puriss.	purissimum, especially pure quality. Products with such designation have a content of at least 99%, unless a different content is stated in %. Their appearance and characteristic data correspond to the appertaining literature or deviate only slightly from it. They are suitable for purposes requiring a high degree of purity. With a number of products having this degree of purity, analysis certificates plus guarantee will be supplied or attached to the container. Delicate products are packaged under protective gas.
purum	chemically pure quality. Products having the purity designation "purum" have a content of at least 97%, unless a different content is stated, and their colour and characteristic data, apart from minor deviations, correspond to the literature. This degree of purity is recommended for laboratory work such as syntheses, which are subject to purity requirements. Delicate products are packaged under protective gas.

Hazard Pictograms

The hazard pictogram on the designation label indicates the main hazard arising from a substance. If there are several hazardous qualitiies, several symbols are necessary.

Each pictogram is allocated a hazard designation and coding that do **not** appear on the designation label.

Hazard Statements H Codes

Hazard statements for physical hazards

H200	Unstable explosives.
H201	Explosive; mass explosion hazard.
H202	Explosive, severe projection hazard.
H203	Explosive; fire, blast or projection hazard.
H204	Fire or projection hazard.
H205	May mass explode in fire.
H220	Extremely flammable gas.
H221	Flammable gas.
H222	Extremely flammable aerosol.
H223	Flammable aerosol.
H224	Extremely flammable liquid and vapour.j
H225	Highly flammable liquid and vapour.
H226	Flammable liquid and vapour.
H228	Flammable solid.
H229	Pressurised container: May burst if heated.
H230	May react explosively even in the absence of air.
H231	May react explosively even in the absence of air at elevated pressure and/or temperature.
H240	Heating may cause an explosion.
H241	Heating may cause a fire or explosion.
H242	Heating may cause a fire.
H250	Catches fire spontaneously if exposed to air.
H251	Self-heating; may catch fire.
H252	Self-heating in large quantities; may catch fire.
H260	In contact with water releases flammable gases which may ignite spontaneously.
H261	In contact with water releases flammable gases.
H270	May cause or intensify fire; oxidiser.
H271	May cause fire or explosion; strong oxidiser.
H272	May intensify fire; oxidiser.
H280	Contains gas under pressure; may explode if heated.
H281	Contains refrigerated gas; may cause cryogenic burns or injury.
H290	May be corrosive to metals.

Hazard statements for health hazards

H300	Fatal if swallowed.
H301	Toxic if swallowed.
H302	Harmful if swallowed.
H304	May be fatal if swallowed and enters airways.
H310	Fatal in contact with skin.
H311	Toxic in contact with skin.
H312	Harmful in contact with skin.
H314	Causes severe skin burns and eye damage.
H315	Causes skin irritation.
H317	May cause an allergic skin reaction.
H318	Causes serious eye damage.
H319	Causes serious eye irritation.
H330	Fatal if inhaled.
H331	Toxic if inhaled.

H332	Harmful if inhaled.
H334	May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H335	May cause respiratory irritation.
H336	May cause drowsiness or dizziness.
H340	May cause genetic defects.
H341	Suspected of causing genetic defects.
H350	May cause cancer.
H350i	May cause cancer by inhalation.
H351	Suspected of causing cancer.
H360	May damage fertility or the unborn child.
H360F	May damage fertility.
H360D	May damage the unborn child.
H360FD	May damage fertility. May damage the unborn child.
H360Fd	May damage fertility. Suspected of damaging the unborn child.
H360Df	May damage the unborn child. Suspected of damaging fertility.
H361	Suspected of damaging fertility or the unborn child.
H361f	Suspected of damaging fertility .
H361d	Suspected of damaging the unborn child.
H361fd	Suspected of damaging fertility. Suspected of damaging the unborn child.
H362	May cause harm to breast-fed children.
H370	Causes damage to organs.
H371	May cause damage to organs.
H372	Causes damage to organs through prolonged or repeated exposure.
H373	May cause damage to organs through prolonged or repeated exposure.
H300+H310	Fatal if swallowed or in contact with skin.
H300+H330	Fatal if swallowed or if inhaled.
H310+H330	Fatal in contact with skin or if inhaled.
H300+H310+H330	Fatal if swallowed, in contact with skin or if inhaled.
H301+H311	Toxic if swallowed or in contact with skin.
H301+H331	Toxic if swallowed or if inhaled.
H311+H331	Toxic in contact with skin or if inhaled.
H301+H311+H331	Toxic if swallowed, in contact with skin or if inhaled.
H302+H312	Harmful if swallowed or in contact with skin.
H302+H332	Harmful if swallowed or if inhaled.
H312+H332	Harmful in contact with skin or if inhaled.
H302+H312+H332	Harmful if swallowed, in contact with skin or if inhaled.

Hazard statements for environmental hazards

H400	Very toxic to aquatic life.
H410	Very toxic to aquatic life with long lasting effects.
H411	Toxic to aquatic life with long lasting effects.
H412	Harmful to aquatic life with long lasting effects.
H413	May cause long lasting harmful effects to aquatic life.
H420	Harms public health and the environment by destroying ozone in the upper atmosphere.

Supplemental Hazard Information H Codes

EUH001	Explosive when dry.
EUH006	Explosive with or without contact with air.
EUH014	Reacts violently with water.
EUH018	In use may form flammable/explosive vapour-air mixture.
EUH019	May form explosive peroxides.
EUH029	Contact with water liberates toxic gas.
EUH031	Contact with acids liberates toxic gas.
EUH032	Contact with acids liberates very toxic gas.
EUH044	Risk of explosion if heated under confinement.
EUH066	Repeated exposure may cause skin dryness or cracking.
EUH070	Toxic by eye contact.
EUH071	Corrosive to the respiratory tract.
EUH201 EUH201A	Contains lead. Should not be used on surfaces liable to be chewed or sucked by children. Warning! Contains lead.
EUH202	Cyanoacrylate. Danger. Bonds skin and eyes in seconds. Keep out of the reach of children.
EUH203	Contains chromium (VI). May produce an allergic reaction.
EUH204	Contains isocyanates. May produce an allergic reaction.
EUH205	Contains epoxy constituents. May produce an allergic reaction.
EUH206	Warning! Do not use together with other products. May release dangerous gases (chlorine).
EUH207	Warning! Contains cadmium. Dangerous fumes are formed during use. See information supplied by the manufacturer. Comply with the safety instructions.
EUH208	Contains (name of sensitising substance). May produce an allergic reaction.
EUH209 EUH209A	Can become highly flammable in use. Can become flammable in use.
EUH210	Safety data sheet available on request.
EUH401	To avoid risks to human health and the environment, comply with the instructions for use.

Specific target organ toxicity – single exposure	Category 1	STOT SE 1	 GHS08	Danger	H370	Causes damage to organs. (*)
	Category 2	STOT SE 2		Warning	H371	May cause damage to organs. (*)
	Category 3	STOT SE 3	 GHS07	Warning	H335	May cause respiratory irritation.
					H336	May cause drowsiness or dizziness.
Specific target organ toxicity – repeated exposure	Category 1	STOT RE 1	 GHS08	Danger	H372	Causes damage to organs through prolonged or repeated exposure. (*)
	Category 2	STOT RE 2		Warning	H373	May cause damage to organs through prolonged or repeated exposure. (*)
	(*) state route of exposure if it is conclusively proven that no other routes of exposure cause the hazard					
Aspiration hazard	Category 1	Asp. Tox. 1	 GHS08	Danger	H304	May be fatal if swallowed and enters airways.
Acute aquatic hazard	Acute 1	Aquatic Acute 1	 GHS09	Warning	H400	Very toxic to aquatic life.
Long-term aquatic hazard	Chronic 1	Aquatic Chronic 1		Warning	H410	Very toxic to aquatic life with long lasting effects.
	Chronic 2	Aquatic Chronic 2		No signal word	H411	Toxic to aquatic life with long lasting effects.
	Chronic 3	Aquatic Chronic 3	No pictogram	No signal word	H412	Harmful to aquatic life with long lasting effects.
	Chronic 4	Aquatic Chronic 3			H413	May cause long lasting harmful effects to aquatic life.
Hazardous for the ozone layer	Category 1	Ozone 1	 GHS07	Warning	H420	Harms public health and the environment by destroying ozone in the upper atmosphere.

Sales and delivery terms and conditions 2498

Terms and Conditions of Sale and Delivery

These Terms and Conditions of Sale and Delivery also apply for all future deliveries.

1. Validity for future business transactions – Validity of contrary General Terms and Conditions – Validity for companies only

1.1. Our Terms and Conditions of Sale and Delivery apply exclusively. They shall also apply to all future deliveries, even when no special reference is made thereto. We do not accept any contrary terms and conditions or those terms and conditions of the customer which differ from our Terms and Conditions of Delivery, even if the contract is performed unconditionally, unless we have expressly agreed to the validity thereof in writing or in text form.
1.2. Our Terms and Conditions of Sale shall only apply to entrepreneurs (in accordance with Section 14 German Civil Code [BGB]), legal persons governed by public law or a separate legal entity under public law.

2. Quotes, conclusion of contract

2.1. Our quotes are subject to change and are non-binding unless they have been explicitly declared binding or include a specific period of acceptance.
2.2. The ordering of goods by the customer shall be deemed to be a binding contractual offer. Orders are only binding for us if we confirm them in writing or in text form within two weeks, or if we fulfil them within two weeks through shipment of the ordered goods.
2.3. The legal relationship between the customer and us shall be governed exclusively by the contract, which has been signed in writing or in text form, including these general Terms and Conditions of Sale and Delivery. Verbal agreements made by us before the contract is formed are not legally binding and verbal understandings between the parties are superseded by the contract that is formed in writing or in text form, unless it is expressly stated therein that such agreements will continue to apply.
2.4. Amendments and modifications to the agreements made, including these general Terms and Conditions of Sale and Delivery, must be made in writing or in text form in order to be valid. With the exception of managing directors and holders of commercial powers of attorney, our employees are not authorised to make oral agreements which are contrary to the cited provisions.
2.5. The information we provide on the item to be supplied (e.g. weights, dimensions, quantities and functional values), as well as our representations of the item to be supplied, are only approximations, unless use for the purpose intended by the contract requires full conformity. These are not guaranteed physical characteristics, rather descriptions or characterisations of the product. Deviations that are customary in the trade and deviations that are the result of legal provisions are permissible provided that they do not impair usability for the contractually agreed purpose. Refer below to Article 10 of these terms and conditions.

3. Prices, price adjustments, electronic invoicing

3.1. Our prices are quoted "ex works" from Karlsruhe, according to INCOTERMS, plus packaging, tariffs where export shipments are concerned, statutory VAT, fees and other public duties.
3.2. We reserve the right to amend the listed prices upon which the contract is based accordingly if cost reductions or increases arise as a result of tariff agreements, or if the price of materials increases after the contract is concluded. These shall be verified to the customer upon request. A price adjustment shall not be effected in cases where delivery is made as contractually stipulated within four months of conclusion of the contract.
3.3. We provide an electronic invoice in compliance with data protection legislation. This presumes the formation of a separate agreement.

4. Payment terms and conditions, payment arrears

4.1. To avoid accounting errors and the resulting erroneous issue of dunning notices, we rely on receiving the correct invoice number, invoice date and individual invoiced amounts with incoming payments. This data can be found on all of our invoices. If the payer is not the same as the invoice recipient, the name stated on the relevant invoice must also be given when the payment is made. If we receive payments without this information, we cannot guarantee that payments will be assigned correctly.
4.2. The invoiced amount becomes payable upon receipt of the goods. Unless otherwise specified in writing or in text form, it is payable within thirty days without any deduction. In the event that the date on which the invoice or an equivalent payment schedule was received is disputed, the customer is considered to be in default 30 days after receipt of the goods at the latest, according to Section 286(4) German Civil Code. The date of receipt of payment is decisive. Otherwise, the statutory regulations on defaults of payment apply.
4.3. For payment within eight days from date of invoice, a 2% discount shall be granted. The precondition for any discount shall be the settlement of all other customer payables arising from the business relationship with us that are older than 30 days.
4.4. For new customers, we reserve the right to require that payment be made prior to delivery or by cash on delivery.

5. Off-setting, retention

The off-setting of counter-demands by the customer or the retention of payment due to such demands shall only be permissible if such demands are indisputable, or if their validity has been legally established.

6. Shipping, packaging, transfer of risk

6.1. The shipping method and the packaging shall be subject to our due discretion.
6.2. The risk of accidental loss or incidental deterioration of the delivered goods is, at the latest, transferred to the customer upon handover of the goods to the forwarding agent, the carrier, or any other third party charged with the task of performing shipment (applicable from commencement of loading). This also applies in the case of partial deliveries, and with respect to each partial delivery.
6.3. The shipment is only insured against theft, breakage, transport, fire and water damage or other insurable risks at the express request of the customer and at the customer's expense.

7. Delivery time

7.1. The promised delivery periods and dates are only binding for us if we have confirmed them in writing or in text form. The delivery dates indicated on our website during the ordering process or in our catalogue do not constitute such confirmation. Compliance with our delivery obligation requires the timely and proper fulfilment of the customer's obligations. If shipping has been agreed, delivery dates and deadlines refer to the time of transfer to the forwarding agent, carrier, or other third party assigned to transport the goods.
7.2. We cannot be held liable should a delivery prove impossible or in the case of delays in delivery due to force majeure or other events that were unforeseeable on conclusion of the contract (e.g. fire, explosion, strikes, lawful lockout, complications in procuring materials or energy, war, unrest, epidemics or pandemics where a risk level of "moderate" or above has been defined by the Robert Koch Institute, government rejection or renunciation of import and export licences, shortage of raw materials and/or other products and/or constituent parts), and for which we are not accountable. We reserve the right to withdraw from the contract if such occurrences substantially complicate delivery or make delivery impossible, and if the disruption is not merely of a temporary nature. If the disruption is of a temporary nature, delivery times shall be extended to take account of the period of disruption and a reasonable start-up period. We shall notify the customer of the start and end of such circumstances as promptly as possible. If such a delay makes acceptance of delivery unreasonable for the customer, the customer shall be entitled to withdraw from the contract by issuing immediate notice in writing or in text form.
7.3. If we are in default of delivery or performance, or are unable to carry out delivery or performance, for any reason whatsoever, our liability is limited to the extent set out in Article 13 of these Terms and Conditions of Sale and Delivery.
7.4. We cannot be held liable for the impossibility of, or delay in, performance of delivery obligations if, and to the extent that, such an impossibility or delay arises from circumstances caused by the customer, in particular if the customer fails to comply with public law obligations in connection with the European Regulations on Chemical Substances (REACH).

8. Partial deliveries

8.1. In the absence of any special agreement, we may provide partial deliveries if
– the partial delivery can be used by the customer in the context of the contractually agreed intended use,
– delivery of the remaining goods is ensured and
– this causes no extensive additional effort or additional costs to the customer.
8.2. A partial delivery made under these conditions is considered a complete delivery with regard to the agreed delivery date.

9. Default of acceptance

Should the customer be in default of acceptance or culpably in breach of other duties to cooperate, we shall be entitled to charge for the resulting damages, including any additional costs incurred. In this case, the risk of accidental loss or incidental deterioration of the purchased goods also passes over to the customer at such time as the customer falls into default of acceptance, provided that our delivery obligation has already been met with regard to the goods to be delivered.

10. Intended use of the goods, obligations of the customer, liability

10.1. If we have made a pledge for certain products to effect delivery contingent upon their intended use, the customer shall be liable for any and all disadvantages which we may suffer as a result of incorrect statements made. In the case of toxins and other substances which may only be used within the scope of legal or official provisions, the customer's order shall also serve as a statement that these substances shall be used for a purpose permissible under the foregoing terms and conditions. They shall observe the legal regulations when handling or using the substances, mixtures and products supplied by us. Private persons cannot be supplied with chemicals.
10.2. Information given concerning the usability of goods does not constitute any assurance or guarantee of suitability for such use. Relevant identified uses according to Regulation (EC) No. 1907/2006 (REACH Regulation) in the applicable version do not represent a contractual guarantee of any characteristic nor a use stipulated in the contract.
10.3. Our products shall be checked by the user with respect to their specific suitability, particularly prior to use for medical purposes, food and beverage processing, plant cultivation and similar applications. This applies in particular to natural substances, which are always subject to slight variation in content. We therefore cannot assume any liability for any such use.
10.4. Where a product comes with specific conditions for use provided by us or the manufacturer, e.g. regarding biocides, these must be complied with. We expressly accept no liability for any use to the contrary.
10.5. Insofar as we provide the customer with advice – be this verbally, in writing or as a result of tests – such advice is provided to the best of our knowledge but without liability on our part, and does not release the customer from the obligation to check the delivered goods with respect to their suitability for the intended processes and purposes. The application, use and processing of goods is carried out beyond the scope of our control and is therefore the sole responsibility of the customer.

