Water-soluble laundry bags

Based on polyvinyl alcohol (PVA). With sealing strip, red in colour.

- Safe collection and handling of soiled, contaminated, infectious laundry
- Prevents personnel from coming into direct contact with the bag's contents and therefore avoids cross-contamination of germs
- Can be added directly to a washing machine without having to be emptied
- The bag and sealing strip automatically dissolve in a water bath at temperatures of 45 °C and above without leaving residue
- The material is non-toxic and fully biodegradable

Transport trolleys

Stainless steel shelf trolley

Made of stainless steel 1.4301. With four solid rubber swivel castors (non-marking), wheel ∅ 125 mm. Load capacity of trolley 200 kg.
Dimensions: L 620 x W 460 x H 1200 mm. Shelf spacings 300 mm.
Shelves (XE29.1) and matching stackable container (TC11.1) (optional), please order separately.

Art. No.	Pack Qty.	€
TC09.1	1	611,70

Shelves

Made of RESOPAL®. Suitable for stainless steel shelf trolley TC09.1.
Dimensions: L 610 x W 410 x H 8 mm.

Art. No.	Pack Qty.	€
XE29.1	3	203,20

Stackable containers

Made of plastic, impact resistant.
Container TC11.1 suitable for stainless steel shelf trolley TC09.1 (can be used with or without XE29.1 shelves).

Capacity (l)	L x W x H (mm)	Art. No.	Pack Qty.	€

Transport of hazardous substances
The guidelines for working safely in laboratories (BGI 850-0) stipulate that non-shatterproof containers must be supported at their base when carrying; many other containers taken from refrigerators or cold rooms may be very smooth or slippery due to condensation.
Non-shatterproof containers may only be transported to other rooms using special aids which allow them to be held and carried safely; these include buckets, carry boxes or laboratory trolleys, preferably fitted with trays (4.10.3).

Safety container for bottles

By Nalgene®. Made of **LDPE** with PC lid. Ideal for transporting and storing 2.5 l narrow neck bottles (for ex. Art. No. T503.1). The screw cap enables pouring without removing bottle from the container.

blue	**HYN8.1**	1	59,80

Lab sink mat

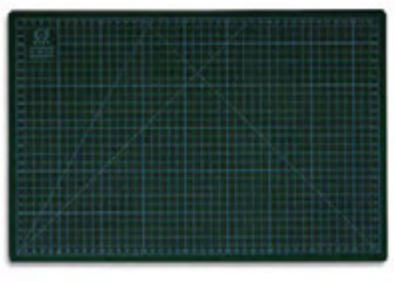
Made of soft **PVC** to prevent glass breakage when washing.
Round profile prevents splashing of running water.
The smooth surface prevents dirt from settling.
Weight of mat is sufficient to insure secure position in flowing water.
An additional advantage: Magnetic rods do not slip through mesh easily into drain pipe.
Dimensions: L 750 x W 450 x H 15 mm.
Width of profile 8 mm. Width of web 40 mm.

Art. No.	Pack Qty.	€
C374.1	1	64,40

Rotilabo®-adhesion mat

Made of soft **PVC**. Prevents slipping and is suitable for use as padding. Both sides can be used. Washable and durable.
Roll W 400 x L 1000 mm, approx. 1 mm thick.

Art. No.	Pack Qty. (roll)	€
0668.1	1	32,20



Cutting mats

Made of **PVC**, in 3 layers with special interior core.
With grid imprint and self-closing surface.
Colour: green, with white grid pattern. Thickness 3 mm.

X861.1	1	62,25

Safety knife

Made of cast aluminium, black heat-baked paint and blue plastic parts. For left and right handed users. Blade is drawn back into handle by a spring when lever is released. With ergonomically formed handle. Knife is handy, safe and secure in grip. Length 150 mm, width 35 mm. Blade thickness 0.65 mm (trapeze shape).

Type	Art. No.	Pack Qty.	€
Safety knife	**C649.1**	1	18,25
Spare blades	**C650.1**	10	6,40

Glass and ceramic scratcher

With fitted blade. For hobs and other smooth surfaces. Adjustable. Width 50 mm, length 140 mm. Weight 63 g.

Type	Art. No.	Pack Qty.	€
Scratcher	**0508.1**	1	9,10
Replacement blades (L 43 x W 22 x strength 0,22 mm)	**CLT7.1**	10	5,35

MARTego safety knife

With automatic blade retractor. Operating lever can be locked to prevent accidental opening. Anatomically shaped aluminium tong grip with soft-component handle for slip-resistant and fatigue-free working. For left and right handed users. Easy blade replacement without tools. Application advantage: blade is usable on 4 sides. Suitable for all routine cutting work, ideal for opening boxes.

Type	Art. No.	Pack Qty.	€
Safety knife	**XK02.1**	1	32,20
Replacement blades	**XK03.1**	10	7,75

Safety laboratory knife

Strong, rounded blade made of stainless steel 1.4034. Plastic safety handle reduces risk of injury. Blade length 90 mm, overall length 225 mm.

Art. No.	Pack Qty.	€
PX19.1	1	17,10

Cutter 2-in-1

With automatic blade retractor and auto-lock feature. Metal handle with rubberised grip zone and integrated break-off device. Usable as a standard cutter or safety knife. Spring-loaded blade retracts automatically when the blade slips off the cutting object. The standard break-off blade can, however, also be pushed forwards in the conventional fashion using the auto-lock feature. Dimensions: L 186 mm x W 38 mm, blade width 18 mm. **Delivery incl.** blade.

Type	Art. No.	Pack Qty.	€
Cutter	**PK49.1**	1	12,85
Replacement blades	**PK50.1**	10	4,10

Ceramic knives

With extremely hard, stainless and anti-magnetic blade. Very light. Ergonomically designed handle. No resharpening.

Tool kit bag

Made of sturdy imitation leather with chrome vanadium tools:
- 1 enamelled hammer 250 g
- 1 adjustable pliers 235 mm
- 1 combination pliers 180 mm with side cutting
- 3 screwdrivers 125 x 6, 150 x 5 and 75 x 4 mm
- 1 cross-point screwdriver 100 x 2 mm
- 1 voltage tester 150-250 V as screwdriver
- 8 chrome plated double open-ended spanners, width 6 to 22

Bag when open: W 400 x L 400 mm.
Bag when closed: W 150 x H 70 x L 400 mm.
Weight 2.1 kg.

Expert toolbox

By Heyco. By Heyco. Made of ABS, with load-carrying capacity of up to 30 kg, double aluminium frame and barrel lock.
High-quality foam insert for secure tool holding during transit.
Dimensions: L 480 x W 320 x H 150 mm.

Contents:
- 1 removable socket wrench set ¼″, 17-piece
- 1 lever wrench ½″ + 5 accessories
- 12 socket wrench inserts ½″ from 10 to 24 mm (hexagonal)
- 1 pipe and water pump wrench 240 mm
- 13 combination wrench from 6 to 24 mm
- 1 combination pliers 180 mm
- 1 side cutter 160 mm
- 8 offset screwdriver from 2 to 10 mm (hexagonal)
- 8 offset screwdriver T9 to T40 (TORX®)
- 1 voltage tester, insulated
- 1 engineer's hammer
- 1 boxcutter
- 1 torch (LED, 1 W, L 100 mm)
- 1 tape measure, 5 m, with belt clip
- 2 Phillips screwdriver (75 mm, No. 1 / 100 mm, No. 2)
- 2 screwdrivers (100 x 5.5 mm / 150 x 8.0 mm)

Box spanner set

47 parts. Made of chrome vanadium steel, chrome-plated. ¼″ + TORX.

Contents:
- Box spanner adapters 4; 4.5; 5; 5.5; 6; 7; 8; 9; 10; 11; 12; 13; 14 mm
- Box spanner adapters long 8; 10; 11; 13 mm
- Adapters for slotted head screws 4; 5.5; 6.5 mm
- Adapters for crosspin screws PH 1, 2, 3, PZ 1, 2, 3
- Adapters for Allen screws 3, 4, 5, 6, 7, 8 mm
- Adapters for inner-TORX-screws T10; T15; T20; T25; T30; T40
- Handle with sliding block
- Reversible lever ratchet with ejection mechanism
- Hand adapter with plastic hilt
- Cardan joint
- Extension 50 + 105 mm
- Hexagon wrench key with pilot 1.5; 2; 2.5

Supplied in plastic box, dimensions: L 230 x W 160 x H 40 mm.
Weight 1050 g.

❄❄❄ A 121 °C

Labels on rolls

Ideal for 0.2/0.5/0.65 and 1.5/2 ml tubes and other containers. Made of chemically inert polyester. Sticks to plastics without drying out and falling off during steam sterilization, in boiling waterbaths, refrigerators, stirrers, shakers, centrifuges, etc. Are extremely close-fitting and do not hinder removal or loading of tubes in stands or centrifuges. Tearproof. Can be marked with almost all markers.

Labels, angular (Tough Tags™), for manually marking. Temperature stable from **-40 to +121 °C**. 1000 per roll. (1500 per roll at Art. No. K436.1).

Model 33208 stereo microscope

By Eschenbach. With LED lighting, reflected light and transmitted light.
Can be dimmed as an option – dimmer sold separately.

Technical specifications:

Total magnification	20x/40x – can be expanded up to 80x as an option
Eyepieces	Wide field (WF) 10x Field of view 20 mm Diopter compensation on left eyepiece tube (±5 dpt)
Head	Binocular 45° angular observation Rotatable by 360° Adjustable interocular distance (54-74 mm)
Lenses	Rotation of turret 2x and 4x Parallel lens arrangement
Working distance with 10x WF 2x lens/4x lens	75 mm/45 mm
Lighting	LED, separate reflected and transmitted light and can be controlled in real time
Image focusing	Coarse focus
Stand	Robust metal stand, 180 mm column length
Power supply	100-240 V

Delivery incl. 95 mm ∅table inserts (black/white plastic plate for reflected light, and frosted glass plate for transmitted light), eyepiece cups and dust cover.

SMZ-168-series reflected and transmitted light stereo microscopes

By Motic. High-end stereo microscope for science, research and quality control.

- 50x total magnification, up to max. 200x with optional widefield ocular and attachment lenses
- Larger field of view and working distance
- Sturdy transmitted light stand with wide base plate
- Continuously variable zoom with lock positions for reproducible magnification
- Optionally available with trinocular head for attachment of a microscope camera to the phototube using a C-Mount adapter (please order C-Mount camera adapter separately)

Technical specifications:

Total magnification	7.5 to 50x - up to max. 200x with optional lenses
Eyepieces	Widefield 10x Field of view 23 mm Diopter compensation on both ocular tubes (±5 dpt)
Head	Binocular or trinocular 35° viewing angle 360° rotatable Adjustable eye distance (52.5-75 mm)
Lens	Magnification 0.75x-5x Zoom factor 1:6.7
Working distance	113 mm
Lighting	12 V / 10 W Halogen, reflected and transmitted light can be adjusted separately
Image focusing	Coarse drive
Power supply	100-240 V

Delivery incl. black/white and matte glass stage inserts, blue filter and dust cover.

0.65x C-Mount-adapter for ½″ and ½,₅″ chip-sensors	**KA23.1**	1 piece	100,55

Replacement bulb

Type	Art. No.	Pack Qty.	€
Halogen (reflected light), 12 V / 10 W	**PE00.1**	1 piece	18,10
Replacement bulb, halogen (transmitted light), 12 V / 10 W	**PE49.1**	1 piece	20,35

Stereo microscopes, Kern

Stereo microscope OSE-417

By Kern. Robust, rigid and easy to operate stereo microscope for schools, workshops and training organisations. For preparations with focus on spatial impression, e.g. insects and seeds.

- Good optical characteristics for sharp images over a wide field of vision
- Interchangeable lens with two pre-defined magnifications
- Eyepiece fixed securely in the barrel
- Stable and precisely adjustable mechanics of the microscope stand

Technical specifications:

Total magnification	20x, 40x
Eyepieces	Wide field 10x Field of vision ∅ 20 mm Dioptre compensation, left
Head	Binocular 45° Viewing angle Adjustable eye distance (55-75 mm)
Lens	Revolver: 2x and 4x
Working distance	57 mm
Lighting	0.21 W LED (transmitted and reflected illumination)
Image focusing	Coarse focus
Power supply	50/60 Hz, 100 to 240 V

Optional accessories (please order separately):
Wide field eyepieces can be used to modulate the total magnification of the stereo zoom microscope.

Technical specifications:

Eyepiece	Lens		
	Magnification	2x[1]	4x[1]
WF 5x	Total magnification (x-fold) Visual field ∅ (mm)	10 10	20 5
WF 10x[1]	Total magnification (x-fold) Visual field ∅ (mm)	20 10	40 5
WF 20x	Total magnification (x-fold) Visual field ∅ (mm)	40 6.5	80 3.2

[1] included in delivery

Delivery incl. table inserts black/white and frosted glass, eye cups and dust protection hood.

Art. No.	Pack Qty.	€
HNA2.1	1	255,00

Accessories:

Eyepieces HWF 5x, visual field ∅ 16.2 mm	**HHE3.1**	2	70,00
Eyepieces HWF 20x, visual field ∅ 10 mm	**HHE4.1**	2	70,00

Stereo microscope OSF-439

By Kern. Practical and sterile stereo microscope for training and laboratory. With integrated handle and stable stand. Ergonomically designed working surface for enhanced convenience. Interchangeable lens with three pre-defined magnifications for fast, effective working. Eyepieces securely held in the tube and thereby protected against loss or damage.

