m-EI-chromogenic Agar (Base)

for microbiology

For detection and enumeration of *Enterococcus* in water via single step membrane filtration.

Application: Use 71,95 g for 1 l agar. After autoclaving add 0,24 g nalidixic acid (Art. No. CN32.1) solubilised in water.

Storage temp.: +4 °C

Silicone anti-foaming emulsion

Silicone anti-foaming emulsion
Useful as anti-foaming agent in aqueous solutions of surfactants. The antifoam emulsion consists 30 % of polydimethylsiloxane in water and modified inorganic components. It applies to entire range of pH in non-ionic, cationic and anionic solutions. Admixture upwards of 30 ppm. The antifoam emulsion must be homogenized by shaking briefly prior to use. The antifoam emulsion must be homogenized by shaking briefly prior to use.

Silicon oils

Thermal stability
In the presence of air, silicone oils M are stable up to 150 °C for a long time. If you impede the air supply they are even stable up to higher temperatures. If you stop the air supply totally, i.e. the oil is used in a closed system or in an inert atmosphere, e.g. in an atmosphere of nitrogen or carbon dioxide, the oils can be used up to peak temperatures of about 300 °C, but the viscosity will decrease continously.

Solubility
All silicone oils M can be solved easily in aliphatic and aromatic hydrocarbons, higher alcohols, ether, ester and chlorinated hydrocarbons, e.g.

petroleum benzin	ethyl acetate
benzene	butyl acetate
toluene	carbon tetrachloride
ether	chloroform
butyl alcohol	trichloroethylene
amyl alcohol	tetrachloroethane

Silicon oils are not soluble in water, methanol and ethylene glycol. The solubility in organic solvents increases with decreasing viscosity. Therefore, in addition, silicone oils M 50 and M 100 are soluble in isopropanol and n-butanol and partially miscible with n-propanol. Silicone oils M with a viscosity below 20 mm · s^{-1} can be solved in n-propanol and also in acetone and dioxane. Silicone oils M with a viscosity of 10 mm · s^{-1} are even soluble in ethanol.

Lubricant and gliding properties
The lubrication properties of silicone oils M depend on the bearing material to a high degree. They give the best results with plastics, e.g. polyamides, polystyrene, phenol resins and with rubber. They are also suited as lubricants for some special combinations of metallic materials, e.g. steel combined with bronze, brass, chromium, zinc or cadmium, also chromium combined with bronze.

However there is no lubricity when you combine steel with steel in the range of the critical friction. In each case you have to decide whether the use of pure silicone oils M is to be taken into account. It is necessary to distinguish between the lubricity and the gliding properties of the oils. Silicone oils M are excellent gliding agents in many cases, e.g. in the treatment of special plastics and man-made fibres. This property is not due to the building up of a load-bearing lubrication film, but to the separation effect of the silicone oils M.

Surface tension
The surface tension of the silicone oils M is in the range of about 19-21 mM · s^{-1} , so it is extremely low. It increases only a little with viscosity of the oils.

Refractive index
The refractive index of silicone oils M increases from 1,3941 for M 3 to 1,4000 for M 20, and it is almost constant at 1,4042 for M 1000 and higher.

Density
At 25 °C the densities of silicone oils M range between 0,90 and 0,97. So they are not very different from the density of water. With increasing viscosity the densities of the oils increase too. They depend on temperature nearly linear: The values mentioned above were measured between -40 °C and 175 °C.

Chemical inertness
Generally silicone oils M are inert. They are stable in contact with water, organic solvents, pure oxygen and many other chemicals. In contact with most metals they will not be changed, and on the other hand they will not corrode metals, wood, paper and plastics. Strong oxidising agents like concentrated nitric acid or elemental chlorine decompose silicone oils M especially at higher temperatures.

Main properties of silicone oils:
- Heat and cold resistance
- Low setting point
- Low temperature and pressure dependency of viscosity
- Low steam pressure
- Good dielectric strength, little depending on temperature and frequency
- High interfacial tension to water and organic polymers
- High surface activity
- High compressibility
- Chemical and physiological inertness

Due to these properties silicone oils M are ideal as:
- Heat transfer agents
- Hydraulic fluids
- Fluid dielectrics
- Surface agents
- Separating agents
- Gliding agents
- Defoamer
- Auxiliary agents in varnishes
- Damping fluids

Silicone paste

Heat resistance
Silicone pastes are stable within temperature range of -50 to +200 °C without any considerable change in their consistency.

Chemical resistance
Silicone pastes are resistant to steam, sulphur dioxide, diluted acids and alkaline solutions.They are chemically indifferent to metals and different kinds of metals.

Application range:
- Laboratory techniques as an antiseize agent and lubricant for stopcocks, taper ground joints and regulating valves. Also suitable for sealing various glass apparatus.
- Apparatus engineering
- Electrotechnology

Sulphur ICP Standard Solution

1000 mg/l S

Type analysis:

c (S) as $(NH_4)_2SO_4$ in H_2O. ..... 1000 mg/l
Traceable to SRM from NIST.

2460.1	100 ml	HDPE	51,50 €

For further information, please see page 1725

Tantalum ICP Standard Solution

1000 mg/l Ta

UN No. 2922 • ADR 8 (6.1) III • WGK 2

Danger H290-H302-H311-H319-H315

Type analysis:

c (Ta) as Ta in 1 % HNO_3/0,5 % HF. ..... 1000 mg/l
Traceable to SRM from NIST.

2471.1	100 ml	HDPE	54,75 €

For further information, please see page 1725

Tellurium ICP Standard Solution

1000 mg/l Te

UN No. 3264 • ADR 8 III

Warning H290-H315-H319

Type analysis:

c (Te) as Te in 2 % HNO_3. ..... 1000 mg/l
Traceable to SRM from NIST.