11. REACH clause

If the customer notifies us of a use according to Article 37.2 of the Regulation (EC) No.1907/2006 dated 11.06.2019 of the European Parliament and the Council for the Registration, Evaluation, Approval and Control of chemical substances (REACH Regulation) which requires updating of the registration or the chemical safety report or results in another obligation according to the REACH Regulation, the customer shall reimburse us all expenses for which evidence is provided. Art. 53 of the REACH Regulation remains unaffected. We shall not be liable for delays in delivery caused by the notification of this form of use and performance of the applicable obligations as stipulated by the REACH Regulation. If, for reasons of health and safety or environmental protection, we are unable to consider this use an identified use and should the customer, against our advice, intend to use the goods in the manner which we have advised against, we shall be entitled to withdraw from the contract.

12. Claims for defects, compensation

12.1. Claims for defects are subject to the prerequisite that the customer has properly performed their duties to examine and give notice of defects according to Section 377 German Commercial Code [HGB].
12.2. Rejected goods must no longer be used without our explicit written consent. Where notification of defects is justified, we undertake to bear the costs of all expenses

required for rectification of the defects, in particular transportation, travel, labour and material costs. This shall not apply insofar as the expenses increase as a result of the delivery item being subsequently delivered to a location that differs from the one specified in the contract. The buyer's rights according to Section 439(3) German Civil Code shall not be restricted as a result.
12.3. Insofar as we are liable for a defect in goods purchased from us, we are entitled to correct the defect or replace the relevant product at our option and within a reasonable period of time. The place of subsequent performance is our registered office (Karlsruhe, Germany). If this subsequent performance or replacement delivery fails, i.e. if it is impossible, unreasonable, rejected or unreasonably delayed, the customer shall be entitled to withdraw from the contract or to reduce the purchase price by a reasonable amount, where statutory requirements are present.
12.4. If a defect is attributable to us, the customer is entitled to claim for compensation exclusively according to the following provisions.
12.5. In the case that an essential contractual obligation is culpably breached (a cardinal obligation), where statutory requirements are present, we shall be liable for compensation, but only limited to the foreseeable damages typically incurred, unless otherwise specified below. Cardinal obligations are those which must be fulfilled as part of the proper execution of the contract in the first instance, the fulfilment of which the buyer may rely on and which if breached would jeopardise the achievement of the purpose of the contract.
12.6. The customer is entitled to assert claims for compensation against us, without restriction, according to the statutory provisions and at the statutory rate, if these are attributable to us, one of our legal representatives or vicarious agents and are based on
– a culpable loss of life, physical injury or damage to health, or
– an intentional or grossly negligent breach of duty, or
– the Product Liability Act, or
– a breach of a duty arising from an assumption of procurement risk or warranty.
12.7. Any further claims to compensation against us, our legal representatives or vicarious agents are excluded, regardless of their legal basis.
12.8. Section 478 German Civil Code remains unaffected by the above provisions.
12.9. The bases of claims relating to data protection law are not covered by this limitations of liability clause.

13. Limitation period

13.1. Claims on the part of the buyer concerning material defects shall become time-barred after one year, unless
a) the goods supplied by us include an item which has been used for a building in accordance with its normal use and has caused a defect in the latter, or
b) the defect was maliciously concealed or is based on an intentional breach of duty by us or our legal representatives or vicarious agents, or
c) they relate to a culpable loss of life, physical injury or damage to health, or
d) they relate to claims based on a warranty or procurement risk assumed by us, or
e) they relate to claims to compensation (with the limitation of Item 13.2.).
The statutory limitation period applies in the cases above.
13.2. Claims to compensation which are based on refused subsequent performance are subject to a shortened limitation period of one year if subsequent performance has not been requested within the period shortened to a year for claims concerning material defects.
13.3. The statutory limitation periods also apply in the event of claims according to Section 445a German Civil Code if the last contract in the supply chain is a consumer goods contract in the meaning of Section 474 German Civil Code.

14. Withdrawal by the customer

If the purchased item is defective, the legal right of the purchaser to withdraw from the contract shall not be subject to our culpability. In all other cases, the customer shall only be entitled to withdraw in the event that we are in breach of obligations for which we are accountable.

15. Return of defect-free goods

Insofar as we accept the return of defect-free goods, this shall only apply to new goods in original packaging. We are entitled to charge the customer any third-party costs which we incur as a result of the return up to 25% of the list price of the goods.

16. Consequences of deterioration in the financial circumstances of the customer

16.1. In the case of payment arrears and justified doubts concerning the solvency or creditworthiness of the customer, we are – irrespective of our other rights – authorised to request guarantees or advance payments for outstanding deliveries and set all claims arising from the business relationship to payable immediately.
16.2. We may withdraw from the contract in the event that we become aware of the suspension of payments, the opening of insolvency or judicial settlement proceedings, the refusal of insolvency due to lack of assets, bill protests or cheque protests or any other tangible indications that the financial circumstances of the customer have deteriorated.

17. Retention of title

17.1. The retention of title agreed to hereinafter serves to safeguard all existing and future claims that we may have against the customer as a result of the supply relationship between the two parties.
17.2. We, the seller, shall retain the right to ownership of the goods delivered to the customer until full payment has been made for all secured receivables. The goods and any goods taking their place and subject to retention of title under the following provisions shall hereinafter be referred to as "Reserved Goods".
17.3. The customer shall ensure the safekeeping of the Reserved Goods on our behalf at no charge.
17.4. The customer shall be entitled to process and resell the Reserved Goods in normal business transactions until such time as a claim is made against them. It is not permitted to pledge Reserved Goods or to use Reserved Goods as collateral.
17.5. If the Reserved Goods are processed by the customer, it is agreed that they will be processed in our name and for our account and that we will acquire direct title to them or – if they are processed together with items from more than one owner or the value of the processed item is greater than the value of the Reserved Goods – we will acquire (partial) joint ownership of the newly-created item. In the event that we do not acquire such title to goods, the customer shall herewith transfer future ownership or, to the extent specified above, joint ownership of the newly-created item to us as a security.
If the Reserved Goods are compounded or inseparably combined with other items to form a single item and if one of the other items is considered the main item, then, insofar as the main item belongs to us, we shall transfer the co-ownership of the single item proportionally to the customer in the ratio stated in sentence 1.
17.6. In the event of the resale of Reserved Goods, the customer shall, by way of a security, herewith transfer to us the resulting accounts receivable from the buyer or our pro rata share in the case of joint ownership. The same shall apply to any other claims that take the place of Reserved Goods or otherwise accrue with respect to Reserved Goods, such as insurance claims or claims arising from unauthorised actions in case of loss or irreparable damage. We hereby authorise the customer on a revocable basis to collect receivables assigned to us on its own behalf. We shall only be entitled to revoke this authorisation for collection in the event that a claim is made.
17.7. In the event that third parties lay claim to the Reserved Goods, particularly through seizure, the customer shall without delay inform them of our ownership and notify us in writing, so that we can take action to enable assertion of our ownership rights. Unless the third party is in a position to reimburse us for legal expenses and out-of-court settlement costs, the customer shall be liable for our loss.
17.8. We undertake to release the Reserved Goods as well as any goods or claims superseding the Reserved Goods should their value exceed the amount of the secured receivables by more than 50%. The selection of the securities subsequently to be released shall be incumbent upon us.
17.9. Should we withdraw from a contract due to a breach of contract on behalf of the customer, particularly with regard to delayed payment (enforcement event), then we shall be entitled to demand that the Reserved Goods be returned.

18. Export control clause

18.1. When transferring our goods or services performed by us to third parties, the customer undertakes to observe and comply with the relevant applicable national and international legal regulations with regard to export control. This includes, but is not limited to, compliance with legal regulations governing export control in the European Union, the United States of America and the Federal Republic of Germany.
18.2. Prior to transferring our goods or services performed by us to third parties, the customer undertakes to ensure by means of suitable checks and measures that such transfer or provision does not constitute a violation of embargo regulations, including but not limited to those applicable in the European Union and the United States of America, also taking into account any anti-circumvention provisions.
18.3. The customer also undertakes to observe the provisions of European and US sanctions lists with regards to any business activities with organisations, individuals and companies listed therein. The customer also undertakes to guarantee that the use or transfer of our goods and services does not serve any military or arms-related purposes that are prohibited or require authorisation, unless the necessary authorisations have been granted.
18.4. If deemed necessary as a result of any checks, the customer is obligated to provide us upon request and without delay with all information regarding the end use, end recipient and intended use of our supplied goods and services.
18.5. The customer shall fully indemnify us against all claims asserted by the recipient as a result of the failure to comply with the above legal obligations regarding export control and undertakes to compensate us for the losses and expenses arising from such claims.

19. Information on brands and other industrial property rights

Please contact the relevant manufacturer or owner for information on brands and other industrial property rights. We are happy to help you in this process.

20 Use of customer data, data protection

We refer on this subject to our following data protection notice and to our Privacy Policy Statement, which you can access on our website at
www.carlroth.com/en/en/Datenschutzerklaerung
www.carlroth.com/pl/en/Datenschutzerklaerung

21. Place of performance, place of jurisdiction, choice of law

21.1. Unless specified otherwise in the order confirmation, the place of performance for all obligations arising from the contractual relationship is Karlsruhe, Germany.
21.2. The exclusive place of jurisdiction for all disputes arising from the contract is, if the customer is a merchant, a legal person governed by public law or a separate legal entity under public law, the competent court for our head office. However, we are also entitled to bring action against the customer in their domicile court. Peremptory legal provisions concerning the exclusive place of jurisdiction for disputes shall not be affected by this provision.
21.3. The laws of the Federal Republic of Germany exclusively govern the relationship between us and our customer. The United Nations Convention of 11th April 1980 on the International Sale of Goods (CISG) does not apply.

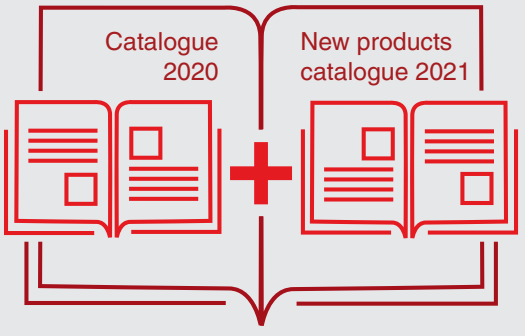
Future, sustainability and **innovation** at the heart of **CARL ROTH.**



Managing Director
André Houdelet

One thing last year certainly taught us is that we must regularly re-evaluate the way we do things to create new ways of thinking and better outcomes. And it is only by working together that we can effect lasting changes.

That is why we want to take a new approach even when it comes to our product catalogue. We have lots of new discoveries in store for you in 2021 and here you will find an overview of all this year's new products. This acts as a handy reference to supplement the existing 2020 catalogue. Combined with the updated 2021 price list for all products, you can find everything you need for your daily tasks in the laboratory. To make it simple to find what you're looking for, we have sorted the prices by item number.

By not printing a new edition of the full catalogue, we – together with you – can save tonnes of paper and CO2. With your help, ROTH is making the world just a little bit greener. We would like to take the opportunity to thank you for your support in this.

For us, less paper also means more service. We will still keep you up to date with digital pamphlets and special offers and, most importantly of all, we will continue to support you with tailored advice.

And our online store is open around the clock for you, making your purchasing more effective and also making it easier to find information. It offers a wealth of information, documents, images and videos on many of our products.

We are proud to be able to improve the information and resources available to you, while also making a valuable contribution to protecting our environment. With this in mind, we hope you will join us in looking forward to a bright future and to the difference we can make together.

Kind regards,
André Houdelet

2021 has many good aspects. You can find most of them in our **ROTH online shop.**

Complete redesign for faster ordering

In future, do you want to avoid delays caused by lengthy order processes? We can help you with this! Simply add items to your favourites ready for orders at a later date. A practical order form also saves you the annoyance of clicking back and forth between pages.

What matters is that we're always there for you and are available at all times. Simply use our „Service“ button. You also have the option to contact your field service worker or to find a suitable contact person for specific technical questions.

Handy subscription service

If you already know that you will frequently need an item, have it delivered to you at specific intervals by our subscription service. It is easy to specify the delivery intervals. Needless to say, you can also cancel your subscription at any time.

Improved search function and clear filter option

…with all your criteria such as item number, manufacturer item number, CAS number, UN number and EC number. The auto-complete function will help you to find what you're looking for. Once you've performed a search, you can quickly narrow down the results according to your requirements using the many filter categories.

You can use the sort function to display the search results in the order you require.

There's a new category for bargain hunters. You can see our temporary promotional prices with a single click. Our new arrivals are also saved in a category.

Further down on the product page, you will find additional information with downloads, certificates of analysis and guarantee analyses.

You can now also review our products for other users, share items and leave your feedback.

www.carlroth.com

...you'll be amazed at how much information you can find at a glance in the Carl ROTH shop.

Online catalogue

If you wish, you can even take a glance through our flip catalogue and place an order straight away with a single click.

We hope you enjoy your shopping experience and find what you're looking for in our new online shop!

Your partner for high-quality performance

With 5 plus points to your advantage:

Quality

All products in the ROTH product range are subjected to strict in-house checks. This enables us to ensure you receive consistently high product quality.

Logistics

Direct dispatch! Delivery fast, simple and reliable!

Special rates & Discount

Fair and calculable, i. e. a quantity discount of 5 % from 6 packs and 10 % from 24 packs of same items will be granted. Please check with us for special rates on bulk amounts or standing orders.

Customer advice

Customer proximity and competence, i. e. we are here to advise you before and after buying.

Returned & Take-Back Goods

You can take advantage of our 10-day exchange and take-back guarantee. Just send the goods to us in their original packaging together with a copy of the invoice or delivery note and your modified order. We are unfortunately unable to pay the costs for postage and packing. We request you to get in touch with us for any legitimate complaints which require goods to be returned. We shall then authorize our forwarding agent immediately to pick up the goods in question.

In the event of goods being returned independently and without prior notice, postage and packing costs can only be refunded for the same amount as agreed upon with our forwarding agent. Further information on returning goods can be found in the terms of sale and delivery at the back of this catalogue.

Product Compliance Management
Munich, 2019-06-17

The guiding principle for an environmentally conscious corporate management has always been a fundamental part of our business conduct. In addition to fulfilling our statutory environmental commitments, therefore, we always strive to define environmental protection targets and to optimise our operating procedures taking into account environmental aspects.

Our certified environmental management system helps us to systematically pursue this aim.

By participating in the *Responsible Care*® programme of the chemical industry, we have undertaken a commitment to meet the goals set by the programme.

These goals are to promote sustainability, to show product responsibility, to ensure safety, to improve health protection in the workplace and to better protect the environment.

Innovative use of combined heat and power technology when printing this product reduced CO_2 emissions by up to 52% in comparison to conventional methods in Germany.

Plastics – Technical data / Key to symbols

What about the packaging material?

We are making our contribution to the environment:

- By trying to use as little packaging material as possible. Unfortunately we cannot do without packaging completely as it has the important function of not only protecting the product, but also man and environment from any harm.

- By using environmentally friendly and recyclable packaging material as far as possible. As early as the beginning of the 80s, we stopped using polystyrene inserts for packing solvents, acids and alkaline aolution. We now use special boxes for hazardous goods made of 100 % recyclable corrugated cardboard. Paper is used as stuffing material.

Please also help by putting the **packaging in the recycling container after use**. Our boxes are labelled with the recy-symbol; they can be easily stored when cut open and pressed together without taking up much space, prior to being put out for recycling.

Our **plastic containers made of polyethylene (PE)** can also be turned in for recycling after they have been completely emptied and cleaned of all harmful substances.

