will change colour from blue to pink. An incomplete colour change indicates a malfunction of the steriliser. Following a successful colour conversion, the colour hue of the indicator will no longer change. This ensures complete reliability of documentation.

Length (mm)	Width (mm)	Art. No.	Pack Qty.	€

Sterilisation containers polySteribox®

Transparent special plastic, can be used for approx. 1250 sterilization cycles. **For the sterilization and storage of instruments.** Suitable for steam, gas and plasma sterilization. Hydrophobic PTFE filter stops germs and bacteria (replace after approx. 250 sterilizations, includes date insert). A sterilization mark and protective seal can be used to check the sterility of the contents. Safety seal for safe transportation. Stackable.
Dishwasher safe.
In acc. with DIN 58952, 58953, EN 868-1/868-8/554, ISO 11607 and DIN EN ISO 17664 and 11137-1. CE certified. Autoclavable up to 134 °C.
Delivery incl. PTFE filter (12-month filter, polySteribox M with permanent filter). Permanent filter set is optional. Please order separately.

DuraPorter™ safety containers

Made of **PC**, with watertight silicon seal. Ideal for in-house transportation of biological and chemical samples, instruments or for storage. Transparent box with hinged lid, three snap locks and carry handle, stackable. Partitionings for smaller samples can be removed to make use of the entire interior. Lid can be fully opened for easy filling and cleaning. Dimensions: outer L 380 x W 196 x H 160 mm, inner L 335 x W 155 x H 135 mm. Autoclavable.

Cell culture bottles

S

Suspension culture bottles with filter screw cap

By Greiner Bio-One. **Made of PS. Sterile.** Hydrophobic membrane (pore size 0.2 µm) for minimal risk of contamination and optimal gas exchange. High, angled neck reduces the risk of media contact with the inside of the screw cap and thus provides an additional layer of protection against contamination.

- Hydrophobic surface
- Ideal for suspension cultures, hybridoma cells and embryonal stem cells
- Optimal access with pipette
- Graduations and labelling space on side
- Optimal gas exchange thanks to high air flow rate of membrane
- Additional standard screw caps (without filter) in every box
- **DNase, RNase and human DNA free**
- Endotoxin free, free of cytotoxic substances

Max. filling cap. (ml)	Art. No.	Pack Qty.	€
50	**CNA6.1**	200 (20 x 10)	144,45
250	**CNA7.1**	120 (24 x 5)	118,50

FourWell Plate™ CELLSTAR®

By Greiner Bio-One. Made of **PS**. **Sterile.** Four-well plate for microscopic applications, for cultivation and processing of cells on microscope slides. Can also be used as incubation tray for blotting membranes. Dimensions: L 127.8 x W 85.5 x H 14.4 mm (plate footprint conforms to ANSI standard).

- 4 individual chambers, each with a max. volume of 18.6 ml per well
- Numbered wells for secure sample identification
- Bevelled edges on the left-hand side of the plates serve as a guide
- Vents
- With cover panel
- **Free of detectable DNase, RNase and human DNA**
- **Free of detectable endotoxins, free of cytotoxic substances**

Art. No.	Pack Qty.	€
CNA2.1	32 (4 x 8)	124,95

S

Microtitration plates BRAND*plates*®

By Brand. Manufactured in accordance with ANSI/SBS standards 1 to 4 - 2004 to ensure compatibility when carrying out manual processes and, in particular, automatic processes.

- 96 well standard format
- Clearly distinguishable by embossed alphanumeric colour code: grey for standard plates, blue for immunology, orange for the cell culture
- **Free of endotoxins, DNase, DNA, RNase, non-cytotoxic**

Microtitration plates cellGrade™

Made of **PS**.

- **Sterile** (individually packed, with cover)
- Standard plate for cultivating adherent cell cultures
- PS surface with various freely accessible chemical groups, e.g. carboxyl and hydroxyl groups
- Surface is hydrophilic (untreated PS is non-hydrophilic)
- Serum constituents are bound to the free chemical groups which allow indirect adhesion of cells

Volume per well (µl)	Type	Art. No.	Pack Qty.	€

330	black, with transparent F-bottom	**XT75.1**	50	651,45

Microtitration plates, inertGrade™

Made of **PS**.

- **Sterile** (individually packed, with cover)
- Suitable for cultivating suspension cell cultures
- Ideal for cell cultures if cell adhesion is to be avoided
- Optimised surface properties minimise cell binding, protein absorption, enzyme activation and cellular activation
- This allows, for example, premature differentiation of stem cells to be inhibited

Volume per well (µl)	Type	Art. No.	Pack Qty.	€
330	96 well, transparent, U-bottom	**XT76.1**	40	497,75

Microtiter plates pureGrade™ S

Made of transparent **PS**. Untreated surface.

- **Sterile** (individually packed, with cover) or non-sterile
- Chimney shaped 96 well cavities, with alphanumeric labelling
- F profile (flat bottom shape) for precision optical measurements
- Sterile type is ideal for bacteriological assays
- Non-sterile type designed, in particular, for homogeneous assays, screenings and storage

▶ For further information on Brand microtiter plates see page 482

Cell culture plates, pans + vials

Cell culture plates

Made of **PS**. **Sterile** (Gamma sterilised), individually packed, with cover. Hydrophilic, negatively-charged surface through plasma treatment for uniform cell adhesion and cell growth.

- F profile (flat-shaped base)
- Optically clear for good cell visualisation
- Increased well edge reduces evaporation
- Condensation rings in the lid reduce cross-contamination
- Alphanumeric numbering
- Non-pyrogenic

EASYstrainer™ cell strainer

By Greiner Bio-One. Housing made of **PP**, filter diaphragm made of **PET**. **Sterile,** individually packed (single blister pack). For the filtration of cell suspensions and primary cell isolates, e.g. after organ digestion, for use in primary cell extraction or cell preparation for flow cytometry.

- Fits all standard 50 ml tubes
- With handle and mantle surface for improved aseptic handling
- Venting slot for rapid filtration, no overflowing of the cell strainer

Aids aseptic work: the mantle surface and handle protect against unintentional contact with the sterile filter material. The single blister pack allows for convenient and aseptic removal of the strainer. Venting slot between fitted cell strainer and tube allows the air in the tube to escape quickly during filtration and ensures that liquid does not accumulate between the strainer and the tube or that the strainer cannot overflow.

Flowmi™ cell strainer

Sterile. For direct filtration of up to 1000 µl cell suspensions through pipette tips before FLOW or FACS analysis. Compatible with most conventional 1000 µl pipette tips.

- Filters small quantities of liquids without losing any volume
- Removes cell clumping, resulting in homogeneous individual cell suspensions
- Filters cell fragments in order to reduce the blockage potential for FLOW or FACS devices

Application:

1. Take up a sample in the pipette tip
2. Insert it into the Flowmi™ cell strainer
3. Filter the sample through the cell strainer into a reaction vial
4. Discard the cell strainer along with the pipette tip

Note: the Flowmi™ cell strainer should be used with cell suspensions of up two million cells/ml (40 µl) or four million cells/ml (70 µl).

CELLreaktor™-tubes CELLSTAR®

By Greiner Bio-One. Made of **PP**, filter screw cap with PTFE-coated capillary pore filter membrane (USP Class VI certified, pore size 0.2 µm). **Sterile.** Temperature stability - tube: from -196 to +121 °C, screw cap: from -80 to +100 °C. Tubes are autoclavable (without screw cap).

- Conical tube design facilitates direct cell harvesting
- With graduations and labelling space
- Excellent gas exchange
- Free of detectable DNase, RNase and human DNA
- Pyrogen free, non-cytotoxic

Uses:

- Miniaturisation of large scale test set-ups
- Maximises the number of parallel experiments
- Bioreactors for the cultivation of suspension cells and spheroid cells
- Expansion of aerobic bacteria, yeasts and micro-organisms
- Storage of substances which require gas exchange

Nutrient media bottles

By Nalgene®. Bottle made of **PETG**, screw cap made of **HDPE. Sterile** (γ-sterilized). Square. Break-resistant and robust, transparent. **Leakproof.**
The 2 l-bottle has moulded handles to enable easier handling.
Low permeation of CO_2 and O_2 enables storage of nutrient media up to 6 months. Bottles and caps are non-pyrogenic. Sealed with a heat-shrink band sealing around cap and neck: Sterility is ensured as long as band is intact.

DURAN®-*TILT* cell culture media bottles

Made by DURAN®. Can be used in two positions: Upright for storage, tilted at 45° for ergonomic pipetting.
- Compact shape, ideal for low sliding windows in sterile workbenches
- Stackable and space-saving
- Wide opening for easy pipetting
- Ergonomic screw thread for easy opening and closing
- Double volume marking for added convenience

500 ml volume, GL 56 thread, 151 mm high.
Delivery incl. screw thread made of **PP**, white.

DishRack petri dish stand

By Sarstedt. Made of **PC**, colourless. For storing, transporting and incubating up to 52 Petri disks with ∅ 92 mm. With 4 holders, the Petri dishes can be removed easily and without alignment from any position. Two flexible silicone retaining lips provide a secure hold for the plates in the stand, even during transport. Height 240 mm.
Note: Autoclaving of the rack is possible as a rule; however, if carried out several times (more than 3x) stress cracks can occur at the riveted eyelets of the rack, which can adversely affect the stability of the rack.

Delivery incl. paper marking strips.

Stand for ∅ 60 mm Petri dishes

Made of **PP**, powder coated steel base. With carry handle. For Petri dishes with ∅ max. 60 mm. Capacity: max. 54 Petri dishes in 6 stacks. Dimensions: L 267 x W 171 x H 171 mm. Autoclavable.

Art. No.	Pack Qty.	€
CXP2.1	1	99,15

Sealing tapes for petri dishes

Elastic, self-adhesive. As well for microtest plates, bottles, cans, etc. Excellent alternative to heat-shrinkable sleeves. Prevents water loss, gas diffusion and contamination. Waterproof and resistant to most solvents. Flexible even under low temperatures (-30 °C).
Temperature stable from -40 to +77 °C (for a short time stable to +100 °C). Thickness 0.13 mm, width of roll 13 mm, length of roll 33 m.

SC6 PLUS colony counter

By Stuart. For fast and exact counting of bacterial colonies in Petri dishes.

- Counting is initiated by pressing down on the Petri dish with any pen
- Pressure sensitivity is individually adjustable
- Confirmation of count by audible signal (optional)
- With integrated average counter for evaluating up to 99 Petri dishes
- Optional light or dark background (dark background aids counting translucent colonies)
- With non-reflective LED lighting
- Three-digit LED display
- Connectivity to PC
- With antimicrobial BioCote® surface coating

Technical specifications:

Digital display	0-999
Ambient temperature range	+5 to +40 °C
Dimensions (W x D x H)	310 x 300 x 140 mm
Weight	1.5 kg
Power supply	230 V, 50 Hz

Delivery incl. 2 Wolffhügel grids and 2 reducer rings (centring aids) for Petri dishes 50-90 mm in diameter, USB cable (1 m long). Please order magnifying glasses for counting microscopic colonies separately.

Type	Art. No.	Pack Qty.	€

Electroporation cuvettes

Cuvette made of **PC**, electrodes made of **aluminium**. Manufactured under clean-room conditions, individually packed. In 3 column widths, 1, 2 and 4 mm. Colour-coded lids according to column width. Compatible with most electroporation systems (Bio-Rad®, BTX®, Invitrogen®, Eppendorf and Kodak®/IBI®), and many more.

Column width (mm)	Lid colour	Art. No.	Pack Qty.	€
1	orange	**PP38.1**	50	170,95
2	green	**PP39.1**	50	170,95
4	black	**PP40.1**	10	42,50

S

Clone cylinders

Made of **PS, sterile**. For isolating clones or for singling out cells or cell groups. Conical cylinder flared at lower edge for good contact with dish surface.

To isolate a clone, the base of the cylinder is coated with a thin grease film (e.g. sterile silicone oil) in order to ensure better sealing. The silicone side cylinder is placed over the selected clone. After adding a small quantity of Trypsin/EDTA and a short incubation period at 37 °C, the cells separate and can be transferred to other vessels.

Inoculation loops

Made of twisted nickel-chrome wire. Fast cooling, uniform shape and high flexibility to conserve the agar plate.
Calibrated inoculation loops are supplied with ASM/APHA calibration certificate, test method acc. to Evans Blue Dye test protocol.
Dimensions: wire ∅ 0.6 mm, L 75 mm.
Delivery without inoculation loop holder.

Version	Innner ∅ (mm)	Art. No.	Pack Qty.	€

Preparation needle holder, aluminium

By Hammacher. Made of stainless steel Wironit (austenitic chrome-nickel steel with 18 % chrome and 10-12 % nickel), non-corrosive, anti magnetic, acid-resistant. Needle holder for smear test eyelets and preparation needles up to max. ∅ 1.0 mm, with Wironit top part and aluminium handle (∅ 5 mm). Length 170 mm. Autoclavable.

Art. No.	Pack Qty.	€
HCN8.1	1	16,75

Preparation needle holder with removable handle

By Hammacher. Made of stainless steel Wironit (austenitic chrome-nickel steel with 18 % chrome and 10-12 % nickel), non-corrosive, anti magnetic, acid-resistant. Needle holder for smear test eyelets and preparation needles up to max. ∅ 1.0 mm, with removable Wironit top part (autoclavable) and plastic handle (∅ 5 mm). Length 240 mm.

Art. No.	Pack Qty.	€
HCN9.1	1	22,15

A 121 °C

Inoculating loop holder

Made of stainless steel. Loops are fixed with union nut. For inoculating loops with wire-∅ 0.6-1.0 mm. Set sorted by colour: blue, yellow, red, black.
Length: 245 mm. Autoclavable at 121 °C.

Type	Art. No.	Pack Qty.	€
Inoculating loop holder set	**KL97.1**	4	55,70

Quick-change chuck and pestle

Cone-shaped pestle made of autoclavable **PP**, quick change chuck made of stainless steel. Fits all standard laboratory-stirrers. Reusable.

Pestle-dimensions: Overall length 70 mm. Shaft-∅ 4.9 mm.
Cone can reduce from 6 to 2.5 mm, cone length 10 mm.

Pestle can be changed when motor is running:
Vessel can be held with one hand and pestle changed with the other.

Quick-change chuck suitable for all chucks that fit an 8 mm clamp.

Rotilabo®-macro pestle

Made of stainless steel 1.4301. For the homogenisation of cells, tissue, foodstuffs samples and much more, manually or using laboratory stirrers. Suitable for 15 ml centrifuge tubes (e.g. Art. No. AN76.1f).

- Made from one piece and polished for a perfect fit
- Transitions are optimally designed for easy disinfection
- Tapered shank for minimal homogenate displacement
- Autoclavable

Dimensions: overall length 185 mm, handle length 100 mm. Shank ∅ 8 mm (tapering to 4.5 mm), taper ∅ 12 mm (tapering to 4 mm). Weight 60 g.

Rotilabo®-cuvette rack

Made of **PP**. For 12 cuvettes 10 mm thick. Extremely robust design.
The special design of the rack eliminates scratching of cuvette surface.
Stackable. Dimensions: L 115 x W 110 x H 105 mm.
Temperature stable to 130 °C. Autoclavable.

Art. No.	Pack Qty.	€
9664.1	1	47,45

Cuvettes / Cuvette racks

UV-cuvettes

By Brand. Made of plastic.
For UV-measurement in **wave range 230-900 nm**. Specially developed for the photometrical determination of proteins, ssDNA, dsDNA, RNA and oligonucleotides in the UV-range.

- Disposable cuvettes - no danger of contamination during cleaning
- High chemical stability
- Two optical windows
- Optically perfect transparency
- Sorted according to nest numbers to minimize extinction deviation
- Recessed windows to protect against scratching
- Arrow marks direction of irradiation

Micro-cuvettes are ideal specially for small sample volumes from 70 µl and available in two different centric heights (8.5 and 15 mm).
Standard thickness: 10 mm, dimensions 12.5 x 12.5 x 45 mm

Standard deviation:
240 nm ≤±0.007 extinction units
300 nm ≤±0.005 extinction units

Counting chambers

① Neubauer counting chamber

By Marienfeld. Made of **special optical glass**, CE-certified, double grid.
Chamber depth: 0.1 mm, large square: 1 mm², group square: 0.04 mm², smallest square: 0.0025 mm². Counting net with nine large squares.
The large square in the centre is split into 16 group squares and these in turn are split into 16 least squares.
Delivery incl. two haemacytometer cover slips (20 x 26 mm).

Version	Art. No.	Pack Qty.	€
excl. spring clamps	**T728.1**	1	48,20
with 2 spring clamps	**PC74.1**	1	72,60

① Neubauer counting chamber, bright-lined

Same as Neubauer but with rhodium-plated chamber base.
Therefore bright counter grating during standard setting of microscope.
Delivery incl. 2 haemacytometer cover slips (20 x 26 mm).

Version	Art. No.	Pack Qty.	€
without spring clamps	**T734.1**	1	89,05
with spring clamps	**KHY4.1**	1	99,85

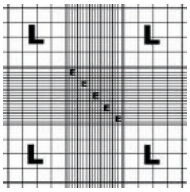
② Thoma counting chamber

For thrombocyte and erythrocyte counting.
Chamber depth: 0.1 mm, smallest square: 0.0025 mm², counter grating with 5 large squares (without corner sections). The large centre square is subdivided into 16 group squares which, in turn, are divided into 16 mini squares.
Delivery incl. 2 haemacytometer cover slips (20 x 26 mm).

Version	Art. No.	Pack Qty.	€
without spring clamps	**T732.1**	1	49,75

② Thoma new counting chamber

Same as Thoma. But without any lines in the boundary areas.
Delivery incl. 2 haemacytometer cover slips (20 x 26 mm).



Version	Art. No.	Pack Qty.	€
without spring clamps	**T733.1**	1	52,70

C-Chip Neubauer improved

Disposable counting chamber **made of optical plastic**, lightweight and unbreakable. Precise quantification, high reproducibility.
Same cell configuration as Neubauer improved glass counting cells.
Double net ruling. Chamber thickness 0.1 mm. Chamber volume 10 µl.
Dimensions: L 75 x W 25 x H 1.6 mm. Cover slips are not required.

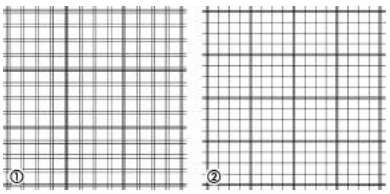
Art. No.	Pack Qty.	€
PK36.1	50	172,00

Neubauer counting chamber improved

By Marienfeld. Made of **special optical glass**, CE-certified, double graticule division.
For leucocyte, thrombocyte and erythrocyte counting.
Chamber depth: 0.1 mm, large square: 1 mm², group square: 0.04 mm², smallest square: 0.0025 mm².
Counter grating with 9 large squares.The four corner squares are for leucocyte counting.The large square in the centre is subdivided into 25 group squares and these in turn into 16 smallest squares.
Five group squares are for erythrocyte counting.
Delivery incl. 2 haemacytometer cover slips (20 x 26 mm).

Version	Art. No.	Pack Qty.	€
without spring clamps	**T729.1**	1	47,60
with 2 spring clamps	**PC72.1**	1	72,70

Neubauer counting chamber improved, bright-lined



Same as Neubauer improved but with rhodium-plated chamber base.
Therefore bright counter grating during standard setting of microscope.
Delivery incl. 2 haemacytometer cover slips (20 x 26 mm).

Version	Art. No.	Pack Qty.	€
without spring clamps	**T735.1**	1	86,75
with spring clamps	**KHY5.1**	1	99,85

Neubauer improved counting chambers, with special depth

Same as Neubauer improved but with different chamber depth.
Delivery incl. two haemacytometer coverslips (20 x 26 mm).

Version	Chamber depth (mm)	Art. No.	Pack Qty.	€
without spring clamps	0.01	**PC73.1**	1	155,20
without spring clamps	0.02	**KHY6.1**	1	162,95

① Bürkner counting chamber

By Marienfeld. Made of **special optical glass**, CE-certified, double graticule division.
For leucocyte and erythrocyte counting.
Chamber depth: 0.1 mm, large square: 1 mm², group square: 0.04 mm².
Counter grating with 9 large squares. They are used for leucocyte counting. Each large square is subdivided into 16 group squares for erythrocyte counting. The group squares have no subdivisions.
Delivery incl. 2 haemacytometer cover slips (20 x 26 mm).

Version	Art. No.	Pack Qty.	€
without spring clamps	**T730.1**	1	50,35

② Fuchs-Rosenthal counting chamber

For cell counting in liquor.
Chamber depth: 0.2 mm, total surface: 16 mm².
Counter grating with 16 large squares. The total area is counted.
Delivery incl. 2 haemacytometer cover slips (20 x 26 mm).

Version	Art. No.	Pack Qty.	€
without spring clamps	**T731.1**	1	49,40

Cover slips

Malassez counting chamber

By Marienfeld. Made of **special optical glass**, double grid.

For counting cells in liquor or for counting nematodes.
The counting grid covers an area of 2 mm x 2.5 mm. The large rectangles measure 0.25 x 0.20 mm = 0.05 mm² and are divided into 20 small squares each measuring 0.05 x 0.05 mm = 0.0025 mm².
Chamber thickness 0.2 mm.

Delivery incl. two haemacytometer coverslips (20 x 26 mm).

Version	Art. No.	Pack Qty.	€
without spring clamps	**KHY1.1**	1	37,70

McMaster counting chamber

By Marienfeld. Made of special optical glass.

For counting worm eggs. Suitable for solid media.
With two fields and affixed cover glass with two counting grids measuring 10 x 10 mm (divided into 10 parts). The cover glass is affixed on three supports. Distance between base plate and cover glass: 1.5 mm.
Dimensions: L 75 x W 32 mm.

Version	Art. No.	Pack Qty.	€
Counting chamber, complete	**KHY2.1**	1	226,00

Nageotte counting chamber

By Marienfeld. Made of **special optical glass**, double grid.

For counting cells in liquor or for counting nematodes.
The square base area of 100 mm² is divided into 40 rectangular areas each measuring 0.25 x 10 mm. Chamber thickness 0.5 mm.

Delivery incl. two haemacytometer coverslips (30 x 30, thickness 0.4 mm).

Version	Art. No.	Pack Qty.	€
without spring clamps	**KHY3.1**	1	114,60

Cover slips

In acc. with ISO 8255-1, made of transparent borosilicate glass, hydrolytic class 1. Thickness no. 1 (0.13-0.16 mm).
- The visible spectral region is absorption-free
- Optically clean and free from smears, bubbles or streaks
- High chemical stability
- No interference from natural fluorescence even when working within short UV-range (e.g. 365 nm)
- Refractive index 1.5230

PK27.1	1000	103,10

Standard microscope slides

By Menzel. Made of soda-lime glass, 76 x 26 mm, 1 mm thick, in acc. with ISO 8037/1. Partly with frosted edge of 20 mm width. Different edge styles serve different purposes: slides with cut edges are preferable for normal microscopy, and slides with 45° and 90° cut angles are better for for use in pathology, and histology, because they reduce risk of cutting injury. They are also good for use in automatic machines.

XT62.1	100	66,60

Microscope slides

DG microscope slides

Produced from hydrolytic class 3 high-quality float glass (soda-lime glass). Planarity and thickness distribution lie within very a tight tolerance band and are therefore ideally suited to microscopy applications (readjustment of the microscope is not necessary).

- Virtually free from surface defects, inclusions, streaks and bubbles
- The edges of the glass slides are uniform and crystal clear, reducing the risk of breakage along the edges
- Excellent wettability
- Dimensions 26 x 76 mm (to ISO 8037/1)
- Glass thickness 1.0 ±0.05 mm

Version	Art. No.	Pack Qty.	€
Cut	**NK72.1**	50	4,60
Cut edges, with frosted edge	**NK73.1**	50	6,10
Edges ground to 90°, with white labelling surface	**NK74.1**	50	9,65

DG cover slips

Produced from hydrolytic class 1 borosilicate glass D263.

- Virtually free from surface defects, inclusions, streaks and bubbles and unwanted striation thanks to high optical homogeneity
- Highly transparent, colourless and nearly free from colour impurities
- Absorption-free within the visible spectrum
- Also suitable for fluorescence microscopy thanks to UV absorption
- High planarity
- High quality is assured through optimal cooling process
- Refractive indices matched to microscopy applications

Adhesion slides

Made of soda-lime glass, with special adhesives for anchoring cells and tissues.
Complex and expensive application of adhesives or protein layers is not necessary.
No undesirable background staining.
Ground edges 90°. With labelling area.

SuperFrost®/Plus adhesion microscope slides

By Menzel. Freshly frozen tissue sections and cytology preparations are attracted electrostatically to the microscope slides.
Dimensions: L 75 x W 25 mm, thickness 1 mm.

Suitable for:
- Fixed tissue sections, embedded in paraffin (2-5 µm)
- Cell adhesions for cyto-centrifugal preparations in standard Papanicolaou smears
- Immuno-peroxidase hybridisation
- In-situ DNA hybridisation

Art. No.	Pack Qty.	€
H867.1	72	23,70

Histobond®+ adhesion microscope slides

By Marienfeld. The silanized glass surface has a permanent positive charge which ensures that all types of tissue sections attach securely to the glass. Coloured labelling spaces offer potential uses in routine histology.
Dimensions: L 76 x W 26 mm, thickness 1 mm.

Suitable for:
- In-situ hybridisation
- Problematic tissue samples, such as brain or spinal cord
- Multiple washing cycles, sections adhere firmly to the glass
- Microwave cooking

Edges 90° grounded

SuperFrost® Plus Gold adhesion microscope slides

By Menzel. Fresh frozen sections or frozen section fixed in formalin are attracted to the slide and then chemically fixed onto the glass surface.
Dimensions: L 75 x W 25 mm, thickness 1 mm.

Suitable for:
- Special staining methods (toluidine blue staining, hematoxylin staining and quick-freeze eosin section staining)
- Tissue sections up to 20 µm
- Bone, frozen heart, brain, skin and other tissue sections that are normally difficult to bind
- Immunocytochemical and in-situ DNA-hybridisation of frozen tissue sections
- Selection counting for immunofluorescence analysis in the event of low tissue quantities

Art. No.	Pack Qty.	€
ET09.2	72	68,50

Adhesion slides

Polysine®-adhesion microscope slides

By Menzel. The samples are initially attracted electrostatically and then bound biochemically. The permanent adhesive provides excellent cell and tissue adhesion on the microscope slides. Polysine® microscope slides are not affected by enzyme predigestion or heating.
Dimensions: L 75 x W 25 mm, thickness 1 mm.

Ideally suitable for:
- Fresh frozen sections
- Paraffin-embedded (2-5 µm, fixed with alcohol, formalin, bouins or non-crosslinking sections)
- Extended staining process
- Extended in-situ DNA hybridisation and immunocytochemical methods
- Cytocentrifuge preparations

Art. No.	Pack Qty.	€
ET10.1	72	21,45

Roti®-Bond adhesion slides

Fast and highly efficient immobilisation of cellular material with optimal structure conservation.

The new adhesive coating of the Roti®-Bond adhesion slides reacts to natural surface structures of cells and tissues, anchoring them securely to the glass surface. Due to this procedure, based on different binding principles, the cells do not lose their antigenicity, their cell functionality and their three-dimensional structure.

- Assays using only several hundred cells possible
- No cell loss even during harsh incubation procedures
- Excellent recovery rate
- Compatible with all standard and modern assay systems and all fluorescent dyes
- Particularly adapted to assays using stem cells

Dimensions: L 75 mm x W 25 mm, thickness 1 mm

Roti®-Bond adhesion slides 50 and 100 are delivered in Rotilabo®-slide boxes.

Art. No.	Pack Qty.	€
CL20.1	5	11,75

Rotilabo®-microscope slide holders

Microscopic slide holders for 12 microscope slides 76 x 26 mm. Grey.
Vertical storage of microscope slides prevents the labelling areas from coming in contact with the staining solution. Dimensions: 60 x 64 x 97 mm.

Type	Art. No.	Pack Qty.	€
Microscope slide holders	**HA49.1**	1	16,60

Universal microscope slide cuvettes

For histology, cuvettes made of black **POM**.

- Clip on lid makes structure impermeable to light. There is a compartment in the lid for drying agent (for example bluegel), which can be closed with a plate that also serves as a note board for labelling slides. Easy to transport racks for 25 microscope slides of standard format, slots for slides are numbered. For volume approx. 250 ml, only 150 ml are needed. Closes airtight, important for volatile solutions.
- Contains no metal, no danger of corrosion when using aggressive solvents
- Easy to clean
- The exposition, development and second stain of samples can be done in a time saving way without changing microscope slides by transporting the slides in the rack.

Staining cuvette

consisting of staining trough 2286.1 and staining rack 2287.1.

Insert	86 x 70 x 21	**2291.2**	2	15,10

Staining boxes

Made of **PMP**, with lid, for eight microscope slides 76 x 26 mm.
Dimensions: L 58 x W 54 x H 86 mm. Suitable for microwave.

Art. No.	Pack Qty.	€
2292.2	4	54,70

DURAN WHEATON KIMBLE

Coplin staining jar

Made of lime-soda-glass. For 10 microscope slides 76 x 26 mm.
Outer ∅ 66 mm. Height 108 mm.

Art. No.	Pack Qty.	€
H548.1	1	16,55

Staining boxes acc. to Schiefferdecker

Made of **PMP**. Staining boxes with lid for 20 microscope slides (10 pairs) 76 x 26 mm. Dimensions: L 89 x W 70 x H 50 mm. Microwave safe.

Art. No.	Pack Qty.	€
XC73.1	4	53,00

Staining boxes and troughs made of soda-lime glass have a maximum usage temperature of approx. 100 °C. It is very important to avoid sudden changes in temperature as this type of glass does not have good thermal shock resistance. The temperature should not exceed 60 °C during cleaning. The use of neutral to slightly alkaline cleaning agents is recommended.

A 121 °C

Coplin staining jar

Made of **PP**. For 10 microscope slides 76 x 26 mm.
With screw cap, opening ∅ 53 mm for easy loading.
Dimensions: ∅ 60 x H 114 mm. Autoclavable.

Art. No.	Pack Qty.	€
YC09.1	1	12,05

Coplin staining jars, with screw cap

Made of sodium-lime glass, with screw cap made of plastic and PE foam insert.
For 10 microscope slides 76 x 26 mm.

Type	Height (mm)	Art. No.	Pack Qty.	€
High form	108	**ETE2.1**	6	89,20
Low form	85	**ETE3.1**	6	86,40

DURAN WHEATON KIMBLE

Coplin staining dish

By Wheaton. Made of calcium soda glass. Screw top made of PP.
For 5 -10 microscope slides 76 x 26 mm. Inner dimensions:
L 26 x W 26 x D 90 mm. Storage capacity 60 ml.

Type	Art. No.	Pack Qty.	€
Coplin staining dish, complete	**HLA7.1**	1	33,40
Spare screw cap for Coplin staining dish	**HLA8.1**	1	12,05

① ②

Staining boxes acc. to Hellendahl

Made of lime-soda-glass.
For 8 microscope slides, 76 x 26 mm.

Type	L x W x H (mm)	Art. No.	Pack Qty.	€
① without extension	93 x 43 x 97	**H549.1**	1	22,55
② with extension	63 x 58 x 98	**H550.1**	1	17,10

A 121 °C

Staining boxes with lid

Made of glazed porcelain. For the protection of light-sensitive staining solutions. For 6 microscope slides of size 76 x 26 mm.
Lid dimensions: L 75 x W 48 x H 5 mm. Temperature stable up to 1000 °C.
Microwave safe. Autoclavable.

L x W x H (mm)	Art. No.	Pack Qty.	€
70 x 40 x 86	**XX63.1**	2	49,30

Staining box acc. to Schiefferdecker

Made of lime-soda-glass.
For 20 microscope slides (10 pairs) 76 x 26 mm.
Dimensions: L 89 x W 71 x H 46 mm.

Art. No.	Pack Qty.	€
H551.1	1	16,45

Staining box and rack

Made of soda-lime glass.
For 10 microscope slides 76 x 26 mm or for all widths to 52 mm.

Type	L x W x H (mm)	Art. No.	Pack Qty.	€
Staining box with lid	105 x 85 x 70	**H554.1**	1	18,40
Staining rack	85 x 60 x 45	**H552.1**	1	22,10

Swingsette™ biopsy embedding cassettes

Made of **Acetal Polymer**. Cassette and lid with small square compartments for processing, embedding and storage of tissue specimens.

- With hinged lid for easy use
- Lid can be opened and closed any number of times
- Textured labelling area on the front
- 45° angle for automated labelling systems
- Resistant to standard histological solvents

Colour	Art. No.	Pack Qty.	€

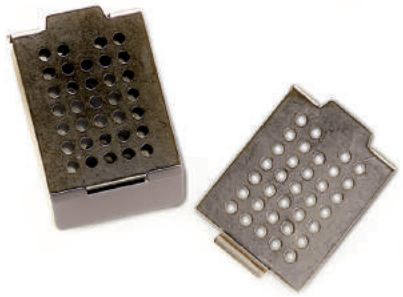
Embedding cassettes and accessories



A 121 °C

Embedding cassettes Macro

Made of special high-density polymer. **Extra high (12 mm), ideal for holding oversized tissue samples** during the embedding process or for storage. Solvent-proof. With lid and labelling area. Easy to open and can be closed repeatedly. Outer dimensions: L 41 x W 27.5 x H 12 mm. Autoclavable.

Colour	Art. No.	Pack Qty.	€
white	**EE16.1**	250	96,75

Rotilabo®-metal lids

Reusable, made of high-grade stainless steel. Ideal for closing standard embedding cassettes. With perforation for optimal liquid diffusion.

Art. No.	Pack Qty.	€
H950.1	5	19,35

Metal embedding moulds

Made of stainless steel, with glossy finish, suitable for histology. Aids removing paraffin embeddings and allows ideal centring of findings in the paraffin block.

Version	L x W x H outer (mm)	Inner L x W (mm)	Art. No.	Pack Qty.	€
Standard	52 x 35 x 11	23 x 36	**TT29.1**	10	51,80
For biopsies	52 x 35 x 11,6	7 x 7	**TT30.1**	10	52,20

Macro embedding moulds

Made of **PVC**. With smooth inner surface and rounded corners for easy sampling. Volume 5 ml. Dimensions outside: L 37 x W 24 x H 10 mm, inside: L 35 x W 22 x H 7 mm.

Art. No.	Pack Qty.	€
AEK8.1	500	83,65

Sponges for embedding cassettes

Synthetic sponge, for embedding in Rotilabo®-embedding cassettes. Colour: blue. With controlled porosity. Can easily be placed in embedding cassettes. Suitable for the preparation of biopsies. Dimensions: L 32 x W 26 x H 2.5 mm.

Art. No.	Pack Qty.	€
TT56.1	500	23,05

Rotilabo®-storage systems

For keeping and storing up to 250 embedding cassettes. With large labelling area. Dimensions: L 405 x W 230 x H 51 mm.

- Type ①: Made of PS. Can be stacked easily.
- Type ②: Made of coated, water-resistant carton

Information on the various alloys in DUMONT® precision tweezers

Alloy	Antimagnetic	Temperature stability	Autoclavable	Special features
Steel (C, Mn, Si)	No	n. a.	No	Very hard for thick tips, not corrosion resistant
Inox02 (C, Mn, Cr, Si)	No	up to 400 °C (DIN 50914)	No	Standard stainless steel
Inox08 (C, Mn, Cr, Mo, V)	No	up to 400 °C (DIN 50914)	Yes (up to 180 °C)	Medical stainless steel, corrosion resistant, good resistance to salts
Antimagnetic steel (C, Cr, Ni, Mo)	80 %	up to 400 °C (DIN 50914)	Yes (up to 270 °C)	Corrosion resistant
Dumoxel® (C, Cr, Ni, Mo, Cu)	95 %	up to 400 °C (DIN 50914)	Yes (up to 270 °C)	Good resistance to corrosion, including mineral and organic acids
Dumostar® (C, Cr, Mo, Mn, Co, Ni, Si)	100 %	up to 500 °C	Yes	Elastic, high resistance to corrosion, including mineral and organic acids, as well as salts
Titanium (C, Fe, O, H, N, Ti)	100 %	up to 430 °C	Yes	Highest corrosion resistance to chemicals such as nitric acid, chlorides and salt water. More flexible and 40 % lighter than stainless steel

Precision tweezers

Precision tweezers, angled

By DUMONT®. Made of Inox08 and Dumoxel®, autoclavable.

Precision tweezers

Precision tweezers, special shape with plastic tips

By DUMONT®. Made of anti-magnetic steel, satin.
With tips made of white TPE-ESD (thermoplastic elastomer, conductive).

- For gentle handling of delicate materials
- Single-cast handle, angled
- Easy to clean and sterilise
- Ergonomic shape, constant pressure for fatigue-free use
- Enhanced grip, notched on outside

Rotilabo®-weighing tweezers

Made of stainless steel, with PVC tips. Curved. Length 90 mm. Weight 8 g.

Art. No.	Pack Qty.	€
YT63.1	1	6,40

Rotilabo®-tweezers set

Four stainless steel tweezers (Remanit 4301) in a case.

Contents:

1 tweezer with fine tip, curved, 120 mm
1 straight tweezer, blunt tip, 130 mm
1 tweezer with guide pin, straight, 130 mm
1 coverslipper tweezer, curved, 115 mm

Art. No.	Pack Qty.	€
PX40.1	1	34,45

Rotilabo®-tweezers set

Four tweezers made of stainless steel 18/10 (material 1.4301), in etui. Red PTFE coating with good anti-adhesive properties forms a separating layer between the tweezer material and the sample. Dull colour of the coating enables glare-free working under the bright lighting in microscopy. The chemical-resistant coating also protects against contact with the nickel contained in the stainless steel.

Contents:

1 pair of tweezers with fine tip, curved, L 120 mm
1 pair of pointed tweezers with guide pin, L 130 mm
1 pair of pointed tweezers curved, L 130 mm
1 pair of blunt tweezers, L 145 mm

Art. No.	Pack Qty.	€
ENX5.1	1	52,15

aspirette® battery powered vacuum forceps

By Hirschmann. With vacuum pump. Ideal for handling small objects up to 70 g in weight. With one-button operation. Ergonomically designed. Suitable for handling membrane filters, optical lenses, microchips, cover slips, slides, etc. Rechargeable up to 1000 x.
Delivery incl. battery charger 230 V, 3 suction cups and 3 needles with ∅ 3.2 / 6 and 10 mm.

Art. No.	Pack Qty.	€
A247.1	1	210,70

Spare suction parts for aspirette®

Consists of 3 suction nozzles and cups ∅ 3.2 / 6 and 10 mm.

Microtome blades Premium Surgipath® DB80-series

By Leica®. Disposable microtome blades with chrome plating and finely honed edge along the full length of the blade for extra-thin sections of the highest quality. Extra-sharp, durable blades ensure consistently precise sectioning from the 1st to the 25th time. Cutting angle 35°.

DB80 LS - with narrow blade profile for routine sectioning in all types of tissue. Extra-thin sections for diagnostic analysis.
Dimensions: L 80 x W 8 mm.

DB80 LX - with narrow blade profile for extremely hard and thick tissue as well as routine sectioning. Extremely durable. Dimensions: L 80 x W 8 mm.

DB80 HS - with wide blade profile for all paraffin-embedded tissue specimens and for routines sectioning in all types of tissue.
Suitable for in situ specimen preparation. Dimensions: L 80 x W 14 mm.

Needle-suture combinations

By B. Braun. Absorbable and non-absorbable suture materials, 300 grade stainless steel needles. **Sterile**, individually packed.

Atraumatic needle-suture combination: smooth transition between needle and suture ensures minimal wound trauma.

Technical specifications of suture material:

Suture type	Suture design	Material	Coating	Loss of tensile strength	Material absorption
Dafilon®	Monofilament	Polyamide 6/6.6	none	n.a.	non-absorbable
Silkam®	braided	Silk	Wax and silicone rubber	n.a.	non-absorbable

Technical specifications of needles:

Needle type	Curvature	Body	Bow length* (mm)
DS16	3/8 circle	Cutting	16
DS19	3/8 circle	Cutting	19

*Distance between needle tip and end of needle, measured along the outer curve of the needle.

Overview of suture and needle types

Recommendations for use:

Type	Properties	Indications
Safil®	- High tensile strength - Minimal tissue trauma - Smooth suture - Low memory effect - Ease to handle	Safil® is indicated for surgical applications requiring a braided, synthetic and absorbable suture material, particularly for procedures in the gastrointestinal tract area, in gynaecology and urology, in ophthalmic surgery, microsurgery, subcutaneous suturing and ligature.
Dafilon®	- Soft and supple - Excellent knot security - Minimal tissue trauma - Low memory effect	Dafilon® is indicated for skin closure as interrupted or intracutaneous suture, and for securing drains and catheters, as well as dental procedures. It is used in microsurgery, ophthalmology and neurosurgery. Dafilon is not suitable for permanent placement in the body.
Silkam®	- Excellent handling properties - Good knot security	Silkam® is indicated for surgical applications requiring the use of a non-absorbable suture material. Applications include general surgery, skin closure, dental surgery, neurosurgery and ligatures.
Cutting needles (DS)	Three edges run along the entire length of the needle to provide an effective and gentle piercing action.	Skin needles: the three-edged, outer-cutting needle body is indicated for suturing of coarse tissue.

Instrument oil

By Hammacher. Synthetic oil, silicone-free.
Odourless and transparent, leaves no brown marks on the instruments.
Spot-on application through safety/anti-drop valve.

Art. No.	Pack Qty.	€
HCY1.1	Application bottle 12 ml	16,95

Dissecting sets for anatomy

A 121 °C

Chemist set

By Hammacher. In zip-up case, with elastic loops to hold instruments. Autoclavable.

Contents:

2 micro-double spatulas, flexible, 150 mm
1 spoon spatula, 150 mm
1 micro-spoon spatula, 150 mm, spoon 5 x 7 mm
1 weighing spatula, 170 mm
1 micro-powder spatula, flexible, 150 mm
1 dissecting needle with plastic handle, 140 mm
1 chemist's spoon, 150 mm
1 pair of splinter forceps, curved, 105 mm
1 pair of tweezers, anatomically shaped, 145 mm
1 pair of tweezers, pointed, 105 mm
1 pair of scissors, pointed-pointed, 145 mm
1 pair of microscopy scissors, 115 mm

Art. No.	Pack Qty.	€
KAN9.1	1	90,75

Chemist set, large

By Hammacher. Instruments made of stainless steel, autoclavable.

*Scissors made of steel, nickel plated and coated, non-autoclavable.

In plastic box, dimensions: L 214 x W 102 x H 27 mm.

Contents:

1 micro double spatula, 130 mm
1 micro spoon spatula, spoon 5 x 7 mm
1 micro powder spatula, flexible, 185 mm
1 double spatula, rigid, 185 mm
1 tweezers, straight, sharp, 160 mm
1 scissors*, straight, serrated, 170 mm
1 Poly spoon, 180 mm
1 weighing spoon
1 double spatula, wide, round on both sides, 150 mm

Art. No.	Pack Qty.	€
TE20.1	1	76,50

Chemist's instruments

Consists of four instruments made of high-grade steel (Remanit 4301). In case W 90 x L 150 mm.

Contents:

1 precision scissors, pointed/blunt 130 mm
1 forceps, pointed 130 mm
1 micro-double spatula 130 mm, blade width 4 mm
1 chemist's double spatula, 150 mm, blade width 9 mm

Art. No.	Pack Qty.	€
1863.1	1	24,55

A 121 °C

Instrument holders

Made of **PP**, white. For storage or precleaning of instruments and thermometers. Autoclavable.

① Rotilabo®-gas bag

Made of natural rubber. Egg-shaped, ideal for mixing or short-term storage of gases. Max. circumference approx. 85 cm. Assorted colours.

Art. No.	Pack Qty.	€
0933.1	100	14,55

② Rotilabo®-gas bags maxi

Made of Latex. Ideal for testing air or gas intake and/or release from apparatus. Also for short-term storage of gases. When empty 22 cm long. Assorted colours.

Art. No.	Pack Qty.	€
TA08.1	10	21,45

Plastigas®-bags

Made of multiple laminated aluminium foil, thermoplastically welded with inner polyethylene layer. Ideal for storing small amounts of gas under low pressure.

Bag 2.5 l with connection nozzle for bubble tubing.
Also with taped septum for removing samples with syringe.

Bag 27.0 l with screw-on valve and metal hose nozzle.
Also with septum for removing samples with syringe.

Bubble tubing, 80 cm long.

Accessories for Art. No. 0848.1, please order separately.

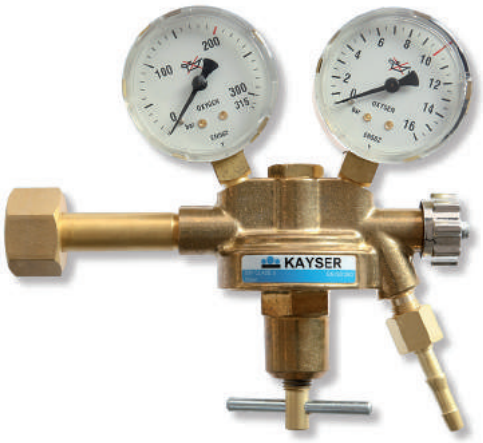
Gas leak detector testo 316-1



By Testo. Ideal for tracing leaks in pipes, flanges, screw connectors, gas pipes etc. For methane. With visual and acoustic alarm. Sensor has extremely short reaction time.

Technical specifications:

Measuring range	0 to 10.000 ppm CH4
Alarm threshold	>200 ppm LED yellow / >10.000 ppm LED red
Battery life	>5 h
Working temperature	4 to 45 °C
Dimensions (L x W x H)	190 x 57 x 42 mm
Weight	300 g

Delivery incl. battery (9 V).

Art. No.	Pack Qty.	€
P757.1	1	224,70

Bottle pressure regulators, single-stage

By Kayser. Made of brass. Manufactured in acc. with EN ISO 2503.
For safe emptying of gas from steel cylinders to max. 200 bar,
with simultaneous reduction to required working pressure of 10 bar.
With safety valve (is triggered at 12 bar). Graduated in 0.5 bar increments.

Technical specifications:

Type of gas	Connection for bottle	Connection for tube
Compressed air	G 5⁄8″ pressure screw	G ¼″ right
Hydrogen	W 21.8 x 1⁄14″ left	G 3⁄8″ left
Oxygen	G ¾″ right	G ¼″ right
Nitrogen	W 24.32 x 1⁄14″ right	G ¼″ right
Calibrating gas	M 19 x 1.5 left	G 3⁄8″ left
Inert gases/CO_2	W 21.8 x 1⁄14″ right	G ¼″ right
Inert gases/CO_2 - vol.-strom 0-28/30 l/min	W 21.8 x 1⁄14″ right	G ¼″ right
Purging gases - vol.-strom 0-50 l/min	W 21.8 x 1⁄14″ left	G 3⁄8″ left

Type of gas	Connection for bottle	Art. No.	Pack Qty.	€

Gas pressure regulators, two stage

By Air Liquide. Made of chrome-plated brass. Ideal for all high-purity gases and gas compounds except acetylene and corrosive gases.
Excellent for use wherever constant outlet pressure is required.

Technical specifications:

Max. inlet pressure	200 bar
Working temperature	-20 to +50 °C
Weight	1.6 kg
Dimensions (L x W x H)	180 x 98 x 135 mm
Contact inlet	bottle attachment in acc. with DIN 477
Contact outlet	clamping ring connection for 6 mm tube
Overal leakage rate	3 x 10^{-7} mbar l/s

Back pressure 0.05-1 bar. Graduated in 0.1 bar-increments.

Sampling for powders / granulates

A 121 °C

Tubus sampler

By Bürkle. Made of stainless steel (1.4404). Suitable for use with foodstuffs. For pourable bulk goods up to approx. 10 mm in diameter, e.g. hazel nuts, cereals, granulates, crystalline solids (e.g. sugar).
Insert Tubus into a sack to the desired sampling depth.
The sample flows directly through the open tube into the sampling bag.
Tube ∅ 40 mm. Autoclavable.

Length (cm)	Art. No.	Pack Qty.	€
40	**EP04.1**	1	155,25
80	**EP05.1**	1	195,65

A 121 °C

QuickPicker samplers

By Bürkle. Made of transparent PP or stainless steel 1.4404, suitable for foodstuffs. For removal of bulk goods from bags and direct transfer into original sampling bottles. Insertion depth 300 mm. Total length 500 mm. Volume 75 ml. Tube ∅ 25 mm. Sampler is autoclavable (without bottle).
Delivery incl. two 250 ml LDPE sampling bottles and cleaning brush.

Material	Art. No.	Pack Qty.	€
PP	**YK99.1**	1	148,75

Powder and granulate sampler

By Bürkle. Made of stainless steel 1.4404. Suitable for use with foodstuffs. Conforms to EN ISO 707 and IDF (International Dairy Federation). Suitable for sampling milk powder. The sampler is inserted into bags and the sample is removed using a semicircular profile lance.
Insertion depth 385 mm. Volume 150 ml. Total length 480 mm.
Outer ∅ approx. 28 mm. Autoclavable.

Art. No.	Pack Qty.	€
YL02.1	1	183,85

A 121 °C

SiloPicker

By Bürkle. Made of stainless steel (1.4404). For sampling bulk goods from silos, tanks, BigBags or other large containers.
Chamber volume: 100 ml. Length: 130 cm. Outer ∅ 50 mm. Autoclavable.

Application:
- Insert SiloPicker into bulk goods
- The closure sleeve automatically closes the collection container
- When the sampling depth has been reached, briefly pull back the SiloPicker
- The bulk goods flow into the collection container
- Pull out the SiloPicker
- Empty the sampler

Art. No.	Pack Qty.	€

Zone samplers

By Bürkle. Made of aluminium, stainless steel (1.4404) or stainless steel (1.4404)/PTFE. For sampling bulk goods, e.g. from bags, drums, bins, BigBags and silos. Tube ∅ 25 mm. Suitable for use with foodstuffs. Autoclavable.

Application:
- Close the chambers by turning the handle
- Insert the sampler to the desired depth
- Open the chambers to allow the bulk goods to flow into the collector
- Close the chambers
- Withdraw the sampler
- Reseal the puncture using an adhesive seal

① All-layer samplers

Open inner tube for large sample volumes. Meets ISTA standard for seed lengths of 10 mm (wheat, oats) and 5 mm (flax, vetch).

Technical specifications:

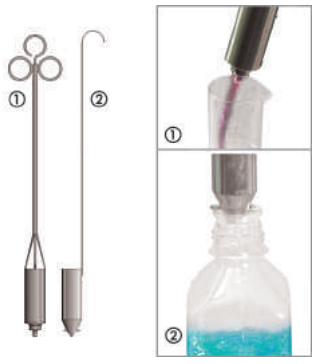
Samplers for viscous and liquid mediums

By Bürkle. Made of PP or PTFE/FEP (chemically inert). Suitable for use with foodstuffs. Tube-∅ 25 mm, tip-∅ 32 mm.

① Visco sampler

Very strong suction power for sampling viscous, non-self-flowing substances such as mud, slime, watery clay and soil samples, oils, emulsions, creams. Samples are sucked and ejected via a suction piston.



② Liqui sampler

For liquid mediums. Compliant with DIN EN ISO 15 528. Practical push-button one-handed operation. For all-layer and target-point/soil sampling. For **all-layer sampling**, slowly plunge the liqui sampler into the liquid with the button pressed (valve open). Release the button, the valve closes. Withdraw the sampler and remove the sample.
For **target-point/soil sampling**, plunge the liqui sampler down to the target point/soil with the valve closed. Press the button, the valve opens and liquid flows in. Release the button, the valve closes. Withdraw the sampler and remove the sample.

Liquid samplers

By Bürkle. Made of stainless steel (1.4404). For sampling thin to viscous liquids. With discharge funnel for safe filling of sampling bottles.
One-handed operation.
Container ∅ 32 mm. Autoclavable.

Image	Type	Total length (mm)	Vol. (ml)	Art. No.	Pack Qty.	€
①	Thumb hole	460	50	**YX81.1**	1	197,80
①	Thumb hole	540	100	**YX82.1**	1	210,70

Plunging siphon made of PP

For easy removal of liquid samples. The top end features a stopcock and the bottom end has a ball valve. With transparent pipe for good visibility. For drums with a minimum opening ∅ of 22 mm. Suitable for foodstuffs.

Ideal for all-layer and target point sampling.
All-layer sampling: Plunge the siphon slowly into the liquid with the open stopcock. Close the valve. Withdraw the siphon and remove the sample. Empty sample into container via handle.
Target point sampling: Plunge the siphon with the closed stopcock down to the target point. Open the stopcock - the liquid will flow in.
Close the stopcock. Withdraw the siphon and remove the sample.
Empty sample into container via handle.
Model 3 is infinitely variable from 100 to 200 cm.

Mini visco samplers

By Bürkle. Made of stainless steel 1.4404. For sampling viscous substances such as pastes, muds, creams and oils. Ideal for the pharmaceutical and cosmetics industry. Samples are sucked and ejected via a suction piston. Suction point with 2 mm suction hole. Suction points available with a larger diameter for more viscous mediums, please order separately. Autoclavable.

Accessories:

Suction point, 4 mm suction hole	**YP44.1**	1	46,35
Suction point, 6 mm suction hole	**YP45.1**	1	46,35

Rotilabo®-sampling containers

For use with Rotilabo® telescope rods (please order separately).
Delivery incl. beaker holder.

① **Rotilabo®-swing beaker**
For sampling liquids, e.g. out of deep tanks, pans or narrow shafts.
Vessel swings into the horizontal position.
For opening ∅ from 150 mm (Art. No. NH30.1 from 130 mm).

Volume (ml)	Material	Art. No.	Pack Qty.	€

Liquid samplers UniSampler

By Bürkle. Easy to use: The sample is taken directly into the sample tube via a vacuum. There is no danger of contamination.

① **UniSampler with telescope lance**
For sampling liquids from specific depths.
Telescopic suction pipe can be pulled out variably from 52 cm to 100 cm. Suction pipe made of PP, tube made of PVC.
Delivery incl. 5x250 ml and 5x500 ml sample vials made of PP and an adapter for all bottle sizes from 100 ml to 1 litre.
Procedure:
1. Pull out the suction lance to the desired sampling depth.
2. Fit the sample bottle onto the adapter.
3. Lower the suction lance into the medium.
4. Create a vacuum with the hand pump and take a sample.
5. Remove the filled sample bottle, close and label it.

② **UniSampler with hose**
Sampling system for deep, narrow and winding areas. The tube is pulled downwards by the heavy stainless steel pipe. PVC-tube, length 2.50 m.
Delivery incl. 1000 ml PP-bottle and adapter for all bottle sizes from 100 to 1000 ml, comes in a case for easy transport.
Function:
1. Lower suction tube to the desired depth.
2. Fit the sample bottle onto adapter.
3. Create a vacuum with the hand pump and take a sample.
4. Remove the filled sample bottle, close and label it.

③ **UniSampler Ex**
For sampling combustible liquids, Hazard Class A I (e.g. petrol). The glass bottle and tube are electro-conductively connected and are grounded with an grounding cable. PTB-approval D-333-009 618/00.
Delivery incl. 4 m-tube and 1000 ml-glass bottle, in transport case.
Function:
1. Ground device.
2. Lower suction tube to the desired depth.
3. Fit the adapter onto the sample vial.
4. Create a vacuum with the hand pump, take a sample.
5. Remove the filled sample vial, close and mark it.

Type	Art. No.	Pack Qty.	€
① UniSampler with telescopic lance	**AH45.1**	1	265,55
② UniSampler with tube	**AH46.1**	1	194,60
③ UniSampler Ex	**AH47.1**	1	368,75

Sampling pumps

Ideal for obtaining liquid samples even from difficult to reach areas. Liquid only comes in contact with the PE-tube and the sample vessel. Also suitable for viscous samples (e.g. oils). The sample vessel is screwed into the pump and can be sealed tightly after taking the sample. Tube is easy to change and can be replaced quickly. Procedure: a vacuum is produced by pullin up the pump. The liquid is drawn off and collected in the PE-bottle.