Technical specifications:

Total magnification	10x, 20x, 40x
Eyepieces	Wide field 10x Visual field ∅ 20 mm Dioptre compensation, left (±5 dpt)
Head	Binocular 45° angular observation fixed Adjustable interocular distance (55-75 mm)
Lens	Revolver: 1x, 2x and 4x
Working distance	57 mm
Lighting	1 W LED (incident light), 0.35 W LED (transmitted light) Incident and transmitted light can be regulated separately
Image focusing	Coarse focus
Power supply	50/60 Hz, 100 to 240 V

Delivery incl. table sets black/white and mat glass, eye cups and dust cover.

Art. No.	Pack Qty.	€
HHC9.1	1	325,00

Stereo microscopes, Kern

Stereo zoom microscope OZL-445

By Kern. Easy-to-operate, stable stereo-zoom microscope for laboratories, test institutes and quality checks. Zoom lens enables infinitely-variable magnification of the preparation. Large work area for enhanced comfort, column stands for greater flexibility. Eyepieces securely held in the tube and thereby protected against loss or damage.

Technical specifications:

Total magnification	7.5x to 36x (can be expanded to 144x)
Eyepieces	Wide field 10x Visual field ∅ 20 mm Dioptre compensation, left (±5 dpt each)
Head	Binocular 45° angular observation Rotatable by 360° Adjustable interocular distance (55-75 mm)
Lens	Zoom: 0.75 to 3.6x
Working distance	86 mm (standard lens)
Lighting	1 W LED (incident light), 0.35 W LED (transmitted light) Incident and transmitted light can be regulated separately
Image focusing	Coarse focus
Power supply	50/60 Hz, 100 to 240 V

Optional accessories (please order separately):
- Protective lens element
- Wide field eyepieces and clip-on lenses allow modulation of the overall magnification of the stereo zoom microscope:

Technical specifications:

Eyepiece	Lens			
	Magnification	Standard 1x[1]	Clip-on 0.5x	Clip-on 2.0x
WF 5x	Total magnification (x-fold) Visual field ∅ (mm)	3.75 to 18 26 to 6	1.875 to 9 60 to 13	7.5 to 36 12.5 to 3
WF 10x[1]	Total magnification (x-fold) Visual field ∅ (mm)	7.5 to 36 26.7 to 5.6	3.75 to 18 53.3 to 11.1	15 to 72 13.3 to 2.8
WF 20x	Total magnification (x-fold) Visual field ∅ (mm)	15 to 72 12.5 to 3	7.5 to 36 28 to 6	30 to 144 6 to 1.5

1 In delivery incl.

Delivery incl. table sets black/white and mat glass, eye cups and dust cover.

Art. No.	Pack Qty.	€
HHE1.1	1	420,00

Accessories:

Protective lens	**HHE2.1**	1	19,00
Eyepieces HWF 5x, visual field ∅ 16.2 mm	**HHE3.1**	2	70,00
Eyepieces HWF 20x, visual field ∅ 10 mm	**HHE4.1**	2	70,00

Clip-on lens 2.0x	**HHE6.1**	1	80,00

Stereo zoom microscope OZL-46 series

By Kern. All-round stereo microscope with zoom function for schools, training workshops and laboratories. With extra-wide field eyepieces for greater vision angle, thereby ideal for persons who wear glasses. Optimal illumination of the preparation through powerful incident and transmitted light.

Technical specifications:

Total magnification	7x to 45x (can be expanded to 180x)
Eyepieces	Extra-wide field 10x Visual field ∅ 20 mm Dioptre compensation, left (±5 dpt each)
Head	Binocular or trinocular 45° angular observation Rotatable by 360° Adjustable eye distance (55-75 mm)
Lens	Zoom: 0.7 to 4.5x
Working distance	105 mm (standard lens)
Lighting	1 W LED (incident light), 1 W LED (transmitted light) Incident and transmitted light can be regulated separately
Image focusing	Coarse focus
Power supply	50/60 Hz, 100 to 240 V

Optional accessories (please order separately):
- C-mount adapter for mounting a microscope camera on the photo tube of the trinocular microscope
- Wide field eyepieces and clip-on lenses allow modulation of the overall magnification of the stereo zoom microscope

Technical specifications:

Eyepiece	Lens			
	Magnification	Standard 1x[1]	Clip-on 0.5x	Clip-on 2.0x
HWF 10x[1]	Total magnification (x-fold) Visual field ∅ (mm)	7 to 45 28.6 to 4.4	3.5 to 22.5 57.1 to 8.9	14 to 90 14.3 to 2.2
HWF 20x	Total magnification (x-fold) Visual field ∅ (mm)	14 to 90 14.3 to 2.2	7 to 45 28.6 to 4.4	28 to 180 7.1 to 1.1

1 In delivery incl.

Delivery incl. table sets black/white and mat glass, eye cups and dust cover.

Type	Art. No.	Pack Qty.	€
OZL 463 binocular	**HHE7.1**	1	500,00
OZL 464 brinocular	**HHE8.1**	1	570,00

Accessories:

0.5x C-mount adapter (adjustable focus)	**HHE9.1**	1	95,00
Eyepieces HWF 20x, visual field ∅ 10 mm	**HHH0.1**	2	100,00
Clip-on lens 0.5x	**HHH1.1**	1	80,00
Clip-on lens 2.0x	**HHH2.1**	1	80,00

Stereo zoom microscope OZL-456

By Kern. Stereo microscope with large zoom range. Integrated LED ring lighting in the lens housing for even illumination of the preparation without shadows. Field of vision and working distance magnified through high-super wide field lenses. The greater vision angle of the HSWF eyepieces is ideal for persons who wear glasses.

Technical specifications:

Total magnification	7.5x to 50x (can be expanded to 200x)
Eyepieces	Extra-wide field 10x (HSWF) Visual field ∅ 23 mm Dioptre compensation, left (±5 dpt each)
Head	Binocular 45° angular observation Rotatable by 360° Adjustable interocular distance (55-75 mm)
Lens	Zoom: 0.75 to 5x
Working distance	113 mm (standard lens)
Lighting	1 W LED (incident light), 0.21 W LED (transmitted light) Incident and transmitted light can be regulated separately
Image focusing	Coarse focus
Power supply	50/60 Hz, 100 to 240 V

Optional accessories (please order separately):

- Wide field eyepieces and clip-on lenses allow modulation of the overall magnification of the stereo zoom microscope:

Technical specifications:

Eyepiece	Lens		
	Magnification	**Standard 1x[1]**	**Clip-on 2.0x**
HWF 5x	Total magnification (x-fold) Visual field ∅ (mm)	3.75 to 25 31 to 4.6	7.5 to 50 16 to 2.5
HSWF 10x[1]	Total magnification (x-fold) Visual field ∅ (mm)	7.5 to 50 33 to 5	15 to 100 16 to 2.5
HSWF 20x	Total magnification (x-fold) Visual field ∅ (mm)	15 to 100 20 to 3.5	30 to 200 10 to 1.8

1 In delivery incl.

Delivery incl. table sets black/white and mat glass, eye cups and dust cover.

Art. No.	Pack Qty.	€
HHH3.1	1	690,00

Accessories:

Eyepieces HWF 5x, visual field ∅ 23.2 mm	**HHH4.1**	2	80,00
Eyepieces HSWF 20x, visual field ∅ 14.5 mm	**HHH5.1**	2	120,00
Clip-on lens 2.0x	**HHH6.1**	1	115,00

Transmitted light microscope OBS-106

By Kern. Simple microscope with clear operating elements for school and training. For translucent, thin, high-contrast and non-demanding preparations.

- Height adjustable, focusable 1.25 Abbe condenser for optimised light concentration
- Mechanical cross table for fast working and moving of the preparation
- Mobile use possible through rechargeable batteries
- With continuously dimmable 0.5 W LED for optimum illumination of the preparations

Technical specifications:

Total magnification	40x, 100x, 400x
Eyepieces	Wide field 10x field of vision ∅ 18 mm dioptre compensation on both side
Head	Binocular 30° angular observation Rotatable by 360° Adjustable interocular distance (55-75 mm)
Lens turret	4-way, tilted forwards
Lenses, achromatic	- 4x / N.A. 0.10, W.D. 18.0 mm - 10x / N.A. 0.25, W.D. 7.0 mm - 40x / N.A. 0,65 (sping-loaded), W.D. 0.53 mm
Microscope stage	Area 115 x 125 mm Coaxial x/y travel range 75 x 18 mm
Condenser	Focusable Abbe condenser N.A. 1.25 with aperture cover
Lighting	0.5 W LED transmitted light, chargeable, adjustable
Image focusing	Coaxial coarse and fine drive with scale: 2.5 µm
Power supply	50/60 Hz, 100 to 240 V

Delivery incl. batteries and dust hood.

Art. No.	Pack Qty.	€
HNA1.1	1	360,00

OBE series transmitted light microscope

By Kern. Fully-equipped transmitted light microscope (bright field) for training and lab use. Very easy to use, robust and sturdy. For translucent and thin, contrast-rich preparations (e.g. plant tissue, stained cells, parasites). With **strong, infinitely dimmable 3W LED** for optimum illumination of the preparations.

Technical specifications:

Total magnification	40x, 100x, 400x, 1000x
Eyepieces	Wide field 10x Field of view 18 mm Dioptre compensation on left ocular tube (±5 Dpt)
Head	Binocular or trinocular 30° viewing angle 360° rotatable Adjustable eye distance (50-75 mm)
Lens turret	4-way, tilted forwards
Lenses, achromatic	- 4x / N.A. 0.10, W.D. 18.6 mm - 10x / N.A. 0.25, W.D. 6.5 mm - 40x (spring) / N.A. 0.65, W.D. 0.47 mm - 100x (spring, oil) / N.A. 1.25, W.D. 0.07 mm
Microscope stage	Area 125 x 115 mm Coaxial x/y travel range 50 x 70 mm
Condenser	Focusable Abbe condenser N.A. 1.25 with aperture cover
Lighting	3W LED transmitted light, adjustable
Image focusing	Coaxial coarse and fine drive with scale: 2 µm
Power supply	50/60 Hz, 100 to 240 V

Optional accessories (please order separately):
- C-mount adapter for mounting a microscope camera on the phototube of the trinocular microscope
- Dark field use for 4x to 40x lenses; to increase contrast of small, unstained structures
- 100x lens (planachromatic, spring) with water immersion

Delivery incl. eyecups and dust cover.

Type	Art. No.	Pack Qty.	€
① OBE 112 binocular	**EYP2.1**	1	540,00
② OBE 114 trinocular	**EYP3.1**	1	650,00

0.5x C-mount adapter (adjustable focus)	**EYP4.1**	1	160,00
Dark field use for 4x to 40x lenses	**EYP5.1**	1	85,00
100x lens, planachromatic (spring, water) / N.A. 1.0, W.D. 0.18 mm	**EYP6.1**	1	170,00

OBL series transmitted light microscope

By Kern. Versatile transmitted light microscope (bright field) for translucent, low-contrast, demanding preparations (e.g. living mammal cells, bacteria, tissue). With **simplified Köhler illumination** (fixed pre-centred) and **infinite optics** for optimum image quality. With **strong, infinitely dimmable 3W LED** for optimum illumination of the preparations.

Technical specifications:

Total magnification	40x, 100x, 400x, 1000x
Eyepieces	Wide field 10x Field of view 20 mm Dioptre compensation on left ocular tube (±5 dpt)
Head	Binocular or trinocular 30° viewing angle 360° rotatable Adjustable eye distance (50-75 mm)
Lens turret	4-way, tilted backwards
Lenses, achromatic	- 4x / N.A. 0.10, W.D. 12.1 mm - 10x / N.A. 0.25, W.D. 2.1 mm - 40x (spring) / N.A. 0.65, W.D. 0.58 mm - 100x (spring, oil) / N.A. 1.25, W.D. 0.19 mm
Microscope stage	Area 145 x 130 mm Coaxial x/y travel range 76 x 52 mm Holder for 2 object carriers
Condenser	Fixed pre-centred, focusable Abbe condenser N.A. 1.25 with aperture and field diaphragm
Lighting	3W LED transmitted light, adjustable
Image focusing	Coaxial coarse and fine drive with scale: 2 µm
Power supply	50/60 Hz, 100 to 240 V

Optional accessories (please order separately):
- C-mount adapter for mounting a microscope camera on the phototube of the trinocular microscope
- Dark field use to increase contrast of small, unstained structures
- 100x lens (planachromatic, spring) with water immersion

Delivery incl. eyecups and dust cover.

OBD series digital microscope

By Kern. Digital transmitted light microscope with integrated camera. For translucent, low-contrast and demanding preparations (e.g. living mammal cells, bacteria, tissue).
With **simplified Köhler illumination** (fixed pre-centred) and **infinite optics** for optimum image quality. With **powerful, infinitely variable 20 W halogen lighting** for optimum illumination of the preparations.

General technical specifications:

Total magnification	40x, 100x, 400x, 1000x
Eyepieces	Wide field 10x Field of view 20 mm Dioptre compensation on left ocular tube (±5 dpt)
Digital head	Trinocular 30° viewing angle 360° rotatable Adjustable eye distance (50-75 mm) Beam path distribution 80:20 Built-in digital camera USB port for PC
Lens turret	4-way, tilted backwards
Lenses, semi-planachromatic	- 4x / N.A. 0.10, W.D. 12.1 mm - 10x / N.A. 0.25, W.D. 2.1 mm - 40x (spring) / N.A. 0.65, W.D. 0.58 mm - 100x (spring, oil) / N.A. 1.25, W.D. 0.19 mm
Microscope stage	Area 125 x 115 mm Coaxial x/y travel range 76 x 52 mm
Condenser	Fixed pre-centred, focusable Abbe condenser N.A. 1.25 with aperture cover
Lighting	6 V / 20 W halogen transmitted light, adjustable built-in colour filter (blue)
Image focusing	Coaxial coarse and fine drive with scale: 2 µm
Power supply	50/60 Hz, 100 to 240 V

Camera technical specifications:

Type	**OBD 127**	**OBD 128**
Resolution	3 MP	5 MP
CMOS colour sensor	1/2″	1/2.5″
Software operating system	WIN XP, 7, VISTA, 8, 10	

Optional accessories (please order separately):
- Dark field condenser to increase contrast of small, unstained structures
- 100x lens (planachromatic, spring) with water immersion

Delivery incl. software, USB cable, calibration rod, eyecups and dust cover.