The same applies to **tin flasks and canisters** once emptied and pollutent-free.

Sterilizing plastics – Autoclaving

Recommended autoclave cycle:
20 minutes at 121 °C, 1 bar

1. Clean autoclave goods thoroughly prior to sterilizing.
2. Rinse off used detergent with distilled water.
3. Unscrew caps to enable pressure compensation.
4. Only autoclave containers with stop-cock when empty, screw off stop-cocks.

   Following plastics can be autoclaved repeatedly:
   ETFE, PFA, PTFE, FEP, E-CTFE, PMP/TPX®, PP, SI, PVDF; PES, PSU

Note:
Polycarbonate PC and Polysulfone PSU are also autoclavable, however this reduces the mechanical stability. This can result in material failure particularly when under high mechanical strain, e.g. during centrifuging.

Please contact us should you have any further questions regarding packaging.

1993
Construction of a modern high-bay warehouse.

1995
First certification of the quality management system to DIN EN ISO9001.

2005
The chemicals department moves into modern premises on the Karlsruhe-Rheinhafen industrial estate.

2013
An extension with an automated small parts warehouse is added to the Chemicals and Life Science building, enlarging its area to approx. 8.000 m². CARL ROTH now stocks over 21.000 products in its warehouse.

Pressurised sprayer Food

Bürkle. Material: PE, PP, Silicone, Stainless steel.

The container of the pressurised sprayer has a transparent viewing window, which makes reading the fill level easy. Rubber-clad standing ring ensures that the sprayer can be put down safely. The integrated safety valve prevents overpressure (max. 3 bar). Adjustable nozzle nut allows users to individually adjust the spray jet, ranging from a fine spray mist to a powerful jet.
Suitable for use in the food sector, for spraying a wide range of media (such as oils, grease and aromatic substances) and for atomising cleaning agents and disinfectants.

- Parts in contact with media: PE, PP, silicone, stainless steel
- **Suitable for use with foodstuffs**

Pressurised sprayer Turn'n'Spray

Bürkle. Material: HDPE, PP, FKM, Stainless steel.

With short spray nozzle. A pressure of max. 4 bar is generated in the container by operating the piston rod. Then you can spray the liquid by pressing the button.
The Turn'n'Spray pressurised spray's 360° spraying function also allows users to spray overhead. This means that it can spray in hard-to-reach areas without difficulty.
Applications: Disinfection, cleaning, crop protection, thin-layer chromatography, technical and sanitary requirements.

- Parts in contact with media: HDPE, PP, FKM, V4A
- With overhead spraying function
- Nozzle diameter 0.8 mm, continuously adjustable
- Liquid temperature: 0–30 °C
- Spray lance (length 30 cm) available as an option

Silicone covers DURAN®

DWK Life Sciences. Material: Silicone. Autoclavable: Yes.
For covering and closing vessels with different shapes. Thanks to its outstanding elasticity, the DURAN® silicone cover can be used for covering various vessel diameters and shapes. The wide overlapping edge of the silicone cover engages well with the vessel wall.

- Protects against dust entering or the medium spraying out
- Samples can be marked easily using different colours and an additional labelling field on the tab
- Easy to clean, dishwasher-safe and reusable, therefore environmentally friendly and economical

Cell culture inserts BRAND Insert 2in1

Brand. **Sterile**.

Suitable for producing skin models, 3D epithelial cell cultures, study of chemotaxis, transmigration assays or, e.g., in transport and polarity studies. For general cell culture work or swapping from the standing to the hanging position, already validated cell culture plates can be reused. Thanks to their feet and hooks, BRAND Inserts 2in1 can be positioned both ways. With its protein-like structure, the cellGrade™ plus surface optimally promotes the growth of primary keratinocytes and many other cell types.

- Can be used as a hanging or standing insert
- Compatible with all good multiwell plates
- Suitable for 2D and 3D cell cultures
- Surface: cellGrade™ plus
- Sterility Assurance Level (SAL) of 10^{-6}

Measuring spoons

Bürkle. Material: PS.

The measuring and dosing spoons can be used for precisely measuring and dosing small quantities of powders, granulates and liquids. Any excess medium is wiped off at the top edge of the spoon to allow precise measuring.
The flat front edge of the measuring spoon is perfect for collecting medium from the base of the container or reaching into the corners of the container to efficiently remove any residue. Its flat base means that the measuring spoon can be put down without spilling its contents.

- With wiping edge
- The volumes are engraved on the handle
- Manufactured in a clean room (clean room class 7)
- Compliant with the EU food directives and FDA guidelines

Dispensing pump OTAL® Disposable PE

Bürkle. Material: PE, PVC.

Single-use feed tube is quick and easy to replace. No contamination of the solution due to contaminated reusable pumps. Time-consuming and cost-intensive cleaning is no longer required. The feed tube is the only part which comes into contact with the medium.

- PE feed tube, made of one piece and which can be cut to the required container height
- The drainage elbow from the feed pipe can also be cut
- Max. flexibility and good residue emptying
- With universal adapter made of soft PVC for container openings of Ø 30-70 mm

Barrel pump PTFE

Bürkle. Material: PTFE, FEP.

Excellent chemical resistance for safe filling of ultrapure and aggressive liquids.

- Works according to the piston stroke principle.
- Stopcock stops liquids from dripping and prevents hazardous vapours from escaping.
- Good residue emptying by a low-mounted non-return valve and barrel screw joint that can be continuously adjusted with respect to height.
- Barrel screw joint attaches the barrel pump securely in the barrel.

Diaphragm vacuum pump LABOPORT® SD series

KNF.

Chemical-resistant, **suitable for highly aggressive and corrosive gases and vapours.**
Self-drying, **for moist gases:** During the evacuation process, the pump blows condensate liquid out of the pump heads at high speed. The vacuum remains constant during this application.
Application:
For applications such as steam sterilisers or vacuum drying in vacuum drying ovens, to significantly speed up the evacuation time.

- High steam and condensate resistance
- Gas-tight, leak rate approx. 6 x 10^{-3} mbar x l/s
- With thermal switch and mains fuse

Vacuum system PC 3000 VARIO select series

Vacuubrand.

Optimal solution for chemical processes requiring a precise vacuum, such as rotary evaporation, vacuum drying or vacuum concentration, by combining the speed-controlled VARIO chemical diaphragm pump and VACUU·SELECT vacuum controller.

- Uncompromising chemical version: Excellent chemical resistance throughout from the suction side to the pressure side
- Precise and efficient vacuum control via the pump speed (VARIO technology).
- Vacuum controller with graphical user interface and predefined vacuum processes for all standard laboratory applications.
- Automatic boiling point detection and vacuum adaptation for short process times.
- Application, required vacuum and other parameters can also be individually configured and controlled.
- Very quiet and low vibration operation.
- Excellent environmental compatibility through low energy consumption, extended maintenance intervals and efficient solvent recovery.
- Suction-side separator made of glass with protective coating retains particles and droplets, very compact pressure-side emission condenser enables almost 100% solvent recovery.
- Interfaces for remote monitoring, remote control, data transfer (export/import), software updating

Rotary vane pump package ROTILABO® CR-DS40

ROTH SELECTION.

Robust, two-stage vacuum pump primarily for vacuum ovens, freeze dryers and the Schlenkline technique. Its innovative technology means that it has a long service life and is highly reliable and low-maintenance.

- Lower operating temperature thanks to optimised cooling, which reduces the chemical activity in the pump and the oil consumption.
- Extended oil change intervals thanks to the large oil storage tank.
- Larger oil capacity results in increased dilution of chemical vapours, minimisation of oil degradation rates and reduction in chemical damage in the pump.
- Decelerated metal corrosion thanks to the additional coating of pump module and oil storage tank which, in conjunction with cold traps, extend the maintenance intervals.

Technical specifications:

Art. No.	1A9E.1

Vacuum controller VACUU·SELECT compact

Vacuubrand.

For controlling a vacuum in the coarse vacuum range. Measures and displays the absolute pressure. Compact unit, simple installation, for increased process efficiency.

- Operation via glass touchscreen, even when wearing thick laboratory gloves.
- Highly intuitive, application-oriented operator guidance with integrated help function and contextual tips for application.
- Saves time thanks to preset vacuum processes for all common laboratory applications.
- Independently detects the boiling point during solvent evaporation, e.g. using the rotary evaporator.
- Storage of individual vacuum processes using an application editor for reproducible results.
- Ceramic membrane vacuum sensor integrated in the device, measurement connection at the valve block. Easy to connect the controller between the pump and vacuum application.
- Chemical vacuum power valve: Electromagnetic flip-flop valve for controlling the vacuum you require in the application, with graduated hose nozzles.
- Integrated venting valve: Simple pressure compensation or ventilation with inert gas at the end of the process.
- Integrated non-return valve: No interference with adjacent applications using a shared vacuum source.
- Switchable pressure display (mbar, torr, hPa)

Vacuum meter VACUU VIEW

Vacuubrand.

For monitoring vacuum processes with particularly high precision.

- Lit pressure display makes it easy to read the measured values.
- Display with menu navigation, simple adjustment of display options, e.g. pressure unit
- Compact design with integrated sensors; is practical to position for lab and process set-ups.
- Sensor chemical-resistant for increased service life, even for aggressive applications.
- Stable plastic housing with good chemical resistance.
- Switchable pressure display (mbar, torr, hPa).

Technical specifications:

Art. No.	1E9H.1	1E9E.1
Type	VACUU VIEW Extended	VACUU VIEW Standard
Measuring range	1100 – 0.001 mbar	1100 – 1 mbar
Resolution	1 mbar (1100 – 10 mbar), 0.1 mbar (10 – 1 mbar), 0.01 mbar (1 – 0.1 mbar), 0.001 mbar (0.1 – 0.001 mbar)	1 mbar (1100 – 100 mbar), 0.1 mbar (100 – 1 mbar)
Measuring principle	Capacitive and acc. to PIRANI	capacitive
Accuracy	±3 mbar (1100 – 5 mbar) ±15% from the measured value (5 – 0.01 mbar)	< ±1 mbar/±1 digit
Connection	KF DN 16 small flange, DN 6/10 mm stepped hose nozzle	
Ambient temperature	+10 – +40 °C	
L x W x H	50 x 62 x 103 mm	
Weight	190 g	
Mains connection	100 – 230 V, 50/60 Hz	

Delivery incl. DN 6/10 mm hose nozzle and plug-in power supply.

(1) Standard
With chemical-resistant ceramic membrane sensor for measurements in the coarse vacuum range. Detection of the applied absolute pressure, regardless of the gas type, according to the capacitive measuring principle.

Vacuum controllers VCpro 601

Welch Vacuum.

Two-point controller for regulating a rough vacuum, for universal use. Robust vacuum sensor, chemically resistant and very precisely adjustable to ±1 mbar.

- With large, multilingual colour display and light/dark screen mode for optimum visibility
- Measured values can be presented digitally as a curve progression or in an analogue manner as individual values
- Integrated solvents library with stored distillation-specific parameters or freely adjustable boiling points; storage of individual pressure histories for innovative processes possible
- With communication port for remote control/monitoring, for downloading logged process data and for software updates
- Various safety levels can be accessed for self-defined user approvals
- Selectable pressure unit (mbar/Torr/psi)
- Integrated ventilation valve for inert gas/room air and solenoid control valve for vacuum
- Connection for cooling water valve available

Technical specifications:

Extraction system BioChemVacuuCenter BVC

Vacuubrand.

Safe, precise and effective extraction of liquids in all areas of laboratory work (chemistry, biochemistry and biology).

- Ergonomic VHC[pro] extraction handle with continuous tube; mechanism does not come into contact with fluids
- With swivelling pipette holder, for left- and right-handed users
- Lockable button for continuous extraction, µl precision extraction using thumbwheel
- Simultaneous extraction at two workstations is possible by connecting an optional second extraction handle
- Hydrophobic protective filter with 0.2 µm pore size for protection of the pump unit and the surrounding area

Accessories for BVC

Vacuubrand.

VacuuHandControl VHC^{pro}
Autoclavable: Yes. Ergonomically shaped extraction handle with pipette holder and adapter for various pipettes and tips. Operating lever for manual extraction and rotary knob for permanent extraction setting.

Delivery incl. Suction hose L 2.5 m, adapter for pipettes/tips and wall holders.

Version	Art. No.	Pack Qty.	€
Extraction handle	**CYA7.1**	1 unit(s)	144,05

Tip sensor, 1x
Autoclavable: Yes. Suitable for pipette tips 2 - 200 µl. With ejector for used pipette tips.

Version	Art. No.	Pack Qty.	€
with ejector	**1EPK.1**	1 unit(s)	49,95

VHC^{pro} 8-channel adapter
Autoclavable: Yes. For parallel extraction with eight pipette tips (size 2-200 µl or 5-300 µl) from 96-well microtiter plates of standardised size. With ejector for removing pipette tips.

Version	Art. No.	Pack Qty.	€
with ejector	**CYA8.1**	1 unit(s)	333,25

VHC^{pro} table stand
Autoclavable: Yes. Made of stainless steel. For comfortable and stable storage of the VHC^{pro} extraction handle while working with cell cultures.

Version	Art. No.	Pack Qty.	€
Table stand	**1EPL.1**	1 unit(s)	95,50

Add-on kit for second extraction handle
Autoclavable: Yes. For connecting a second VacuuHandControl VHC^{pro}. With hose nozzle and inlet tube for minimal aerosol and foam formation.

Delivery incl. Hose nozzle and inlet tube. VacuuHandControl VHC^{pro} extraction handle not included, please order separately.

Version	Art. No.	Pack Qty.	€
Add-on kit	**XE41.1**	1 unit(s)	40,55

4 l PP collecting bottle
Autoclavable: Yes. High chemical resistance. Special distributor head for minimal aerosol and foam formation. With a connection for a VHC^{pro} extraction handle. Connection option provided for second VHC^{pro} (optional). 0.2 µm protective filter with hydrophobic diaphragm for protection of the pump, tubing and the surrounding area. Hose for connection to a BVC.

Delivery incl. Lid with connections, protective filter and hose piece.

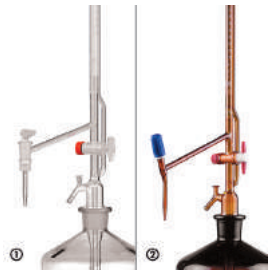
Version	Art. No.	Pack Qty.	€
With hose nozzles	**XE38.1**	1 unit(s)	234,35
with quick couplings	**1EPN.1**	1 unit(s)	452,60

2 l glass collecting bottle
Autoclavable: Yes. For work with chemically aggressive solutions, the plastic sheath protects against mechanical damage and minimises loss of liquid in the event of the glass breaking. Special distributor head for minimal aerosol and foam formation. Hose nozzle for connecting the VHC^{pro} extraction handle. Connection option provided for second VHC^{pro} (optional). 0.2 µm filter element with hydrophobic diaphragm for protecting the pump, tubing and the surrounding area, hose for connection to a BVC.

Delivery incl. Lid with connections, protective filter and hose piece.

Version	Art. No.	Pack Qty.	€
With hose nozzles	**XE39.1**	1 unit(s)	317,15

Adapter for 2 l glass collecting bottle
Autoclavable: No. For securely holding the 2 l glass collecting bottle. Included with the complete system for the BVC basic G, BVC control G and BVC professional G models.



Version	Art. No.	Pack Qty.	€
Adapter	**XE40.1**	1 unit(s)	45,90

Quick coupling (extraction handle - collecting bottle)
Autoclavable: Yes. For convenient and secure replacement of 4 l PP collecting bottles. Made of PVDF for connecting the VHC^{pro} extraction handle to a collecting bottle. Excellent chemical resistance, complete with inlet tube for minimal aerosol and foam formation.

Version	Art. No.	Pack Qty.	€
VHC^{pro} - bottle coupling	**XE42.1**	1 unit(s)	107,45

Quick coupling (collecting bottle - pump)
Autoclavable: Yes. For convenient and secure replacement of 4 l PP collecting bottles. Made of PVDF, for connecting a collecting bottle to a BVC. With excellent chemical resistance. Vacuum-sealed closing of the collecting bottle when disconnected. Autoclavable.

Dispenser pipette HandyStep®

Brand.