Type	Art. No.	Pack Qty.	€

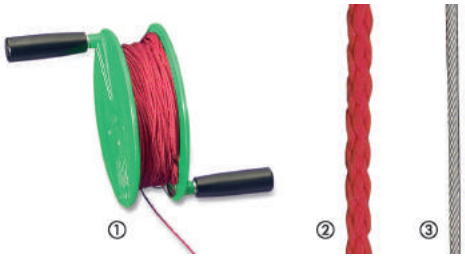
Rotilabo®-glass dipping bottle

Made from non-sparking materials. Nickel-plated brass dipping frame, closure made from electrically conductive polyamide, clear glass bottle, autoclavable. For taking sludge and water samples as well as samples of group A petroleum products, explosion groups IIA and IIB. Approved for use in EX safety zone 0.
Safe closure for rapid bottle exchange. High weight for rapid lowering.
Dimensions: outer ∅ 148 mm, height 330 mm. Weight 3.3 kg.
Capacity 1000 ml.

Delivery without manual rope spool and lowering rope (please order separately).

Art. No.	Pack Qty.	€
T266.1	1	485,90



Rotilabo®-dipping bottle Ex

Made from non-sparking brass, nickel-plated. For sampling of group A petroleum products, explosion groups IIA, IIB and IIC. Approved for use in EX safety zone 0. Removable bottle top for easy cleaning. High weight for rapid lowering. Dimensions: outer ∅ 89 mm, height 443 mm. Weight 3.2 kg. Capacity 1000 ml.

Delivery without manual rope spool and lowering rope (please order separately).

Art. No.	Pack Qty.	€
T267.1	1	496,65

Accessories for dipping bottles

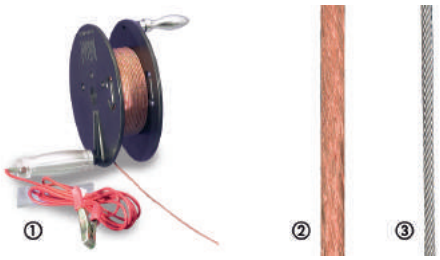
① **Manual rope spool** made of **PP**, excluding rope.
Spool ∅ 100 mm, total ∅ 180 mm, 55 mm wide.

Art. No.	Pack Qty.	€
T269.1	1	95,95

② **Lowering rope** made of **PP**, ∅ 2.3 mm, 10 m long.

Art. No.	Pack Qty.	€
T272.1	1	13,20

③ **Lowering rope** made of **V2A**, ∅ 1.25 mm, 10 m long.



Art. No.	Pack Qty.	€
T271.1	1	32,70

Use of dipping bottles

- Lower the dipping bottle to the desired depth.
- To open the plug pull lowering rope with a short and powerful tug.
- After filling the bottle pull back the lowering rope.
- With T267.1, open the closure and drain the bottle.
- With T266.1, open the closure and remove the bottle.

Notes on explosion protection

Only electrically conductive manual rope spools with an earth connection and electrically conductive lowering ropes made of non-sparking materials for sampling flammable and highly flammable liquids.

Accessories for dipping bottles, for highly flammable solutions

① **Manual rope spool** with earthing cable, without rope, made entirely from conductive plastic. Explosion groups II A and II B.
Spool ∅ 100 mm, total ∅ 180 mm, 55 mm wide.

Art. No.	Pack Qty.	€
EP11.1	1	233,30

② **Lowering rope** made of electrically conductive **copper**, ∅ 4.5 mm, 10 m long.

Art. No.	Pack Qty.	€
EP10.1	1	127,00

③ **Lowering rope** made of **V2A**, ∅ 1.25 mm, 10 m long.

Disposable sampling systems

Single-use samplers for solids

By Bürkle. Made of **HDPE**. For samples of bulk goods, powders and granulates. No contamination by other samples, no complicated and time-consuming cleaning. Manufactured under cleanroom conditions. Packed individually in film, non-sterile or **sterile**.

① **Powder Dispo**
For cross-section samples of cohesive, powdery substances. Conically shaped sampler for BigBag or sack penetration.

Length (mm)	Volume (ml)	∅ (mm)	Version	Art. No.	Pack Qty.	€
300	60	21	non-sterile	**ETX3.1**	10	58,40
300	60	21	**sterile**	**ETX4.1**	10	68,40

Rotary pumps

With magnetic clutch for circulating water.
Complete with 1.5 m cable and plug. Protective system IP 67.

Please note:

- Pumps must not be allowed to run dry
- Pumps are not self-priming and must always be installed below liquid level when used externally
- Temperature stable from -10 to +40 °C
- Can be used inside the pumping medium
- Output is non-adjustable

Technical specifications:

Model	①	②	③	④
Flow rate max. (l/min)	4.5	40	10	20
Lift of pump max. (m)	0.75	3.7	1.5	2.0
Power input (W)	4	65	10	28
Tube connections:				
Press. side (mm) Thread (inch)	13	18 ¾	13 ¼	13 ⅜
Suction side (mm) Thread (inch)	17	28 ¾	13 ⅜	17 ½

Centrifugal pump

Medium contacting parts made of **PP**, **EPDM** and **ceramic**.
With magnetic clutch. Continuous running for transferring and circulating chemicals and gaseous liquids possible.
Adapter, outer thread ¼″. Magnetic resistance to fracture protects the motor against external interference. Economical in use of electricity, long-life due to low friction. Not self-priming. Not suitable for dry operation.

Technical specifications:

Flow rate	max. 13,8 l/min
Lift of pump	max. 2.3 m
Power input	51 W
Power output	10 W
Ideal for temperatures	from -20 to +85 °C
Dimensions (H x L x W)	100 x 150 x 112 mm
Weight	ca. 1.7 kg
Current	230 V, 50/60 Hz

Art. No.	Pack Qty.	€
A902.1	1	278,45

Centrifugal pump

Medium contacting parts made of **PP**, **EPDM** and **ceramic**.
With magnetic clutch. For aggressive chemicals, acids, alkalis and gaseous liquids. Adapter, outer thread ½″.
Continuous running possible. No shaft sealing ring, therefore little friction and long-life of pump. Not self-priming.

Technical specifications:

Flow rate	max. 52 l/min
Lift of pump	max. 6.0 m
Ideal for temperatures	from -20 to +85 °C
Power input	95 W
Dimensions (H x L x W)	143 x 214 x 102 mm
Weight	ca. 3.0 kg
Current	230 V, 50 Hz

Membrane liquid pumps

Membrane liquid pumps LIQUIPORT®

By KNF. Ideal for delivering neutral and aggressive liquids.

- Flow rate can be adjusted from 10-100 % via knob with LED-display
- Standby-mode
- Maximum pressure control
- Selfpriming
- Dry running
- Long-life
- Protective system: IP65 (hoseproof)
- Permissible liquid temperature max. 80 °C
- Main supply 100-230 V, 50/60 Hz
- Membranes PTFE-coated, valves FFPM

All models are also available with external control, please check with our Sales Department.

Technical specifications:

Model	**NF 100**	**NF 1.100**	**NF 300**	**NF 1.300**
Output (ml/min)	200-1300		500-3000	
Suction lift (mWC)	3

SIMDOS® 10 metering pumps

By KNF. Suitable for pumping neutral and aggressive liquids.

- Optimised pump head geometry with safety feature prevents fluids from leaking into the pump drive.
- Operating modes: continuous pumping (unlimited time), continuous pumping with timed switch-off, volumetric metering and series metering
- With calibration function for better accuracy
- Adjustable pump characteristics (e. g. for vaporous, viscous liquids)
- Pause function without loss of data
- Dry-run safe, self-priming and maintenance-free
- EPDM diaphragm, PTFE-coated, valve plate/seals made of FFKM

All models are also available with external control, please check with our Sales Department.

Technical specifications:

Delivery rate	1-100 ml/min
Metering capacity	1-1000 ml
Metering time	1 s - 99 h 59 min
Max. suction head	3 mWS
Max. pressure	6 bar
Allowable medium temperatures	+5 to +80 °C
Connection for ID/AD hose	4 / 6 mm
Power requirement	24 W
Protection class	IP 65
Noise level	<40 dBA
Dimensions (W x D x H)	93 x 134 x 144 mm
Weight	0.9 kg
Power supply	100-240 V, 50/60 Hz

Delivery incl. connection kit (hose and screw fitting) and intake filter.

Membrane dosing pumps

Powerful, speed-controlled stepper motor.
Constant, continuous dosing performance. Adjustment range up to 1:1000.
Traffic lights concept to indicate pump status.
PTFE membrane, universally resistant to chemicals.

Technical specifications:

Model	DDE 6-10	DDE 15-4
Max. flow rate (l/h)	6	15
Suction lift (mWS)	6	
Max. pressure (bar)	10	4
Ambient temperature (°C)	0 to 45	
Temperature of medium (°C)	-10 to 45	
Parts with media contact	PVC/FKM/ceramics	
For tubes ID/AD (mm)	4/6	6/9
Max. sound pressure level (dB(A))	60	
Degree of protection (housing)	IP 65	
Dimensions W x D x H (mm)	102 x 251 x 196	102 x 251 x 200.5
Weight (kg)	2.4	
Mains connection	100-240 V, 50/60 Hz	

Delivery incl. assembly plate as base or for wall mounting.

Type	Art. No.	Pack Qty.	€
DDE 6-10	**PE71.1**	1	535,35
DDE 15-4	**PE72.1**	1	686,95

Accessories: multifunction valve for diaphragm metering pump

Made of **PVDF**. To maintain the necessary counterpressure and vent the pump at start-up. Compact valve for connecting directly to the pump.
Dimensions: L 139 x H 92 mm.

Art. No.	Pack Qty.	€
PE73.1	1	225,75

Roth Cyclo II pericyclic pumps

Pumps for all applications in the laboratory, in chemical analysis and biotechnology.

- **1- or 2-channel head pumps** (∅ 62 mm)
- **3- or 6-roll pump head** for lower pulsation
- Simple operation with two knobs:
  Infinitely variable speed setting from 0 to 100 %
  adjustable left-hand/right-hand motion
- Tube can be changed easily in a few seconds
- Variable tube pressure
- With easy to disassemble pump head for problem-free cleaning
- Pump head can be turned by 90°
- Matching tube cassettes for 3 different tube sizes
- Temperature and current limiter for maximum reliability
- Stackable
- Tube with 1.6 mm wall thickness can be used

Technical specifications:

Safe delivery pressure	1 bar
Voltage	100-230 V
Drive / Power	DC-motor / 10 W
Weight	1.6 kg
Dimensions (W x D x H)	134 x 190 x 131 mm

Flow rates are dependent on tubing size (wall thickness 1.6 mm):

Tube cassette	Y375.1	Y376.1	Incl. in delivery
Tube-inner-∅ (mm)	1.6	3.2	4.8
Pumping capacity 3-roll head (ml/min) 6-roll head (ml/min)	 1.5-30 1.2-24	 6-110 4.4-88	 12-240 9.6-192

Standard model:
Delivery incl.
tube cassette for tube with inner-∅ 4.8 mm and wall thickness 1.6 mm.

Type	Art. No.	Pack Qty.	€
Cyclo II with 1-channel pump head, 3 rolls	**Y374.1**	1	1406,10
Cyclo II with 1-channel pump head, 6 rolls	**EP74.1**	1	1407,20
Cyclo II with 2-channel pump head, 3 rolls	**EP75.1**	1	1520,05
Cyclo II with 2-channel pump head, 6 rolls	**EP76.1**	1	1668,40

Accessories:

Tube cassette for tube inner-∅ 1.6 mm	**Y375.1**	1	117,10
Tube cassette for tube inner-∅ 3.2 mm	**Y376.1**	1	117,10

Tube pumps Sci-Q 323

By Watson-Marlow. Particularly suitable for applications in the laboratory and for research.

- Expansion and end pump head with 4 rolls for lower pulsation is available as an accessory
- Flow rate up to 2000 ml/min with 3 rolls
- Flow rate up to 1600 ml/min with 4 rolls
- Can be expanded with additional pump heads to up to 6 parallel channels
- Hose can be inserted quickly and easily with the flip-top-pump head
- Digital speed control
- Manually steerable
- Easy to read display and wipeable membrane keyboard
- Chemically stable housing
- Maintenance-free, quiet motor
- For use with 1.6 mm thick hoses (please order separately)

Technical specifications:

Hose-ID (mm)	0.5	0.8	1.6	3.2	4.8	6.4	8.0
3-Roll-head: Flow rate (ml/min)	0.45-12	1.1-28	4.1-110	15-400	33-880	54-1400	75-2000
4-Roll-head: Flow rate (ml/min)	0.45-12	0.90-24	3.8-100	13-340	29-760	45-1200	60-1600
Max. number of pump heads (at 0.5 bar)	6	6	4	2	2	1	1

rpm	15-400 rpm (adjustable in increments of 5)
Ideal for temperatures	5-40 °C
Noise levell	<70 dBA
Weight	4.7 kg
Dimensions (H x L x W)	225 x 230 x 132 mm
Current	230 V, 50/60 Hz - change-over to 120 V

Delivery incl. one 3-roll-end-pump head.

Art. No.	Pack Qty.	€

Peristaltic pumps set Hei-FLOW

By Heidolph. For conveying liquids.

- Analog speed adjustment
- Constant speed even under varying load
- Reversible direction of rotation (ccw/cw)
- Stackable housing (max. 2 pump drives)
- Pump drives Hei-FLOW Advantage 01 with maximum speed button for faster filling and drainage of tubing

Characteristics of the pump head:

- For tubing wall thickness of 1.6 mm
- Tubing outer diameters of between 4 mm and 9.5 mm are freely selectable
- Low pulsation is ensured by 5 rollers
- Easy and quick tubing replacement
- Stainless steel rollers and roller mounts

Technical specifications:

Type (Hei-FLOW)	① **Value 01**	② **Advantage 01**
Delivery rate (ml/min)	0.8-413	0.4-409
Speed (rpm)	10-120	5-120
Control accuracy (%)	±2	±0.5
Analog interface	no	yes
Motor power (W)	71	100
Weight excluding pump head (kg)	6.8	8.2
Dimensions W x D x H (mm)	166 x 256 x 225	

Flow rates are dependent on tubing size (wall thickness 1.6 mm):

Hei-FLOW Precision peristaltic pumps

By Heidolph.
For conveying and metering liquids.

Pump drives

- Digital display
- Dispensing volume 0.1-9999 ml
- Intermittent dispensing
- Simple calibration of delivery and dispensing volumes
- With maximum speed button for faster filling and drainage of tubing
- Constant speed even under varying load
- Reversible direction of rotation (ccw/cw)
- Stackable housing (max. 2 pump drives)
- Analog and digital (RS 232) interfaces
- Hei-FLOW Precision 01 pump drive suitable for multichannel operation

Technical specifications of the pump drives:

Hei-FLOW model	Precision 01	Precision 06
Delivery rate in single-channel mode (ml/min)	0.02-409	2-2072
Speed (rpm)	5-120	24-600
Control accuracy (%)	±0.5	
Multichannel operation possible	yes	no
Motor power (W)	100	
Weight excluding pump head (kg)	8.3	7.7
Dimensions W x D x H (mm)	166 x 256 x 225	

Modular design:
pump drive, pump head and pump hose are freely combinable (please order separately).

Type	Art. No.	Pack Qty.	€
Hei-FLOW Precision 01 pump drive	**CYC4.1**	1	3072,00
Hei-FLOW Precision 06 pump drive	**CYC5.1**	1	2966,00

Pump heads for Hei-FLOW Precision

1-channel pump head SP quick for Hei-FLOW Precision 01 and 06
- For standard tubing with a wall thickness of 1.6 mm
- Tubing outer diameters of between 4 mm and 9.5 mm are freely selectable
- Low pulsation is ensured by 5 rollers
- Easy and quick tubing replacement
- Stainless steel rollers and roller mounts

Flow rates are dependent on tubing size (wall thickness 1.6 mm):

Inner ∅ (mm)	0.6	1.7	3.1	4.8	6.3
Delivery rate (ml/min) Precision 01 Precision 06	 0.38-9 2-33	 2-40 8-186	 5-126 26-653	 12-233 59-1529	 17-409 89-2072

Type	Art. No.	Pack Qty.	€
1-channel pump head SP quick (SWS 1.6 mm)	**CYC6.1**	1	471,00

4-channel pump head for Hei-FLOW Precision 01
- For use with up to 4 hose cassettes, with snap lock for easy insertion during operation
- Low pulsation is ensured by 8 rollers
- For 2 stopper hoses with a wall thickness of 0.9 mm
- Tubing outer diameters of between 0.2 mm and 2.8 mm are freely selectable
- To feed and convey different volumes, hoses of different diameter can be inserted into the hose cassette
- Roller pressure can be adjusted using an adjustment screw

Flow rates are dependent on tubing size (wall thickness 0.9 mm):

Inner ∅ (mm)	0.2	0.5	0.9	1.4	2.8
Delivery rate (ml/min) Precision 01	 0.02-0.49	 0.08-2	 0.24-6	 0.60-14	 2-36

For multichannel operation of Hei-FLOW Precision 01, an adapter for multichannel pump heads and 1 to 4 hose cassettes (please order separately) are required in addition to the 4-channel pump head.

Type	Art. No.	Pack Qty.	€
① Adapter for multichannel pump heads	**CYC7.1**	1	119,00
② 4-channel pump head	**CYC8.1**	1	801,00
③ Hose cassette	**CYC9.1**	1	249,00

HiClass rotarus® peristaltic pumps

By Hirschmann. The stainless-steel housing makes this pump ideal for use in pharmaceuticals and food production.
Choose from two different motor versions: 50i series for low flow rates or high viscosity media and 100i series for high flow rates.
Available with single-channel pump head or multichannel pump head. Alternatively, up to 3 single-channel pump heads can be connected in a daisychain for multichannel operation.

- Control panel directly on pump housing for quick and easy input of basic functions
- Quick-change pump heads
- Reversible direction of rotation (CW / CCW)
- Load-based speed control
- Suitable for continuous duty
- Stackable
- PC connectivity via USB and RS 232 ports

Technical data on pump drives:

Motor version	50i series	100i series
Motor power (W)	50	85
Speed range (rpm)	0.2-100	5.0-500
Delivery rate depending on pump head (ml/min)	0.0005-1200	0.025-6900
Steps (rpm)	0.1	
Total power consumption (W)	60	90
Protection rating	IP 65	
Weight (kg)	approx. 7.3	approx. 10.1
Dimensions (H x W x D) mm	220 x 100 x 205	220 x 100 x 270
Power supply	115-240 V/ 50-60 Hz	

Technical data on pump models:

rotarus® model	Standard	flow	volume
Control panel on pump housing	x	x	x
External control panel with touchscreen	-	x	x
Memory for 20 methods	-	x	x
Calibration function	-	x	x
Pumps by speed	x	x	x
Pumps by flow rate	-	x	x
Pumps by target volume (feeding)	-	-	x
Autom. pump head detection	-	x	x
Autom. hose detection	-	x	x
Hose lifetime monitoring	-	x	x
Autom. hose leak and blockage detection	-	x	x

Characteristics of pump heads:

1-channel pump head	- 3 stainless steel rollers - Hose dimensions inner ∅ 0.8-12 mm, wall thickness 1.6 mm - Cascadable - Head and hose data recognition by RFID
4-channel pump head	- 8 Polysulfon rollers - Hose dimensions inner ∅ 0.19-2.79 mm, variable wall thickness - Variable contact pressure - Head and hose data recognition by RFID

Delivery rates in dependence on hose size:

- **1-channel pump head**
  (with standard pump hoses, wall thickness 1.6 mm):

Inner ∅ (mm)	Delivery rate **50i series** per channel (ml/min)	**Delivery rate 100i series** per channel (ml/min)
1.6	0.08-40	1.9-200
3.2	0.32-160	0.8-850
8.0	1.7-840	42-3900
11.1	2.8-1500	69-5400

- **4-channel pump head** (with stopper hoses):

Inner ∅ (mm)	Delivery rate **50i series** (ml/min)	**Delivery rate 100i series** (ml/min)
0.19	0.001-0.40	0.021-0.90
0.25	0.0017-0.85	0.043-2.1
1.42	0.026-13.0	0.66-32.0
2.79	0.048-22.7	1.7-82.1

Modular design:
pump drive, pump head and pump hose are freely combinable (please order separately). Pump hoses are fitted with a chip which allows for automatic detection and lifetime monitoring of the rotarus® flow and rotarus® volume models. Alternatively, hoses can be used without a chip, in which case, however, the "automatic hose detection" and "hose lifetime monitoring" functions will not be available.

Rotilabo®-piston pump CR-KP292

Compact pump for vacuum and pressure applications.
Suitable for pumping air and neutral gases.

Applications:
pressure filtration of aqueous solutions, use in vacuum ovens, vacuum drying and gas sampling.

Technical specifications:

Delivery rate	9.2 l/min
End vacuum (abs.)	292 mbar
Pressure	3.3 bar
Motor power	25 W
Connections for hose ID	6 mm
Dimensions (L x W x H)	194 x 114 x 191 mm
Weight	2.0 kg
Power supply	230 V, 50 Hz

Art. No.	Pack Qty.	€
CYA9.1	1	321,45

Conversion table for delivery rates

m^3/s	m^3/h	l/min	l/s
1	3600	60000	1000

1×10^{-3}	3.6	60	1

Rotilabo®-diaphragm vacuum pump CR-MV100

For conveying and compressing neutral and aggressive gases and vapours in accordance with the resistance of the given materials.
Continuous manual vacuum adjustment.

Application areas: suitable for vacuum filtration, vacuum drying and solid phase extraction.

Technical specifications:

Delivery rate	10 l/min
End vacuum (abs.)	100 mbar
Motor power	48 W
Connections for hose ID	6 mm
Vacuum regulators	Needle valve
Measuring range / scaling	1000 to 1 mbar / 50 mbar
Dimensions (W x D x H)	144 x 198 x 244 mm
Weight	2.7 kg
Power supply	90-260 V; 50/60 Hz

Materials of pump parts in contact with media:

Seal	EPDM
Hose nozzle / connecting part	PP
Valve	FKM
Diaphragm	PTFE-coated
Hose / separator	PVC
Connector head / pump head	Ryton

Delivery incl. vacuum metering block with pressure gauge and exhaust silencer.

Art. No.	Pack Qty.	€
ECK4.1	1	785,85

Accessories:

Hose nozzle for hoses ID 8 mm	**HLY8.1**	1	22,40

Membrane controlled vacuum pumps

LABOPORT®-membrane vacuum pumps

By KNF. Ideal for pumping and evacuating **air and neutral or slightly aggressive or corrosive gases and vapours.**

- Thermal switch and power fuse
- Gas and ambient temperature limit: 40 °C
- Suitable for continuous operation
- Very quiet and has minimal vibration
- Voltage frequency: 230 V, 50 Hz

Optional accessories:
- Fine regulator head: For adjustment of the vacuum. Scale: 50/100 mbar increments
- Silencer for all pump types to be assembled on delivery side
- Suction filter for K517.1, Y371.1 and L110.1, to be assembled on intake side

Technical specifications:

Type	Output (l/min)	Vacuum abs. (mbar)	Overpress. (bar)	Power (W)	Weight (kg)	Connectors for hose ID (mm)

Membrane controlled vacuum pumps and compressors

By KNF. Ideal for pumping, evacuating and compressing **air and neutral or slightly aggressive and/or corrosive gases and vapours.**
Generates oil-free air pressure and vacuum.
Assists in the analysis and measurement of gases.

- Pump head made of aluminium
- All AN models have a neoprene diaphragm, AT models (T789.1) are PTFE coated
- Max. gas and ambient temperature: 40 °C
- Units have been designed for continuous operation
- Very quiet
- Gas tight
- Non-corroding
- Following order numbers come with noise absorption and hose support C561.1, T356.1
- Power supply: 230 V/50 Hz

Technical specifications:

Membrane controlled vacuum pumps

LABOPORT® chemically resistant membrane vacuum pumps

By KNF.
For conveying and evacuating **aggressive gases and vapours**.
Applications: for vacuum filtration, drying, distillation, gel drying, SPE, rotation evaporator, vacuum furnace.

- Inner, media-contact area ATEX-compliant acc. to "ATEX II 2GB IIB+H2 T3X internal atmosphere only"
- High gas density
- Permissible media and ambient temperature +5 to +40 °C
- Max. operating pressure 1 bar
- Suitable for continuous duty
- Connections for hose with ID 10 mm
- Power supply: 230 V/50 Hz

Materials:
- Pump head: TFM™ PTFE
- Diaphragm: PTFE-coated
- Valves: FFPM

Models N810.3FT.18G, N820.3FT.18G, N840.3FT.18G with integrated gas ballast valve.

Technical specifications:

Type	Output (l/min)	End vacuum (mbar abs.) without/with gas ballast	Power (W)	Weight (kg)

LABOPORT® SD automatic drying vacuum pumps for humid gases

By KNF. Chemically consistent, **for highly aggressive and corrosive gases and steam.**
The pump blows condensed fluid out of the pump heads at a high speed during evacuation. The vacuum in the vessel remains constant.

Application:
Ideal for e.g. steam sterilizers or for vacuum drying on vacuum drying cabinets to accelerate evacuation time considerably.

- With PTFE pump heads, PTFE-coated membranes, FFPM valves
- Two heads
- High steam and condensate compatibility
- Gas tight, leak rate approx. 6 x 10^{-3} mbar x l/s
- Max. gas and ambient temperature: +40 °C
- With thermal switch and main fuse
- Hose connection ID 10 mm
- Power supply: 230 V/50 Hz

Technical specifications:

Type	N820.3FT.40.18	N840.3FT.40.18
Flow rate (l/min)	20	34
Final vacuum (mbar)	10	
Overpressure (bar)	1	
Weight (kg)	9.6	12.9

Membrane controlled vacuum pumps

Membrane controlled vacuum pump N920 KT.29.18 G

By KNF. For all applications which require **high suction speed at low pressure.**
For delivering and sucking air, gases and vapours, for withdrawing and evacuating samples from containers or systems.

Properties:
- **Flow rate can be adjusted** by regulating the speed with the potentiometer
- Very quiet and low on vibration
- Membrane stabilizing system for high suction speed at low vacuum range
- Model N920KT.29.18G with integrated gas ballast valve
- Max. gas and ambient temperature 40 °C
- Power supply: ~100-240 V, 50/60 Hz

Application range:
For a variety of procedures and processes, e.g. in laboratories, which need to be performed under vacuum conditions. Can also be used in the semiconductor and pharmaceutical industry, chemical and analytic engineering.

Technical specifications:

Output (l/min)	21
Final vacuum (abs.mbar) - without gas ballast - with gas ballast	 2.0 5.0
Max. working overpressure (bar)	0.5
Power output (W)	135
Adapters for hose inner-∅ (mm)	10
Weight (kg)	8.6
Pump head	PPS
Membrane	PTFE-coated
Valves	FFPM

Art. No.	Pack Qty.	€
EP19.1 *	1	2484,35

Accessories:

Muffler/suction filter	**EP20.1** *	1	25,25

* Longer delivery times possible. Please check with our Sales Department.

ME 1 and ME 1C vacuum membrane pumps

By Vacuubrand. Ideal for pumping and evacuating gases and vapours. High specific resistance (especially ME 1C).

Applications:
vacuum filtration for sample preparation in chemical, microbiology, waste water and other analytical processes.

- Simple to use with central power switch mounted on pump housing
- Whisper quiet and very low vibration
- Requires minimal benchtop space
- Long membrane lifetime
- Weight 5 kg
- Dimensions: L 247 x W 121 x H 145 mm
- Finely adjustable vacuum regulation valves are optionally available for ME 1 and ME 1C with manual vacuum control via leakage air. Regulation valve rotates in different directions for optimal visibility.

Technical specifications:

Model	**ME 1**	**ME 1C**
Number of heads / stages	1/1	
Max. pumping speed at 50/60 Hz (m^3/h) or (l/min)	0.7/0.85 or 11.7/14.2	
Vacuum abs. (mbar)	100	
Max. abs. back pressure (EX) (bar)	1.1	
Connection suction side (mm)	Hose nozzle DN 6/10	Hose nozzle DN 10
Connection pressure side (mm)	Silencer / G ⅛″	Hose nozzle DN 10
Rated motor power (kW)	0.04	
Parts contacting media	Aluminium, PTFE	ETFE, PTFE

ME 1	**NA17.1**	1	650,40
ME 1C	**NA18.1**	1	865,40

Accessories:

Vacuum regulation valve with manometer for ME 1	**NA19.1**	1	120,40
Vacuum regulation valve with manometer for ME 1C	**NA20.1**	1	252,65

Membrane controlled vacuum pumps

Membrane pumps MD 1 and MD 1C

By Vacuubrand. For evacuating and conveying gases down to an extremely low end vacuum.

- **Three-stage, for high suction even at low pressures**
- Very quiet and low vibration
- Long service life
- Easy to replace membrane and valve

Available in two designs:
- **MD 1**: Wide range of applications for neutral gases
- **MD 1C**: Especially for aggressive gases through the use of chemical-resistant fluoroplastics, as well as excellent condensate compatibility due to built-in gas ballast valve

Technical specifications:

Model	**MD 1**	**MD 1C**
Number of heads / stages	4/3	4/3
Max. pumping speed at 50/60 Hz - in (m^3/h) - in (l/min)	 1.2 / 1.4 20 / 23.3	 1.3 / 1.5 21.7 / 25
End vacuum abs. (mbar) - with gas ballast	1.5 -	2 4
Max. counterpressure abs. (bar)	1.1	1.1
Motor power (W)	80	80
Connection - Suction side - Pressure side	 Hose nozzle DN 6 mm Silencer G ⅛″	 Hose nozzle DN 8-10 mm Hose nozzle DN 8 mm
Dimensions without grip L x W x H (mm)	 303 x 143 x 163	 316 x 143 x 175
Weight (kg)	6.5	6.9
Power connection (V, Hz)	230, 50/60	230, 50/60

Type	Art. No.	Pack Qty.	€
MD 1	**ETY5.1** *	1	1494,25
MD 1C	**HC95.1** *	1	2537,00

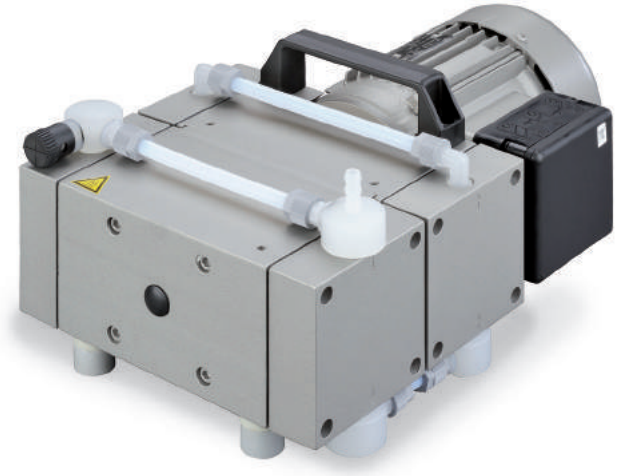
Membrane controlled pump ME 4 NT

By Vacuubrand. Ideal for analytic applications with **non-aggressive gases**,
for the laboratory and industrial use.



- Continuous, oil-free pumping of gases
- Very low leakage rate due to extremely tight coupling technology
- Highly flexible **FPM**-double membranes with tissue reinforcement for long membrane life
- Compact drive system for extremely quiet and smooth running
- High life-cycle
- Easy changing of membrane and valve

Technical specifications:

Max. suction speed 50/60 Hz (m^3/h) or (l/min)	4.0/4.4 or 67/73
Final pressure (mbar abs.)	70
Max. pressure difference between intake and outlet (bar)	2
Connection at suction side, hose shaft (mm)	10
Pressure side	Sound absorbers
Motor output (kW)	0.18
Dimensions L x W x H (mm)	243 x 239 x 198
Weight (kg)	11

Art. No.	Pack Qty.	€
KH50.1	1	1376,00

Rotary vane pumps

MPC-series membrane controlled pumps

By Welch Vacuum. Ideal for conveying and compressing **neutral and aggressive gases and vapours.**
Application range: In physical and chemical laboratories for vacuum-filtration, -distillation, -drying, etc.

- Connection-/pump head made of PTFE with carbon fiber reinforcement
- Gasket EPDM, screw connectors PVDF, valves PEEK, membrane disk NBR, connecting elements PP
- Max. supply pressure / max. outlet pressure 1 bar
- Inlet-/Outlet side for tube interior-∅ 8 mm
- Max. ambient level 40 °C
- Max. operating gas-temperature 40 °C
- Main supply 230 V, 50/60 Hz

Technical specifications:

Type	MPC 101 Z (2-stage)	MPC 301 Z (2-stage)	MPC 601 T (3-stage)
Pumping capacity (l/min)	16.7	38.3	75
Final vacuum (mbar)	<8	<8	<2
Power (kW)	0.06	0.18	0.37
Weight (kg)	6.5	11.2	18.3
Dimensions W x D x H (mm)	195 x 235 x 145	230 x 265 x 169	230 x 380 x 169

MPC 601 T	**CE40.1** *	1	3434,65

* Longer delivery times possible. Please check with our Sales Department.

Rotary vane pump packages CRVpro series

By Welch Vacuum.
Complete package with two-stage rotary vane pumps.

Advantages:
- Low operating temperature due to enhanced cooling geometry
- Coating of the pump body and the oil container as protection against chemical vapours
- Low oil consumption and corrosion inhibitor due to low heat development during operation
- Large oil reservoir reduces the concentration of chemicals, whereby the oil change intervals are increased

Applications:
- Freeze dryer (CRVpro 4/6/8)
- Vacuum centrifuge (CRVpro 6)
- Vacuum furnaces (CRVpro 8)
- Schlenk Technology (CRVpro 4)
- Glove Box (CRVpro 8)

Technical specifications:

Type	CRVpro 4	CRVpro 6	CRV pro 8
Pumping speed (at 50 Hz) - m^3/h - l/min	 3.8 63	 5.1 85	 7.3 122
Ultimate total pressure - without gas ballast (mbar) - with gas ballast (mbar)	 2×10^{-3} $\times 10^{-2}$		
Connection flange DN	16 KF		
Sound level at 50 Hz (dB (A))	50		
Oil filling (l)	1.15	1.15	1.0
Motor power at 50 Hz (kW)	0.37		
Weight (kg)	21	22	22.5
Dimensions: W x D x H (mm)	463 x 157 x 230		

Delivery incl. oil mist separator AKD 16, 2-way ball valve, adapter flange DN16KF-10/8 mm, vacuum hose (1.5 m), oil change set incl. 2 x 1 l oil, clamping and centring rings.

Type	Art. No.	Pack Qty.	€
Pump package CRVpro 4	**HKE0.1** *	1	2531,65
Pump package CRVpro 6	**HKE1.1** *	1	2789,65
Pump package CRVpro 8	**HKE2.1** *	1	3316,40

Rotary vane pumps

XS rotary vacuum pumps

By Vacuubrand. For pressure ranges up to 10^{-3} mbar.

Advantages:
- High suction capacity, even at low ultimate pressure
- High water vapour tolerance
- Active corrosion protection against ingress of corrosive gases and oil components at standstill through vacuum-tight oil circuit
- New circulation lubrication system
- Compact design and low weight
- Starts reliably even at low temperatures
- Long oil change intervals thanks to high usable oil volume
- Easy maintenance thanks to telescopic design

① Single-stage version

Technical specifications:

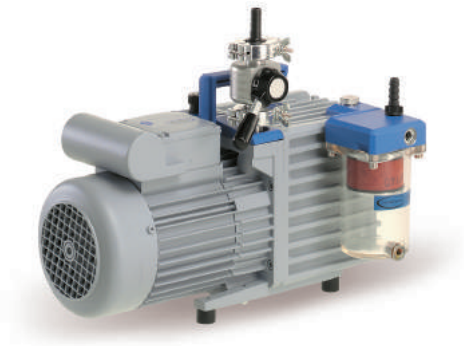
Type	RE 2.5
Suction capacity	2.3 / 2.8 m^3/h
Ultimate total pressure - without gas ballast - with gas ballast	 2 x 10^{-3} mbar 1 x 10^{-2} mbar
Water vapour tolerance	40 mbar
Min./max. oil fill	0.18 / 0.51 l
Connection - Suction side - Pressure side	 DN 16 small flange DN 10 hose nozzle
Dimensions (L x W x H)	308 x 125 x 190 mm
Weight	10.2 kg
Motor power	0.18 kW
Power supply	230 V, 50/60 Hz

Delivery incl. oil fill, thermal motor circuit-breaker, power cord (2 m long), clamping and centring ring for suction piece.

Type	Art. No.	Pack Qty.	€
RE 2.5	**CE14.1** *	1	1564,15

* Longer delivery times possible. Please check with our Sales Department.

② Two-stage version



Technical specifications:

Type	RZ 2.5	RZ 6	RZ 9
Suction capacity (m^3/h)	2.3 / 2.8	5.7 / 6.8	8.6 / 9.9
Ultimate total pressure - without gas ballast (mbar) - with gas ballast (mbar)	 2 x 10^{-3} 1 x 10^{-2}	 2 x 10^{-3} 1 x 10^{-2}	 2 x 10^{-3} 1 x 10^{-2}
Water vapour tolerance (mbar)	40		
Min./max. oil fill (l)	0.1 / 0.28	0.34 / 0.73	0.2 / 0.8
Connection - Suction side - Pressure side	 DN 16 small flange DN 10 hose nozzle		 DN 25 small flange DN 25 hose nozzle
Dimensions L x W x H (mm)	308 x 125 x 190	370 x 142 x 207	460 x 152 x 232
Weight (kg)	11.4	16.4	24,2
Motor power (kW)	0.18	0.3	0.37
Power supply	230 V, 50/60 Hz		

Delivery incl. oil fill, thermal motor circuit-breaker, power cord (2 m long), clamping and centring ring for suction piece - can also be used for exhaust port with RZ 9.

Type	Art. No.	Pack Qty.	€
RZ 2.5	**CE15.1** *	1	2139,25
RZ 6	**HC94.1** *	1	2735,90
RZ 9	**CTL2.1** *	1	3569,00

* Longer delivery times possible. Please check with our Sales Department.

XS rotary pumps packages

By Vacuubrand.

Package 1 + 2

Delivery incl.:
- Two-stage pump with oil fill
- Exhaust filter FO for removing oil mist
- Butterfly valve VS 16 with extremely low leakage rate and low gas release
- PP adapter, small flange DN 16 on DN 10 hose nozzle. Clamping and centring rings

Package 3

Delivery incl.:
- Two-stage pump with oil fill
- Exhaust filter FO for removing oil mist
- Butterfly valve VS 16 with extremely low leakage rate and low gas release
- PP adapter, small flange DN 16 on DN 10 hose nozzle. Clamping and centring rings
- Set comprising vacuum meter DCP 3000 with pressure transducer VSK 3000

Type	Art. No.	Pack Qty.	€
Package 1 incl. RZ 2.5 + FO + VS 16 + SW DN 10	**NA10.1** *	1	2451,00
Package 2 incl. RZ 6 + FO + VS 16 + SW DN 10	**NA11.1** *	1	2940,15
Package 3 incl. RZ 6 + FO + VS 16 + SW DN 10 + set comprising DCP 3000 and VSP 3000	**CTL3.1** *	1	3982,90

* Longer delivery times possible. Please check with our Sales Department.

Vacuum meter

Accessories for XS rotary pumps

By Vacuubrand.

① Exhaust filter FO
Provides optimal protection against oil-polluted air in the laboratory. Receptacle made of PMP, highly resistant to chemicals.

Type	Art. No.	Pack Qty.	€
FO for RE 2.5, RZ 2.5 and RZ 6	**N404.1** *	1	316,05
FO for RZ 9	**CTL4.1** *	1	371,95

② VS butterfly straight way valves
Made of stainless steel.

Type	Art. No.	Pack Qty.	€
VS 16, KF DN 16	**CTL5.1** *	1	345,10
VS 25, KF DN 25	**CTL6.1** *	1	413,90

PP adapter from small flange (KF) to hose nozzle (SW)
For connecting hoses with inner ∅ 10 or 15 mm to the pumps.
*1 The smaller inner ∅ may result in a loss of suction.

Type	Art. No.	Pack Qty.	€
PP adapter from KF 16 to SW 10	**CTL7.1** *	1	26,90
PP adapter from KF 25 to SW 10*1	**CTL8.1** *	1	34,40
PP adapter from KF 25 to SW 15	**CTL9.1** *	1	35,50

AK suction side separator
Retains particles and liquid droplets, e.g. when used on drying cabinets. Fits directly onto suction port. Clear catch tank allows optimal condensation control. Single condensate outlet.

Type	Art. No.	Pack Qty.	€
③ AK for RE 2.5, RZ 2.5	**CTN0.1** *	1	275,20
AK for RZ 6	**CTN1.1** *	1	331,10
④ AK for RZ 9	**CTN2.1** *	1	344,00

⑤ Main flow oil filter for RZ 9
Filters microparticles out of the oil. This extends oil life and reduces servicing requirements. The maintenance indicator saves unnecessary filter changes.

Type	Art. No.	Pack Qty.	€
Main flow oil filter for RZ 9	**CTN3.1** *	1	460,10

Clamping and centring rings
For attaching valves, hose nozzles etc. A single clamping ring and a single centring ring of the same size are required to ensure that a proper connection is made.

Type	Art. No.	Pack Qty.	€
Aluminium clamping ring KF DN 10/16	**CTN4.1** *	1	20,65
Outer centring ring KF DN 10/16 with NBR seal	**CTN5.1** *	1	8,50
Aluminium clamping ring KF DN 20/25	**CTN6.1** *	1	21,85
Outer centring ring KF DN 20/25 with NBR seal	**CTN7.1** *	1	9,80

Pump oil

Type	Art. No.	Pack Qty.	€
1 l pump oil	**N406.1** *	1	36,50

* Delivery times may apply to these products. Please ask our sales staff.

Vacuum regulator VAR and vacuum meter VAC

The units are connected to an vacuum pump in series on the pressure side.
- Connections for hose with inside ∅ 8 mm
- Stand mounting possible (using spring clamps on the back of the device)

① Vacuum regulator VAR
With regulator for controlling and maintaining the vacuum. Continuously variable for variable vacuum level.

② Vacuum meter VAC
Ideal for displaying the current vacuum level.

Technical specifications:

Measuring range	1020 to 0 mbar
Graduation	10 mbar
Dimensions (W x D x H)	80 x 80 x 150 mm

Type	Art. No.	Pack Qty.	€
Vacuum regulator VAR	**Y457.1**	1	234,35
Vacuum meter VAC	**NA03.1**	1	160,20

Vacuum measuring device DVR 2pro

By Vacuubrand. Chemical-resistant materials in area in contact with media for excellent long-term stability and accuracy.
- Integrated ceramic membrane pressure sensor (aluminium oxide)
- Digital pressure display, with additional analogue representation
- Selectable pressure unit (mbar, hPa, torr)
- Measuring principle: capacitive, absolute pressure measurement independent of gas type
- Automatic switch-off after 1 to 600 min or continuous operation
- Max. media temperature: +40 °C (for continuous operation)
- Adjustable measuring cycle: automatic, 1x per 3 s, 1 x per 1 s or 3 x per 1 s

Technical specifications:

Measuring range	1060 to 1 mbar (hPa) 795 to 1 torr
Measurement accuracy	<±1 mbar/hPa/torr
Vacuum connection	Small flange KF DN 16 Staged hose fast DN 6/10 mm Hose connection for PTFE hoses (ID 8, OD 10 mm)
Dimensions L x W x H (mm)	115 x 115 x 90 mm
Weight	approx. 400 g

Delivery incl. 9 V block battery (alkaline-manganese), vacuum connection parts and stand rod.

Art. No.	Pack Qty.	€
HTE7.1	1	650,40

Accessories:

E-Block 9 V battery	**1025.1**	1 piece	4,95

Vacuum meter

Vacuum meter for coarse and fine vacuum

By Welch Vacuum. Digital multi-range vacuum meter for measuring absolute pressure in the coarse and fine vacuum ranges.
With chemically resistant combined sensor (PIEZO/PIRANI) for corrosive and aggressive gases and vapours.

- Automatic changeover between capacitive and PIRANI measuring ranges
- Temperature compensated for operating temperatures from 0 to +60 °C
- Calibration of individual measured values
- With clamp for attaching to stand rods ∅ 8-12 mm.
- Battery or mains operation

Technical specifications:

Measuring range	1050 to 10^{-3} mbar absolute pressure
Resolution	1 mbar (1050 to 100 mbar) 0.5 mbar (99 to 1 mbar) 0.1 mbar (0.9 to 0.1 mbar) 0.01 mbar (0.09 to 0.01 mbar) 0.001 mbar (0.009 to 0.001 mbar)
Measuring principle	capacitive acc. to PIRANI
Measurement accuracy capacitive acc. to PIRANI	 0.8 % full scale (5 to 1050 mbar) ±20 % of displayed value
Reproduction uncertainty	<0.5 %
Measuring lead	3 m
Dimensions L x W x H (mm) Display unit Sensor	 80 x 36 x 125 mm 80 x 40 x 40 mm
Weight	0.7 kg
Power supply	90-260 V, 50/60 Hz

Delivery incl. power adapter (9 V/200 mA), hose nozzle DN 8-10, clamp and 9 V battery.

Vacuum meter DCP 3000 with pressure transducer

By Vacuubrand. LCD graphic display with digital pressure indicator and bar graph representation. Different units (mbar, hPa, Torr) can be set. Separate pressure transducer with measurement cable for flexible positioning of meter (cable length 2 m). Can be used as a tabletop unit or with a support.

Technical specifications:

Model	**① Pressure transducer VSK 3000**	**② Pressure transducer VSP 3000**
Measuring ranges	1080 to 0.1 mbar 810 to 0.1 Torr	1 x 10^3 to 1 x 10^{-3} mbar 75 x 10^2 to 1 x 10^{-3} Torr
Measuring accuracy	<±1 mbar	±15 % of displayed value within the 0.01 to 10 mbar range
Resolution	0.1 mbar	10 % of displayed decade
Vacuum connection	for hoses with IDs 6, 8 or 10 mm	
Measuring principle	capacitive	Heat conduction according to PIRANI
Sensor material, contacting medium	Aluminium oxide ceramic	
Dimensions of display unit (L x W x H)	124 x 124 x 114 mm	
Weight	440 g	
Mains connection	100-230 V, 50/60 Hz	

Delivery incl. DCP 3000 vacuum meter with desired pressure transducer, measuring cable and support.

Type	Art. No.	Pack Qty.	€
Vacuum meter DCP 3000 with pressure transducer VSK 3000	**LY74.1**	1	1166,40
Vacuum meter DCP 3000 with pressure transducer VSP 3000	**LY75.1**	1	1144,90
Accessories:			
Replacement/additional pressure transducer VSK 3000	**LY76.1**	1	427,85
Replacement/additional pressure transducer VSP 3000	**LY77.1**	1	397,75
Extension leads for pressure transducers VSK 3000 and VSP 3000, 10 m	**LY78.1**	1	95,15

Vacuum controllers CVC 3000 detect

By Vacuubrand. Two-point vacuum regulator with integrated ceramic diaphragm vacuum sensor.

- Backlit LCD graphic display with bargraph
- "Detect" function for automatic boiling pressure detection
- Vacuum measurement is integrated within the valve block - direct connection of CVC 3000 detect between pump and vacuum application
- Ten programs with vacuum and time presets, each storable in ten program steps
- Process time is adjustable from 1 to 1440 min
- Integrated venting valve - easy pressure equalisation or ventilation with inert gas at the end of the process
- Non-return valve - no interference with adjacent applications using a shared vacuum source

Technical data:

Measuring ranges	1081 to 0.1 mbar 810 to 0.1 Torr
Measurement accuracy	<±1 mbar
Resolution	0.1 mbar
Vacuum connection	For hoses with ID 6/10 mm
Venting valve, connection	For hoses with ID 4-5 mm
Measuring principle	Capacitive, absolute pressure measurement independent of gas type
Display unit dimensions (L x W x H)	181 x 162 x 174 mm
Weight	1.5 kg
Power supply	100-230 V, 50/60 Hz

Delivery incl. vacuum controller CVC 3000 detect with vacuum valve, venting valve, non return valve, power supply and ① bench stand or ② stand mount.

Type	Art. No.	Pack Qty.	€
① CVC 3000 detect benchtop unit	**AEP6.1**	1	2085,50
② CVC 3000 detect stand-mounted unit	**AEP7.1**	1	2085,50

SC 920 G vacuum pump system with remote control

By KNF. Chemical-resistant, suitable for aggressive and corrosive gases and vapours.

- Can be controlled via a PC or remote control
- Increased safety: No need to open the fume cupboard to operate the vacuum system
- LCD screen displays actual and target values
- Automatic boiling point detection and boiling point tracking using integrated ramp function
- High recovery rates even with solutions that have very low boiling points
- Delivery rate (in %) can be adjusted via speed
- Integrated gas ballast valve
- Quiet operation

Technical specifications:

Delivery rate	max. 21 l/min
End vacuum abs. without gas ballast with gas ballast	 max. 2 mbar max. 5 mbar
Tube connection	ID 10 mm
Receiving flask	Made of coated glass (implosion-resistant), capacity: 500 ml
Port	Mini USB
Dimensions (W x H x D)	366 x 423 x 294 mm
Total weight	15.2 kg
Power supply	100-240 V, 50/60 Hz

Materials of pump parts in contact with media:

Pump head	PPS
Diaphragms	PTFE-coated
Valves	FFPM
Seals	FPM
Tube shafts	PVDF

Radio remote control:

Display	LCD
Operation	Touchscreen/push-and-turn dial
Range	max. 50 m
Power supply	Batteries (4 x 1.2 V 2500 mAh AA) or power supply
Dimensions (W x H x D)	90 x 205 x 55 mm
Weight	0.51 kg

Delivery incl. radio remote control with batteries and power supply, 2 receiving flasks, 2 flask clamps, USB cable for connecting to a PC and software (compatible with Windows).

Art. No.	Pack Qty.	€
EHP1.1	1	4662,30

Chemical-resistant LABOXACT®-SEM vacuum systems

By KNF. Ideal for application with rotary evaporators.

Design:
- **Digital-vacuum meter**, shows the current pressure in the system
- **Fine control valve** for infinitely adjustable vacuum regulation
- **Safety ventilation valve** enables the piston to be aired at any time to stop evaporation
- **Separate On/Off-switch** for pump
- **Inert gas supply**
- Connection for hose-ID 10 mm
- Power supply 230 V, 50 Hz
- Comes completely assembled

Advantages:
- Safe monitoring of evaporation
- High recovery rate, even when using low boiling solvents
- The closed system allows for gentle distillation
- Infinitely variable regulation of vacuum via fine control valve
- Once the desired vacuum has been achieved, the fine regulator valve can be closed and the pump switched off
- Maintenance-free and quiet

Delivery incl. base plate, separator, condenser, fine control valve, vacuum meter (digital), safety ventilation valve, cables and tubes.

Chemical-resistant LABOPORT®-SC vacuum systems

By KNF. With separator, condenser and vacuum-controller.
For laboratories which require a clean and controlled vacuum.

Examples of applications:
- Vacuum distillation and -filtration
- Rotary evaporators
- Vacuum drying
- Vacuum impregnation
- Gel drying, etc.

Design:
- **Vacuum-Controller** for controlled vacuum processes
- The control unit switches the pump off or closes it, when the required vacuum has been achieved or exceeded
- Connection for hose-ID 10 mm
- Power supply 230 V, 50 Hz
- Comes completely assembled

Advantages:
- Automatic control of vacuum
- Controlled solvent recovery through high-performance condenser (delivery side)
- Collecting of particles in the system (suction side)
- Maintenance-free and quiet

Delivery incl. base plate, separator, condenser, vacuum-controller with control unit, cables and tubes.

Laboratory vacuum system LVS 105 T-10 ef

By Welch Vacuum. Specially designed for rotary evaporators, distillation, filtration, vacuum ovens and vacuum drying. Chemical resistant diaphragm vacuum pump and vacuum controller. To provide a freely selectable vacuum of ±1 mbar, pump speed is continuously adapted to the gas load.

Advantages:

- Faster process results are ensured by constant evaporation and degassing
- Automatic vacuum adjustment and control
- Integrated solvents library with stored distillation-specific parameters or freely adjustable boiling points
- Multilingual digital display (languages include DE, FR, EN and ES)
- Low-noise operation through speed reduction

Pump parts materials in contact with media:

Seal	EPDM
Screw coupling / terminals	PP, PVDF
Valve	PEEK
Diaphragm	PTFE backing
Vacuum hose	PTFE
Connector head / pump head	PTFE with carbon fibre reinforcement

Technical specifications:

Delivery rate	20 l/min
Vacuum abs.	<2.0 mbar
Max. inlet/outlet pressure	1 bar
Connections for ID hoses	8 mm
Output	830 W
Dimensions (W x D x H)	250 x 260 x 435 mm
Weight	9.5 kg
Power supply	90-240 V, 50/60 Hz

Delivery incl. chemical resistant diaphragm pump with gas ballast valve, built-in controller, ecoflex control unit, suction-side separator with 500 ml round bottom flask, pressure-side coil condenser with 500 ml round bottom flask and safety valve.

Art. No.	Pack Qty.	€

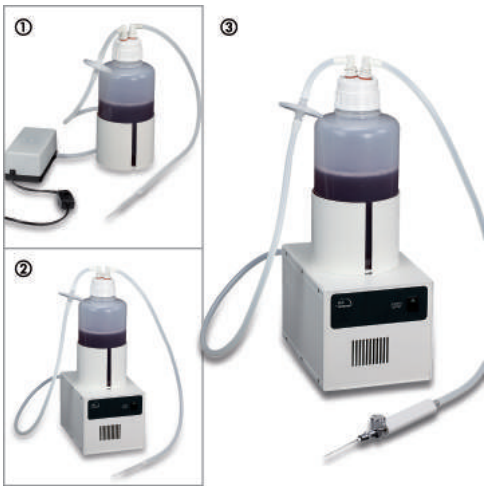
Safety suction system biovac 106

By Welch Vacuum. For safe and precise extraction of liquids, and non-explosive supernatants from microscopic slides, Petri dishes and other containers.



- Incl. highly durable chemical-resistant membrane pump
- The connection between the membrane pump and the handpiece are made with quick-coupling with double-sided stop valve
- Different pipettes or glass tips can be inserted via pipettor holder. Delivery includes 8-channel-suction screen
- Integrated 2 l drain bottle (autoclavable) with built-in float valve, closes automatically once max. filling level has been reached
- Has an integrated filter holder for the membrane filter between the drain bottle and membrane pump
- Membrane filters with max. 0.22 µm pore size, ∅ 55 mm can be used. Comes equipped ex works with: PTFE filter, 0.22 µm, ∅ 55 mm
- If desired, the pump can also be switched on/off via foot switch (available as an optional accessory)

Technical specifications:

Suction speed	0.72 m^3/h or 12 l/min
Ultimate pressure	<100 mbar
Max. supply pressure	1 bar
Max. outlet pressure	1 bar
Ambient temperature	+10 to +40 °C
Media temperature	max. +40 °C
Dimensions (W x D x H)	357 x 145 x 277 mm
Weight	8 kg
Current	50/60 Hz, 115 or 230 V (adjustable)

Type	Art. No.	Pack Qty.	€

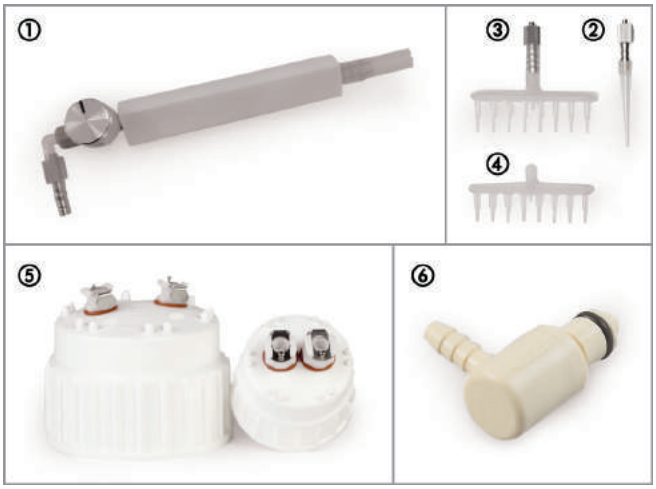
Vacuum safety extraction systems AZ, AC, AA

By Hettich Benelux. For safe vacuum extraction of liquid residues.