Type	Art. No.	Pack Qty.	€
OBD 127 digital / 3 MP	**EYT8.1**	1	1510,00
OBD 128 digital / 5 MP	**EYT9.1**	1	1600,00

Accessories:

Dark field condenser N.A. 0.85-0.91 (Dry)	**EYT0.1**	1	230,00
100x infinity lens, planachromatic (spring, water) / N.A. 1.15, W.D. 0.18 mm	**EYT1.1**	1	445,00

OBL series phase contrast microscope

By Kern. Sturdy phase contrast microscope for very translucent, low-contrast and demanding preparations (e.g. living mammal cells, bacteria, tissue).
With **simplified Köhler illumination** (fixed pre-centred) and **infinite optics** for optimum image quality. With **powerful, infinitely variable 20 W halogen lighting** for optimum illumination of the preparations.

Technical specifications:

Total magnification	40x, 100x, 400x, 1000x
Eyepieces	Wide field 10x Field of view 20 mm Dioptre compensation on left ocular tube (±5 dpt)
Head	Binocular or trinocular 30° viewing angle 360° rotatable Adjustable eye distance (50-75 mm)
Lens turret	4-way, tilted backwards
Lenses for bright field, semi-planachromatic	- 4x / N.A. 0,10, W.D. 12.1 mm - 100x (spring, oil) / N.A. 1.25, W.D. 0.19 mm
Lenses for phase contrast, planachromatic	- Ph 10x / N.A. 0.25, W.D. 4.64 mm - Ph 40x (spring) / N.A. 0.66, W.D. 0.65 mm
Object plate (mechanical)	Area 145 x 130 mm Coaxial x/y travel range 76 x 52 mm Holder for 2 object carriers
Condenser	Fixed pre-centred, focusable Abbe condenser N.A. 1.25 with aperture and field diaphragm
Phase modifier, single	Each for Ph 10x and Ph 40x
Lighting	6 V / 20 W halogen, adjustable built-in colour filter (blue)
Image focusing	Coaxial coarse and fine drive with scale: 2 µm
Power supply	50/60 Hz, 100 to 240 V

Optional accessories (please order separately):
- C-mount adapter for mounting a microscope camera on the phototube of the trinocular microscope
- Dark field condenser to increase contrast of small, unstained structures
- 100x lens (planachromatic, spring) with water immersion

Delivery incl. colour filter (green), eyecups and dust cover.

SFC-100FLED monocular microscope

By Motic. Rugged microscope for pupils and students.
With **LED lighting**. Battery or mains operation.

Technical specifications:

Total magnification	40x, 100x, 400x
Eyepiece	Wide field 10x Field of view 18 mm With pointer and ocular retainer
Head	Monocular 45° viewing angle 360° rotatable
Lens turret	3-way, tilted forwards
Lenses, achromatic	- 4x / N.A. 0.10 - 10x / N.A. 0.25 - 40x (spring) / N.A. 0.65
Microscope stage	120 x 110 mm, with 2 spring clamps
Condenser	N.A. 0.65 with iris diaphragm and filter holder
Lighting	LED (20 mA / 3.5 V / 70 mW), chargeable, continuously variable
Image focusing	Coarse and fine drive
Power supply	100-240 V

Delivery incl. charger, batteries and dust cover.

Art. No.	Pack Qty.	€
ATT2.1	1	191,35

Accessories:

Replacement LED (20 mA / 3.5 V / 70 mW)	**ATT3.1**	1	20,30

Lens cleaning tissues

Cleans without smearing, also removes dust and oil. 500 wipes per pack.

Art. No.	Pack Qty.	€

Laboratory and course microscope SHB 45

By Motic. Rugged microscope for pupils and students.
With halogen lighting and light intensity adaptation.

Technical specifications:

Total magnification	40x, 100x, 400x, can be expanded up to 1000x
Eyepieces	Wide field 10x Field of view 18 mm Dioptre compensation on both eyepieces (±5 dpt)
Head	Binocular 45° inclination 360° rotatable
Lens turret	4-way, tilted forwards
Lenses, achromatic	4x / N.A. 0.10 10x / N.A. 0.25 40x (spring) / N.A. 0.65
Microscope stage	120 x 120 mm with clamps for microscope slide
Condenser	N.A. 1.25, focusable, iris membrane with filter holder
Lighting	Halogen 12 V / 10 W, adjustable
Image focusing	Coaxial coarse and fine focus
Power supply	100-240 V

Delivery incl. blue filter, eyepiece cups and dust cover.

Biology microscope B3 Professional series

By Motic. With infinity optics.
- Brightfield microscope for the analysis of high-contrast, coloured samples
- Optionally available with a trinocular head for attachment of a microscope camera to the phototube using a C-Mount adapter (please order C-Mount camera adapter separately)

Technical specifications:

Total magnification	40x, 100x, 400x, 1000x
Eyepieces	Widefield 10x Field of view 20 mm Diopter compensation on left ocular tube (±5 dpt)
Head	Binocular or trinocular 30° viewing angle 360° rotatable Adjustable eye distance (55-75 mm)
Lens turret	5x, inclined backward, with four achromatic super contrast lenses
Lens	- 4x / N.A. 0.10, W.D. 17.0 mm - 10x / N.A. 0.25, W.D. 6.4 mm - 40x (spring) / N.A. 0.65, W.D. 0.45 mm - 100 x (spring oil) / N.A. 1.25, W.D. 0.14 mm
Microscope stage	140 x 135 mm, height adjustable coaxial x/y travel range 78 x 50 mm
Condenser	Focusable Abbe condenser N.A. 1.25 with iris diaphragm and filter holder
Lighting	Köhler halogen (12 V / 20 W), variable
Image focusing	Coaxial coarse and fine focus
Power supply	100-240 V

Delivery incl. colour filter set (blue, yellow, green), immersion oil and dust cover.

BA210-series laboratory microscopes

By Motic. With **LED lighting** and **infinite optics** for optimum image quality.

- Brightfield microscope for analysis of high-contrast, coloured samples; supplied lenses: 4x, 10x, 40x and 100x
  Phase contrast version for examination of colourless preparations with low natural contrast; supplied lens: Ph10x + Ph40x
  for phase contrast and 4x + 100x for brightfield
- Optionally available with a trinocular head for attachment of a microscope camera to the phototube using a C-Mount adapter (please order C-Mount camera adapter separately)

Technical specifications:

Total magnification	40x, 100x, 400x, 1000x
Eyepieces (incl. eyecups)	Wide field 10x Field of view 20 mm Diopter compensation on both eyepieces (±5 dpt)
Head	Binocular or trinocular 30° viewing angle 360° rotatable Adjustable eye distance (55-75 mm)
Lens turret	4-way, tilted backwards
Lens for brightfield, planachromatic (EC PL)	- 4x / N.A. 0.10. W.D. 15.9 mm - 10x / N.A. 0.25, W.D. 17.4 mm - 40x S / N.A. 0.65, W.D. 0.5 mm - 100x S-Oil / N.A. 1.25, W.D. 0.15 mm
Lens for phase contrast, planachromatic (EC-H-PL)	- Ph10x / N.A. 0.25, W.D. 17.4 mm - Ph40x S / N.A. 0.65, W.D. 0.50 mm
Microscope stage	140 x 135 mm coaxial x/y travel range 76 x 50 mm
Condenser	Focusable Abbe condenser N.A. 1.25 with iris diaphragm and slider slot
Specially designed for phase contrast	3x phase shifter for Ph1/2 and brightfield Centring telescope
Lighting	LED (3 W), controllable Colour temperature: 5 500 K
Image focusing	Coarse and fine drive
Power supply	100-240 V

Delivery incl. immersion oil and dust cover.

AE2000-series inverse microscopes

By Motic. During inverse microscopy the lenses are positioned under the benchtop. This results in a larger gap between the benchtop and condenser, allowing analysis of thicker preparations such as living cells in culture vessels/microtiter plates.

- With **infinite optics** for optimum image quality
- Optionally available with **LED lighting** (please order separately)
- Optionally available with a trinocular head for attachment of a microscope camera to the phototube using a C-Mount adapter (please order C-Mount camera adapter separately)

Technical specifications:

Total magnification	40x and 400x in brightfield 100x and 200x in phase contrast
Eyepieces (incl. eyecups)	Wide field 10x Field of view 20 mm Diopter compensation on both eyepieces
Head	Binocular or trinocular 45° viewing angle 360° rotatable Adjustable eye distance (48-75 mm)
Lens turret	4-way, tilted sideways
Lenses for brightfield, planachromatic	- PL 4x / N.A. 0,10, W.D. 12.6 mm - LWD PL 40x / N.A. 0.50, W.D. 3.0 mm
Lenses for phase contrast	- PL Ph 10x / N.A. 0.25, W.D. 4.1 mm - LWD PL Ph 20x / N.A. 0.30, W.D. 4.7 mm
Worktop	200 x 239 mm With glass/metal stage insert
Condenser	ELWD N.A. 0.30 with phase shifter (Ph1, BF) W.D. with condenser for 72 mm W.D.
Lighting	Halogen (6 V / 30 W) with sleep mode, variable
Image focusing	Coarse and fine drive, coaxial
Power supply	100-240 V

Delivery incl. blue filter, interference filter green, neutral filter with slider, centring telescope and dust cover.

Microscope cameras

By Motic. Digital microscope cameras with measurement software. The cameras can be connected to the third tube of the microscope by the C-Mount thread. This requires a matching C-Mount adapter of the microscope manufacturer. The supplied eyepiece adapter allows the cameras to be used on almost any commercially available microscope. Connection via PC, system requirements: Windows XP operating systems and higher or Apple Mac OSX, USB 3.0 port. The camera is powered via the USB port. Larger objects can also be viewed independently of the microscope using the macro tube.

Technical specifications:

Model	① Moticam 3+	② Moticam 5+
CMOS sensor format	½″	½,5″
Attachment lens, focusable	16 mm / CCD	12 mm / CCD
Number of pixels	3.0 MP	5.0 MP
Maximum resolution	2048 x 1536	2592 x 1944
Live image measurements	yes	

Delivery incl. 2 variable eyepiece adapters (suitable for sizes 28, 30, 34 and 35 mm), detachable USB 3.0 cable, macro tube with macro lens, Motic (4-point) calibration scale with crosshair and Motic Images 2.0 Software.

Type	Art. No.	Pack Qty.	€

② Moticam 5+	**TX10.1**	1	995,45

Bellows with cleaning brushes

Made of rubber. Clip-on brushes. For contact-free removal of dust and/or loose dust particles on optical or other sensitive surfaces. Easy handling. With large elastic bellows for strong blowing action. Sturdy air nozzle at front, air inlet valve at rear. Dimensions about: L 180 x ∅ 60 mm.

Art. No.	Pack Qty.	€
KP30.1	1	13,90

C-mount cameras ODC series

By Kern. For conventional microscope use, and for demanding application (e.g. darkfield, phase contrast and fluorescence).

- Fast and clear image transmission with proven CMOS technology
- USB 2.0 data transmission adequate for static samples. USB 3.0 version recommended for living samples (faster transmission without stalling)
- Camera power supply via USB cable (length 2 m)
- Multilingual software available. With the functions streaming, photo snapshot and video. Various measuring functions such as paths, surfaces and angular measurement, as well as manual counting possible. Image processing and documentation functions included
- Mounting possible either via C-mount connection on the third barrel of the microscope or via eyepiece. Matching C-mount adapter is provided by the microscope manufacturer, eyepiece adapter (∅ 23.2 mm) and adapter rings (∅ 30.0 mm and 30.5 mm) included in the scope of delivery

Technical specifications:

Model	ODC 822	ODC 824	ODC 825	ODC 831	ODC 832
CMOS sensor format	1/3″	1/2″	1/2,5″	1/3″	1/2,5″
Port	USB 2.0	USB 2.0	USB 2.0	USB 3.0	USB 3.0
Number of pixels (MP)	1.3	3.1	5.1	3.1	5.1
Images per second	15-48	11.5-45	6.8-55	27.3-53.3	14.2-101.2
Supported operating system	Win XP, Vista, 7, 8, 10				

Delivery incl. software microscope VIS, USB cable, eyepiece adapter, rings and lens micrometer for calibrating the software. Please download the software free of charge.

Dual goose neck LED

By Kern. External lighting unit (reflected) for microscope.
For maximum flexibility and maximum comfort.
With excellent light quality at constant intensity on the object.

Technical specifications:

Lighting	6 W LED, dimmable
Useful life	Approx. 50,000 operating hours
Colour temperature	5600-6300 K
Length of lights	300 mm
Dimensions (W x H x D)	300 x 250 x 250 mm
Weight	1.5 kg
Power supply	50/60 Hz, 100-240 V

Delivery incl. twin-arm goose neck light conductor.

Art. No.	Pack Qty.	€
HNH3.1	1	160,00

Cold light source

With adapter for gooseneck light guide.
- Integral **halogen mirror lamp 8 V, 20 W**
- With continuous adjustable electronic adjustment of light
- Ideal for illuminating objects during microscopy
- Dimensions: W 175 x D 150 x H 90 mm
- Electrical supply 220 V

Delivery without gooseneck light guide, please order separately.

LED series cold light sources

By Starlight. Modern cold light sources with robust aluminium housing and premium-quality finish. LED technology makes for highly efficient, long-lasting (approx. 50,000 h) and maintenance-free units.
Flicker-free illumination. Stackable.
Can be positioned both horizontally and vertically.