Electronic multi-dispenser with touch operation.

- Touch operation with intuitive menu navigation and integrated assistance
- Variable volume adjustment between 1.0 µl and 50 ml
- Automatic size recognition for Brand PD-Tips //
- Button for automatic tip ejection to avoid contamination
- Compatible with dispenser tips from other manufacturers
- Inductive charging, quick charging via a USB-C port
- One fully charged battery provides many hours of continuous operation
- Long service life thanks to high-quality materials
- Smooth surfaces make cleaning/disinfecting easy
- Languages: German, English, Spanish, French and Chinese

Standard modes: Multi-dispensing, auto dispensing, pipetting and favourites.

Single-channel microlitre pipette Pipetman® Classic

Gilson.

Continuously adjustable air displacement pipettes suitable for aqueous solutions of medium viscosity and density. The PVDF casing is resistant to aggressive chemicals and its piston assembly prevents its internal components from degrading. The tip holder and tip ejector are fully autoclavable. This can minimise cross-contamination, which could compromise the accuracy of the results.

- High accuracy and precision
- Colour-coded pipetting button
- Simple tip ejection (models to 1000 µl)

Filter tips ROTILABO®

ROTH SELECTION. Material: PP, Filter made of PE. Autoclavable: No.

Filter tips eliminate harmful aerosol transfer during pipetting and protect pipette shafts from contamination and cross-contamination. In this way, reproducible and reliable results are guaranteed. The efficient barrier against aerosols and vapours also protects against radioactive, environmentally harmful or corrosive substances penetration the pipette body.

- Made of non-cytotoxic, biologically inert and highly transparent polypropylene
- Hydrophobic filters made of pure polyethylene
- Free of chemical additives, no risk of cross-contamination in case the liquid comes into contact with the filter
- Filter pore size of 10-40 µm for extremely high filter density
- Production under strictly controlled clean room conditions
- Extra smooth inner surface
- Graduation for quick and convenient visual volume testing
- Universal fit to many popular pipette brands, simple and effortless ejection
- Special design prevents DNA denaturation
- **Free from RNase/DNase and human DNA**
- **Pyrogen and PCR-inhibitor free**
- **Non-metallic**

Microtitration plates

Greiner Bio-One. Material: PS.

- Solid base
- Free of detectable endotoxins
- Free of detectable DNase, RNase and human DNA

Technical specifications:

Art. No.	1A70.1	1A71.1	1A72.1	1A73.1
L x W x H	127.76 x 85.48 x 14.6 mm		127.76 x 85.48 x 14.1 mm	

F-profile

Ideal for extremely precise optical measurements. The cell geometry does not deflect the measurement light beam.

- Cell geometry: F-base/standard (flat base)
- For microscopic applications (bottom reading)
- Excellent optical properties thanks to the flat base of the cells

Sterile.

Funnelless bottle-top filter. This bottle-top filter enables direct filtration from a media bottle or tissue culture reagents/buffer bottle with a neck thread size of 38 mm or 45 mm into a vacuum-compatible, sterile screw top bottle with a neck thread of 45 mm or GL 45. The Steritop™ E funnelless bottle-top filter offers a more sustainable option for sterile filtration thanks to a considerable reduction in plastic and packaging material. For routine sterile filtration of tissue culture media, buffers, reagents and other aqueous liquids.

- Membrane material: Express® PLUS (PES) membrane, hydrophilic
- Low protein binding, high flow speed and short filtration time
- Housing: PS
- For sample volume: 150 to max. 1000 ml
- Membrane diameter: 73 mm
- Filtration surface: 40 cm^2
- Pore size: 0.22 µm
- Max. usage temperature: 50 °C
- Vacuum connection: for tubes with inner diameter of 6.5 to 12 mm

Filtration unit Stericup® E

MERCK MILLIPORE. Housing: PS, membrane: PES, hydrophilic.
Sterile.

A combination of funnelless bottle-top filter and collecting bottle. The bottle-top filter enables direct filtration into the sterile collecting bottle from a media bottle or tissue culture reagents/buffer bottle with a neck thread size of 38 mm or 45 mm. The Stericup® E funnelless sterile vacuum system offers a more sustainable option for sterile filtration thanks to a considerable reduction in plastic and packaging material. For routine sterile filtration of tissue culture media, buffers and reagents. Ideal for use under laminar flow conditions thanks to its compact form. Stackable bottles.

Membrane filters Track-etched polycarbonate

Sartorius. Material: PC, hydrophilic. Autoclavable: Yes.

For filtration of aqueous solutions or gases.
Uniform and precise capillary pore structure thanks to the track-etching technique. Suitable for applications in which particulates need to be retained on the membrane surface or for the fractionation of particulates.

- Membrane thickness: 25 µm
- Colour: white
- Temperature-stable up to 140 °C

Application examples:
Particulate analysis, epifluorescence microscopy, fluid clarification, cytology, cell biology, water microbiology and environmental analysis.

Glass fibre round filters

Cytiva. Material: Borosilicate glass fibres, Inorganic binding agent.

- Chemically resistant to the majority of organic and inorganic solvents, aggressive chemicals and highly concentrated bases (not resistant to hydrofluoric acid)
- Constant weight, negligible influence on fluctuations in ambient humidity
- Mechanically stable (limited bending resistance)

Note: Filter units and clamping fixtures must have flexible sealing surfaces.

Type GF 6
Applications: Environmental analysis, biology, physics, drinks industry.

Use: Gas/air monitoring, water and waste water tests, scintillation measurements, dry mass determinations.

- Filtration speed: Low
- Retention rate: 99.97%
- Retention range: < 1 µm
- Surface weight: 80 g/m²
- Thickness: 0.35 mm

Membrane filters cellulose mixed ester

Cytiva. Material: CME, hydrophilic. Autoclavable: Yes.

Versatile membrane made of cellulose acetate and cellulose nitrate mixed ester.
Application examples: sterile and clear filtration, particle separation and analysis, microbiological analyses, counting of germs, yeasts, fungi and particle, food biology, air pollutant measurements, etc.
Max. usage temperature 130 °C.
Gridded membranes **(line spacing 3.1 mm)** make it easier to count particles and micro-organisms; the dyes used are non-toxic and free of antibacterial substances.

- High dirt absorbing capacity prevents rapid clogging of the membrane
- Uniform membrane structure ensures high flow rates
- Very smooth and even surface aids microscopic evaluation
- Biologically inert and free of surfactants

Sterile Membranes are individually packed.

Safety funnels for combi-barrels

Rötzmeier. Material: Stainless steel, Sealing ring made of PE.

Screw onto combi-barrels with a 2" coarse thread (female buttress thread S56 x 4). With lid, overfill protection, flame arrester and earth connection.

- The flame arrester, which reaches far into the container (approx. 150 mm long), prevents the ingress of sparks and can be unscrewed for cleaning or replacement.
- For conductive containers, earthing is realised by the thread (direct contact); an additional earth connection is provided for other containers.
- The flap lid reduces the emission of volatile, harmful vapours and needs to be closed manually.

Saveris 2-set
For temperature monitoring in fridges and freezers: Safe and convenient.

- With 2 external NTC temperature sensors.
- Special ribbon cables prevent damage to door seals.
- Included vials can be filled with glycol. If the sensors are immersed, they act as a temperature limiter and compensate for brief temperature fluctuations.

Delivery incl. 2x NTC temperature sensors, 2x vials, basic cloud access, micro USB cable, wall mount with lock, calibration protocol and batteries.

Testo 160 IAQ
Ideal for monitoring room air quality. Integrated sensors for temperature, air humidity, CO_2 and atmospheric pressure precisely determine the climate conditions in any room.

- Air quality shown with coloured LEDs on the data logger (traffic light system).
- Custom CO_2 limit values can be defined.
- Can be powered by the mains and batteries.

Delivery incl. basic cloud access, micro USB cable with mains adapter, wall mount with lock, calibration protocol and batteries.

Test swabs QUANTOFIX®

Macherey-Nagel.

For semi-quantitive determination of various substances. The test swabs consist of a 0.2 mm-thick plastic strip with testing paper affixed to the lower end. After the test strip has been moistened, the colouration that appears is compared to a colour scale on the side of the can. The concentration value can be read or a concentration range can be estimated.
Dimensions: W 6 x L 95 mm.

Round cuvette test NANOCOLOR®

Macherey-Nagel.

Quick tests for photometric analysis. Reagents and additional reagents are precisely pre-dosed for optimum accuracy and correctness of measured results. Convenient, safe removal of round cuvettes (external diameter 16 mm) from the stable box with coloured pictograms providing step-by-step instructions on the cover. Batch-specific information can be accessed via a 2D bar code on the reverse of the packaging.
For example, NANOCOLOR® round cuvette tests are suitable for use with the PF12^{Plus} photometer.

Carbon dioxide meter Air CO_2ntrol 5000

Dostmann.

For monitoring the CO_2 concentration in buildings where people are present. With data logging function.

- Large backlit display with history function.
- Traffic light display: LEDs (green, yellow, red) signalise CO_2 pollution.
- Additionally with acoustic alarm signal as soon as the individually set limit is exceeded.
- Logger function saves data as a CSV file on a Micro SD card; evaluation via Microsoft Excel®.
- For table and wall mounting.

Technical specifications:

Art. No.	**1EN4.1**
Type	Air CO_2ntrol 5000
Parameters	Temperature, Humidity, Carbon dioxide
Temperature measuring range	0 to +50 °C
Carbon dioxide measuring range	0 - 5000 ppm
Rel. humidity measuring range	5 to 95 %
Resolution	0.1 °C, 1% rel. hum., 1 ppm (0-1000 ppm) 5 ppm (1001-2000 ppm) 10 ppm (2001-5000 ppm)

Microscope camera Moticam S series

Motic.

For diverse applications in day-to-day microscopic work in which data processing is carried out directly on the PC.

- Can be mounted via C-mount connection on the third tube of the microscope; the microscope manufacturer provides appropriate C-mount adapters
- New sCMOS technology for high frame rates and optimal image quality; maximum sensitivity for applications with low light output
- Faster data reading for recording rapid phenomena via USB 3.1 gen.1 connection; USB 2.0 compatibility for older computers ensured
- Supported operating systems: Windows XP and later versions, Apple Mac OSX and Linux
- Minimum system requirements: 2 GHz dual-core, 2 GB RAM, min. 512 MB video memory
- Software functions: Still image and video, live and still image measurements, image enhancement, white balance, automatic and manual exposure time, individual calibration

Magnifier lamp Tevisio

Waldmann. Material: Glass, Housing made of anodised aluminium and black plastic.

For demanding applications in research, manufacturing, quality assurance and assembly.

- Large, distortion-free field of vision
- Anti-scratch glass lens
- Lens removal without tools for cleaning or replacement
- 48 LEDs
- Various light segments can be switched on and off to create structure-accentuating effects
- Continuously variable dimming to 10%
- Colour temperature: Neutral-white
- 40 % energy saving compared to standard magnifier lamps
- 3D head joint for individual adjustments

Ozone generator OZ series

Phönix Instrument.

For local oxidative odour neutralisation and disinfection (elimination of micro-organisms) of surfaces like fixtures, furniture surfaces and walls.

Ozone (O_3) is a strongly oxidising molecule made up of three oxygen atoms. It exists as a gas and very quickly breaks down in the air into normal oxygen (O_2) under standard conditions. Ozone can remove harmful substances in the air.

An integrated timer ensures ozonisation at non-working times without personnel present. With proper application (sufficient ventilation), there are generally no more hazardous substances in the air after cleaning.

- Disinfection of rooms (germs, viruses, bacteria)
- Sanitation of rooms
- Mould spores in the air
- Musty smell
- Memory for 16 programmes - each programme comprises day (d) and On/Off time pair (h:min)

Heater and magnetic stirrer RCT series

IKA.

- Aluminium hot plate
- Clear display incl. target/actual value display for temperature and speed
- Housing surface made of toughened glass for optimum cleaning and chemical resistance
- **Integrated contact thermometer with full functionality, for direct control of the medium temperature**
- „Sensor in medium“ detection
- Adjustable safety circuit (50 to 360 °C)
- **Integrated timer function**
- Adjustable automatic reversal of direction of rotation (10 sec to 10 min) and pause time (3 sec to 5 min)
- **Direction of rotation of the magnetic motor can be adjusted by turning to the left or right**
- Hot surface warning
- USB/RS 232 interface

Technical specifications:

Art. No.	HPA5.1	1A33.1
Type	RCT digital	RCT 5 digital
Number of stirring points	1	
Max. stirring capacity (H_2O)	20 l	
Speed range	50 to 1500 rpm	
Speed display	LCD	
Operating temperature	Ambient temperature to +310 °C	
Temperature display	LCD	
Setting accuracy	1 °C	
Control accuracy without sensor	±5 K	
Control accuracy with sensor	±0,5 K	
Heating output	600 W	850 W
Timer function	99 h, 99 min and 59 sec	
Footprint	Ø 135 mm	137 x 137 mm
W x D x H, total	160 x 270 x 85 mm	
Weight	2,4 kg	2,6 kg
Mains connection	220–230 V, 50/60 Hz	

Delivery incl. Pt 1000.60 stainless steel temperature measuring sensor (Ø 3 mm, L 230 mm).

Multi-position magnetic stirrer with heater MULTI-HS series

Velp.

Simultaneous mixing at 6 or 15 stirring positions with identical intensity and homogeneous temperature distribution.

- Digital speed and temperature display
- Aluminium hot plate with protective coating made of ceramic
- **With integrated tempering plate**
- Constant speed, even after changes in medium viscosity
- Safety warning display comes on at temperatures above 50 °C
- Integrated timer operation (1 min to 99 h, 59 mins), with audible signal when the countdown has ended
- Adjustable automatic reversal of direction of rotation (5 sec to 99 min, 59 sec in 1 sec increments)
- Max. medium temperature 70 °C (depending on vessel)

Technical specifications:

Heater and magnetic stirrer MR Hei series

Heidolph.

- Digital display of hot plate target temperature and target speed
- Heating output 800 W
- Stirring capacities up to 20 l
- Hot plate made of silumin with ceramic coating
- Independent safety circuit switches off the heating at 25 °C over the preset hot plate temperature with a separate circuit
- **Direct connection facility for PT 100 medium temperature sensor** (please order the desired temperature measuring sensor and the accessories for attaching the measuring probe separately,the packages with order no. 1ATN.1 and 1ATP.1 include the accessories)
- Integrated contact thermometer with full functionality
- Residual heat warning

Thermoshaker Matrix Orbital Delta series

IKA.

Mixes and heats reaction vials and microtiter plates with round/circular motions.

Application:

- TFT display with convenient menu layout
- Automatically performs mixing and heating tasks with five programmable ramps with five increments each consisting of temperature, speed and time
- Diecast-aluminium housing for stability
- USB and RS 232 interfaces
- Shaking frequency can be adjusted in 10° increments

Technical specifications:

Art. No.	1A2Y.1	1A30.1	1A31.1	1A32.1
Operating temperature	5 °C above room temperature up to +100 °C			
Temperature adjustment range	1 to +100 °C			
Accuracy	±0.5 K at 20–45 °C ±1.5 K >45 °C			
Resolution	1 °C

Universal cleaner Mucasol®

Schülke & Mayr.

Liquid, alkaline high-performance concentrate for manual cleaning for the immersion and ultrasonic bath and suitable for cleaning by wiping. Effectively removes blood, protein, oil, grease, silicone, tar, wax, tap grease, resin and distillation residues. Multi-purpose quick cleaner for laboratory equipment and instruments made of glass, porcelain, plastic, rubber and metal.

- **Chlorine- and caustic alkali-free**
- Concentrate pH value: Approx. 12.3
- Density: Approx. 1.43 g/cm³

Working concentration

In an ultrasonic bath: 0.2–2%, in an immersion bath: 0.7–3%.

Directions for use

Exposure time: 10–30 min. Longer exposure times should be avoided on surfaces made of zinc and non-anodised aluminium.
An optimised cleaning result is achieved by heating the working solution. To avoid protein denaturation, select a temperature of < 45 °C.
After cleaning, rinse the objects thoroughly with deionised water to completely remove cleaning solution residues.