2472.1	100 ml	HDPE	54,75 €

For further information, please see page 1725

Terbium ICP Standard Solution

1000 mg/l Tb

UN No. 3264 • ADR 8 III

Warning H290-H315-H319

Type analysis:

c (Tb) as Tb_4O_7 in 2 % HNO_3. ..... 1000 mg/l
Traceable to SRM from NIST.

2476.1	100 ml	HDPE	107,40 €

For further information, please see page 1725

Thallium ICP Standard Solution

1000 mg/l Tl

UN No. 3264 • ADR 8 III

Warning H290-H315-H319

Type analysis:

c (Tl) as $TlNO_3$ in 2 % HNO_3. ..... 1000 mg/l
Traceable to SRM from NIST.

2477.1	100 ml	HDPE	51,50 €

For further information, please see page 1725

Thulium ICP Standard Solution

1000 mg/l Tm

UN No. 3264 • ADR 8 III

Warning H290-H315-H319

Type analysis:

c (Tm) as Tm_2O_3 in 2 % HNO_3. ..... 1000 mg/l
Traceable to SRM from NIST.

2478.1	100 ml	HDPE	135,35 €

For further information, please see page 1725

Tin ICP Standard Solution

1000 mg/l Sn

UN No. 1789 • ADR 8 III • WGK 1

Warning H290-H335-H315-H319

Type analysis:

c (Sn) as SnO in 10 % HCl. ..... 1000 mg/l
Traceable to SRM from NIST.

2486.1	100 ml	HDPE	51,50 €

For further information, please see page 1725

Titanium ICP Standard Solution

1000 mg/l Ti

UN No. 3264 • ADR 8 III • WGK 1

Warning H290-H315-H319

Type analysis:

c (Ti) as $(NH_4)_2TiF_6$ in 2 % HNO_3/0,1 % HF. ..... 1000 mg/l
Traceable to SRM from NIST.

2479.1	100 ml	HDPE	51,50 €

For further information, please see page 1725

Tungsten ICP Standard Solution

1000 mg/l W

WGK 1

Danger H315-H318

Type analysis:

c (W) as WO_3 in 4 % NH_3. ..... 1000 mg/l
Traceable to SRM from NIST.

2482.1	100 ml	HDPE	54,75 €

For further information, please see page 1725

Vanadium ICP Standard Solution

1000 mg/l V

UN No. 3264 • ADR 8 III • WGK 2

Warning H290-H315-H319

Type analysis:

c (V) as NH_4VO_3 in 2 % HNO_3. ..... 1000 mg/l

Bromide IC Standard Solution

1000 mg/l Br^-

Type analysis:

c (Br^-) in H_2O. ... 1000 mg/l
Traceable to SRM from NIST.

2655.1	100 ml	HDPE	39,70 €
2655.2	500 ml	HDPE	77,30 €

For further information, please see page 1644

Chlorate IC Standard Solution

1000 mg/l ClO_3^-

Type analysis:

c (ClO_3^-) in H_2O. ... 1000 mg/l
Traceable to SRM from BAM.

8171.1	100 ml	HDPE	40,75 €
8171.2	500 ml	HDPE	85,50 €

For further information, please see page 1644

Chloride IC Standard Solution

1000 mg/l Cl^-

Type analysis:

c (Cl^-) as KCl in H_2O. ... 1000 mg/l
Traceable to SRM from NIST.

2656.1	100 ml	HDPE	39,70 €
2656.2	500 ml	HDPE	77,30 €

Chlorite IC Standard Solution

1000 mg/l ClO_2^-

Type analysis:

c (ClO_2^-) in H_2O. ... 1000 mg/l
Traceable to SRM from NIST.

8172.1	100 ml	glass	39,70 €

For further information, please see page 1644

Chromate IC Standard Solution

1000 mg/l Cr^{6+}

WGK 3

Danger H317-H334-H340-H350

Type analysis:

c (Cr^{6+}) in H_2O. ... 1000 mg/l
Traceable to SRM from NIST.

2657.1	100 ml	HDPE	39,70 €
2657.2	500 ml	HDPE	77,30 €

For further information, please see page 1644

Citrate IC Standard Solution

1000 mg/l $C_3H_4(OH)(COO)_3^{3-}$

Type analysis:

c ($C_3H_4(OH)(COO)_3^{3-}$) in H_2O. ... 1000 mg/l
Traceable to SRM from BAM.

8173.1	100 ml	plastic	41,40 €
8173.2	500 ml	plastic	85,50 €

Cyanide IC Standard Solution

1000 mg/l CN^-

UN No. 1760 • ADR 8 III • WGK 2

Warning H290-H412-EUH032

Type analysis:

c (CN^-) in 0,1 % KOH. ... 1000 mg/l
Traceable to SRM from NIST.

2658.1	100 ml	glass	39,70 €
2658.2	500 ml	glass	77,30 €

For further information, please see page 1644

Fluoride IC Standard Solution

1000 mg/l F^-

Type analysis:

c (F^-) in H_2O. ... 1000 mg/l
Traceable to SRM from NIST.

2659.1	100 ml	HDPE	39,70 €
2659.2	500 ml	HDPE	77,30 €

For further information, please see page 1644

Formate IC Standard Solution

1000 mg/l $HCOO^-$

Type analysis:

c ($HCOO^-$) in H_2O. ..... 1000 mg/l

Traceable to SRM from BAM.

1999.1	100 ml	HDPE	41,40 €
1999.2	500 ml	HDPE	85,50 €

Lactate IC Standard Solution

1000 mg/l $C_2H_4(OH)COO^-$

Type analysis:

c ($C_2H_4(OH)COO^-$) in H_2O. ..... 1000 mg/l

Traceable to SRM from BAM.