Basic equipment:
- Vacuum pump
- Collecting bottle made of PP, vacuum resistant, autoclavable
- Screw cap with 2 quick release couplings for right sealing of the collecting bottle after the hoses are disconnected
- Aeration insert for pressure equalisation during autoclaving of collecting bottle
- Safety filter to protect the vacuum pump and environment
- 3 m silicone rubber hose for placing extraction system away from the workbench

Technical specifications:

Type	① AZ02 / AZ04	② AC02 / AC04	③ AA02 / AA04
Suction capacity (l/min)	8	25	17
End vacuum (abs.) (mbar)	700	250	100
Additional sampling points (optional)	-	1	1 to 3
Housing dimensions W x D x H (mm)	75 x 170 x 60	170 x 220 x 155	170 x 220 x 155
Weight (kg)	1.5	4.5	5.5
Power supply	230 V, 50 Hz		



① Type AZ
- Simple system for extraction of small volumes
- Attachment of Pasteur pipettes or aspiration pipettes directly to the hose
- Please order metal stand for the collecting bottle separately

② + ③ Type AC/AA
- Lacquered aluminium housing
- Compact design, safety bottle holder mounted on high-performance vacuum pump
- Suitable for multiple sampling points

③ Additional features of type AA
- Handle with trumpet valve AH 01 for attaching various suction instruments and a mechanical flow rate control system; incl. adapter for Pasteur pipettes, adapter for 1 ml pipette tips and angle adapter
- Vacuum pump with automatic cut-out. The pump cuts out automatically on completion of extraction and when the terminal vacuum is reached

BioChemVacuuCenter BVC liquid extraction stations

By Vacuubrand. Safe, exact and effective extraction of liquids in all laboratory areas (chemistry, biochemistry and biology).
- Anatomically shaped VHC extraction handle with continuous tube, mechanism does not come into contact with fluids
- With swivelling pipette holder, for left and right handed users
- Lockable button for continuous extraction, µl precision extraction using thumbwheel
- Simultaneous extraction at 2 workstations is possible by connecting an optional second extraction handle
- Hydrophobic protective filter with 0.2 µm pore size for protection of the pump unit and the environment

① **BVC Basic**
- Without vacuum pump, for connecting to external vacuum sources
- With mechanical vacuum control for optimal working volume

② + ③ **BVC Control and BVC Professional**
- With high-performance, chemical resistant diaphragm pump ME 1C
- Continuous fine adjustment of vacuum/suction power electronically via touch panel
- Continuous vacuum with minimised pumping times by automatic pump activation/deactivation
- Very low noise level for a comfortable working environment

③ **BVC Professional**
- Also included: non-contact level sensor for electronic monitoring of the fluid level in the collection bottle
- Self-closing PVDF quick couplings for safe bottle changing

Note: when the quick couplings are fitted, unscrew the cap before autoclaving and place it on the bottle.

Technical specifications of diaphragm pump ME 1C:

Max. vacuum abs.	150 mbar (shutoff vacuum)
Max. suction capacity at 50/60 Hz	0.7/0.85 m^3/h or 11.7/14.2 l/min
Motor rating	0.04 kW

Delivery incl.:
BVC Basic
Housing, 4 l **PP** collection bottle (vacuum resistant, autoclavable), sterilisable protective filter (0.2 µm pore size), extraction handle VHC^{pro} (autoclavable), 3 adapters to hold various pipettes and tips, silicone rubber tube (2 m long).
BVC Control and BVC Professional
Also included: diaphragm pump and operating unit
BVC Professional
Also included: level sensor and quick couplings.

Optional
2 l borosilicate glass bottle for working with chemically aggressive solutions, plastic casing protects against mechanical damage and minimises loss of fluid in the event of glass breakage. An adapter is available to securely hold the glass bottle in the BVC Control and BVC Professional pump units. Self-closing quick couplings, made for PVDF for convenient and safe bottle changing.

Aspirator

By Brand. Bottle-top suction device, e.g. for cell culture. For safe and quick suction of liquid residue from bottles, test tubes and other storage. Items that touch the sample are made of **PP, PE and EPDM**.
- A vacuum pump is not required
- A vacuum is generated by pressing down the piston
- Suction volume per piston stroke max 25 ml
- Vacuum can be regulated with hand regulator
- GL 45 thread (with GL 45/32 and GL 45/S 40 thread adapters)
- Adapter and suction tube are autoclavable
- Can be disassembled easily for cleaning and maintenance
- Can also be used with pipettor tips, pasteur pipettes or capillary pipettes
- Incl. spare dosing unit

Art. No.	Pack Qty.	€
Y526.1	1	225,75

Water jet pump

Made of **PP**, ideal for sucking up liquids and vapours and for producing a vacuum. With integral non-return valve. Can be detached for easy cleaning.

Tap connection via:

Coupling nut R¾″ or
reducing adapter R½″ or
hose connection (olive) with outer-∅ 10-12 mm
Vacuum connection: Olive with outer-∅ 6-9 mm

Please order following accessories separately:
Adapters from R¾″ on M22 x 1 (perlator thread), with seal.

Technical specifications:

Water consumption	approx. 190 l/h at 3.5 bar flow pressure
Pump capacity	approx. 400 l air/h at 3.5 bar flow pressure
Max. vacuum at 3.5 bar water pressure	approx. 16 mbar at +12 °C approx. 24 mbar at + 20 °C
Length of water jet pumps at R¾″-connection	approx. 210 mm

Type	Art. No.	Pack Qty.	€
Water jet pump	**7366.1**	1	48,05
Adapter with Perlator thread	**N876.1**	1	12,90

Low pressure-water jet pumps

Made of nickel-plated brass with plastic sleeve. With vacuum strength 16 mbar (at 0.5 bar and +14 °C). Water consumption 4-12 l/min. With integral no-return valve. Dimensions: H 185 x W 80 mm. Weight approx. 250 g. Pump capacity at 5 bar water pressure 2.5 l/min. Connection suction nozzle 9-14 mm.

Flex-tubes

Temperature range from -270 to +260 °C. Made of **PFA**, transparent. Resistant to chemicals, suitable for vacuums, pore-free. Autoclavable. Flexible, therefore ideal for narrow spaces and thermical extensions of length. The 40 mm long cylindrical endpieces can be connected e.g. to olives.

A 121 °C

Versilon™-hoses 2001

By Saint-Gobain. Temperature range -78 to +57 °C, transparent, made of **TPO**. Hardness 69 Shore A. Autoclavable.
Doesn't contain plasticizers and oils.
Very flexible, extremely good chemical resistance, durable.
Increased durability when used **in peristaltic pumps**.
Acc. to FDA-requirements.

Tygon®-hoses E-1000 Ultra-Soft

By Saint-Gobain. Transparent, DEHP-free. Operating temperature -55 to +52 °C. Hardness: 40 Shore A. Soft, pliable, stays flexible even at low temperatures (-55 °C). Good alternative to silicone tubing with good chemical resistance. Suitable for general laboratory applications and peristaltic pumps.

Tygon®-hoses 2375

By Saint-Gobain. Temperature range from -59 to +54 °C. Flexible, made of **TPO**. Hardness 75 Shore, transparent, without plasticizer. Suitable for extreme chemical applications. Resists acids, bases, ketones (methyl ethyl ketone), salts and alcohols. The smooth inside wall minimise particle deposits.

Versilon™-tubes F-5500-A

By Saint-Gobain. Temperature range -51 to +204 °C, **fluor caoutchouc**, black, hardness 60 Shore A.
Excellent resistance against caustic chemils, oils, benzenes, solvents and most acids. Resistant to ozone, sunlight and weather, tearproof and hard-wearing. Their pliability and elasticity make them suitable **for peristaltic pumps**.

Iso-Versinic® Fluoroelastomer-tubes

By Saint-Gobain.
Temperature range from -20 to +200 °C (short-term to +300 °C).
Fluor caoutchouc, black, hardness 60 Shore A (HC36.1 and HC37.1), hardness 70 Shore A (HC38.1 to HC42.1). Suitable for delivering very aggressive chemicals and for demanding applications in the laboratory and industry. Good resistance against hydrocarbons, oils, strong acids, oxidants, aromatic and chloric solvents. Non-aging and weatherproof. Flameproof.

Tubing accessories

Fastening tool

Made of metal. For fastening and cutting cable ties. The corrugated cable ties or fasteners are secured in a single operation and then cut.
The required tension can be individually set.
Colour: blue or red.
Assorted ties Art. No. 1729.1 and 1735.1.

Art. No.	Pack Qty.	€
H977.1	1	92,35

Rotilabo®-ties

Made of **PA**. Temperature stable from -40 to +85 °C.
Suitable for fastening tool H977.1.

102	2,5	∅ 22 mm	**1735.1**	100	5,50

Rotilabo®-tubing gauge

Ideal for determining inner or outer ∅ of hoses, glass tubes, etc.
For inner ∅ from 1-25 mm. For outer ∅ from 1.5-21 mm.
With easy-to-read engraved numbers. Dimensions: W 90 x L 165 mm.

Art. No.	Pack Qty.	€
4892.1	1	7,15

Tube cutter

For all tubes with ∅ max. 13 mm.

Type	Art. No.	Pack Qty.	€
Tube cutter	**6737.1**	1	21,15
Spare blades for tube cutter	**6738.1**	5	38,40

Rotilabo®-hose- and tube-cutter

Made of stainless steel 18/10, with high gloss finish. Ideal for cutting hoses and centrifuge tubes of max. outer ∅ 10 mm. Blade length 2.5 cm.
Total length 10 cm.
Delivery incl. artificial leather case.

Art. No.	Pack Qty.	€
CK56.1	1	21,40

Rotilabo®-tube clamps

Made of **POM**. Resistant against UV-rays and with good chemical properties. Temperature stable from -40 to +90 °C (and short-term up to +110 °C).

Suitable for hoses with outer ∅ (mm)	Art. No.	Pack Qty.	€

Information on threads

The thread on a drum is defined, among other things, by diameter (A and B) and thread pitch (C). The values given in the table give a rough indication of the thread type, however this cannot reliably be determined by measuring the thread using a sliding caliper alone. Manufacturer-specific threads are also available in addition to the standard threads. The drum supplier can generally provide information on the thread type.

We will be happy to provide you with information on containers which you purchase through us.

Thread	Diameter excl. thread A (mm)	Diameter incl. thread B (mm)	Thread pitch C (mm)
DIN 38	34.6	36.6	9
DIN 40	38.8	42.2	4

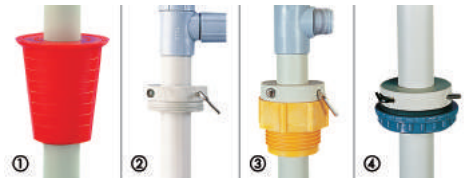
Barrel pumps

Barrel pumps made of PP



By Bürkle. For safe dispensing of liquids from barrels, canisters and tanks. Available either with rigid funnel or with flexible dispensing tube **(PVC)** with stopcock. Immersion tube ∅ 32 mm. Barrel screw connections must be ordered separately.

With curved nozzle

Immersion depth (mm)	Total length (mm)	Delivery rate (ml/stroke)	Art. No.	Pack Qty.	€
500	600	200	**Y958.1**	1	150,10

PTFE barrel pumps

By Bürkle. Made of **PTFE** and **FEP**. Excellent chemical resistance for safe filling of ultrapure and aggressive liquids. Stopcock stops liquids from dripping and prevents hazardous vapours from escaping. Immersion tube ∅ 32 mm. Please order barrel screw fittings separately.

① With discharge tube

Immersion depth (mm)	Delivery rate (ml/stroke)	Art. No.	Pack Qty.	€
600	270	**LY53.1**	1	468,70
950	400	**AH27.1**	1	471,95

② With outlet hose

600	270	**NH33.1**	1	466,55
950	400	**NH34.1**	1	494,50

Acid and alkali pumps

Made of **PP**, **PTFE**, **Hastelloy**. Battery operated. Ideal for safe emptying and transfering of water-like liquids (for most acids and alkalis etc.). General purpose and easy-to-use. High flow rate (up to 6 l/min) and light (weight approx. 500 g including batteries). ∅ of dip tube 25 mm. 2 rechargeable batteries (Mono 1.5 V) are recommended for use. **Delivery without** battery (please order separately).

Suction pipe length (mm)	Art. No.	Pack Qty.	€
400	**E490.1**	1	409,60
600	**E491.1**	1	426,80

Accessories:

Battery Mono D	**X228.2**	2	17,20

Solvent pumps

Mini solvent pump

By Bürkle. Hand pump for small drums up to 5 l.

- For high-purity fluids as well as flammable media
- Parts in contact with media are made from **PTFE** and **stainless steel**
- Delivery rate: approx. 1.8 l/min
- Earthing cable connection for dissipating electrostatic charge
- Works on the over-pressure principle, pressure relief valve protects against excessive pressure build-up
- Transfer of medium at the touch of a button
- Integrated spout (outer ∅ 7 mm) prevents dripping and allows for hose attachment
- With GL 45 thread

Delivery incl. earthing cable and PTFE riser tube (inner ∅ 6 mm, wall thickness 1 mm, length 400 mm).

Art. No.	Pack Qty.	€
APE4.1	1	460,10

Accessories:

Threaded adapter, PTFE, GL 45 / S 40	**APE5.1**	1	34,55
Threaded adapter, ETFE, GL 45 / GL 38	**APE6.1**	1	34,55
Threaded adapter, ETFE, GL 45 / GL 32	**APE7.1**	1	34,55

Roth antistatic-set

Prevents fire and explosion caused by electrostatic charge. Consists of two insulated cables 3 mm / 3 m with vice grip wrenches on both sides and a blank copper wire 2 mm / 3 m with a vice grip wrench on one side.

Art. No.	Pack Qty.	€
0213.1	1	44,75

Solvent pump

For filling of high-purity liquids.

- **Delivery incl.** two immersion tubes for 10 l and 25 l stainless steel drums with 2″ steel fine pitch thread
- Fixed drainage elbow with stopcock
- Pump can be shut off hermetically by two ball valves
- Works according to excess pressure principle

Note: the drum and the pump must be grounded using the Roth antistatic set (Art. No. 0213.1) during filling of flammable liquids.

Technical specifications:

For drum sizes	10 l and 25 l
Immersion depths	275 mm and 435 mm
Overall length incl. pump ball	450 mm and 600 mm
Weight	approx. 1.2 kg
Compression gland thread type	2" steel fine pitch thread
Parts with media contact	Stainless steel (1.4301) and PTFE

Art. No.	Pack Qty.	€
N103.1	1	416,05

Warning:
Corrosion through acidification can occur when using chlorinated solvents. If the required safety precautions are taken (immediate washing and removal from drum), the pump can be carefully used, with such solvents. Not for use with acids. To prevent crystallization, pump should be rinsed with water after use with alkalis.

Solvent pumps

Sekuroka® stainless steel safety pumps

For filling of flammable liquids.
- Immersion tube is infinitely adjustable to drum depth
- Near-complete emptying of drums
- Works according to piston stroke principle
- Removable drainage elbow for connecting a drainage hose with stopcock (please order separately)

Note: the drum and the pump must be grounded using the Roth antistatic set (Art. No. 0213.1) during filling of flammable liquids.

Technical specifications:

Solvent pumps, foot operated

By Bürkle. For filling drums with high purity liquids such as solvents.
- A compression gland and stopcock allow the drum and pump to be hermetically sealed
- Immersion tube is infinitely adjustable to drum depth
- Available in two types:
  ① With discharge tube
  ② With outlet hose and stopcock

Note: the drum and the pump must be grounded using the Roth antistatic set (Art. No. 0213.1) during filling of flammable liquids.

Technical specifications:

Delivery rate	approx. 20 l/min
Immersion depth	950 mm
Overall length	1485 mm
For drum sizes up to	220 l
Weight	Type ① approx. 3.5 kg / ② approx. 4.4 kg
Compression gland thread type	2" steel fine pitch thread
Parts with media contact	Stainless steel (1.4301) and PTFE

Version	Art. No.	Pack Qty.	€
① With discharge tube	**CPT5.1**	1	488,60
② With outlet hose and stopcock	**CPT6.1**	1	654,70

Electro barrel pumps

Barrel pumps AccuOne and EnergyOne

By Bürkle.

- Parts in contact with medium are made of **Hastelloy C**, **PP, PVDF** and **PTFE**
- Unique hybrid system allows fast and versatile filling of liquids, the supply units can be changed to use either with battery or power pack.
- The drive can be disconnected easily via a clip lock. This makes it possible to use one drive for filling at several stationary pump stations.
- Flow rate 12 l/min. Can be regulated continuously via TouchPanel from 0.4 l/min to 12 l/min
- Please order barrel screw fittings separately
- Drainage hose with nozzle is optionally available. Drainage hose connection ¾″

AccuOne

- Barrel pump driven by rechargeable battery (offers versatility and independence from the power supply)
- Lithium-ion rechargeable battery, 14.4 V, 1.5 Ah
- Up to 600 litres of delivery volume per battery charge
- Weight 750 g

Delivery incl. fixed drainage elbow, rechargeable battery and power outlet adapter.

Immersion depth (mm)	Art. No.	Pack Qty.	€
500	**PL80.1**	1	522,45
700	**PL81.1**	1	537,50
1000	**PL82.1**	1	552,55

EnergyOne

- Outlet operated barrel pump (offers versatility and independence from the battery charge)
- Power outlet adapter 230 V
- Unlimited filling duration
- Weight 580 g

Delivery incl. fixed drainage elbow, power outlet adapter and international socket adapter.

Immersion depth (mm)	Art. No.	Pack Qty.	€
500	**PL83.1**	1	441,85
700	**PL84.1**	1	456,90

Rechargeable battery without outlet adapter	**PL86.1**	1	128,30
Outlet adapter	**PL87.1**	1	70,85
Outlet adapter incl. plug	**PL88.1**	1	144,80
Outlet hose with nozzle	**PL89.1**	1	80,85
Pump station with immersion pipe length 500 mm	**PL90.1**	1	148,60
Pump station with immersion pipe length 700 mm	**PL91.1**	1	150,35
Pump station with immersion pipe length 1000 mm	**PL92.1**	1	158,05
Barrel screw joint made of PP, for 2″ fine steel thread	**1789.1**	1	33,55
Container screw joint with locknut (2″ fine steel thread); for attaching in any position; 60 mm mounting hole	**T244.1**	1	38,00
Barrel plug, PVC, for hole-∅ 40 to 70 mm	**9276.1**	1	23,90
Mauser 2″, coarse thread, inside	**PL93.1**	1	41,50
Barrel screw joint made of PP, for 2″ internal fine steel thread and adapter for Tri-Sure® internal course thread	**T243.1**	1	40,40

Electro barrel pumps

By Lutz. For pumping liquid media out of bulk storage containers.

Application:

- **Set 1 and 2**: **aqueous liquids**, diluted acids and alkaline solution, hydrogen peroxide etc.
- **Set 3**: low-viscosity **alkaline** solution, sodium hydroxide, potassium hydroxide, ammonia water, formic acid, acetic acid, etc.
- **Set 4**: most **concentrated acids and alkaline solutions** such as hydrochloric acid, sulphuric acid, hydrofluoric acid etc.
- **Set 5 Explosion-proof**: **highly flammable hydrocarbons such as** ethanol, gasoline, isopropanol, kerosine, methanol, crude petroleum, etc.
- **Set 6 Explosion-proof: explosive liquids such as** acetone, concentrated Formic acid, ethyl acetate, buthyl acetate, concentrated Acetic acid, nicotine, toluene, styrene, etc.

Technical specifications:

Set	1	2	3	4	5 Explosion-proof	6 Explosion-proof
Motor explosion-proof	no				yes	
Output (W)	200		500	575	460	
Immersion depth of pipe (mm)	650	1000

Mini-Dispenser Piccolo

By Vitlab. With two fixed volumes. Ideally suited to dispensing long series. Manual push-button delivery, automatic refilling. Good chemical resistance thanks to high-quality materials, but not suitable for vapourous media.

- Precise media delivery
- Freely rotatable discharge tube on the bottle
- Choice of 2 fixed volumes
- Thread GL 28
- **Parts in contact with media:** PTFE, FEP, ETFE, PFA, borosilicate glass, Pt-Ir

A 121 °C

Rotilabo® II dispenser

- Direct displacing piston with wiping PFA lip seal reduces crystallisation of liquids
- Improved volume adjustment due to internal toothed strip, volumes can be set quickly and precisely
- Valve block rotatable by 360° on the bottle, with GL 45 thread
- Swivelling cap does not obstruct dispensing
- Vent valve with safety bulb closes dosing channel when vent cannula not fitted
- Screwable ventilation stoppers for quick assembly of a drying tube
- Telescopic intake tube, infinitely adjustable to different bottle heights
- Suitable for calibration in conjunction with measuring instrument inspection according to ISO 9001 and GLP; change to factory calibration is displayed
- Autoclavable at 121 °C (2 bar), according to DIN EN 285, without disassembly
- Marked as DE-M, according to DIN EN ISO 8655-5

Materials in contact with media: borosilicate glass, Al_2O_3 ceramic, ETFE, FEP, PFA, PTFE, platinum-iridium, PP (cap)

Usage limits: temperature from +15 °C to +40 °C, steam pressure up to max. 500 mbar, kinematic viscosity up to 500 mm^2/s, density up to 2.2 g/cm^3

Specifications of supplied threaded adapters and suction tubes:

Nominal capacity (ml)	Bottle thread adapter	Suction tube, length (mm)
2, 5, 10	GL 25, GL 28/S 28, GL 32, GL 38, S 40	125-240
25, 50. 100	GL 32, GL 38, S 40	170-330

Delivery incl. certificate of quality, telescopic suction tube, assembly spanner and threaded adapter made of PP.

Dispensette® *S* / Dispensette® *S* Organic

By BRAND. For accurate dispensing aggressive and non-aggressive media. Suitable for sterile dispensing.

Models:
- ① **Digital** - Easy-to-read digital display via mechanical counting mechanism; Easy Calibration technology for quick calibration
- ② **Analog** - Quick adjustment of dispensing volume, safe and reliable volume setting through internal rack
- ③ **Fix** - Non-adjustable dispensing volume for routine applications

Features:
- Easy dispensing and quick ventilation through floating piston
- Rapid ventilation through improved fluid mechanics
- Valves without additional seals for easier cleaning
- Rotates through 360°, valve block with GL 45 thread
- Dispensing syringe with swivel-mounted screw cap for protection against media contact
- Telescopic suction tube adjustable to different bottle sizes
- Recirculation valve prevents loss of reagent and allows quick, bubble-free ventilation
- DE-M approved
- Suitable for calibration in conjunction with measuring instrument inspection according to ISO 9011 and GLP
- Alteration of factory calibration is indicated
- Easy to disassemble for cleaning
- Fully autoclavable at 121 °C
- Microfilter can be connected to the ventilation opening for sterile dispensing

Limits of use:
Max. vapour pressure 600 mbar; max. viscosity 500 mm^2/s; max. temperature 40 °C; max. density 2.2 g/cm^3.

Limits of error:

Nominal volume (ml)	Accuracy (±µl)	Variation coefficient (±µl)
1	6	2
2	10	2
5	25	5
10	50	10
25	125	25
50	250	50
100	500	100

Delivery incl.: certificate of quality, telescopic suction tube, recirculation valve and recirculation tube, assembly spanner and threaded adapter made of PP.

Specifications of supplied threaded adapters and suction tubes:

Nominal capacity (ml)	Bottle thread adapter	Suction tube length (mm)
1, 2, 5, 10	GL 24-25, GL 28/S, GL32-33, GL 38, S 40	125-240
25, 50. 100	GL 32-33, GL 38, S 40	170-330

Dispensette® S

Range of applications:
colour code: red. For dispensing aggressive reagents directly from the supply bottle: e.g. concentrated alkalis and acids such as H_3PO_4. H_2SO_4 (excluding, e.g., HCl, HNO_3 and HF), saline solutions and a wide range of organic solvents.

Materials in contact with media:
borosilicate glass, Al_2O_3 ceramics, platinum-iridium, ETFE, FEP, PFA, PTFE and PP.

seripettor®/seripettor® *pro* dispenser

By Brand.

- Dispensing: push plunger down, fills automatically
- Suitable for serial dispensing by means of flexible dispensing hose made of PTFE with safety handle, length approx. 800 mm (please order separately)
- **Suitable for dispensing sterile media:** screw the valve block with suction tube onto the filled bottle, seal the valve block with the cap, attach the autoclavable sterile filter (0.2 µm) at the side and autoclave at 121 °C. Remove the cap from the valve block under clean bench conditions, screw in the sterile dispensing unit and attach the actuating unit
- If the snug fitting plunger seal is worn, the dispensing unit can be interchanged
- GL 45 thread

Materials in contact with media:

- seripettor®: FEP, PP, PE, EPDM
- seriipettor ® pro: PP, PE, Borosilicate glass, Al_2O_3-ceramic , ETFE, PFA, FEP, PTFE, Pt-Ir

Limits of use: 15 to 40 °C, vapour pressure max. 500 mbar, max. density 2.2 g/cm³, viscosity 300 mm²/s (2 ml device), 150 mm²/s (10 ml device) or 75 mm²/s (25 ml device)

Limits of error:

Nominal volume (ml)	Accuracy (±µl)	Variation coefficient (±µl)
2	24	4
10	120	20
25	300	50

Delivery incl. dispensing syringe, suction tube, replacement dispensing unit and PP adapter (GL 32, S 40).

seripettor®

For dispensing aqueous solutions, buffer solutions, culture media, diluted, non-oxidising acids and agars up to max. 60 °C.

Syringe filter "RC", 0.2 µm pore size	**EE80.1**	100	122,00

Dispensette® S Trace Analysis, analog

By Brand.

Range of applications:

- For accurate dispensing of highly pure media in trace analysis
- Dispensing of metal traces, usually in the low ppb range - or even in the ppt range, depending on application
- The established cleaning process for use in trace analysis is explained in the operating instructions
- Usable as a hydrofluoric acid dispenser with platinum-iridium valve spring

Models:

- Dispensing needle with recirculation valve: prevents loss of reagent and allows fast, bubble-free ventilation
- Dispensing needle without recirculation valve: prevents contamination of the bottle contents

Features:

- Depending on requirements, the spring material is made of platinum-iridium or tantalum
- Valves without additional ring seals for easier cleaning
- Dispensing plunger with snug fitting seal
- Complete dispensing unit is easy to replace in case of wear
- Reliable volume control through inner rack mechanism
- Rotates through 360°, valve block with GL 45 thread
- Dispensing needle with swivel-mounted screw cap for protection against media contact
- Telescopic suction tube adjustable to different bottle sizes
- DE-M approved
- Suitable for calibration in conjunction with measuring instrument inspection according to ISO 9011 and GLP
- Alteration of factory calibration is indicated
- Microfilter can be connected for sterile dispensing

Materials in contact with media:
High-purity plastics (PTFE, ETFE, PCTFE, FEP and PFA), sapphire valves, platinum-iridium or tantalum spring material.

Limits of use:
Max. vapour pressure 600 mbar; max. viscosity 500 mm²/s; max. temperature +40 °C; max. density 3.8 g/cm³.

Limits of error:

Nominal volume (ml)	Accuracy (±µl)	Variation coefficient (±µl)
10	50	10

Delivery incl. certificate of quality, telescopic suction tube, assembly spanner and threaded adapter GL 28 / S 28 (ETFE), GL 32 (ETFE) and S 40 (PTFE). Version with recirculation valve also includes a recirculation tube.

Type	Volume (ml)	Graduations (ml)	Art. No.	Pack Qty.	€

ECX5.1	1	376,25

Dispenser FORTUNA® POLYFIX®

By Poulten & Graf.
- Conformity certified
- Precision dispensing plunger
- Quick adjustment with easy action
- Rotatable fine adjustment
- GL 32 thread

Delivery incl. dispensing syringe set, suction hose made of PTFE, two GL 40 and GL 45 threaded adapters made of PP.

With glass plunger and clear glass cylinder.
For dispensing aqueous media.

Volume (ml)	Graduations (ml)	Tolerance (±ml)	Art. No.	Pack Qty.	€

Bottle holder for dispensers

By Brand. Made of **PP**. For secure attachment of bottle top dispensers or digital burettes during work with small storage bottles.
Completely made from plastic and therefore ideal for trace analysis and use in aggressive environments (e.g. acid vapours in extractor).
Base plate L 220 x W 160 mm, length of stand rod 325 mm.
Weight: approx. 1.1 kg.

Art. No.	Pack Qty.	€
CNN2.1	1	177,40

Dispenser FORTUNA® OPTIFIX® series

By Poulten & Graf.

Properties:
- Ergonomic design with colour-code system
- Resistant to abrasion, UV radiation, acids and acid vapours
- Valve block without metal springs; no contamination of the dispensed liquid
- Quick volume adjustment with easy action and rotatable fine adjustment
- Visually recognisable dosing direction
- Screws directly onto bottle with thread GL 32
- Easy to dismantle and clean.
- Conformity testing acc. to DIN EN ISO 8655-5

Tolerances:

Nominal capacity (ml)	Accuracy (±ml)	Variation coefficient (±ml)

A 121 °C

Dispensers ceramus® classic

By Hirschmann.
- **Ceramic piston:** no wear by friction, no swelling, no thermal problems, high chemical stability
- Variable volume setting
- Suction tube is screwed on tightly, therefore completely leakproof
- Absolutely reproducible work
- Quick and safe setting of volume
- Parts can be replaced easily
- Thread A32
- Without dismantling, steam sterilizable at 121 °C/2 bar
- Certificate of conformity

Delivery incl. 3 thread adapters (A28/S40/A45), 1 installation wrench, certificate of quality.

2-10	0,25	0,1	**T306.1**	1	891,20

Digital dispenser

Ultra / Ultra HF dispenser

For dispensing highly pure acids and alkalis.
Suitable for use in ultra trace analysis.

Features:
- **Free of metals**
- Made of high quality and highly pure plastics (PTFE, TFM and PFA)
- Calibrated and mechanically tested for precision and accuracy
- 38-430 thread (fits ROTIPURAN® Ultra products)

Special features of Ultra dispenser:
- Acid cleansed
- Manufactured in cleanroom (class 100)

Special features of Ultra HF dispenser:
- Specially for dispensing hydrofluoric acids
- Also suitable for analytical acids

When using bottles with a GL45 thread, please order fastening for dispenser KK11.1 separately.

Model	Volume (ml)	Graduation (ml)	Tolerance (±ml)	Art. No.	Pack Qty.	€
Ultra	0,5-5	0,5	0,02	**KK97.1**	1 piece	2929,40
Ultra HF	0,5-5	0,5	0,02	**KK98.1**	1 piece	2359,65

Accessories for Ultra/Ultra HF dispenser

Bottle holder

Stabilises bottle when using a dispenser. The four-screw system is suitable for both square bottles and round bottles. The bottle holder is designed for ROTIPURAN® Supra and Ultra bottles with capacities from 250 ml to 2 litres. Also suitable for bottles with a diameter from approx. 7,0 cm to 11,5 cm.

Product	Art. No.	Pack Qty.	€
Bottle holder	**KK99.1**	1 piece	123,10

Fastening for Ultra/Ultra HF dispenser to GL45

Made of PTFE. For bottles with GL45 thread, specially for the use of ROTIPURAN® Supra products with Ultra and Ultra HF dispensers.

Product	Art. No.	Pack Qty.	€
Fastening for ROTIPURAN® Supra (GL45)	**KK11.1**	1 piece	338,65

▶ Further accessories for the opus® dispenser see p. 420

Digital dispenser opus® dispenser

By Hirschmann. For motor-driven dosing directly from the lab bottle. Microprocessor-controlled piston stroke system guarantees highest accuracy and precise, reproducible results.
- Safe and easy handling via external touch screen with clearly arranged menu keys; with quick-cal function for simple calibration of other temperatures or other media
- High media flexibility thanks to highly resistant, inert materials (ECTFE, borosilicate glass 3.3, Hastelloy, FEP, PTFE)
- Media carrying parts are steam sterilisable (121 °C)
- Time-controlled serial dosing up to 9999 reruns, enables integration in automated process runs
- Methods memory for 9 different procedures
- Media feedback system for ventilation without loss of reagent
- Universal Luer-connection for dry pipes, filters etc.
- Can be battery or socket operated (storage batteries not included in the delivery; please order separately)
- Stepper function for delivery of up to 10 different partial quantities
- Sucking and draining speeds can be set
- 4 languages (G, E, F, S) integrated by default
- Optional system platform for secure standing, please order separately

Technical specifications:

① Automatic titrating burettes

Acc. to Schilling. Made of **PE**, burette made of borosilicate glass 3.3, with Schellbach stripes. No danger of breakage and high chemical resistance. With feet on bottle for enhanced stability. With blue ring graduation, adjusted to "Ex". Press button for precise dosing, fine titration with microscrew and exact spout tip, finest droplets. Graduation corresponds to Class B (tolerances acc. to DIN ISO 385). The burette is a universal helper in laboratories, electroplating applications, water processing stations, sewage plants and in field tests, etc.

Digital burettes

Digital burettes continuous E and RS

By Vitlab. Pulse-free dispensing. Continuous delivery of desired volume without drawing up reserves. Easy and fatigue-free operation of the control elements. Volume dispensed per turn of the handwheels: 2.5 ml (continuous E) or 5.0 ml (continuous RS).

- Specially developed return dosing system for ventilation without loss of reagent
- Power supply with longlife, easy-to-change 1.5 V micro batteries and charge indicator
- Electronics removable as a unit, service friendly modular design
- Dispensing range 0.01 ml to 999.9 ml
- Discharge tube rotatable through 360°
- Vertically and horizontally adjustable discharge tube
- Digital burette with safety valve
- Telescopic suction tube for different bottle sizes from 200 to 350 mm
- Simple calibration program
- Connection for drying tube
- The defined limits of error according to DIN EN ISO 8655-3 are not exceeded even when dispensing partial volumes
- Not suitable for crystallising media

Delivery incl. 1 continuous E or RS digital burette (GL 45 standard thread), 3 PP adapter (GL 32, GL 38, S40), certificate of quality containing test values, 1 telescopic suction tube, 1 discharge tube, 2 1.5 V micro/AAA batteries.

Type	Volume/turn (ml)	Art. No.	Pack Qty.	€

Telescopic suction pipe made of FEP/ETFE, L 200-350 mm	**AA92.1**	1	33,00
Ejection cannula incl. reverse dosing valve	**AA93.1**	1	29,40

▶ Glass bottles see page 32

Titrette®-digital burettes

By Brand. Bottle-top burette for quick and reliable titration. High accuracy provides results within class A accuracy limits to DIN EN ISO 385.

- Smooth-acting gear for accurate trickle titration
- Lightweight and stable thanks to compact design
- Freely rotatable valve block, GL 45 thread
- Titrating tube is horizontally and vertically adjustable for flexible positioning
- Easy to use, no switching over between filling and titrating
- Can be removed for cleaning
- Can be calibrated without tools
- The next calibration due date can be stored
- The current displayed value can be stored with automatic stop
- Adjustable up to 20 ml to three decimal places
- Parts in contact with media are made of borosilicate glass, Al_2O_3, ETFE, PFA, FEP, PTFE, platinum-iridium, PP
- DE-M approved
- **Permissible conditions of use:** temperature +15 to +40 °C, vapour pressure up to max. 500 mbar, viscosity up to 500 mm^2/s
- Optionally available with PC interface

Technical specifications:

Digital burettes opus® titration

By Hirschmann. For motor-driven titration directly from the lab bottle. Microprocessor-controlled piston stroke system guarantees highest accuracy and precise, reproducible results.

- Safe and easy handling via external touchscreen with clearly arranged menu keys; with quick-cal-function for simple calibration of other temperatures or other media
- High media flexibility thanks to highly resistant, inert materials (ECTFE, borosilicate glass 3.3, Hastelloy, FEP, PTFE)
- Media carrying parts are steam sterilisable (121 °C)
- Serial dosing function enables integration in automated process runs
- Methods memory for 9 different titration procedures
- Media feedback system for ventilation without loss of reagent
- Universal Luer-connection for dry pipes, filters etc.
- Can be battery or power operated (storage batteries not included in the delivery; please order separately)
- Possible to choose between volume pre-selection, quick and drop titration
- Sucking and draining speeds can be set
- 4 languages (G, E, F, S) integrated by default

Technical specifications:

Model	10 ml	20 ml	50 ml
Basic unit			
Volume range	0.010 to 99.999 ml	0.10 to 200 ml	1.00 to 500 ml

Information on threads

The thread on a drum is defined, among other things, by diameter (A and B) and thread pitch (C). The values given in the table give a rough indication of the thread type, however this cannot reliably be determined by measuring the thread using a sliding caliper alone. Manufacturer-specific threads are also available in addition to the standard threads. The drum supplier can generally provide information on the thread type.

We will be happy to provide you with information on containers which you purchase through us.

Thread	Diameter excl. thread A (mm)	Diameter incl. thread B (mm)	Thread pitch C (mm)
DIN 38	34.6	36.6	9

Titrator

Digital burettes solarus®

By Hirschmann.

- Sustainable power supply via solar cell, i.e. no batteries, no charging
- Large display, display from 0.01 to 99.99 ml
- 2-button operator guidance
- "Quick-Cal" function for individual calibration
- Bidirectional RS 232 interface
- Valves are easy to replace, valve block rotates freely, thread GL 45
- Handwheels with soft-touch surface
- No reagent loss through return system
- Parts that come into contact with medium are made of highly resistance fluoroplastics: Valve block and housing made of ECTFE, intake and output hose made of FEP
- Media-transporting parts including the output unit steam-sterilisable at 121 °C / 2 bar

Technical specifications:

Volume (ml)	Correctness (≤%)	Variation coefficient (≤%)
10	0.3	0.1
20	0.2	0.1
50	0.2	0.1

Delivery incl. basic unit with A45 screw thread and output unit, 3 thread adapters A32, A38, S40, intake hose (L 310 mm), return hose and quality certificate acc. to DIN EN ISO 8655.

TitroLine® 5000

By SI Analytics. Very easy to use automatic titrator for pH and mV titration: Select saved standard method, connect electrodes and press Start. In just a few minutes, the sample is titrated and the result is displayed on the screen. Result can also be output as a PDF file to USB.

Range of applications:

- Current acid-alkali titration such as acid capacity, nitrogen according to Kjeldahl and total acid in wine and beverages (Set 2)
- Titration of chloride and sodium chloride (salt) in foods such as mustard, cheese, milk, water and other samples (Set 3)
- Current redox titration such as iodine and peroxide value, permanganate index, CSB and other applications (Set 1 + metal combination electrode Pt 62 RG)

Technical specifications:

Dosing attachment		20 ml
Volume indicator		0.000 to 9999.999 ml
Display resolution		0.005 to 0.025 ml
Dosing speed		max. 40 ml/min
Filling time		30 to 999 s (based on cylinder volume)
Dosing accuracy • systematic • random		 0.15% 0.05%
Measuring range/resolution	pH mV °C	-3.00 to 17.00 ±1900 -30 to +115
Accuracy	pH mV °C	±0.05 ±1 ±0.5
Connections	pH/mV °C	DIN 19262 2 x 4 mm Banane (NTC 30 kΩ, PT 1000)
Calibration (for pH)		Automatic 1/2/3 point calibration
Interfaces		2 x RS 232-C, 1 x USB A, 1 x USB B
Dimensions W x H x D (without shaker)		135 x 310 x 205 mm
Power supply		100 to 240 V, 50/60 Hz

Delivery incl. support rod, electrode/burette tip holder, hose kit and titration syringe, test tubes, magnetic stirrer, magnetic stirring rod, screw cap with GL 45 thread, adapter NS 14.5/M8x1, drying tube, USB data cable and mains adapter.

Dosys™ glass syringes

By Socorex. Made of borosilicate glass. Fused brown scale, permanent and easy to read. Precision piston and cylinder can be exchanged. Impervious to fluids. Sterilisable up to 160 °C.
Suitable for: simple infusions, dilutions, sampling, viscous liquids, corrosive reagents, dyes, etc.

Microlitre syringes by HAMILTON

Technical specifications:

Accuracy	≤ ±1 % of nominal volume
Test pressure	0.6 MPa
Working temperature	-10 to +50 °C
Material of body	Borosilicate glass
Tip type 2	**12° grinding**, bent slightly inwards; for piercing septum, in all chromatographic methods.
Tip type 3	**90° grinding, blunt**; for HPLC-applications or for exact dosing e.g. for thin-layer chromatography.

Series 700 MICROLITER®-syringes

By HAMILTON. For dosing liquids. The piston is firmly fixed in the glass body. Needle and piston are made of stainless steel. Needle 51 mm, bent slightly inwards, sealed in wall.

Tip type 2:

Microlitre syringes

Series 7000 MICROLITER®-syringes

By HAMILTON. For dead volume-free dosing of liquids with a very small nominal volume. The stainless steel needle and Wolfram piston are exactly coordinated. Volume dosing takes place in the needle. Needle 70 mm.

Tip type 2:

Microlitre syringes

A variety of models available for different applications.

- Tested up to 3.0 bar liquid pressure
- Calibrated with an accuracy of ±1 %
- Precise and easy to read scale
- Precise workmanship prevents, as far as possible, air bubbles from forming

General instructions for use:
Micolitre syringes should be washed with an organic solvent immediately after use. Drying temperature may not exceed 60 °C. When dry, the syringes should be stored at room temperature.
Never touch the flask with the naked hand!

Microlitre syringes with super-elastic plunger

Cannot be permanently bent. Plunger will return into previous form.

Syringe volume 5 µl

Disposable micro hematocrit capillary tubes

By Marienfeld.
- Made of AR-GLAS®
- CE to IVD 98/79 EG
- Acc. to ISO 12772
- Length: 75 ±0.5 mm, thickness: 0.2 ±0.025 mm
- For centrifuging blood samples
- With or without heparinisation. Sodium-heparin (80 iu/ml ±30 %) applied as a thin, homogeneous film delays coagulation of blood
- Colour-coded end is fire polished to reduce centrifuge wear

With sodium heparinisation

T749.1	2	6,40

ringcaps® micropipetter pipetting aid

By Hirschmann. Manual pipetting aid for disposable capillary pipettes with ring marks (e.g. ringcaps®), with two replaceable adapters for optimal fit to the pipette size. For volumes from 1-200 µl. CE acc. to IVD 98/79 EG.

Art. No.	Pack Qty.	€
AH26.1	1	31,05

Pasteur pipettes/Disposal pipettes

S
A 121 °C

Pasteur pipettes

Made of lime soda clear glass. Hydrolytic class 3. **Sterile** or non sterile. Uniformly shaped. Wall thickness 0.55-0.8 mm.
With neck for cotton stoppers. Autoclavable.

For one-time use in serological and microbiological laboratories.
Also suitable for filling and draining NMR vials.

Without cotton stoppers, non sterile.
With open tip.

DURAN WHEATON KIMBLE
A 121 °C

Pasteur pipettes

Made from borosilicate glass 5.1. For single use in microbiological and serological laboratories. Ideal for distributing aliquot quantities of liquid. Autoclavable.

- In accordance with ISO 7712
- Practically inert borosilicate glass (USP type I neutral glass)
- With neck for cotton stoppers
- Good resistance to temperature variation, suitable for transferring hot liquids
- Excellent chemical resistance to acid and alkaline solutions

Cotton cord for pipettes

100% cotton, degreased. Lightweight design, approx. 13 g/10 m.
Use of cotton stoppers: cotton stoppers can increase the emergence time and thereby affect the accuracy of measurements. The results of tests using pipettes that were stoppered in cotton stopper machines were within the specified limits of error.

Howorka pipetting bulb

Made of natural rubber. Manual pipette controller for Pasteur, graduated and volumetric pipettes for all common pipe diameters. Resistant to the effects of acids, bases, oils and solvents in the short term.

- Easy to operate with a special opening for an immediate sealing effect
- No additional valves or disruptive air cushions
- Almost no limit to the suction volume with multiple repetitions of the suction process
- After suction via the meniscus, the bulb is lifted and the pointer indicates the calibration mark
- Easy to clean
- Individual parts are autoclavable

Applications:

- Pipetting aqueous media, organic solvents and viscous substances
- Filling narrow-necked burettes
- Filling, emptying and cleaning separating columns
- Filling and emptying capillaries
- Filtering through filter tubes

Pipetting aids macro

By Brand.

- For graduated, volumetric and delivery pipettes from 0.1 to 200 ml
- Suction of up to 50 ml in 11 seconds following one-time ventilation
- Single-level operation for sucking and delivering liquid
- Spring-loaded control lever for delicate pipetting
- Blow-out function
- Drip stop via hydrophobic membrane filter (3 µm)
- Membrane filter: PP housing; PTFE membrane
- Fully autoclavable at 121 °C (2 bar) according to DIN EN 285
- Replaceable valve system

Effortless pipetting: The further up the pipette lever is operated, the faster the pipette is filled. To deliver the liquid, move the pipette lever fully downward. Even when flowing freely, the pipette's volume accuracy is not affected.

Delivery incl. spare filter.

Pipette filters

pipetus® junior

By Hirschmann. **Manual pipetting aids** for all standard graduated- and volumetric pipettes from 0.5-100 ml. Easy and safe to use.
Weighs only 115 g. Defined lifting capacity app. 2 ml when full. With hydrophobic PTFE-membrane filter 0.2 µm for integral overflow protection.

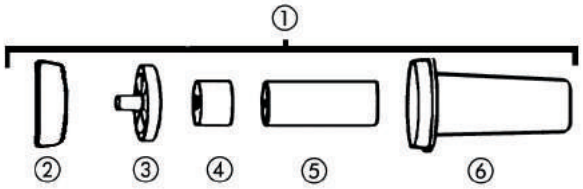
Art. No.	Pack Qty.	€
L468.1	1	139,75

pipetus®

By Hirschmann. **Battery-operated pipetting aid**

- For pasteur-, graduated- and volumetric pipettes with volumes between 0.1 and 200 ml
- Easy-to-read colour display for optical control of all functions
- Permanent rechargeable-battery capacity display
- Preset pipetting mode (EX or Blow-out)
- Display for set pipetting speed (5 speeds available)
- Safety check valve integrated
- Non-stop working capacity up to 1 week
- Audible signal when battery capacity is under 10 %
- Recharging via charging station or directly with battery charger, overload protection
- Pipettor can be sterilized (excluding PTFE-filter) at 121 °C
- Weight 200 g

Delivery incl. 2 sterile round filters, 1 safety valve, power pointcharger and inductive charging station.



Type	Art. No.	Pack Qty.	€
pipetus®	**N472.1**	1	428,95

pipetus® standard

By Hirschmann. **Electric pipetting aids** consisting of ergonomically formed handle, double hose and pump with mains cable. Ideal for all standard pipettes 0.1 to 100 ml. For effective working with EX or Blow-out pipettes. Pipetting speed can be preset directly on the pump.
Built-in safety valve prevents overfilling.
Integral PTFE-membrane filter 0.2 µm and additional high-capacity filter on pump part. Hose length 150 cm. Cable length 140 cm.
Connected load 220 V / 50 Hz / 2 W.

Cordless pipette fillers

accu-jet® *pro*

By Brand. **Battery-operated pipette controller**

- For glass and plastic pipettes from 0.1-200 ml
- Ergonomic design, excellently balanced
- Continuously-adjustable control of the pipetting speed
- Robust, powerful pump for fast filling (50 ml in 10 seconds)
- LED lights up when there are approx. two hours of battery-power left
- 8 hours of continuous pipetting with a 10 ml pipette without recharging
- Corrosion protection through active pressure compensation
- Safety valve / membrane filter against liquid penetration
- Select either gravity-delivery or motorized blow-out as liquid delivery mode
- Weight 190 g

Single-handed operation: select gravity-delivery or motorized blow-out, and adjust the motor speed range with one hand. Pipetting buttons for sensitive control of filling and dispensing rates, especially for lower volume pipettes.

Delivery incl. nickel-metal hybrid battery (230 V/50 Hz), 2 battery compartment covers, wall support, 2 spare membrane filters 0.2 µm, sterile.

RF 3000™ battery operated pipetting aid

Battery operated. Pipette holder made of PP, interchangeable PTFE membrane filter prevents contamination. Autoclavable.

- For glass and plastic pipettes between 1 and 100 ml
- Ergonomically shaped housing for fatigue-free working
- UV-resistant housing material
- 2 pipetting speeds (High or Low Speed)
- Gravity mode, for non-motorised fluid drainage
- 20 h continuous duty, can be used while charging is in progress
- LED-based low battery indicator
- User friendly thanks to concave shaped finger pads
- With labelling space on the side
- Five-coloured pipette holder for distinguishing between apparatus
- Additional pipette adapter for low pipetting volumes
- Weight approx. 200 g.

Delivery incl. power supply (100-240 V, 50/60 Hz), lithium ion battery, 3 spare membrane filters (PTFE 0.45 µm), 5 pipette holders, silicone-adapter, stand and wall mount.

Pipette accessories

Rotilabo®-washing system for pipettes

Made of **HDPE**. Washing system for gentle cleaning of pipettes based on pipetting principle. A complete system consists of a washing unit and/or cleaning vessel and a pipette basket.

All individual components must be ordered separately.
Delivery without tube.

- ① **Washing unit** with draining siphon for automatic water change. Suitable for use with pipette baskets.
- ② **Cleaning vessel** for pre-washing pipettes or brushes with cleaning solution.
- ③ **Pipette baskets** for immersing pipettes in the cleaning vessels or washing units and for transporting the pipettes. Height of basket 300 mm. Optional extension piece is also available which enables the basket (Art. No. Y813.1) length to be extented from 650 to 870 mm.

① Washing unit

① Pipette stand

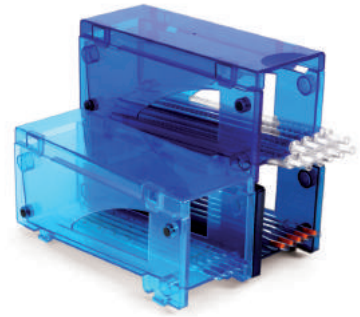
Made of **PP**. 16 spaces: For 8 pipettes up to 8 mm ∅ and 8 pipettes up to 16 mm ∅. Small holes in the base allow the liquid to run out.
Dimensions: L 200 x W 75 x H 150 mm. Autoclavable.

Art. No.	Pack Qty.	€
HX82.1	1	13,80

② Pipette stands with foot

Made of **PP**. 28 spaces: For 18 pipettes up to 10 mm ∅ and 10 pipettes up to 15 mm ∅. Small bore holes in the base allow the liquid do run out.
Top part can also be used separately, please order base with PVC bar separately. The top section of the complete system is height-adjustable.

Type	Art. No.	Pack Qty.	€
Stand top part with 28 spaces, ∅ 175 mm	**HX80.1**	1	25,25
Foot with PVC rod, ∅ foot 230 mm	**HX81.1**	1	16,75



Rotilabo®-pipette stand

Made of **PP**. Rotating. With 94 ports of different ∅ for graduated and bulb pipettes on various sizes with a maximum ∅ of 13 mm. With reinforced base and additional turntable disk to protect pipette tips. Dimensions: H 470 mm, ∅ 230 mm.

Art. No.	Pack Qty.	€
7364.1	1	56,55

▶ For further pipette containers and sterilization containers for pipettes see page 271

Pipette combi rack

Made of **ABS**. For storage of measuring pipettes and serological pipettes under a laminar flow container or fume hood. Racks can be combined horizontally or vertically. Magnets on both sides for mounting the racks to metal walls. Inclined position of pipettes for safe storage; straight lid can be used as additional storage surface.
Dimensions: L 301 x W 100 x H 127.5 mm.
Delivery incl. three pipette racks in matching blue colour tones.

Art. No.	Pack Qty. (set)	€
NA53.1	1	86,25

Rotilabo®-pipette racks

Robust pipette rack with 4 levels for holding graduated pipettes from 0.1 to 25 ml. Dimensions: L 291 x W 88 x H 401 mm.
- Available in two designs: Acrylic glass or ABS
- ABS-pipette racks with additional holders on both long sides for manual pipetting aids and pipette fillers

Version	Colour	Art. No.	Pack Qty.	€
Acrylic glass	colourless	**CX88.1**	1	165,55
ABS	blue	**CX89.1**	1	107,50
ABS	red	**CX90.1**	1	107,50

Rotilabo®-pipette tray

Made of **PVC**, fits most drawers. Divided lengthways into 4 parts.
Dimensions: L 420 x W 300 x H 40 mm.

Art. No.	Pack Qty.	€
7230.1	1	35,30

Stem pipettor Acura® *manual* 810

By Socorex. **Microlitre pipettor for 1:10 dilution**

Air suspension pipettor with two pre-calibrated fixed volumes in one piston stroke enables sequential delivery of 1 and 0.1 ml of same liquid. For more flexibility, the volumes can be used either individually or together for dilution.The metal cone guarantees perfect fit of the long PP stem tips, which is of great advantage when removing samples from narrow vessels, Stomacher® - and other homogenizing bags. The Acura® manual 810 is an ideal alternative to standard graduated pipettors for serial 1:10 dilution in bacteriology.

Stem tips: Made of **PP** (inner-∅ 4 mm), **sterile.**

Protection filters: For protection against intrusion of liquid and any risk of contamination. The protection filters are easy to change and to remove.

Properties:

- Two pre-calibrated fixed volumes - no setting-up required
- Both volumes 1 and 0.1 ml can be calibrated separately from each other
- Simple carrying out of all functions
- Excellent ergonomics, light weight
- The metal shaft enables long stem tips to be used
- Justip™ system for height adjustment of tip ejection
- Simple and faultless ejection of stem tips
- Completely autoclavable at 121 °C
- Replaceable PE protection filter

Technical specifications:

The values were obtained with distilled water at a constant (±0.5 °C) room temperature between 20 and 25 °C, acc. to EN ISO 8655.

Micro-dispensing pipettors Acura® 865

By Socorex. Manual dispensing pipettors for serial dosing in the microliter range.

- Three-way valve enables continuous dosing
- Low weight and ergonomic design for fatigue-free working
- Easy to operate function keys
- Gentle piston stroke activation
- Large volume display window
- The valve unit can be rotated
- Liquid can be supplied from hose, syringe or optionally via the bottle
- Simple calibration system
- With customised serial number and test certificate
- Can be autoclaved fully assembled at 121 °C

Technical specifications:

HandyStep® S

By Brand. Manual multi-dispenser for fast, repetitive dispensing of liquids. The PD-Tips allow volumes of between 2 µl and 5 ml to be dispensed in up to 49 steps with a single filling. HandyStep® S and PD-Tips work on the positive displacement principle. High viscosity, high density and high vapour pressure liquids can be dispensed with extremely high precision. Direct displacement allows contamination-free operation since no aerosols are formed.

Properties:
- Ergonomic design
- Stroke length setting wheel with 9 positions
- Easy tip attachment - the PD-Tips are inserted straight from below
- Safe tip removal at the touch of a button - no need to touch the dispenser tips
- Easy-to-read display, no battery required
- Innovative plastics provide increased resistance to chemicals
- For use with PD-Tips, Combitips®, Combitips® plus, Ritips®, Repet Tips, Encode™ Tips and other compatible tips
- Working temperature range: 15 to 40 °C
- Maintenance free, factory calibrated
- Includes a certificate of quality
- DE-M approved

Technical specifications:

Limits of error referred to the dispensing volume set according to PD-tip size with the instrument, tip, environment and distilled water at a constant temperature of 20 °C and under smooth and steady operation. This test is performed in accordance with DIN EN ISO 8655-5. The nominal capacity ist the maximum volume printed on the PD-tip.