DNA Markers

DNA-Marker, prestained

Markers (DNA-gels)

The bands of the marker are prestained with the fluorescent dye SYBR® Green I, which has been developed specifically for DNA analysis. The dye bounds to the minor groove of DNA and is therefore not intercalating. It can be excited by UV- and blue light, making it fully compatible with standard UV-transilluminators as well as with modern blue-light illumination (see also ROTIPHORESE®PROfessional runVIEW, Art. No. 4849.1). When excited, the nucleic acid-bound dye emits a brightly coloured green fluorescence that may be documented by all usual broadband ethidium bromide filters or SYBR® Green foto filters.

Staining of DNA Gels

SYBR® Green DNA dye

Ethidium bromide substitutes

This is the DNA dye SYBR® Green I, a staining reagent for detection of double stranded nucleic acid in agarose and polyacrylamide gels. The dye is added directly to the DNA/Loading buffer mixture and then loaded onto the gel.
SYBR® Green I bounds to the minor groove of DNA and is therefore not intercalating. Upon excitation it emits a bright green fluorescence. The sensitivity is up to 0.01 ng per band and is therefore 20 times higher than ethidium bromide.
SYBR® Green I has been developed specifically for gentle DNA analysis. DNA integrity is not influenced; hence, gel eluted DNA may directly be applied to standard down-stream applications, like, e.g., ligations, PCR, transformation, transfection etc. without interfering effects.

- Direct addition to DNA sample
- For excitation with UV light and blue light
- Non-toxic alternative for ethidium bromide

SYBR® Green DNA dye can be excited by UV- and blue light, making it fully compatible with standard UV-transilluminators as well as with modern blue-light illumination (see also ROTIPHORESE®PROfessional runVIEW, Art. No. 4849.1). The gels may be documented by all usual broadband ethidium bromide- or SYBR® Green foto filters.

ROTI®Load DNAstain SYBR® Green

Loading bufer with the fluorescent dye SYBR® Green I for staining of double stranded nucleic acid in agarose and polyacrylamide gels.

- Alternative for ethidium bromide, non-toxic, non-mutagen
- 20 times more sensitive than ethidium bromide, up to 0.01 ng nucleic acid per band
- For use with common broad-band ethidium bromide photo filters
- Excitation possible via UV light (254 nm) and blue light (495 nm)
- Compatible with all usual down-stream applications.

ROTI®Load DNAstain SYBR® Green is easy to use and reduces significantly the time required for gel analysis. The contained fluorescent dye SYBR® Green I detects up to 0.01 ng per band, and is, therefore, 20 times more sensitive than ethidium bromide. DNA integrity is not influenced by SYBR® Green I; hence, gel eluted DNA may directly be applied to standard down-stream applications, like, e.g., ligation, PCR, transformation, transfection etc. without interfering effects.
SYBR® Green I bounds to the minor groove of DNA and is therefore not intercalating. It can be excited by UV- and blue light, making it fully compatible with standard UV-transilluminators as well as with modern blue-light illumination (see also ROTIPHORESE®PROfessional runVIEW, Art. No. 4849.1).
When excited, nucleic acid-bound SYBR® Green I emits a brightly coloured green fluorescence (521 nm) that may be documented by all usual broadband ethidium bromide- or SYBR® Green foto filters.
The **figure** depicts 50 ng DNA per band, or 75 ng (1000 bp and 2.5 kb), respectively. Each lane has been loaded and concurrently stained using 1 µl ROTI®-Load DNAstain SYBR® Green.

ROTI®Load DNAstain 1 SYBR® Green

6x conc., ready-to-use

DNA-gel loading buffer with fluorescent DNA-dye SYBR® Green.
For fragments >500 bp.

Directions for use

In order to cover the main size range needed in gel electrophoresis, **ROTI®Load DNAstain 1 SYBR® Green** contains bromophenol blue and xylene cyanol.

Glycerin is the standard reagent for increasing sample density.

Recommended for staining of dsDNA- and dsRNA-fragments of over 500 bp.

Contains: Tris, EDTA, bromophenol blue, xylencyanol, SYBR® Green, glycerol.
1.8 ml are sufficient for gel run and staining of approx. 1,800 lanes (5 µl sample + 1 µl loading buffer).

Directions for use

ROTI®Load DNAstain 2 SYBR® Green contains tartrazine and xylencyanol to mark the length. Tartrazine runs in the very small fragment range and shows the maximum running distance for very short runs. Recommended if bromophenol blue could mask important DNA bands.

Glycerin is the standard reagent for increasing sample density.

Recommended for staining of dsDNA- and dsRNA-fragments of 100–2000 bp.

Contains: Tris, EDTA, xylencyanol, tartrazine, SYBR® Green.

Directions for use

ROTI®Load DNAstain 3 SYBR® Green is a special gel loading buffer with orange G as the only tracking dye optimized for very short runs. Orange G runs in the very small fragment range and shows the maximum running distance for very short runs. Also well suited if bromophenol blue or xylene cyanol could mask important DNA bands.

Glycerin is the standard reagent for increasing sample density.

Recommended for staining of dsDNA- and dsRNA-fragments of under 500 bp.

Contains: Tris, EDTA, orange G, SYBR® Green.

Transfer Filter Membranes

Due to the change of name from GE Healthcare to Cytiva, we would like to make you aware that the previous product display of Cytiva products in the Carl Roth 2020/2021 complete catalogue will no longer be valid from April 2021. You can find the updated product display for the field of life sciences below.

Transfer membrane Amersham™ Protran® NC 0.2

Transfer membrane for most nucleic acid and protein immobilising techniques
Replaces Protran® BA 83 and BA-S-83 (supported), respectively, from Whatman®
Multiple use – ideal for most nucleic acid and protein immobilising techniques. Pure nitro-cellulose, free from cellulose acetate and triton. They have a high binding capacity and low background.
Version ‚supported':
Reinforced with a synthetic, inert material for improved elasticity and reaction to wetness. Suitable for protein and nucleic acid transfers which require a better resistance to wetness, such as repeated screening of the same blot. The fibre-reinforced version allows extensive handling of membrane, easier cutting, repeated hybridisation and automated immobilising.

Directions for use

Nitrocellulose should only conditionally be used for electrophoretic transfer of nucleic acids, because of the high salt concentrations required for the transfer.
The pore size of 0,2 µm is suitable for proteins and peptides of all sizes.

Application examples

Southern, Northern, Western transfer, colony and plaque hybridisation, immunoblots, nucleic acid and protein dot-blot, slot-blot, electrophoretic transfer of proteins.
Detection systems are radioactivity, chemoluminescence, colour

DNA/RNA Isolation

DNAse-free | Protease-free | New size

Ribonuclease A

90 U/mg (Kunitz), BioScience Grade, salt-free

Acc. to Hirs, extracted from bovine pancreas.

Extracted from bovine pancreas for RNA separation, especially when isolating RNAfree DNA. The enzyme cleaves RNA and produces 3' terminal nucleoside phosphates.
This quality product for molecular biology is free from salt, without proteases and is chromatographically homogeneous. Unit definition acc. to Kunitz.

The DNase content of the RNase powder ist below detection limit. However, we nevertheless recommend pretreatment of the ribonuclease prior to using it for DNA isolation. DNAse free RNAse ist prepared by dissolution of the RNAse powder in water, followed by cooking of the solubilised ribonuclease aliquots for 15 min. Let cool to room temperature on bench top.

Directions for use

Working solution: 2–10 µg/ml in 10 mM Tris (pH 7,5), 15 mM NaCl.
Note: RNAse precipitates when concentrated solutions are heated/cooked at pH ≥7,0. Store solution in aliquots at –20 °C

Stock solution: 10 mg/ml in water (pH ≤6,0) or 0,01 M sodium acetate (pH 5,2). Do not heat RNAse prepared in sodium acetate.

FTA® Technology

Please note the correction of the manufacturer to Qiagen in the following products. The previous product display of products of the FTA® system in the Carl Roth 2020/2021 complete catalogue is no longer valid.

FTA® CloneSaver Cards

Speciality cards for space- and time-saving archival storage and isolation of Plasmid and BAC DNA. Originally Whatman®.

- Capture DNA in one easy step by simply applying the samples (recombinant bacteria, glycerol stocks etc.) to the card
- Captured nucleic acid is easily accessible for downstream applications
- DNA collected on FTA® CloneSaver Cards is stable for years at room temperature
- Store up to 96 clones on each card
- Standard 96well plate format and compatible with multi-channel pipettors

Apply few µl bacterial culture, resuspended colony or glycerol stock. Cells are lysed and plasmid or BAC DNA is stabilized for long-term storage or immediate processing.
Captured nucleic acids are used for downstream experiments without the need for culture regrowth and plasmid purification. Simply take a small punch from the FTA® Card and wash with TE buffer (ROTI®Stock 100x TE Buffer, Art. No. 1052.1). DNA on the washed punch is ready for elution or for direct use in PCR, transformation, amplification by rolling circle followed by sequencing, and so on.

FTA® Cards

Speciality cards for space- and time-saving collection, archival storage, and isolation of genomic DNA from a variety of sample material. Originally Whatman®.

- Capture nucleic acid in one easy step – simply apply blood or tissue material to the FTA® Card
- Captured nucleic acid is ready for downstream applications in less than 30 mins.
- Genomic DNA collected on FTA® Cards is stable for years at room temperature
- Suitable for virtually any cell type
- Indicating FTA® Cards change colour upon sample application in order to facilitate handling of colourless samples

Simply apply your sample to the FTA® Card. Liquids are pipetted or trickled, tissue samples are pressed onto the surface. Cell membranes and organelles are automatically lysed and the released nucleic acids are entrapped in the fibres of the matrix. The nucleic acids remain immobilized and are stabilized for transport, immediate processing or long-term storage. Libraries and species DNA collections can be stored simply in a folder; single DNA samples can be filed in your lab manual. FTA® Cards facilitate sample collection in remote locations and simplify sample transport, thus, you can collect samples in the field without worrying about refrigeration.
Captured nucleic acids are used for downstream experiments by simply taking a small punch from the FTA® Card, wash with FTA® Purification Reagent and rinse with TE buffer (ROTI®Stock 100x TE Buffer, Art. No. 1052.1). DNA on the washed punch is ready for use in a variety of applications given below. Genomic DNA stored on FTA® Cards at room temperature for over 14 years (and counting) has been successfully amplified by PCR. For RNA, being more sensitive than DNA, we recommend rapid analysis after only few weeks‘ storage at room temperature.

FTA® Cards contain chemicals that lyse cells, denature proteins and protect nucleic acids from nucleases, oxidative and UV damage. FTA® Cards rapidly inactivate organisms, including blood borne pathogens, and prevent the growth of bacteria and other microorganisms. Each card can be used for archival storage or multiple downstream applications of 1–2 (MINI) and 1–4 (CLASSIC) independent samples.

Suitable for blood, cultivated cells, buccal cells, plant material, bacteria, microorganisms, tissue and tissue homogenisations, virions, M13 plaques and more.
Applications: storage of genomic DNA samples and libraries, collection of nucleic acid from animal tissue or cell cultures, or from plants or microorganisms during in-field-experiments.
Downstream-Experiments: e. g. PCR, real-time PCR, SNP and STR analysis, transgenetic identification, whole genome amplification, HLA typing, and genotyping **in** forensics, molecular biology, food and agriculture testing, drug discovery, genomics, species identification, and more.

FTA® Foam Tip Applicator

For application of saliva and buccal cells to FTA® Cards. Originally Whatman®.

Non-abrasive foam head is same size as sample area on FTA® Cards and is, therefore, best suited for application of buccal samples. The oral mucosa is grazed with the foam head, which is then pressed onto the card field. We recommend the use of FTA® Cards with colour indicator (CLASSIC Art. No. CL 91.1 and MINI Art. No. CL94.1) for buccal and saliva samples.

Punches Harris Uni-Core

The disposable Uni-Core Punch addresses your laboratory's manual punching requirements. Designed for use with Whatman® FTA® Cards, FTA® Elute Cards, and EasiCollect device.

Uni-Core Punch is a disposable punch which has a polished steel tip that is case-hardened and can be sterilized. Each tip provides up to 500 punches before disposal. Uni-Core Punch is available in diameters from 1,0 to 6,0 mm for a variety of sampling needs. It is housed in a plastic handle and disposable for contamination control. Stainless steel cutting edges enable manual coring, retrieval, and controlled ejection of the FTA® punch. Manual punching is preferred for laboratories with low sample volumes punching 1 to 50 samples per day.

Directions for use

By pressing the Micro tip down a tiny slice is punched from the FTA® card. This DNA containing sample is then washed and directly applied to downstream experiments.

The set contains

Two cutting mats are included in the small packages (4 punches). Colour of the punches supplied may differ to that shown in the picture.

HEPES

PUFFERAN® CELLPURE® ≥99,5 %

For cell culture, tissue culture and biotechnology.

Extremely versatile buffer. Excellent for cell and tissue cultures and for analysis of biological systems.

Application examples:

- Combined with bicarbonate, HEPES is an excellent medium for human lymphocytoidal cell lines
- HEPES is more effective than $NaHCO_3$ when controlling the pH value in tissue and organ culture
- HEPES-buffered media for chicken and human lung fibroblasts
- Can be used to replace a bicarbonate buffered medium containing serum with a serum-free HEPES-buffered medium for mouse fibroblasts

Tested for low amount of endotoxins.

X-β-Gal

≥99 %, BioScience Grade

Colorimetric substrate of β-galactosidase. For biochemistry and molecular biology.

Ideal for colorimetric detection of β-galactosidase activity, for instance during blue-/white selection.

Mechanism

Being a galacto pyranoside, IPTG inhibits the lac repressor, therefore leading to the induction the lac promotor. Subsequently, using the plasmid as matrix the C-terminal 146 amino acid fragment of the bacterial β-galactosidase is expressed, which functions as so called α-donor and complements the C-terminally deleted bacterial β-galactosidase. The then functional β-galactosidase restricts the galactoside X-Gal, resulting in a blue-coloured dye - therefore, these lac+ clones are coloured dark blue. Since the C-terminal part of the α-donor is located **upstream** and the N-terminal part is located **downstream** of the multi cloning site of the plasmid, inserted DNA normally leads to frame shift or at least to major chain elongation, resulting in an unfunctional α-donor and no functional galactosidase – recombinant clones are white. The appearance of light blue clones either results form very short insertions or from the fact that in some plasmids the C-terminal fragment cloned upstream of the MCS is sufficient for α-complementation and restriction of a small amount of X-Gal.

Directions for use

Stock solution: 100 mg/ml (240 mM) in DMF, store at –20 °C in the dark.
Working solution: for blue/white selection of recombinant clones on agar plates use 0,3 µl stock solution per ml broth/agar.

Albumine / BSA (Bovine Serum Albumin)

Origin Australia/New Zealand

NEW / +

TSE-/BSE-free

Albumin, sulfhydryl blocked, NZ-Origin

≥98 %, for biochemistry and molecular biology

Monomeric albumin for all sensitive assays.

High quality albumin originating from Australia or New Zealand.
By blocking the thiol groups, the polymerisation of the albumin molecules is very efficiently prevented, which can occur during the storage of powder and solution and change the properties of the albumin. The albumin remains stable over time as a monomer and can, therefore, be used very well for reproducible laboratory assays. Due to its low IgG and protease content, the albumin is excellent for all immunoassays such as WESTERN or ELISA and as a stabilising reagent for proteins, antibodies etc. Furthermore, the Albumin, sulfhydryl-blocked, NZ-Origin is recommended for all thiol or sulfur sensitive assays.

For purification of this Albumin an extensive heat-shock/diafiltration method is used, which has been shown to bring more highly purified products than the standard process acc. to Cohn. The process is taking place in a closed system.

Tested for the absence of detectable free sulfhydryl groups.

Heatshock albumin.

TSE-/BSE-free

Albumin, fatty acid-free, NZ-Origin

≥98 %, fatty acid-free, for biochemistry and molecular biology

Suitable as blocking or stabilising reagent in all fatty acid-sensitive assays.

Highly pure albumin, prepared from blood of cattle certified for origin from Australia or New Zealand.
Albumin, fatty acid-free, NZ-Origin, may well be used for blocking of all assays regarding membrane proteins, or other approaches aiming for fatty acid-associated proteins. It is also well suited for stabilisation of antibodies, enzymes or fatty acids. Albumin, fatty acid-free, NZ-Origin, shows exceedingly low content of endotoxins and IgGs, making it a useful reagent for cell biology also.
The Albumin, fatty acid-free, NZ-Origin is particularly recommended when procedural regulations require the use of albumin of guaranteed origin Australia or New Zealand.