Model overview:

① **LED3**	- Passive cooling (without fan) for silent and vibration-free working - More powerful than 150 W halogen light sources - Fanless cooling makes them perfect for cleanroom applications
② **LED5**	- Cold light source is actively cooled and provides excellent lighting whatever the diameter of the fibre-optic cable
③ **LED7**	- Actively cooled cold light source with high light output

Technical specifications:

Model	① **LED3**	② **LED5**	③ **LED7**
Luminous flux with 1 m x ∅ 9 mm (lm) fibre-optic cable	730	810	1350
Colour temperature (K)	5700	7700	6900

Illuminated magnifiers

varioLEDflex magnifier lamp

By Eschenbach. With shadow-free ring illumination and structure-accentuating segment illumination. A flexible gooseneck stand with a smooth action and the lens which also tilts in two directions ensures precise adjustment of the magnifier head to suit individual requirements.

- Aspheric PXM® lightweight lens, cera-tec® coated
- **Lens ∅ 76 mm**
- **2.5x magnification (6 dpt),** high edge definition
- 63 LEDs, up to 50 000 hours lamp life, maintenance free
- Illumination level: approx. 6 000 lx at only 5 W (ring illumination)
- Colour temperature >6 000 K
- Stand length 410 mm
- Power supply 110-230 V, 50-60 Hz, cable length approx. 2.5 m

Delivery incl. mains adapter (EU/GB/US) and sturdy table clamp made from steel, max. clamping range 60 mm.

Art. No.	Pack Qty.	€
AEA3.1	1	413,90

LED-illuminated round magnifier

By Waldmann. Very sturdy and rugged, resistant to vibration. Excellent colour rendering and homogeneous light distribution.

- Scratch-resistant plastic lens with **6 diopters**
- Field of vision ∅ **72 mm**, undistorted
- 63 x Low Power LEDs
- Low energy consumption of approx. 6 watts (energy efficiency class A)
- Colour temperature: neutral white 3 700-4 300 K
- Colour rendering Ra = 85
- Illumination level approx. 2 660 lx at a distance of 15 cm
- Stand length approx. 730 mm
- Comfortable switching on/off using sensor button on lamp head
- Housing made of anodised aluminium and black plastic
- Power supply 100-240 V, 50/60 Hz, cable length 2.3 m

Delivery incl. base and protective lens casing to avoid fire when not in use. Table clamp and table base is optional (please order separately).

Illuminated magnifiers

Tevisio magnifier lamps

By Waldmann. For demanding applications in research, manufacturing, quality assurance and assembly.

- Scratch-resistant **3.5 diopter** glass lens
- **Large field of vision,** ∅ **153 mm**, distortion free
- 48 LEDs, up to 50,000 hours lamp life, maintenance free
- Various light segments can be switched on and off to create structure-accentuating effects
- Continuously variable dimming to 10 %
- Colour temperature: neutral white 4000 K
- Light intensity: 6000 lx at only 14 W
- 40 % energy saving compared to standard magnifier lamps
- 3D head joint for individual adjustments
- Housing made of colourless anodised aluminium and black plastic
- Power supply 100-240 V, 50/60 Hz, cable length 3.8 m

Overall reach (mm)	Art. No.	Pack Qty.	€
784 (400/384)	**NH40.1**	1	719,20

Headlight LED

By Eschenbach. High-performance LED light for shadow-free, ergonomic and fatigue-free working at near-constant illumination levels. Light swivels vertically into the desired position.
For attachment to headband magnifiers (P106.1 ff.) and the MaxDetail magnifier (HE06.1).

Technical specifications:

Lighting	2 high-performance LEDs
Illumination level	approx. 3200 lx in 250 mm approx. 1200 lx in 400 mm
Length of cable	1 m
Dimensions: lamp housing battery housing (incl. clip)	 32 x 20 x 34 mm 90 x 55 x 40 mm
Weight: lamp housing battery housing (excl. batteries)	 11 g 60 g
Lighting duration	approx. 8 h in normal mode approx. 14 h in Eco mode
Power supply	3 mignon/AA 1.5 V batteries

Delivery incl. adapter for headband magnifiers and MaxDetail magnifier, hard foam case and batteries.

Art. No.	Pack Qty.	€
CPT7.1	1	98,40

Accessories:

Magnifying glasses MaxDetail

By Eschenbach. **Magnification 2-times.** Multi-purpose magnifying glasses for all tasks where you need to use both hands.
Advantages:

- Adjustable side-pieces for a close fit
- Optimal working distance 400 mm
- Large field of vision (~150 mm at 400 mm working distance)
- Diopter compensation of ±3 dpt. possible
- Low weight 49 g

Art. No.	Pack Qty.	€
HE06.1	1	104,10

Head band magnifiers

By Eschenbach. Binocular lenses enable stereoscopic sight with both eyes. Suitable for spectacle users. Screen is closed on all sides to protect against diffused light. Screen can be folded back when not in use.

10x / 38.0 dpt.	**H507.1**	1	35,70

Type ②: with LED white light, 52 mA
With attachable filters for various light colours.

Magnification	Art. No.	Pack Qty.	€
10x / 38.0 dpt.	**PT98.1**	1	64,40
12.5x / 50.0 dpt.	**PT99.1**	1	67,55

Accessories:

Mignon battery/AA 1.5 V	**1022.2**	4	6,05

Binocular magnifiers for spectacles

By Eschenbach. Simple and effective magnifying aid for spectacle users.

Advantages:
- Can be clipped on to almost any spectacle frames
- Field of vision is not restricted
- Both hands are free for working

Operating distance (mm)	Magnification	Art. No.	Pack Qty.	€
400	1.7x	**P103.1**	1	61,20
250	2x	**P104.1**	1	61,20
180	2.5x	**P105.1**	1	61,20
160	3x	**H577.1**	1	64,10

① Precision magnifiers with graticule

By Eschenbach. Has a distortion-free, high quality, achromatic lens.
Lens ∅ 23 mm. Features handy focussing ring.
With 20 mm measuring range and 0.1 mm subdivision.
Casing made of glass-fibre reinforced polyamide.

Magnification	Art. No.	Pack Qty.	€
7x	**H570.1**	1	104,15
10x	**H571.1**	1	121,50

② Illuminating attachment LED

By Eschenbach. For precision magnifiers. Handy case for two batteries, type Baby 1.5 V. **Delivery without** batteries, please order separately.

Art. No.	Pack Qty.	€
H572.1	1	79,50

Accessories:

Baby/C 1.5 V battery	**1023.2**	2 pieces	4,85

Approximation formula for calculating diopters in magnification:

$$\frac{\text{Dpt.}}{4} + 1 = \text{x-times magnified}$$

Illuminated precision magnifier

By Eschenbach. With removable **graticule**.
Magnification 10x, 38 (dpt).
With aspheric **PXM®-light lens, lens-∅ 35 mm.**
Graticule with 0.5 mm and 1/64 inch graduation.
Power supply via 2 x 1.5 V batteries (type Baby).
Delivery without batteries, please order separately.

Art. No.	Pack Qty.	€
H568.1	1	81,60

Accessories:

Baby/C 1.5 V battery	**1023.2**	2 pieces	4,85

Magnifying lenses

Illuminated pocket magnifiers easyPOCKET

By Eschenbach.
- Aspherical lens
- **Magnification: 3-times**
- Lens diameters: L 50 x W 46 x H 3 mm
- Ultra-flat
- With LED illumination
- Can be switched on and off by pulling magnifier out of protective case
- Fibre glass reinforced plastic case protects lens
- Dimensions of plastic case: L 85 x W 55 x H 6 mm

Delivery incl. battery (Button cell, 3 V, type CR 2025)

Colour	Art. No.	Pack Qty.	€
silver	**KC50.1**	1	61,20
black	**KC51.1**	1	61,20

Accessories:

CR 2025 button cell battery (3 V)	**CH14.1**	1	5,35

All-purpose pocket lens

By Eschenbach. Can be used as a **handheld or desktop magnifier.** With a simply twist, you can easily transform the hand-held magnifier into a desktop magnifier that always ensures correct height and a sharp image. The aspheric PXM® lightweight lens **(∅ 60 mm)** produces a sharp image right to the edge of the lens with **3.5x magnification (10.0 dpt.)**.

Art. No.	Pack Qty.	€
H569.1	1	37,45

Folding magnifier

Made of plastic, with PXM® lightweight lens **(∅ 23 mm)**.
10x magnification. Aplanatic lens for edge-to-edge distortion-free images.

Art. No.	Pack Qty.	€
PX00.1	1	31,75

Hand-held magnifiers with additional lens

By Eschenbach. Suitable for use when a large field of vision is required with low level magnification.
- Biconvex PXM® lightweight lens
- Plano-convex additional lens with 5x magnification integrated in the handle
- Eyelet in the handle for round-the-neck carry cord

Lens ∅ (mm)	Magnification (dpt / x times)	Art. No.	Pack Qty.	€
60	6,4/2,5	**AXL6.1**	1	16,10
80	5,0/2,25	**AXL7.1**	1	23,60

Folding magnifiers

High-resolution. With aspheric lenses.
Dust-tight casing protects lens from scratching. ∅ **of lens 35 mm**.
Total ∅ 52 mm.

Delivery incl. neck strap

Magnification	Colour	Art. No.	Pack Qty.	€
4x	red	**H502.1**	1	25,60
7x	anthracite	**H503.1**	1	29,00

LED bench lamps

- 48 LEDs, over 15 000 hours lamp life, maintenance free
- Colour temperature: daylight white 6 500 K
- Light intensity: 1 500 lx at 350 mm distance, 200 lumen
- Low energy consumption of approx. 6.5 watts (energy efficiency class „A“)
- Arm and lamp head made of aluminium and plastic
- Lamp head 130 x 110 mm, rotatable and tiltable
- Switch on lamp head for convenient switching on and off
- Arm length: 400 mm
- Height in normal working position: 430 mm
- Sturdy base, 200 x 165 mm, made of plastic with ballasting
- Power supply 230 V, 50 Hz, cable length 1.75 m

Colour	Art. No.	Pack Qty.	€
black	**NK64.1**	1	83,75
silver	**NK65.1**	1	83,75

Table lamps Study

Arm, shade and clamp base made of metal.

- Length of arm, top and bottom approx. 35 cm (height adjustable)
- Reflector can be moved
- Lamp head ∅ 17 cm
- Span width of clamp max. 55 mm
- Can be rotated 360°
- Cord length approx. 1.75 m
- Supply 230 V, 50/60 Hz

Delivery without light bulb, please order separately.

Colour	Art. No.	Pack Qty.	€

Spare lamp	**XC72.1**	1	10,50

LED workplace luminaires

By Waldmann. For homogeneous wide area illumination of the workplace without glare or shadows.
Good contrast vision and excellent colour detection.

- Maintenance-free LED technology, up to 50 000 hours lamp life
- 30 % energy saving compared to standard work lights
- Variable dimming down to 10 %, with memory function
- Colour temperature: neutral white 5 000 K
- Glare suppression is provided by cone prism aperture
- Flicker-free light without IR and UV content
- Housing made of colourless anodised aluminium and black fibre-reinforced plastic

Technical specifications:

④ with fixed mounting	**NK93.1**	1	385,95

Workplace luminaire

Colour: white. Ideal for laboratories, workshops and engineering offices.
With electronic ballast for flicker-free start, flicker-free light, low current consumption and longer bulb life.

- Colour temperature: daylight white 6 500 K
- Light intensity: 2 800 lx at 350 cm distance, 1 250 lumen
- Lamp head with aluminised parabolic louvre for glare-free use
- Switch on lamp head for convenient switching on and off
- Rugged metal arm, rotatable through 360°
- Arm length at bottom and top 400 mm
- Height in normal working position 400 mm
- Metal clamp base, plastic coated (for clamping widths up to 65 mm)
- Energy efficiency class „A“
- Power supply 230 V, 50 Hz, cable length 1.50 m

Delivery incl. bulbs (3 x 14 W).

Lighting panels, autoradiography

Lighting panels

By Rex.
Ideal for viewing and for precise colour evaluation of slides, for examining large-sized films and transparencies, for illuminating X-rays.
Also suitable for selecting and evaluating photographic material or for comparing superimposed graphs or chromatogrammes, etc.

Design:
- Sturdy sheet steel case, powder-coated (white)
- Extremely flat construction
- Plane, scratch resistant plastic opal pane
- **Non-flashing, non-flickering light,** for non-fatiguing viewing
- Without border and good illumination
- Light temperature 5000 K
- Only slight warming of surface during permanent run
- Comes with integrated wall mounting
- Length of leads 2 m
- Mains supply 230 V, 50-60 Hz

Technical specifications:

UVT-14 SE	254	4 x 6 W	**NK03.1**	1	878,30
UVT-14 ME	312/302	4 x 6 W	**NK04.1**	1	878,30
UVT-14 LE	365	4 x 6 W	**NK05.1**	1	767,55

Accessories:

Hinged UV protective screen	**NK06.1**	1	118,25
Replacement UV tube, 6 W, 254 nm, L 210 x ∅ 16 mm	**P368.1**	1	48,60
Replacement UV tube, 6 W, 312/302 nm, L 210 x ∅ 16 mm	**P850.1**	1	56,55
Replacement UV tube, 6 W, 365 nm, L 210 x ∅ 16 mm	**P369.1**	1	36,80

Warning: UV-C radiation is detrimental to health!

Fields of application:

- UV-A = 320 to 380 nm (max 366 nm): effect lighting, testing of materials, commencement of photochemical reaction, fluorescence excitation e.g. with DCchromatogrammes and gels.