Delivery incl. shelf/rack mount and 3 PD tips: 0.1, 1 and 10 ml.

HandyStep® dispenser pipettes

By Brand. Electronic multi-dispenser, battery-powered.

- Touch operation with intuitive menu navigation and integrated assistance
- Variable volume adjustment between 1.0 µl and 50 ml
- Automatic size recognition for Brand PD-Tips *II*
- Button for automatic tip ejection to avoid contamination
- Compatible with dispenser tips from other manufacturers
- Inductive charging, quick charging via a USB-C port
- One fully charged battery provides many hours of continuous operation
- Long service life thanks to high-quality materials
- Smooth surfaces make cleaning/disinfecting easy
- Languages: German, English, Spanish, French and Chinese

Standard modes: multi-dispensing, auto dispensing, pipetting and favourites.

Delivery incl. universal mains adapter (for Europe, UK, USA, Japan, Australia and New Zealand), wall holder and shelf stand, standard PD-Tips *II*, instructions for use and quality certificate.

S

PD-Tips *II* dispenser tips

By Brand. Material: PP (cylinder), HDPE plunger (0.1 ml made of LCP).

Precision dispenser tips with patented type coding. Work precisely with viscous media or media with a high vapour pressure thanks to the direct displacement principle. Sealing plunger protects the dispenser from aerosols, reducing the risk of contamination and increasing the service life of the devices.

- Volumes from 0.1 ml to 50 ml
- Compatible with different dispensing systems
- Compatible with automatic size recognition: HandyStep® touch, HandyStep® electronic, Gilson® Repetman®, Rainin AutoRep™ E
- Compatible without automatic size recognition: HandyStep® S, HandyStep®, Rainin AutoRep™ S, Rainin AutoRep™ M, Eppendorf® Multipette® 4780 and EDOS® 5221
- Meet the requirements of ISO 8655

Stepper™ 411

By Socorex. For precise serial pipetting.

- 4-finger activation function eliminates thumb fatigue
- Stop mechanism: Self-locking mechanism prevents false delivery
- Dose range: 53 volumes from 10 to 5000 µl
- Only 3 different tip sizes, colour-coded
- Up to 73 doses per filling
- Enables fast work rates, up to 2 doses per second
- Individually calibrated with test certificate

An separate adjustable head of matching colour is available for each tip size; it displays the dosing volume and number for a filled tip.

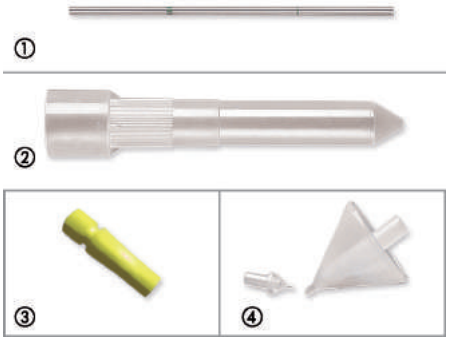
Positive displacement pipettors

Piston pipettors, digital Transferpettor

By Brand. **Positive displacement pipettors for difficult media**

For foaming media (e.g. tenside solutions), high-vapor-pressure media (e.g. alcohols, ether, hydrocarbons), viscous media and high-density media (e.g. concentrated protein solutions, oils, resins, fats, glycerine, mercury, sulphuric acid).

Unlike air displacement pipettes, the Transferpettor piston is in direct contact with the aspirated liquid to be expelled. This principle always provides precise, reproducible results, regardless of the pipetting speed and the ambient conditions. Capillaries and tips can be reused, since the minimal residual wetting is negligible for most applications. Where carry-over is not permitted, such as with infectious or radioactive media, an air displacement pipette with disposable tips should be used.



Range of application:
- Media with densities up to 13.6 g/cm³
- Viscosity up to 140 000 mm²/s (depending on size of apparatus)
- Vapour pressure up to 500 mbar
- Working temperature range 15 to 40 °C

DE-M approved, with Certificate of Quality.

Positive displacement pipettors

S

Positive displacement pipettes MICROMAN® E

By Gilson. Positive displacement system without air cushion between sample and piston prevents contamination as well as aerosol formation and produces precise and reproducible pipetting results. Caps fit straight out of the box, pistons and capillaries lock into place automatically ("QuickSnap System").

For difficult-to-process media, e.g.:
- Viscous media, e.g. oils, glycerol, gel loading buffer
- Media with a high vapour pressure (acetone, hexane or other solvents)
- Sterile media
- PCR/qPCR preparations
- Radioactive media
- Cold/warm solutions

Advantages:
- QuickSnap system for easy handling
- Volume lock for safe pipetting
- Ergonomically designed and comfortable handle
- Lightweight and narrow CP tips for narrow vessels

Conformity certified to DIN EN ISO 8655 with inspection certificate.
CE/IVD approved.

Microlitre pipettors, Roth

Rotilabo®-microlitre pipettors

Robust quality pipettors with variable volume for routine work and demanding applications.

- Ergonomic finger rest for comfortable handling and one-handed operation
- Separate tip eject button
- Central, large pipettor button for smooth piston movement
- Separate volume adjustment, for left and right handed users
- Easy-to-read display
- Integrated calibration function for easy adjustment without tools
- Corrosion-resistant piston and ejector
- Slim shaft
- With certificate of quality
- Completely autoclavable at 121 °C (2 bar) according to DIN EN 285
- A filter for protection of the pipettors is optional with volumes of 5 ml and higher, please order separately

Technical specifications:

Volume (µl)	Accuracy* (%)	Variation coefficient* (%)
0.5-10	10 µl <±1.0	10 µl≤0.5
2-20	20 µl <±0.8	20 µl≤0.4

1000-10 000	10 000 µl <±0.6	10 000 µl≤ 0.2

* Calibrated to deliver ‚Ex'. Error limits are based on the nominal capacity (= maximum volume) indicated on the instrument, obtained with instrument and distilled water at equilibrium with ambient temperature at 20 °C, during smooth, steady operation. The error limits are within the limits of DIN EN ISO 8655-2. A = Accuracy, CV = Coefficient of variation.

Microlitre pipettors, Brand

Microlitre pipettors Transferpette® electronic

By BRAND. Microprocessor-controlled piston pipettors.

- Ergonomic control for easy operation
- Height-adjustable finger rest for optimal position of hand to operating keys
- 5 functions: pipetting, mixing, reverse pipetting, dispensing, gel-electrophoresis mode
- High pipetting speed
- 8-hour continuous pipetting possible
- Ready for use during charging cycle
- Referesh mode for increasing battery life
- Slim pipette shaft enables pipetting in narrow tubes
- Easy Calibration Function - adjusting without tools
- Pipettor shaft is completely autoclavable
- DE-M approved
- With Certificate of Quality
- CE/IVD-compliant

A 121 °C

Microlitre pipettes Transferpette® S

By Brand. Manual positive displacement pipettes for demanding applications.

- In any position: comfortable one-handed operation
- For every hand: ergonomic design
- Central pipetting button and separate ejection function
- One-handed operation for both left and right handers
- Corrosion-resistant piston and ejector
- Fully autoclavable at 121 °C (2 bar), acc. to DIN EN 285
- DE-M approved
- CE mark (IVD)
- Volume change protection
- Multichannel pipettes with freely rotatable pipetting unit (360°)

Transferpette® S, variable:
- 4-digit volume display for maximum precision, always clearly visible
- Featuring Easy Calibration technology for readjustment without special tools

Microlitre pipettors, Gilson

Pipetman® Neo

By Gilson. Infinitely adjustable air cushion pipettor.
Robust, durable, precise and easy to maintain.

- Grease-free sealing system
- Clip tip ejector made of metal for easy dismantling and secure grip
- Multichannel pipettes with patented piston stroke mechanism which eliminates differences in volume between individual channels
- With Certificate of Conformity in accordance with DIN EN ISO 8655 with Test Protocol
- CE-mark in accordance with IVD

Microlitre pipettors, Gilson

Pipetman® G

By Gilson. Variable air-displacement pipette offering one of the lowest pipetting forces on the market. Equipped with a clip ejector made of metal for an easy tip removal (TP74.1 and TP75.1 without tip ejector).
These pipette models are noted for their robustness, accuracy, ease of maintenance and long life.

- Easy dismantling and maintenance
- Despite the low pipetting force, the initial pressure point is easy to feel during pipetting
- P5000G and P10 ml G pipettes come with a protective filter which protects the piston and prevents contamination
- Conformity certified to DIN EN ISO 8655 with inspection certificate
- CE mark to IVD

Microlitre pipettors, Gilson

A 121 °C

Pipetman® L

By Gilson. Lightweight and safe yet robust quality pipette.
Pipette with greatly reduced pipetting forces - increases throughput without compromising on comfort.

- Patented Lock/Unlock System for safe pipetting
- The set volume is locked during the first pipetting operation
- Easy release of the volume adjustment lock
- Ergonomic handle
- Adjustable tip ejector for left- and right-handed users
- Plastic tip ejector (TT03.1 and TT04.1 without tip ejector)
- 2D identification code
- Completely autoclavable

Microlitre pipettors, Socorex

A 121 °C

Acura®-microlitre pipettes *manual* XS 826

By Socorex. Features: see Acura® 825 microlitre pipettes.

Additional features:

- Innovative calibration system (Swift-Set)
- Tamper-proof seal label for protection of the calibrator
- Outstanding ergonomic profile
- Extremely gentle pipetting action, easier on the hands
- Reduced weight (to 83 from 88 g)
- Reduced stem length allows optimised instrument guidance
- Conical stem end for easy access to reaction vessels

Microlitre pipettors, Socorex

121 °C

Micro-/macrolitre pipettors Acura®

By Socorex. Acura® the manual range of pipettors excels for its speedy and reliable volume setting. It possesses all the features typical for the new generation of instruments and offers extremely high pipetting comfort.

- Completely autoclavable
- Lightweight
- Extremely gentle piston activation
- Separate, large tip ejector button
- Easy tip ejection
- Slim pipettor shaft
- All function buttons are easy to operate
- Justip™-tip adjustment-system enables exact adjustment of shaft height
- Innovative and rapid calibration system with integral spanners
- Original serial number and control certificate

Multichannel pipettors:
- Housing can be rotated by 360° for optimal working comfort
- Step-by-step tip ejection

A 121 °C

Air cushion-piston pipettors mLINE®, variable

By Sartorius. mLINE®-one-channel pipettors require very little force for pipetting or tip ejection and are characterized by their extremely low weight.

- Completely autoclavable once the Safe-Cone-filter has been removed.
- Ergonomic design enables fatigue-free operation
- Thermo-insulation of inner components improves accuracy
- Easy-to-read display
- Opti-load tip loading mechanism for simple tip ejection
- The start knob makes automatic Safe-Cone filter ejection possible
- Ergonomically designed bow-shaped finger rest with ID-window for individual marking
- Five different coloured knob covers for colour coding
- Certificate of conformity, with test protocol
- Safe-Cone filter prevents contamination of pipettor and sample material (suitable for pipettes from 10 µl on). Please order separately.

Safe-Cone-Filters

For Sartorius-pipettes from 10 µl. The replaceable filters serve as a barrier against liquid permeation and harmful vapours and therefore also protect the pipettor interior, e.g. against radioactive, biologically dangerous or corrosive samples. They also protect against cross-contamination. The safe-cone-filters should be replaced at regular intervals (after 50-250 pipetting actions) or immediately in the event of overpipetting.

Two models available:

Safe-Cone-Filter Plus for highly demanding applications such as cell culture, bacteriological and virological work and in microbiology.

Safe-Cone-Filter Standard for normal applications to prevent against contamination of the pipettor and the sample material.

Microlitre pipettors, Sartorius

A 121 °C

Microlitre pipettors Proline® Plus, variable

By Sartorius. Suitable for all types of routine laboratory applications. Ergonomic design allows fatigue-free operations and minimizes work effort.

- Fully autoclavable when Safe-Cone filters are removed
- Robust, yet light and easy to use
- Volume setting by click stops, easy-to-read display
- Thermal insulation of inside components for improved accuracy
- Highly resistant to chemicals and UV light
- Multichannel pipettes with Optiload tip loading mechanism
- Compatible with numerous tips
- Long shaft for narrow laboratory tubes
- Easy to clean; no tools required for disassembling
- With calibrating tools for easy self-calibration
- Suitable for both left-handed and right-handed users
- Replaceable Safe-Cone filter to prevent contamination of pipette and sample (for pipettes from 10 µl). Please order separately.
- High-level accuracy and precision according to ISO 8655
- CE/IVD marking
- Individual Certificate of Quality

OneTouch Pro microlitre pipettes

By Sorenson. Air cushion pipettes for routine laboratory work.
Fully compatible with OneTouch pipette tips.
Pipette design matches the colour of the tips to enable quick identification.

- Ergonomic design means the pipettes are comfortable to use
- Smooth tip release
- Quick volume adjustment, even when wearing gloves
- Volume change protection
- Very lightweight to make pipetting extremely comfortable
- UV-resistant body
- Fully autoclavable

Pipette carousels Twister™ universal 336

By Socorex. Made of **PA**, coloured parts made of **PC**. Carousel stand for six pipettes of all well-known brands. 360° axial rotation allows easy access to instruments.

Colour	Art. No.	Pack Qty.	€
blue	**TX62.1**	1	125,45
green	**TX63.1**	1	125,45
orange	**TX64.1**	1	125,45
grey	**TX65.1**	1	125,45
red	**TX66.1**	1	125,45
white	**TX67.1**	1	125,45
yellow	**TX68.1**	1	125,45

Flip & Grip™-pipette carousels

Carousel stands for the most common pipette brands. Holds up to 12 single-channel pipettes (6 on the handle + 6 attached to the pipetting button) or 3 multichannel plus 3 single-channel pipettes. With heavy base for secure positioning on laboratory benchtops. Pipette holder can be bolted upside down under a rack for space-saving storage.
Dimensions: ∅ 332 mm x H 193 mm.

Colour	Art. No.	Pack Qty.	€
blue	**XT82.1**	1	79,30
mint green	**XT83.1**	1	79,30
magenta	**XT84.1**	1	79,30

Pipette carousels

Made of **ABS**. Suitable for all standard models. Holds up to 8 single-channel pipettes or 4 multi-channel pipettes vertically in order to prevent contamination. Custom colour scheme thanks to interchangeable upper sections. Inserts can be removed from the upper level to make space for larger pipettes. Can be cleaned with soap/water and standard laboratory disinfectants.

Delivery incl. white frame, 8 single-colour lower sections and 2 x 8 coloured upper sections and grip. Delivered unassembled.

transparent/sorted (violet, yellow, red, orange, green, grey, transparent, blue)	transparent	**HYP9.1**	1	102,65

Rotilabo®-pipettor stand

Made of acrylic glass. Suitable for all standard pipettors.
Secure and stable stand, breakproof.
Dimensions: W 280 x H 165 x D 80 mm. ∅ of openings 20 mm.

Art. No.	Pack Qty.	€
A804.1	1	104,15

Microlitre pipettors - Accessories

Rotilabo®-pipettor stands

Made of acrylic glass. Suitable for all conventional pipettes with finger support. Rubber feet for stability.

Type	Art. No.	Pack Qty.	€
4 slots	**HEC1.1**	1	41,50
1 slot	**HEC2.1**	1	24,85

Wall holders for microlitre pipettes

Made of **ABS**. For vertical storage of two microlitre pipettes. Suitable for all standard brands, both single-channel pipettes and multi-channel models. For narrow pipettes, the upper part of the pipette holder can be reduced in size using the inserts provided.

Delivery incl. 2 mounting plates together with 6 lower sections (2 x blue, 2 x green, 2 x colourless) and 6 upper sections (2 x blue, 2 x green, 1 x violet, 1 x yellow) which can be used in any combination for fastening the pipettes.
Delivery without mounting material.

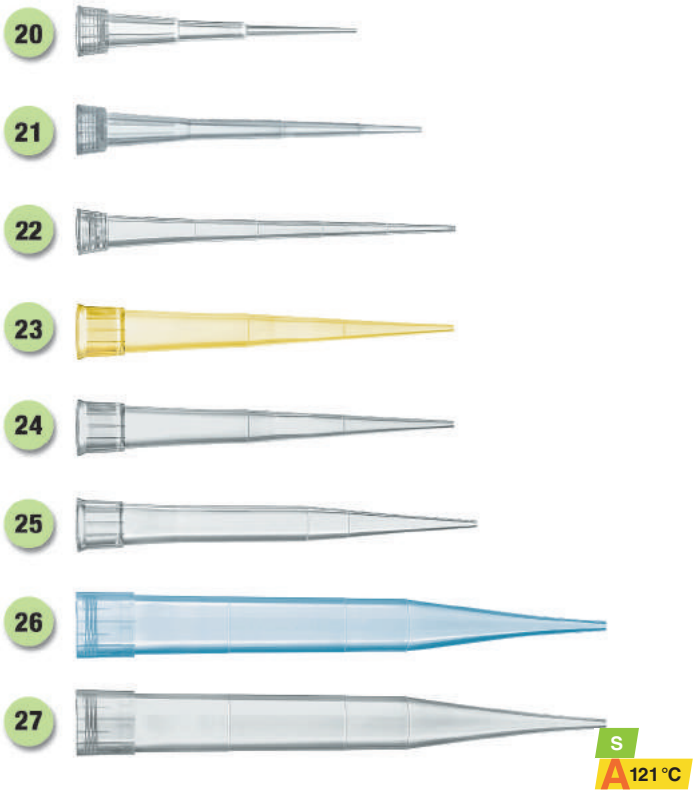
A 121 °C

TipBox 5 ml / 10 ml



By Brand.

- Made of **PP**
- Non-sterile
- Round with lid
- For 5 ml or 10 ml pipettor tips
- Filled with pipettor tips (HL74.1 (17), HL76.1 (19))
- Autoclavable

Art. No.	Pack Qty.	€
HL74.1	1 x 28	44,80
HL76.1	1 x 18	56,35

Pipette tips, Brand

- **Sterile** or non-sterile.
- Produced in a cleanroom environment, automatically palletised and packaged
- High-quality polypropylene types, free of DiHEMDA and Oleamid
- Produced without plasticizer, cadmium-free colour pigments
- Graduated for quick volume identification
- **Palletised tips and filter tips free of DNA, RNases, endotoxins and ATP**
- Sterile tips incl. BIO-CERT® grade packaging: **sterile** in accordance with ISO 11 137 and AAMI guidelines, an SAL of 10^{-6} is guaranteed, with certificate
- Autoclavable at 121 °C (2 bar), acc. to DIN EN 285
- CE marked in acc. with IVD directive 98/79 EC

20 pipette tips Brand 0.1-20 µl

By Brand. Colourless. Length 37 mm. Suitable for Roth, Brand, Eppendorf, Gilson, Finnpipette®, Sartorius. Specially designed for nanoscale applications. CE mark (IVD). Autoclavable.

Ultra Low Retention pipette tips

The surfaces of the Ultra Low Retention tips by Brand are produced through a special, patented physicochemical process. The homogeneous, defect-free surfaces thus produced have extremely low surface tension - over 50 % less than PTFE. This significantly reduces sample loss and provides substantially higher reproducibility when working with critical medias.

- Ideal for biological samples that contain detergents such as Triton® X-100, SDS, Tween etc.
- No additives that can be leached out! No siliconisation of the surface!
- High chemical resistance. Ideal for working with solvents
- Autoclaved at 121 °C (2 bar) without any detrimental effect on material properties

Palletised pipette tips TipRacks

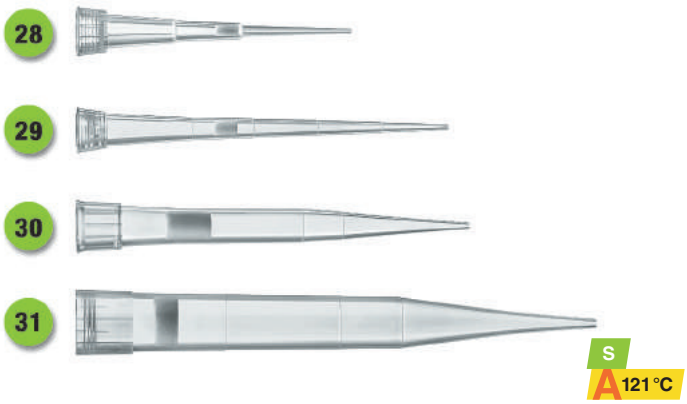
By Brand.
- Palletised pipette tips in refill units (TipRacks)
- Produces less waste than filled TipBoxes
- Tips and filter tips up to 1000 µl, free from DNA, RNase, endotoxins and ATP
- **Delivery incl.** transfer aid for easy transfer in TipBoxes

A 121 °C

TipBox

By Brand.
- Made of **PP**
- With flap-/slip lid
- Stackable
- Available in two different heights
- Low form for 96 tips max. 300 µl (HL65.1 (2), HL68.1 (9))
- Tall form for 100 tips max. 1000 µl or 1250 µl (HL71.1 (15))
- Filled with pipettor tips
- Autoclavable

Art. No.	Pack Qty.	€
HL65.1	5 x 96	48,75
HL68.1	5 x 96	43,35
HL71.1	5 x 96	44,55



Filter tips

Non-self sealing filter tips by Brand have a PE filter that is free from chemical additives. The combination of pore diameter and filter length prevents the passage of aerosols to the tip shaft. The filter reliably serves this function. On the other hand, a liquid can pass very slowly should it accidentally come into contact with the filter.
Since the filter does not swell, the sample can be recovered from the filter by simply actuating the pipette's blow-out function, or by centrifugation if necessary. This is a major advantage when working with valuable samples. An added advantage is that the sample is protected from contamination as the filter contains no additives!

Filter tips, Brand

28 filter tips Brand 0.1-1 µl

By Brand. Colourless. With PE filter. Length 37 mm. Suitable for Roth, Brand, Eppendorf, Gilson, Finnpipette®, Sartorius. Specially designed for nanoscale applications. CE mark (IVD). Autoclavable.

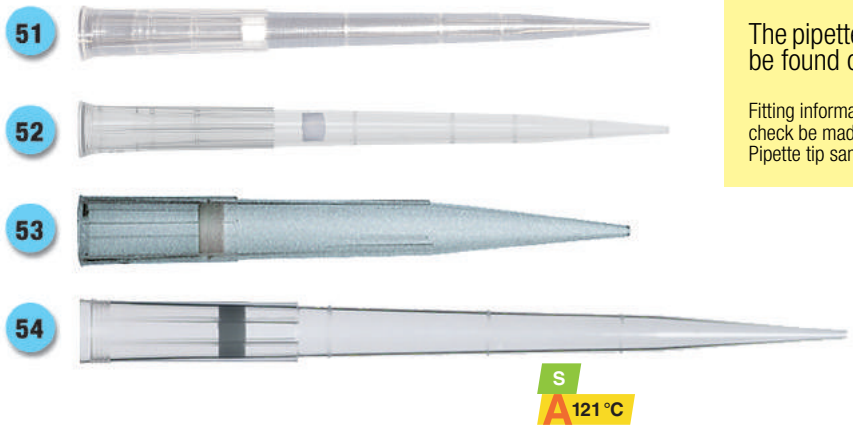
Mµlti®-hinged lid racks



By Sorenson.

- With hinged lid
- Stackable
- Empty, for tips 10/200 µl
- Autoclavable

Art. No.	Pack Qty.	€
T689.1	10	NLA

Filtertips, Sorenson MµltiGuard®-tips

- **Sterile**
- Specially developed **hydrophobic membranes for protection against contamination** from bio-hazardous, toxic or radioactive substances
- Made of completely inert material - to eliminate "incorrect signals" during PCR experiments
- **Free of RNAse/DNAse** and **pyrogens**
- **Free of human DNA** and **PCR inhibitors**
- Autoclavable

51 MµltiGuard® tips 1-300 µl

Colourless, graduated, with aerosol filter. Length 77 mm. Suitable for Brand, Eppendorf, Finnpipette®, Gilson, Sartorius. Autoclavable.

Volume (µl)	Version	Packaging	Art. No.	Pack Qty.	€
1-300	Standard	Racks, **sterile**	**KL03.1**	10 x 96	99,15
1-300	LowBinding	Racks, **sterile**	**KL04.1**	10 x 96	106,65

52 MµltiGuard® tips 1-200 µl

Colourless, graduated. With aerosol filter. Length 77,8 mm. Suitable for Brand, Eppendorf, Finnpipette®, Gilson, Oxford, Roth, Sartorius, Socorex. Autoclavable.

Volume (µl)	Version	Packaging	Art. No.	Pack Qty.	€
1-200	Standard	Racks, **sterile**	**H698.1**	10 x 96	83,55

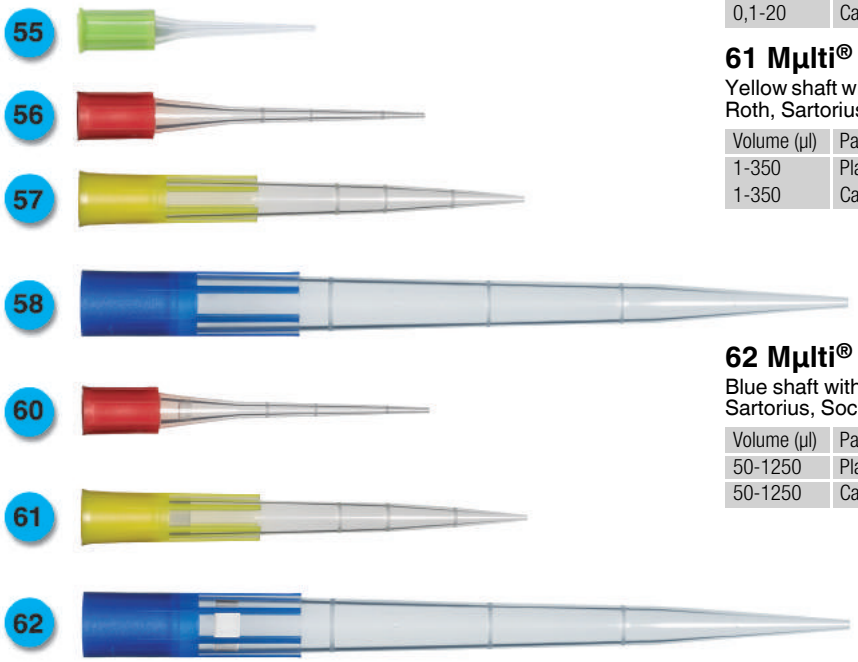
The pipette tip fitting tables for all microlitre pipettor models can be found on pages 451-462.

Fitting information is provided as general recommendations. It is recommended that a check be made by the user.
Pipette tip samples are available on request.

MµltiLowBinding® pipettor tips

- **Surface optimized** through **LowBinding polymer coating** for minimum sample adhesion
- Maximum accuracy on quantitive analysis **minimizes sample loss** and reduces absolute error
- Chemically resistant coating
- Loseless pipetting of DNA, peptides, proteins, highly viscous samples
- Without the use of disruptive silicones



Conventional tip **LowBinding tip**

Pipettor tips, Sorenson MµLti® OneTouch

Only one tip required for numerous pipettor models

- **Sterile** or non-sterile
- **Elastic shaft** made of TPE, rigid body made of PP
- Graduated
- Tips in plastic rack are autoclavable
- **RNase-/DNase-** and **pyrogen-free**
- **Free of human DNA** and **PCR inhibitors**
- With or without **aerosol filter**

S

55 MµLti® OneTouch 0.1-3 µl

Green shaft. Compatible with numerous commonly available pipette models.

Fitting information is provided as general recommendations. It is recommended that a check be made by the user.Pipette tip samples are available on request.

Cell-Saver Tips
Pipettor tips
with large opening

- Made of **PP**
- **Sterile** or non-sterile
- With extra-large opening for the protection of cells
- Suitable for pipetting of suspensions or for viscous liquids
- With or without **aerosol filter**
- **RNase/DNase free**
- **Filter tips free of human DNA, pyrogen free**
- Autoclavable

A 121 °C

69 Cell-Saver 1-200 µl

Colourless. Suitable for Roth, Brand, Eppendorf, Gilson.

Volume (µl)	Packaging	Art. No.	Pack Qty.	€
1-200	bulk-packed (bag), non-sterile	**AEA9.1**	1000	43,75

70 Cell-Saver 100-1000 µl

Colourless, **with aerosol filter**. Suitable for Eppendorf, Finnpipette®, Gilson, Rainin®, Sartorius.

Volume (µl)	Packaging	Art. No.	Pack Qty.	€
100-1000	Racks, **sterile**	**CHC6.1**	6 x 96	103,90

Gel Cutting Tips
Pipette tips
for cloning applications

- **Made of PP**
- For cutting DNA or protein bands out of agarose or SDS-PAGE gels
- Suitable for most commonly available 1000 µl pipettes
- Ideal for precision cutting of protein bands, which can be transferred to a reaction vial using a pipette plunger
- **RNase/DNase free**
- Autoclavable

A 121 °C

in rack, non-sterile	**CHC2.1**	5 x 48	362,30

S

MµIti®-Tip stations

By Sorenson. 5-tier pipettor tip station made of **PP**.
Ideal for loading multichannel pipettors.

- 960 pipettor tips in one MµIti®-Tip station
- Each with 2 x 96 (=192) pipettor tips per tier
- Lid can be placed over half of tier (96 tips) to avoid any risk of contamination
- Made of 100 % recycling plastic
- Space-saving

Models:
- **Sterile** or non-sterile
- MµIti®Precision® quality
- MµltiLowBinding®-pipettor tip quality
- Graduated
- Volume range: 0.1-10 µl and 1-200 µl

S

Microtitration plates BRAND*plates*®

By Brand. Manufactured in accordance with ANSI/SBS standards 1 to 4 - 2004 to ensure compatibility when carrying out manual processes and, in particular, automatic processes.
- 96 well standard format
- Clearly distinguishable by embossed alphanumeric colour code: grey for standard plates, blue for immunology, orange for the cell culture
- **Free of endotoxins, DNase, DNA, RNase, non-cytotoxic**

Microtiter plates pureGrade™ S

Made of transparent **PS**. Untreated surface.
- **Sterile** (individually packed, with cover) or non-sterile
- Chimney shaped 96 well cavities, with alphanumeric labelling
- F profile (flat bottom shape) for precision optical measurements
- Sterile type is ideal for bacteriological assays
- Non-sterile type designed, in particular, for homogeneous assays, screenings and storage

Volume per well (µl)	Type	Art. No.	Pack Qty.	€
350	F-profile, **sterile**	**XT64.1**	50	127,95
350	F-profile, non-sterile	**CNP7.1**	100	105,80

Microtitration plates immunoGrade™

Made of **PS**. For optimal binding of IgG.
- Non-sterile
- Highest binding capacity for molecules with hydrophilic and hydrophobic regions
- Ideal surface for most standard ELISA assays
- Suitable for solid phase immunoassays
- Equivalent to high-binding products from other manufacturers

Volume per well (µl)	Type	Art. No.	Pack Qty.	€
350	transparent, F-bottom	**XT66.1**	100	173,10
330	white, U-bottom	**XT67.1**	100	338,65
330	black, U-bottom	**XT69.1**	100	NLA
330	black, transparent F-bottom	**XT71.1**	100	837,45

Microtitration plates pureGrade™ UV

Made of **UV polymer**, slightly hydrophilised. **PS** frame.
- Non-sterile
- Bottom: UV-transparent film, wall thickness 25 µm
- Transmission at 240 nm is 80 %
- Suitable for the determination of nucleic acid and protein concentrations (at 260 and 280 nm respectively)

Volume per well (µl)	Type	Art. No.	Pack Qty.	€
350	F-bottom	**XT65.1**	50	712,75

Microtitration plates cellGrade™

Made of **PS**.
- **Sterile** (individually packed, with cover)
- Standard plate for cultivating adherent cell cultures
- PS surface with various freely accessible chemical groups, e.g. carboxyl and hydroxyl groups
- Surface is hydrophilic (untreated PS is non-hydrophilic)
- Serum constituents are bound to the free chemical groups which allow indirect adhesion of cells

Volume per well (µl)	Type	Art. No.	Pack Qty.	€
350	transparent, F-bottom	**CNP6.1**	50	148,10
350	white, F-bottom	**XT72.1**	50	270,90
350	black, F-bottom	**XT73.1**	50	270,90

330	black, with transparent F-bottom	**XT75.1**	50	651,45

Microtitration plates, inertGrade™

Made of **PS**.
- **Sterile** (individually packed, with cover)
- Suitable for cultivating suspension cell cultures
- Ideal for cell cultures if cell adhesion is to be avoided
- Optimised surface properties minimise cell binding, protein absorption, enzyme activation and cellular activation
- This allows, for example, premature differentiation of stem cells to be inhibited

Volume per well (µl)	Type	Art. No.	Pack Qty.	€
330	96 well, transparent, U-bottom	**XT76.1**	40	497,75

2	No	4,5	**XT81.1**	50 (5 x 10)	72,35

Overview of microtitration plates BRANDplates®

BRAND*plates*® Microtitration plates in 96 well standard format have a so-called chimney shape. The individual wells are separated from one another by a gap so as to avoid contamination. This, in combination with the condensation rings on the cover, significantly reduces evaporation.

U-bottom
Round bottomed wells. Since the wells do not have corners, this bottom shape is ideal for mixing and washing samples. Applications for this bottom shape include agglutination tests.

F-bottom
Flat bottom shape. F bottom is mainly used for precision optical measurements and is ideal for colorimetric determination, but also for microscopy. F bottom can, for example, also be used in cell culture.

C-bottom
Flat bottom shape with raised corners. C bottom combines the advantages of the U and F bottoms. Raised corners allow much better sample mixing in the wells. The flat bottom in the centre of the wells also allows precision optical measurements to be performed. C bottom is ideal for immunoassays in which optical measurement and thorough sample mixing are key factors influencing the precision of the test result.

Transparent
Transparent plates are ideal for precision optical measurements because of their excellent optical properties. This is why these plates are mainly used for colorimetric assays, but also in cell culture and storage.

White
White pigmented plates are optimised for luminescence measurements.
Due to their white coloration, the plates provide maximum reflection of luminescence signals and minimise well-to-well crosstalk.

Black
Black pigmented plates are optimised for fluorescence measurements.
Due to their black coloration, the plates minimise autofluorescence (even at low wavelengths) and well-to-well crosstalk.

Microtitration plates with transparent bottom
These plates are made of white or black PS and have a transparent bottom made of PS. Generally, these plates are suitable for applications requiring a transparent bottom, such as luminescence and fluorescence measurements. The transparent bottom provides a clear view of the well contents and enables transmitted light measurements to be performed. In addition, the plates can be examined directly under a microscope, which is particularly important for cell-bottomed applications. The white or black pigmented structure of the frame minimises well-to-well crosstalk.

Cell culture plates

Made of **PS**. **Sterile** (Gamma sterilised), individually packed, with cover. Hydrophilic, negatively-charged surface through plasma treatment for uniform cell adhesion and cell growth.

- F profile (flat-shaped base)
- Optically clear for good cell visualisation
- Increased well edge reduces evaporation
- Condensation rings in the lid reduce cross-contamination
- Alphanumeric numbering
- Non-pyrogenic

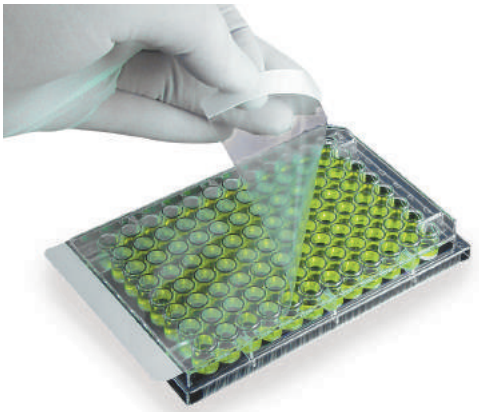
Cover plates for Rotilabo®-microtest plates

Made of **PS**. Prevents contaminations and liquid loss.

Art. No.	Pack Qty.	€
9297.1	100	45,10



6-well macroplates

Made of **PS**. For all bacteriological applications which require a subdivided culture dish. Simple and space-saving alternative to six conventional 35 mm petri dishes.
Dimensions: L 128 x W 85 x H 20 mm.

- Manufactured under aseptic conditions
- With 6 alphanumeric-labelled wells, well ∅ 35 mm
- Working volume 2-5 ml
- Maximum well volume: 15 ml
- Centrifugable to 4500 g
- Temperature stable from -20 to approx. +60 °C

Art. No.	Pack Qty.	€
ATC0.1	100	91,50

Rotilabo®-sealing films for microtest plates

Self-adhesive. **Sterile** or unsterile. Minimizes cross-contamination of samples during handling and transport. With perforated ends for simple and speedy application.

Types 1 and 2
Made of **polyester**. Also suitable for ELISA-plates.
Minimize evaporation. Type 1 can be pierced with a single-channel pipettor.

Type 3
Made of **aluminium-coated paper**. Good diffusion barrier.
Produced under almost germ-free conditions.

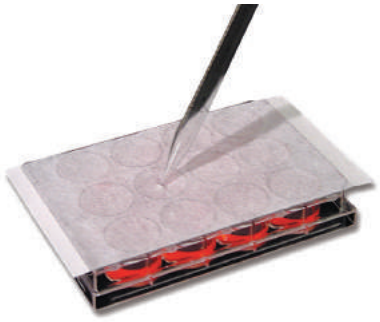
Gas-permeable sealing film



Self-adhesive film, made on a polyurethane base.

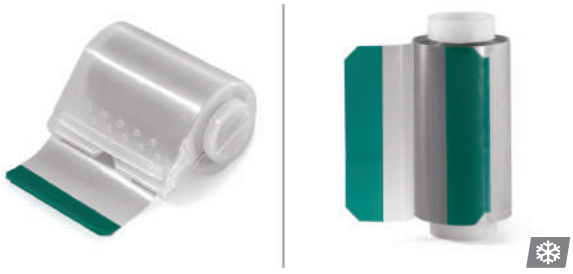
- **Sterile** and non-cytotoxic
- For sealing microtitre plates
- Prevents contamination from cavity to cavity
- Ensures an even exchange of oxygen and carbon dioxide
- Excellent for aerobic cell cultures, biological and immunological cellular preparation and selection, screening, etc.
- Does not inhibit cellular growth or the separation of human fibroblasts
- FDA-tested

Technical specifications:

Thickness	25 µm
Dimensions (L x W)	153 x 78 mm
Temperature-resistant	-80 to +100 °C
Pierceable	yes

Art. No.	Pack Qty.	€
T093.1	100	143,00

Rotilabo®-cling film for cell cultures



Made of **rayon. Sterile** or non-sterile.
Self-adhesive hydrophobic cling film for cell culture and deep well plates.

- Gas-permeable, for a steady exchange of air and carbon dioxide
- Minimises evaporation and cross-contamination
- With perforated ends for simple and speedy application
- Non-cytotoxic

Technical specifications:

Thickness	114 µm
Dimensions (L x W)	142.9 x 82.6 mm
Temperature-resistant	-20 to +80 °C
Pierceable	yes

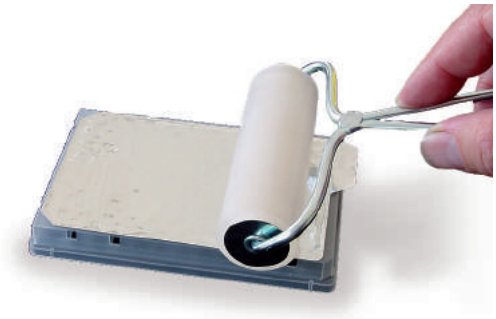
Protective sheets on rolls

Made of polyester, self-adhesive. For sealing micro test plates. Minimises cross-contamination of samples during incubation, transportation and temporary storage. Also suitable for ELISA plates. Without intermediate paper backing, for fast handling. 100 individual sheets per roll.

Technical specifications:



Thickness	38 µm
Dimensions of individual sheet (L x W)	122 x 79 mm
Heat resistant	-40 to +120 °C
Pierceable	no

Art. No.	Pack Qty. (roll)	€
APT6.1	2	109,65

Dispenser for protective sheets on rolls

Made of PP. Handy dispenser for fast dispensing and application of protective sheets on rolls. Dimensions: L 80 x W 105 mm.
Delivery incl. 2 rolls of protective sheets (APT6.1).

Art. No.	Pack Qty.	€
APT7.1	1	117,95

Rotilabo®-sealing roller

Frame made of **metal**, with **rubber** roller. For more effective sealing of microtest-, PCR- and Deep-Well-plates with sealing foil or sealing mats because the roller presses them on more evenly.
Roll width: 100 mm, ∅ roll: 30 mm.

Art. No.	Pack Qty.	€
HE23.1	1	40,45

Riplate® deepwell plates

Made of **PP**. **Sterile** (individually packed) or non-sterile. Suitable for all conventional automation systems, 1 and 2 ml plates suitable for multi-channel pipettes.
Riplate® plus with increased well. Reduction of cross-contamination, enhanced fusing or sealing with adhesive film.
Riplate® medio for sample storage, requires 50 % less storage space due to increased height.
Black plates for light-sensitive applications.

- Alphanumeric well identification
- Includes angled corner for proper orientation
- Stackable
- SBS dimensions
- Optimised base structure minimises specimen losses
- Temperature stable up to -85 °C
- Centrifugable to 3000 x g

Applications: High Throughput Screening (HTS), general analysis necessitating the use of a stock plate; serial dilution; reagent transfer; cell and tissue cultures; specimen storage.

Deepwell plates Riplate® magnetic

Made of **PP**. For cleaning, mixing, centrifuging samples. For storing and preparing substances. For cleaning proteins as well as for DNA extraction via automatic magnet separation. Corresponds to the SBS standard (Society for Biomolecular Screening).

- Resistant to common chemicals. solvents and alcohols
- High stability also when centrifuging
- Cylindrical wells for optimum sample mixing
- Slightly raised rim of the well prevents cross-contamination
- Alphanumeric marking for registering and identifying the samples
- Production under clean room conditions Class 8

Applications:
Developed especially for automatic magnetic separation machines: An automated magnetic separator is often used to purify proteins and to extract DNA. This technology that is based on magnetic particles enables fast and efficient preparation of samples with high throughput. In order to perform this separation process reproducibly in the long-term, precise plastic plates made of ultrapure polypropylene were developed, the Riplate® magnetic. Production under Class 8 clean room conditions ensures the sustainability of these products as well as reliable analysis results.

Suitable for:
KingFisher™ 96 Flex Magnetic Particle Processors.

Autotube racks

Made of **PP**, **sterile** or non-sterile. Ideal for storing, transporting and freezing samples as well as for use in many biological tests, e.g. PCR, radio immunoassays (RIA), enzyme immunoassays (EIA) or cell growth studies. Racks can be removed from their base, e.g. for homogeneous heating of vials in a water bath.

- 1.2 ml vials, made of PP, arranged in microtitration plate format 8 x 12
- Suitable for working with multichannel pipettors
- With alphanumeric marking on outside of rack
- Label inside rack
- Temperature stable up to -90 °C
- Autoclavable

Delivery without cap strips. Please order separately.

Micro Racks

Made of **PP**, with lid. Racks with 96 micro tubes, filled or unfilled.
Tubes are optionally available with a number code on the base or uncoded.
Pressure tested for leak tightness.

Reusable micro racks

- SBS standard micro test plate format (8 x 12)
- For use with micro tubes
- Angled corner on rack for clear positioning of refill unit
- Sides can be labelled, e.g. with a barcode
- Suitable for use in combination with automatic dispensing systems and robots
- Racks are stackable and suitable for stacker systems
- Temperature-resistant up to -80 °C. Autoclavable

S

Rotilabo® cover film for PCR plates

Made of: **PP, polyester** or **aluminium**. Self-adhesive.
Sterile or non-sterile. For sealing PCR plates.

- Suitable for use in thermal cyclers
- Perforated ends make them easy and quick to attach
- **Free from nucleic acid**
- **RNase-/DNase-free**

Technical specifications:

Type	**1**	**2**	**3**	**4**
Properties	Excellent barrier properties, no sample evaporation	For universal use; can be removed without leaving residue; ideal for light-sensitive samples	Easy to use	For universal use; strong adhesive effect; can be removed without leaving residue
Material	Aluminium	Aluminium	PP	Polyester
Thickness µm	36	48	50	50
Dimensions L x W (mm)	146.1 x 82.6	129 x 78.3	135.1 x 79.4	140.5 x 78.3
Temperature stable (°C)	-80 to +120	-80 to +120	-40 to +120	-40 to +125
Pierceable	yes	yes	no	no

Sealing films for RT PCR

Made from optically clear polyester; with strong, non-absorbent and non-fluorescent adhesive.
Suitable for ELISA, real-time qPCR applications and protein crystallisation.
Plastic backing film, easily removable.
Length between perforations: 121.9 mm.
RNase-, DNase- and Nucleic acid-free.

Technical specifications:

Material	Polyester
Thickness	50 µm
Dimensions (L x W)	142.9 x 79.4 mm
Heat resistant	-40 to +120 °C

Art. No.	Pack Qty.	€
APT8.1	100	130,10

Sealing films with special adhesive

Made from optically clear polyolefin; with inert, encapsulated silicone adhesive. The initially non-tacky adhesive is activated by applying pressure to the PCR plate, thus providing a perfectly tight seal, while the area directly above the wells is unchanged. The high optical clarity in these areas ensures reproducible results. Low autofluorescence, suitable for ELISA, quantitative DNA amplification, real-time qPCR applications and protein crystallisation. Length between perforations: 113 mm.
DNase, RNase and DNA free. Resistant to DMSO.

Technical specifications:

Material	Polyolefin
Thickness	50 µm
Dimensions (L x W)	139.7 x 78.6 mm
Heat resistant	-70 to +100 °C

Art. No.	Pack Qty.	€
APT9.1	100	194,60

PCR trays, 24-/48-/384-well

By Brand.
- Made from **PP**, extra-thin, even wall thickness, for optimal heat transfer and short cycle times
- Thin-walled PCR trays for constant, fast and precise heat transfer
- Tubes have smooth and inert inner surfaces to minimise binding of enzymes and nucleic acids
- Wells have raised rims for protection against cross-contamination and reliable sealing with suitable sealing mats
- Suitable for all standard quantitative real-time thermocyclers
- **DNase, DNA and RNase free**
- Autoclavable

24/48/96-well PCR trays

SafeSeal® Tubes

- By Sorenson
- Can be centrifuged up to 25 000 x g
- Highly transparent **PP**
- Graduated at 250 µl
- Etched labelling surface
- Tightly fitting cap
- Flat lid, suitable for labelling
- **LowBinding version:** Surface-optimized with a polymer coating, thereby minimal adhesion of sample
- Colour range: red, blue, green, yellow, lilac
- Temperature stable from -80 to 121 °C
- Autoclavable

- **RNase/DNase-free**
- **Human-DNA-free**
- **PCR-inhibitor-free**
- **Pyrogen-free**

Microcentrifuge tubes

❄❄ A 121 °C

Rotilabo®-microcentrifuge tubes

Made of **PP**. Colourless, temperature stable from -90 to +121 °C, autoclavable. Can be centrifuged up to 17 000 x g.

Image	Volume	Version	Art. No.	Pack Qty.	€
①	250 µl	not graduated	**EA82.1**	1000	60,60
③	500 µl	graduated	**EA83.1**	1000	49,85
④	1,5 ml	graduated	**EA84.1**	1000	56,85
⑤	1,9 ml	graduated	**EA85.1**	1000	73,40

Rotilabo®-microcentrifuge tubes

Made of **LDPE**. Colourless, not graduated.
Temperature stable from -90 to +121 °C

Image	Volume	Art. No.	Pack Qty.	€
②	400 µl	**EA86.1**	1000	63,55

A 121 °C

Microcentrifuge tubes 1.5 ml, without lid

Made of **PP**. Colourless. Volume 1.5 ml. Autoclavable.

- Centrifugable up to 6000 x g at 20 °C, max. 20 min
- With dull finish labelling area on the side
- Outer-∅ x total height: 11 x 39.5 mm

Art. No.	Pack Qty.	€
CK05.2	1000	24,10

❄❄ A 121 °C

Rotilabo®-microcentrifuge tubes, black

Made of **PP**, black. 1.5 ml, graduated. Autoclavable. Temperature stable from -80 to +121 °C. Can be centrifuged up to 15 000 x g.
Ideal for storing light-sensitive samples.

Art. No.	Pack Qty.	€
AA80.1	500	25,05

❄❄ A 121 °C

MµLti®-safety microcentrifuge tubes 2 ml

By Sorenson. Made of **PP**. With special design for alleviating sample removal, particularly during DNA-/RNA-centrifugation.

- Flat lid with piercing zone for syringes
- Can be centrifuged up to 15 000 x g
- Temperature stable from -80 to +121 °C
- Flat lid and rough surface for easy marking of tubes
- **DNase-/RNase-free**
- Autoclavable

Art. No.	Pack Qty.	€
E708.1	1000	55,05

❄ A 121 °C

Microcentrifuge tubes 2 ml

By Brand. Made of **PP**. Volume 2 ml, graduated.

- Centrifugable up to 20 000 x g at 20 °C, max. 20 min
- With dull finish labelling area on the side
- The lid membrane, which is approx. 0.3 mm thick throughout, can be pierced by the analyzer
- **Free of RNase, DNase, DNA and endotoxins**
- Autoclavable

Colour	Art. No.	Pack Qty.	€
colourless	**CK06.1**	500	32,30

Microcentrifuge tubes

Safety reaction tubes 5 ml

Made of **PP. Sterile** (packed individually) or non-sterile.

- Tight closing seal
- Graduated
- Labelling space on side of vessel and lid
- Centrifugable to 21 000 x g
- Temperature stable from -80 to +100 °C
- **RNase, DNase/human DNA free**
- **PCR Inhibitor-free, ATP-free**
- **Free of pyrogenics**
- **CE/IVD-compliant**

Colour	Version	Art. No.	Pack Qty.	€
colourless	**sterile**	**HNY1.1**	50 (50 x 1)	65,60
colourless	non-sterile	**HNY2.1**	100	20,40

Rotilabo®-microcentrifuge tubes 5 ml

Made of **PP**, graduated. Autoclavable.

- Leak-tight closure
- Labelling space on side of vessel and lid
- Centrifugable to 5000 g
- Temperature resistant in the range -80 to 121 °C
- Vessel-∅ 15 (incl. rim 18 mm) x H 60 mm

Colour	Art. No.	Pack Qty.	€
colourless	**PE68.1**	250	50,30
black	**PE69.1**	250	50,30

5 ml reaction vials

Made of **PP**. **Sterile** or non-sterile. Autoclavable.

- Easy to open lock for simple handling
- Labelling space on side of vessel and lid
- Centrifugable to 5000 g
- **RNase-/DNase free, pyrogen-free**
- Vial ∅ 15 mm (incl. edge 18 mm) x H 61 mm
- Temperature stable from -90 to +121 °C

Colour	Version	Art. No.	Pack Qty.	€

Rotilabo®-sealing clips

For microcentrifuge tubes. Safe closure of vessels during boiling or freezing. With grip end for easy loading and removal of tubes. Reusable. Assorted colours.

For containers	Art. No.	Pack Qty.	€
0,5 ml	**N216.1**	100	42,95
1,5 / 2 ml	**N217.1**	100	42,95

SnapTwist™-reaction vials

Made of **PP**. **RNase, DNase, DNA and pyrogen free.** Autoclavable.
- **Timesaving closure:** just press to safely seal vial, twist just a ¼ turn to open.
- With clear polished surface
- Leak-proof lip seal on closure
- Conical reaction vials are centrifugable up to 20 000 x g
- Temperature stable from -90 to +100 °C

Vials with fitted screw cap, sterile

Rotilabo®-microcentrifuge tube openers

Opens and closes 0.2- to 2.2-ml-tubes. The opener only touches the outer edge of the lid thereby reducing the risk of contamination. Assorted colours.

Art. No.	Pack Qty.	€
AA94.1	10	16,10

Screw cap tubes, brown

Made of **PP**. Autoclavable.
- Volume 0.5 / 1.5 / 2.0 ml
- Brown screw cap tubes for storage of light-sensitive samples
- Temperature stable from -196 to 121 °C
- Conical micro-centrifuge tubes can be centrifuged up to 20 000 x g
- **RNase-/DNase-/DNA- and pyrogen free**
- Screw-on lid made of PP with silicone sealing
- Only 1¼ turns needed for speedy opening and closing of lid
- Lid inserts are also available for easy identification (see CK72.1 ff.)

Delivery without lids, please order separately!

Screw Cap tubes

Reation vials with septum screw cap

Made of **PP**. With hang-on (PP) screw lid with silicone seal.
Sterile or non-sterile. Autoclavable.

- Volume: 0.5 / 1.5 / 2.0 ml
- Clear, optionally available with subdivisions and labelling space
- Only 1¼ turns are needed for speedy opening and closing of the lid
- Temperature stable from -196 to +121 °C
- Outer-∅ x total height: 13 x 47 mm
- Conical micro-centrifuge tubes can be centrifuged up to 20 000 x g
- Lid inserts are also available for easy identification (see CK72.1 ff.)
- **RNase-/DNase-/DNA- and pyrogen free**

Reaction vials with septum screw cap

By Sarstedt. Made from transparent **PP**.
Unscrewed closure attached with O-ring seal made of EPDM.

- With knurling, for single-handed insertion into suitable stands
- Without graduation and labelling field
- Centrifuges up to 20 000 x g
- In accordance with IATA requirements
- Autoclavable

Screw Cap tubes

Reaction vials with screw cap

Made of **PP**. **Sterile** or non sterile. Ideal for storage in freezers, applications in a boiling water bath or for centrifuging. Tight sealing due to combination of lip seal and silicone ring in cap. Single-handed opening in suitable racks (e.g. AEN2.1ff) through longitudinal grooves on the upper edge and locking system on self-standing vials.

- With graduations and large labelling space
- Quick opening and closing with only 1 1/4 turns of cap
- Conical vials, centrifugable up to 20 000 x g
- Thick-walled for high stability
- Excellent visual clarity
- Outer Ø x overall height: 13 x 47 mm
- **RNase/DNase/DNA and pyrogen free**
- Temperature stable from -196 to +121 °C
- Autoclavable

Screw caps with septum

Made of **PP**. Tight sealing due to integrated PTFE/silicone septum.
Easy to pierce with pipette tips or cannulas. Suitable for vials AEK4.1ff.

Art. No.	Pack Qty.	€
AEK7.1	250	121,80

True North® cryo vials

Made of **PP**. **Sterile.** Lid and vessel with identical ∅ (13 mm), therefore also suitable for 10 x 10 cryo box format. Suitable for storage in deep freezers or liquid nitrogen (gas phase). Temperature stable from -196 to +121 °C. Autoclavable.

- Lid with external thread and silicon seal
- With labelling space and graduations
- **RNase/DNase-free, non-pyrogenic and non-cytotoxic**

Volume (ml)	Type	Length (mm)	Art. No.	Pack Qty.	€
2	Sorted (lid colour blue, red, green, violet, grey)	49	**TP67.1**	500 (10 x 50)	167,70
2	transparent	49	**XT57.1**	500 (10 x 50)	167,70

Screw Cap tubes

Cryogenic vials

Made of **PP**. **Sterile** (gamma-sterilised). ∅ 12.5 mm. Autoclavable. Suitable for the storage of cell cultures, sera, blood components, bacteriological cultures and other liquids at low temperatures in fridges or nitrogen tanks. Temperature stable up to -196 °C (suitable for storing samples in the liquid nitrogen gas phase).