For purification of this Albumin an extensive heat-shock/diafiltration method is used, which has been shown to bring more highly purified products than the standard process acc. to Cohn. The process is taking place in a closed system.

Tested for very low fatty acid concentration.

Available in large bulk format on request.

Albumin, very low endotoxin, NZ-Origin

CELLPURE® ≥98 %, very low endotoxin, for cell biology

With extremely low endotoxin content. Recommended for the culture of primary cells and cell lines. Also suitable for sensitive cell culture assays.

Albumin, very low endotoxin, NZ-Origin is particularly recommended for use during culturing of eukaryotic cells and in cell culture assays. This albumin of superior quality is thoroughly tested for its very low endotoxin content, therefore providing trouble-free cell culture assays and reliable results even when handling primary cells or stem cells.
Bovine serum albumin is basically suitable for stabilisation of all enzymes and antibodies, as well as for blocking of hybridisations and immunoassays.

For purification of this Albumin an extensive heat-shock/diafiltration method is used, which has been shown to bring more highly purified products than the standard process acc. to Cohn. The process is taking place in a closed system.

TSE-/BSE-free

Albumin, pH 5.2, US-Origin

≥96 %, for protein analysis

Non-neutralized albumin. Suitable as protein standard or hapten carrier, recommmended for use in ELISA and Western-Blotting.

The Albumin, pH 5.2, US-Origin is very well suited for all applications where Albumin is used as a stabilising reagent, for blocking or as a carrier, e.g. for stabilisation of enzymes and antibodies, or as hapten carrier in immunoassays.
The pH value of albumin pH 5.2 US-Origin is close to its pI and the protein is only weakly charged. It is, therefore, particularly recommended for use in ELISA and Western blotting, since it may help in further reducing background signals.

For purification of this Albumin an extensive heat-shock/diafiltration method is used, which has been shown to bring more highly purified products than the standard process acc. to Cohn. The process is taking place in a closed system.

Albumin, IgG free, US-Origin

≥98 %, IgG-free, for biochemistry and molecular biology

Recommended as blocking and stabilising reagent in all antibody-mediated detection systems.

Albumin, highly purified and tested for the presence of immunoglobulins (IgGs)
The Albumin, IgG-free, US-Origin is especially recommended to stabilize antibody solutions and as blocking reagent in all assays working with antibodies. Due to its particularly low protease content, it is also well suited for use in all other protein assays that could be interfered with by protease presence.

For purification of this Albumin an extensive heat-shock/diafiltration method is used, which has been shown to bring more highly purified products than the standard process acc. to Cohn. The process is taking place in a closed system.

Recommended Application of Albumins

Albumin	Art. No.	Recommended Application
Fraction V, Europe	1ETA	Stabilisation of proteins and blocking reagent in protein biochemical detection systems. Basically suitable for all assays unless specific requirements apply.
Fraction V, US-Origin	3854	Stabilisation of proteins and blocking reagent in all standard biochemical detection systems. Basically suitable for all assays unless specific requirements apply. Recommended if albumin with certified origin USA has to be used.
Fraction V, NZ-Origin	8076	Stabilisation of proteins and blocking reagent in protein biochemical detection systems. Basically suitable for all assays unless specific requirements apply. Recommended if albumin with certified origin New Zealand or Australia has to be used.
Fraction V, pH 5.2, Europe	2834	Stabilisation of proteins and blocking reagent. Particularly recommended for Western-Blotting and ELISAs.
pH 5.2, US-Origin (heat shock)	1ET8	Stabilisation of proteins and blocking reagent. Particularly recommended for Western-Blotting and ELISAs. Recommended if albumin with certified origin USA has to be used.
sufhydryl-blocked, NZ-Origin (heat shock)	1ET3	Particularly sensitive assays where monomeric albumin is guaranteed to be used or where reproducibility is particularly important. Can be stored as monomers over a longer period of time.
Fraction V, biotin-free, Europe	0163	Stabilisation of proteins and blocking reagent in all biotin / streptavidin-mediated detection systems (membrane-bound- or coating-plate-assays, as well as soluble assays).
Fraction V, protease-free, Europe	T844	Stabilisation of proteins in general, antibodies in particular, and blocking reagent in sensitive enzymatic detection systems, activity tests or protein/protein-interaction assays.
protease-free, US-Origin (heat shock)	1ET5	Stabilisation of proteins in general, antibodies in particular, and blocking reagent in sensitive enzymatic detection systems, activity tests or protein/protein-interaction assays. Recommended if albumin with certified origin USA has to be used.
protease-free, NZ-Origin (heat shock)	1ET7	Stabilisation of proteins in general, antibodies in particular, and blocking reagent in sensitive enzymatic detection systems, activity tests or protein/protein-interaction assays. Recommended if albumin with certified origin New Zealand or Australia has to be used.
IgG-free, US-Origin (heat shock)	1ET9	Stabilisation of antibodies. Blocking reagent in all antibody-mediated detection systems and Radio-Immuno Assays (RIAs). Reduces false-positive signals. Recommended if albumin with certified origin USA has to be used.
IgG-free, NZ-Origin (heat shock)	3737	Stabilisation of antibodies. Blocking reagent in all antibody-mediated detection systems and Radio-Immuno Assays (RIAs). Reduces false-positive signals. Recommended if albumin with certified origin New Zealand or Australia has to be used.
Fraction V, fatty acid-free, Europe	0052	Stabilisation of proteins and blocking reagent in detection systems. Particularly recommended for experiments on metabolism proteins, membrane-associated proteins and cell surface proteins.
fatty acid-free, US-Origin, (heat shock)	9638	Particularly for experiments on metabolism proteins, membrane-associated proteins and cell surface proteins. Also well suited for cell biology and all antibody-mediated detection systems. Recommended if albumin with certified origin USA has to be used.
fatty acid-free, NZ-Origin (heat shock)	1ETC	Stabilisation of proteins and blocking reagent in detection systems. Particularly for experiments on metabolism proteins, membrane-associated proteins and cell surface proteins. Recommended if albumin with certified origin New Zealand or Australia has to be used.
very low endotoxin, US-Origin (heat shock)	1ET6	Cell culture of all cell lines, primary cells, stem cells. Cloning and 3D-cultures or cell-stressing assays like transfections, *in vitro* infections, cell fusion. Recommended if albumin with certified origin USA has to be used.
very low endotoxin, NZ-Origin (heat shock)	1ET4	Cell culture of all cell lines, primary cells, stem cells. Cloning and 3D-cultures or cell-stressing assays like transfections, *in vitro* infections, cell fusion. Recommended if albumin with certified origin New Zealand or Australia has to be used..

Lumitester SMART

Easy-to-use, lightweight luminometer for ATP measurement. For reliable monitoring of liquids, dry and wet surfaces as part of hygiene control in the manufacturing sector, in the foodstuffs and animal feed sector, in patients- and health care, in gastronomy and trade, in training and in many other areas.
Lumitester SMART is **not** suitable for the detection of virus contamination.

- Lightweight and easy-to-use
- Fast and easy handling
- Highly sensitive, precise measurement of ATP, ADP and AMP
- Ready for use after 8 seconds
- Auto-calibration
- Definition of own limit values is possible
- Storage of the measurement results in the cloud
- Date and time internal to the device

General properties:

- Hygiene monitoring in three simple steps
- Data visualization via App
- Access from anywhere with cloud storage

Mechanism

Both ATP (adenosine triphosphate) and the more stable form AMP (adenosine monophosphate) are found in all living cells and, therefore, provide an exact and quantitative marker for the presence of bacteria, fungi or food residue. An enzyme/substrate complex in the LuciPac® sampling tube reacts with both ATP *and* AMP to release bioluminescence whose intensity correlates directly with the quantity of ATP/AMP present. The Lumitester SMART fully converts this bioluminescence into a measurement result and is, therefore, the most sensitive measuring system available today.
Thus, liquids and surfaces can be quickly and easily tested for contamination by foodstuffs and microorganisms using the Lumitester SMART and the LuciPac® sampling pen. Within approximately 30 seconds, the Lumitester SMART can provide information on hygiene status or the efficiency of cleaning and disinfection procedures. The system is easy and safe to operate, even by non-professionals. Simply insert the sampling tube and close the unit. Then press the *Enter* button, and the measurement result will be displayed within 10 seconds.

Delivery incl. 2 alkaline batteries (AA), 3 cleaning brushes, USB-Cable, strap, quick guide
Please order separately: LuciPac®Pen Aqua (Order No.No. NC58), LuciPac®Pen (Order No. NC59), LuciPac®A3 Aqua (Order No. 1ENK), LuciPac®A3 (Order No. 1ENH) and Lumitester LED Test Stick (Order No. NC60.1).

LuciPac®A3

For the reliable monitoring of dry and moist surfaces in the manufacturing industry, in the food and feed sector, in patient care and nursing, in gastronomy and trade, in training and in many other areas.

All the advantages at a glance:

- Quick and easy sampling
- Simple and fast measurement within seconds
- Sensitive and reproducible measurement
- Measurement of all forms - ATP, ADP and AMP

Please note

LuciPac®A3 is **not** suitable for the detection of virus contamination.

Why A3 assay (ATP+ADP+AMP)?
A3 detects ATP+ADP+AMP offering higher sensitivity to find microorganisms and biofilms that others miss. Just as fast and easy to use as conventional tests, but its advanced chemistry produces superior detection to uncover contaminants that you may be missing.

sterile, for hygiene control of surfaces

Kikkoman.

Directions for use

Remove the cotton swab (green holder) from the tube. Moisten the cotton swab with tap water if the surface is completely dry.
Wipe the object/the surface. An area of approx. 10 x 10 cm^2 is recommended for optimum results.
Put the cotton swab back into the tube. Then press the stick down to open the reaction capsule.
Shake the LuciPac®A3 horizontally several times so that all the liquid flows into the lower reaction capsule.
Insert the entire LuciPac®A3 into the measuring chamber of the Lumitester PD30 or Smart and close the measuring chamber cover.
Press the ENTER key on the control panel to start the measurement process. The measurement results are displayed after 10 seconds.

SurfACE™ Sampling Solutions with dry and moistened cellulose sponges

Easy-to-use, sterile specimen collection and surface sampling kits for quality control and identification of hazards at critical control points.

Available moistening buffers:

Buffer	Application
BPW (Buffered Peptone Water)	pre-enrichment medium
	for isolating bacteria and pathogens from foods
	facilitate resuscitation of stressed cells
DE (Dey-Engley neutralizing broth)	assists in the recovery of microorganisms
	neutralizes the bactericidal and bacteriostatic effects of sanitizing agents
	contains nutritive agents that aid in recovering and promoting the growth of microorganisms
	Bromocresol purple as a colorimetric indicator
LB (Letheen Broth)	highly nutritional medium that contains lecithin and Tween 80
	for testing the efficacy of sanitizing protocols
	as lecithin neutralizes quaternary ammonium compounds
	Tween 80 neutralizes phenols, hexachlorophene and formalin
NB (Neutralizing Buffer)	eliminates the effect of chlorine and quaternary ammonium compounds
	buffer assists in the recovery of microorganisms in samples taken from surfaces exposed to sanitizing agents

SurfACE™ Sponge-Sticks

Sponge-Stick SurfACE™

For environmental surfaces to collect and ship microbial samples.

All the advantages at a glance:

- 3″ x 1.5″ (7.5 x 3.5 cm) biocide-free cellulose sponge
- Unique, quick sponge-release handle for fast and convenient sponge release
- Thumb stop in-handle included to avoid accidental sponge contact
- No gloves needed for different sampling sites
- Perfectly suited to sample in gaps, drains and pipes
- Dry or pre-moistened with 10 ml buffer
- Bags can be opened easily with attached pull tabs
- Label area for sample identification
- Irradiated for proven sterility

Directions for use

The Romer Labs Sponge-Stick is a 3″ x 1.5″ (7.5 cm x 3.5 cm) compressed cellulose sponge attached to a quick-release handle, pre-moistened with 10 ml buffer of choice and individually packaged in a vapor-barrier foil pouch or already in a sampling bag. The quick-release handle provides an extra level of convenience and reliability. It is designed to release the sponge into the sample bag after sample collection, allowing only the sponge to be returned to the laboratory. Unnecessary parts that could interfere with sample processing are therefore eliminated.

- Well applicable for microbiological analysis of samples
- With detailed instructions for use

ROTI®Plate90 are prepared culture media plates with a diameter of 90 mm. They are thus adapted to the size of membrane filters for assaying of low-germ fluids by membrane filtration method. They are also applicable for the microbiological analysis of samples in general. The germs of expected low-germ liquid samples are concentrated by membrane filtration. Afterwards, the membrane is placed on top of the medium and incubated. Using a membrane with a grid helps counting the resulting colonies.
Our products are tested and approved exclusively for research and development.

Samples which are expected to have a higher microbiological burden are prepared in a serial dilution. Afterwards, every dilution step is plated and incubated. The number of grown colonies is noted as result.
Our ROTI®Plate90 are tested and approved for research and development only.

MR/VP Broth

for microbiology

For the differentiation of the *Escherichia-Enterobacter* group (Methyl Red and Voges-Proskauer reactions)

Applications

MR/VP broth is used in the coloured series for the differentiation of enteric Gram-negative bacilli based on the methyl red and Voges-Proskauer reactions of the Escherichia-Enterobacter group.
The methyl red test is used to differentiate between microorganisms that produce and maintain a high acid concentration and those that produce a lower amount of acid.
Enterobacter bacteria oxidize the acetylmethylcarbinol in the Voges-Proskauer reaction and cause a red coloration, in contrast to *Escherichia coli*, which does not.
Only tested and approved for research and development.

Thioglycolate Broth

Ph.Eur., USP, for microbiology

For the detection of microorganisms in sterility tests.

Glucose, peptone and yeast extract contained in the thioglycolate medium provide growth factors necessary for bacterial growth.
The reducing agents sodium thioglycolate and L-cystine reduce the accumulation of peroxides, which are lethal to some microorganisms.

Resazurin serves as a redox indicator; on oxidation it shows a pink colour, on reduction it is colourless.
Only tested and approved for research and development.

Yeast-Nitrogen-Base (without Amino Acids)

for molecular biology

For yeast classification based on amino acid and carbohydrate requirements.

Yeast Nitrogen Base (without amino acids) contains ammonium sulphate, all vitamins and all organic salts needed to cultivate yeasts, **except for the amino acids and carbohydrate sources**.

By selective addition of single amino acids and sugars the yeast cells are tested for sugar assimilation and for their dependency on specific amino acids, hereby revealing parameters for their classification.

Application: Add 6,7 g for 100 ml broth for 10x stock solution.
Use selected sugar/amino acid.
Do not boil, do not autoclave! Sterilise by sterile filtration!

Storage temperature: +15 to +25 °C
Transport temperature: ambient temp.

Terrific Broth

for molecular biology

Nutricious medium for the culture and proliferation of *E. coli.*

Terrific Broth is a nutricious medium for the culture and proliferation of *E. coli*. Compared to LB medium Terrific Broth supports higher cellular density, therefore increasing the yield during plasmid and protein preparations.

Application: Use 50,8 g for 1 l broth. Before autoclaving add 4 ml glycerol per litre medium.

Storage temperature: +15 to +25 °C
Transport temperature: ambient temp.

Terrific Broth modified

for molecular biology

Nutricious medium for the culture and proliferation of *E. coli.*

Nutricious medium for the culture and proliferation of *E. coli*. Terrific Broth supports high cellular density and is recommended for use during cultivation of bacteria for plasmid isolation or *in vitro* protein expression.

In the formulation of Terrific Broth modified, the phosphate content has been reduced, in order to prevent precipitation of insoluble salts during autoclaving.

Application: Use 47,6 g for 1 l broth. Before autoclaving add 4 ml glycerol per litre medium.