8176.1	100 ml	glass	40,75 €
8176.2	500 ml	glass	85,50 €

For further information, please see page 1644

Maleate IC Standard Solution

1000 mg/l $C_2H_2(COO)_2^{2-}$

Type analysis:

c ($C_2H_2(COO)_2^{2-}$) in H_2O. ..... 1000 mg/l

Traceable to SRM from BAM.

8181.1	100 ml	glass	41,40 €
8181.2	500 ml	glass	85,50 €

For further information, please see page 1644

Nitrate IC Standard Solution

1000 mg/l NO_3^-

Type analysis:

c (NO_3^-) in H_2O. ..... 1000 mg/l

Traceable to SRM from NIST.

2661.1	100 ml	HDPE	39,70 €
2661.2	500 ml	HDPE	77,30 €

For further information, please see page 1644

Nitrite IC Standard Solution

1000 mg/l NO_2^-

Type analysis:

c (NO_2^-) in H_2O. ..... 1000 mg/l

Traceable to SRM from BAM.

2664.1	100 ml	HDPE	41,40 €
2664.2	500 ml	HDPE	77,30 €

For further information, please see page 1644

Oxalate IC Standard Solution

1000 mg/l $C_2O_4^{2-}$

Type analysis:

c ($C_2O_4^{2-}$) in H_2O. ..... 1000 mg/l

Traceable to SRM from BAM.

2008.1	100 ml	HDPE	41,85 €
2008.2	500 ml	HDPE	85,50 €

For further information, please see page 1644

Perchlorate IC Standard Solution

1000 mg/l ClO_4^-

Type analysis:

c (ClO_4^-) in H_2O. ..... 1000 mg/l

Traceable to SRM from NIST.

8186.1	100 ml	HDPE	41,40 €
8186.2	500 ml	HDPE	85,50 €

For further information, please see page 1644

Phosphate IC Standard Solution

1000 mg/l PO_4^{3-}

Type analysis:

c (PO_4^{3-}) as $NH_4H_2PO_4$ in H_2O. ..... 1000 mg/l

Traceable to SRM from NIST.

2665.1	100 ml	HDPE	39,70 €
2665.2	500 ml	HDPE	77,30 €

For further information, please see page 1644

Propionate IC Standard Solution

1000 mg/l $C_2H_5COO^-$

Type analysis:

c ($C_2H_5COO^-$) in H_2O. ..... 1000 mg/l

Traceable to SRM from BAM.

8183.1	100 ml	glass	41,40 €
8183.2	500 ml	glass	85,90 €

For further information, please see page 1644

Succinate IC Standard Solution

1000 mg/l $C_2H_4(COO)_2^{2-}$

Type analysis:

c ($C_2H_4(COO)_2^{2-}$) in H_2O. ..... 1000 mg/l

Traceable to SRM from BAM.

8187.1	100 ml	glass	41,40 €
8187.2	500 ml	glass	85,50 €

For further information, please see page 1644

Sulphate IC Standard Solution

1000 mg/l SO_4^{2-}

Type analysis:

c (SO_4^{2-}) in H_2O. ..... 1000 mg/l

Traceable to SRM from NIST.

2666.1	100 ml	HDPE	39,70 €
2666.2	500 ml	HDPE	77,30 €

For further information, please see page 1644

Sulphite IC Standard Solution

1000 mg/l S^{4+}

Storage temp.: +4 °C

Type analysis:

c (S^{4+}) in H_2O..... 1000 mg/l

Traceable to SRM from BAM.

8192.1	100 ml	glass	41,40 €
8192.2	500 ml	glass	85,50 €

For further information, please see page 1644

Tartrate IC Standard Solution

1000 mg/l $C_2H_4O_2(COO)_2^{2-}$

Type analysis:

c ($C_2H_4O_2(COO)_2^{2-}$) in H_2O. ..... 1000 mg/l

Traceable to SRM from BAM.

8201.1	100 ml	glass	41,40 €
8201.2	500 ml	glass	85,50 €

For further information, please see page 1644

Thiocyanate IC Standard Solution

1000 mg/l SCN^-

Type analysis:

c (SCN^-) in H_2O..... 1000 mg/l

Traceable to SRM from NIST.

8205.1	100 ml	glass	41,40 €
8205.2	500 ml	glass	85,50 €

For further information, please see page 1644

Thiosulphate IC Standard Solution

1000 mg/l $S_2O_3^{2-}$

Type analysis:

c ($S_2O_3^{2-}$) in 0,1 % n-pentanol..... 1000 mg/l

Traceable to SRM from BAM.

8207.1	100 ml	glass	41,40 €
8207.2	500 ml	glass	85,50 €

Standards for IC (Ion Chromatography): Cationic Standards 1000 mg/l, ready to use

Ammonium IC Standard Solution

1000 mg/l NH_4^+

Type analysis:
c (NH_4^+) in H_2O ..... 1000 mg/l
Traceable to SRM from NIST.

2654.1	100 ml	HDPE	39,70 €
2654.2	500 ml	HDPE	77,30 €

For further information, please see page 1645

Barium IC Standard Solution

1000 mg/l Ba^{2+}

Type analysis:
c (Ba^{2+}) in H_2O ..... 1000 mg/l
Traceable to SRM from NIST.

8167.1	100 ml	HDPE	39,70 €
8167.2	500 ml	HDPE	77,30 €

For further information, please see page 1645

Caesium IC Standard Solution

1000 mg/l Cs^+

Type analysis:
c (Cs^+) in H_2O ..... 1000 mg/l
Traceable to SRM from NIST.