- UV-B = 280 to 320 nm (max 312 nm): e.g. analytic evaluation of chromatography plates without destroying separated substances.

- UV-C = 100 to 280 nm (max 254 nm): e.g. chromatographic investigation for identifying (absorption or fluorescence) substances.

Surface illuminators

Blue light LED transilluminators

For the gentle excitation of fluorescent DNA strands in gel.
No damage to DNA by UV radiation. Specially designed for SYBR dyes (excitation at 420-500 nm, emission above 520 nm).
Dimensions: L 266 x W 186 x H 80 mm.
Please order UV protective goggles with orange lens for the detection of DNA strands separately.

Type	Filter size (mm)	Art. No.	Pack Qty.	€
UVT-14 BE-LED	110 x 140	**NN23.1**	1	655,75

Handheld refractometers, analog

By Kern. For measuring the refractive index of transparent substances in a liquid state.

- Eyepiece with diopter compensation
- Scale is precisely calculated and checked, with very thin and clear lines
- With or without automatic temperature compensation (ATC):
  Measured temperature with ATC: 10 to 30 °C
  Measured temperature without ATC: 20 °C

Delivery incl. calibration solution and storage box.

Application area: laboratory

Refractometer, digital

By Kern. Digital refractive index measuring instrument for laboratories and industry.

- Compact, rugged design
- Dust and splash-proof acc. to protection class IP 65
- With automatic temperature compensation (ATC)
- Depending on model, measurement data is output on different measurement scales

Technical specifications:

Measurement temperature Accuracy	+5 to +30 °C ±0.5 °C
Minimum sample volume	approx. 2-3 droplets
Auto Off function	after 90 sec
Battery life	approx. 3750 measurements
Dimensions (H x W x D)	38 x 145 x 67 mm
Weight	approx. 200 g
Power supply	2 x Micro/AAA 1.5 V battery

Delivery incl. calibration solution, leather case, storage case and batteries.

Application area: laboratory
For refractive index measurement, with extra-large measuring range.

Model	Scale	Measuring range	Accuracy	Graduations
ORF 1RS	Refractive index	1.3330-1.5400 nD	±0.0005 nD	0.0001 nD

Abbe refractometer ORT 1RS

By Kern.

For determining the refraction index of transparent liquid, solid and pasty samples.
Application area: laboratory/industry/pharmaceuticals.

- Easy-to-use, rugged design
- Eyepiece with diopter adjustment
- Scale refers to +20 °C
- Includes thermometer for reading the measuring temperature
- Calibrated with distilled water or calibration block and special contact fluid
- Can be connected to a water circulation system for temperature control of measurement prism and illumination prism (outer diameter of connecting piece: 9.5 mm)

Technical specifications:

Scale	Brix	Refraction index
Measuring range	0-95 %	1.3000-1.7000 nD
Accuracy	±0.1 %	±0.0002 nD
Graduations	0.25 %	0.0005 nD
Dimensions W x D x H (mm)	90 x 180 x 240	
Weight (g)	approx. 1950	

Delivery incl. thermometer, calibration block and contact fluid.
Transportation and storage box made of aluminium is optional (please order separately).

LCD universal charger

By Varta. Suitable for 2 or 4 Ni-MH rechargeable batteries of sizes AA, AAA, C, D (charging in pairs), 1 x 9 V.

- LCD indicator (blue) for charge status
- Safety features: Minus Delta U-shut-off, timer, alkaline detection
- Charging times: Rechargeable batteries 4 hours, external devices 1.5-5 hours
- 4 charging bays for charging batteries
- Dimensions: W 111 x D 70 x H 187 mm

Delivery incl. external mains adapter (100-240 V).
Supplied without rechargeable batteries, please order separately.

Art. No.	Pack Qty.	€
EXP0.1	1	24,70

LCD Ultra Fast Charger

By Varta. Suitable for one to four AA or AAA Ni-MH batteries.

- Four different functions: Charging, discharging, refresh and capacity test
- Large LCD display for reading the voltage, mAh and minute values; LED backlighting that indicates charging status
- Safety features: Minus Delta U cut-off, safety timer, short-circuit protection, alkaline detection, temperature monitoring and fan function
- AA battery charging time (70 %): 15-30 min.
- Dimensions: W 180 x D 240 x H 111 mm

Delivery incl. four AA batteries, external power supply (220-240 V) and 12 V-adapter.

Colour-change crayons - irreversible

Ideal for monitoring temperature of equipment and machines via colour change. The colour clings to paper, rubber, textiles, plastic, glass, iron, and steel. Can also be used in aluminium processing or in enamel and welding operations. Exact measuring result with a tolerance of ±5 °C per temperature value. Colour change after reaching the temperature within 1-2 seconds.

Measuring point (°C)	Art. No.	Pack Qty.	€
120	**9307.1**	1	19,25

-10 to +360	2	300	76	**ET06.1**	1	22,60

Glass thermometers with temperature limiter

With **red or blue special filling** and safety casing (PTFE/FEP).
For monitoring cooling units and temperature control units.
Supplied in plastic bottle containing filling medium for precise temperature determination. Can be mounted using magnets (exception: YE26.1).

Bottle filling medium: sand

Measuring range (°C)	Graduation (°C)	Accuracy (°C)	Length (mm)	Art. No.	Pack Qty.	€
-90 to +20	1,0	±2.0	180	**YE17.1**	1	70,45

General information on calibration and calibrating meters

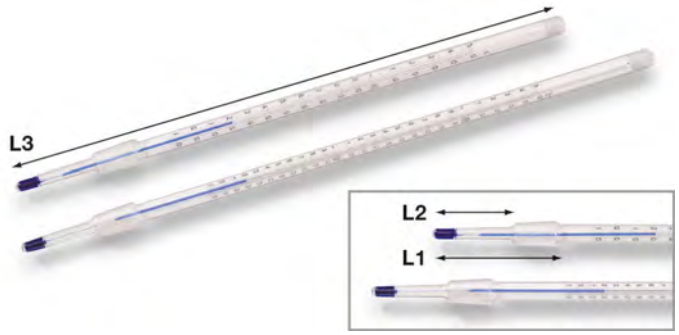
Calibrated meters:
Calibration of a meter is performed by the competent calibrating body. Each unit must fulfill certain criteria prior to receiving a certificate (e.g. automatic check when switched on, suitable connection for standard probes, etc.).
A calibrated meter is not automatically a highly accurate unit, it must simply keep within the given tolerances.
Each calibrated unit receives a seal and certificate of testing.
Tests should be repeated at regular intervals.

Meters with DAkkS Certificates of Calibration:
A DAkkS Certificate of Calibration is issued by a accredited testing agency (must be approved and is monitored by Deutsche Akkreditierungsstelle [German Accreditation Agency]). Meter meets national standard requirements and can be used in accordance with ISO 9000 Quality Assurance Standards.
Very low preset tolerance (lower than required for works certificate).

The user of DAkkS certified meters can therefore issue internal works certificates. This is particulary of advantage in the Quality Assurance Department of larger firms where measuring instruments used in the Production Department must be tested and calibrated at specific intervals.
Individual test points should be customized depending upon temperature ranges under measurement.

Meters with a Works Certificate of Calibration:
A works certificate of calibration is issued after carrying out a comparison measurement with a DAkkS calibrated meter.
Unit meets national standard requirements and can be used in accordance with **ISO 9000** Quality Assurance Standards.
Tolerance of measurement with works certificates is slightly higher than of a DAkkS certified unit. Individual test points should be customized depending upon temperature ranges under measurement.

Thermometer, analogue



Precision ground joint thermometers with special filling

Compliant with DIN 12784. With NS 14.5/23 ground joint. Enclosed type. **Blue filling.** Capillary form: colourless, prismatic. Graduations 1 °C. Upper ∅ 11 ±0.5 mm.

Measuring range (°C)	Length L1 (mm)	Immersion depth L2 (mm)	Overall length L3 (mm)	Art. No.	Pack Qty.	€

-20 to +50	±1	Refrigerator thermometer	**TA56.1**	817
-20 to +55	±0.4	°C and rF data logger; memory with capacity for 1 mill. measured values; data readout via PC or SD card	**PH32.1**	830
-20 to +50	±1	Min/Max-temperature values; Suitable for inside and outside; Splashproof	**CK39.1**	817
-20 to +70	±0.5	°C- and rF data logger with display for 16000 measured values	**NA07.1**	829
-20 to +140	±0.2 to ±0.5	Data logger for high temperatures; water-tight and pressure-tight up to 10 bar	**ENE3.1**	831
-30 to +50	±0.5	Wireless data logger with integrated NTC temperature sensor	**ECK0.1**	832
-30 to +70	±1	Digital fridge/freezer thermometer with min/max function	**PE75.1**	817
-30 to +60	±1	°C and rF data logger with wireless sensor; connectivity for 8 transmitters	**PL21.1**	831
-30 to +60	±1	LAN data logger with Internet connection, data can be retrieved via smartphone, up to 50 transmitters can be connected	**ENN0.1**	832
-30 to +70	±0.5	°C data logger with display for 16000 measured values	**NA06.1**	829
-30 to +220	±0.5 / 1%	Folding thermometer for core temperature and random measurement	**PE63.1**	820
-30 to +220	±1.5 to ±2 or 2 %	Non-contact thermometer with hold and lock function	**Y400.1**	834
-35 to +55	±0.5	°C data logger; memory with capacity for 1 mill. measured values; data readout via PC or SD card	**PH31.1**	830
-35 to +70	±0.5	°C data logger with display for 40 000 measured values	**CXC4.1**	829
-35 to +365	±2 to ±2 %	Infrared thermometer with measuring spot marking and pistol grip	**LY46.1**	834
-40 to +65	±1	Readings transferred wirelessly, up to three transmitter units can be connected, min./max. memory	**LP27.1**	815
-30 to +70	±1	Wireless transmission of measured values, min/max memory	**HY40.1**	815
-40 to +70	±0.5 to ±1	°C data logger with integrated USB port for 60000 measured values	**CCE2.1**	828
-40 to +70	±0.5 to ±1	For monitoring refrigerators; alarm, min./max. and hold functions	**KA32.1**	818
-40 to +70	±1 to ±2	Inner-/outer thermometer Rotilabo®, min/max function	**YE41.1**	816
-40 to +70	±0,5, ±1,0	USB data logger able to display 150.000 readings, data issued as a PDF automatically	**EHX3.1**	828
-40 to +200	±1 to ±2	Insertion thermometer with revolving display, Min/Max and hold function	**AK16.1**	819
-40 to +200	±0.5 to ±1.5	For monitoring refrigerators; alarm, min./max. and hold functions	**KA33.1**	818
-40 to +200	±1 to ±1.5	Penetration thermometer with HOLD-, Min- and Max-function	**T332.1**	819
-40 to +200	±0.5 to ±1	Min/Max-storage, hold function, display lighting	**N359.1**	825
-40 to +200	±1 to ±1.5	Permanently-connected NTC penetration probe, min/max and hold function	**HNN8.1**	825
-40 to +250	±0.5 to ±1 or 1 %	Folding thermometer for core temperature and random measurement	**TA94.1**	820
-40 to +250	±0.5 to ±1 or 1 %	Penetration thermometer with min/max and hold function, water and dustproof (IP 67)	**LN45.1**	819
-50 to +60	±1	Inner-/outer thermometer Min/Max-storage	**AN34.1**	816
-50 to +70	±1.5	Thermometer with timer-function and temperature trend	**Y845.1**	815
-50 to +70	±1	Indoor-/outdoor thermometer, officially calibrated with certificate, min/max function	**EH47.1**	818
-50 to +70	±1	Inner-/outer thermometer, Min/Max-storage	**CH86.1**	816
-50 to +70	±1 to ±2	Inner-/outer thermometer with limit value alarm and Min/Max function	**HA34.1**	816
-50 to +70	±0.3	With factory certificate, alarm, min./max. functions and temperature control	**HAN2.1**	819
-50 to +125	±0.5 to ±1	°C data logger with display for 60 000 measured values. Connection of external sensor	**NA22.1**	830
-50 to +150	±0.2 or ±0.4	Precision-NTC-thermometer with acoustic limit value alarm, min/max function	**EL54.1**	822
-50 to +200	±1	Penetration probe thermometer, hold function	**A321.1**	820
-50 to +250	±0,5 to ±2,5	Penetration probe and infrared thermometer for core and surface temperature measurement	**XK00.1**	833
-50 to +250	±0.5 to ±1 or 1 %	Folding thermometer for core temperature and random measurement with Min/Max-function	**PE64.1**	820
-50 to +300	±0.2 to ±0.3	Conformity assessment; with alarm and min./max. functions	**EH93.1**	823
-50 to +300	±1.5 to ±2	Non-contact temperature quicktester with laser spot marker	**P855.1**	833
-50 to +300	±0.2 to ±0.5 or 0.4 %	For simple, fast measurements, with penetration probe, IP 67	**HHY1.1**	822
-50 to +1000	±0.5 to ±0.7 / ±0.3 % to ±0.5 %	Wide range of accessories available; with alarm, min./max. and hold functions	**EH73.1**	824
-60 to +500	±2 or ±2 %	Infrared thermometer with circuit laser, thermocouple input for external sensors	**EHP6.1**	834

Thermometer, digital

Indoor/outdoor thermometer

By Amarell. Memory function for min/max temperature (indoor and outdoor). Outdoor sensor fitted with 3 m cable. With temperature trend display. Also includes clock and date display. Ideal for table top or wall mounting.

Technical specifications:

Measuring range/Resolution	Indoor: 0.0 to +50.0 °C Outdoor: -50.0 to +70.0 °C
Accuracy	±1.5 °C
Dimensions (L x W x D)	100 x 70 x 25 mm

Delivery incl. 1.5 V Micro battery.