Peptone ex soya (animal-free/GMO-free)

papainic digested, animal-free, GVO-free, for microbiology

Soya peptone (animal-free/GMO-free) is extracted by papainic digestion from soybean flour from non-genetically modified plants. Moreover, strict production guidelines guarantee that it is free from all animal substances, even TSE/BSE. Peptone ex soja (animal-free/GVO-free) complies with EG regulations 1829/2003 and 1830/2003. The corresponding certificates are available upon request.

Peptone ex soya is particularly characterized by its broad nutrient spectrum and high vitamin content. It is suitable for application in microbiology, tissue culture and fermentation.

Storage temperature: +15 to +25 °C
Transport temperature: ambient temp.

ROTICLEAR®

ROTICLEAR® ready-to-use, for histology

Clearing agent of aliphatic hydrocarbons, practically free from aromatic compounds. For dewaxing of histological sections.
Alternative product for xylene.

ROTICLEAR® consists of different aliphatic hydrocarbons with only little own odour. It is **practically free from aromatic compounds** (≤0,005 %) and can be mixed with IPA, butanol, ethanol and acetone.

- Clearing agent of aliphatic hydrocarbons
- **Alternative product for xylene**
- Practically free from aromatic compounds
- Short evaporation period
- Use in automates without any problems
- Compatible with the mounting medium ROTI®Mount

ROTICLEAR® can be used like xylene. The absorption capacity for paraffin is even better than that known from xylene. Therefore, water baths for removing the paraffin need not to be changed so frequently. Due to a short evaporation period, ROTICLEAR® enables fast and effective working. It can also be used in automates without any problems. ROTICLEAR® produces excellent results with **ROTI®Mount (Art. No. HP68)**. After clearing with ROTICLEAR® the sample can be embedded in ROTI®Mount immediately.

SPE Columns CHROMABOND® HLB

Macherey-Nagel. Material: PP, columns with PE filter elements.

"Hydrophilic-lipophilic balanced" (HLB) *N*-vinylpyrrolidone-divinylbenzene copolymer. State-of-the-art spherical polymer for highest demands in solid phase extraction.

Advantages:

- Improved retention for polar substances.
- High loadability and excellent performance.
- Water wettable – even if the column bed runs dry, SPE can be continued.
- Applicable for a wide range of analyte polarities.

The alternative to Oasis HLB.

The hydrophilic-lipophilic balance of the copolymer (spherical part) shows a better retention for polar compounds.
SPE at its best!

Drying Attachment CHROMABOND®

Macherey-Nagel.

For evaporating and concentrating eluates. This special lid has a gas connector on one side, from which the gas is fed simultaneously to the different positions of the vacuum chamber. Thus several eluates can be evaporated simultaneously by just changing the lid and applying a stream of inert gas, e.g., nitrogen.

Liquid-Liquid Extraction / SLE

(Solid-Supported Liquid-Liquid Extraction)

You replace the complex liquid-liquid extraction (LLE) with solid-liquid extraction (SLE).
These columns guarantee a far greater yield and better reproducible extraction process, from column to column, when compared to historical liquid/ liquid extraction techniques usually using water and an organic solvent into a conventional separation funnel.

- Fast and effective sample preparation technique
- Higher reproducibility and recovery rates compared to LLE methods
- No problems with phase boundaries - Prevents the emulsion formation that often occurs in LLE, since the water-immiscible solvents do not come into direct contact with the sample
- Reduced solvent requirements compared to LLE

Polypropylene columns CHROMABOND® for phase separation

NEW / +

Automatic separation of a two-phase mixture without separation funnel. Two-phase mixtures are completely applied to the column and the phase boundary is determined without further work. The special membrane automatically stops the flow when the lower phase has passed. The upper phase remains in the column, thus both phases are available for futher analysis.

Important note: Columns must not be run with vacuum or pressure. SPE columns for phase separation by gravity only.

Volumetric Standard Solutions, ready-to-use

The advantages of this over making them yourself are:

- Manufactured and tested using modern manufacturing and analytical methods
- Ready-to-use solutions
- High accuracy for precise analyses
- Application of NIST-certified reference substances for checking
- Connection to standard titrators is possible

ROTI®Calipure standards for your calibration needs

Redox Standards ROTI®Calipure

Carl ROTH offers you a comprehensive portfolio of redox standards, which are produced from high-quality reagents and tested with an Ag/AgCl (3 M KCl) reference electrode. They can be used as control standards and thus check the functionality of the electrodes and measuring instruments.
The standards are temperature-dependent, so it is important to ensure the correct temperature for the control. The corresponding temperature/redox table can be found on the labels and the batch-specific Certificates of Analysis available online. The batch values are within a very small deviation from the nominal value (±5 mV).

Colour Standards Pt/Co ROTI®Calipure

The platinum-cobalt colour scale (Pt/Co for short) or APHA-Hazen colour scale is used for colour assessment of almost water-clear solutions. It is defined as mg platinum per 1 l solution. The samples are compared colorimetrically against the corresponding standard solution.
Our Pt/Co (Hazen) colour standards are prepared from high-quality reagents by weighing (weight %) according to ASTM D 1209. The standards are checked by means of a spectrophotometer. The batch specific Certificates of Analysis are available online.

Properties:

- Calibration and/or quality control standard
- Consistently high quality from batch to batch
- *Ready-to-use*

Silica Gels

Silica gels protect moisture sensitive goods or chemicals during storage and transport. They are suitable for drying virtually all gases and solids. Silica gels have a broad spectrum of application in the laboratory and in technical and industrial sectors:

- Possible applications in the laboratory are in desiccators, drying towers and in absorption tubes
- In the industrial sector they are mainly used in drying plants and with various types of packaging
- Are not suitable for drying liquids and alkaline substances

ROTI®Change Ion Exchanger

Cation exchange resins

Our cation exchange resins are available as 4 % and 8 % divinylbenzene (DVB) cross-linked polymers with sulphonate as active group. All cation exchange resins are provided in hydrogen (H^+) form. Typical applications are: removal of ethidium bromide/propidium iodide from DNA samples; separation and preconcentration of amino acids, peptides and nucleotides; desalting (removal of cations) and separation of metal ions.

puriss.	purissimum, especially pure quality. Products with such designation have a content of at least 99 %, unless a different content is stated in %. Their appearance and characteristic data correspond to the appertaining literature or deviate only slightly from it. They are suitable for purposes requiring a high degree of purity. With a number of products having this degree of purity, analysis certificates plus guarantee will be supplied or attached to the container. Delicate products are packaged under protective gas.
purum	chemically pure quality. Products having the purity designation „purum“ have a content of at least 97 %, unless a different content is stated in %, and their colour and characteristic data, apart from minor deviations, correspond to the literature. This degree of purity is recommended for laboratory work such as syntheses, which are subject to purity requirements. Delicate products are packaged under protective gas.

ROTICHROM® TLC	reference substance for thin-layer chromatography, delivered with thin-layer chromatogram
ROTICUBE®	Combi-box of 5 litre or 10 litre, consisting of a stable outer card box with inner bag made of PE; comes with stopcock.
ROTIDRY®	dried solvents, filled under protective gas
ROTIDRY® SEPT	dried solvents, in a septum bottle
ROTIGEN®	product is suitable for DNA-synthesis
ROTIPHORESE®	product is suitable for electrophoresis
ROTIPURAN®	highly pure product
ROTISOLV®	solvent for specific use - brand name Roth
ROTITAINER®	Stackable containers which can also be handled easily by female workers. Matching safety pumps are available. Solid substances are delivered in plastic buckets.
sec.	secondary
sicc.	dry, anhydrous (siccus)
sine H_2O	water free
stab.	stabilized
subl.	sublimated
sym.	symmetrical
synth.	synthetic
techn.	technical quality. Products with the purity designation „technicum“ feature a different content. They are generally mass produced and may have a slightly foreign odour and colour. They are used for general technical purposes.
tert.	tertiary; standard for thin-layer chromatograhy (TLC)
TLC	thin layer chromatography
U	unit
USP	United States Pharmacopoeia
WGK	water hazard class
WGK 1	generally not water hazardous
WGK 2	water hazardous
WGK 3	extremely water hazardous

Hazard Pictograms

The hazard pictogram on the designation label indicates the main hazard arising from a substance. If there are several hazardous qualitiies, several symbols are necessary.

Each pictogram is allocated a hazard designation and coding that do **not** appear on the designation label.

Hazard Statements H Codes

Hazard statements for physical hazards

H200	Unstable explosives.
H201	Explosive; mass explosion hazard.
H202	Explosive, severe projection hazard.
H203	Explosive; fire, blast or projection hazard.
H204	Fire or projection hazard.
H205	May mass explode in fire.
H206	Fire, blast or projection hazard; increased risk of explosion if desensitising agent is reduced.
H207	Fire or projection hazard; increased risk of explosion if desensitising agent is reduced.
H208	Fire hazard; increased risk of explosion if desensitising agent is reduced.
H220	Extremely flammable gas.
H221	Flammable gas.
H222	Extremely flammable aerosol.
H223	Flammable aerosol.
H224	Extremely flammable liquid and vapour.
H225	Highly flammable liquid and vapour.
H226	Flammable liquid and vapour.
H228	Flammable solid.
H229	Pressurised container: May burst if heated.
H230	May react explosively even in the absence of air.
H231	May react explosively even in the absence of air at elevated pressure and/or temperature.
H232	May ignite spontaneously if exposed to air.
H240	Heating may cause an explosion.
H241	Heating may cause a fire or explosion.
H242	Heating may cause a fire.
H250	Catches fire spontaneously if exposed to air.
H251	Self-heating; may catch fire.
H252	Self-heating in large quantities; may catch fire.
H260	In contact with water releases flammable gases which may ignite spontaneously.
H261	In contact with water releases flammable gases.
H270	May cause or intensify fire; oxidiser.
H271	May cause fire or explosion; strong oxidiser.
H272	May intensify fire; oxidiser.
H280	Contains gas under pressure; may explode if heated.
H281	Contains refrigerated gas; may cause cryogenic burns or injury.
H290	May be corrosive to metals.

Hazard statements for health hazards

H300	Fatal if swallowed.
H301	Toxic if swallowed.
H302	Harmful if swallowed.
H304	May be fatal if swallowed and enters airways.
H310	Fatal in contact with skin.
H311	Toxic in contact with skin.

H312	Harmful in contact with skin.
H314	Causes severe skin burns and eye damage.
H315	Causes skin irritation.
H317	May cause an allergic skin reaction.
H318	Causes serious eye damage.
H319	Causes serious eye irritation.
H330	Fatal if inhaled.
H331	Toxic if inhaled.
H332	Harmful if inhaled.
H334	May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H335	May cause respiratory irritation.
H336	May cause drowsiness or dizziness.
H340	May cause genetic defects.
H341	Suspected of causing genetic defects.
H350	May cause cancer.
H350i	May cause cancer by inhalation.
H351	Suspected of causing cancer.
H360	May damage fertility or the unborn child.
H360F	May damage fertility.
H360D	May damage the unborn child.
H360FD	May damage fertility. May damage the unborn child.
H360Fd	May damage fertility. Suspected of damaging the unborn child.
H360Df	May damage the unborn child. Suspected of damaging fertility.
H361	Suspected of damaging fertility or the unborn child.
H361f	Suspected of damaging fertility.
H361d	Suspected of damaging the unborn child.
H361fd	Suspected of damaging fertility. Suspected of damaging the unborn child.
H362	May cause harm to breast-fed children.
H370	Causes damage to organs.
H371	May cause damage to organs.
H372	Causes damage to organs through prolonged or repeated exposure.
H373	May cause damage to organs through prolonged or repeated exposure.
H300+H310	Fatal if swallowed or in contact with skin.
H300+H330	Fatal if swallowed or if inhaled.
H310+H330	Fatal in contact with skin or if inhaled.
H300+H310 +H330	Fatal if swallowed, in contact with skin or if inhaled.
H301+H311	Toxic if swallowed or in contact with skin.
H301+H331	Toxic if swallowed or if inhaled.
H311+H331	Toxic in contact with skin or if inhaled.
H301+H311 +H331	Toxic if swallowed, in contact with skin or if inhaled.
H302+H312	Harmful if swallowed or in contact with skin.
H302+H332	Harmful if swallowed or if inhaled.
H312+H332	Harmful in contact with skin or if inhaled.
H302+H312+ H332	Harmful if swallowed, in contact with skin or if inhaled.

Hazard statements for environmental hazards

H400	Very toxic to aquatic life.
H410	Very toxic to aquatic life with long lasting effects.
H411	Toxic to aquatic life with long lasting effects.
H412	Harmful to aquatic life with long lasting effects.
H413	May cause long lasting harmful effects to aquatic life.
H420	Harms public health and the environment by destroying ozone in the upper atmosphere.

Supplemental Hazard Information H Codes

EUH014	Reacts violently with water.
EUH018	In use may form flammable/explosive vapour-air mixture.
EUH019	May form explosive peroxides.
EUH029	Contact with water liberates toxic gas.
EUH031	Contact with acids liberates toxic gas.
EUH032	Contact with acids liberates very toxic gas.
EUH044	Risk of explosion if heated under confinement.
EUH066	Repeated exposure may cause skin dryness or cracking.
EUH070	Toxic by eye contact.
EUH071	Corrosive to the respiratory tract.
EUH201	Contains lead. Should not be used on surfaces liable to be chewed or sucked by children.
EUH201A	Warning! Contains lead.
EUH202	Cyanoacrylate. Danger. Bonds skin and eyes in seconds. Keep out of the reach of children.
EUH203	Contains chromium (VI). May produce an allergic reaction.
EUH204	Contains isocyanates. May produce an allergic reaction.
EUH205	Contains epoxy constituents. May produce an allergic reaction.
EUH206	Warning! Do not use together with other products. May release dangerous gases (chlorine).
EUH207	Warning! Contains cadmium. Dangerous fumes are formed during use. See information supplied by the manufacturer. Comply with the safety instructions.
EUH208	Contains (name of sensitising substance). May produce an allergic reaction.
EUH209	Can become highly flammable in use.
EUH209A	Can become flammable in use.
EUH210	Safety data sheet available on request.
EUH401	To avoid risks to human health and the environment, comply with the instructions for use.

General Information

Terms and Conditions of Sale and Delivery 262

Impressum. 264

For our complete range of products, please refer to our General Catalogue 2020 and the Webshop at www.carlroth.com

Terms and Conditions of Sale and Delivery

These Terms and Conditions of Sale and Delivery also apply for all future deliveries.

1. Validity for future business transactions – Validity of contrary General Terms and Conditions – Validity for companies only

1.1. Our Terms and Conditions of Sale and Delivery apply exclusively. They shall also apply to all future deliveries, even when no special reference is made thereto. We do not accept any contrary terms and conditions or those terms and conditions of the customer which differ from our Terms and Conditions of Delivery, even if the contract is performed unconditionally, unless we have expressly agreed to the validity thereof in writing or in text form.
1.2. Our Terms and Conditions of Sale shall only apply to entrepreneurs (in accordance with Section 14 German Civil Code [BGB]), legal persons governed by public law or a separate legal entity under public law.

2. Quotes, conclusion of contract

2.1. Our quotes are subject to change and are non-binding unless they have been explicitly declared binding or include a specific period of acceptance.
2.2. The ordering of goods by the customer shall be deemed to be a binding contractual offer. Orders are only binding for us if we confirm them in writing or in text form within two weeks, or if we fulfil them within two weeks through shipment of the ordered goods.
2.3. The legal relationship between the customer and us shall be governed exclusively by the contract, which has been signed in writing or in text form, including these general Terms and Conditions of Sale and Delivery. Verbal agreements made by us before the contract is formed are not legally binding and verbal understandings between the parties are superseded by the contract that is formed in writing or in text form, unless it is expressly stated therein that such agreements will continue to apply.
2.4. Amendments and modifications to the agreements made, including these general Terms and Conditions of Sale and Delivery, must be made in writing or in text form in order to be valid. With the exception of managing directors and holders of commercial powers of attorney, our employees are not authorised to make oral agreements which are contrary to the cited provisions.
2.5. The information we provide on the item to be supplied (e.g. weights, dimensions, quantities and functional values), as well as our representations of the item to be supplied, are only approximations, unless use for the purpose intended by the contract requires full conformity. These are not guaranteed physical characteristics, rather descriptions or characterisations of the product. Deviations that are customary in the trade and deviations that are the result of legal provisions are permissible provided that they do not impair usability for the contractually agreed purpose. Refer below to Article 10 of these terms and conditions.