8166.1	100 ml	HDPE	39,70 €

For further information, please see page 1645

Calcium IC Standard Solution

1000 mg/l Ca^{2+}

Type analysis:
c (Ca^{2+}) in H_2O ..... 1000 mg/l
Traceable to SRM from NIST.

1986.1	100 ml	HDPE	39,70 €
1986.2	500 ml	HDPE	77,30 €

For further information, please see page 1645

Lithium IC Standard Solution

1000 mg/l Li^+

Type analysis:
c (Li^+) in H_2O ..... 1000 mg/l
Traceable to SRM from NIST.

8158.1	100 ml	HDPE	39,70 €
8158.2	500 ml	HDPE	77,30 €

For further information, please see page 1645

Magnesium IC Standard Solution

1000 mg/l Mg^{2+}

Type analysis:
c (Mg^{2+}) in H_2O ..... 1000 mg/l
Traceable to SRM from NIST.

1987.1	100 ml	HDPE	39,70 €
1987.2	500 ml	HDPE	77,30 €

For further information, please see page 1645

Potassium IC Standard Solution

1000 mg/l K^+

Type analysis:
c (K^+) in H_2O ..... 1000 mg/l
Traceable to SRM from NIST.

1985.1	100 ml	HDPE	39,70 €
1985.2	500 ml	HDPE	77,30 €

For further information, please see page 1645

Sodium IC Standard Solution

1000 mg/l Na^+

Type analysis:
c (Na^+) in H_2O ..... 1000 mg/l
Traceable to SRM from NIST.

1984.1	100 ml	HDPE	39,70 €
1984.2	500 ml	HDPE	77,30 €

For further information, please see page 1645

Strontium IC Standard Solution

1000 mg/l Sr^{2+}

Type analysis:
c (Sr^{2+}) in H_2O ..... 1000 mg/l
Traceable to SRM from NIST.

1988.1	100 ml	HDPE	39,70 €
1988.2	500 ml	HDPE	77,30 €

puriss.	purissimum, especially pure quality. Products with such designation have a content of at least 99%, unless a different content is stated in %. Their appearance and characteristic data correspond to the appertaining literature or deviate only slightly from it. They are suitable for purposes requiring a high degree of purity. With a number of products having this degree of purity, analysis certificates plus guarantee will be supplied or attached to the container. Delicate products are packaged under protective gas.
purum	chemically pure quality. Products having the purity designation "purum" have a content of at least 97%, unless a different content is stated, and their colour and characteristic data, apart from minor deviations, correspond to the literature. This degree of purity is recommended for laboratory work such as syntheses, which are subject to purity requirements. Delicate products are packaged under protective gas.

Hazard statements for environmental hazards

H400	Very toxic to aquatic life.
H410	Very toxic to aquatic life with long lasting effects.
H411	Toxic to aquatic life with long lasting effects.
H412	Harmful to aquatic life with long lasting effects.
H413	May cause long lasting harmful effects to aquatic life.
H420	Harms public health and the environment by destroying ozone in the upper atmosphere.

Supplemental Hazard Information H Codes

EUH001	Explosive when dry.
EUH006	Explosive with or without contact with air.
EUH014	Reacts violently with water.
EUH018	In use may form flammable/explosive vapour-air mixture.
EUH019	May form explosive peroxides.
EUH029	Contact with water liberates toxic gas.
EUH031	Contact with acids liberates toxic gas.
EUH032	Contact with acids liberates very toxic gas.
EUH044	Risk of explosion if heated under confinement.
EUH066	Repeated exposure may cause skin dryness or cracking.
EUH070	Toxic by eye contact.
EUH071	Corrosive to the respiratory tract.
EUH201 EUH201A	Contains lead. Should not be used on surfaces liable to be chewed or sucked by children. Warning! Contains lead.
EUH202	Cyanoacrylate. Danger. Bonds skin and eyes in seconds. Keep out of the reach of children.
EUH203	Contains chromium (VI). May produce an allergic reaction.
EUH204	Contains isocyanates. May produce an allergic reaction.
EUH205	Contains epoxy constituents. May produce an allergic reaction.
EUH206	Warning! Do not use together with other products. May release dangerous gases (chlorine).
EUH207	Warning! Contains cadmium. Dangerous fumes are formed during use. See information supplied by the manufacturer. Comply with the safety instructions.
EUH208	Contains (name of sensitising substance). May produce an allergic reaction.
EUH209 EUH209A	Can become highly flammable in use. Can become flammable in use.
EUH210	Safety data sheet available on request.
EUH401	To avoid risks to human health and the environment, comply with the instructions for use.

	Category 3	Flam. Liq. 3		Warning	H226	Flammable liquid and vapour.
Flammable solid	Category 1	Flam. Sol. 1		Danger	H228	Flammable solid.
	Category 2	Flam. Sol. 2		Warning		