- **RNase/DNase/DNA and pyrogen free**
- Vertical strip => easy-grip cap
- 1¼ turn closure => fast opening and closing
- **White labelling space** and coloured cap inserts => easy sample identification (please order cap inserts separately)
- Freestanding vessels with thread on base => **suitable for single-handed use** in racks with locking system
- Cap and vessel made from same material (PP) => **uniform expansion of contents**, no danger of explosion
- High transparency => **sample is easily visible**
- Round inside bottom => contents **can be completely drained**

With internal thread and silicone seal

Takes up little storage space.
Vials with round bottom centrifugable up to 17 000 x g

Screw Cap tubes

Cryo tubes Cryo.s™

By Greiner Bio-One. Made of transparent **PP**, USP class VI-certified. **Sterile**. Temperature stable from -196 to +121 °C.

- For sample storage at -20 °C, -80 °C and in the gas phase above LN_2
- Suitable for shipping via air freight
- With white, scratch-resistant label field
- CE mark (CE/IVD)
  Free of detectable DNase, RNase and human DNA
  Free of detectable endotoxins, free of zytotoxic substances
- Free of heavy metals
- Colour of screw cap: natural

Delivery incl. 150 (volume 1-2 ml) and/or 100 (volume 5 ml) cap inserts for additional marking of the closures.

Laboratory markers

By edding. Suitable for fine, precise labelling of smooth and transparent surfaces, such as slides, reaction vials, Petri and laboratory dishes.

- Colour black
- Extremely fast-drying, abrasion and light-resistant
- Waterproof, odourless ink
- Permanent on plastic
- Removable from glass with acetone, ethanol, isopropanol and methyl ethyl ketone
- Temperature stable up to -183 °C
- Heat resistant up to +500 °C (on aluminium)

Type	Version	Line width (mm)	Art. No.	Pack Qty.	€
8014	Round tip, fine	1	**HPE1.1**	10	28,35
8015F	Round tip, extra fine	0,75	**HPE2.1**	10	28,35

Cryo-labels on sheets

Made with acrylate. Sticks to plastic, glass or metal without drying out or peeling off. Glass and metal surfaces must be completely free of grease. Can also be used in boiling water baths, in refrigerators, under cryo-conditions (liquid nitrogen). Temperature stable from **-196 to +100 °C**. Can be removed without leaving any traces.
Sheets are printable with a laser printer.

Sheet size (US-Letter) 21.6 x 27.9 cm.

Laboratory markers

By Marienfeld. Permanent marker suitable for nearly all surfaces made of glass, plastic and paper. Suitable for indelible labelling of microscope slides, embedding cassettes and Petri dishes.

- Ultrafine tip
- High-contrast black ink
- Writes without pretreatment of surfaces
- Waterproof, resistant to most laboratory chemicals
- Odourless
- Non-toxic
- Non-dry, long-lasting

Syringe filters

Rotilabo®-syringe filters, unsterile

With hydrophilic or hydrophobic membranes.

Hydrophilic membrane: Polyethersulfone (PES)
For removing finest particles from **aqueous** solutions.

Hydrophilic membrane: Cellulose mixed ester (CME = Cellulose acetate and -nitrate)
For clear filtration of **aqueous** solutions.

Hydrophilic membrane: Polyvinylidene fluoride (PVDF)
For clear filtration of **aqueous and slightly organic** solutions.

Hydrophilic membrane: Nylon
For clear filtration of **aqueous and organic** solutions.

Hydrophobic membrane: Polytetrafluoroethylene (PTFE)
For clear filtration of **organic** solutions and for air filtration.

Syringe filters

Rotilabo®-syringe filters, PP or PC

With pressure and chemical resistant casings made of PP or PC.
Sterile (individually packed) or non-sterile.

Regenerated cellulose (RC)
Hydrophilic membrane with low non-specific protein adsorption (<10 µg/cm²). For filtration of biological solutions as well as sample preparation and degassing of eluants for HPLC. Good resistance to aqueous and organic solutions.

Polytetrafluoroethylene (PTFE)
Hydrophobic membrane for filtration of aggressive chemicals, acids and nonpolar solvents. Low resistance to gas flow allows applications in air and gas filtration (e.g. for ventilation tasks and sterile gas exchange).

Polyvinyl difluoride (PVDF)
Slightly hydrophobic membrane for clear and sterile filtration of organic and partially organic solutions. Protein adsorption 125 µg/cm².

Polyamide (Nylon)
For filtration of HPLC and GC solvents as well as for the clarification and sterile filtration of aqueous, alkaline and organic solutions. Hydrophilic, resistant to many solvents. High mechanical stability.

Polypropylene (PP)
Low-hydrophobic all-round membrane for aqueous and organic media.

Polyether sulfone (PES)
Hydrophilic membrane with low protein binding (< 20 µg/cm²) and high flow rates. Suitable for aqueous and partially organic media, e.g. for biological sample preparation.

Cellulose ester composite (CME)
Hydrophilic membrane with high non-specific adsorption capacity for preparation of aqueous media samples and for separation of microbiological substances (bacteria, fungi, etc.).

Cellulose acetate (CA)
Hydrophilic membrane with very low protein adsorption (3.8 µg/cm²) for biological samples (e.g. enzyme solutions, biological macromolecules) as well as for clear and sterile filtration of aqueous solutions.

Technical specifications:

Rotilabo®-syringe filters Mini-Tip

Non-sterile, 15 mm, housing made of PP, ultrasonic welded, colourless.
Ideally suited for HPLC-samples. The Mini-Tip opening is ideal for filtering in very small sample containers or vials.

Regenerated cellulose (RC)
Hydrophilic membrane with low non-specific protein adsorption (<10 µg/cm²). For filtration of biological solutions as well as sample preparation and degassing of eluants for HPLC.
Good resistance to aqueous and organic solutions.

Polytetrafluoroethylene (PTFE)
Hydrophobic membrane for filtration of aggressive chemicals, acids and nonpolar solvents. Low resistance to gas flow allows applications in air and gas filtration (e.g. for ventilation tasks and sterile gas exchange).

Polyvinyl difluoride (PVDF)
Slightly hydrophobic membrane for clear and sterile filtration of organic and partially organic solutions. Protein adsorption 125 µg/cm².

Polyamide (Nylon)
For filtration of HPLC and GC solvents as well as for the clarification and sterile filtration of aqueous, alkaline and organic solutions.
Hydrophilic, resistant to many solvents. High mechanical stability.

Cellulose acetate (CA)
Hydrophilic membrane with very low protein adsorption (3.8 µg/cm²) for biological samples (e.g. enzyme solutions, biological macromolecules) as well as for clear and sterile filtration of aqueous solutions.

A 121 °C

Cameo™ syringe filters

Non-sterile.

Nylon
Hydrophilic. Good chemical resistance, very low extractable substances content. For the filtration of organic solvents, for HPLC sample preparation and for sterile and clear filtration of biological media.
High protein binding (approx. 120 µg/cm²).

Cellulose acetate (CA)
Hydrophilic. Very low protein binding (approx. 3.8 µg/cm²). For sterile filtration of biological media (proteins, enzymes, buffer, cell culture etc.), as well as for particle extraction from aqueous and alcohol-based solutions.

PTFE
Hydrophobic. Excellent chemical resistance.
For filtration of aggressive substances, solvent, gases and aerosols.

S

Millex®-filter units 33 mm

By MERCK MILLIPORE.

CE-certified, sterile (individually packed).

Mixed Cellulose Ester (MCE) membrane
- Application: 0.2 µm filter units for the sterilisation of aqueous solutions, large pore sizes for prefiltration and clear filtration
- Colour code: blue
- Working capacity: max. 100 ml

Durapore® membrane (hydrophilic PVDF)
- Application: sterilisation of aqueous and protein solutions, syringe filter with lowest protein binding ratio
- Colour code: yellow
- Working capacity: max. 100 ml

Millipore Express® membrane (PES)
- Application: sterilisation of tissue culture media and additives, buffers, protein solutions, virus suspensions, DNA and other aqueous solutions
- Colour code: green
- Working capacity: max. 200 ml

Technical specifications:

Membrane ∅	33 mm
Type	**sterile** (individually packed)
Housing material	Modify acrylic
Dead volume	<100 µl
Filtration surface area	4.5 cm^2
Max. inlet pressure	10 bar
Max. working temperature	45 °C
Inlet connection	Luer-Lock
Outlet connection	Luer

Type	Pore size (µm)	Membrane material	Art. No.	Pack Qty.	€
Millex®-GS	0.22	MCE	**XC55.1**	50	204,25
Millex®-HA	0.45	MCE	**XC56.1**	50	208,55
Millex®-AA	0.8	MCE	**XC57.1**	50	207,50
Millex®-VV	0.1	PVDF	**XC58.1**	50	247,25

Millex®-HP	0.45	PES	**XE79.1**	50	225,75

CHROMAFIL® syringe filters

By Macherey-Nagel.

- For clear or sterile filtration of liquids or gases, as well as for preparation of samples for use in HPLC, GC, ICP, AAS, TOC, DOC, IR, NMR, photometry, spectroscopy, etc.
- Compacted **PP** housing with very low extractable substances content and good chemical resistance.
- Autoclavable at 121 °C and 1.1 bar for 30 min.

Technical specifications:

Membrane ∅ (mm)	**3**	**15**	**25**
Outer ∅ (mm)	approx. 6	approx. 25	approx. 30
Sample volume (ml)	≤1	1-5	5-100
Dead capacity (µl)	approx. 5	approx. 35	approx. 80
Max. inlet pressure (bar)	CHROMAFIL®: 6; CHROMAFIL® Xtra: 12		
Max. operating temperature (°C)	55		
Filtration area (cm^2)	approx. 0.07	approx. 1.6	approx. 4.9
Connection	Luer lock inlet/Luer or Mini-Spike outlet (MS)		

S A 121 °C

CHROMAFIL® CA and CA Xtra

By Macherey-Nagel. Hydrophilic cellulose acetate membrane for filtration of aqueous solutions. Ideal for use with biological macromolecules, water soluble oligomers and polymers.
Extremely low protein binding capacity (21 µg per 25-mm filter).

CA, non-sterile

Type	Pore size (µm)	Membrane ∅ (mm)	Art. No.	Pack Qty.	€
CA-20/25	0.20	25	**XH38.1**	100	122,00

MV-45/25	0.45	25	**XH52.2**	400	488,00

CHROMAFIL® PVDF and PVDF Xtra

By Macherey-Nagel. Hydrophilic PVDF membrane for polar and nonpolar solutions, water soluble oligomers, proteins and other polymers. Protein binding capacity: 82 µg per 25-mm filter. Non-sterile.

PVDF

Type	Pore size (µm)	Membrane ∅ (mm)	Art. No.	Pack Qty.	€
PVDF-20/15 MS	0.20	15	**XH69.1**	100	122,00
PVDF-45/15 MS	0.45	15	**XH70.1**	100	122,00

PVDF Xtra

Uncoloured, low bleed 100 % PP housing for method validation and certification. Imprint for quick and easy identification of membrane type, diameter and pore size.

Type	Pore size (µm)	Membrane ∅ (mm)	Art. No.	Pack Qty.	€
Xtra PVDF-20/25	0.20	25	**XH71.1**	100	122,00
Xtra PVDF-45/25	0.45	25	**XH72.1**	100	122,00

Syringe filters

121 °C

CHROMAFIL® PES Xtra

By Macherey-Nagel. Hydrophilic PES membrane for aqueous and slightly organic solutions. Very low adsorption of proteins, good resistance to acids and bases. Protein binding capacity: 29 µg per 25-mm filter.
Uncoloured, low bleed 100 % PP housing for method validation and certification. Imprint for quick and easy identification of membrane type, diameter and pore size. Non-sterile.

Type	Pore size (µm)	Membrane Ø (mm)	Art. No.	Pack Qty.	€
PES-20/25	0.20	25	**XH73.1**	100	122,00
PES-20/25	0.20	25	**XH73.2**	400	488,00
PES-45/25	0.45	25	**XH74.1**	100	122,00
PES-45/25	0.45	25	**XH74.2**	400	488,00
PES-500/25	5.0	25	**XH75.1**	100	122,00
PES-500/25	5.0	25	**XH75.2**	400	488,00

CHROMAFIL® PET and PET Xtra

By Macherey-Nagel. Hydrophilic PET all-round membrane for polar and nonpolar solutions. Ideal for filtering eluents from water and organic solvents for HPLC and for the preparation of samples for TOC/DOC determination.
Non-cytotoxic, does not inhibit the growth of micro-organisms and higher eucaryotic cells. Non-sterile.

PET

Type	Pore size (µm)	Membrane Ø (mm)	Art. No.	Pack Qty.	€
PET-20/15 MS	0.20	15	**P300.1**	100	122,00
PET-45/15 MS	0.45	15	**P301.1**	100	122,00
PET-20/25	0.20	25	**P298.1**	100	122,00
PET-20/25	0.20	25	**P298.2**	400	488,00
PET-45/25	0.45	25	**P299.1**	100	122,00
PET-45/25	0.45	25	**P299.2**	400	488,00

PET Xtra

Uncoloured, low bleed 100 % PP housing for method validation and certification. Imprint for quick and easy identification of membrane type, diameter and pore size.

Type	Pore size (µm)	Membrane Ø (mm)	Art. No.	Pack Qty.	€
PET-20/25	0.20	25	**XH76.1**	100	122,00
PET-20/25	0.20	25	**XH76.2**	400	488,00
PET-45/25	0.45	25	**XH77.1**	100	122,00
PET-45/25	0.45	25	**XH77.2**	400	488,00

CHROMAFIL® GF/PET

By Macherey-Nagel. Hydrophilic PET all-round membrane for polar and nonpolar solutions. Ideal for filtering eluents from water and organic solvents.
Recommended for solutions with a high suspended matter load or high viscosity solutions; the glass-fibre membrane removes coarse particulate matter and prevents clogging of the membrane. This improves filtration efficiency, increases filtrate yield and aids clarification of solutions with a high particulate matter load. Non-sterile.

Type	Pore size (µm)	Membrane Ø (mm)	Art. No.	Pack Qty.	€
GF/PET-20/25	1.0/0.20	25	**EE78.1**	100	154,00
GF/PET-45/25	1.0/0.45	25	**EE79.1**	100	154,00

121 °C

CHROMAFIL® Nylon PA and PA Xtra

By Macherey-Nagel. PA (nylon) membrane for the filtration of medium polar organic-aqueous liquids. Non-sterile.

A 121 °C

Millex®-PTFE-filter units

By MERCK MILLIPORE. For sterile filtration of gases, sterile venting of containers and for sterilisation and clear filtration of organic solutions. Also suitable for preventing ingress of fluid contamination in following pumps an other instruments.

Technical specifications:

Version	**non-sterile**
Housing material	PP
Membrane	PTFE
Filtration surface	19.6 cm^2
Max. temperature	121 °C
Max. pressure	4 bar
Input and output connection	graded hose connection (∅ 6-13 mm) with Luer-cone inside

Type	Pore size (µm)	Membrane ∅ (mm)	Art. No.	Pack Qty.	€
Millex®-FG	0,22	50	**CY06.1**	10	152,65
Millex®-FH	0,45	50	**CY07.1**	10	152,65
Millex®-FA	1,0	50	**CY08.1**	10	152,65

Millex®-fibre-glass filter units

By MERCK MILLIPORE. Ideal for prefiltrering difficult-to-filter solutions and liquids with high particle densities. Protects downstream membranes from rapid blocking. Retention range ca. 2,0 µm.

Technical specifications:

Membrane-∅	**25 mm**	**50 mm**
Model	**unsterile**	
Filtration volume (ml)	100	4000
Housing material	PVC	
Membrane	Fibre-glass	
Filtration surface (cm^2)	3.9	19.6
Dead volume (µl)	<100	<1000
Max. working temperature (°C)	45	
Max. pressure (bar)	5	4.1
Input connection	female Luer-Lock inside	graded hose connection with Luer-cone inside
Output connection	male Luer-cone outside	graded hose connection (∅ 6-13 mm) with Luer-cone inside

Type	Membrane ∅ (mm)	Art. No.	Pack Qty.	€
Millex®-AP	25	**CY09.1**	50	125,80
Millex®-AP	50	**CY10.1**	10	70,95

Millex®-HPF filter units

By MERCK MILLIPORE.
For clear filtration of solutions with a high particle load prior to instrument based assay.

- With graduated glass fibre prefilter (10.0 to 0.7 µm)
- Two to four times the throughput of syringe filters without a prefilter
- Polyethylene housing with a low extractable substances content

Hydrophilic nylon membrane
- With glass fibre prefilter for clear filtration of aqueous and slightly organic solutions with a high particle load

Durapore® membrane (hydrophilic PVDF)
- Very low protein binding
- With glass fibre prefilter for clear filtration of protein solutions with a high particle load

Hydrophilic PTFE membrane
- Low protein binding
- With glass fibre prefilter for clear filtration of aqueous and organic solutions with a high particle load

Technical specifications:

Membrane ∅	**25 mm**
Type	**non-sterile**
Housing material	HDPE
Specimen volume	up to 100 ml
Dead volume	< 250 µl
Filtration surface area	3.9 cm^2
Max. inlet pressure	7 bar
Max. working temperature	45 °C
Inlet connection	Luer-Lock
Outlet connection	Luer

Type	Pore size (µm)	Membrane material	Art. No.	Pack Qty.	€
Millex®-GN	0,2	Nylon	**XE30.1**	50	208,55

Millex®-GP with filling cone	50	4	0,22	**CY12.1**	10	173,10

Filter units

S

Sterivex™-filter units

By MERCK MILLIPORE. For sterile filtration of aqueous liquids for volumes up to 1 or 2 l. Filter units can be operated with syringes or hose pumps. Filling cone optional, to reduce the risk of contamination.

Technical specifications:

Model	**sterile** (gamma sterilised)
Housing material	Eastar®
Filtration surface	10 cm^2
Dead volume	< 200 µl after emptying with air
Max. temperature	45 °C
Max. pressure	3 bar
Input connection	female Luer-Lock
Output connection	with or without filling cone (male Luer-Lock)

Durapore® (PVDF) membrane with extremely low protein binding, filtration volume 1 l.

Type	Pore size (µm)	Art. No.	Pack Qty.	€
Sterivex™-GV with filling cone	0,22	**CT79.1**	10	160,20

S

Steripak™-filter units

By MERCK MILLIPORE. **For sterile filtration of volumes up to 20 l.** With Millipore Express® (PES) membranes with high rates of flow and low protein binding. **Sterile** and ready-to-use in operations with hose pumps or pressure chambers.

- The filling cone on the output side of unit makes the sterilisation process safer
- Manual air vent prevent air blocking of membrane
- For sterile filtration of tissue culture media, buffers and other aqueous solutions

Technical specifications:

Version	**sterile**
Housing material	SAN
Membrane	PES (hydrophilic polyether sulfone)
∅	76 mm
Dead volume	< 2700 µl after emptying with air
Max. temperature	45 °C
Max. pressure	5.2 bar (in direction of flow)
Input connection	graded hose connection (∅ 6-8 mm)
Output connection	graded hose connection and filling cone

Millipore Express® (PES) membrane
With low protein formation and high flow speed, **sterile**.

Filtrationvolume (l)	Pore size (µm)	Filtration surface (cm^2)	Art. No.	Pack Qty.	€
10	0,22	100	**CT85.1**	3	189,20
20	0,22	200	**CT86.1**	3	232,20

Centrifuge filter systems

S

Ultrafree filtration systems for laboratory centrifuges

By MERCK MILLIPORE. **Sterile** or non-sterile. Centrifuge filter systems for sample volumes of 0.5 or 2.0 ml. Use in fixed-angle rotors for 1.5 or 15 ml sample tubes. Filter unit and collector tube are made of PP.

- **Hydrophilic Durapore® PVDF membrane:** extremely low protein binding. Suitable for removal of particulate matter and precipitate from aqueous samples, and for protein and nucleic acid applications
- **Hydrophilic PTFE membrane:** for removal of precipitate from solvent-based samples

Technical specifications:

Type	Ultrafree-MC	Ultrafree-CL
Volume of filter insert, max. (ml)	0.5	2
Volume of collection tube (ml)	1.5	5
Centrifugable to	12000 x g	5000 x g
Dead volume (µl)	5	30
Membrane surface area (cm^2)	0.2	0.8
Outer ∅ (mm)	11	16.3
Length (mm)	45	77

Procedure:
- Open the attached lid of the filter unit
- Place the insert in the housing
- Close the filtration unit and place it in the centrifuge
- On completion of centrifuging, remove the filtration unit, open the lid and remove the insert
- The insert contains the residue and the sealable housing contains the filtrate

Ultrafree-MC to 0.5 ml, PVDF membrane

S

Steriflip®-vacuum filter units

By MERCK MILLIPORE. **Sterile filter units for volumes of up to 50 ml.**

- **Millipore Express® PES membrane** with high flow rate and low protein binding: for routine sterile filtration of tissue culture media, sera, buffers and other aqueous solutions
- **Durapore® PVDF membrane** with very low protein binding: For sterile and clear filtration of aqueous solutions
- **Hydrophilic Nylon mesh filter:** for removing coarse particulate matter

Technical specifications:

Type	sterile
Housing material	MBS/PP (modified acrylic/PP) housing
Filtration area	7 cm^2
Filtration volume	max. 50 ml
Membrane surface area (cm^2)	0.2
Dead volume	600 µl
Max. operating temperature	45 °C

Procedure:
- Connect the filter unit to the centrifuge tube containing the sample. Rotate the filter unit through 180° and apply vacuum.
- An alternative option: screw the funnel attachment onto the sterile filter unit, fill with sample and apply vacuum
- No need for filtrate transfer - Steriflip® filter unit filters directly into a sterile 50 ml centrifuge tube

Delivery incl. sterile filter units with connected 50 ml centrifuge tube and lid (each packed separately) and a single tube holder (blue). The 50 ml centrifuge tube and funnel attachment are optional (please order separately).

Filter units with cellulose nitrate membrane

By Nalgene®. Triton-free cellulose nitrate membrane **(CN)** with excellent active surface properties and high flow rates for aqueous solutions. For cold-sterilization, clear-filtration, pre-filtration and ultra-filtration of buffers, microbiological nutrient media and other aqueous solutions.

Design:
- Green colour coding
- Filter units made of PS
- Graduated filter tops and filter bottles
- With quick-connect tube adapter and cotton stopper
- Leakproof screw-cap
- Filtration units are non pyrogenic, non cytotoxic
- **Sterile**

*each box contains 12 glass fiber preliminary filters

S

Filter units with SFCA-membrane

By Nalgene®. Membranes made from cellulose acetate that is free of active surface agents (SF**CA**) with extremely low protein binding and low viscosity. SFCA is ideal when working with tissue culture and when filtering protein-containing serum as there are no active surface agents in the membranes which could have a toxic effect on the cells.

Design:
- Yellow colour coding
- Filter units made of PS
- Graduated filter tops and filter bottles
- With quick-connect tube adapter and cotton stopper
- Leakproof screw-cap
- Filtration units are non pyrogenic, non cytotoxic and **sterile**

*each box contains 12 glass fiber preliminary filters

Filter units and filter holder

Vacuum filtration units

Made of borosilicate glass. For coarse and membrane filtration, residue analysis, particulate monitoring, microbiology as well as filtration of alkaline and aggressive media.
Suitable for use with filter papers, membrane filters or glass filters.
Temperature stable up to +180 °C. Autoclavable.

- Parts in contact with media are made of glass and PTFE, suitable for universal use, biologically inert and corrosion resistant
- Scaled reservoir for easier metering and evaluation
- Plates are optionally available in porosity grades of 1-4, which means they are also suitable for analytical filtration
- Fast and easy to clean

Technical specifications:

Model	Filtration unit 1000 ml	Filtration unit 2000 ml

Membrane filters

Hydrophilic. **Sterile** or non-sterile.

Nitrocellulose
High flow rates. Biologically inert, non-cytotoxic. Maximum usage temperature 180 °C. Protein binding approx. 160 µg/cm^2. Autoclavable. Wide range of applications: gravimetric analysis, particle analysis, microbiological analysis, sterile filtration of aqueous solutions.

Nylon
Very low extractable substances content, wetting agent free. Good chemical resistance, polyester reinforcement for higher mechanical stability. Protein binding approx. 120 µg/cm^2. Maximum usage temperature 180 °C.
Application: solvent filtration (HPLC), sample preparation (HPLC, GC), sterile filtration of aqueous and organic solutions.

Track etched polycarbonate
Exact pore size, very smooth surface. Very low extractable substances content. Low protein binding <5 µg/cm^2, incineration residue approx. 0.92 µg/cm^2. Maximum usage temperature 140 °C. Autoclavable.
Application: particle analysis, microscopy, electron microscopy.

Cellulose mixed ester membrane filters

By Whatman. Versatile hydrophilic membrane made of mixed ester of cellulose acetate and cellulose nitrate. **Applications:** e.g. sterile and clear filtration, particle separation and analysis, microbiological analysis, counting germs, yeasts, fungi and particles, foodstuffs biology, airborne pollutant measurements etc.
Max. usage temperature 130 °C. Autoclavable.

- High dirt absorbing capacity prevents rapid clogging of the membrane
- Uniform membrane structure ensures high flow rates
- Very smooth and even surface aids microscopic evaluation
- Biologically inert and free of surfactants

Gridded membranes (line spacing 3.1 mm) make it easier to count particles and microorganisms; the dyes used are non-toxic and free of antibacterial substances.

Cellulose nitrate membrane filters

By Whatman. Versatile hydrophilic standard membrane.
Applications: filtration of aqueous solutions, sample preparation, microbiological studies etc. High stability and flexibility, low extractable substances content.
Max. usage temperature 80 °C. Autoclavable.
Gridded membranes (line spacing 3.1 mm) make it easier to count particles and microorganisms; the dyes used are non-toxic and free of antibacterial substances.

Non-sterile

Cellulose mixed ester (CME) membrane filters

By MERCK MILLIPORE. **Standard membrane filter hydrophilic for a broad range of applications**

- **Application:** Sewage filtration and sterile filtration of liquids, air and particle analysis, contamination analysis of fuel and hydraulic liquids to determine particle load, biological applications e.g. harvesting or washing cells, microdialysis
- Material: cellulose nitrate and cellulose acetate
- Protein binding: 150 µg/cm²
- Membrane strength: 105-150 µm
- Colour: white
- **Surface: smooth or gridded**
- Autoclavable

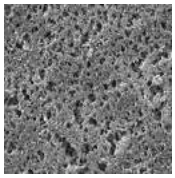
PES-membrane filters



By MERCK MILLIPORE.
Surface-modified hydrophilic polyethersulfone

- **Application:** ultrafast filtration of tissue culture media, buffers and other aqueous solutions
- High flow rates and high output
- Low protein binding
- Membrane strength: ≥ 150 µm and ≤ 200 µm
- Colour: white
- Surface: smooth
- Autoclavable

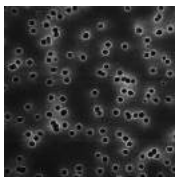
Microdialysis by Membrane Filter (Drop Dialysis)

Microvolumes of sample (5-100 µl) can also be dialysed by membrane filter discs made of cellulose mixed ester (pore size 0,025 µm, Art. No. CY35.1-CY37.1):
Fill a Petri dish with dialysis buffer. Place the membrane filter disc on the surface of the solution (shiny side up, avoid bubbles under the filter) by using a stainless steel forceps. Float the membrane for ca. 5 min until it is completely soaked. Pipette the sample on the center of the filter. Due to the open pore structure of the membrane filter and the high surface-to-volume ratio the dialysis is done within a short time (mostly < 30 min). To avoid evaporation of the sample seal the Petri dish tightly during the procedure. In this way the sample volume remains nearly constant.



Nylon membrane filters

By MERCK MILLIPORE.
Hydrophilic nylon membrane filter with high solvent compatibility.

- **Applications:** sterile filtration, bioassays, filtration of solvents, clear filtration of aqueous solutions, particle separation and analysis
- Membrane thickness: 170 µm
- Colour: white
- Surface: smooth
- Wettability: hydrophilic
- Sterilisation: compatible with gamma or EO sterilisation
- Max. working temperature: 75 °C

Polycarbonate-membrane filters

By MERCK MILLIPORE. **Smooth surface facilitates suitable for microscopic analysis**

- **Application:** chemotaxis studies, analysing beverages, sterility tests, cell culture-/cell biology, bioassays, cytology, environmental/air analysis, epifluorescence (black membranes)
- Material Polycarbonate film, hydrophilic, non-hygroscopic
- Membrane strength: 9-10 µm
- Max. operating temperature: 140 °C, autoclavable
- Colour: white or black

PVDF-membrane filters, hydrophilic

By MERCK MILLIPORE. **Surface-modified polyvinylidene fluoride with minimal protein bonding**

- **Applications:** sterile filtration of protein solutions, tissue culture media, additives, antibiotics and alcoholic solutions; removal of particles, biological assays (e.g. recipe-bonding studies, TCA-precipitation)
- Protein binding: 4 µg/cm^2
- Membrane strength: approx. 125 µm
- Colour: white
- Surface: smooth
- Max. working temperature: 85 °C
- Autoclavable

Nylon mesh filters

By MERCK MILLIPORE.

Hydrophilic nylon mesh filter with high solvent compatibility.

- **Applications:** collection of algae and cells, particle analysis, separation of large particles, background filter for use in monitoring by automatic particle imaging systems, prefiltration of solvents, monitoring of contamination in paints and lacquers
- Colour: white
- Surface: smooth
- Wettability: hydrophilic
- Sterilisation: compatible with gamma or EO sterilisation
- Max. working temperature: 100 °C

Glass fibre filter paper - round filters

By Whatman. Made of borosilicate glass fibre and inorganic bonding agents.

Properties:
- Chemically resistant to most organic and inorganic solvents, aggressive chemicals and concentrated bases (Not resistant to hydrofluoric acid)
- Constant weight, also in case of fluctuations in air humidity
- Mechanically stable (limited bending resistance)

Filter units and clamping fixtures must have flexible sealings.

Type GF 6
- Filtration speed low
- Retention rate: 99.97 %
- Retention range: <1 micron
- Surface weight: 80 g/m²

Application: environmental analysis, biology, physics, beverage industry.
Use: Gas/air monitoring, water and waste water investigations.

Type GF 8
- Filtration speed high
- Retention rate: 99 %
- Retention range: 3 µm
- Surface weight: 80 g/m²

Application: environmental analysis, industry
Use: Determining PCB, DDE, DDT, furane and dioxin levels in the air.

∅ (mm)	Type	Thickness (µm)	Art. No.	Pack Qty.	€
90	GF 8	350	**AY51.1**	100	140,75

Type GF 92
- Filtration speed medium
- Surface weight: 70 g/m²
- Retention range: 2-3 µm

Application: environmental analysis, biology, beverage industry.
Use: Membrane pre-filter, soot extraction from gas analysers.

Glass and quartz fibre filters

Glass fibre round filters

By Macherey-Nagel. Made of borosilicate fiber glass. With organic binders or binder-free. Enable speedy filtering, yet with high retaining power. Very good resistance against most organic and anorganic solvents (not resistant against hydrofluoric acid). Temperature max. 200 °C.

Technical specifications:

Filter type	Binder	Speed air (s)	Retaining range (µm)	Grammage (g/m²)
MN 85/70	organic	15	max 0.6	70
MN 85/70 BF	without	15	max 0.6	70

Type MN 85/70

Application: Most commonly used fiber glass filter for standard applications with high mechanical stability.

∅ (mm)	Type	Thickness (mm)	Art. No.	Pack Qty.	€

A 121 °C

Quartz fibre round filters MN QF-10

By Macherey-Nagel. Made of pure quartz fibres without bonding agents. High chemical resistance to organic and inorganic solvents, acids (except hydrofluoric acid) and alkalis. For filtration of aggressive media, in trace analytics, emission control, airborne dust analytics etc. Extremely low content of metal trace elements.
Filter speed (in compliance with DIN 53137): <5 s.
Surface weight: 85 g/m², retention range: up to 0.3 µm.
Temperature stable up to 950 °C.

∅ (mm)	Thickness (mm)	Art. No.	Pack Qty.	€
45	0.46	**EN12.1**	100	190,00

GUKO set

Made of **EPDM**. Conical rubber seals for suction bottle. Temperature resistant in the range -45 to +150 °C. Autoclavable.
Delivery incl. 8 Gukos, size 22, 29, 36, 44, 53, 63, 73, 84 mm.

Art. No.	Pack Qty. (set)	€
PK84.1	1	38,70

Filter papers for qualitative analysis

Rotilabo®-filter papers

100 % cellulose quality filter papers. High absorbency. Standard filter paper with a smooth surface for analysis. Colour white. Larger sizes are ideal as surface protection paper or working surface.

Type 600
Weight 64 g/m², thickness 0.15 mm. Retention 10-20 µm.

Length (mm)	Width (mm)	Art. No.	Pack Qty.	€
420	520	**XP43.1**	500	67,30
500	500	**XP44.1**	500	80,10
600	600	**XP45.1**	500	110,50

Type 601
Weight 73 g/m², thickness 0.16 mm. Retention 5-13 µm.

Length (mm)	Width (mm)	Art. No.	Pack Qty.	€
450	450	**XP46.1**	500	186,00
460	570	**XP47.1**	100	43,05

Type 122
Weight 73 g/m², thickness 0.17 mm. Retention 17-30 µm.

Length (mm)	Width (mm)	Art. No.	Pack Qty.	€

Filter papers

By Macherey-Nagel. Alpha cellulose content approx. 95%.
Format 58 x 58 cm.

Type MN 713, medium filtration speed
General purpose technical filter paper.
Weight 70/m², filtration time 20 s.

Thickness (mm)	Art. No.	Pack Qty.	€
0,15	**HPL1.1**	100	82,30

Type MN 615, medium filtration speed
Quality standard paper for numerous applications.
Weight 70 g/m², filtration time 22 s, ash content 0.1 %, retention range 4-12 µm.

Thickness (mm)	Art. No.	Pack Qty.	€
0,16	**HPL2.1**	100	137,05

Type MN 617, fast filtration speed
Quality filter paper for fast filtration of coarse deposits.
Weight 85 g/m², filtration time 9 s, ash content 0.1 %, retention range 7-12 µm.

Thickness (mm)	Art. No.	Pack Qty.	€
0,2	**HPL3.1**	100	200,75

Type MN 640 w, fast filtration speed, ash-less
Quantitative filter paper for fast filtration of coarse deposits.
weight 85 g/m², filtration time 9 s, ash content <0.01 %, retention range 7-12 µm.

Thickness (mm)	Art. No.	Pack Qty.	€
0,2	**HPL4.1**	100	505,00

Type MN 640 m, medium filtration speed, ash-less
Quantitative standard paper for numerous applications.
Weight 85 g/m², filtration time 27 s, ash content <0.01 %, retention range 4-12 µm.

Thickness (mm)	Art. No.	Pack Qty.	€
0,2	**HPL5.1**	100	505,00

Type MN 640 d, slow filtration speed, ash-less
Quantitative filter paper for fine and very fine deposits.
Weight 85 g/m², filtration time 140 s, ash content <0.01 %, retention range 2-4 µm.

Thickness (mm)	Art. No.	Pack Qty.	€
0,17	**HPL6.1**	100	505,00

Filter papers for qualitative analysis

Rotilabo®-folded filters

Filter paper for **qualitative analysis**. Made of 100 % cellulose.
Ash content 0.06 %.

Type 113P

Medium filtration speed, filtration speed acc. to DIN 53137: 50 s
Surface weight: 87 g/m², retention range: 5-8 µm

Membrane ∅ (mm)	Type	Thickness (mm)	Art. No.	Pack Qty.	€

Forceps for filter paper

Made of 18/10 stainless steel. For handling filter papers, cover slips and other flat objects. Width 12 mm, length 125 mm.

Art. No.	Pack Qty.	€
C828.1	1	10,95

▶ Further forceps from p. 326

Filter papers for quantitative analysis

Filter papers - round filters MN 640

By Macherey-Nagel. For **quantitative analysis.** Made of noble cellulose washed in acid and linters with α cellulose content of over 95 %.
Ash content <0.01 %. Temperature stable up to +130 °C.
gsm substance 85 g/m². Filtration time acc. to DIN 53137.

Type MN 640 w
Quick filtering, filtration time 9 s. Equivalent black band.
Soft filter, loosely structured. Ideal for coarses sediments such as ferric/aluminium hydroxide, bismuth/copper/ferric sulphide, nickel/diacetyldioxine, etc. Standard filter for Si-analysis.
Retention range: >8 µm.

∅ (mm)	Type	Thickness (mm)	Art. No.	Pack Qty.	€
55	MN 640 w	0,2	**EEX7.1**	100	10,50
70	MN 640 w	0,2	**A780.1**	100	14,00
90	MN 640 w	0,2	**A781.1**	100	20,30
110	MN 640 w	0,2	**A782.1**	100	29,15

240	MN 640 d	0,2	**EEY7.1**	100	111,85
320	MN 640 d	0,2	**EEY8.1**	100	192,00

Hard filter papers

Ash-free for **quantitative analysis**.
α cellulose content of over 95 %, ash content approx. 0.002 %.
Made of high-purity acid washed cotton linter pulp and cellulose mixed with a small quantity consolidating resin. Free of minerals and metal ions. High stability and resistance, very high wet strength. Precipitates can be removed easily with no fibres.
For analytical applications, routine quantitative and gravimetric methods. Highly recommended for vacuum and pressure filtration, determination of metal ions, and filtration of acidic and alkaline solutions.
Resistant to sulphuric and nitric acids (up to 40 % at 50 °C) and alkalis (up to 10 % at 20 °C).

Special filter papers

Grained filter papers

By Macherey-Nagel. Surface weight 75 g/m², filtration time according to DIN 53137: 25 s. Grained surface. E.g. for analyses in breweries.

Type MN 614 ¼
Medium filtration speed, bleached, low in nitrogen. Suitable for malt analysis and for the filtration of essential oils, emulsions, essences, etc.

Ø (mm)	Type	Thickness (mm)	Art. No.	Pack Qty.	€
55	MN 614 ¼	0,25	**HK57.1**	100	26,00
70	MN 614 ¼	0,25	**HK58.1**	100	26,00

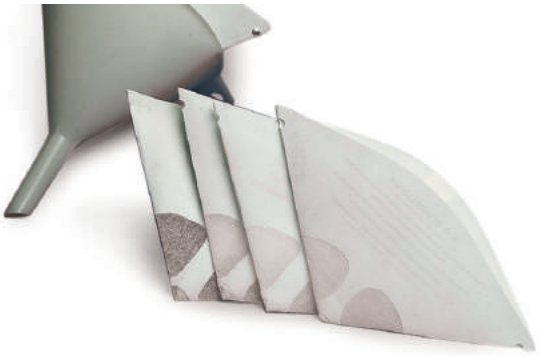
Rotilabo®-blotting paper blocks

Highly absorptive paper for removing excess liquid from small samples or microscopic preparations.
Surface weight 73 g/m². Dimensions: L 100 x W 37 mm.



Art. No.	Pack Qty.	€
XP50.1	1 block à 50 sheets	8,10

Phase separating paper - round filters MN 616 WA

By Macherey-Nagel. Silicone-impregnated paper for **qualitative analysis**. The hydrophobic surface separates water from non water-miscible liquids. Suitable for filtration of portions. Surface weight: 85 g/m².
Temperature stable to +120 °C. Mostly solvent consistant.

Membrane Ø (mm)	Thickness (mm)	Art. No.	Pack Qty.	€
125	0,2	**1284.1**	100	24,75

Disposable sieves

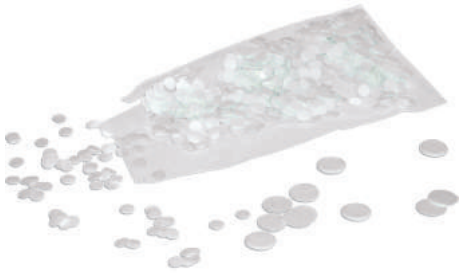
Made of water repellant card with a nylon screen fabric.
For liquids of different consistencies, e.g. paints and lacquers.
Height 12 cm, Ø top approx. 16 cm.

Mesh size (µm)	Mesh type	Colour	Art. No.	Pack Qty.	€
125	super fine	blue	**TA93.1**	125	32,75
150	extra-fine	turquoise	**AXL8.1**	125	32,65
190	fine	yellow	**TA92.1**	125	29,50
260	medium	orange	**TA91.1**	125	30,35
1000	coarse	white	**AXL9.1**	125	44,00

Special filter papers

Rotilabo®-germ testing paper

Folded, moisture-resistant germ testing paper for carrying out germ resistance tests, e.g. for root vegetable seeds.
Grammage: 160 g/m². Format: width 110 mm, fold depth 20 mm, double folds (50 units), length 2 m.



Art. No.	Pack Qty.	€
AT14.1	1	4,20

Cotton wool

Made of 100 % cotton, perforated. For filtering and cleaning.

Type	Art. No.	Pack Qty.	€
perforated	**0571.1**	1,1 kg (14 x 80 g)	25,30
not perforated	**PE40.1**	700 g (7 x 100 g)	13,95

Rotilabo®-test flakes

Untreated cellulose flakes for impregnating with active ingredient solution. Suitable for determining resistance to antiobiotics or chemotherapeutic media in bacteria culture and pathogenic organisms.
Made of 100 % cotton linter, good absorption, grammage: 290 g/m², thickness: 0.75 mm.

∅ (mm)	Art. No.	Pack Qty.	€

Rotilabo®-absorbent papers

Bench-Top Protection Paper

Highly absorbent white paper, coated on one side with water-resistant PE. Suitable as a protective working surface for lab tops or for lining cupboards and drawers. Protects surfaces against chemicals, dirt and contamination. Also suitable for analytical and isotope laboratories.

Weight: 144 g/m², absorbency approx. 250-280 g/m²

Rotilabo®-activated carbon filters

For filtration of organic solutions and acids, ambient air and various gases.
Filter material: Activated carbon granulate. Housing made of **PC**.
Temperature stable up to max. 70 °C, pressure resistant up to max. 2 bar.
For tube connections with inner-∅ 6.3 mm. Dimensions: ∅ 26 x 82 mm.

Art. No.	Pack Qty.	€
HC24.1	10	97,10

Glass fibre extraction thimbles type MN 649

By Macherey-Nagel. Micro glass fibres consist of binder-free borosilicate glass, short term temperature stability up to 500 °C. The thimbles have high chemical resistance, a very high separation capacity and a very high particle retention capacity.
Suitable for emission measurement at high temperatures and for the separation of dust particles or aerosols from gases or air flows.
Extraction thimbles according to DIN 12449 are suitable for extractors with defined nominal volumes in accordance with DIN 12602 and 12604.

Analytical sieve machines

Analytical sieve machines, HAVER EML 200 Premium series

By Haver & Boecker. For sieve analysis in accordance with ISO 2591-1. Measuring range 20 µm-125 mm. Suitable for analytical sieves with ∅ 50 to 203 mm.

- Fast and easy to operate
- Amplitude is adjustable in 0.1 mm increments
- Intermittent operation or continuous operation
- Memory for storing various sieve modes (49 memory slots)
- Ethernet interface
- Optional TwinNut rapid clamping system allows easier and faster replacement of sieves without time-consuming screwing

Additional features of EML 200 Premium Remote model:

Unit with protection class IP 54 and separate control unit for wall mounting allows the additional option of wet sieving.

Technical specifications:

Type	EML 200 Premium	EML 200 Premium Remote
Suitable for dry sieving	yes	yes
Suitable for wet sieving	no	yes
Type of motion	Three-dimensional	
Shaking amplitude (mm)	0.1 to 3.0	
Timer (min)	1 to 99 or continuous operation	
Intermittent operation (s)	1 to 99	
Min. load capacity	3 analytical sieves with usable height 50 mm and 1 sieve pan	
Max. load capacity	9 analytical sieves with usable height 50 mm or 8.7 kg sieve stack weight	
Dimensions W x D x H (mm)	295 x 385 x 880	
Weight (kg)	38	
Power supply	110-230 V, 50-60 Hz	

① **Analytical sieve machines EML 200 Premium**
Delivery incl. clamping system (2 M20 guide bars, 660 mm long, 2 tensioning nuts) as well as machine cover with window.
Delivery without sieve pan (please order separately).

Analytical sieve machine HAVER EML 200 Pure

By Haver & Boecker. For sieve analysis in accordance with ISO 2591-1. Standard model for dry sieving and fast and easy operation. Measuring range 20 µm-125 mm. Suitable for analytical sieves with ∅ 50 to 203 mm.

- Two amplitudes can be selected for coarse or fine materials
- Preset interval (10 s)
- Digital timer
- Anodised aluminium housing

Technical specifications:

Type of motion	Three-dimensional
Shaking amplitude	2.2 mm (coarse) or 0.9 mm (fine)
Timer	1 min or continuous operation
Min. load capacity	3 analytical sieves with usable height 50 mm and 1 sieve pan
Max. load capacity	9 analytical sieves with usable height 50 mm or 8.7 kg sieve stack weight
Dimensions (W x D x H)	295 x 385 x 900 mm
Weight	38 kg
Power supply	110-230 V, 50-60 Hz

Delivery incl. Classic "eco" clamping system (2 M16 guide bars, 660 mm long, 2 tensioning nuts) and machine cover with window.
Delivery without sieve pan (please order separately).

Analytical sieves

Analytical sieves ∅ 200 mm

By Haver & Boecker. Sieve frame fabricated in stainless steel with stainless steel wire mesh base. Compliant with DIN ISO 3310, ASTM E11, ISO 565, BS 410, etc. Suitable for testing granulates, powders, plastics, silicon, dyes, metal filings etc.

- Strong sieve construction for long life
- Sieve mesh retains excellent tension, even during intensive use
- Smooth frame surface avoids cross contamination
- Usable height 50 mm

Delivery incl. PVC sealing ring and Certificate of Compliance 2.1 in accordance with DIN EN 10 204.

Compact ion exchanger Destillo 2

For wall attachment. Ideal for deionizing water (high purity water quality 0.1-20 µS) in small quantities.

- Very effective, handy and dependable
- Capacity approx. 50 l water per h
- Capacity of cartridge is dependent on water grade: at 10 dGH approx. 320 l, at 20 dGH approx. 160 l water. Conductivity range up to 100 µS/cm
- Current 220 V/50 Hz
- Dimensions: W 115 x H 520 x D 115 mm
- Extension cord 150 cm, tap water supply with ¾″ - screw thread 150 cm, plastic outlet hose 100 cm

Delivery incl. cartridge, hoses, wall attachment and instruction manual.

Art. No.	Pack Qty.	€
0092.1	1	321,45

Disposable cartridge D 2

Pretreated against algae growth.
Length 380 mm, ∅ 90 mm. Weight app. 1400 g.

Art. No.	Pack Qty.	€
0093.1	1	76,90

DS 450/DS 750 ion exchanger systems

By stakpure. **Pressureless.**
Acc. to standards such as DIN EN 13060, ASTM and VDE 0510.
Plastic ion exchanger systems for producing fully desalinated pure water using a mixed bed ion exchanger resin. Can be connected directly to the mains water supply. The system is rounded off by an analogue conductivity meter and tube set. Developed in-house for medical practices and small laboratories with a daily requirement of up to 15 litres. An innovative filter system protects against resin leaks, thereby ensuring a high level of product safety, including for downstream devices.

Technical specifications:

Model	**DS 450**	**DS 750**
Cartridge	disposable	**regenerable**
Flow rate (l/h)	50	100
Capacity at 10 dGH total salt content (l)	425	750
Pure water quality (µS/cm)	0.1–20	
Max. water temperature (°C)	30	
Power supply	230 V, 50-60 Hz	
Material	polyethylene	
Dimensions ∅ x H (mm)	100 x 600	175 x 470
Connection	R $^{3}/_{4}$"	
Weight approx. (kg)	3	6

Delivery incl. cartridge, analogue conductivity meter and tube set.
Model DS 450 also includes a wall mount.

Type	Art. No.	Pack Qty.	€
DS 450	**KCE7.1**	1	311,75
DS 750	**KCE8.1**	1	408,50

Accessories:

Replacement cartridges for DS 450 ion exchanger	**KCE9.1**	2	123,65
Replacement cartridge for DS 750 ion exchanger	**KCH0.1**	1	241,90

Stainless steel ion exchanger systems

By stakpure. **Pressure-resistant (up to 10 bar)** stainless steel ion exchanger cartridges, can be connected directed to the mains water. Acc. to standards such as ASTM, CLSI, DIN EN 285, VDE 0510. This ensures that the water quality constantly remains high.

The cost-effective way to produce fully desalinated water. In a stainless steel container, water flows through a mixed bed made of special anion and cation resins and is thereby fully desalinated and demineralised using the established ion exchanger method. For supplying ultrapure water systems, automatic analysis machines, flushing machines and autoclaves, or for industrial use with process water, battery water and cooling water.

Technical specifications:

Model	**DS 1500**	**DS 2000**	**DS 2800**	**DS 4000**
Cartridges	Pressure-resistant to max. 10 bar			
Capacity at 10 dGH total salt content (l)	1500	2000	2800	4000
Flow rate (l/h)	300	300	950	1000
Max. pressure (bar)	10			
Pure water quality (µS/cm)	0.1 to 20			
Max. water temperature (°C)	30			
Cartridge material	Stainless steel – AISI 316			
Cartridge filling	Mixed bed resin, **regenerable**			
Connection	R $^3/_4$"			
Dimensions ∅ x H (mm)	240 x 410	240 x 490	240 x 570	240 x 700
Weight (kg)	14	14	24	27

Delivery without conductivity meter (please order separately). Compatible conductivity meters: Type AC 100 analogue or type DC 400 digital, available as an option.

Type	Art. No.	Pack Qty.	€
DS 1500	**KCE3.1** *	1	620,30
DS 2000	**KCE4.1** *	1	686,95
DS 2800	**KCE5.1** *	1	808,40
DS 4000	**KCE6.1** *	1	1084,70

* Longer delivery times possible. Please check with our Sales Department.

AC 100 analogue conductivity meter

By stakpure. For simply and reliably measuring the conductivity of pure water. The device is rounded off by an integrated measuring cell and a tube set.

- Analogue measurement data display in µS/cm
- For direct connection to ion exchanger cartridges

Technical specifications:

Measuring range	0.1 to 50 µS/cm
Dimensions (W x D x H)	93 x 123 x 170 mm
Connection	R $^3/_4$"
Power supply	230 V/50 to 60 Hz

Delivery incl. tube set consisting of 2 x 1.5 m tubes with R $^3/_4$" connections.

Type	Suitable for	Art. No.	Pack Qty.	€
AC 100	DS 1500-4000 ion exchanger	**KCH2.1**	1	306,40

DC 400 digital conductivity meter

By stakpure. For measuring the conductivity of pure and ultrapure water of ion exchanger cartridges and for monitoring closed-loop systems. A high-precision conductivity meter for continuous quality control of temperature and conductivity. Clear digital display even in the low conductivity measuring range.

- Large two-colour backlit graphic display for digitally displaying the conductivity in µS/cm or in MΩ x cm and the temperature in °C
- LED indicators: Light up green/red to indicate that the temperature and conductivity limits have been exceeded
- Continuous adjustment of the temperature and conductivity limits
- Automatic comparison before each measurement using an integrated reference resistor and temperature measurement using platinum temperature sensor
- Automatic voltage switching for international use

Technical specifications:

Conductivity measuring range	0.1 to 300 µS/cm (automatic switching at 9.99)
Temperature measuring range	0.1-99.9 °C
Temperature compensation	Automatic
Limit setting for conductivity	Any value from 0.1-30 µS/cm
Limit setting for temperature	Any value from 10-40 °C
Signals when limits are exceeded	Green/red LED indicator + buzzer (both limits can be deactivated)
Signals in the event of a fault message	Display switches between green and red
Protection rating	IP 54
Dimensions (W x D x H)	73 x 32 x 141 mm
Positioning	Wall-mounted
Connection	R $^3/_4$"
Power supply	110/230 V / 50 to 60 Hz (automatic voltage changeover)

Delivery incl. connecting cable, plug-in power supply, measuring cell and tube set consisting of 2 x 1.5 m tubes with R $^3/_4$" connections and wall mount.

Type	Suitable for	Art. No.	Pack Qty.	€
DC 400	DS 1500-4000 ion exchanger	**KCH1.1**	1	585,90

Ion exchange cartridges plastic design

By Thermo. **Pressureless.**

Provide completely demineralized water using a mixed-bed resin ion exchanger. Can be attached directly to a tap water supply. Ideal for treating small amounts of water and for supplying autoclaves, sterilizers etc. with deionized water.

- 100 % utilization of capacity
- Constantly good water quality

Technical specifications:

Model	**DI 425**	**DI 750**
Cartridge	disposable	regenerative
Rate of flow (l/h)	50	100
Capacity at 10 dGH total salt content (l)	425	750
High-purity water quality (µS/cm)	0.1 - 20	
Max. water temp. (°C)	30	
Current	230 V, 50/60 Hz	
Material	polyethylene	
Dimensions ∅ x H (mm)	100 x 600	175 x 480
Weight approx. (kg)	3	7
Connection	R $^3/_4$"	

Delivery incl. cartridge, tubing set and analogue conductivity meter. Measuring range 0.1-50 µS/cm.
Model DI 425 additional incl. wall attachment.

Model	Art. No.	Pack Qty.	€
DI 425	**Y360.1**	1	NLA
DI 750	**Y362.1**	1	NLA

Spare cartridges for ion exchange cartridges DI 425 and DI 750

For model	Art. No.	Pack Qty.	€
DI 425	**Y361.1**	1	NLA
DI 750	**Y363.1**	1	NLA

Ion exchanger cartridges made of stainless steel

By Thermo. **Pressure-stable** (max. 10 bar) ion exchanger cartridges made of stainless steel. For simple and economical production of deionized water. Ideal for supplying high-purity water systems, dishwasher, autoclaves, sterilizers, air conditioners, steam boilers and for general laboratory applications.

Technical specifications:

Model	DI 1500	DI 2000	DI 2800	DI 4000
Capacity at 10 dGH total salt content (l)	1500	2000	2800	4000
Cartridge filling	Mixed bed resin, **regenerative**			
Max. pressure (bar)	10			
Pure water quality (µS/cm)	0.1-20			
Max. water temperature (°C)	30			
Material	Stainless steel V4A			
Connection	R ¾″			
Weight (kg)	14	18	24	27
Dimensions ∅ x H (mm)	240 x 410	240 x 490	240 x 600	240 x 700

Delivery without conductivity meter CA30.1 (please order separately).

Type	Art. No.	Pack Qty.	€
DI 1500	**HH27.1** *	1	NLA
DI 2000	**CA31.1** *	1	NLA
DI 2800	**CA32.1** *	1	NLA
DI 4000	**CA33.1** *	1	NLA

* Longer delivery times possible. Please check with our Sales Department.

Digital conductivity meter

By Thermo. Measuring ranges: 0.055-199.9 µS/cm, from 10 µS/cm automatic switch-over to 10.00-199.9 µS/cm. With automatic temperature-compensation. Limit value alarm can be adjusted to up to 30 µS/cm, visual and audible alarm when limit value has been exceeded.

Delivery incl. tube set consisting of 2 x 1.5 m PVC tubes with R ¾″ connections.

Type	Art. No.	Pack Qty.	€
for models DI 1500 to DI 4000	**CA30.1** *	1	NLA

* Longer delivery times possible. Please check with our Sales Department.

OmniaPure ultrapure water systems

By stakpure.
OmniaPure – the specialist for ASTM Type I ultrapure water.
For 20-100 litres of ultrapure water per day. Highest quality of ultrapure water for analytical and bioscience applications in laboratories; versatile and cost-effective to operate. The integrated pretreatment unit ensures that the results of analyses are always reliable and reduces the follow-up costs. The flexible dispenser is used to draw ASTM Type I ultrapure water. The water is drawn at the touch of a button using the dispenser's digital control system.