Art. No.	Pack Qty.	€
Y845.1	1	24,55

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Radio-controlled thermometer Ratio

By TFA-Dostmann. Wireless transmission of outside temperature from up to 3 different transmitters. Range max. 100 m. Indication of inside temperature. Max/Min-memory. Also with radio-controlled clock. For hanging or upright use.

Technical specifications:

Measuring range/Resolution	Inside Outside	0 to +60.0 °C -40.0 to +65.0 °C
Dimensions (L x W x H)	Receiver Transmitter	113 x 67 x 28 mm 86 x 32 x 15 mm
Power supply	Receiver Transmitter	2 Batteries Mignon 1.5 V 2 Batteries Micro 1.5 V

Delivery incl. 1 receiver and 1 transmitter. Without batteries, please order separately.

Type	Art. No.	Pack Qty.	€
Radio-controlled thermometer	**LP27.1**	1	21,30

Digital solar thermometer, Eco Basic

By TFA-Dostmann. Shows actual inside temperature and comes with memory function for min/max values. With integrated and replaceable backup-battery - should energy supply from solar panel not be sufficient. With stand and hanging device.

Technical specifications:

Measuring range/resolution	-10.0 to +50.0 °C
Accuracy	±1 °C
Dimensions (W x D x H)	90 x 20 x 90 mm
Weight	100 g

Delivery incl. 1.5 V button cell battery.

Art. No.	Pack Qty.	€
KT83.1	1	13,95

Accessories:

Cell battery V 13 GA (1.5 V)	**1938.1**	1 piece	4,85

Thermometer, digital

Rotilabo®-indoor/outdoor thermometers

With Min/Max function. Outdoor sensor with approx. 1.5 m of cable.

Technical specifications:

Measuring range/resolution	Indoor: -10.0 to +50.0 °C Outdoor: -40.0 to +70.0 °C
Accuracy	±1.0 °C (0.0 to +50.0) ±2.0 °C (residual measuring range)
Dimensions (H x W x D)	68 x 58 x 12 mm
Weight including battery	approx. 37 g

Delivery incl. button cell battery CR 2032 (3 V).

Type	Art. No.	Pack Qty.	€
white	**YE41.1**	1	12,40

Accessories:

Button cell battery CR 2032 (3 V)	**P858.1**	1 piece	5,35

Indoor/outdoor thermometer

By TFA-Dostmann.

- Simultaneous-display of inside and outside temperatures
- Save-function for min-/max-temperature readings (inside and outside)
- Reset-key for save-function
- Outdoor sensor with 3 m cord
- Desktop stand, wall fixture

Technical specifications:

Measuring range/resolution	Inside: -10.0 to +50.0 °C Outside: -50.0 to +60.0 °C
Accuracy	±1 °C
Dimensions (L x W x D)	105 x 65 x 20 mm
Weight	105 g

Delivery incl. 1.5 V Mignon battery.

Art. No.	Pack Qty.	€
AN34.1	1	14,55

Accessories:

Mignon battery/AA 1.5 V	**1022.2**	4 pieces	6,05

Electronic maxima-minima-thermometer with limit value alarm

By TFA-Dostmann. Simultaneous display of indoor and outdoor temperatures. Memory function for min/max values. **Outdoor temperature alarm with adjustable upper and lower limit values** (interval alarm only rings whenever the set temperatures have been exceeded or not reached). Outer probe with 1.5 m lead. Ideal for hanging or standing.

Technical specifications:

Measuring range/resolution	Indoor: -10.0 to +50.0 °C Outdoor: -50.0 to +70.0 °C
Accuracy	±1 °C (0 to +50 °C) ±2 °C (outside)
Dimensions (L x W x H)	110 x 70 x 20 mm
Weight	130 g

Delivery incl. Micro 1.5 V battery.

Indoor-/outdoor thermometer, officially calibrated

By Amarell. With display light and Min/Max-value control.
Simultaneous display of inside and outside temperatures. Outdoor sensor with approx. 3 m cord. Suitable for desktop or wall assembly.

Technical specifications:

Measuring range/resolution	Inside: 0,0 to +40 °C Outside: -50 to +70 °C
Accuracy	±1 °C
Dimensions (H x L x W)	55 x 20 x 80 mm

Delivery incl. official calibration certificate with test point at +4 °C and battery Micro 1.5 V.

Art. No.	Pack Qty.	€
EH47.1	1	141,90

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Temperature limiter for thermometer

By Dostmann. **Reference object for constant temperature measurement in refrigerators.** Avoids large temperature fluctuations, e.g. due to frequent opening of the refrigerator door. The sensor is inserted into one of the accurate-fitting holes and fixed in place with a screw. The reference object acts as a buffer and provides a homogeneous temperature distribution, because mass (and not air) is measured.
Suitable for sensors with ∅ of 3.5 mm, 4.2 mm and 5.0 mm.
Dimensions: W 60 x D 25 x H 25 mm.

Art. No.	Pack Qty.	€
PT43.1	1	23,15

Laboratory thermometers with limit alarm and Min/Max function

By Dostmann. Applications: measurements in refrigerators and deep freezers, storage of foodstuffs etc. Watertight housing (IP 65). Min/Max and Hold function. Audio and visual warning alarm when freely adjustable temperature limits are exceeded. Magnetic back for attachment to metal surfaces.

Technical specifications:

Model	**① Lab Basic**	**② Lab Pro**
Measuring range/resolution (°C)	-40.0 to +70.0	-40.0 to +200.0

Thermometer, digital

Thermometer with factory certificate

By Ludwig Schneider.

- Calibrated at -10 °C and +40 °C
- High measuring precision
- Min/max measured value storage with real time and date
- Limit alarm, audible and visual
- Storage of last threshold violation
- For exact temperature measurement with temperature brake (plastic bottle filled with ethylene glycol)

Technical specifications:

Measuring range/resolution	-50.0 to +70.0 °C
Accuracy	±0.3 °C
Sensor cable length	320 mm
Dimensions: Device (W x H x D) Plastic bottle (∅ x H)	 75 x 124 x 19 mm 19.5 x 40 mm
Weight	170 g

Delivery incl. temperature brake, factory certificate and AAA 1.5 V batteries.

Art. No.	Pack Qty.	€

Compact thermometer Mini-K

By Dostmann. For simple temperature measurement.
For connection with thermocouple probe, Type K.

- Waterproof enclosure (IP 65)
- Automatic switch-off after 15 min to prolong battery life
- Hold display
- With magnet for attachment to metal surfaces

Technical specifications:

Measuring range/resolution	-64.0 to +1370.0 °C
Accuracy	±1 % or 1 °C (larger value is valid)
Dimensions (L x W x D)	43 x 20 x 78 mm
Weight	41 g

Delivery incl. Cell battery CR 2032, 3 V.
Supplied without probe (please order separately).

Information on temperature measurement

There are various methods to make a temperature visible or readable:
Colour reaction (e.g. with colour change crayons), defined solid or liquid extension (e.g. glass thermometers) and electric signals (e.g. digital thermometers).
There are a number of sensor elements available to change the temperature values into electric signals.

Thermocouples (NiCr-Ni)
Thermocouples consist of two point welded wires of different metals.
The most common thermocouple is NiCr-Ni (Designation K).

Resistance sensors (Pt 100)
Here the resistance change of platin resistance, which is independent of temperature, is used. The multiplier resistor is driven with a constant current and the fall of voltage measured.

Thermistors (NTC)
Temperature measurement with thermistors is also based on a temperature-independent resistance change of the thermocouple. Unlike the Pt 100 thermometers, thermistors have a very negative temperature coefficient.

General rule
Thermocouple probes are fast and have a large measuring range.
Pt 100 and NTC probes are slower, but more precise.
There is a special probe for each application, e.g. insertion probe for measuring in plastic or pasty media.

Thermometer, digital

Temperature measuring device testo 108

By Testo. For fast, simple and precise temperature measurement, above all in the food industry (transport, storage, production, quality testing). Simple operation and handling through two self-explanatory key and a large display. Instrument and waterproof probe (IP 67).

Technical specifications:

Measuring range/resolution	-50.0 to +300.0 °C
Instrument accuracy	±0.5 °C (-30.0 to +70.0 °C) ±0.5 °C ±0.5 % of m.v. (outside)
Probe accuracy (incl. in delivery)	±0.5 °C (-40 to -20 °C) ±0.2 °C (-20 to +70 °C) ±0.5 °C (+70 to +125 °C) ±0.4 % of m.v. (+125 to +300 °C)
Housing dimensions (L x W x H)	140 x 60 x 24.5 mm
Probe dimensions, length /∅	85 / 4 mm
Measuring cycle	2 measurements per second
Battery type	3 x Micro/AAA 1.5 V
Weight	150 g

Delivery incl. standard penetration probe TE Type T, protective cover, calibration protocol and batteries.

Art. No.	Pack Qty.	€

125	4	**EL58.1**	1	123,65

Thermometer kit testo 110 with certificate

Delivery incl. thermometer testo 110 (Art. No. EL54.1), Immersion-/penetration probe (Art. No. EL57.1) and ISO-calibration certificate with three calibration points (-18 °C; 0 °C; +60 °C).

Type	Art. No.	Pack Qty.	€
Thermometer kit testo 110	**EL59.1**	1	289,20

Accessories:

Protective cover TopSafe	**EH74.1**	1	31,20
Transport case (for meter and probe)	**EH75.1**	1	40,85
E-Block 9 V battery	**1025.1**	1	4,85

Thermometer, digital

Precision thermometer testo 720

By Testo. For sophisticated measuring in the laboratory and industry.
- Acoustic alarm (adjustable limit values)
- Min/Max-value display
- Display light
- Ideal for laboratory work because the glass-sheated temperature probe is suitable for connection

Technical specifications:

Measuring range/resolution	-100.0 to +800.0 °C
Accuracy	±0.2 % of m. v. (+200 to +800 °C) ±0.2 °C (outside)
Working temperature	-20 to +50 °C
Dimensions (W x D x H)	64 x 40 x 182 mm
Weight	171 g

Delivery incl. E-Block-battery 9 V and calibrating protocol.
Supplied without probe (please order separately).

Art. No.	Pack Qty.	€
EH87.1	1	160,20

Temperature probes Pt 100 for testo 720

Measuring range -50 to +400 °C. Cord length approx. 1.2 m.

Laboratory probe, glass-sheathed (Cl. A)
Glass tube is removable. Resistant to aggressive media.

Length (mm)	∅ (mm)	Art. No.	Pack Qty.	€
200	6	**EH88.1**	1	106,45

Food probe (Cl. A)
Made of stainless steel. Pointed, robust. Watertight (IP 65).

Length (mm)	∅ (mm)	Art. No.	Pack Qty.	€
125	4	**EH89.1**	1	135,45

Immersion-/Penetration probes (Cl. A)
With chamfered tip. Waterproof.

Length (mm)	∅ (mm)	Art. No.	Pack Qty.	€
114	5	**EH90.1**	1	75,25

Surface probes (Cl. B)
Watertight. With widened measurement tip (∅ 9 mm).

Length (mm)	∅ (mm)	Art. No.	Pack Qty.	€
114	5	**EH91.1**	1	107,50

Accessories:

Protective cover TopSafe	**EH74.1**	1	31,20
Transport case (for meter and probe)	**EH75.1**	1	40,85
E-Block 9 V battery	**1025.1**	1	4,85

Calibrated precision thermometer testo 112, conformity assessed

By Testo. **Application range:**
- Suitable for certified measuring by public authorities, institutions and for expert reports
- For measuring product temperature in the food industry
- For routine operations in everyday work
- For check measurements during refrigerated transports

Properties:
- PTB-type testing
- Integrated self-check
- Acoustic alarm goes off immediately when limit values have been exceeded or under-run
- Display light
- Min/Max-values
- Declaration of conformity for device and sensor

Technical specifications:

Measuring range/resolution	-50.0 to +300.0 ° C
Accuracy	±0.2 °C (-50 to +200 °C) ±0.3 °C (outside)
Working temperature	-20 to +50 °C
Dimensions (W x D x H)	64 x 40 x 182 mm
Weight	171 g

Note: a new calibration law (MessEG) and new calibration regulations (MessEV) came into force in Germany on 01.01.2015. The previous initial calibration procedure has been be replaced by a new procedure, the so-called conformity assessment procedure. Instead of the certificate of calibration, a declaration of conformity is now issued by the equipment manufacturer and checked by a conformity assessment agency (e.g. Office of Weights and Measures). Equipment can, as before, be recalibrated after two years through any Office of Weights and Measures.

Delivery incl. Pt 100 Immersion-/Penetration probe (L 115 mm, ∅ 5 mm) with attached cable (cable length approx. 1.2 m), declaration of conformity and E-Block battery 9 V.

Allround-thermometer testo 925

By Testo. Robust thermometer for daily measuring. For connecting with thermocouple probes, Type K. Acoustic alarm goes off immediately when the set limits are either exceeded or under-run. Max/Min-value display. Hold-button. With display-light. **Transfer of measured data is possible via radio with optional radio probe and radio module.**

Technical specifications:

Measuring range	-50.0 to +1000.0 °C
Accuracy	±0.5 °C or 0.3 % of m.v. (-40 to +900 °C) ±0.7 °C or 0.5 % of m.v. (outside)
Resolution	0.1 °C (-50 to +199.9 °C) 1 °C (outside)
Working temperature	-20 to +50 °C
Dimensions (W x D x H)	64 x 40 x 182 mm
Weight	171 g

Delivery incl. E-Block-battery 9 V and calibration protocol.
Supplied without probe (please order seperately).

General information on calibration and calibrating meters

Meters with DAkkS Certificates of Calibration:
A DAkkS Certificate of Calibration is issued by a accredited testing agency (must be approved and is monitored by Deutsche Akkreditierungsstelle [German Accreditation Agency]). Meter meets national standard requirements and can be used in accordance with ISO 9000 Quality Assurance Standards.
Very low preset tolerance (lower than required for works certificate).