Classification			Labelling			
Hazard class	**Category codes**		**Pictogram, code**	**Signal word**	**Hazard statements**	
Self-reactive substance or mixture	Type A	Self-react. A	GHS01	Danger	H240	Heating may cause an explosion.
		Org. Perox. A				
	Type B	Self-react. B	GHS01 + GHS02		H241	Heating may cause a fire or explosion.
		Org. Perox. B				
Organic peroxide	Type C and D	Self-react. CD	GHS02	Danger	H242	Heating may cause a fire.
		Org. Perox. CD				
	Type E and F	Self-react. EF		Warning		
		Org. Perox. EF				
	Type G	Self-react. G	No pictogram, no signal word, no hazard statement			
		Org. Perox. G				
Pyrophoric liquid	Category 1	Pyr. Liq. 1	GHS02	Danger	H250	Catches fire spontaneously if exposed to air.
Pyrophoric solid	Category 1	Pyr. Sol. 1				
Self-heating substance or mixture	Category 1	Self-heat. 1		Danger	H251	Self-heating; may catch fire.
	Category 2	Self-heat. 2		Warning	H252	Self-heating in large quantities; may catch fire.
Substance or mixture which in contact with water emits flammable gas	Category 1	Water-react. 1		Danger	H260	In contact with water releases flammable gases which may ignite spontaneously.
	Category 2	Water-react. 2		Danger	H261	In contact with water releases flammable gases.
	Category 3	Water-react. 3		Warning		
Oxidising liquid **Oxidising solid**	Category 1	Ox. Liq. 1	GHS03	Danger	H271	May cause fire or explosion; strong oxidiser.
		Ox. Sol. 1				
	Category 2	Ox. Liq. 2		Danger	H272	May intensify fire; oxidiser.
		Ox. Sol. 2				
	Category 3	Ox. Liq. 3		Warning		
		Ox. Sol. 3				
Substance or mixture corrosive to metals	Category 1	Met. Corr. 1	GHS05	Warning	H290	May be corrosive to metals.
Acute toxicity	Category 1	Acute Tox. 1	GHS06	Danger	H300 H310 H330	Fatal if swallowed. Fatal in contact with skin. Fatal if inhaled.
	Category 2	Acute Tox. 2				
	Category 3	Acute Tox. 3			H301 H311 H331	Toxic if swallowed. Toxic in contact with skin. Toxic if inhaled.
	Category 4	Acute Tox. 4	GHS07	Warning	H302 H312 H332	Harmful if swallowed. Harmful in contact with skin. Harmful if inhaled.

Classification			Labelling			
Hazard class	Category codes		Pictogram, code	Signal word	Hazard statements	
Skin corrosion/ irritation	Category 1A	Skin Corr. 1A	GHS05	Danger	H314	Causes severe skin burns and eye damage.
	Category 1B	Skin Corr. 1B				
	Category 1C	Skin Corr. 1C				
	Category 2	Skin Irrit. 2	GHS07	Warning	H315	Causes skin irritation.
Serious eye damage/ eye irritation	Category 1	Eye Dam. 1	GHS05	Danger	H318	Causes serious eye damage.
	Category 2	Eye Irrit. 2	GHS07	Warning	H319	Causes serious eye irritation.
Respiratory sensitization	Category 1 Category 1A Category 1B	Resp. Sens. 1 Resp. Sens. 1A Resp. Sens. 1B	GHS05	Danger	H334	May cause allergy or asthma symptoms or breathing difficulties if inhaled.
Skin sensitization	Category 1 Category 1A Category 1B	Skin Sens. 1 Skin Sens. 1A Skin Sens. 1B	GHS07	Warning	H317	May cause an allergic skin reaction.
Germ cell mutagenicity	Category 1A	Muta. 1A	GHS08	Danger	H340	May cause genetic defects. (*)
	Category 1B	Muta. 1B				
	Category 2	Muta. 2		Warning	H341	Suspected of causing genetic defects. (*)
Carcinogenicity	Category 1A	Carc. 1A		Danger	H350 H350i	May cause cancer. (*) May cause cancer by inhalation.
	Category 1B	Carc. 1B				
	Category 2	Carc. 2		Warning	H351	Suspected of causing cancer. (*)
	(*) state route of exposure if it is conclusively proven that no other routes of exposure cause the hazard					
Reproductive toxicity	Category 1A	Repr. 1A	GHS08	Danger	H360 H360F H360D H360FD	May damage fertility or the unborn child. (*) May damage fertility. (*) May damage the unborn child. (*) May damage fertility. May damage the unborn child. (*)
	Category 1B	Repr. 1B				
	Category 2	Repr. 2		Warning	H361 H361f H361d H361fd	Suspected of damaging fertility or the unborn child. Suspected of damaging fertility. Suspected of damaging the unborn child. Suspected of damaging fertility. Suspected of damaging the unborn child.
	Additional category for effects on or via lactation	Lact.	No pictogram	No signal word	H362	May cause harm to breast-fed children.
	(*) state route of exposure if it is conclusively proven that no other routes of exposure cause the hazard

Specific target organ toxicity – single exposure	Category 1	STOT SE 1	GHS08	Danger	H370	Causes damage to organs. (*)
	Category 2	STOT SE 2		Warning	H371	May cause damage to organs. (*)
	Category 3	STOT SE 3	GHS07	Warning	H335	May cause respiratory irritation.
					H336	May cause drowsiness or dizziness.
Specific target organ toxicity – repeated exposure	Category 1	STOT RE 1	GHS08	Danger	H372	Causes damage to organs through prolonged or repeated exposure. (*)
	Category 2	STOT RE 2		Warning	H373	May cause damage to organs through prolonged or repeated exposure. (*)
	(*) state route of exposure if it is conclusively proven that no other routes of exposure cause the hazard					
Aspiration hazard	Category 1	Asp. Tox. 1	GHS08	Danger	H304	May be fatal if swallowed and enters airways.
Acute aquatic hazard	Acute 1	Aquatic Acute 1	GHS09	Warning	H400	Very toxic to aquatic life.
Long-term aquatic hazard	Chronic 1	Aquatic Chronic 1		Warning	H410	Very toxic to aquatic life with long lasting effects.
	Chronic 2	Aquatic Chronic 2		No signal word	H411	Toxic to aquatic life with long lasting effects.
	Chronic 3	Aquatic Chronic 3	No pictogram	No signal word	H412	Harmful to aquatic life with long lasting effects.
	Chronic 4	Aquatic Chronic 3			H413	May cause long lasting harmful effects to aquatic life.
Hazardous for the ozone layer	Category 1	Ozone 1	GHS07	Warning	H420	Harms public health and the environment by destroying ozone in the upper atmosphere.