3. Prices, price adjustments, electronic invoicing

3.1. Our prices are quoted "ex works" from Karlsruhe, according to INCOTERMS, plus packaging, tariffs where export shipments are concerned, statutory VAT, fees and other public duties.
3.2. We reserve the right to amend the listed prices upon which the contract is based accordingly if cost reductions or increases arise as a result of tariff agreements, or if the price of materials increases after the contract is concluded. These shall be verified to the customer upon request. A price adjustment shall not be effected in cases where delivery is made as contractually stipulated within four months of conclusion of the contract.
3.3. We provide an electronic invoice in compliance with data protection legislation. This presumes the formation of a separate agreement.

4. Payment terms and conditions, payment arrears

4.1. To avoid accounting errors and the resulting erroneous issue of dunning notices, we rely on receiving the correct invoice number, invoice date and individual invoiced amounts with incoming payments. This data can be found on all of our invoices. If the payer is not the same as the invoice recipient, the name stated on the relevant invoice must also be given when the payment is made. If we receive payments without this information, we cannot guarantee that payments will be assigned correctly.
4.2. The invoiced amount becomes payable upon receipt of the goods. Unless otherwise specified in writing or in text form, it is payable within thirty days without any deduction. In the event that the date on which the invoice or an equivalent payment schedule was received is disputed, the customer is considered to be in default 30 days after receipt of the goods at the latest, according to Section 286(4) German Civil Code. The date of receipt of payment is decisive. Otherwise, the statutory regulations on defaults of payment apply.
4.3. For payment within eight days from date of invoice, a 2% discount shall be granted. The precondition for any discount shall be the settlement of all other customer payables arising from the business relationship with us that are older than 30 days.
4.4. For new customers, we reserve the right to require that payment be made prior to delivery or by cash on delivery.

5. Off-setting, retention

The off-setting of counter-demands by the customer or the retention of payment due to such demands shall only be permissible if such demands are indisputable, or if their validity has been legally established.

6. Shipping, packaging, transfer of risk

6.1. The shipping method and the packaging shall be subject to our due discretion.
6.2. The risk of accidental loss or incidental deterioration of the delivered goods is, at the latest, transferred to the customer upon handover of the goods to the forwarding agent, the carrier, or any other third party charged with the task of performing shipment (applicable from commencement of loading). This also applies in the case of partial deliveries, and with respect to each partial delivery.
6.3. The shipment is only insured against theft, breakage, transport, fire and water damage or other insurable risks at the express request of the customer and at the customer's expense.

7. Delivery time

7.1. The promised delivery periods and dates are only binding for us if we have confirmed them in writing or in text form. The delivery dates indicated on our website during the ordering process or in our catalogue do not constitute such confirmation. Compliance with our delivery obligation requires the timely and proper fulfilment of the customer's obligations. If shipping has been agreed, delivery dates and deadlines refer to the time of transfer to the forwarding agent, carrier, or other third party assigned to transport the goods.
7.2. We cannot be held liable should a delivery prove impossible or in the case of delays in delivery due to force majeure or other events that were unforeseeable on conclusion of the contract (e.g. fire, explosion, strikes, lawful lockout, complications in procuring materials or energy, war, unrest, epidemics or pandemics where a risk level of "moderate" or above has been defined by the Robert Koch Institute, government rejection or renunciation of import and export licences, shortage of raw materials and/or other products and/or constituent parts), and for which we are not accountable. We reserve the right to withdraw from the contract if such occurrences substantially complicate delivery or make delivery impossible, and if the disruption is not merely of a temporary nature. If the disruption is of a temporary nature, delivery times shall be extended to take account of the period of disruption and a reasonable start-up period. We shall notify the customer of the start and end of such circumstances as promptly as possible. If such a delay makes acceptance of delivery unreasonable for the customer, the customer shall be entitled to withdraw from the contract by issuing immediate notice in writing or in text form.
7.3. If we are in default of delivery or performance, or are unable to carry out delivery or performance, for any reason whatsoever, our liability is limited to the extent set out in Article 13 of these Terms and Conditions of Sale and Delivery.
7.4. We cannot be held liable for the impossibility of, or delay in, performance of delivery obligations if, and to the extent that, such an impossibility or delay arises from circumstances caused by the customer, in particular if the customer fails to comply with public law obligations in connection with the European Regulations on Chemical Substances (REACH).

8. Partial deliveries

8.1. In the absence of any special agreement, we may provide partial deliveries if
– the partial delivery can be used by the customer in the context of the contractually agreed intended use,
– delivery of the remaining goods is ensured and
– this causes no extensive additional effort or additional costs to the customer.
8.2. A partial delivery made under these conditions is considered a complete delivery with regard to the agreed delivery date.

9. Default of acceptance

Should the customer be in default of acceptance or culpably in breach of other duties to cooperate, we shall be entitled to charge for the resulting damages, including any additional costs incurred. In this case, the risk of accidental loss or incidental deterioration of the purchased goods also passes over to the customer at such time as the customer falls into default of acceptance, provided that our delivery obligation has already been met with regard to the goods to be delivered.

10. Intended use of the goods, obligations of the customer, liability

10.1. If we have made a pledge for certain products to effect delivery contingent upon their intended use, the customer shall be liable for any and all disadvantages which we may suffer as a result of incorrect statements made. In the case of toxins and other substances which may only be used within the scope of legal or official provisions, the customer's order shall also serve as a statement that these substances shall be used for a purpose permissible under the foregoing terms and conditions. They shall observe the legal regulations when handling or using the substances, mixtures and products supplied by us. Private persons cannot be supplied with chemicals.
10.2. Information given concerning the usability of goods does not constitute any assurance or guarantee of suitability for such use. Relevant identified uses according to Regulation (EC) No. 1907/2006 (REACH Regulation) in the applicable version do not represent a contractual guarantee of any characteristic nor a use stipulated in the contract.
10.3. Our products shall be checked by the user with respect to their specific suitability, particularly prior to use for medical purposes, food and beverage processing, plant cultivation and similar applications. This applies in particular to natural substances, which are always subject to slight variation in content. We therefore cannot assume any liability for any such use.
10.4. Where a product comes with specific conditions for use provided by us or the manufacturer, e.g. regarding biocides, these must be complied with. We expressly accept no liability for any use to the contrary.
10.5. Insofar as we provide the customer with advice – be this verbally, in writing or as a result of tests – such advice is provided to the best of our knowledge but without liability on our part, and does not release the customer from the obligation to check the delivered goods with respect to their suitability for the intended processes and purposes. The application, use and processing of goods is carried out beyond the scope of our control and is therefore the sole responsibility of the customer.

11. REACH clause

If the customer notifies us of a use according to Article 37.2 of the Regulation (EC) No.1907/2006 dated 11.06.2019 of the European Parliament and the Council for the Registration, Evaluation, Approval and Control of chemical substances (REACH Regulation) which requires updating of the registration or the chemical safety report or results in another obligation according to the REACH Regulation, the customer shall reimburse us all expenses for which evidence is provided. Art. 53 of the REACH Regulation remains unaffected. We shall not be liable for delays in delivery caused by the notification of this form of use and performance of the applicable obligations as stipulated by the REACH Regulation. If, for reasons of health and safety or environmental protection, we are unable to consider this use an identified use and should the customer, against our advice, intend to use the goods in the manner which we have advised against, we shall be entitled to withdraw from the contract.

12. Claims for defects, compensation

12.1. Claims for defects are subject to the prerequisite that the customer has properly performed their duties to examine and give notice of defects according to Section 377 German Commercial Code [HGB].
12.2. Rejected goods must no longer be used without our explicit written consent. Where notification of defects is justified, we undertake to bear the costs of all expenses

required for rectification of the defects, in particular transportation, travel, labour and material costs. This shall not apply insofar as the expenses increase as a result of the delivery item being subsequently delivered to a location that differs from the one specified in the contract. The buyer's rights according to Section 439(3) German Civil Code shall not be restricted as a result.
12.3. Insofar as we are liable for a defect in goods purchased from us, we are entitled to correct the defect or replace the relevant product at our option and within a reasonable period of time. The place of subsequent performance is our registered office (Karlsruhe, Germany). If this subsequent performance or replacement delivery fails, i.e. if it is impossible, unreasonable, rejected or unreasonably delayed, the customer shall be entitled to withdraw from the contract or to reduce the purchase price by a reasonable amount, where statutory requirements are present.
12.4. If a defect is attributable to us, the customer is entitled to claim for compensation exclusively according to the following provisions.
12.5. In the case that an essential contractual obligation is culpably breached (a cardinal obligation), where statutory requirements are present, we shall be liable for compensation, but only limited to the foreseeable damages typically incurred, unless otherwise specified below. Cardinal obligations are those which must be fulfilled as part of the proper execution of the contract in the first instance, the fulfilment of which the buyer may rely on and which if breached would jeopardise the achievement of the purpose of the contract.
12.6. The customer is entitled to assert claims for compensation against us, without restriction, according to the statutory provisions and at the statutory rate, if these are attributable to us, one of our legal representatives or vicarious agents and are based on
– a culpable loss of life, physical injury or damage to health, or
– an intentional or grossly negligent breach of duty, or
– the Product Liability Act, or
– a breach of a duty arising from an assumption of procurement risk or warranty.
12.7. Any further claims to compensation against us, our legal representatives or vicarious agents are excluded, regardless of their legal basis.
12.8. Section 478 German Civil Code remains unaffected by the above provisions.
12.9. The bases of claims relating to data protection law are not covered by this limitations of liability clause.

13. Limitation period

13.1. Claims on the part of the buyer concerning material defects shall become time-barred after one year, unless
a) the goods supplied by us include an item which has been used for a building in accordance with its normal use and has caused a defect in the latter, or
b) the defect was maliciously concealed or is based on an intentional breach of duty by us or our legal representatives or vicarious agents, or
c) they relate to a culpable loss of life, physical injury or damage to health, or
d) they relate to claims based on a warranty or procurement risk assumed by us, or
e) they relate to claims to compensation (with the limitation of Item 13.2.).
The statutory limitation period applies in the cases above.
13.2. Claims to compensation which are based on refused subsequent performance are subject to a shortened limitation period of one year if subsequent performance has not been requested within the period shortened to a year for claims concerning material defects.
13.3. The statutory limitation periods also apply in the event of claims according to Section 445a German Civil Code if the last contract in the supply chain is a consumer goods contract in the meaning of Section 474 German Civil Code.

14. Withdrawal by the customer

If the purchased item is defective, the legal right of the purchaser to withdraw from the contract shall not be subject to our culpability. In all other cases, the customer shall only be entitled to withdraw in the event that we are in breach of obligations for which we are accountable.

15. Return of defect-free goods

Insofar as we accept the return of defect-free goods, this shall only apply to new goods in original packaging. We are entitled to charge the customer any third-party costs which we incur as a result of the return up to 25% of the list price of the goods.

16. Consequences of deterioration in the financial circumstances of the customer

16.1. In the case of payment arrears and justified doubts concerning the solvency or creditworthiness of the customer, we are – irrespective of our other rights – authorised to request guarantees or advance payments for outstanding deliveries and set all claims arising from the business relationship to payable immediately.
16.2. We may withdraw from the contract in the event that we become aware of the suspension of payments, the opening of insolvency or judicial settlement proceedings, the refusal of insolvency due to lack of assets, bill protests or cheque protests or any other tangible indications that the financial circumstances of the customer have deteriorated.

17. Retention of title

17.1. The retention of title agreed to hereinafter serves to safeguard all existing and future claims that we may have against the customer as a result of the supply relationship between the two parties.
17.2. We, the seller, shall retain the right to ownership of the goods delivered to the customer until full payment has been made for all secured receivables. The goods and any goods taking their place and subject to retention of title under the following provisions shall hereinafter be referred to as "Reserved Goods".
17.3. The customer shall ensure the safekeeping of the Reserved Goods on our behalf at no charge.
17.4. The customer shall be entitled to process and resell the Reserved Goods in normal business transactions until such time as a claim is made against them. It is not permitted to pledge Reserved Goods or to use Reserved Goods as collateral.
17.5. If the Reserved Goods are processed by the customer, it is agreed that they will be processed in our name and for our account and that we will acquire direct title to them or – if they are processed together with items from more than one owner or the value of the processed item is greater than the value of the Reserved Goods – we will acquire (partial) joint ownership of the newly-created item. In the event that we do not acquire such title to goods, the customer shall herewith transfer future ownership or, to the extent specified above, joint ownership of the newly-created item to us as a security.
If the Reserved Goods are compounded or inseparably combined with other items to form a single item and if one of the other items is considered the main item, then, insofar as the main item belongs to us, we shall transfer the co-ownership of the single item proportionally to the customer in the ratio stated in sentence 1.
17.6. In the event of the resale of Reserved Goods, the customer shall, by way of a security, herewith transfer to us the resulting accounts receivable from the buyer or our pro rata share in the case of joint ownership. The same shall apply to any other claims that take the place of Reserved Goods or otherwise accrue with respect to Reserved Goods, such as insurance claims or claims arising from unauthorised actions in case of loss or irreparable damage. We hereby authorise the customer on a revocable basis to collect receivables assigned to us on its own behalf. We shall only be entitled to revoke this authorisation for collection in the event that a claim is made.
17.7. In the event that third parties lay claim to the Reserved Goods, particularly through seizure, the customer shall without delay inform them of our ownership and notify us in writing, so that we can take action to enable assertion of our ownership rights. Unless the third party is in a position to reimburse us for legal expenses and out-of-court settlement costs, the customer shall be liable for our loss.
17.8. We undertake to release the Reserved Goods as well as any goods or claims superseding the Reserved Goods should their value exceed the amount of the secured receivables by more than 50%. The selection of the securities subsequently to be released shall be incumbent upon us.
17.9. Should we withdraw from a contract due to a breach of contract on behalf of the customer, particularly with regard to delayed payment (enforcement event), then we shall be entitled to demand that the Reserved Goods be returned.

18. Export control clause

18.1. When transferring our goods or services performed by us to third parties, the customer undertakes to observe and comply with the relevant applicable national and international legal regulations with regard to export control. This includes, but is not limited to, compliance with legal regulations governing export control in the European Union, the United States of America and the Federal Republic of Germany.
18.2. Prior to transferring our goods or services performed by us to third parties, the customer undertakes to ensure by means of suitable checks and measures that such transfer or provision does not constitute a violation of embargo regulations, including but not limited to those applicable in the European Union and the United States of America, also taking into account any anti-circumvention provisions.
18.3. The customer also undertakes to observe the provisions of European and US sanctions lists with regards to any business activities with organisations, individuals and companies listed therein. The customer also undertakes to guarantee that the use or transfer of our goods and services does not serve any military or arms-related purposes that are prohibited or require authorisation, unless the necessary authorisations have been granted.
18.4. If deemed necessary as a result of any checks, the customer is obligated to provide us upon request and without delay with all information regarding the end use, end recipient and intended use of our supplied goods and services.
18.5. The customer shall fully indemnify us against all claims asserted by the recipient as a result of the failure to comply with the above legal obligations regarding export control and undertakes to compensate us for the losses and expenses arising from such claims.

19. Information on brands and other industrial property rights

Please contact the relevant manufacturer or owner for information on brands and other industrial property rights. We are happy to help you in this process.

20 Use of customer data, data protection

We refer on this subject to our following data protection notice and to our Privacy Policy Statement, which you can access on our website at
www.carlroth.com/en/en/Datenschutzerklaerung
www.carlroth.com/pl/en/Datenschutzerklaerung

21. Place of performance, place of jurisdiction, choice of law

21.1. Unless specified otherwise in the order confirmation, the place of performance for all obligations arising from the contractual relationship is Karlsruhe, Germany.
21.2. The exclusive place of jurisdiction for all disputes arising from the contract is, if the customer is a merchant, a legal person governed by public law or a separate legal entity under public law, the competent court for our head office. However, we are also entitled to bring action against the customer in their domicile court. Peremptory legal provisions concerning the exclusive place of jurisdiction for disputes shall not be affected by this provision.
21.3. The laws of the Federal Republic of Germany exclusively govern the relationship between us and our customer. The United Nations Convention of 11th April 1980 on the International Sale of Goods (CISG) does not apply.