The user of DAkkS certified meters can therefore issue internal works certificates. This is particulary of advantage in the Quality Assurance Department of larger firms where measuring instruments used in the Production Department must be tested and calibrated at specific intervals.
Individual test points should be customized depending upon temperature ranges under measurement.

Meters with a Works Certificate of Calibration:
A works certificate of calibration is issued after carrying out a comparison measurement with a DAkkS calibrated meter.
Unit meets national standard requirements and can be used in accordance with **ISO 9000** Quality Assurance Standards.
Tolerance of measurement with works certificates is slightly higher than of a DAkkS certified unit. Individual test points should be customized depending upon temperature ranges under measurement.

Thermometer P300

By Dostmann. For measuring in liquid, paste-like and semi-solid media.
- **Fixed NTC penetration probe** with handle, cable length 1.2 cm
- Large backlit display
- Min/Max and hold function
- Plastic housing, food-safe and splash-proof
- Integrated sensor holder for single-hand operation

Technical specifications:

Measuring range	-40.0 to +200.0 °C
Resolution	0.1 °C
Accuracy	±0.5 °C (0 to 100 °C) ±1.5 °C (outside)
Measuring cycle	1 sec
Protection class	IP 54
Device dimensions (L x W x H)	130 x 65 x 25 mm
Sensor dimensions (L x ∅)	120 x 3.5 mm
Weight	240 g
Power supply	2 x Mignon batteries / AA 1.5 V

Delivery incl. batteries.

Compact thermometer P4000

By Dostmann. For measuring liquid gaseous and powdery media.
With Pt 100 four-conductor sensor technology.
- Plastic splash-proof and washable housing
- Stores min, max, hold and average values
- 1-point adjustment possible
- 2-line LCD display

Technical specifications:

Measuring range	-200 to +850 °C
Resolution	0.1 °C (-99.9 to +399.9 °C) 1 °C (outside)
Accuracy	±0.3 °C
Measurement data memory	20
Port	USB
Protection class	IP 54
Dimensions (L x W x H)	150 x 74 x 32 mm
Weight	217 g
Power supply	2 x Mignon/AA 1.5 V

Optional accessories (please order separately):
Windows software DE Graph and USB cable for online documentation.

Delivery incl. 2 batteries and test protocol.
Without measuring probe (please order separately).

1-channel data logger testo 184 series for temperature

By Testo. For monitoring temperature-sensitive products.
Model testo 184 T4 is specially for low temperatures (down to -80 °C).

- With alarm management:
  Adjustable min/max function and cumulative alarm
- The configuration file for logger programming is stored directly on the data logger (no software installation required)
- Automatic data output as PDF file via USB port
- Mobile readout via NFC

Technical specifications:

Model	① testo 184 T3	② testo 184 T4
Measuring range/resolution	-35.0 to +70.0 °C	-80.0 to +70.0 °C
Accuracy	±0.5 °C	±0.8 (-80.0 to -35.1) °C ±0.5 (-35.0 to +70.0) °C
Sensor type	NTC	Pt 1000
Display	yes	no
Measured values	40 000	
Measuring cycle	1 min to 24 h	
Protection class	IP 67	
Dimensions (W x D x H)	44 x 12 x 97 mm	
Weight	45 g	
Battery type	1 CR 2450 battery (3 V)	1 ER 2450 battery (3 V)

Delivery incl. battery and inspection report stored on logger.

Type	Art. No.	Pack Qty.	€

ER 2450 button cell battery (3 V)	**CXC7.1**	1	24,75

1-/2-channel mini data logger testo 174 for temperature and humidity

By Testo. For monitoring climatic conditions, for example in storage, in offices and in production areas.

- Memory for 16000 measured values
- With LCD display for current measured value (with model testo 174H display of the current temperature or humidity value), battery status as well as min/max values
- Optical limit alarm (freely selectable values)
- Windows compatible software (data logger programming, for outputting data, graphic and tabular display, printout of data) download software free of charge or order separately. USB interface required for communication between software and data logger.

Technical specifications:

Model	① 1-channel °C logger testo 174T	② 2-channel °C/RH logger testo 174H
Measuring ranges/resolution	-30.0 to +70.0 °C	-20.0 to +70.0 °C 0,0 to 100.0 % RH
Accuracy	±0.5 °C	±0.5 °C ±3 % RH (2 to 98 % RH)
Protection class	IP65	IP20
Measurement data memory	16000	
Measuring cycle	1 min to 24 h	
Dimensions (L x W x D)	60 x 40 x 20 mm	

Delivery incl. 2 x CR 2032 button cell batteries, wall attachment and calibration protocol. Please order USB interface for logger programming separately.

testo 175 series 1-/2-channel mini data logger for temperature and humidity

By Testo. Temperature monitoring of cooling and refrigeration rooms as well as long-term monitoring of working and storage areas.

- Memory with capacity for 1 million measured values
- With LCD display for current measured value (with model testo 175 H1 display of current temperature and humidity values), battery status as well as min/max values
- Optical limit alarm (freely selectable values)
- Long battery life using standard batteries
- Simple read-out of data via USB cable or using an SD card (if a USB cable or SD card is required, please order separately). Only data can be collected with the SD card (reprogramming is not possible).
- Windows-compatible software (logger programming, read-out of data, graphic and tabular display of data and printout of data) please download free of charge or order separately. An USB cable is required for communication between the software and logger.

Technical specifications:

Model	1-channel °C logger testo 175 T1	2-channel °C/rH logger testo 175 H1
Temperature		
Measuring range	-35 to +55 °C	-20 to +55 °C
Resolution/accuracy	0.1 °C /±0.5 °C	0.1 °C /±0.4 °C
Humidity		
Measuring range	-	0 to 100 % rel. hum.
Resolution/accuracy	-	1 % rH/±2 % rH (2 to 98 % rH)
Measured data storage	1 million readings	
Measuring cycle	10 s to 24 h	
Dimensions (H x W x D)	89 x 53 x 27 mm	149 x 53 x 27 mm
Protection class	IP 65	IP 54
Battery type	3 micro batteries 1.5 V	

Delivery incl. wall attachment, lock, calibration report and batteries.
Please order software and USB cables for logger programming separately.

LOG100 series 2/3-channel temperature/humidity data logger

By Dostmann. For quality control in the lab and in production, as well as monitoring storage and transport conditions.

- Memory for 60.000 measured values
- LCD display for indication of current measured value, battery status, min/max value and average value
- Limit alarm, audible and visual
- Integrated USB port
- Optionally available with Windows-compatible software (logger programming, data transfer, graphical and tabular representation of data) and external temperature sensor

Technical specifications:

Model	2-channel °C logger	2-channel °C cryogenic logger	3-channel °C/rF logger
Internal °C sensor:			
Measuring range/ resolution	-30.0 to +70.0	-10.0 to +70.0	-30.0 to +70.0
Accuracy	±0.5 (-20 to +50) ±0.7 (outside)	±0.3 (-20 to +50) ±0.7 (outside)	±0.5 (-10 to +40) ±1.0 (outside)
External °C sensor:			
Measuring range/ resolution	-50.0 to +125.0	-200.0 to +250.0	-50.0 to +125.0
Accuracy	±0.5 (0 to +40) ±1.0 (outside)	±0.5	±0.5 (0 to +40) ±1.0 (outside)
Internal rF sensor:			
Measuring range/ resolution	-	-	0.1 to 99.0
Accuracy	-	-	±3
Measuring cycle	1 s to 24 h		
Display operating range (°C)	-10 to +70		
Dimensions L x W x D (mm)	88 x 55 x 20		
Weight (g)	95		

Delivery incl. button cell battery CR 2032, 3 V.
Please order external temperature sensor (sensor dimensions L 40 mm, ∅ 3 mm, cable length 3 m) and logger programming software separately.

Type	Art. No.	Pack Qty.	€

KlimaLogg Pro thermal hygrometer with data logger and wireless sensor

By TFA-Dostmann. For monitoring temperature and humidity.

① **Thermal hygrometer**:
- Display of humidity and temperature values
- Max/Min display with time of day
- **Connectivity for up to 8 RF transmitters**
- Text display with fixed serial number or individual name allocation for stored transmitters
- Custom alarm limits can be set for all channels with audio or visual alarm indication
- Ring buffer with capacity for up to 50 000 datasets
- Datasets can be retrieved directly from the device and via PC
- Data transfer via USB wireless transceiver (range: up to 10 m)
- Windows-compatible data transfer software is available for download free of charge. This software is required for transferring data. Measured values can also be exported as a text file.
- Radio clock with date display
- Battery charge level indicator

Choose between the 2 wireless sensors:

② **Wireless °C/rel. humidity sensor type FS1**
Measuring range/resolution: -30.0 to +60.0 °C, 1 to 99 % rel. humidity
Accuracy: ±1 °C, ±3 % rel. humidity (30 to 75 % rel. humidity)
Range: max. 100 m (free-field)
Dimensions: H 160 x W 44 x D 23 mm
Delivery incl. 2 x 1.5 V Mignon/AA batteries.

③ **Wireless °C sensor with external probe type FS2**
Measuring range/resolution: -30.0 to + 60.0 °C
Accuracy: ±1 °C
Range: max. 100 m (free-field)
Dimensions: H 128 x W 40 x D 23 mm
With external probe (cable length 3 m).
Temperature is measured at the probe only
Delivery incl. 2 x 1.5 V Micro/AAA batteries.

Technical specifications:

Measuring range / resolution	Indoors 1 to +99.0 % rel. humidity Outdoors 1 to +99 % rel. humidity	Indoors -20.0 to +50.0 °C Outdoors -30.0 to +60.0 °C
Accuracy	±3 % rel. hum. (30 to 75 % rel. hum)	±1 °C
Measurement data memory	50 000 datasets	
Measuring cycle	Adjustable in increments of 1/5/10/15/30 min or 1/2/3/6 h	
Dimensions (W x H x D)	137 x 98 x 26 mm	

Delivery incl. USB wireless transceiver and 3 1.5 V Mignon/AA batteries.
Wireless sensors not included. Please order separately.
Please download Windows software free of charge.

Type	Art. No.	Pack Qty.	€

SterilDisk temperature data logger

By Dostmann. For monitoring and recording temperature data in the pharmaceutical and medical fields and in laboratories and food production plants (e.g. for sterilization and pasteurization).
- High temperature range up to 140 °C
- Watertight and pressure-tight up to 10 bar
- Measurement accuracy of ±0.2 °C in the calibrated range from +25 to +140 °C
- Housing made of food-safe steel AISI316L
- Please order Windows-compatible software and disk interface with USB cable (logger programming, data read-out, graphic and tabular representation, data printout) separately.
  Automatic calculation of F0, Z and N values possible

Technical specifications:

Measuring range/resolution	-20.0 to +140.0 °C
Accuracy	±0.2 °C (+25 to +140 °C) ±0.5 °C (outside)
Measurement data memory	20 200
Measuring cycle	≥1 s
Protection class	IP 68
Ambient pressure	up to 10 bar
Port	Disk interface NS
Dimension H x ∅	17.4 x 36 mm
Weight	80 g

Delivery incl. calibration certificate and button battery BR 1632A.
Please order disk interface with USB cable and software separately.

Type	Art. No.	Pack Qty.	€

Temperature monitoring system for smartphones

By Dostmann. For simple monitoring of temperature/humidity at any time and from any place. Call up the data via Internet-capable smartphones.

- For operation in a cable-based network (LAN) with Internet connection
- Data storage on a cloud
- Data access via free App (iOS 7.0 or Android™ 3.2 and higher)
- Smartphone with camera required to scan the QR code at the transmitters
- Individual assignment of transmitter names possible
- Extendible up to 50 transmitter per gateway
- Reception range for transmitters max. 100 m (free field)
- Freely settable alarm limit with notification in the case of an alarm
- Dimensions gateway: L 104 x W 40 x D 28 mm

Technical specifications:

Model	① °C transmitter	② °C/RH Profi transmitter
Internal °C sensor: Measuring range/resolution (°C) Accuracy (°C)	- -	-40.0 to +60.0 °C ±1
External °C sensor: Measuring range/resolution (°C) Accuracy (°C)	±30.0 to +60.0 ±1	-50.0 to +110.0 ±0.5
Internal RH sensor Measuring range/resolution (% RH) Accuracy (% RH)	- -	0.0 to 99.0 ±3 (30 to 80)
Cable length (cm)	100	150
Transmission interval to cloud	7.0 min Alerting in real-time	3.5 min Alerting in real-time
Data memory	90 days	18 months
Data archiving	-	Yes (1x weekly per email)
Display	-	yes
Power supply	2 x 1.5 V AAA	2 x 1.5 V AAA
Dimensions without holder L x W x D (mm) with holder L x W x D (mm)	 87 x 33 x 22 92 x 39 x 33	 129 x 41 x 35 135 x 83 x 61

Delivery incl. gateway unit with power pack, °C transmitter with external temperature sensor and network cable (RJ45). Please order batteries for the °C transmitter separately.

Wireless data logger Saveris 2

By Testo. Modern solution for temperature measurement and monitoring in storage, cooling and work rooms.

- Data transfer via WiFi
- Online data storage directly to cloud
- Temperature data can be retrieved and evaluated via Internet-compatible smartphones, tablets or PCs
- Logger configuration via the testo basic cloud (free access), no software installation required
- An e-mail alert is generated if limits are exceeded
- With display for reading current measurement data, limit violations and residual battery life

Model **Saveris 2-T1** with integrated NTC temperature sensor.
Model **Saveris 2-T3** with 2 connections for external TE temperature sensor (please order sensor separately).