Terms of Sale and Delivery

- These sales and delivery terms and conditions also apply for all future deliveries -

1 Validity for future business transactions - Validity of contrary general terms and conditions - Validity for companies only

1. Validity for future business transactions - Validity of contrary general terms and conditions - Validity for companies only

1.1. Our sales and delivery terms and conditions apply exclusively. They shall also apply to all in future deliveries, even when no special reference is made thereto. We do not accept contrary terms and conditions or client terms and conditions which differ from our delivery terms and conditions unless we have expressly agreed to the validity thereof in writing. Our delivery terms and conditions shall also apply when we unconditionally make the delivery to the client, but are aware of conflicting terms and conditions or those which differ from our delivery terms and conditions.

1.2. Our conditions of sale shall only apply to companies (pursuant to Section 14 of the German Civil Code), legal persons governed by public law or a separate legal entity under public law.

2. Quotes, conclusion of contract

2.1. Our quotes are subject to change and are non-binding unless they have been explicitly declared binding or include a specific period of acceptance.

2.2. The ordering of goods by the client shall be deemed to be a binding contractual offer. Orders are only binding upon us if we confirm them in writing or in text form within two weeks, or if we fulfil them within two weeks through shipment of the ordered goods

2.3. The legal relationship between the client and us shall be governed exclusively by the written contract, including these Terms of Sale and Delivery. Verbal agreements made by us before the contract is formed are not legally binding and verbal understandings between the contracting parties are superseded by the contract that is formed in writing or in text form, unless it is expressly stated therein that such agreements will continue to apply.

2.4. Amendments and modifications to the agreements made, including these general Terms of Sale and Delivery, must be made in writing or in text form in order to be valid. With the exception of managing directors and holders of commercial powers of attorney, our employees are not authorised to make oral agreements which are contrary to the cited provisions.

2.5. The information we provide on the item to be supplied (e.g. weights, dimensions, quantities and functional values), as well as our descriptions of the item to be supplied, are only approximations, unless use for the purpose intended by the contract requires full conformity. These are not guaranteed physical characteristics, rather descriptions or characterisations of the product. Deviations that are customary in the trade and deviations that are the result of legal provisions are permissible provided that they do not impair usability for the contractually agreed purpose. Refer below to Article 10 of these terms and conditions.

3. Prices, price adjustments, electronic invoicing

3.1. Our prices are quoted "ex works" Karlsruhe, in accordance with INCOTERMS, plus packaging, tariffs where export shipments are concerned, statutory VAT, fees and other public duties.

3.2. We reserve the right to amend the listed prices upon which the contract is based accordingly if cost reductions or increases arise as a result of tariff agreements, or if the price of materials increases after the contract is concluded. These shall be verified to the client upon request. A price adjustment shall not be effected in cases where delivery is made as contractually stipulated within four months of conclusion of the contract.

3.3. We provide an electronic invoice in compliance with data protection legislation. This presumes the formation of a separate agreement.

4. Payment terms and conditions, payment arrears

4.1. To avoid accounting errors and the resulting erroneous issue of dunning notices, we rely on receiving the correct invoice number, invoice date and individual invoiced amounts with incoming payments. This data can be found on all of our invoices. If the payer is not the same as the invoice recipient, the name stated on the relevant invoice must also be given. If we receive payments without this information, we cannot guarantee that payments will be assigned correctly.

4.2. The invoiced amount becomes payable upon receipt of the goods. Unless otherwise specified in writing or in text form, it is payable within thirty days without any deduction. In the event that the date on which the invoice or an equivalent payment schedule was received is disputed, the client is considered to be in default 30 days after receipt of the goods at the latest, in accordance with Section 286(4) of the German Civil Code. The payment is considered settled on the date on which we receive it. Otherwise, the statutory regulations on defaults of payment apply.

4.3. For payment within eight days from date of invoice, a 2% discount shall be granted. The precondition for any discount shall be the settlement of all other client payables arising from the business relationship with us that are older than 30 days.

4.4. For new clients, we reserve the right to require that payment be made prior to delivery or by cash on delivery.

5. Off-setting, retention

The off-setting of counter-demands by the client or the retention of payment due to such demands shall only be permissible if such demands are indisputable, or if their validity has been legally established.

6. Shipping, packaging, transfer of risk

6.1. The shipping method and the packaging shall be subject to our due discretion.

6.2. The risk of accidental loss or accidental deterioration of the delivered goods is, at the latest, transferred to the client upon hand-over of the goods to the forwarding agent, the carrier, or any other third party charged with the task of performing shipment (applicable from commencement of loading). This also applies in the case of partial deliveries, and with respect to each partial delivery.

6.3. The shipment is only insured against theft, breakage, transport, fire and water damage or other insurable risks at the express request of the client and at the client's expense.

7. Delivery time

7.1. The promised delivery periods and dates are only binding upon us if we have confirmed them in writing or in text form. The delivery dates indicated on our website during the ordering process or in our catalogue do not constitute such confirmation. Compliance with our delivery obligation requires the timely and proper fulfilment of the client's obligations. If shipping has been agreed, delivery dates and deadlines refer to the time of transfer to the forwarder, carrier, or other third party assigned to transport the goods.

7.2. We cannot be held liable should a delivery prove impossible or in the case of delays in delivery due to force majeure or other events that were unforeseeable on conclusion of the contract (e.g. fire, explosion, strikes, lawful lockout, complications in procuring materials or energy, war, unrest, government rejection or renunciation of import and export licences, shortage of raw materials and/or other products and/or constituent parts), and for which we are not accountable. We reserve the right to withdraw from the contract if such occurrences substantially complicate delivery or make delivery impossible, and if the disruption is not merely of a temporary nature. If the disruption is of a temporary nature, delivery times shall be extended to take account of the period of disruption and a reasonable start-up period. We shall notify the client of the start and end of such circumstances as promptly as possible. If such a delay makes acceptance of delivery unreasonable for the client, the client shall be entitled to withdraw from the contract by issuing immediate notice in writing or in text form.