- OptiFill dispenser as standard
- Space-saving mounting on a laboratory bench or optionally on a wall
- Simple and cost-effective filter replacement
- With RS 232 port
- Leak sensor as standard
- Integrated pressure reducer as standard
- Ready to use, ready to connect, incl. filter cartridges

Technical specifications:

Feed water requirements: Water treated through ion exchange, reverse osmosis, deionisation or distillation	
Feed water temperature (°C)	+2 to +35
Feed water pressure (bar)	0.5-6
Inlet conductivity (µS/cm)	< 2
Turbidity (NTU)	< 1.0
Free chlorine (ppm)	< 0.05
TOC value (ppb)	< 50
Bacteria content (CFU/ml)	< 100
Carbon dioxide (ppm)	< 30
Silicate (ppm)	< 2

Ultrapure water specifications: ASTM Type I	**OmniaPure**	**OmniaPure UV/UV-TOC**	**OmniaPure UV/UF/UV-TOC/UF**

OmniaTap pure and ultrapure water systems

By stakpure.
OmniaTap is the ideal system for when small volumes of pure and ultrapure water are required. The combination of leading-edge treatment methods enables pure and ultrapure water to be drawn from just one system.
It can be connected directly to a drinking water pipeline.
The flexible dispenser is used to draw ASTM Type I ultrapure water. The water is drawn at the touch of a button using the dispenser's digital control system.
An integrated 10-litre tank with recirculation system constantly keeps the quality at the level required for ASTM Type II.
An optionally available pump station can be used to supply downstream terminal devices directly with pure water (ASTM Type II) from the pure water tank.

- Can be operated using just one hand
- Space-saving mounting on a laboratory bench or optionally on a wall
- OptiFill dispenser as standard
- TapWater set – direct connection to drinking water
- 10 l tank with recirculation system
- Tank volume display in percent
- Simple and cost-effective filter replacement
- With RS 232 port
- Leak sensor as standard
- Ready to use, ready to connect, incl. filter cartridges

Technical specifications:

Optional Omnia pump station	**KCC5.1**	1	827,75
Optional wall mount incl. mounting parts	**KCC6.1**	1	166,65

Smart2Pure ultrapure water system

By Thermo.
Compact systems for the production of contamination-free water from tap water. The unit is **connected directly to the mains water supply**.
Simultaneous provision of ultrapure and pure water in the following grades:

- **ASTM type I** (resistance of 18.2 MΩ x cm)
- **ASTM type II** (resistance of 10 -15 MΩ x cm)

Easy to use, space-saving design and low follow-up costs.
The pre-treatment cartridge is separate from the ultrapure water cartridge. Only the used cartridge need be replaced, when necessary.

Uses:

Analytical chemistry: HPLC, GC, GC-MS, ICP-MS, AA, TOC measurements, IC
Molecular biology and microbiology: cell culture/ tissue culture, PCR, DNA sequencing, electrophoresis
Routine laboratory tasks: making up and diluting buffers and reagents, rinsing of laboratory glassware, supply of autoclaves, analysers and other laboratory equipment

Features of Smart2Pure UV:

- Combined cartridge (reverse osmosis membrane/activated charcoal) for pre-treatment of feed water
- Direct tapping of type I ultrapure water through a sterile end filter (0.2 µm)
- Integrated 6-litre tank for storing type II pure water
- Guaranteed pure water quality: the recirculation pump and sterile air filter protect from microbial contamination
- Additional pressure outlet on ultrapure water tank for supplying downstream devices
- Simple and economical change of expendables as treatment cartridges can be replaced separately
- Space-saving mounting on laboratory bench or on the wall
- UV lamp with two wavelengths of 254 and 185 nm kills bacteria, oxidises organic compounds and produces germ-free ultrapure water with a TOC content of < 5 ppb

Optional Smart2Pure UV/UF system:
UF ultra-filtration module for near-total elimination of macro-molecular contamination such as microorganisms, pyrogens (bacterial endotoxins), nucleases and particles; the combination of UV oxidation and ultra-filtration produces analytically pure water with a specific resistance of up to 18.2 MΩ cm, TOC values of < 5 ppb, pyrogen levels of < 0.001 EU/ml and RNase, DNase and DNA concentrations below the detection limit.

Technical specifications:

Drinking water requirements:	
Drinking water to DIN 2000	Manganese and iron content: < 0.05 mg/l
	Chlorine concentration: < 0.1 mg/l
	Colloid index : < 3
	Drinking water temperature: 2-35 °C
	Drinking water pressure: 1-6 bar

Pure water specifications:	**ASTM Type I**	**ASTM Type II**
Conductivity (µS/cm)	0.055	0.067-0.1
Resistance (MΩ x cm)	18.2	10-15
Permeate output for pure water at 15 °C (l/h)	-	3 or 6
Output for ultrapure water (l/min)	1.0	-
Output (models with UF filter) (l/min)	0.6	-
TOC value (ppb)	< 10	-
TOC value (models with UV lamp) (ppb)	1-5	-
Endotoxins (models with UF filter) (EU/ml)	0.001	-
Bacteria content (KbE/ml)	< 1	-
Particle content < 0.2 µm pro ml	< 1	-
Technical specifications:		
Dimensions W x D x H (mm)	305 x 400 x 545	
Weight (kg)	approx. 22	
Power supply	100-240 V / 50/60 Hz, 1.8 m mains plug	
Drinking water connection	1.5 m tubing with 8 mm outer ∅ and ¾″	
Wastewater connection	¼″ or 8 mm outer ∅, 2 m tubing, pressure-less outlet	

Delivery incl. Smart2Pure unit with integral 6-litre tank, sterile tank ventilation filter, combined cartridge (reverse osmosis membrane/activated charcoal), ultrapure water cartridge, 0.2 µm end filter, pressure retaining valve, UV lamp and/or ultra-filter (depending on model).

BRITA® benchtop water filters

For optimal drinking water quality. Reduces limescale, lead, copper and chlorine content using a combination of ion exchange and activated charcoal.

- Electronic cartridge exchange indicator
- With MAXTRA Flow Control for steady flow and optimal filtration capacity
- ① MARELLA: easy to fill flip top lid
- ② FLOW: with tap easy and convenient use

Delivery incl. 1 MAXTRA water filter cartridge.

Type	Filling volume (l)	L x W x H (mm)	Art. No.	Pack Qty.	€
① MARELLA	2,4	267 x 109 x 277	**XC11.1**	1	n. a.
② FLOW	8,5	217 x 307 x 224	**XC12.1**	1	n. a.

Accessories:

BRITA® MAXTRA+ water filter cartridges	**XC13.2**	4	n. a.

TLC sprayer

Versatile sprayer with gas cartridge for spraying reagents and other liquids.
Spray pressure: constant 4,4 bar. Eco-friendly propellant mixture of dimethyl ether, propane and isobutane.
Sufficient for approx. 500 ml of liquid.
Easy to clean: unscrew cartridge, immerse uptake into vessel containing cleaning fluid and spray until the spray is free of residues.

Propellants: dimethyl ether, isobutane, propane.

Delivery incl. propellant cartridge (55 g or 94 ml), 170 ml glass reservoir bottle, suction tube and screw cap.

Danger H222-H229

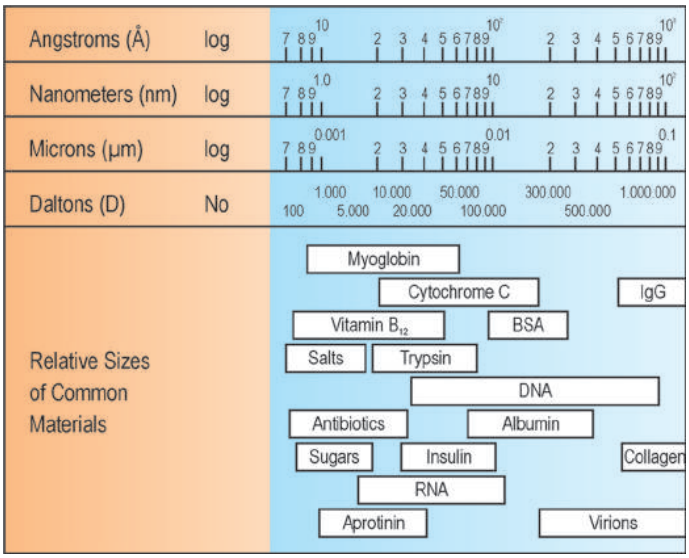
N145.1	3	9,00

Dialysis Tubular Membranes

Dialysis – Principle

Dialysis is a method used for **purifying biomolecules** according to the principle of osmosis: From a high concentration solution small solutes diffuse across a semi permeable membrane to a low concentration solution until equilibrium is reached. The pore size of the membrane allows only small solutes to pass, larger species are retained. Thus the molecules are separated. The pore size is indicated as **M**olecular **W**eight **C**ut **O**ff **(MWCO)**.

Dialysis- Examples for Applications



- Desalting
- Concentration of plasma or serum
- Buffer or pH change of samples
- Preparation of proteins for electrophoresis
- Concentration of antibodies
- Removal of contamination
- Purifying cell culture extracts
- Removal of oligosaccharides from protein solutions

Course of Dialysis

1. Fill beaker with dialysis buffer:
   In most cases the dialysis buffer equals the sample buffer, except for the molecules hold back by the membrane. The volume of the solution should be at least 100 times the sample volume.
2. Place magnetic follower into the buffer.
3. Cut dialysis tube.
   The length required depends on the following criteria:
   - Tube length for dialysis (mm) = [Vol (in µl) x 3.2] / [flat width^2 (in mm^2)]
   - Add 10 % of tube length
   - Add 40 mm for closures
4. Close one end of the preincubated tube with a closure so that at least 1 cm tubing overlaps.
5. Turn tube, open other end and fill sample. Carefully press the tubing to remove remaining air. Also close this end with a closure (1 cm overlap).
6. Place the dialysis tube into the prepared beaker, close lid and switch on stirrer.
7. The dialysis solution should be changed at least 3 times during the total dialysis process. Recommend changing after 2- 4 h, 6- 8 h and 10-14 h. Dialysis should be continued for at least 2 h after final change.
8. Following dialysis dry tube with a clean kim wipe, remove one clip, open the tube and remove sample with a pipette.

Filling volume for 15 cm tube length

Broadth (mm)	8	10	12	18	25	32	40	45	50	76	100	120
Tube ∅ (mm)	5	6	8	11	16	20	25	29	32	48	64	76
Filling volume (ml)	3.1	4.8	7	15	30	49	76	97	119	276	478	688

Choosing the Dialysis Membrane

Chemical resistance (residence time 17-20 h):

Regenerated cellulose: 2<pH<12, applicable when using diluted acid, base, or solvents (see table below).
Cellulose ester: 5<pH<9, use only under neutral conditions.

MWCO:

Those molecules about to be separated must have a **size ratio of approx. 25:1**.
Rule of thumb: Ideal MWCO = approx. half of molecular weight of the macromolecule left in the membrane.

Flat width:

Rule of thumb: √ [Vol (in µl) / 20] = average flat width required (mm).
The overall length of dialysis tube should not exceed 10 to 15 cm.

Choosing the Clips

The clips should be approx. 4 to 10 mm wider than the flat width of the tube.
Notice: Membranes made of cellulose ester should only be closed using Art. No 0685.1 to 0688.1.

Pretreatment of the Membranes

Wet packaged membranes (Spectra/Por® cellulose ester, Spectra/Por® 7, ZelluTrans/Roth V series)

Place tube for approx. 30 min in distilled water to remove the sodium azide and ethanol, respectively. Then rinse with distilled water.

Dry packaged membranes (Membra-Cel™, Nadir®, ZelluTrans/Roth, Spectra/Por®1-4 and Spectra/Por® 6)

For the most applications it is sufficient to soak the membrane for approx. 30 min in distilled water to remove glycerol and then to rinse it with distilled water.To remove heavy metals and sulphides place the tube in a solution of 2 % sodium bicarbonate and 1 mM EDTA and treat it as follows:

- Soak the tube at + 60 °C for 3 to 4 h. Then rinse with distilled water. Be careful also to rinse the inside of the tube.
- *Alternatively* incubate the tube 2 times for 10 min at approx. 95 °C. Rinse with distilled water in between incubation steps and afterwards. Be careful also to rinse the inside of the tube.

Note:
Wetted membranes may not dry out!

Dialysis Tubular Membranes

Dialysis membrane Spectra/Por® 1 to 4

Made of **regenerated cellulose**.

- High-quality membrane on rolls
- Temperature stable up to +60 °C
- High chemical resistance
- **Dry packaged**
- Treated with glycerol to protect against brittleness
- Contains low amounts of impurities such as sulphides and heavy metals

Metal traces:

cadmium	< 0.02 ppm	lead	2-6 ppm
chromium	0.1-0.2 ppm	magnesium	0.1-0.3 ppm
copper	0.8-1.2 ppm	nickel	1.3-1.7 ppm
iron	20-60 ppm	zinc	1.5-5 ppm

Spectra/Por® 1 - MWCO 6000 to 8000

Attention:
Do not tie knots in **regenerated cellulose.** Closure clips must be used to avoid any changing of membrane or MWCO.

Trial Kits Spectra/Por® 1-3

Made of **regenerated cellulose**.

Tubular membrane pieces on rolls, length 5 m, packaged dry.
Ideal for small-scale dialyses and for testing membranes for special applications.

Trial Kit delivery incl.
- tubular membrane Spectra/Por® 1, 2 or 3
- 1 pair of Spectra/Por® sealing clips made of PP (1 x with weight, 1 x without)

Dialysis membranes Spectra/Por® 7

Made of **regenerated cellulose.**

- **Packaged wet** in 0.05 % sodium azide solution, on rolls
- **Highly pure membranes without any trace elements** such as heavy metals, sulphides, glycerol
- Can be directly used without any cleaning procedures
- Wall thickness: 60-65 µm
- Store at +4 °C
- Temperature stable up to +60 °C

Dialysis Tubular Membranes

Dialysis membrane Spectra/Por® Biotech CE

Made of **cellulose ester (CE)**

- **High purity**, free of any trace elements, heavy metals, sulphides or glycerol
- Low membrane reactivity, therefore negligible protein and liposome adsorption
- No time-consuming cleaning process required
- Temperature stable up to +37 °C
- **Packaged wet** in 0.05 % sodium-azide solution
- Store at +4 °C
- Wall thickness:
  MWCO 100-50 000: 75-85 µm
  MWCO 100 000: ≥ 100-125 µm

Trial Kits Spectra/Por® Biotech CE

Made of **cellulose ester (CE)**.

Tubing membrane pieces on rolls, length 1 m, packaged moist in 0.05 % natrium azide solution. Ideal for dialysis where only a small amount of tubing is required (test runs, small-scale applications, etc.).

Sample kit delivery incl.
- Spectra/Por® Biotech CE tubular membrane
- 1 pair of Spectra/Por® universal sealing clips (red, sealing length 50 mm)

▶ For Spectra/Por® universal closures, see page 561

Appearance of dialysis membranes

Dry dialysis membranes have different appearances, dependent on pore size and wall thickness: Clear, opaque or even completely white.

Reason:
Larger MWCO membranes are made slightly thicker to maintain membrane strength when the pores are larger.
The thicker the membrane and larger the pores, the more opaque.
So the different membranes look as follows:

Dry membranes with MWCO
100-1000: clear
3 500-5 000: mostly clear
8 000-10 000: slightly opaque
20 000-50 000: opaque
≥100 000: white.

When the membrane is wetted with water the effect dissapears and the membrane becomes more clear.

Spectra/Por® Float-A-Lyzer® G2

Ready-to-use Dialysis device combining efficiency, convenience and sample protection **with a sample recovery rate of 95-98 %.** The cylindrical dialysis tubing from cellulose ester is fixed to polycarbonate pieces. **Packaged dry** with glycerol to protect against brittleness. Before use the glycerol is to be removed by rinsing with distilled water for 15-30 min.

- Sample volume 1-10 ml
- The leak-proof screw-on cap allows easy for handling and in-process testing during dialysis is possible
- The tubing is made of cellulose ester with no heavy metal and sulfide contaminants, therefore, no special purification is necessary
- Low-protein and liposome binding membrane, can be used directly with biological samples
- Flotation ring improves sample buoyancy and vertical orientation during dialysis
- Available in precise MWCOs with colour-coded caps
- Several Float-A-Lyzer can be used in one vessel

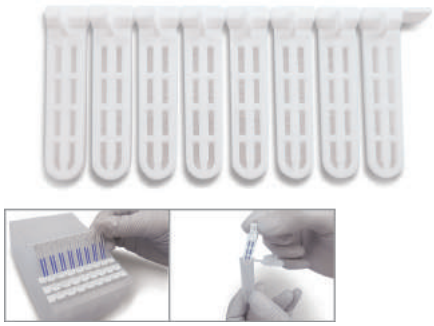
Microdialysis by Membrane Filter (Drop Dialysis)

Microvolumes of sample (5-100 µl) can also be dialysed by membrane filter discs made of cellulose mixed ester (pore size 0,025 µm, Art. No. CY35.1-CY37.1):
Fill a Petri dish with dialysis buffer. Place the membrane filter disc on the surface of the solution (shiny side up, avoid bubbles under the filter) by using a stainless steel forceps. Float the membrane for ca. 5 min until it is completely soaked. Pipette the sample on the center of the filter. Due to the open pore structure of the membrane filter and the high surface-to-volume ratio the dialysis is done within a short time (mostly < 30 min). To avoid evaporation of the sample seal the Petri dish tightly during the procedure. In this way the sample volume remains nearly constant.



Spectra/Por®-dialysis cylinder

Made of PS. For use with magnetic stirrers. The tube is centred and dialysis speeded up by the stirring movement.

- MINI - for dialysis tubes and systems up to a length of 10 cm
- MAXI - for dialysis tubes and systems up to a length of 25 cm

Delivery incl. magnetic bar and cover.

Model	Volume (ml)	Height (cm)	∅ (cm)	Art. No.	Pack Qty.	€
MINI	600	12,5	11,5	**CL82.1**	1	79,80
MAXI	1800	30	11,5	**CL83.1**	1	97,85

ZelluTrans/Roth Mini Dialyzer MD 100

Made of **regenerated cellulose**.

Ready-to-use dialysis unit for samples of between 10 and 100 µl.
The Mini Dialyzer consists of a U-shaped polypropylene capillary with 25 µl graduations and membranes on both sides.
The filled sample forms a very thin layer over a large surface area, ensuring short dialysis times.

- Available as an **individual dialyzer** packed in a 2 ml reaction vial or as a **dialyzer strip** with 8 interconnected individual dialyzers (can be separated)
- Membranes are made of high-quality regenerated cellulose with different pore sizes (MWCO), **dry packed**
- Easy to use: can be filled with sample and emptied using any standard pipette (2-200 µl)
- Flexible: uses ranging from low-volume dialysis (in reaction vial or micro-titration plate) to high-volume dialysis (using a suitable flotation aid, as described below)
- Compatible with **96 deepwell plates (2.5 ml)**, 8-channel multichannel pipettes and standard automation systems allow simultaneous processing of up to 96 samples.

The Mini Dialyzers can are ready for use straight away - no pretreatment required. For sensitive applications, soak in water or buffer for 15 min to remove any traces of glycerine.

MWCO	Designation	Art. No.	Pack Qty.	€
3 500	Individual dialyzer in 2 ml reaction vial	**4766.1**	12	62,85
3 500	Dialyzer strip (8 connected individual dialyzers)	**4767.1**	1	41,15
6 000-8 000	Individual dialyzer in 2 ml reaction vial	**4770.1**	12	62,80
6 000-8 000	Dialyzer strip (8 connected individual dialyzers)	**4771.1**	1	41,15
12 000-14 000	Individual dialyzer in 2 ml reaction vial	**4775.1**	12	62,80
12 000-14 000	Dialyzer strip (8 connected individual dialyzers)	**4776.1**	1	41,15

ZelluTrans/Roth Mini Dialyzer MD 300

Made of **regenerated cellulose.**

Ready-to-use dialysis system for samples from 50 to 300 µl.
The Mini Dialyzer consists of a U-shaped polypropylene capillary with 75 µl graduations and membranes on both sides.
The filled sample forms a thin layer over a large surface area, ensuring very short dialysis times.

- Available as an **individual dialyzer** packed in a 5 ml test tube or as a **dialyzer strip** with 8 interconnected individual dialyzers (can be separated)
- Membranes are made of high-quality regenerated cellulose with different pore sizes (MWCO), **dry packed**
- Easy to use: can be filled with sample and emptied using any standard pipette (100-1000 µl)
- Short dialysis times (30-480 min)
- Flexible: uses ranging from low-volume dialysis (in test tube, 96-deepwell plates, 2.5 ml) to high-volume dialysis (using a suitable flotation aid, 4768.1)

The Mini Dialyzers are ready for use straight away - no pretreatment required. For sensitive applications, soak in water or buffer for 15 min to remove any traces of glycerine.

MWCO	Designation	Art. No.	Pack Qty.	€
3500	Individual dialyzer in 5 ml test tube	**NH91.1**	12	64,50
3500	Dialyzer strip (8 connected individual dialyzers)	**NH92.1**	1	42,50
6000-8000	Individual dialyzer in 5 ml test tube	**NH94.1**	12	64,50
6000-8000	Dialyzer strip (8 connected individual dialyzers)	**NH95.1**	1	42,50
12 000-14 000	Individual dialyzer in 5 ml test tube	**NH97.1**	12	64,50
12 000-14 000	Dialyzer strip (8 connected individual dialyzers)	**NH98.1**	1	42,50

Accessories for Mini Dialyzer MD 100 and MD 300

① **Flotation aids**, made of PE-foam, for use of the Mini Dialyzer in large dialysis vessels. Reusable.

② **PP cover film** for protection against contamination and evaporation or for storage. Self-adhesive.

Type	Art. No.	Pack Qty.	€
① Flotation aid	**4768.1**	1	6,50
② PP cover film (for 12 dialyzer strips)	**4781.1**	1	5,60

Chemical Compatibility of Dialysis Membranes

The list below is no guarantee of chemical compatibility. In fact, it should be used as a guide. Many other factors like temperature, concentration of solvent, duration of exposure etc. may modify the effect to the membrane.

Membranes made of cellulose ester and regenerated cellulose are to be used only with diluted solvents, maximum about 25 %.
Higher concentrations may alter the membrane.

We recommend to test the membrane compatibility under your own conditions first.

Spectra/Por®-magnetic weight locking clips

Made of **PP**. With embedded magnetic weight for use with magnetic stirrers.
- The dialysis bag is completely immersed in the buffer
- Continuous, rotary action for optimal material exchange
- No additional magnetic stirrer bar is required

Suitable for diaphragms made of regenerated cellulose,
for diaphragms made of cellulose ester,
please use universal sealing clips (Art No. 0685.1 ff).

Sekuroka®-Body showers

In compliance with DIN EN 15154-1:2006, DIN 12899-3:2009 and ANSI Z 358.1-2009.

- Stable construction due to robust brass body
- Chemically resistant powder coating
- Large, maintenance-free ball stop-cock for high flow volume (at 1.5 bar 60 l/min)
- Large, easy to operate release rod
- Operative range from 1 to 10 bar water pressure
- Automatic-emptying, high-power shower head (prevents formation of bacteria and scaling)
- Maintenance-free
- Self-adhesive information label for body showers, 150 x 150 mm

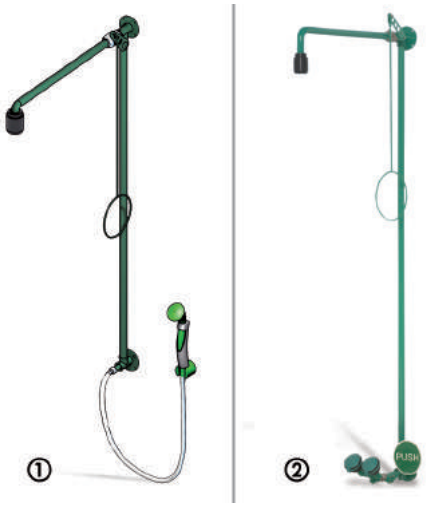
Body shower model 1

DVGW certified. For wall assembly, surface inlet pipe.
Wall flange mounting. Is triggered off by pull-rod valve, which does not close automatically. Water connection ¾″ inner thread, overhang 625 mm, pull-rod length 700 mm.

Art. No.	Pack Qty.	€
EP70.1 *	1	288,85

* Longer delivery times possible. Please check with our Sales Department.

All laboratories must have a **body shower** with a drinking water supply beside the exit which contains sufficient water (at least 30 l/min) to wet all body parts immediately. The showers must meet the requirements of DIN EN 15154-1. (Laboratory guidelines "Working Safely in Laboratories – Basic Principles and Guidelines", DGUV Information 213-850, previously BGI/GUV-I 850-0).



Body shower model 3

DVGW certified. For above the door mounting, surface inlet pipe, can be mounted on the right or left of the door, wall flange mounting. Is triggered by a pull-rod valve, which does not close automatically.
Water-connection ¾″ inner thread, overhang 565 mm, distance of pull-rod valve to shower arm 500 mm, length of pull rod 700 mm.

Art. No.	Pack Qty.	€
EP72.1 *	1	408,80

* Longer delivery times possible. Please check with our Sales Department.

Combined emergency showers

Acc. to DIN EN 15154-1:2006, DIN EN 15154-2:2006, DIN 12899-3:2009 and ANSI Z 358.1-2009. DIN-DVGW tested and approved.

- **Emergency body shower with eye wash**
- Made of brass with chemical resistant powder coating, colour green
- Water connection: ¾″ internal thread
- Wall mounting, surface-type
- Projection: 625 mm

Body showers

Combined emergency shower Body-/Eye shower model 2

Combined emergency shower
Emergency body shower and eye wash with collecting basin

DVGW tested and approved. Acc. to DIN EN 15154-1:2006 and DIN EN 15154-2:2006, DIN 12899-3:2009 and ANSI Z 358.1-2009.

- For surface-type wall mounting
- Height 205 mm, width 355 mm, depth 305 mm
- Wall-mounted shower arm ¾″ made of brass, spout projection 625 mm
- Volume flow 50 l/min at flow pressure from 1.5 bar

Emergency body shower:

- Wall flange ¾″ made of brass, water supply ¾″ inner thread
- Brass ball valve ¾″ with pull rod operation
- Pull rod with triangular handle made of steel, 700 mm long
- High-performance shower head made of chemically resistant plastic with upgraded stream, corrosion-resistant

Eye shower with basin:

- Eye and face shower with 2 shower heads and basin
- Media-bearing parts made of stainless steel 1.4301 (AISI304)
- Enclosure and basin made of unbreakable and UV-resistant ABS plastic
- Activated by pressing large stainless steel panel
- Broad-stream shower heads ensure extensive water distribution
- With integrated volume regulating valve ³/₈″ outer thread
- Water supply ³/₈″ outer thread, water drainage 1 ¼″ outer thread

Art. No.	Pack Qty.	€
KH53.1 *	1	907,80

Emergency shower inspection

Emergency showers (body showers and eyewashes) must be inspected on a monthly basis as stipulated by laboratory guidelines "Working Safely in Laboratories – Basic Principles and Guidelines" , (DGUV Information 213-850, previously BGI/GUV-I 850-0) section 7.2. Besides the flow rate, this inspection involves a visual assessment of the water distribution through the shower head and the quality of the water.

The purpose of the regular inspections is also to ensure that the actuating valve continues to operate smoothly and water flow through the shower head is maintained. In addition, the function tests safeguard against microbial contamination. It is recommended that emergency eyewashes be operated even more frequently.

Emergency shower test trolley

Mobile catch tank on 4 castors with two recessed handles. Can be dismantled into three pieces for easy storage. Drain screw for floor drainage. Retention capacity: 30 litres. Total/ catch height 2.1 m, W 440 x D 440 mm. Aluminium tube ∅ 47 mm, connectable, non extendable. Funnel ∅ 440 mm, height 160 mm. Overall weight 7 kg.

Art. No.	Pack Qty.	€
YP27.1	1	207,80

Sekuroka®-shower tester

For easy checking of body showers. Consists of: synthetic hose with stitched-in opening ring, upper ∅ 28 cm, lower ∅ 12 cm, length 180 cm. 20-litre plastic bucket. Metal clamp rod, 80 cm long.

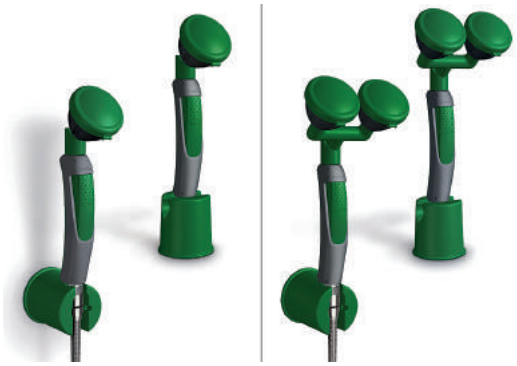
Art. No.	Pack Qty. (set)	€
T348.1	1	220,40

Sekuroka®-eye showers

In compliance with DIN EN 15154-2:2006 and ANSI Z358.1-2009. DVGW-certified.

- Rubber sleeves to protect against injury
- Dust caps open automatically when actuated
- Integral flow control ensures a steady jet of water even if water pressure varies
- With extremely wide-stream shower head for a large surface water distribution
- Large holes in the shower heads protect against scaling
- Shower heads can be removed easily for maintenance
- Self-adhesive information label for eye shower, 150 x 150 mm

Eye shower model 1



With a vertical shower head.

With non-automatic closing valve **for wall and vertical desk top mounting**. The release lever locks automatically, and the water can easily be shut off by releasing the lever. Made of plastic (media-conveying parts are made of brass). Silicone hose stainless steel clad, 1.5 m long. Flow rate 7 l/min per shower head at a minimum operating pressure of 1 bar. ½″ water connection, internal thread, union nut.

Art. No.	Pack Qty.	€
KT00.1	1	187,90

All laboratories must install an **eye shower**, which meets the requirements of DIN EN 15154-2 (Laboratory guidelines "Working Safely in Laboratories – Basic Principles and Guidelines", DGUV Information 213-850, previously BGI/GUV-I 850-0). In the event of contamination or cauterization, both eyes can, therefore, be rinsed immediately and for as long as necessary with a constant supply of drinking water.

Eye wash flasks, which do meet the requirements of DIN EN 15154-4, can still be used to supplement the emergency eye showers, especially those with special rinsing solution.

Eye showers model 2

Identical to model 1 except that the **shower head is inclined at 45°**, allowing the eye bath to be used without removing it from the wall or desktop holder.

With 1 shower head

Eye wash bottles

Disposable eye wash bottles

By Plum. Compliant with DIN EN 15154-4. **Sterile.** Supplied with dust cap. This easy-to-use product is designed to allow speedy rinsing of eyes in an emergency. Patented eye supports keep the eyelids open during rinsing. Duo design enables both eyes to be rinsed simultaneously.

- Sterile saline (0.9 %)
- Quick and easy use
- Directions for use on the bottle
- No contamination
- No cleaning or maintenance needed
- Shelf life 3 years (if unopened)

Note: disposable eye wash bottles to DIN EN 15154-4 may only be used in addition to existing eye wash units to DIN EN 15154-2 if no running potable water or water of comparable quality is available!

S

Wound and eye spray

By Plum. **Sterile** 0.9 % NaCl solution (isotonic), 250 ml.
Fast and effective rinsing of small surface wounds such as scratches and cuts on the skin or dust and dirt in the eyes.

- Easy to carry with you and ready for immediate use when needed
- Easy operation with one hand, spraying possible from all directions
- Suitable for multiple use, stays sterile after opening
- Contains non-flammable aerosol
- Rinsing solution and propellant are separate, the propellant remains in the can when spraying (bag-on-valve system)
- Total spraying time of a can approx. 15 minutes
- Durable 3 years after production

Applications: industry, production, laboratories, hazardous goods transport, work in the open, rescue services and emergency aid, wherever no clean water is available immediately.

Spare lens for UV face visor KP10.1	**KP11.1**	1	31,70

Face shield

Acc. to **EN 166**. Extremely light head support. Replaceable PC screen, pliable due to metal frame. Rotating ratchet mechanism enables width of padded head support to be individually adjusted. Ideal for protection against liquid splashes and low pressure flying particles. Dimensions of screen H 250 x W 205 mm. Height including head support 265 mm.

Type	Art. No.	Pack Qty.	€
Face shield	**E227.1**	1	32,20
Spare lens for face shield E227.1	**E228.1**	1	14,15

UV-face protection shield Bionic

Acc. to **EN 166, EN 170**.

- Large visor for good view
- Polycarbonate lens for UV-protection and good colour identification
- Scratchproof and non-fogging
- Protects against liquid splashes
- Protects against flying particles of medium energy (120 m/s), tested at extremely high temperatures
- Lenses are very easy to replace
- Individually adjustable for good fit
- Ratchet head fixture
- Frame made of robust ABS-plastic
- Soft padding on all parts that touch the head
- Skin-friendly sweatband, can be replaced and washed
- Added protection for top of head and chin
- Can be combined with respiratory protection or safety spectacles
- Very light, weight 407 g
- Dimensions: H 31 x W 24 cm

Type	Art. No.	Pack Qty.	€
UV-face protection screen Bionic	**CA34.1**	1	73,05
Spare lens for face protection screen CA34.1	**EP73.1**	1	32,75

Peltor™ OPTIME™ ear defenders

By 3M. Acc. to EN 352-1. With safety attachment for all hard hats with 30 mm slot system and face/ear protection G500 (YT38.1). High wearing comfort and low pressure inside ear even after extended wear.

- Lightweight design, optimal ear protection
- Constant pressure, liquid-filled sealing ring
- 2-point mounting

OPTIME™ I

Flat design. **Applications:** outdoor work, building trade, engineering, woodworking, metalworking, automobile industry, farming, chemical treatment.

OPTIME™ II

For high-noise environments, provides excellent sound insulation even at extremely low frequencies.
Applications: outdoor work, building trade, airports.

Delivery without safety helmet, please order separately (Art. No. NH14.1f)

Model	SNR value	Art. No.	Pack Qty. (pair)	€
OPTIME™ I	26 dB	**NH12.1**	1	22,80
OPTIME™ II	30 dB	**NH13.1**	1	29,25

Combined face and ear protection G500

By 3M. Acc. to EN 166, EN 352. The combination consists of yellow headgear, a clear, anti-fog PC visor and Optime™ I ear muffs (insulation value 26 dB A). Adjustable headgear for head sizes ranging from 54-62 cm. The visor protects against particles flying at a medium speed of 120 m/s.

- A practical and comfortable solution for all who need both face and ear protection
- Face visor and wide field of view
- Multiple combinations with protective glasses and clear or net visors
- Stable construction, long service life and excellent wear comfort

Delivery incl. headgear, PC visor, Optime™ I ear protectors.

Medical masks

By Moldex. **All-in-one fine dust mask and medical mask**
2-way protective special masks for medical applications, emergency services, pharmaceuticals industry and foodstuffs industry.

Acc. to EN 149:2001+A1:2009 Occupational Safety Standard (EC Directive 89/686/EEC) and
EN 14683:2005 Medical Products Standard (Medical Products Directive 93/42/EEC).

Protection for the wearer
- Protects against airborne hazardous substances (FFP2 NR and FFP3 NR to Occupational Safety Standard EN 149:2001)
- Protects against chemical splashes (splash resistant type IIR to Medical Products Standard EN 14683:2005)

Environment protection
- 98 % antibacterial filtration (type II to Medical Products Standard EN 14683:2005)

All the advantages at a glance:
- Fluted filter technology: very low respiratory resistance, high absorption capacity, long life
- DuraMesh®: stable mask mesh
- ActivForm®: no nosepiece required
- Soft sealing lip and all-round strap with clip
- Packed individually
- Natural latex and PVC free
- Available in two sizes

Particle filtering half masks
In accordance with European standards EN 149:2001 + A1:2009, particle filtering half masks protect the wearer **against solid and non-volatile liquid particles** and, depending on their filtration capacity, are subdivided into three classes based on OEL (Occupational Exposure Limit.

FFP1: up to 4 times OEL

FFP2: up to 10 times OEL

FFP3: up to 30 times OEL

R: Reusable
NR: Non reusable (for one work shift only)
D: Meets Dolomite Dust Test requirements. The Dolomite Dust Test is mandatory for reusable (R) masks.

smart FFP preformed masks

By Moldex. Acc. to EN 149:2001 + A1:2009
Protection against dust, aerosols and fumes
- Anatomically preformed masks - adaptable to fit different face sizes
- DuraMesh®: sturdy mask mesh keeps the mask in shape
- ActivForm®: no nosepiece required
- Klimaventil® minimises heat and moisture build-up under the mask

Premium particle masks

By 3M. In accordance with EN 149:2001 + A1:2009; for filtering out fine dust and liquid particles.

- **Masks have passed the Dolomite clogging test (D)** and have an all-round sealing lip, meaning they can be worn for more than one shift
- 3M™ Advanced Electret Media (AEM) is a high-performance filter material to facilitate breathing
- Consistently high filtering power
- **Cool-Flow exhalation valve** prevents heat from building up in the mask and makes breathing easier
- Reduces fogging of eye protection
- 3D preformed seal around the face makes the masks exceptionally comfortable to wear and extremely safe
- Flexible material with built-in nose profile allows the mask to adapt to any face shape
- Masks do not contain components made of latex, PVC or metal
- Held securely in place by a four-part fabric strap, which is adjustable and extra-wide
- Colour-coded according to protection factor (FFP = blue, FFP3 = red)

Particle filtering semi-masks are classified according to the filter peformance into 3 groups. These depend on the limit value of the harmful substance (up to 4 x, 10 x or 30 x value).

In accordance with norm EN 149: 2001, particle filtering semi-masks protect against solid and liquid particles. These are classified into three groups, FFP1, FFP2 and FFP3 depending on the level of the limit value.

Respiratory protection filters

By BartelsRieger Atemschutztechnik. Acc. to EN 141 (gas filters), 14387 (gas and combined filters), EN 371 (AX filters) and EN 143 (particle filters). With standard thread acc. to EN 148-1. Aluminium filter case. Combinable with respiratory half masks and full face masks with standard thread connection.

Max. storage time of unopened gas and combination filters is 6 years after production. AX-and NO-filters are to be used once only.

Filter	Protection against:
A2	Organic gases and vapours, with boiling point above 65 °C

Pro2000 respiratory protection filters

Acc. to EN 141 (gas filters), EN 14387 (gas and combined filters), EN 371 (AX filters) and EN 143 (particle filters). With EN 148-1 standard thread. Suitable for respiratory half masks and full face masks with standard threads.

- Low breathing resistance
- High capacity, long life

Half masks are only suitable for filters weighing 300 g or less.

Half masks AVIVA 40

Acc. to EN 140. Single-filter half masks, combinable with respiratory protection filters with standard thread acc. to EN 148-1.
Skin-friendly thermoplastic elastomer.

- Perfect fit due to flexible inner Hybrid Reflex Seal
- User-friendly leak test function
- Easily combinable with eye protection and other PPE
- Downwards oriented respiratory filter prevents fogging of the eye protection
- Improved intelligibility due to integrated voice channel
- Comfortable and robust head harness provides better grip and is ideal for use beneath headgear
- Simple rear-fastening makes them easy to put on and take off

Delivery without filter, matching filter: 1270.1ff, XK35.1ff please order separately.

Type	Art. No.	Pack Qty.	€

Promask full face respiratory protection masks

Acc. to EN 136. With EN 148-1 standard thread.

- Lightweight and anatomically shaped
- Special faceseal provides a comfortable and tight fit
- Clear inner mask
- Unrestricted field of vision thanks to large visor and left side fitting filter port
- With speech diaphragm
- Outstanding wearing comfort
- Easy to use

Promask Black made of halo-butyl elastomer.
High chemical resistance ensures long service life.
Suitable for CBRN applications (chemical, biological, radiological, nuclear).

Promask SIL made of skin-friendly, soft yellow silicone rubber.
Delivery without filter, matching filters: 1270.1ff, XK35.1ff (please order separately).

Type	Art. No.	Pack Qty.	€
Promask Black	**XK47.1**	1	180,60

① Gas filters

By 3M. Acc. to EN 141 (gas filters). The filters are fitted directly to facepiece via bayonet catch. The unique design ensures optimal weight distribution and excellent vision. Fit for respiratory masks by 3M: L167.1ff/N168.1ff/ PT45.1 f/N182.1/ HLL0.1ff.

Filter	For protection against...
A1	organic vapours with max. concentration of 1000 ppm.
A1+formaldehyde	organic vapours with max. concentration of 1000 ppm and formaldehydes.
A2	organic vapours with max. concentration of 5000 ppm.
ABE1	organic vapours, inorganic and acid gases with max. concentration of 1000 ppm.
ABEK1	organic vapours, inorganic, acid gases and ammonia derivates to max. concentration of 1000 ppm.
K1	Ammonia and derivatives with max. concentration of 1000 ppm.

Filter type	3M No.	Art. No.	Pack Qty.	€
A1	6051	**L170.1**	8	48,90

A1 + formaldehyde	6075	**L174.1**	8	57,25
ABEK1	6059	**N171.1**	8	59,85

② Particle pre-filter

By 3M. Acc. to EN 143 (particulate filters). Used together in combination with gas filters L170.1ff and HLK8.1f and filter holder L181.1.

Filter	For protection against...
P1R	Particles of inert substances up to 4 times the limit value.
P2R	Particles of inert substances up to 10 times (for semi-masks) / 15 times (for full masks) the limit value.
P3R	Particles of inert substances up to 30 times (for semi-masks) / 200 times (for full masks) the limit value.

Filter type	3M No.	Art. No.	Pack Qty.	€
P1R	5911	**L175.1**	30	43,65
P2R	5925	**L176.1**	20	71,35
P3R	5935	**N174.1**	20	89,90

③ Filter holders

By 3M. For combination of gas and particulate insertion filters.

3M No.	Art. No.	Pack Qty.	€
501	**L181.1**	2	5,65

Round particulate filters

By 3M. Acc. to EN 143 (particulate filters). The rounded shape enables easier assembly, as the filters can be attached in any position with the bayonet fastening. Breathing resistance was reduced by 30 %, thus enabling longer, fatigue-proof working. Fit for respiratory masks by 3M: L167.1ff/N168.1ff/PT45.1 f/N182.1/ HLL0.1ff.

Filter	For protection against...
P2R	Solid and liquid particles of harmful substances up to 10 times (for semi-masks) / 15 times (for full masks) the limit value.
P2R with active charcoal	Particles of harmful substances up to 10 times (for semi-masks) / 15 times (for full masks) the limit value, with additional protection against organic and acid gases and vapours as well as ozone below the limit value.
P3R	Solid and liquid particles of harmful substances up to 30 times (for semi-masks) / 200 times (for full masks) the limit value.
P3R with active charcoal	Particles of toxic and highly toxic substances up to 30 times (for semi-masks) / 200 times (for full masks) the limit value, with additional protection against organic and acid gases and vapours below the limit value as well as ozone up to 10 times the limit value.

Filter type	3M No.	Art. No.	Pack Qty.	€
P2R	2125	**L177.1**	20	82,75
P2R with active charcoal	2128	**L178.1**	20	95,70
P3R	2135	**L179.1**	20	93,35
P3R with active charcoal	2138	**L180.1**	20	112,85

Combined filter

By 3M. Acc. to EN 14387 (gas and combined filters). The filters can be attached directly to mask body. The new design distributes the weight evenly and offers an excellent field of view. Suitable for respiratory masks by 3M: L167.1ff/N168.1ff/PT45.1f/N182.1/HLL0.1ff.

Filter type	For protection against...
A1P3 R	Organic gases and vapours (boiling point above 65 °C) and particles
ABEK1P3 R + formaldehyde	Organic, inorganic and acidic gases, ammonia and derivatives, formaldehyde and particles
A2P3 R	Organic gases and vapours (boiling point above 65 °C) and particles
ABEK2HgP3 R* + formaldehyde	Organic vapours, inorganic and acidic gases, ammonia and derivatives, mercury vapours and formaldehyde and solid and liquid particles
AXP3 NR	Organic vapours/gases with boiling point below 65 °C; particles of toxic and extremely toxic substances up to 200 times the limit value.
AE1HgP3 R	Organic vapours, mercury vapours, chlorine gas, sulphur dioxide and acidic gases, as well as solid and liquid particles

*for full-face masks only

Filter type	3M No.	Art. No.	Pack Qty.	€

Gas filter with indicator

By 3M. The new 3M™ 6051i and 6055i filters for protection of organic gases and vapours ensure that the filter saturation can be readily seen and read: Thanks to the innovative 3M™ technology, the filters are equipped with a consumption display.
If used properly in the corresponding environments, it displays an indicator line when the filter should be replaced.

Important warnings and instructions for use:
Whether the new **3M™ filter consumption display** is suitable as single basis for the decision for filter change management in the individual working environment, must be considered by the user prior to use!
There is a corresponding information brochure in the packaging.
To determine whether you should rely entirely on the consumption display, please also use the 3M™-ESLI software under 3M.eu/SLS.
Matches respiratory masks from 3M:
L167.1ff/N168.1ff/PT45.1f/N182.1 and HLL0.1ff.

Filter type	3M No.	Art. No.	Pack Qty.	€

Half masks series 6500 and 6500QL

By 3M. Acc. to EN 140. Light, robust and comfortable. Strong, stable mask body with a robust but soft face seal.

- Face seal made of elastic silicone offers an optimum and comfortable fit
- Robust and adjustable headband ensures an optimum fit and high wearing comfort
- 3M™ Cool Flow™ exhalation valve reduces the breathing resistance and makes it easy to breathe
- The flat and compact design allows a wide field of vision and makes for easy cleaning of the smooth surface
- The design of the respiratory valve passes heat and moisture downwards and reduces fogging of the goggles
- Bayonet click system, compatible with 3M respiratory protection filter
- for numerous applications
- The 6500QL versions with "quick release" mechanism allow fast and simple removal of the mask during work breaks
- The straps and exhalation valve are available as spare parts

Delivery without filter, matching filter: L170.1ff, L177.1, HLK8.1, HHY2.1f and TE83.1f please order separately.

P3 R with activated charcoal	6038	**TE84.1**	8	65,50

Half masks 6000 series

By 3M. Acc. to EN 140-1998.

- Made of elastomer material
- Easy to handle and rugged
- Extremely light (82 g) for fatigue-free working
- Low maintenance (exhalation/inhalation valves are non-interchangeable)
- Reduced breathing resistance through double filter system
- Good weight distribution
- Easy filter assembly using bayonet connection

Delivery without filter, matching respiratory protection filter: L170.1 ff/ L177.1 ff/HHY2.1 ff/HLK8.1 ff/TE83.1 ff please order separately.

Dräger PARAT® rescue hoods

By Dräger. Acc. to EN 403:2004 (fire rescue hoods).
Protects eyes and respiratory passages.

- High-performance respiratory filter
- Easy to put on and safe to wear, allows a quick escape
- Wide field of vision for better orientation when escaping from a fire
- Also suitable for spectacle wearers and people with beards.
- Replacing the filter extends the shelf life by a further 8 years

Technical specifications:

Type	**PARAT® 5530**	**PARAT® 7530**
Filter performance	CO-P2	ABEK-CO-P3
Usable life	Min. 15 minutes	
Shelf life	16 years with replacement of filter after 8 years	
Weight (g)	720	830
Dimensions W x D x H (mm)	143 x 241 x 107	156 x 249 x 115

Delivery incl. hard case, dust and water spray protected box (IP 54) with protective seal.

Dräger PARAT® 5530 fire rescue hood
Protects the wearer against toxic conflagration gases, vapours and particles for at least 15 minutes while escaping from a fire. The filter is also approved for use against H2S (2.500 ppm) according to DIN 58647-7.

Type	Art. No.	Pack Qty.	€

A2P3 starter kit for the 3M™ Jupiter™ blower unit

By 3M. Battery-powered blower unit. Air-purifying respirator. Integrated electronics constantly monitor the battery's state of charge and the air flow to the head part.

- Flat design – ideal where working space is limited
- Simple cleaning and decontamination of the smooth surfaces on blowers, belts and filters
- Extremely comfortable to wear thanks to the ergonomic shape of the blower and comfortable belt
- Visual and audible alarm when the air flow or battery power is insufficient
- Device calibration is simple and can be performed by the user themselves
- Low-maintenance
- Rechargeable eight-hour battery (nickel-metal hydride) ensures a long service life with a low net weight
- Combination filters offer protection against organic gases and vapours and against particles
- The filter covers protect the filters against coarse dirt and mechanical influences
- The prefilters extend the service life of the particulate filters

Areas of application: chemical and pharmaceutical industries, metal machining and metalworking, demolition and renovation, application of paint and varnish, agriculture and many more.

Delivery incl. Jupiter™ blower unit, comfortable belt and fastening clip, filter seals, air flow indicator and calibration tubes, 2 x A2P combination filters to separate organic gases/vapours and particles, 2 x prefilters, air hose (BT-30) with adjustable length, rechargeable eight-hour battery (NiMH) and an electronic charger.

Only for use in combination with a 3M™ head part for the Jupiter™ blower unit. Please order head part separately (KCK2.1 ff.).

Lightweight hoods for the 3M™ Jupiter™ blower unit

By 3M. Comfortable textile universal material. Protects the face and eyes in accordance with EN 166 (protection against droplets or splashes and minor impact).

① **3M™ S133 disposable lightweight hood**
Covers the head and face.

② **3M™ S333G disposable lightweight hood**
Robust and extremely soft. Anti-static and low-lint.
Covers the head and face.

③ **3M™ Premium S655 reusable lightweight hood**
With flexible head suspension. Covers the head, face, neck and shoulders.

③ **3M™ Premium S60510 replacement hood**
Spare part for the 3M™ Premium S655 reusable lightweight hood.
Covers the head, neck and shoulders, without head suspension.

Alphabetical listing of harmful substances and recommended respiratory protection filters

When selecting protective breathing equipment, observe the DGUV regulations 112-190 - Use of respiratory protective devices (formerly BGR 190) !

Harmful Substance	Filter type
Acetaldehyde	AX
Acetone	AX
Acetonitril	A
Acrylaldehyde	AX
Acrylamide	A(-P3)
Acrylnitrile	A
Acrylic acid	A
Potassium hydroxide (caustic potash solution)	P2
Aluminium	P2
Alumimiumchloride	P2(-E)
Alumimium oxide	P2
Formic acid	E; B
Amine (C7-C9 aliph.)	A; B
Ammonia	K
Ammonium chloride	P2
Iso-Amyl alcohol	A
Aniline	A(-P3)
Antimony	P2
Stibine	B
Arsenous acid and its salt	P3
Arsenic trioxide (Arsenic)	P3
Arseniuretted hydrogen	B(-P3)
Asbestos	P2; P3
Ash	P2
Atrazine	P2
Bacteria	P2
Barium compounds soluble	P2
Cotton dust	P2
Petrol	A
Benzene	A
Benzyl chloride	B(-P2); A(-P2)
Beryllium	P3
Concrete (-injection guns)	P2
Biphenyl	A(-P2)
Hydrocyanic acid	B
Lead and compounds	P2
Lead chromate	P3
Lead vapour	P2; P3
Boroxide	P2
Boric acid	(E-)P2
Bromine	B
Hydrogen bromide	E-P2
Butane	AX
Butanol	A
Butanone	A
Butyl acetate	A
n-Butyl acrylate	A
Butyl amin	AX
Cadmium and compounds	P3
Calcium hydroxide, -sulphate, -oxide	P2
Carbonyl chloride	B
Chlorine	B(-P3)
Chlorbenzene	A
2-Chloro- 1,3-Butadiene	AX

Harmful Substance	Filter type
Chlorinated biphenyl	(A)P2
Chloroform	AX
3-Chlorpropene	AX
Chrome(VI)-compounds	P3
Cobalt-metal, -oxide, -sulphide	P3
Cyanamide	B-P2
Cyanide (e.g. potassium cyanide, etc.)	B-P3
Hydrocyanic acid	B
Cyclohexane	A
Cyclohexylamine	A
Cyclopentadiene	AX
Diazinone	A(P2)
Dibenozodioxine, -furane	(A-)P3
Dichlorbenzene	A
1,1-Dichlorethene, 1,2 -~	AX
Dichlormethane	AX
Dichromate Na-, K-	P3
Diesel fuel	A(-P3)
Diethylamine	AX
Diethyl ether	AX
Di-isopropylether	A
Dimethoxymethane	AX
Dimethylamine	K
3,3-Dimethylbenzidine	(A-)P3
Dimethylformamiden (DMF)	A
Dimethylnitrosamine	A(-P3)
Dimethylsulfate	A(-P3)
1,4-Dioxane	A
Pyrosulphuric dichloride	B(-P2)
Stainless steel, vapours, fine dust	P3
Iron oxide	P2
Enzymes	P3
Ethanol	A
Ethyl acetate	A
Ethyl acrylate	A
Ethyl amine	K
Ethyl benzene	A
Ethylene glycol	A(-P29
Ethylene oxide	AX
Ethyl formiate	AX
Fluorine	B
Fluoride	P2
Hydrogen fluoride (hydrofluoric acid)	E; B
Formaldehyde	B(-P3)
Formamide	A
Gypsum	P2
Glass fibers	P2
Glycidole	A
Graphite	P1
Halogens	B
Halothane	AX
n-Heptane	A
Hexachlorcyclohexane	A(-P2)
n-Hexane	A

Harmful Substance	Filter type
Hexane-Isomers	A
Wood dust	P2
Hydrazine	K
Insekticide	A(-P3)
Jodine	B(-P2)
Isocyanate	B(-P3)
Isopropanol	A
Caustic potash	P2
Lime	P2
Silica glass, silica vapours	P2
Silica acid, Kieselguhr	P2
Carbon monoxide	CO
Cresol	A
Cooling lubricants	P2
Artificial mineral fibres	P2
Copper, -vapours	P2
Lindane	A-P3
Magnesium oxide	P2
Magnesium vapours	P2
Maleic anhydride	A-P2
Manganese compounds	P2
Marble	P1
Mill dust	P3
Mercaptane	B
Methanol	AX
Methoxy ethanol	A
Methyl acrylate	A
Methyl amine	K
Methyl cyclohexanol	A
Methyl ethyl ketone (MEK)	A
Methyl isobutyl ketone	A
Molybdenum compounds	P2
Naphthaline	A(-P2)
Sodium azide	P3
Sodium hydroxide (caustic soda)	P2
Nickel-metal, -oxide, -sulphide	P3
Nitrous fumes (NO, NO_2)	NO-P3
Nitrous compounds (org.)	A
N-Nitrosamine	A-P3
Octane	A
Ozone	NO
Parathion (E605)	A-P3
Perchlorethylene	A
Phenol	A(-P2)
Phenylhydrazine	A(-P2)
Phosgene (Carbonylchloride)	B
Phosphorpentoxide	P2
Phosphortrichloride	B-(p2); E
Hydrogen phosphide (Phosphine)	B
Fungal spores	P2
Polychlorinated biphenyle (PCB)	(A-)P3
Polyvinyl chloride (PVC)	P2
Pyridine	A
Quartz	P2
Quartzing fine dust	P2
Mercury	Hg(P3)

Harmful Substance	Filter type
Rust	P1
Soot	P2
Nitric acid	E; B; NO
Hydrochloric acid (hydrogen chloride)	E(-P2); B(-P2)
Sulphur dioxide	E
Carbon bisulphide (carbon disulphide)	B; A
Hydrogen sulphide	B
Silver and compounds (soluble)	P3
Silicious carbide	P2
Stone dust (quartzing)	P2
Styrene	A
Talc	P3
Telluric, -compounds	P2
Turpentine oil	A
Tetrachlormethane	A
Tetrahydrofurane (THF)	A
Titanium dioxide	P2
o-Toluidine	A
Toluene	A
Trichloreethylene (Tri)	A
1,2,4 Trimethylbenzene	A
Triethylamine	A; K
Uranium compounds	P3
Vanadium pentoxide	P3
Vinyl acetate	A
Viruses	P3
Hydrogen peroxide	NO
Xylidine	A-P3
Xylene (all isomers)	A
Cement	P2
Zinc oxide, -vapours	P2
Tin compounds (anorg.)	P2
Tin compounds (org.)	AP2
Cytostatics	P2

Respiratory protection accessories

Sekuroka®-safety boxes

Made of breakproof plastic. With rounded edges. Ideal for storing protective products (spectacles, ear plugs, etc.) at work place. Protects equipment against dust, dirt and splashing. Boxes are affixed by glueing or screwing (incl. screws and dowels).With 5 label cards. Boxes have a neutral design and can be labelled with warning signs (NK21.1ff) .