7.3. If we are in default of delivery or performance, or are unable to carry out delivery or performance, for any reason whatsoever, our liability is limited to the extent set out in Article 13 of these Terms of Sale and Delivery.

7.4. We cannot be held liable for the impossibility of, or delay in, performance of delivery obligations if, and to the extent that, such an impossibility or delay arises from circumstances caused by the client, in particular if the client fails to comply with public law obligations in connection with the European Regulations on Chemical Substances (REACH).

8. Partial deliveries

8.1. In the absence of any special agreement, we may provide partial deliveries if

- the partial delivery can be used by the client in the context of the contractually agreed intended use,
- delivery of the remaining goods is ensured and
- this causes no extensive additional effort or additional costs to the client.

8.2. A partial delivery made under these conditions is considered a complete delivery with regard to the agreed delivery date.

9. Default of acceptance

Should the client be in default of acceptance or culpably in breach of other duties to cooperate, we shall be entitled to charge for the resulting damages, including any additional costs incurred. In this case, the risk of accidental loss or incidental deterioration of the purchased goods also passes over to the client at such time as the client falls into default of acceptance, provided that our delivery obligation has already been met with regard to the goods to be delivered.

10. Intended use of the goods, obligations of the client, liability

10.1. If we have made a pledge for certain products to effect delivery contingent upon their intended use, the customer shall be liable for any and all disadvantages which we may suffer as a result of incorrect statements made. In the case of toxins and other substances which may only be used within the scope of legal or official provisions, the client's order shall also serve as a statement that these substances shall be used for a purpose permissible under the foregoing terms and conditions. They shall observe the legal regulations when handling or using the substances, mixtures and products supplied by us. Private persons cannot be supplied with chemicals..

10.2. Information given concerning the usability of goods does not constitute any assurance or guarantee of suitability for such use. Relevant identified uses according to Regulation (EC) No. 1907/2006 (REACH regulation) in the applicable version do not represent a contractual guarantee of any characteristic nor a use stipulated in the contract.

10.3. Our products must be checked by the user with respect to their specific suitability, particularly prior to use for medical purposes, for food and beverage processing, plant cultivation and similar applications. This applies in particular to natural substances, which are always subject to slight variation in content. We therefore cannot assume any liability for any such use.

10.4. Insofar as we provide the client with advice - whether verbally, in writing or as a result of tests - such advice is provided to the best of our knowledge but without liability on our part, and does not release the client from their obligation to check the delivered goods with respect to their suitability for the intended processes and purposes. Application, use and processing of goods are carried out beyond the scope of our control and are therefore the sole responsibility of the client.

11. REACH clause

If the customer notifies us of a use in accordance with Article 37.2 of the Regulation (EC) No.1907/2006 of the European Parliament and the Council for the Registration, Evaluation, Approval and Control of chemical substances (REACH Regulation) which requires updating of the registration or the chemical safety report or results in another obligation according to the REACH Regulation, the customer shall reimburse us all expenses for which evidence is provided. This does not affect Article 53 of the REACH regulation. We shall not be liable for delays in delivery caused by the notification of this form of use and performance of the applicable obligations as stipulated by the REACH regulation. If, for reasons of health and safety or environmental protection, we are unable to consider this use an identified use and should the client, against our advice, intend to use the goods in the manner which have advised against, we shall be entitled to withdraw from the contract.

12. Warranty for defects, obligation to give notice of defect, material defects

12.1. Claims relating to material defects will be barred one year after delivery to the client. In the event that approval is required, they will be barred from the point of approval. This period shall not apply to damage claims by the client in the case of fatalities, physical injuries, or damage to health or deliberate or grossly negligent breach of duties on our part or on the part of our agents; such claims expire in accordance with statutory provisions.

12.2. The statute of limitations in case of delivery regress according to Sections 478, 479 of the German Civil Code remains unaffected.

12.3. The delivered goods must be carefully inspected immediately upon delivery to the client or to a third party designated by the client. Approval shall be deemed given if we do not receive a written notice of defect with regard to visible defects or other defects detectable during an immediate and careful inspection within seven working days after delivery of the goods. With regard to other defects, the delivered goods shall be deemed approved by the client if we do not receive notice of a defect within seven working days after the discovery of the defect. If the defect was noticeable by the client during normal use at an earlier point in time, however, this earlier point in time shall define the commencement of the defect notification period.

12.4. Rejected goods must no longer be used without our explicit consent. Upon request, the defective delivery item shall be returned to us freight paid. If the notice of defect is justified, we shall reimburse the cost of the cheapest shipping method. This shall not apply if the cost increases because the delivery item is transferred to a place other than the designated place of delivery.

12.5. Insofar as we are liable for a defect in goods purchased from us, we are entitled to correct the fault or replace the relevant product at our option and within a reasonable period of time. If the correction/repair or replacement delivery fails, i.e. if it is not possible, unreasonable, rejected or unreasonably delayed, the client shall be entitled to withdraw from the contract or to reduce the purchase price by a reasonable amount.

12.6. In cases where faults are attributable to us, the client shall be entitled to claim for damages subject to the provisions defined in Article 13.

13. Liability, special provisions for compensation for damages, exclusions, limitations

13.1. Our liability for damages, regardless of the legal basis, in particular for impossible, late, defective or incorrect delivery, breach of contract, violation of obligations during contractual negotiations and unlawful actions, provided that fault is established, shall be governed by the provisions of this Article 13, notwithstanding Article 12 above.