Colour	W x D x H (mm)	Art. No.	Pack Qty.	€
blue	236 x 120 x 120	**N426.1**	1	12,40
transparent	236 x 120 x 120	**N427.1**	1	14,95
blue	236 x 125 x 225	**N428.1**	1	27,45
transparent	236 x 125 x 225	**N429.1**	1	32,20
blue	236 x 200 x 315	**N430.1**	1	36,05
transparent	236 x 200 x 315	**CHL1.1**	1	41,40

It is the manager's responsibility to ensure that respiratory protection equipment is maintained and checked in accordance with the instruction manual from the manufacturer. Should such recommendations not be available, the following table should be used as a guide DGUV regulations 112-190 (Maintenance and checking of respiratory protection (full masks, semi masks, quarter masks and mouth pieces)

Work to be carried out (Comments)	Deadlines					
	prior to releasing for use	prior to use	after use*)	half-yearly	every 2 years	every 6 years
Cleaning and disinfecting			x	x[2]		
Function and impermeability test	x			x[2]	x	
Valve disk change					x	x[1]
Communication membrane change						x
Gasket ring change					x	x[1]
Screw thread check (with Lehrdorn) if applicable						x**
Control by user		x				

After parts which may influence impermeability have been changed, a full check-over is essential.

1 for reserve equipment;
2 only random checks for equipment in airproof packaging.
*) Respiratory masks which are used regularly, should be cleaned and disinfected as often as required. They should be cleaned as soon as possible after each application,, as perspiration or saliva, which dry on the valves, can interfere with their flawlessness.The equipment must be disinfected before it is handed over to another user.
**) After the first 6-year deadline, the equipment should be checked yearly for possible wear and tear.

Respiratory protection storage box

By 3M. Ideal for storing 3M semi masks. Made of PE with labelling area. Height 120 mm, ∅ 210 mm.

Art. No.	Pack Qty.	€
P846.1	1	7,90

Sekuroka®-wall cabinet

Mobile, made of breakproof plastic with transparent door for safe and dust-free storage of respiratory protection products. Specially developed for light respiratory protection devices used at different locations. The robust, easy to assemble wall attachment allows for quick removal and easy transport of cupboard. Ideal for 1 full-view mask and 2 filters or 2 semi masks and 4 filters. Supplied with 2 shelves. Dimensions: W 270 x H 410 x D 140 mm. Weight approx. 1.6 kg.

Art. No.	Pack Qty.	€
H994.1	1	74,15

Sekuroka®-wall container

Ideal for gas mask and filters or for other personal protection equipment. Made of plastic, with transparent, removable snap-on lid. Dimensions: W 340 x H 430 x D 150 mm. Weight 1.2 kg.

Art. No.	Pack Qty.	€
2953.1	1	96,05

SecuCase

Carry and storage case for personal protective equipment.

Made of **PP**. Can be customised, handy for changing places of use or assembly work.

- Clean and safe storage of equipment
- Protective apparatus can be removed quickly and easily
- Including four safety symbol labels (wear eye protection, ear protection, mask and gloves)

Delivery without contents.

Size	W x D x H (mm)	Art. No.	Pack Qty.	€

105	**TK43.1**	40	19,00

Max®-disposable ear plugs

Acc to EN 352-2. Made of polyurethane.

- Bell-shaped for very comfortable fit and high protection
- Optimised shape for simple insertion and to prevent slipping out
- Soft, soil-resisting outer shell prevents dirt deposits and guarantees improved hygiene
- Packed in pairs
- High insulating values, SNR value: 37 dB

Type	Art. No.	Pack Qty. (pair)	€
without security tear band	**KN21.1**	200	46,05
with security tear band	**KN22.1**	100	54,60

No-Touch disposable ear plugs

By 3M. Acc. to EN 352-2:2002. Made of slowly expanding foam.
Pre-formed, soft plugs can be used immediately.

- No rolling up into a ball necessary! With band, practical and hygienic
- Can be combined with other personal protective equipment
- Come packed in pairs
- SNR-value: 35 dB

Art. No.	Pack Qty. (pair)	€
KA60.1	100	96,75

Disposable ear plugs

By 3M. Acc. to EN 352-2. Made of PU-foam, antiallergic, toxicologically tested and medically harmless for use in industry. Very soft and flexible for an extremely comfortable fit.The special shape enables plugs to adapt optimally to the auditory canal. The low pressure on the ears makes them particularly suitable for people with narrow auditory canals. SNR: 34 dB.

Type	3M No.	Art. No.	Pack Qty. (pair)	€
without safety band	1120	**EH62.1**	200	NLA
with safety band	1130	**EH63.1**	100	NLA

Ear protection

Work Safety Act for the prevention of noise and vibration (March 2007) instruct the employer to provide the employee with suitable ear protection when exposure to noise exceeds **80 dB(A)**.
Individual ear protection must be used when exposure to noise has reached or exceeds **85 dB(A)**.

Attenuation values of ear protection products:

Ear muffs or ear plugs?

It is not possible to say that the one is better than the other, but it is rather a question of what is more suitable under individual working conditions. Ear plugs are usually used for protection against long-term noise (weight!), ear muffs for short-term noise and both of them together for protection against extreme short-term noise.
Past experience has shown, however, that comfort (i.e. handling) and hygiene have always played a major role when selecting the correct protection. In order to encourage the wearing of ear protection, we recommend giving the employees the possibility to choose.

The ear protection is insulated to max. 20-40 dB(A), depending on frequency, material and anatomy. To achieve a higher level of insulation, the ear protection plugs and capsules can be combined. Ear protection plugs can be used for noise levels of up to 115 dB(A) (refer to manufacturer's information). Combinations of plugs and capsules are suitable for higher noise levels.

Ear plugs E.A.R.® Classic II

By 3M. Acc. to EN 352-2. Comfortable fit, high noise attenuation, washable. SNR-value: 28 dB.

Art. No.	Pack Qty. (pair)	€
0245.1	5	4,00

Disposable ear plugs Bilsom

Acc. to EN 352-2. Made of insulating, dermatologically tested PU foam rubber (does not contain PVC). Conic shape for optimal fit in the ear canal. Nominal size 5-12 mm. Weight approx. 0.5 g. SNR-value 33 dB.

① Ear plugs Bilsom 303L in hand dispenser

Ear plugs xact-fit

By UVEX. Acc. to EN 352-2. These innovative plugs adapt perfectly to the ears. The design for the left and right ear is modelled on the anatomy of the ear canal. This noticeably reduces the pressure in the ear canal, even after long wearing.

- Convenient and easy to use
- Oval shape ensures optimal wearing comfort
- Foam plugs are interchangeable for maximum economy and hygiene
- Free of PVC, SNR: 26 dB

Type	Art. No.	Pack Qty. (pair)	€
Ear plugs, with cord	**XC88.1**	50	114,00
Spare plugs	**XC89.1**	250	81,55

Disposable ear plugs

By Moldex. Acc. to EN 352-2. Comfortable soft PU-foam plugs.
Ideal for work which requires constant ear protection. Soft, easy to insert.
Plugs, wall attachment and packaging are completely PVC-free.
Bright colours increase wearing acceptance.
2 models available:

① Spark plugs:
- Anatomically pre-formed
- SNR-value: 35 dB(A)

② MelLows:
- For better perception of surroundings and better communication
- Especially suitable for lower noise exposure
- SNR-value: 22 dB(A)

Delivery incl. 250 pairs in disposable dispenser station for hanging in wall attachment (please order separately), makes ear protection quickly and hygienically available at work site.

Type	Moldex No.	Art. No.	Pack Qty.	€

Disposable ear plugs LASER LITE®

Acc. to EN 352-2. Two-tone plug made of PU. Extremely soft foam. Plugs adapt automatically to the auditory canal. Cause no irritation or allergies. SNR-value: 35 dB.

Packed in pairs in a practical box
(not suitable for ear plug dispenser Y862.1)

Art. No.	Pack Qty. (pair)	€
Y861.1	200	45,20

Earplug dispenser

Made of hard, anodized aluminium. Very robust, suitable for continuous stress. Easy removal of plug by turning the crank.
Can be filled with ear plugs Y861.2 (500 pairs) and Y868.1 (200 pairs).

Delivery incl. fittings, without content.
500 pairs in the refill pack, please order separately.

Type	Art. No.	Pack Qty.	€
Dispenser	**Y862.1**	1	227,90
Refill pack for dispenser Y862.1	**Y861.2**	1	90,25

Ear protection

X-fit and Com4-fit ear plugs

By UVEX. Acc. to EN 352-2. Ergonomically designed **disposable ear plugs** for mobile long-term protection.
Made of allergy-free PU-foam with a synthetic elastomer.
- Pleasantly soft
- "X"-embossing for comfortable fit and reduction of pressure in the auditory canal
- Closed surface prevents impurities from entering

① **X-fit:**
- For larger auditory canals
- For high and continuous noise exposure
- Very high insulating value, SNR-value 37 dB

② **Com4-fit:**
- For smaller auditory canals
- For lower noise exposure
- SNR-value 33 dB

Type	Art. No.	Pack Qty. (pair)	€
X-fit, loose on refill box for dispenser HH01.1	**HE98.2**	300	45,00
Com4-fit, loose on refill box for dispenser HH01.1	**HH00.2**	300	45,00

Ear protection dispenser

By UVEX. Robust, easy-to-use dispensers
- Automatic dispensing guarantees economical removal, plugs fall out individually when turned
- Simple and hygienic refilling
- Max. filling amount 600 pairs
- Can be filled with X-fit, Com4-fit and all standard ear plugs
- Suitable for wall assembly

Delivery incl. mounting material for wall assembly, without ear plugs.

Art. No.	Pack Qty.	€
HH01.1	1	66,85

ULTRAFIT ear plugs

By 3M. Acc. to EN 352-2. Pre-moulded ear plugs made of thermoplastic elastomer. Thanks to their flat design, they are a perfect fit for any ear canal. To wash the ear plugs use warm soapy water. **Reusable.** Suitable for sensitive working areas in the foodstuffs and chemicals industries.
SNR value: 32 dB.

Type	3M No.	Art. No.	Pack Qty. (pair)	€
① with safety cord	UF01000	**TE80.1**	50	124,60

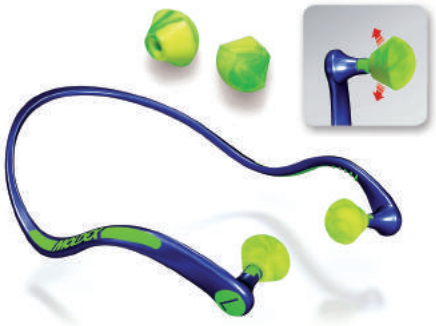
Spare plugs for clamp ear protector	**P784.1**	20	24,85



Ear protection plugs whisper+detec

By UVEX. Acc. to EN 352-2. Soft, able to detect **reusable ear plugs** with excellent fit inside ear channel. Especially ideal in a dirty working environment. Smooth surface prevents particles, which could cause injuries, from collecting.

- For medium noise range
- Plugs are blue for better visibility on the product line
- Detectable
- Hygienic box for clean storage
- Are always within reach
- Fast and easy to use
- Washable
- Easy to communicate
- Suitable for the food sector
- SNR-value: 27 dB

Clamp ear protectors x-cap / x-fold

By UVEX. Acc. to EN 352-2. PU ear protection plugs.
The lightweight alternative to ear muffs. Ideal ear protection for visitors and on-the-go use.

- For temporary noise protection
- Specially designed earpieces, excellent shape retention
- Readily available, convenient and easy to use
- Comfortable fit, easy communication
- Very light, approx. 8 g
- Colour: grey or blue

x-cap: SNR value: 24 dB.

x-fold: Foldable, i.e. handy for on-the-go use. SNR value: 23 dB.

Ear muffs 3M™ Peltor™ X-series

By 3M. Acc. to EN 352-1.

- Modern and attractive slim design
- Double bracket design for better balance and greater comfort
- Low weight
- Soft, wide sealing rings reduce the pressure on the ears and enhance wearing comfort
- Innovative new attenuating cushions and intermediate rings ensure improved attenuation
- Innovative, patented foam in the sealing rings for effective protection
- The cups offer abundant space inside to minimize heat and moisture
- The sealing rings and inserts are easy to replace, for easy cleaning of the cups
- The headband of the ear muffs are dielectric (electrically insulated). The metal parts of the headband are coated with a conductive material, which means that the hearing protection van also be used with a low electrical voltage (less than 440 V AC)

① **Ear muffs 3M Peltor X1**
For protection against light industry noise, lawn mowing, power drilling, etc.
SNR 27 dB, weight 184 g.

② **Ear muffs 3M Peltor X2**
For protection against moderate to high industrial noise levels including roadworks, construction etc.
SNR 31 dB, weight 220 g.

③ **Ear muffs 3M Peltor X3**
For protection against noise in the forestry industry, heavy engineering, at airports, etc.
SNR 33 dB, weight 245 g.

④ **Ear muffs 3M Peltor X4**
With slim cups For use against high noise levels in a wide range of industries.
SNR 33 dB, weight 234 g.

Rotiprotect®-skin protection cream

Protects and nourishes the skin. Creates a water-repellant protective film. Promotes the regeneration of skin cells and preserves the natural acidic mantle of the skin. Contains silicone, essential fatty acids, allantoin and RMS, a lactic acid, pH 4.

Packaging	Art. No.	Pack Qty.	€
Dispenser 55 g	**0543.2**	1	8,85

SINEPRINT®

Hand protection cream made for using natural ingredients.
Protects hands,does not leave residue and increases finger grip.
Non-greasing, silicone-free, paraben-free.

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**2987.1**	1	6,40

DUALIN® cream

Protects against **non-water soluble** and **water soluble** substances and is therefore ideal for workplaces with different working materials.
Absorbs into the skin quickly, is slightly perfumed, very hypoallergenic.
Free of paraffin, silicone and paraben.

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**P332.1**	1	7,75

HERWESAN ALL-IN-ONE (non-greasing cream)

Areas of application: non-greasing protective cream for handling of working materials with water-soluble and hydrophobic properies, for example, in metal processing and in plastics technology, microelectronics and electrical engineering.

- Easy to spread, quickly absorbed O/W skin protection emulsion
- With a new film formation system for protection against water-soluble and hydrophobic working materials
- Non-greasing and therefore a particularly good, comfortable grip remains following absorption
- Cost-effective dosing system
- Silicone-free

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**KN04.1**	1	7,45

HERWEDERM PROTECT SENSITIVE skin protection gel

For imprint-free working and frequently changing work materials; also suitable for sensitive skin types. Universally usable, for face and hands, recommended for extremely sensitive skin types.
For use in the food industry, hospitals, nursing and retirement homes, as well as in electrical engineering. Protection against colours, grease, damp/wet, resins, adhesives, paints, oil, tar-like substances, changing areas of use.
Easy to apply, absorbed quickly. pH neutral, non-greasy, free from preservatives, parabens, silicone and dyes, non-perfumed.

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**YT47.1**	1	8,00

HERWESAN ACQUA skin protection cream

Water insoluble cream, W/O emulsion type. For handling aqueous substances such as water-based coolants, drilling emulsions, diluted bases, detergent solutions, alkali and acidic cleaners, cement, lime and mortar.

- Excellent protective effect
- High adhesive strength
- High oil content
- Slightly perfumed, silicone-free

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**KAL5.1**	1	5,35

LINDESA®-skin protection and skin care cream

Oil-in-water emulsion containing natural beeswax and allantoin for care of the skin. For use in applications involving low stress on the skin or daily work in high humidity environments. Protects against skin damage and soothes irritated skin areas while smoothing and conditioning the skin.
Suitable as an afterwork skin care cream or for conditioning stressed skin. Fast-absorbing, low-greasing, silicone-free, beeswax-scented.

Type	Packaging	Art. No.	Pack Qty.	€
Perfumed	50 ml tube	**YY19.1**	1	4,25
Perfumed	100 ml tube	**YY19.2**	1	5,35

LINDESA® K
Non-greasy skin protection cream with chamomile

Oil-in-water emulsion that contains natural beeswax and chamomile. Particularly suitable for working environments where leaving grease marks on surfaces must be avoided, e.g. when painting, in electrical manufacturing or the final inspection. Also suitable for caring for stressed skin. Strengthens the skin's defensive function and prevents skin damage caused by external stresses. Has a normalising effect on irritated skin. Non-greasy, fast-absorbing, scented, silicone-free.

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**EEE5.1**	1	5,60

LINDESA® PURE PROFESSIONAL skin protection and skin care cream

Oil-in-water emulsion containing natural beeswax and allantoin for skincare. Suitable for everyday skin care. Protects against skin damage and soothes irritated skin while smoothing and conditioning. Suitable as an after work skin care cream or for conditioning stressed skin. Contains paraben-free preservatives. Quickly absorbed by the skin, slightly oily, silicone and fragrance-free.

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**KAX9.1**	1	5,35

LINDESA® F PROFESSIONAL

Oily skin protection cream, W/O emulsion with natural beeswax. Prevents skin damage when working with water and when handling diluted surfactant solutions and diluted alkalis, e.g. washing and cleaning solutions. Also suitable for skin care after working when skin is highly degreased and for protecting against cold and frost. Perfumed, silicone-free.

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**KAL1.1**	1	6,40

SANIWIP®

Hand cream for protection against damage to the skin when working with **water soluble agents** such as acids, alkali, solvents and alcohol. Prevents cracking of the skin. Suitable for use in foodstuffs processing. Also suitable for the care of highly stressed skin. Without perfume or silicone.

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**C785.1**	1	6,80

PHYSIO UV 30 sun

Skin protection creme for protection against exposure to UV-A, UV-B and UV-C radiation with well balanced protection factor UV-B 30/UVA 10.
Use: for protection against intensive UV radiation or when using artificial UV radiation sources.

- white, medium-moisturising W/O emulsion
- Waterproof, contains no fragrances, preservatives or petroleum
- With reflective titanium oxide UV filters (silicone coated)
- Vitamin E acetate combats ageing of the skin

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**P346.1**	1	9,15

Physioderm® PROGLOVE

Protects the skin against the effects of skin softening when wearing gloves. Transparent fragrance and greece free gel containing alcohol. Hamamelis and chitin protect the upper layer of the skin while bisabolol and glycerine moisturise and soothe the skin. Suitable for foodstuffs.
Contains no fragrances, preservatives, silicone or grease.
Matching dispenser for AH81.2: YY16.1.

Image	Type	Art. No.	Pack Qty.	€
①	100 ml tube	**AH81.1**	1	11,80
②	Dispenser bottle 1000 ml	**AH81.2**	1	36,35

PROTEXSAN skin cream

Protection against water-soluble and water-miscible substances (e.g. water-mixed oils and cooling lubricants, diluted acids and alkalis, alcohol, washing-up liquids and detergents, disinfectants, salts, and cement) and against free radicals.

- Contains luteolin, co-enzyme Q10 and vitamin E, as well as skin-related lipids
- Does not contain any aluminium salts, preservatives or emulsifiers
- Free from mineral oils, silicone-free, unscented
- Fast-absorbing
- ECARF-certified

Packaging	Art. No.	Pack Qty.	€
50 ml tube	**EEE6.1**	1	11,30

HERWE DRY EMULSION

Area of application: prevents softening of the skin as a result of wearing airtight clothing and in case of mechanical stress on the skin. For example, when wearing gloves for microelectronic work, and when handling cardboard boxes.

- Non-greasing O/W emulsion
- Hardens corneal layers
- Non-greasing cream
- Reduces perspiration and protects against softening of the skin
- Increases wearing comfort of protective clothing
- Lightly perfumed, silicone-free

Packaging	Art. No.	Pack Qty.	€
250 ml bottle	**KN05.1**	1	10,70

HERWESAN UV

With sun protection factor 30 (International SPF Test Method, Colipa).
Area of application: for protection against strong solar radiation or during exposure to artificial sources of radiation.

- White, slightly greasing, weak-fragrance O/W emulsion
- Waterproof and easy to spread on the skin, easily absorbed
- Silicone-free
- Contains inorganic UV protective pigments and special sunscreens, thus protecting the skin against harmful UV-A, -B, -C radiation
- Skin care properties through cosmetic oils and shea butter

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**KN20.1**	1	10,50

Baktolan® protect+ pure

Water-in-oil-in-water emulsion, protects against aqueous solutions and revitalises cracked, hard-working skin. Protects the skin when performing tasks involving aqueous solutions. Can be used under gloves to counteract skin irritation due to occlusion. Suitable for use several times a day. Fragrance, silicone and colourant free.

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**TE58.1**	1	9,80

Marly-Skin®-skin protection foam

Microfine foam penetrates the skin rapidly and forms a protective barrier against harmful and irritant substances. Protection for 4-6 hours. Suitable for use on the entire body, non-greasy, unnoticeable, economical in use. Ideal for use under gloves. Clinically tested.

Note: does not replace protective measures, e.g. wearing gloves.

Packaging	Art. No.	Pack Qty.	€
Spray can 50 ml	**2938.3**	1	12,85
Spray can 100 ml	**2938.1**	1	22,40

SANSIBAL® skin protection cream

White, slightly oily, fast absorbing cream, O/W emulsion type. Water-soluble skin protection cream, the solid substances in which form a separating and protective film after application. Offers protection when working with non-water-soluble substances (e.g. oils, certain organic solvents, non-aqueous coolants).
Perfumed, silicone-free, neutral pH.

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**KAL2.1**	1	7,20

SANSIBON® skin protection cream

White, slightly oily, fast absorbing cream, suspension with skin protection pigments. Water-soluble skin protection cream which protects against highly-adhesive dirt and which facilitates gentle skin cleaning through special emulsifiers. Protects the skin against intensive dirt or strongly adherent working materials (e.g. used oil, adhesives, resins, varnishes, paints).

- Perfumed, silicone-free
- pH-neutral
- No mineral oil or parabens

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**KAL3.1**	1	6,40

HERWESAN UV 50 SPRAY skin protection spray

Highly effective UV protection spray for OUTDOOR use.

- Waterproof, transparent, non-greasy
- High UVB sun protection factor 50, balanced UVA protection
- Protection against UVA and UVB radiation (SPF 50)
- Extremely light, fast absorbing formulation, therefore ideally suited to use on large areas and parts of the body covered in hair
- Supplies the skin with panthenol and vitamin E
- Convenient pump spray to enable use all over the body (e.g. including the back and legs)
- Slightly perfumed, silicone-free

Packaging	Art. No.	Pack Qty.	€
200 ml spray bottle	**KAL7.1**	1	24,60

Silicoderm®F BAYER

Hand protection cream with silicone oil, sorbit and vitamin F. Protects reliably against skin damaging conditions. Slightly cooling, pleasant smell.

Packaging	Art. No.	Pack Qty.	€

Tubenboy®

Made of ABS/SAN, very robust. For total emptying of all plastic and metal tubes. The tube can be stored in an upright position. The actual tube content can always be seen. For max. tube width 66 mm.

Art. No.	Pack Qty.	€
AK63.1	1	3,55

Cura Soft

Skin care cream. Is absorbed quickly and is only slightly greasing. Fat content 7 %. Ideal for nourishing and regenerating skin subjected to stress. Oil-in-water-emulsion. Slightly perfumed, silicone-free. Dermatologically tested.

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**Y866.1**	1	6,40

cUrea soft

Application: fast absorbing skin care cream containing naturally hygroscopic urea. Nourishes sensitive, worn skin. Helps skin to regenerate effectively from abrasional dermatosis or eczema. Also suitable as nail care.

Product description:

- Contains urea, horsetail plant extracts and high quality bisabolol
- Smooths extremely dry, worn hands
- Slightly greasing cream, emulsion type O/W
- pH-value neutral and perfumed
- Silicone-free and without mineral oil

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**LP24.1**	1	7,45

Skin care

ROTIDERM®

Hand care cream for highly stressed and sensitive skin. Contains essential fatty acids, Sorbitol, waxy high fatty acids and dextrorotatory lactic acid. Helps to repair cracked skin and restore the natural acid balance of the skin. pH 4, unperfumed.

Application: apply to cleansed and dried skin after work which is tough on the hands. Absorbs completely without leaving a greasy film.

Packaging	Art. No.	Pack Qty.	€
Dispenser 55 g	**5535.2**	1	8,85

HERWE QUREA CARE cream-gel

With highly active moisturising complex and intensive care effect.

- Fast absorbing cream-gel for work-related stressed skin
- With urea, lactic acid and hyaluronic acid
- Valuable cosmetic lipids as care components
- Coenzyme Q10 and Vitamin E for antioxidant protection
- Silicone-free

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**KAL6.1**	1	6,05

HERWE CURA

Area of application: easily absorbed skin care cream. Every time after washing hands and face; also during work in the company or office.

- Slightly greasing cream, emulsion type O/W
- Contains natural oils and beeswax
- Easily absorbed, ensures pleasant feeling on the skin
- For hands and face
- Regenerates the skin
- Weak fragrance, silicone-free
- Suitable for all skin types

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**KN06.1**	1	4,85

HERWE MIELOSAN

High-quality hand and foot care cream for dry and stressed skin. To care for skin after intensive hand washing and other activities that particularly dehydrate the skin. Supports the skin's natural moisture retention capacity. Easy to apply, very little required. With honey, urea, glycerine and allantoin, silicon-free.

Packaging	Art. No.	Pack Qty.	€
100 ml tube	**YT49.1**	1	6,35

Baktolan® lotion

Moisturising care for normal skin, with vegetable oils and panthenol. Oil-in-water-emulsion. Suitable for both daily body skin care and for hand care. Is light and distributes well. Soaks into the skin quickly and leaves no irritating oily film. Slightly perfumed, silicone-free. Excellent when doing paperwork, for working in the laboratory, etc.

Packaging	Art. No.	Pack Qty.	€
350 ml bottle	**L297.1**	1	8,20

Baktolan® lotion pure

Fragrance-free O/W emulsion for normal skin.

- High skin tolerability
- Absorbs quickly without leaving a greasy film
- Significantly increases the skin's moisture

Areas of application:
Can be used on the hands and body. This mild O/W emulsion has been adapted to the skin's physiological characteristics and is especially suited to daily use, as well as applications in which fragrance-free skincare is particularly sought-after.

Packaging	Art. No.	Pack Qty.	€
350 ml bottle	**EKH7.1**	1	7,55

Baktolan® balm pure

Fragrance free W/O emulsion for dry, highly stressed and sensitive skin. Contains the following active ingredients: allantoin, vitamin E and panthenol. Moisturising and soothing effect, stabilises the skin's protective barrier, pH 5.5. Spreads easily, economical in use, is absorbed quickly, does not form a greasy film.

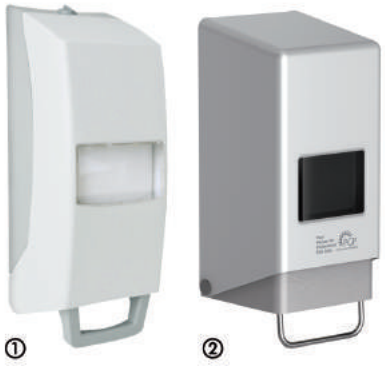
Packaging	Art. No.	Pack Qty.	€
350 ml bottle	**ANY7.1**	1	11,50

CARE PURE skin protection cream

Intensive care cream with natural oils and seabuckthorn extract for extremely strained and dry skin. O/W emulsion, contains a balanced combination of natural oils which compensate for lipid loss in highly stressed skin. Reduces skin redness, smooths and cares for irritated skin. Equalises the water balance of the upper layer of skin, keeps the skin elastic and improves its mechanical resistance.

- Contains no synthetic perfumes, colourings or preservatives
- Silicone- and mineral oil-free
- Suitable for working in the food sector
- ECARF-certified

Packaging	Art. No.	Pack Qty.	€
50 ml tube	**KAL4.1**	1	5,35



Physioderm® cream

Refatting skin care cream, improves the skin's water-binding capacity, helps restore the skin's hydrolipidic film, improves skin smoothness and can help to regenerate the skin in case of attrition dermatitis or eczema. Oil-in-water emulsion with high level of lipids, perfumed, silicone free.

Applications: care and protection of work-stressed skin, especially brittle or dry skin.

Moist hand wipes plum wipes

By Plum. Effectively and carefully removes all kinds of dirt and soiling caused while working. The moist PP tissues absorb and bind the dirts; and they can be used repeatedly, also suitable for cleaning labware or tools. Lightly perfumed and, because of the glycerine additive, are moisturizing.

- ① **Multi-purpose wipes** with a wide spectrum of application for removing slight to medium soiling.
- ② **Heavy duty-wipes** with additional rubbing effect for removing stubborn and bad soiling, e.g. oil, fat and grease.

Baktolin® pure

Cleaning lotion for mild cleaning.
- Fragrance-free and colourant-free
- Free of alkali and soap
- Skin-neutral pH value of 5.5

Areas of application: Due to the omission of fragrance and colourants,
Baktolin® pure is particularly suitable for sensitive skin. The pH value of 5.5 conserves the skin's natural acid-protection layer. At the same time, this makes the product ideal for use in food-processing fields, in which detrimental effects on the goods to be processed are to be avoided.

Sterillium® classic pure

Hygienic and surgical rub-in hand disinfectant. Ideal for users with sensitive skin (colorant and fragrance free). For all hygiene-sensitive clinical and industrial applications.
Efficacy range: bactericidal, tuberculocidal, limited virucidal efficacy (incl. HBV, HIV, HCV). Effective against herpes simplex, influenza A, SARS coronavirus, adeno-associated viruses, polyoma virus and rotavirus.
Listing: BfArM Approval No. 25918.00.00, RKI list area A, VAH certification, IHO list for virucidal products. Actual product not shown (similar).

Sterillium classic pure: Active substances : propan-2-ol, propan-1-ol, mecetronium ethyl sulphate. Composition: 100 g solution contains: Active substances: 45.0 g propane-2-ol, 30.0 g propane-1-ol, 0.2 g mecetronium ethyl sulphate. **Other ingredients:** 85 % glycerol, tetradecane-1-ol, purified water. **Areas of application:** for hygienic and surgical hand disinfection. For skin disinfection prior to injections and punctures. **Contraindications:** unsuitable for the disinfection of mucus membranes. Do not use in close proximity to the eyes or open wounds. Do not use in case of hypersensitivity (allergic reaction) to one of the active substances or other ingredients. **Side effects:** slight dryness or irritation of the skin may occasionally occur. In such cases, more intensive general skin care is recommended. Allergic reactions are rare. **Warnings:** hand disinfection helps prevent the transmission of infection, e.g. in nursing and health care. Sterillium classic pure should not be used on newly or prematurely born infants. Always consult a doctor prior to use on infants and small children. It is important to ensure that the solution does not come into contact with the eyes. After contact with the eyes, rinse the eyes under running water for several minutes holding the eyelids open. Avoid transferring the solution from one container into another in order to prevent contamination. If this is unavoidable, the solution should be transferred under aseptic conditions (e.g. using sterile containers under a laminar air flow hood). Wait until dry before using electrical devices. Do not expose to naked flame. Do not use in the vicinity of ignition sources. Flash point: 23 °C, flammable. There are no fire or explosion hazards associated with the proper use of this product. After spillage of the disinfectant, the following steps should be taken: soak up the spilt liquid straight away, dilute with copious amounts of water, ventilate the room and remove ignition sources. Refrain from smoking. In the event of fire, extinguish with water, extinguishing powder, foam or CO_2.

Skin disinfection

Sterillium® Virugard

Ethanol-based rub-in hand disinfectant. Especially useful for all working areas with an increased infection hazard, such as clinics, laboratories, hospitals etc.
Efficacy range: bactericidal, fungicidal, tuberculocidal, limited virucidal efficacy (including HBV, HIV, HCV), virucidal. Effective against herpes simplex, adeno-associated viruses, polyoma viruses, polio and rotavirus.
Listing: BfArM Approval No. 13814.00.00. RKI list area A/B, VAH, IHO list for virucidal products.

Sterillium Virugard: Active substance: ethanol. **Ingredients:** 100 g solution contain: Active substance: ethanol 99 % 95.0 g. Other ingredients: butan-2-on, glycerol, tetradecan-1-ol, petroleum. **Areas of application:** hygienic and surgical hand disinfection. **Contraindications:** Do not apply to mucus membranes. Do not use in close proximity to the eyes or open wounds. Hypersensitivity to ingredients. **Side effects:** slight, diffuse reddening of the skin may occur rarely. In such cases, more intensive general skin care is recommended. **Warning:** do not expose to naked flame. Do not use in the vicinity of ignition sources. Close bottle after use. Flash point according to DIN 51755: 0 °C. Highly flammable. Avoid electrostatic charge. Do not touch if your skin has come into contact with alcohol. After spillage of the disinfectant, the following steps should be taken: soak up the spilt liquid straight away, dilute with copious amounts of water, ventilate the room and remove ignition sources. Refrain from smoking. Refilling may only be performed under aseptic (clean bench) conditions.

Cutasept® F

For skin disinfection, e.g. in the event of accident or minor injuries. Fast acting and comprehensive. Excellent skin tolerance. Ready-to use, colourless solution.
Efficacy range: bactericidal (including MRSA), fungicidal, tuberculocidal, limited virucidal efficacy (including HBV, HIV, HCV), rotavirus.
Listing: BfArM Approval No. 6281157.00.00, VAH.
Delivery incl. invertible spray nozzle for 50, 250 and 500 ml bottles (please order spray nozzle for 1000 ml bottle separately).

Cutasept F: Active substance: propan-2-ol. **Ingredients:** 100 g solution contain: Active substance: propan-2-ol 63.0 g, equivalent 72 % by vol. Other ingredients: benzalkonium chloride, purified water. **Areas of application:** skin disinfection prior to punctures, injections and surgical procedures. Surgical and hygienic hand disinfection. **Contraindications:** do not use in close proximity to the eyes. Intolerance to ingredients. When used properly, Cutasept F is safe for use during pregnancy and breast-feeding. **Side effects:** slight, diffuse skin irritation occurs frequently. Contact allergic reactions may occur. **Warning:** there is not enough clinical data to recommend this product for the treatment of infants and toddlers. In these cases, this product may only be applied after stringent diagnosis and under medical supervision. Benzalkonium chloride may cause skin irritation. Do not wet skin below blood pressure cuffs. Do not apply surgical film until dry. Wait until dry before using electrical devices. Avoid accumulation on patient beds/seats. Do not expose to naked flame. Keep clear of ignition sources. There are no fire or explosion hazards associated with the proper use of this product. If the solution comes into contact with eyes, hold the eyes open and rinse with running water for several minutes. After spillage of the disinfectant, the following steps should be taken: soak up the spilt liquid straight away, dilute with copious amounts of water, ventilate the room and remove ignition sources. Flash point according to DIN 51755: 21 °C. Flammable. Refilling may only be performed under aseptic (clean bench) conditions.

As of 21st April 2018, the European regulation on personal protective equipment (PPE) (EU) 2016/425 replaced the previous directive 89/686/EEC

EC type examination certificates in accordance with directive 89/686/EEC remain valid until 21st April 2023, provided they do not expire before then.

PPE that corresponds to directive 89/686/EEC and that was placed on the market before 21st April 2019 may be provided on the market and used by operators until 21st April 2023.

European Standards for protective gloves:

EN 374	Protective gloves against chemicals and micro-organisms
EN 388	Protective gloves against mechanical risk
EN 407	Protective gloves against thermal risk
EN 420	General requirements for gloves
EN 421	Gloves for protection against ionising radiation and radioactive contamination
EN 455	Medical gloves for single use
EN 511	Protective gloves against the cold
EN 1082	Protective clothing, gloves and protective sleeves for protection against cuts and stab injuries caused by pocket knives
EN 1149	Protective clothing against electrostatics
EN 12477	Protective gloves for welders

AQL-value: Statistical procedure for quality analysis.

Identification of protective gloves via standardized pictographs:

Protection against mechanical hazards

Protection against chemical hazards

Waterproof protective gloves and low protection against chemical hazards

Protection against bacteriological contamination

Protection against radioactive contamination

Protection against cold

Protection against heat and flames

Commodity goods which are safe to come in contact with food

Rotilabo®-wall dispensers

Made of **stainless steel**. Suitable for all Rotiprotect® glove dispensers and Rotizell®-tissue dispenser. By lightly pressing the two metal hoops together, other dispensers of max. 7.5 cm width can be inserted.

Rotiprotect®-Nitril evo disposable gloves

Material: nitrile rubber.
Acc. to EN 420, EN ISO 374-1/type B (KPT), EN ISO 374-5 (virus), ASTM-F 1671-97. AQL 1.5
Acc. to 1935/2004 - suitable for contact with foodstuffs

Textured fingers for secure grip

- Non-powdered
- Higher durability thanks to special formulation
- High elasticity and good tactile sensitivity
- Can be worn on both hands
- Beaded cuff
- Colour: blue
- Thickness: approx. 0.12 mm
- Length: min. 240 mm
- Free from phthalates/plasticisers and allergenic latex proteins
- 100 or 90 per dispenser box

Ideal for general laboratory use, good resistance to many chemicals, greases and oils.

Size	Art. No.	Pack Qty.	€
S (6-7)	**CPX6.1**	100	40,35
M (7-8)	**CPX7.1**	100	40,35
L (8-9)	**CPX8.1**	100	40,35
XL (9-10)	**CPX9.1**	90	40,35
With 10 boxes of each size			36,32/box

Disposable gloves
These gloves have been manufactured for single use and should be disposed of regularly. They are liquidproof and can therefore be used as protection against splashing of certain chemicals. Gloves which have been contaminated with chemicals should be changed as soon as possible.

Cat. III

Rotiprotect®-Nitril eco disposable gloves

Material: nitrile rubber.
Acc. to EN 420, EN ISO 374-1/type B (KPT), EN ISO 374-5 (virus).
ASTM-F 1671-97. AQL 1.5
Acc. to 1935/2004 - suitable for contact with foodstuffs

Textured fingers for secure grip

- Extra thin and soft for maximum wearing comfort
- High tactile sensitivity
- Can be worn on both hands
- Beaded cuff
- Colour: blue
- Thickness: approx. 0.10 mm
- Length: min. 240 mm
- Free from phthalates/plasticisers and allergenic latex proteins
- 100 or 90 per dispenser box

The perfect disposable solution for splash protection against many chemicals and for handling greasy foodstuffs. The blue signal is suitable for areas which are subject to HACCP standards.

Size	Length (mm)	Art. No.	Pack Qty.	€
S (6-7)	≥240	**TC12.1**	100	34,65
M (7-8)	≥240	**TC13.1**	100	34,65
L (8-9)	≥240	**TC14.1**	100	34,65
XL (9-10)	≥240	**TC15.1**	90	34,65
With 10 boxes of each size				31,19/box

Cat. III

Rotiprotect®-Nitril light disposable gloves

Material: nitrile rubber
Acc. to EN 420, EN ISO 374-1/type B (KPT) and EN ISO 374-5 (virus), ASTM-F 1671-97. AQL 1.5
Acc. to 1935/2004 - suitable for contact with foodstuffs

Textured fingers for secure grip

- Non-powdered
- Extra thin and elastic for maximum wearing comfort
- High tactile sensitivity
- Can be worn on both hands
- Beaded cuff
- Colour: lavender-blue
- Thickness: approx. 0.07 mm
- Length: min. 240 mm
- Free from phthalates/plasticisers and allergenic latex proteins
- 200 or 180 per dispenser box

The perfect alternative to latex gloves. An extremely thin nitrile glove with outstanding elasticity and maximum wearing comfort thanks to a specially developed formulation and innovative production technology.

Size	Art. No.	Pack Qty.	€
XS (5-6)	**EYK7.1**	200	64,00
S (6-7)	**AYA6.1**	200	64,00

L (8-9)	**AYA8.1**	200	64,00
XL (9-10)	**AYA9.1**	180	64,00
With 10 boxes of each size			57,60/box

Rotiprotect®-Nitril green disposable gloves

Material: nitrile rubber.
Disposable nitrile gloves, non-powdered

Acc. to EN 420, EN ISO 374-1/type B (KPT) and EN ISO 374-5 (virus), ASTM-F 1671-97. AQL 1.5
Acc. to 1935/2004 – suitable for contact with foodstuffs

Textured finger tips for better grip during wet or dry use

- Powder-free
- Easy to put on thanks to special inner coating
- Reduced risk of allergic skin reactions
- Can be worn on either hand
- Rolled edge
- Colour: mint green
- Wall thickness: approx. 0.06 mm
- Length: approx. 240 mm
- 200 or 180 per dispenser box

The perfect alternative to latex gloves. An extremely thin nitrile glove with outstanding elasticity and maximum wearing comfort thanks to specially developed formulation and innovative production technology.
Skin-friendly formula: free from latex proteins, manufactured without vulcanisation accelerators or chlorine.
Environmentally friendly manufacture: water- and energy-saving, reduced CO_2 emissions.

Size	Art. No.	Pack Qty.	€
S (6-7)	**HXK1.1**	200	65,50
M (7-8)	**HXK2.1**	200	65,50
L (8-9)	**HXK3.1**	200	65,50
XL (9-10)	**HXK4.1**	180	65,50
With 10 boxes of each size			58,95/box

Rotiprotect® nitrile disposable gloves

Recommendation for chemical resistance

The disposable protective gloves listed below have been tested in compliance with standard EN 374-3:2003 "Determination of resistance to permeation by chemicals" and EN 16523-1 "Determination of material resistance to permeation by chemicals".

Disposable gloves

Cat. III

Semperguard® Nitrile Xenon disposable gloves

By Semperit. Material: nitrile rubber.
Acc. to EN 420, EN 455, EN ISO 374-1/type B (KPT), EN ISO 374-5 (virus), ASTM F1671-97. AQL 1.5. Acc. to 93/42/EEC class I.
Acc. to EC regulation 1935/2004 - suitable for contact with foodstuffs.

- Non-powdered
- **Smooth exterior, textured fingers**
- Very soft, very thin with latex-like wearing comfort and excellent tactile sensitivity
- Can be worn on both hands
- Thin rolled edge
- Kind to the skin: free of phthalates and allergy-causing latex proteins
- Colour: white
- Wall thickness: approx. 0.05 mm
- 200 or 180 per dispenser (less packaging material)

Applications: foodstuffs production, catering, health care, examination gloves, medical areas, light industrial applications.

Size	Length (mm)	Art. No.	Pack Qty.	€
S (6-7)	240	**XP94.1**	200	55,90

With 10 boxes of each size				50,31/box

Cat. III
S

Nitrile® sterile examination gloves

By Meditrade. **Disposable nitrile gloves, powder-free, sterile.**
Acc. to EN 420, EN 455, AQL 1.5.
Acc. to 93/42/EEC medical product category Is.

Thin and soft material, fit the hand like a second skin after just a short time and thus guarantee fatigue-free work.
- Micro-rough surface
- With polymer inner coating making them easy to put on
- Can be worn on both hands
- With rolled edge
- Colour: white
- Thickness: approx. 0.06 mm
- Length: ≥240 mm
- Free from allergenic latex proteins
- In pairs in a peel pack

Applications: for all areas with sterile requirements and in sterile environments, in laboratories, in the pharmaceutical industry, cleaning industry, food industry, etc.

Size	Art. No.	Pack Qty. (pair)	€
S (6-6.5)	**EYL4.1**	50	30,65

Cat. III

Disposable gloves Semperguard® Nitrile Xtension

By Semperit. Material: nitrile rubber.
Acc. to EN 420, EN 455, EN ISO 374-1/type B (KPT), EN ISO 374-5 (virus). AQL 1.5. Acc. to 93/42/EEC class I.
Acc. to 1935/2004 – suitable for contact with foodstuffs.
- Non-powdered
- High wearing comfort
- Safe grip due to textured finger tips
- Good protection against many chemicals
- Skin-friendly, since free of phthalaten/plasticizers and allergenic latex proteins
- Thin rolled edge
- The blue signal colour is suitable for areas which are subject to HACCP standards
- **Length: 300 mm**. Extra protection at wrist
- Double thickness: approx.0.20 mm (measured double)

Size	Art. No.	Pack Qty.	€

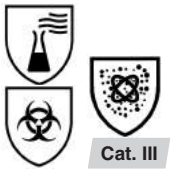
Cat. III

Nitrile® magenta examination gloves



By Meditrade. **Disposable gloves made of nitrile, powder-free**.
Acc. to EN 420, EN 455, EN 374, AQL 1,5.
Acc. to 93/42/EEC Medical product category I.
Acc. to 1935/2004 – food safe.

- Patented inner coating, silk-sericin coating, gentle on the hands and ensures the gloves can be put on easily
- Excellent tactile sensitivity and flexibility
- Ideal for particularly dry and stressed skin
- Micro-rough surface
- Can be worn on both hands
- With rolled edge
- Colour: Pink
- Thickness: Approx. 0.07 mm
- Length ≥240 mm
- Free from allergenic latex proteins

Applications: use in laboratories, in the pharmaceuticals industry, for patient care and for handling of cleaning agents.

Size	Art. No.	Pack Qty.	€
S	**EYL1.1**	100	13,45
M	**EYL2.1**	100	13,45
L	**EYL3.1**	100	11,30

Disposable gloves MICROFLEX® 93-833

By Ansell. Material: nitrile rubber.
Acc. to EN 420, EN 455, EN ISO 374-1/type B (KPT), EN ISO 374-5 (virus), EN 421. AQL 0,65. Antistatic acc. to EN 1149

- Examination gloves with ergonomics certificate. The low muscle force required and the resulting low hand fatigue minimizes the risk factors for illnesses at the workplace caused by ergonomics (carpal tunnel syndrome)
- Protection against type-I allergy, irritation and dehydration of the skin, since powder-free and latex-free
- Can be worn on both hands
- Thin rolled edge
- Length 240 mm
- Thickness: approx. 0.07 mm

Applications: laboratory analyses, food processing, manufacture and preparation of pharmaceuticals, assembly and inspection, storage work, maintenance and cleaning of devices ad instruments, examination of patients.

Size	Art. No.	Pack Qty.	€
5.5-6	**HLT3.1**	250	63,05

9.5-10	**HLT7.1**	230	63,05
With 10 boxes of each size			56,75/box

Disposable gloves MICROFLEX® 93-856

By Ansell. Material: nitrile rubber.
Acc. to EN 420, EN 455, EN ISO 374-1/type B (JKT), EN ISO 374-5 (virus). AQL 1,5. Antistatic acc. to EN 1149

- High visibility of the hands at greater distances and therefore higher safety in the work areas due to bright orange colour, also when lighting is poor
- Resistant to a wide range of industrial chemicals over a longer period than other gloves made of nitrile
- Additional protection through extended cuff
- Safe grip due to textured fingers
- Powder-free and latex-free for protection against type-I allergy
- Can be worn on both hands
- Thin rolled edge
- Length 270 mm
- Thickness: approx. 0.13 mm

Applications: laboratory analyses, assembly and inspection, storage work, maintenance and cleaning of devices and instruments, examination of patients.

With 10 boxes of each size			44,64/box

Disposable gloves MICROFLEX® 93-260

By Ansell. Material: neoprene, nitrile rubber.
Acc. to EN 420, EN ISO 374-1:2016/type A (JKLOPST), EN ISO 374-5:2016 (virus). EN 388:2016 (2000x). AQL 0.65. Antistatic acc. to EN 1149.

- Coating material neoprene and nitrile
- Excellent protection against chemicals, including acids, solvents and bases
- Thin-walled, therefore high tactile sensitivity and finger mobility
- Extra-soft material and anatomic fit, very good wearing comfort, high flexibility
- Textured fingertips
- Silicon-free material formulation and processing
- Non-powdered
- Colour: green outside, blue inside
- Rolled edge
- Length 300 mm
- Double thickness 0.198 mm
- 50 piece per dispenser box

Applications: sampling and laboratory processing, handling of unexpected leaks, transport of liquids and solids, spillage or other releases, petrochemicals, paint and varnishing, handling of spray guns and robots.

SHOWA disposable gloves

- Made of 100 % nitrile rubber (latex-free)
- Wearing comfort like a second skin
- Easy to put on and take off
- Low-modulus formula for better fit and less fatigue
- Can be worn on both hands

SHOWA 7505PF

By SHOWA.
Disposable gloves made of nitrile, powder-free.

Acc. to EN 420, EN ISO 374-1: 2016/type B (JKPT),
EN ISO 374-5:2016 (virus). AQL 1.0.
Acc. to 1935/2004, suitable for contact with foodstuffs.

- Feels like a second skin
- New formula for better fit and less fatigue
- Easy to put on and take off
- Structured surface on fingers for improved grip
- Short-term chemical-protection against a variety of hazardous substances
- Latex-free, 100% nitrile
- With rolled edge
- Colour: Blue
- Thickness: Approx. 0.1 mm
- Length ≥240 mm

Areas of use: Chemistry labs and plants, industry and utility companies.

Cat. III

SHOWA 6110PF biodegradable

By SHOWA. Disposable gloves made of 100% nitrile with EBT, non-powdered, biodegradable.
Acc. to EN 420, EN 374, AQL 1.5.
Acc. to 1935/2004 – suitable for contact with foodstuffs

The world's first biodegradable disposable glove made of nitrile.
A specially developed recipe and the innovative Eco Best Technology (EBT) have enabled the manufacture of an innovative disposable glove. EBT nitrile is only designed for biologically active (bacteria) landfills. The biological degradation starts after disposal. All the protective properties of a nitrile disposable glove are retained during use.

- Low-modulus formula for better fit and less fatigue
- Textured finger tips for better grip
- Free from allergenic latex proteins
- Manufactured without silicone
- Can be worn on either hand
- With rolled edge
- Colour: green
- Thickness: approx. 0.10 mm
- Length 240 mm
- 100 pieces per dispenser box

Applications: Laboratories with limited chemical exposure, pharmaceutical and food companies, light assembly work, hygiene applications, restaurants and farms.

Size	Art. No.	Pack Qty.	€

Accelerators are chemical additives used for shortening the "curing process" when manufacturing disposable nitrile gloves.

Cat. III

Dermatril® P-disposable nitrile gloves

Acc. to EN 420. EN 374, EN 455. AQL 0.65.
Virus resistant to ASTM F 1671:2007.
RAL approved for use with foodstuffs.
- Colour: blue
- Long cuff, rolled edge, coarsened fingertips
- Snug fitting, very high tactile sensitivity
- Increased tear strength
- Good chemical resistance
- Powder-free
- Latex free, free of allergenic thiurames and rosin
- Wall thickness: 0.2 mm
- Length: 280 mm

Applications: laboratory and research, chemicals industry, foodstuffs industry, electronics and computer industry, cleaning and maintenance work, product protection.

Cat. III

TouchNTuff® disposable gloves

By Ansell. Material: Nitrile rubber
Acc. to EN 420, EN ISO 374-1/type B (JKT) and EN ISO 374-5 (virus).
AQL 1.5. Acc. to 1935/2004 – suitable for contact with foodstuffs.
- Textured fingertips
- Non-powdered
- With rolled edge
- Colour: Light blue
- Wall thickness 0.1 mm
- 100 per dispenser box

Offers optimal protection against splashes from chemicals.

92–670, length 240 mm

Size	Art. No.	Pack Qty.	€
S (6½–7)	**P438.1**	100	39,40

With 10 boxes of each size				33,08/box

Cat. III

Disposable gloves MICROFLEX NeoTouch®

By Ansell. Material: neoprene.
Acc. to EN 420, EN ISO 374-1/type B (KPT), EN ISO 374-5 (virus), AQL 1.5.

- Powder-free
- Protect against Type I allergies
- The inner polyurethane coating enables gloves to be slipped on easily
- With structured fingertips for safer grip when dry or wet
- Turn-up cuff offers safe and firm hold
- Excellent stretching ability enables greater freedom of movement
- Good protection against chemical splashes but not suitable as complete protection against chemicals
- Thickness: 0.13 mm
- 100 gloves per dispenser box

Ideal for applications in the pharmaceutical and chemical industry; for laboratory work and analyses which require short-term protection against chemicals.

NeoTouch® 25-101, length 240 mm

Size	Art. No.	Pack Qty.	€
S (6.5-7)	**EN44.1**	100	26,35

Disposable gloves

Cat. III

S

Dermashield® disposable gloves

By Ansell. Material: neoprene.
Acc. to EN 420, EN ISO 374-1/type A (KLMNPT), EN 421. AQL 0.65.

- Powder-free, green
- High tech disposable gloves, available in **sterile** or non-sterile, suitable for use in controlled environments or **cleanrooms**
- Free of latex proteins and vulcanisation accelerants
- High wearing comfort and high flexibility
- Anti-slip rolled edge for increased protection
- Optimal product and user protection
- Fingertips with bisque finish for enhanced tactile sensitivity
- Length 310 mm, wall thickness 0.175 mm

Applications: drug production under aseptic conditions, biotechnology, production of medical equipment, handling cytostatic agents.

Packaging:

- PE bag printed with cleanroom-compatible IPA printing ink
- Optimal contamination protection is provided by triple packaging
- Easy-to-open PE packaging

73-711, sterile
Acc. to EN ISO 374-5 (virus) For critical applications acc. to ISO 5 (class 100 & GMP AB).
Subpackaging:

- In pairs, 10 pairs in sealed PE master bag
- 5 PE master bags in separate PE protective sleeve
- 4 PE master bags per large bag, carton

Size	Art. No.	Pack Qty. (pair)	€
6	**XE44.1**	200	634,25

8	**XE47.1**	200	634,25
9	**XE48.1**	200	634,25

73-721, non-sterile
Acc. to EN ISO 374-5. For controlled working environments.
Subpackaging:

- 20 left/right gloves in separate chambers of a vacuum sealed PE bag
- 2 PE bags in vacuum sealed PE master bag
- 5 PE master bags per large bag, carton

Size	Art. No.	Pack Qty. (pair)	€

Cat. I

Semperguard disposable gloves, vinyl and non-powdered

By Semperit. Material: polyvinylchloride. (PVC).

Acc. to EN 420, EN 455. AQL 1.5.
Acc. to 1935/2004 – suitable for contact with **non-greasy** foodstuffs.

- Excellent tactile sensitivity and wear comfort
- High-grade vinyl formula for exceptional quality
- Especially skin-friendly, free from latex proteins and accelerants
- DOP-free (DEHP/diethylhexyl phthalate)
- Colour: transparent
- Can be worn on either hand
- With rolled edge
- Wall thickness: approx. 0.065 mm
- Length: min. 240 mm

Size	Art. No.	Pack Qty.	€
S (6–7)	**KLH1.1**	100	20,45
M (7–8)	**KLH2.1**	100	20,45
L (8–9)	**KLH3.1**	100	20,45
XL (9–10)	**KLH4.1**	90	20,45
With 10 boxes of each size			18,41/box

This table is meant as a **guideline when selecting the correct chemical protection gloves**.
All information is based on EN 374. Permeation is the molecular penetration through the glove material.
The time required by the chemical to permeate is listed in levels.

Attention:

The information in the table was established under laboratory conditions (new gloves, no additional mechanical strain, room temperature).
As the conditions in everyday practical use often vary from the above conditions, the information in only meant as a guideline when choosing suitable chemical protection gloves. The table does not replace the need for suitability tests to be carried out by the end consumer. For this reason Carl Roth GmbH + Co. KG will not be held responsible and/or accept liability in connection with the information in the above list.

Cat. III

AccuTech® 91-325 latex gloves

By Ansell. Acc. to EN 420, EN 374. AQL 1.0.
Made from a special natural rubber latex formulation which provides a very comfortable fit ideal for work requiring high tactile sensitivity and precision. Suitable for a large number of applications, particularly in controlled working environments in biotechnology, medical equipment production, laboratory analysis, pharmaceuticals, and in the flat screen industry.