13.2. We cannot be held liable in the event of simple negligence by our executive bodies, legal representatives, employees or other vicarious agents, unless essential contractual obligations are breached. Obligations essential to the contract are those that give the contract its specific character and upon which the contracting partner can rely. They are therefore essential rights and obligations, which create the preconditions for execution of the contract and are indispensable for fulfilment of the contractual purpose.

13.3. Insofar as we are liable to pay compensation for damages under the terms of Article 13(2), this liability shall be limited to such damage that was foreseeable as a possible consequence of breach of an obligation at the time of execution of contract, or which we should have been able to foresee had we applied due diligence. Indirect damage and consequential damage arising from defects in the delivered goods shall only be eligible for compensation to the extent that such damage can be typically expected when using the delivered goods as intended.

13.4. Insofar as we issue technical information or provide consulting services, and such information or consulting services are not part of our contractual duties, this assistance will be rendered free of charge and shall be exempt from any liability.

13.5. The above exemptions and limitations of liability apply analogously to our institutions, legal representatives, employees and other vicarious agents.

13.6. The foregoing restrictions as stipulated under Article 13 do not apply to our liability with regard to wilful conduct, guaranteed features, culpable injury to life, limb or health and under the German Product Liability Act. Mandatory statutory liability provisions shall remain unaffected.

13.7. The bases of claims relating to data protection law are not covered by this limitations of liability clause.

14. Withdrawal by client

If the purchased item is defective, the legal right of the purchaser to withdraw from the contract shall not be subject to our culpability. In all other cases, the client shall only be entitled to withdraw in the event that we are in breach of obligations for which we are accountable.

15. Consequences of deterioration in the financial circumstances of the client

15.1. In the case of default and justified doubt regarding the solvency or credit-worthiness of the client, we shall - notwithstanding our other rights - be entitled to request guarantees or advance payments for outstanding deliveries and demand immediate payment of all claims resulting from the business relationship.

15.2. We may withdraw from the contract in the event that we become aware of suspension of payments, the opening of insolvency or judicial settlement proceedings, the refusal of insolvency due to lack of assets, bill protests or cheque protests or any other tangible indications that the financial circumstances of the client have deteriorated.

15.3. We are also entitled, at any time, to obtain information relevant to the financial circumstances of the client in order to establish whether a business relationship is justified or whether it should be continued.

16. Retention of title

16.1. The retention of title agreed to hereinafter serves to safeguard all existing and future claims that we may have against the client as a result of the business relationship between both parties.

16.2. We, the seller, will retain the right to ownership of the goods delivered to the client until full payment has been made for all secured receivables. The goods and any goods taking their place and subject to reservation of title under the following provisions shall hereinafter be referred to as "Reserved Goods".

16.3. The client shall ensure the safekeeping of the Reserved Goods on our behalf at no charge.

16.4. The client is entitled to process and resell the Reserved Goods in normal business transactions until such time as a claim is brought against it. It is not permitted to pledge Reserved Goods or to use Reserved Goods as collateral.

16.5. If the Reserved Goods are processed by the client, it is agreed that they will be processed in our name and for our account and that we will acquire direct title to them or ? if they are processed together with items from more than one owner or the value of the processed item is greater than the value of the Reserved Goods - we will acquire (partial) joint ownership of the newly-created item. In the event that we do not acquire such title to goods, the client shall herewith transfer future ownership or, to the extent specified above, joint ownership of the newly-created item to us as a security. If the Reserved Goods are compounded or inseparably combined with other items and if one of the other items is considered the main item, then, insofar as the main item belongs to us, we shall transfer the co-ownership in the combined item proportionally to the client in the ratio stated in sentence 1.

16.6. In the event of the resale of Reserved Goods, the client shall, by way of a security, herewith transfer the resulting accounts receivable from the buyer or our pro-rata share - in the case of joint ownership - to us. The same shall apply to any other claims that take the place of Reserved Goods or otherwise accrue with respect to reserved goods, such as insurance claims or claims arising from unauthorised actions in case of loss or irreparable damage. We hereby revocably authorise the client to collect receivables assigned to us on its own behalf. We shall only be entitled to revoke this authorisation for collection in the event that a claim is made.

16.7. Where third parties lay claim to the Reserved Goods, particularly through garnishment, the client shall notify us in writing without delay, so that we can take action to enable the assertion of our ownership rights. Unless the third party is in a position to reimburse us for legal expenses and out-of-court settlement costs, the client shall be liable for our loss.

16.8. We shall undertake to release the Reserved Goods, as well as any goods or claims superseding the Reserved Goods, should their value exceed the amount of the secured receivables by more than 50 %. The selection of the securities subsequently to be released shall be incumbent upon us.

16.9. Should we withdraw from a contract due to a breach of contract on the part of the client, particularly with regard to delayed payment, then we shall be entitled to demand the return of the Reserved Goods.

17. Use of client data

We refer on this subject to our Privacy Policy Statement, which you can access on our website at www.carlroth.com/en/en/Data-protection.

18. Place of fulfilment, place of jurisdiction, choice of law

18.1. Unless otherwise specified in the order confirmation, the place of performance for all obligations arising from the contractual relationship shall be Karlsruhe.

18.2. If the client is a merchant, a legal person under public law or a special fund under public law, the exclusive place of jurisdiction for all disputes arising from the contract shall be the court of our registered office. However, we are also entitled to bring action against the client in their domicile court. Peremptory legal provisions concerning the exclusive place of jurisdiction for disputes shall not be affected by this provision.

18.3. The laws of the Federal Republic of Germany exclusively govern the relationship between us and our client. The United Nations Convention of 11th April 1980 on the International Sale of Goods (KEGS) does not apply.