- Powder-free
- Hand specific (packed in pairs in a PE bag)
- Smooth inside and out, fingertips with bisque finish
- Colour: natural
- Straight forend
- Length 300 mm
- Wall thickness (palm): 0.225 mm

Cat. III

Marigold®-Featherweight Plus

By Ansell. Acc. to EN 420, EN 388, EN 374, EN 421, AQL 0.65.
Made of natural rubber with beaded cuff. Palms and fingers with a rough profile outside, smooth on inside. High flexibility, excellent finger mobility, high tactile sensitivity, highly tear resistant.
Length approx. 320 mm, wall thickness approx. 0.35 mm.

Size	Art. No.	Pack Qty. (pair)	€

Cat. III

Bi-Colour™-latex/neoprene combination gloves

By Ansell. Acc. to EN 420, EN 374, EN 388, EN 421, AQL 0.65.
Double latex/neoprene outer coating, high-quality pure cotton inner flocklining. With protective cuff. Diamond-pattern grip profile for outstanding wet and dry grip. High resistance to salts and cleaning agents.
Reliable protection against a wide range of chemicals.
Colour: green/yellow. Wall thickness 0.68 mm. Length 320 mm.

Chemical protection gloves

Cat. III

PVC protective gloves Snorkel®

By Ansell. Acc. to EN 420, EN 388 and EN 374. AQL 1.5. Inner lining made of cotton jersey. With good grip profile for safe handling. Excellent abrasion resistance. Suitable for working with acids, caustic substances and solvents. Length 355 mm, 1.2 mm thick.

Size	Art. No.	Pack Qty. (pair)	€
9	**X410.1**	1	12,65
10	**X411.1**	1	12,65

Cat. III

PVC-long gloves

Acc. to EN 420, EN 388 and EN 374. With cuff, made of soft PVC foil. High wearing comfort and excellent touch sensitivity. Also features patterned grip area and skin friendly inner cotton flocked lining. Free from latex and phthalate. Largely resistant against diluted acids and alkali, alcohol, etc. Approx. 0.6 mm thick, length 700 mm.

Size	Art. No.	Pack Qty. (pair)	€
M	**8203.1**	1	23,60
L	**8204.1**	1	23,60

Cat. III

Chloroprene gloves Camapren® 720

By KCL by Honeywell. Acc. to EN 420, EN 388, EN 374, AQL 0,65. made of polychloroprene with natural latex layer. Profiled palms for secure grip even when handling wet, greasy and oily parts. Cotton flock lining. Forend with elastic edging. Highly elastic and flexible even at low depths temperatures. **Resistant to** diluted and semi-concentrated acids, diluted to concentrate bases, saturated saline solutions, glycol and glycerol, long-chained alcohols, vegetable and animal fats and oils.
Length 290-310 mm, total layer thickness approx. 0,65 mm.

Size	Art. No.	Pack Qty. (pair)	€
7	**K347.1**	2	12,35
8	**K348.1**	2	12,35

Cat. III

Chloroprene gloves Tricopren® 723

By KCL by Honeywell. Acc. to EN 420, 388, EN 374, AQL 0,65. Made of polychloroprene, with interior cotton lining. **Latex-free.** Highly resistant to mechanical and a variety of chemical hazards. Anatomic fit. The palm is ribbed for safe grip.
Suitable for working with diluted and semi-concentrated acids and diluted and concentrated alkaline solutions, for glycols and glycerins, long-chain alcohols, Perhydrol, aliphatic and alicyclic hydrocarbons.
Length approx. 300 mm. Total layer thickness 1.3 mm.

Size	Art. No.	Pack Qty. (pair)	€
8	**AA08.1**	1	33,65

AlphaTec® 09-924 chemical protection gloves (formerly Scorpio®)

By Ansell. Acc. to EN 420, EN ISO 374-1/Typ A (AKLMPT), EN ISO 374-5, EN 388 (3121B), 407 (X1XXXX). EN 388 and EN 374. AQL 1.5.
Black, neoprene-coated protective gloves, cotton jersey backed.
For protection against a wide range of bases, acids, alcohols and diluted aqueous solvents.
Good abrasion and cutting resistance. Smooth grip profile.
Length 350 mm. Standard size 10.
Applications: handling chemicals and petrochemicals, for degreasing and coating etc.

Art. No.	Pack Qty. (pair)	€
XY14.1	1	25,20

AlphaTec® 09-022 chemical protection gloves (formerly Scorpio®)

By Ansell. Acc. to EN 420, EN ISO 374-1/Typ A (AJKLPT), EN ISO 374-5, EN 388 (3232C), EN 407 (32XXXX) and EN 511 (111). AQL 1.5.
Black, neoprene-coated protective gloves **with foam insulation**.
For protection against a wide range of bases, acids, alcohols and diluted aqueous solvents.
Also suitable for working in hot and cold conditions. Suitable for short-time contact with liquids at temperatures from max. 180 °C to min. -25 °C. Not suitable for temperatures above 200 °C. Good abrasion and cutting resistance. Smooth grip profile. Length 350 mm. Standard size 10.

Applications: handling chemicals and petrochemicals, for degreasing and coating etc.

Art. No.	Pack Qty. (pair)	€
XY15.1	1	48,20

AlphaTec® chemical protection gloves (formerly Scorpio®)

By Ansell. Material: neoprene.
Acc. to EN 420, EN ISO 374-1/type A (AKLMPT), EN ISO 374-5, EN 388 (3122B), EN 407 (32XX4X) and EN 511 (121). AQL 1,0.
Antistatic acc. to EN 1149. Black, neoprene-coated protective gloves with **foam insulation**.

- For protection against a wide range of bases, acids, alcohols, and diluted aqueous solvents
- Also suitable for working in hot and cold conditions. Suitable for short-time contact with liquids at temperatures from max. 180 °C to min. -25 °C. Good abrasion-resistance and cut-resistance.
- Roughened handle profile for enhanced grip

Please note:
Gloves are not suitable for working above 200 °C.
Do not use when working with or near to open flames.

Applications: Steam-jet and maintenance work, anodizing.
Working with water baths. Handling objects with hot or cold chemicals.

▶ For a Chemical Resistance List of Gloves, see page 650-651

Nitopren®-gloves 717

By KCL by Honeywell. Acc. to EN 420, 388 and EN 374. Made with 2 layers of material, top layer **chloroprene**, inner layer **nitril**, with thin velour coating. Anatomic fit. Has an extremely high resistance to a number of chemicals and to many aggressive gases. Highly flexible, also enable sensitive work. Secure grip when working with wet and oily objects. Very good mechanical resistance. Free of natural latex.
Suitable for the chemical and pharmaceutical industry, galvanic work.
Length approx. 310 mm, thickness of layer approx. 0.65 mm.

Size	Art. No.	Pack Qty. (pair)	€
7	**ET40.1**	2	12,00
8	**ET41.1**	2	12,00

Nitrile gloves Virtex™

By Ansell. Acc. to EN 420, EN 421, EN 388 and EN 374.
Antistatic acc. to EN 1149.
Interior with new, extremely thin polymer-composite coating - Aquadri™. Give off fewer particles, absorb more moisture.
Glove exterior is not chlorinated and is abraded for a better grip.
Comfortable fit and extremely flexible.
Suitable for light assembly work and for working with parts which require a secure grip when dry, wet or oily: Light assembly work in contact with chemicals, the automotive industry, paint and spray jobs, working with solutions on an oil and hydrocarbon base.
Thickness 0.225 mm, length approx. 310 mm.

Nitrile gloves Sol-Vex® 37-900

By Ansell. Acc. to EN 420, EN 374, EN 388. AQL 0.065.
- Inside: with velour
- Outside: textured surface in palm
- Length 380 mm, wall thickness 0.425 mm
- Each glove is tested using compressed air
- Excellent protection against abrasion and puncture

Suitable for laboratory analyses, chemical applications, e.g. chemical processing, handling corrosive chemicals and chemical mixtures.

Chemical protection gloves

Solvex® chemical protection gloves

By Ansell. Material: nitrile rubber.
- Structured palm gives increased grip
- Colour green
- Suitable for foodstuffs

Applications: chemical processes, refining oil and petroleum, metalworking, agrochemicals and printing industry. Ideal for dry and wet work environments where chemical protection and high abrasion resistance are crucial.

① **37-675: length 330 mm, wall thickness 0.38 mm**
Acc. to EN 420, EN ISO 374-1/type A (JKLOPT), EN ISO 374-5 (virus), EN 388 (4101X). AQL 0,65. Inner: with flocklining for improved wear comfort.

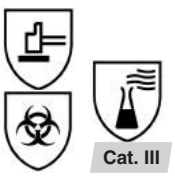
Resistance against chemicals-protective gloves



This table is meant as a **guideline when selecting the correct chemical protection gloves**.
All information is based on EN 374. Permeation is the molecular penetration through the glove material.
The time required by the chemical to permeate is listed in levels.

Attention:
The information in the table was established under laboratory conditions (new gloves, no additional mechanical strain, room temperature). As the conditions in everyday practical use often vary from the above conditions, the information in only meant as a guideline when choosing suitable chemical protection gloves. The table does not replace the need for suitability tests to be carried out by the end consumer. For this reason Carl Roth GmbH + Co. KG will not be held responsible and/or accept liability in connection with the information in the above list.

Permeation time (Level):

Level 1 >10 min	Level 4 >120 min	n.r. = no recommendation
Level 2 >30 min	Level 5 >240 min	
Level 3 >60 min	Level 6 >480 min	n.t. = not tested

AlphaTec® 15-554 chemical protection gloves (formerly PVA™)

By Ansell. Acc. to EN 420, EN ISO 374-1/Typ A (BCDFIJ), EN ISO 374-5, EN 388 (3121A). AQL 1.0. Antistatic acc. to EN 1149. Red covered with a layer of polyvinylalcohol and cotton flock lined. Resistant against aromatic (xylene), chlorinated (tri, per) and other organic solvents. Sensitive to high temperatures. **Dissolve in water and fluids containing water!**
Length 355 mm. Thickness 1.1 mm.

Size	Art. No.	Pack Qty. (pair)	€
9	**1681.1**	1	40,05
10	**NH46.1**	1	40,50

Cat. III

SHOWA NSK26 chemical protection gloves

By SHOWA. Comply with EN 420, EN ISO 374-1/Typ A (JKLOPT), EN ISO 374-5, EN 388 (4112X).
Acc. to EEC 1935/2004 – suitable for contact with foodstuffs.
Cotton/polyester jersey lining with nitrile outer coating.

- Anatomically shaped hand allows for greater freedom of movement and fatigue-free work
- Extended bonded sleeve, stitched with elasticated border means that it stays correctly adjusted
- Rough finish over entire surface for an effective and durable grip
- Flexible glove with excellent wear resistance
- Absorbs perspiration and can be worn for an extended period with no reduction in comfort
- Protects against oils, hydrocarbons and fats
- Impermeable; for working in a damp or oily environment

Areas of application: Food production, petrochemistry and refinery, working with oils and fats.

Size	Length (mm)	Art. No.	Pack Qty. (pair)	€
8 (S)	620	**ECY4.1**	1	17,10

Cat. III

SHOWA 772 chemical protection gloves

By SHOWA. Acc. to EN 420, EN ISO 371-1/B (JKL), EN ISO 374-5, EN 388 (4111X). Cotton/polyester jersey lining, fully coated nitrile rubber outer. The additional coating over the entire hand offers improved protection from chemicals.

- Anatomically shaped hand
- Extended bonded sleeve, stitched with elasticated edging, means that it stays correctly adjusted
- Rough finish over entire surface for improved sense of touch and better grip
- Flexible, robust and abrasion-resistant
- Absorbs perspiration; comfortable even when worn for extended periods
- Protects against oils, hydrocarbons, fats and abrasion; offers effective, lasting grip
- Eyelet for airing and hanging up
- Colour: yellow; thickness: approx. 0.8 mm

Applications: for working in damp or oily environments; for securely taking hold of objects. Petrochemistry and refinery, etc.

Chemical protection gloves

Cat. III

Butoject® 897+ butyl gloves

By KCL by Honeywell. Acc. to EN 420, EN 388 and EN 374. AQL 0.65. Highly flexible and effective chemical protection gloves made of butyl rubber, suitable for work with esters and ketones, among other chemicals. Ideal for laboratory use.

- With special surface roughening for increased grip when handling wet objects
- Designed for tight fit, and therefore also suitable for precision work or as undergloves
- Excellent mechanical resistance and gas tightness
- Exceptional flexibility at low temperatures and good ozone resistance

With beaded cuff, powdered on the inside, length 350 mm, wall thickness 0.3 mm.

Size	Art. No.	Pack Qty. (pair)	€
7	**AXN0.1**	1	56,10
8	**AXN1.1**	1	56,10

Cut resistant gloves

Cat. III

Glove box gloves AlphaTec® 55-100

By Ansell. Acc. to EN 420, EN ISO 374-1/type A (KLNOPT), EN ISO 374-5 (virus), EN 388 (2020X), AQL 0.65.

- Made of natural rubber (latex), without carrier material
- Enhanced finger mobility for improved handling of objects
- With rolled edge
- Smooth surface, natural colour
- Thickness 0.51 mm
- Length 711 mm
- Port (shaft size) 150 mm (6 inch)

Applications: biotechnology, chemical and pharmaceutical research, chemical processing, laboratory work and analyses, particularly when acid-resistance is required, processing of chemical and biological products, product protection work.

Size	Art. No.	Pack Qty. (pair)	€
9	**HLT8.1**	1	133,85

Cut-resistant gloves

The cut-resistant gloves are controlled according to EN Standard 388 (mechanical risks). This standard defines four tests and determines the level. The levels illustrate the efficiency of a glove.

Test	Level 1	Level 2	Level 3	Level 4	Level 5
Abrasion resistance (cycles)	100	500	2000	8000	-
Cut resistance (factor)	1.2	2.5	5.0	10.0	20.0
Tear resistance (Newton)	10	25	50	75	-
Puncture resistance (Newton)	20	60	100	150	-

Abrasion resistance:
Number of test cycles required to fray test glove.

Cut resistance:
Number of test cycles required at constant speed to cut test glove.

Tear resistance:
Force required to tear test glove.

Puncture resistance:
Force required to puncture test glove with a standardized test product.

Cat. III

Glove box gloves AlphaTec® 55-302

By Ansell. Acc. to EN 420, EN ISO 374-1/type A (JKLOPT), EN ISO 374-5 (virus), EN 388 (2100A). AQL 0,65.

- Made of neoprene, without carrier material
- Effective protection in moderately contaminated chemical environments, extraordinary chemical-resitance to most acids, alcohols, oils, lubricants and hydrocarbons
- Enhanced finger mobility for improved handling of objects
- With rolled edge
- Smooth surface, black colour
- Thickness 0.51 mm
- Length 813 mm
- Port (shaft size) 200 mm (8 inch)

Applications: biotechnology, chemical and pharmaceutical research, chemical processing, laboratory work and analyses, particularly when acid-resistance is required, processing of chemical and biological products, product protection work.

Cut resistant gloves

Cat. II

HyFlex® 48-105 (formerly SensiLite®) multipurpose gloves

By Ansell. Acc. to EN 420 and EN 388 (003XA). Lightweight multipurpose glove for work requiring selective abrasion resistance and a secure grip.
- Made of seamless nylon, with knitted welt and PU-coated fingertips
- Only the fingertips are coated, ensuring maximum breathability and good wear comfort
- Outstanding fit and good mobility allow precise handling of small objects
- For protection against skin abrasion
- Length 210-265 mm

Cut resistant gloves

Cat. II

phynomic wet-cut resistant gloves

By UVEX. Acc. to EN 420, EN 388 (3131X). Made of polyamide/Elasthan, Aqua-Polymer foam coating on palm and fingers. With knitted welt.

- Absolute cleanliness - **uvex pure standard**, excellent skin tolerability
- Perfect fit, outstanding natural feel
- Maximum flexibility
- Outstanding dry and wet grip
- Oil/emulsions roll off, oil is absorbed
- High breathability ensures optimum wear comfort
- Length 210-250 mm

Suitable for precision work, fine assembly work, general maintenance work, dry areas and moist/oily working conditions.

Size	Art. No.	Pack Qty. (pair)	€
7	**XC93.1**	2	13,65
8	**XC94.1**	2	13,65

Cut resistant gloves SHOWA 8110

By SHOWA. Acc. to EN 420, EN 388 (2X43E). Acc. to Reg. (EC) 1935/2004 - suitable for contact with foodstuffs. Seamless fabric made of high-performance polyethylene (HPPE, Spectra fibres). Uncoated, untreated. With elasticated cuff. Ambidextrous.

- Active protection against cutting and long life
- Excellent dexterity and tactile feel
- Minimum allergy risk
- No skin irritation by stitching
- High freedom of movement of wrist joint
- Length 240-320 mm

Areas of use:
Work requiring a high level of protection against cutting and dexterity. Food processing.

Cold resistant gloves

Cold protection gloves

Tested according to **EN 511 standard (gloves for protection against the cold).** This applies to all gloves designed for protection of the hand against convective and contact cooling to -50 °C. The standard defines three performance indicators in conjunction with specific protective properties.

A: Resistance to convective cooling (performance levels 0-4)
Thermal insulation against through-cooling, measured by convection transfer.

B: Contact cooling (performance levels 0-4)
Thermal insulation of the glove material in direct contact with a cold object.

C: Waterproofing (0 or 1)
The test for water-tightness is voluntary.
0 = water penetration
1 = no water penetration
X = the glove was not submitted for testing, or the test or test method is not appropriate or irrelevant.

Resistant gloves proFood® 78-110

By Ansell. Acc. to EN 420, EN 388 (214XA), EN 511 (010) and EN 407 (X1XXXX). Seamless knit. With knitted cuff, contains natural latex.

- With special hollow fibers for working in cold and hot conditions
- Draw off moistness from skin and forms a heat insulation barrier between skin and surroundings
- Light and pliable, can be worn on both hands
- Seamless design prevents rubbing and skin irritation
- Made of material which is also suitable for handling food
- Machine washable up to 40 °C
- Protection against exposure up to 100 °C: max. 15 sec

Recommended areas of application:

- Gloves can also be worn to protect against cold or frost, e.g. non-sterile working with dry food
- As a glove liner when working with meat or fish

Ice Grip® cold resistant gloves

By KCL by Honeywell. Acc. to EN 511 and EN 388. RAL-certified, suitable for use in the food industry. Made of PVC, inner lining made of breathable Thinsulate®. Very good grip, especially of wet parts, due to special slipstop coating on palm. Moisture repellent. The knitted wrist stops cold from getting into the glove. Cold-stable to max. -50 °C.

Cold resistant gloves

Cat. III

AlphaTec® 09-022 chemical protection gloves (formerly Scorpio®)

By Ansell. Acc. to EN 420, EN ISO 374-1/Typ A (AJKLPT), EN ISO 374-5, EN 388 (3232C), EN 407 (32XXXX) and EN 511 (111). AQL 1.5.
Black, neoprene-coated protective gloves **with foam insulation**.
For protection against a wide range of bases, acids, alcohols and diluted aqueous solvents.
Also suitable for working in hot and cold conditions. Suitable for short-time contact with liquids at temperatures from max. 180 °C to min. -25 °C. Not suitable for temperatures above 200 °C.
Good abrasion and cutting resistance.
Smooth grip profile. Length 350 mm. Standard size 10.

Applications: handling chemicals and petrochemicals, for degreasing and coating etc.

Art. No.	Pack Qty. (pair)	€
XY15.1	1	48,20

Cat. II

Cold resistant gloves Cama Iso® 690+

By KCL by Honeywell. Acc. to EN 420, EN 388, EN 511. Made of PVC. Specially developed for working in cold. Extremely comfortable, abrasion-proof and highly flexible. With seamless, warm cotton lining inside. Impervious to fluids. Textured surface for secure grip when handling wet parts. Length approx. 300 mm, total layer thickness approx. 3.5 mm. Stable to approx. -20 °C.

Size	Art. No.	Pack Qty. (pair)	€
9	**K970.1**	1	28,10
10	**K971.1**	1	28,10

Cat. II

Winter Monkey Grip®-work gloves

By Ansell. Acc. to EN 388, EN 420, EN 511.
- PVC dip coated with foam insulation
- Keeps hands warm and dry and protects against chafing
- Oil and grease repellent
- Excellent grip and abrasion resistance
- Maintains flexibility even at subzero temperatures
- With protective cuff

Applications: working with oily or greasy objects and materials, working with chemical containers at low temperatures, transporting oil in winter, cold storage room and warehouse maintenance.

Size	Length (mm)	Art. No.	Pack Qty. (pair)	€
10	265	**XE54.1**	1	NLA

Cold resistant gloves

Cryo-Gloves®-cold resistant gloves

By Tempshield. Acc. to EN 420, EN 388 and EN 511. Provides protection in extremely cold temperature ranges up to -160 °C. Autoclavable. Suitable for handling dry ice (-79 °C), for working in the gas phase of cryogenic media, such as **liquid nitrogen in the gas phase**.
Attention: Do not submerse in cryogenic liquids!
Material: Semi-permeable skin made of sewn nylon. Seamless, laminated inside. Light polyolefin/polyester lining in cotton-knit inner glove.

Type ① and ② for applications in the laboratory:
- Filling and decanting from large tanks to Dewars
- Shock freezing and deep freezing
- Filling cryo traps and metrological devices
- Cryo banks, blood banks
- Deep-freeze conservation

Model ①: Standard design, water resistant

Cryo-Industrial® cold resistant gloves

By Tempshield.
Same design as Cryo-Gloves® thermal protection gloves.
Attention: Do not submerse in cryogenic liquids.

Model ③: Industrial design 100 % waterproof:
Specially for industrial applications, hard-wearing and robust. Ideal for applications where wear resistance, durability and good grip are necessary. Inner glove consists of three layers (two insulating layers and lining). There is an additional 100 % waterproof seamless inner glove between the outer layer and the insulating layers.
Areas of application: Chemical/pharmaceutical (cryogenic product cooling), food technology (cryogenic freezing processes, pelletising), metal processing industry (cold dilation and shrinkage), maintenance and repair work to cryo-systems, during cryo-cleaning processes, technical gas industry (decanting cryogenic gases, argon, oxygen, nitrogen, helium).

Heat protection gloves

Tested according to **EN 407 standard (gloves for protection against the thermal risks).** The standard defines six performance indicators in conjunction with specific protective properties and performance levels from 0-4.

- **A:** Flammability
- **B:** Contact heat
- **C:** Convective heat
- **D:** Radiation heat
- **E:** Small amounts of molten metal spatter
- **F:** Small amounts of liquid metal

Heat resistant gloves

Heat- and cut-resistant gloves SHOWA 240

By SHOWA. Acc. to EN 420, EN 388 (3X31C), EN 407 (42212X). Seamless fine knit made of Kevlar®, modacrylic, glass fibre with foam neoprene palm.

- Flame resistant materials
- Kevlar backing fabric offers high cutting resistance: Level 5
- Flat dipped neoprene coating ensures extra-secure grip
- The ergonomic design matches the natural shape of the hand and thus reduces operator fatigue and improves fit and wearing comfort
- Protection against arcing: arcing protection class 2
- 240 mm long.

Range of uses:
Work requiring a high level of protection against cutting and heat.
Building trade, metallurgy, oily working conditions.

Heat resistant gloves

Cat. III

KarboTECT® heat resistant gloves

Acc. to EN 420. EN 388, EN 407. Made of Para-Aramid, carbon and wool. Heavy knit.

- Good thermal insulation
- High cutting resistance
- Good and tight fit for exact and precise handling
- Good wearing comfort thanks to cotton inner glove
- Reduced static charging

Applications: laboratories, heating and drying ovens, metal production and metalworking, commercial bakeries, retooling hot machines, refineries, all dry contact heat environments.

With knitted welt, length 250 mm.
Good thermal protection up to 250 °C. Washable up to 30 °C.

CNH6.1	1	96,25

Isotemp®-R-mittens

Asbestos-free, acc. to EN 407, EN 420, with raw leather on palm. The back of the hand and the 15 cm long cuffs are made of ISOTEMP®. Thick wooly fur lining. Reliable secure protection of hands and lower arms, excellent grip on smooth surfaces. Largely waterproof and stable against contact temperature up to +300 °C and radiation heat up to +600 °C.
Total length 35 cm.

Art. No.	Pack Qty. (pair)	€
0745.1	1	59,80

Cat. III

Preox-aramid heat-resistant gloves

By JUTEC®. Acc. to EN 388 (3542), EN 407 (43434), EN 420.
Five-finger gloves made from preox-aramid fabric, able to withstand mechanical stress, cut-resistant.
Can be worn on both sides as a cost-saving factor.
Protection against contact heat to:
- 350 °C for max. 19 s
- 500 °C for max. 11 s

Universal size 10. Ideal for working with hot parts that must not exceed a short-term temperature of 350 °C.

Applications: transportation of hot cast parts, glass industry operations, pressing facilities, hardening plants, etc.

Length (mm)	Art. No.	Pack Qty. (pair)	€

Heat resistant gloves

Cat. III

Heat protection gloves for max. 900 °C

By JUTEC®. Acc. to EN 388, EN 407, EN 420, EN 531. Mittens made of a fabric with a special high-temperature coating, can withstand mechanical load capacity, cut-resistant.
Protect against exposure contact heat:
- 500 °C: max. 16 sec
- 900 °C: max. thermal resistance

Also protects against small metal splashes as well as liquid iron and aluminium. Thumb on side, can be worn on both hands.
One-size 10, length 30 cm.

HE75.1	1	82,75

Cat. III

Heat and cut resistant gloves ActivArmr® 43-216 (formerly WorkGuard™)

By Ansell. Acc. to EN 420, EN 388 (3243B), EN 407 (413X4X).
Rugged 5-finger leather glove with jersey liner and Kevlar stitching®.
With protective cuff.
Special-purpose glove for heavy-duty work with excellent protection against molten metal spatter. Also suitable for general thermal protection.
Outstanding durability and excellent protection against cutting.
Reinforced palm for even higher abrasion resistance.
For thermal protection in many types work, e.g. welding work, machine operation and work in environments where there is a danger of molten metal spatter.

Standard size 10, length 41 cm.

Cat. III

Heat protection gloves for max. 1100 °C

By JUTEC®. Acc. to EN 388, EN 407, EN 420. Mittens made of silicate fabric, 3-fold special isolation. Marginal mechanical load capacity, very flexible even at high temperatures, soft surface, doesn't stick to hot glass.
Protects against exposure contact heat:
- 500 °C: max. 24 sec
- 1100 °C: max. thermal resistance

One-size 10, length 40 cm.

Art. No.	Pack Qty. (pair)	€
HE76.1	1	176,65

Sekuroka®-heat protections

Ideal for manipulating hot or frozen goods.
Made of silicone rubber, temperature stable from -60 to +250 °C.
No slipping due to rubber burl surface. With loop to hang up glove.

Type	Size (mm)	Art. No.	Pack Qty.	€
Type F finger	137 x 30	**4694.1**	1	12,85
Type M hand	170 x 86	**4693.1**	1	20,75

Sekuroka®-lab coats

Made of blended fabrics (65 % polyester, 35 % cotton).

- **Concealed press-stud buttons** - can be ripped open quickly in an emergency
- **Pen pocket** - pens or spatulas don't fall out when bending
- **Sleeve ends can be adjusted 3 times** - narrower cuffs allow gloves to be pulled on more easily and stop the sleeves from being caught on corners or other objects.
- 2 side pockets - the right pocket as a **double pocket, one of which has a zip**
- The back seam has a practical vent, no belt on back

Properties:

- Crease-resistant
- Comfortable to wear
- Easy-to-clean
- Washable at max. 60 °C, can be dry-cleaned
- German sizes
- Fabric weight approx. 215 g/m²

Fields of application:

TYCHEM® 2000 C

- Handling powdery hazardous materials
- Working with anorganic acids and alkaline solutions
- Protection against radioactive particles
- Handling blood and viruses transmitted through blood e.g. hepatitis and HIV
- Treating crops and plants by pressure-spraying agrochemichals

TYCHEM® 6000 F

- Handling solid, liquid or gaseous hazardous substances
- Decontamination
- Disposal of hazardous chemicals
- When working with hazardous substances under pressure
- Checking and securing areas exposed to unknown substances

TYVEK® 500-overalls

Special PE-spun fleece, extremely comfortable to wear.
- Lint-free, suitable for cleanroom classes ISO 7/8 (C/D acc. to GMP)
- Tear- and abrasionproof
- Light and flexible
- High protection against splashing, aerosols and particles (>1 µm)
- Weight approx. 41 g/m², 130 µm thick
- Antistatic in accordance with EN 1149-1

① **Model TYVEK® 500 Xpert, white**
This model is qualified under types 5 and 6 in accordance with the European Standards for protective clothing against chemicals. The hood, arm, leg, and waist holes have both elastic and covered zipper seals.
Antistatic, cellular.

uvex sil-Wear disposable overalls

By UVEX.
- Hood is highly compatible with protective face masks
- Middle finger loops prevent the sleeves from riding up, e.g. during overhead work
- Silicone-free
- Antistatic to EN 1149-1
- **Suitable for clean rooms**

① **Type 5/6, white/lime**

Breathable PE laminate with air-permeable SMS back for excellent moisture management and breathability. With bound seams for effective protection against chemical splashes and particles.

Uses:
- Working with powdery chemicals
- Painting and lacquering
- Glass fibre production and processing
- General maintenance work

② **Type 4B, 5, 6, acc. to EN 14126, protection against pathogens, white/orange**

Made of breathable, lightweight and flexible material for wear comfort. Self-adhesive zip cover and bound seams provide protection against penetration of liquid aerosols and particles.
Tested for **protection against pesticides according** to DIN 32781.

Uses:
- Handling of low-toxic inorganic chemicals
- Industrial cleaning work using low pressures (spray)
- Shipbuilding and automobile manufacturing
- Handling of paints and lacquers
- Agriculture and horticulture
- Electronics

Cat. III

Overall KLEENGUARD® A50

Type 5 and 6. Protects against chemical splashes and particles.
Antistatic acc. to EN 1149-1.
- Low-fluffing and with inner seams to prevent contamination through fibres
- Silicone-free, ideal for spray-painting task.
- Two-way zip for easier access to clothing worn underneath
- Cellular material for reduced heat build up
- With special hood for masks and good freedom of movement
- Robust triple whip stitches with high resistance to tear

Ideal for following applications: chemical, pharmaceutical and processing industry, supply and disposal, electronics, agriculture and spray-painting processes.

① **Ventilation system without exhaust monitor**

Safe detection of vapour and gas emissions at the outlet or source. Housing made of powder-coated high-grade sheet steel.
- Plug ready - fast and easy assembly
- Extra low noise, ideal for use directly in the workspace
- NW 75 hose connection
- ATEX-compliant: Ceric II 3/-G Ex c IIC T4

Delivery incl. connecting cable and power plug.

② **Recirculating air filter system for safety cabinets**

Vents safety cabinets safely and economically without exhaust lines. Recirculating air filter housing made of powder-coated high-grade sheet steel.
- Installation without wall breakthroughs and exhaust lines
- Flexible selection of installation location
- Safe detection of hazardous vapours with retention in the filtration system
- Silent - only approx. 39 dB (A)
- ATEX-compliant: Ceric II 3/-G Ex ic nA IIB T4Gc

Delivery incl.:
- Multiple-stage filtration system, connecting cable and power plug
- VDE-approved monitoring electronics for exhaust air and filter monitoring
- Visual and audible alarms incl. floating alarm contact

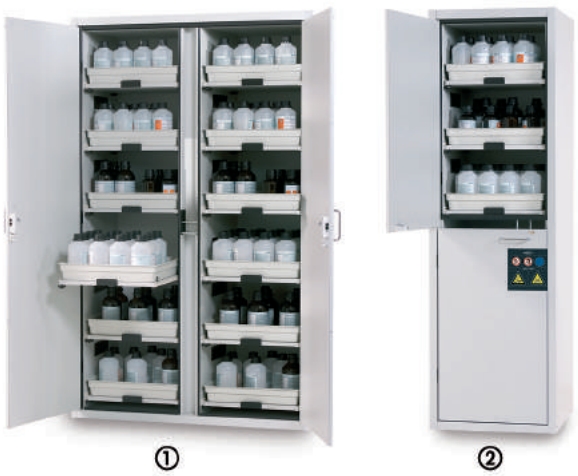
5226.1	1	285,95

Combined safety cabinets K-PHOENIX-90

By Asecos.
Two in one - storage of flammable and aggressive hazardous substances in one cabinet. Acc. to DIN EN 14470-1, 90 min fire resistance (FWF 90). Ceric-compliant, GS-approved, acc. to DIN EN 14727 (laboratory furniture).



- **Rugged and durable** - safety elements assembled outside the storage compartment for increased protection against corrosion
- **Safety isolated** - storage chambers hermetically separated by central partition
- **Comfortable and safe** - doors lock in the standard stop position, safe storage and removal from storage of drums, all doors can be operated and locked separately
- **Easy alignment** - adjusting aids to compensate for uneven floor
- **Quick commissioning** - integrated air ducts ready for connection (NW 75) to a technical exhaust system

Outer body made of epoxy resin coated high-grade sheet steel. Inner body made of highly resistant melamine resin coated special panels. Colour light grey (RAL 7035), outer dimensions W x D x H: 1200 x 615 x 1968 mm. Ventilation system (Art. No. CCA9.1) is optional, please order separately.

Types:
① **Left side of cabinet**, compartment for flammable liquids: with folding door, 3 shelves (75 kg load capacity), perforated sheet insert and 22 l bottom tray (powder-coated sheet steel).
Right side of cabinet, compartment for acids and bases: with panel doors, 4 pull-out shelves (25 kg load capacity) incl. removable plastic tray.
② **Left side of cabinet**, compartment for flammable liquids: with folding door, 6 full extension drawer (powder-coated sheet steel).
Right side of cabinet, compartment for acids and bases: with panel doors, 6 pull-out shelves (25 kg load capacity) incl. removable plastic tray.

Image	Art. No.	Pack Qty.	€
①	**CCC1.1** *	1	3721,65
②	**CCC2.1** *	1	4527,90

* Please note: longer delivery times may occur! Delivery free of charge behind the first lockable door within Germany. Costs for further transport to the point of use within the building in Germany as well as for the transport outside Germany are available on request. For further information please contact our Sales Department.

SL-Classic acid and base cabinets

By Asecos. Safe and correct storage of aggressive, non-flammable hazardous substances in work zones. GS-approved, acc. to DIN EN 14727 (laboratory furniture).

- **Rugged and durable** - epoxy resin coated high-grade sheet steel, locking mechanism is located outside the store room for increased protection against corrosion
- **Safely isolated** - two hermetically separated storage chambers
- **No unauthorised use** - doors are fitted with profile cylinder locks (master-key system compatible)
- **Easy alignment** - integrated adjusting aids to compensate for uneven floor
- **Quick commissioning** - air ducts ready for connection (NW 75) to a technical exhaust system
- **Clean ventilation** - corrosion-resistant, metal-free air ducts, separate ventilation of storage chambers, only one air vent in roof area

Equipment: pull-out shelves - high-quality, sturdy construction with leak-proof, removable plastic tray (18 l), 25 kg load capacity.
With panel doors, colour light grey (RAL 7035).
Ventilation system (Art. No. CCA9.1) is optional, please order separately.

Inner fittings:
① with 12 pull-out shelves incl. plastic collecting tray
② with 6 pull-out shelves incl. plastic collecting tray

Type	Door stop	Outer dimensions (mm) W x D x H	Art. No.	Pack Qty.	€

Gas cylinder cabinets G90

By Asecos. For safe indoor storage of pressurised gas cylinders (decentralised). Type-tested acc. to DIN EN 14470-2, 90 min fire resistance (FWF 90). Ceric-compliant, GS-approved, acc. to DIN EN 14727 (laboratory furniture).

- **Easy assembly of fittings and pipework** - large inner height (1858 mm), 24 leadthroughs in the cabinet ceiling
- **No unauthorised use** - door is fitted with profile cylinder locks (master-key system compatible)
- **Easy alignment** - adjusting aids to compensate for uneven floor
- **Quick commissioning** - integrated air ducts ready for connection (NW 75) to a technical exhaust system, complete and even floor-to-ceiling ventilation inside cabinet

① For safe storage of up to two 50-litre steel pressurised gas cylinders or two 40-litre aluminium pressurised gas cylinders, each ∅ 230 mm. With standard inner fittings complete - consisting of mounting rail, roll-in flap, cylinder holder and matching tensioning straps.

② For safe storage of one 50 litres pressurised gas cylinder or two 10 litre pressurised gas cylinders. With standard inner fittings - complete with mounting rail, roll-in flap, cylinder holder and matching tensioning straps - optional accessories: lateral cylinder holder for 2 x 10-litres cylinders.

③ Small gas cylinder cabinet for two 10-litres cylinders. With standard inner fittings - complete with mounting rail, roll-in flap, cylinder holder and matching tensioning straps.

Design: with panel door, left stop. Body and door light grey (RAL 7035).

Filter trolley Jumbo

Ideal for extracting and filtering gases and vapours directly from place of origin.

- With wheels which enable flexible use at different workplaces
- Very quiet
- With 3 articulated arms for more flexibility
- Low energy consumption
- With ultra filter effect for pure air
- The filtered air is routed back to the workplace
- Filter can be easily removed for changing

Applications:

glueing, lacquering, laminating, extraction of solvent vapours, cleaning work.

Technical specifications:

Range of suction arm	750 mm
Performance	80 m^3/h at 1400 Pa
Electrical connection	230 V, 50 Hz
Power consumption	150 W
Sound level	49 dB (A)
Hood	
Dimensions (L x W)	296 x 248 mm
Material	PC
Filter trolley	
Dimensions	450 x 340 x 530 mm
Weight	18 kg
Material	ABS

Pharmacy workstations (pharmacy fume hoods)

Hazardous material workstations according to DIN 12924-4: 2012 (Fume cupboards for pharmacies) – Does not replace a fume cupboard according to DIN EN 14175 (Fume cupboards).
Not suitable for working with high acid loads or for openly breaking down chemicals at high temperatures.

- Safe handling of chemicals, protection against harmful vapours and explosive atmospheres
- Easy to mount on bench top
- Ruggedly constructed from plastic coated high-grade sheet steel
- Each unit is functionally tested by a recognised testing agency

Standard equipment
- Monitoring electronics
- 2 power sockets
- Work light
- Continuously height-adjustable acrylic glass sliding window
- Exhaust fan

Delivery without media supply (natural gas, wastewater, cold water) and ventilation sets (please order separately).

Technical specifications:

Sekuroka®-glove bags

Made of PE, with integrated gloves.
Ideal for handling substances in an air or moisture free milieu.
Handling: fill all working material through opening into glove bag, close with clip and then fill with inert gas through gas adapter. Plastic coupling for gas adapter, closing clips and glove liners come with bag.

Bags with 1 opening and 1 hose connection

Safety shields

Sekuroka®-hourglass-shaped radiation protection screens

Made of transparent acrylic glass for protection against beta radiation or of leaded acrylic glass for protection against gamma radiation. Inclination angle of 15° to reduce light reflections.
For protection during work with radioactive samples and solutions which emit beta radiation (32P) or gamma radiation (125J).
Screens with a bent base are suitable for use with protection trays.
The bent shape with cut-outs at the sides allows for greater freedom of movement in order to eliminate fatigue when working.

PerfTape™-perforated marker tapes

Self-adhesive coloured marker tape, with perforations for easy and clean separation of identical-sized strips. The coated paper surface is durable, abrasion resistant and does not discolour. Oil and water resistant. Excellent adhesion to most surfaces, such as glass, plastic and metal. Can be removed without leaving a residue.

Ideal for general identification and colour coding. Suitable for labelling with ball-point pen, pencil, felt tipped pen or permanent marker.

Temperature stable from **-23 to +121 °C**.
Distance between perforations: 31.75 mm.

Length 12.7 m, width 19 mm, core ∅ 25.4 mm

Labeltape original marker tape

Self-adhesive coloured marker tape. Coated paper surface, durable, abrasion-resistant, does not stain. Resistant to oils, dilute acids and water. Excellent adhesion to most surfaces, such as glass, plastic and metal. Can be removed without leaving residue.
Ideal for general identification and colour coding. Can be written on using a ballpoint pen, pencil, felt pen or permanent marker.
Temperature-stable from **-23 to +121 °C**. Autoclavable.
Dimensions: L 12.7 m, W 19 mm, core ∅ 25.4 mm.

Labels on rolls

Ideal for 0.2/0.5/0.65 and 1.5/2 ml tubes and other containers. Made of chemically inert polyester. Sticks to plastics without drying out and falling off during steam sterilization, in boiling waterbaths, refrigerators, stirrers, shakers, centrifuges, etc. Are extremely close-fitting and do not hinder removal or loading of tubes in stands or centrifuges. Tearproof.
Can be marked with almost all markers.

Labels, angular (Tough Tags™), for manually marking.
Temperature stable from **-40 to +121 °C**. 1000 per roll.
(1500 per roll at Art. No. K436.1).

Cryo-labels on sheets

Made with acrylate. Sticks to plastic, glass or metal without drying out or peeling off. Glass and metal surfaces must be completely free of grease. Can also be used in boiling water baths, in refrigerators, under cryo-conditions (liquid nitrogen). Temperature stable from **-196 to +100 °C**. Can be removed without leaving any traces.
Sheets are printable with a laser printer.

Sheet size (US-Letter) 21.6 x 27.9 cm.

Thermal transfer labels

White, angular cornered labels with acrylate-based adhesive backing. Excellent adhesion to plastic, glass or metal at low temperatures without drying out or peeling off. Care must be taken to ensure that glass and metallic surfaces are absolutely free of oil and grease. Abrasion resistant, resistant to chemicals and moisture.
Suitable for use in refrigerators, freezers and under cryogenic conditions (liquid nitrogen).
Can be removed without leaving any traces. Coated for use with a resin ribbon. Designed for high resolution and very precise labelling, e.g. for barcode. Suitable for most thermal transfer printers.
2000 labels per roll, wound externally, roll core dia. 25.4 mm (1 inch).

Thermal transfer labels, xylene-resistant

Made of polyester. Excellent solvent resistance, specifically against xylene. Versatile - also suitable for use in boiling water baths. Surface coated for use with resin ribbon. Designed for high resolution and very precise labelling, e.g. for barcode. Suitable for most thermal transfer printers. Good adhesion to PP tubes; not for use on siliconised surfaces.
Temperature stable from -40 to 121 °C, autoclavable.
1000 labels per roll, wound externally, 25.4 mm roll core (1 inch).

High-temperature labels (Bake Tags™)

Made of acrylate, for manual labelling. For permanent labelling of plastic, glass and metal containers. Can be used for hot air sterilizing (180 °C) and for deactivating RNase/DNase and other enzymes. Also ideal for use during sterilizing, autoclaving, in boiling waterbaths, refrigerators and for storing in freezers (liquid nitrogen). Resistant to most organic solvents, acids and alkalis. Strength 0.008 mm. Temperature stable from **-196 to +180 °C**.
Size of labels 38 x 19 mm. Colour: white. 250 labels on roll.

Art. No.	Pack Qty. (roll)	€
L675.1	1	107,45

- Microcentrifuge tubes from p. 493
- Stands for centrifuge tubes from p. 239
- Cryo gloves see page 670

Wash-Off Labels™

Washable, white labels **on sheets**. Labels and adhesive are completely removable within 30 seconds at any water temperature and without leaving any traces of adhesive. 100 % biodegradable. Temperature stable from 0 to 21 °C. Suitable for racks, boxes and containers. Suitable for most laser printers.
Sheet format (US letter) 21.6 x 27.9 cm.

Length (mm)	Width (mm)	Art. No.	Pack Qty.	€
67	25,4	**NL21.1**	750	127,95
102	25,4	**NL22.1**	500	127,95

Removable Tough-Tags® for manual labelling

Removable, white labels with rounded corners; ideal for labelling reusable containers, laboratory equipment, racks and pipettes. No residues - easily removable without leaving any traces of adhesive. Resistant to most solvents, including (for short periods) acetone and xylol.
1000 labels per roll.

Length (mm)	Width (mm)	Art. No.	Pack Qty. (roll)	€

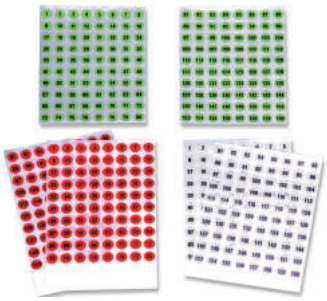
Sekuroka®-hazard warning labels "Biohazard"

Self-adhesive, ∅ 9.5 mm. Ideal for 0.5 to 2.0 ml tubes and other containers. Sticks to all plastics without drying out and falling off, e.g in freezers or in boiling water baths. Chemically resistant against most organic solvents and caustic materials. Resistant in temperature range from -196 to +80 °C. 1000 labels per roll.



Art. No.	Pack Qty. (roll)	€
KL45.1	1	38,20

Write-Protect™-label protection film

Self-adhesive, perforated, fits Cryo labels for 0.5, 1.5 and 2.0 ml tubes or other vessels. Protects the label against organic solvents and corrosive chemicals. Holds labels in place, and prevents labels from becoming detached or falling off. Adheres to most surfaces, plastics, glass and metals. Resistant in temperature range from -196 to +150 °C.
Delivery incl. dispenser. 1000 labels per roll.

Sekuroka®-labels

Numbered from 1-160 in red, green and blue. Self-adhesive, made of paper ∅ 8 mm. Ideal for labelling test tubes, vials, microcentrifuge tubes, etc. Should be used together with numerical racks to prevent any mix-up. Labels ensure correct positioning of test tubes even during bulk sampling.

Art. No.	Pack Qty.	€
N376.1	1	4,25

Tough-Tag Station

For easy and convenient storage of up to 6 rolls of Tough-Tags®, Tough-Spots® or Cryo-Tags® (unsuitable for round labels ∅ 25 mm). With ledge for writing labels, cutting edge and no-skid rubber feet.
Delivery without labels, please order separately.

Chemical resistant PET labels

Made of polyester film, with permanent acrylic adhesive. Suitable for laser printers, copiers and inkjet printers (with solvent based inks only).
Weather resistant and suitable for outdoor use.
Saltwater resistant and resistant to many solvents, diluted acids and alkalis.
Temperature stable from -20 to +100 °C

W x H (mm)	Labels/sheet	Art. No.	Pack Qty. (sheets)	€
70 x 50,8	15	**NL02.1**	30	29,60

Document boxes

By Justrite. Made of HDPE, stable and weatherproof. Safe storage of safety datasheets, directives, manuals, among other things documents at hand at the work place.

- Protection against moisture and dust
- With front flap
- Field for writing labels on the lid
- High visibility due to bright red colour
- Large box suitable for a narrow A4 folder
- Securing with padlock possible (feed-through opening ∅ 10 mm)
- Wall fastening through screws or adhesive tape

Delivery incl. doubled-sided adhesive tape for simple installation.

Pyracidosorb-ROTH®

For neutralizing acids. With colour indicator.
1 kg absorbs approx. 0.3 l concentrated sulphuric acid,
0.6 l concentrated nitric acid and 1 l concentrated hydrochloric acid.

Warning H319

Art. No.	Pack Qty.	€
0411.1	5 kg	48,95

Basosorb

For **neutralizing alkaline** solutions. With colour indicator. 1 kg absorbs approx. 1 l concentrated ammonia solution (25 %), 1 l concentrated potassium hydroxide (50 %) and ¾ l concentrated sodium hydroxide (50 %).

Warning H319

Art. No.	Pack Qty.	€
3287.1	5 kg	74,75

Universal absorber Rotisorb®

Ideal for absorption of inflammable, oily, and aggressive liquids such as anorganic and organic acids, alkaline solutions, alcohols, aldehydes, amines, esters, aromatic, chlorinated and aliphatic hydrocarbons, substance compounds, e. g. paint, heating oil, fuels, lacquers, motor lubricants.

Art. No.	Pack Qty.	€
1710.1	800 g (in square HDPE container)	26,35
1710.2	25 kg (in PE flat bag)	96,25

Sekuroka®-safety station

Wall shelf made from galvanised sheet steel. Yellow orange (RAL 2000).
W 530 x H 300 x D 220.
Delivery incl. 3 special absorbents for acids, alkali and solvents (0411.1, 3287.1 and 1710.1), plastic bags, dustpan and brush.

Warning H319

Art. No.	Pack Qty.	€
1288.1	1	258,00

Entsorger-Set-ROTH® (Disposal-Kits)

Ideal for absorbing and disposing spilled chemicals.
Contents: absorbent and neutralizer, safety glasses, scoop and brush, sponge, disposal bags with clips and labels.

Acids and alkali

5 kg Pyracidosorb-ROTH®, 5 kg Basosorb

Warning H319

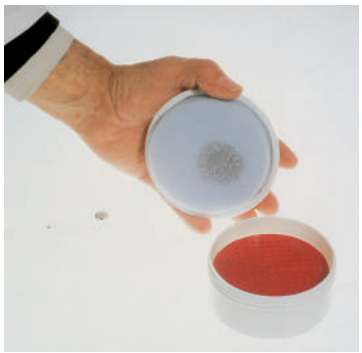
0055.1	1 kg Pyracidosorb-ROTH®, 1 kg Basosorb, 400 g Rotisorb®	90,60

ROTH® Mercurisorb



Contains silver nitrate. For speedy and easy absorption of mercury. Emits no more vapours after absorption. Absorption capacity 1:1.

Emergency kit (in plastic case or in a box).
Delivery incl. 100 g Mercurisorb-ROTH®, scoop, brush, pasteur pipettes, empty vessel.

Danger H290-H314-H410

Art. No.	Pack Qty.	€
9461.1	1 Emergency kit in plastic case	97,75
9461.4	1 Emergency kit in carton	77,30
9461.2	1 Refill pack Mercurisorb-ROTH® 250 g, plastic	127,40
9461.3	1 Refill pack Mercurisorb-ROTH® 1 kg, plastic	491,85

Mercury is, at room temperature, a liquid metal, (freezing point -38.84 °C, boiling point 356.95 °C). Saturation pressure at room temperature is only 0.0013 mm. Mercury vapours are highly toxic and can often lead to chronic mercury poisoning. Inhaled mercury accumulates in the human organ's and can be secreted only very slowly with the urine. Mercury should therefore always be stored in closed containers and should only be used in well-ventilated rooms with a respiratory filter (e.g. screw-top filter Hg-P3 up to 0.5 Vol %).

Mercury collector

Mercury is absorbed by a specially-designed foamed insert inside the collector. When the collector is screwed down the pellets loosen, fall through a perforated separating disc and can be reused.

Type	Art. No.	Pack Qty.	€
Mercury collector	**P941.1**	1	26,45
Spare foamed insert	**P942.1**	1	5,00

UNI-SAFE chemical and oil binder

All-in-one binder!
Polymer-based all-purpose chemical and oil binder. Suitable for absorbing and containing liquids such as acids, alkalis, oils, fuels, brake fluid etc., but also battery acid, coolant, oil-water mixtures, paints and lacquers. Also suitable for strong oxidants, such as fuming nitric acid and peroxides.

- High absorption capacity
- No hazardous reactions
- Dam-forming

Absorption capacity of aqueous media up to 1:75
Oil binder type III/R (suitable for paved traffic areas), 1 kg binds 0.56 l heating oil
Areas of use: laboratories, chemical and commercial operations, transportation of hazardous materials, emergency vehicles, etc.

UNI-SAFE

Art. No.	Pack Qty.	€
EAA8.2	5 kg bucket	149,45

UNI-SAFE Plus fine granulate with reduced formation of dust

Art. No.	Pack Qty.	€
EYY5.2	5 kg bucket	160,20

Oil sorbent

By 3M. Ideal for absorbing and containing oil and organic liquids. Is also oleophilic (hydrophobic) and water repellent. Ideal for absorbing oil both on water and on land. Made of synthetic fibres (polypropylene and polyester) for use indoors and out.

Type	3M No.	Dimensions (cm)	Absorption capacity (l)	Art. No.	Pack Qty.	€
Wipes	HP255	48 x 43	2,0	**A377.1**	10	36,80
Mini hose	T4	∅ 7,5 x 120	3,75	**E186.1**	1	17,35

Oil binder Penta 99

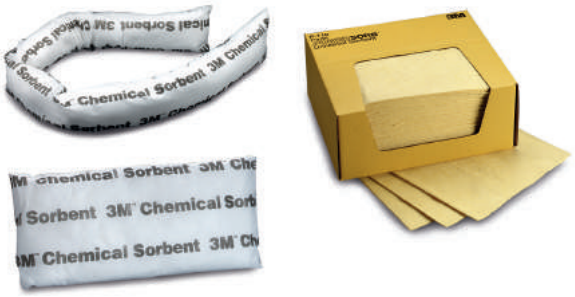
Fast-acting and highly effective fine granulate for absorbing oil, waste oil, grease, lubricants, fuels, paints and lacquers and other nonpolar organic liquids on firm surfaces. Stays hard and slip-resistant after use and can easily be removed. Do not use in combination with acids and oxidants.

- Oil binder type III/R (suitable for traffic surfaces)
- Calcium silicate hydrate based
- Oil absorption capacity: approx. 60 % fuel oil by weight
- Bulk weight: approx. 545 g/l

Type	Art. No.	Pack Qty.	€
40 l bag (approx. 21 kg)	**CTC2.1**	1	41,85

Öcu-Sorb fleece-wipes T-33

For fast and dust-free absorption of **oil and organic, non-aggressive liquids**. Water-repellent, floatable, so ideal in water.
Absorption capacity per cloth approx. 260 ml. Cloth size 30 x 30 cm.



Art. No.	Pack Qty.	€
5128.2	50	40,05

Laboratory emergency kit

By 3M. Absorption capacity for approx. 5 l of spilled liquids.
Contents: 10 sorbent pads, 1 sorbent pillow, 1 waste disposal bag.

Art. No.	Pack Qty.	€
AKX3.1	1	69,10

Chemicals absorbant fleece

By 3M. Ideal for absorbing and containing **agressive** liquids, such as acids, bases, ketones, alcohols, aromatic compounds, glycols, hydrocarbons.
High absorption capacity.

Type	Length (cm)	Width (cm)	∅ (mm)	Capacity	Art. No.	Pack Qty.	€
Pillows	23	38	-	2 l	**2888.1**	4	59,40
Wipes	28	33	-	0,25 l	**2920.1**	50	58,20
Tube	120	-	75	3,75 l	**2930.1**	1	39,30

Industrial sorbent

By 3M. Ideal for absorbing and containing **non-agressive liquids** such as oil, coolants, lubricants and emulsions. High absorption power.
Easy disposal, recovery of absorbed liquid possible. When folded, the fleece looks like a tube, when unfolded once like a pillow and a second time similar to a wipe. Perforated every 40 cm. Length 15 m, width 12 cm.
Total absorption approx. 34 l, comes in dispenser.

Art. No.	Pack Qty.	€
E391.1	1	76,55

Warning sign Danger of slipping

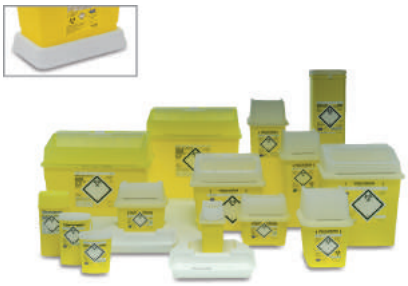
Made of PE. Acc. to ASR A 1.3/BGV A8/DIN 4844.
Warning sign "Warning of danger of slipping", two languages German and English. Colour yellow, printed on both sides. Easy to fold and transport.

Art. No.	Pack Qty.	€
HLL6.1	1	21,40

Benchtop waste container

Practical and space-saving. Ergonomic design with large opening for easy disposal of articles.
- Slip-resistant rubber feet for secure positioning on the lab bench
- Lid can be secured in open position
- Extra-large lid rim for easy opening
- The divider can be removed from the green waste container as required
- Wall mountable

Delivery incl. mounting kit.



Type	Volume (l)	Dimensions W x D x H (mm)	Art. No.	Pack Qty.	€