Technical specifications:

Model	① Saveris 2-T1	② Saveris 2-T3	
Temperature sensor	internal	external	
		ECK2.1	**ECK3.1**
Measuring range/resolution (°C) Accuracy (°C)	-30.0 to +50.0 ±0.5	-40.0 to +220.0 ±1.5	-200.0 to +40.0 ±2.5
Measuring cycle (min)	15		
Measurement data memory	up to 3 months (ring buffer)		
Reports	manual (.pdf/.csv)		
Protection class	IP65	IP54	
Dimensions H x W x D (mm)	95 x 75 x 30.5		
Weight (g)	240		

Delivery incl. basic cloud access, micro USB cable, wall mount with lock, 4 Mignon 1.5 V batteries, calibration report.

Type	Art. No.	Pack Qty.	€

Non-contact temperature quick testers

By Testo.

① **Quicktemp 826-T2**

- For non-contact measuring without destroying the packaging
- For monitoring upper **or** lower limits with visual alarm
- **Laser spot marker** for marking the measuring point
- **Acoustic alarm** for upper/lower deviation

② **Quicktemp 826-T4 with nuclear temperature measurement**

- For non-contact measuring without destroying the packaging
- A thin, robust test prod also enables measurement of nuclear temperatures
- For monitoring upper **or** lower limits with visual alarm
- **Supplied with deep-frozen food borer**
- **Laser spot marker** for marking the measuring point
- **Acoustic alarm** for upper/lower deviation

Technical specifications: general (for both models)

Measuring range infrared	-50 to +300 °C
Resolution infrared	0.1 °C
Accuracy infrared	±1.5 °C (-20 to +100 °C) ±2 °C (outside)
Ratio measuring distance : spot	6 : 1
Emissivity	E = 0.95 (adjustable at 1.00)

Technical specifications:
Contact side with penetration probe for type 826-T4

Measuring range	-50 to +230 °C
Resolution	0.1 °C
Accuracy	±0.5 °C (-20 °C to +99 °C) ±1 °C or ±1 % of m.v. (residual range), the higher value being valid

Delivery incl. 2 batteries Micro 1.5 V, belt/wall attachment, watertight protective case Top Safe (IP 67).

Type	Art. No.	Pack Qty.	€
826-T2	**P855.1**	1	95,70

testo 104-IR multipurpose infrared and penetration thermometer

By Testo. Penetration thermometer combined with an infrared sensor for core and surface temperature measurements.

- Foldaway immersion/penetration probe
- 2-point laser mark for indicating the actual measurement spot
- Large LCD display for easy reading of measurement results

Technical specifications:

Immersion/penetration probe (NTC sensor type)	
Measuring range/resolution	-50.0 to +250.0 °C
Accuracy	±1 °C (-50.0 to -30.1 °C) ±0.5 °C (-30.0 to +99.9 °C) ±1 % of m.v. (outside)
Infrared sensor	
Measuring range/resolution	-30.0 to +250.0 °C
Accuracy	±2.5 °C (-30.0 to -20.1 °C) ±2.0 °C (-20.0 to -0.1 °C) ±1.0 °C or 1.5% of m.v. (outside)
Ratio measuring distance : measuring spot	10 : 1
Emmisivity/increments	0.10 to 1.00
General	
Protection rating	IP65
Dimensions (W x D x H)	48 x 21 x 281 mm (probe folded out) 48 x 21 x 178 mm (probe folded back)
Weight	197 g

Delivery incl. 2 micro 1.5 V batteries and calibration report.

Art. No.	Pack Qty.	€
XK00.1	1	117,20

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Infrared thermometers

①

②

① Mini-Flash infrared thermometer

By Dostmann. For non-contact measuring. Automatic hold-function for approx. 15 s. Lock-function for continuous use.

Technical specifications:

Measuring range/resolution	-33.0 to +220.0 °C
Accuracy infrared	±1.5 °C (0 to +50 °C) ±2.0 °C or 2 % (outside)
Ratio measuring distance : spot	1.3 : 1
Emissivity	E = 0.95 permanently set
Reaction infrared	approx. 500 ms
Working temperature	0 to +50 °C
Dimensions (L x W x D)	68 x 37 x 18 mm
Weight	25 g

Delivery incl. cellbattery CR 2032, 3 V.

Art. No.	Pack Qty.	€
Y400.1	1	35,45

Accessories:

Button cell battery CR 2032 (3 V)	**P858.1**	1 piece	5,35

② Scantemp 385 infrared thermometer

By Dostmann. For non-contact surface temperature measurement. **With spot laser for marking the measurement zone**. Backlight display. Lock function for continuous use.

Technical specifications:

Measuring range	-35.0 to +365 °C
Resolution	0.1 °C (-35 to 199.9) 1.0 °C (residual measuring range)
Accuracy	±2 °C to ±2 % (largest value applies)
Ratio measurement distance : measurement spot	12 : 1
Emissivity	E=0.95 to E=0.70 (switchable)
Dimensions (L x W x D)	167 x 64 x 34 mm
Weight	150 g

Delivery incl. 2 Micro 1.5 V batteries.

Art. No.	Pack Qty.	€
LY46.1	1	53,65

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

① ②

Infrared thermometers with thermocouple input Scantemp-series

By Dostmann.

① **Scantemp Pro 450**
- Measuring range Infrared max. +500 °C
- With circular-laser for marking measuring point
- **Input for thermocouple sensor NiCr-Ni (Type K)**
- Min/Max/Hold-function
- Differential and mean value storage
- Optical and acoustic alarm when limit value has been exceeded
- LCD-indicator for simultaneous display of reading and min/max- or limit values
- Adjustable emission ratio from 0.10 to 1.00
- With backgroung lighting

Delivery incl. 2 batteries Micro 1.5 V.
Comes without thermocouple sensor, please order separately if needed.

② **Scantemp 490**
Like model Scantemp 450, **however comes with double target-laser which indicates the real measuring field** for each measured distance. Measuring range infrared max. +1000 °C.

Technical specifications:

	Infrared	Thermocouple input
Measuring range	Scantemp Pro 450: -60.0 to +500 °C Scantemp 490: -60.0 to +1000 °C	-64.0 to +1370 °C
Resolution	0.1 °C (-33.0/-60.0 to +199.9) 1 °C (outside)	
Accuracy	±2.0 °C or 2 % of higher value applies	±1.0 °C or 1 % of higher value applies
Ratio Measured distance : Measured spot	Scantemp Pro 450: 11 : 1 Scantemp 490: 50 : 1	
Dimensions (W x D x H)	Scantemp Pro 450: 39 x 79 x 175.2 mm Scantemp 490: 45 x 145 x 215 mm	
Weight	Scantemp Pro 450: 180 g Scantemp 490: 380 g

NEW

Infrared thermometer testo 835-T1 with thermoelement input

By Testo. Non-contact measurement from a safe distance.

- Reliable IR measurement up to 600 °C with display of min/max values
- Four-point laser indicates the exact measuring range, and thus prevents incorrect measurements
- 50:1 lens allows precise measurements at a great distance (5 m distance = 10 cm measured surface)
- Adjustable emission level table (0.10 to 1.00) allows the measurement of a variety of surfaces
- Integrated emission level (stores 20 values) allows the fast selection of the correct emission level table for the relevant surface
- With freely adjustable alarm management upper and lower levels; acoustic and visual signals indicate if a limit value is exceeded
- Stores up to 200 measurement values, evaluation using software supplied
- Illuminated display for measurements in dark environments
- Input for thermoelement probe present, TE type K-probe (miniature type K connector) please order separately

Technical specifications:

Measuring range	-35.0 to +600.0 °C
Resolution	0.1
Accuracy IR	±2.5 °C (-30.0 to -20.1 °C) and ±1 digit ±1.5 °C (-20.0 to -0.1 °C) and ±1 digit ±1.0 °C (0 to +99.9 °C) and ±1 digit ±1 % of m.v. (outside) and ±1 digit
Accuracy TE type K	±(0.5 °C + 0.5 % of m.v.) and ±1 digit
Measuring distance : measuring spot ratio	50:1
Power supply	3 x Mignon/AA 1.5 V
Dimensions (W x D x H)	63 x 166 x 193 mm
Weight	514 g

Delivery incl. PC software, calibration protocol and batteries.

114	5	**EH78.1**	1	40,85

Food probe (Cl. 2)
Made of stainless steel. Sharp, robust. Waterproof (IP 65).
Measuring range -60 to +400 °C.

Length (mm)	∅ (mm)	Art. No.	Pack Qty.	€
125	4	**EH79.1**	1	74,20

Surface probe (Cl. 2)
For flat surfaces. Waterproof. With widened measuring tip (∅ 6 mm). Measuring range: -60 to +400 °C.

Length (mm)	∅ (mm)	Art. No.	Pack Qty.	€
115	5	**EH80.1**	1	58,05

Surface probe (Cl. 2)
For on-flat surfaces. Waterproof and fast-reacting.
With spring thermoelement ribbon (measuring tip: ∅ 12 mm).
Measuring range: -60 to +300 °C.

Length (mm)	∅ (mm)	Art. No.	Pack Qty.	€
115	5	**EH81.1**	1	119,35

Insertion measuring tip (Cl. 1)
Flexible. Measuring range -200 to +1000 °C.
Without handle and connecting cable (please order separately).

Length (mm)	∅ (mm)	Art. No.	Pack Qty.	€
500	1.5	**EH82.1**	1	26,90

Accessories:

Handle with connecting cable, cable length 1.2 m, suitable for all K-type probes	**EH83.1**	1	70,95

Precision hygrometer

Hygrometer and thermometer. For measuring humidity, dewpoint, steam pressure. Measuring range thermometer: -30 to +50 °C.
Height 250 mm, ∅ 100 mm, weight 192 g.

Art. No.	Pack Qty.	€
1908.1	1	62,05

Thermohygrometer

By TFA-Dostmann. Max/min value monitoring. Wall or table mount.

Technical specifications:

Measuring range/ resolution	20 to 99 % RH	-20.0 to +50.0 °C
Accuracy	±4 % RH (35 to 75 % RH), ±5 % RH (outside)	±1.0 °C (0 to +40 °C) ±1.5 °C (outside)
Dimensions (L x W x D)	104 x 104 x 13 mm	
Weight	50 g	

Delivery incl. cell battery V 2032 GA, 3 V.

Art. No.	Pack Qty.	€
NA63.1	1	20,35

Accessories:

Button cell battery CR 2032 (3 V)	**P858.1**	1 piece	5,35

Thermohygrometer with alarm-LED

By Dostmann. Robust meter for measuring room temperature in laboratories, production and storage areas etc.

- Quick responding capacitive humidity sensor
- Dew point calculation (td)
- Max-/Min-function
- **LED-alarm indicates when humidity limit value has been exceeded**
- Battery life app. 1000 h at permanent run

Technical specifications:

Measuring range/resolution	0.0 to 99.0 % RH	-40.0 to +70.0 °C
Accuracy	±3.5 % RH (20 at 80 % RH) ±4 % RH (outside)	±0.5 °C
Dimensions (L x W x H)	105 x 105 x 44 mm	
Weight	125 g	

Delivery incl. 2 Micro 1.5 V batteries.

Art. No.	Pack Qty.	€
CK97.1	1	47,55

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Thermohygrometer

By TFA-Dostmann. Max/min value monitoring.
Ideal for desktops or hanging.

Technical specifications:

Measuring range/ esolution	+10 to +99 % RH	-10.0 to +60.0 °C
Accuracy	±5 % RH	±1 °C
Dimensions (L x W x D)	110 x 95 x 20 mm	
Weight	171 g	

Delivery incl. battery Micro 1.5 V.

Art. No.	Pack Qty.	€
Y401.1	1	25,30

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Indoor-/outdoor thermohygrometer

By TFA-Dostmann. **With °C- and RH-outdoor sensor** (cable length approx. 1.5 m). Simultaneous display of °C- and RH-values for inside and outside. Max-/Min-function. Ideal for desktop or wall assembly.

Technical specifications:

Measuring range/resolution	10 to 99 % RH	-10.0 to +60.0 °C
Accuracy	±5 % RH	±0.5 °C
Dimensions (L x W x D)	110 x 101 x 20 mm	
Weight	185 g	

Delivery incl. Micro 1.5 V battery.

Art. No.	Pack Qty.	€
HH28.1	1	37,60

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Thermohygrometers

Thermohygrometer with jumbo-display

By Amarell. Large display (W 79 x H 66 mm) for air humidity, temperature and clock (24-h-display with alarm clock). Memory for min/max-values. Daily memory reset and freezing point alarm (alarm at outdoor temperature ≤0 °C) can be activated. Removable temperature outdoor sensor with 3 m cable. Suitable for desk top or wall attachment.

Technical specifications:

Measuring range/resolution	20 to 99 % RH	Indoor 0.0 to +50.0 °C Outdoor -50.0 to +70.0 °C
Accuracy	±3 % RH	±1.0 °C
Dimensions (L x W x D)	110 x 98 x 21 mm	

Delivery incl. battery Micro 1.5 V.

Art. No.	Pack Qty.	€
AY02.1	1	42,70

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Thermohygrometer testo 623 with history function for measured values

By Testo.

- The large display shows the current and past temperature and humidity values as well as the date and time
- Selection option for temperature or humidity histogram
- Bar graph display of measured values over the last hour (for 5 min measuring cycle), 2 hours (for 10 min measuring cycle), 12 hours (for 1 h measuring cycle), 24 hours (for 2 h measuring cycle) or 12 days (for 24 h measuring cycle)
- Optical alarm (limit freely selectable)
- Min/max function
- Use as desktop or wall-mount unit

Technical specifications:

Measuring range/resolution	0.0 to 100.0 % RH	-10.0 to +60.0 °C
Accuracy	±2 % RH at +25 °C (10 to 90 % RH) ±3 % RH (outside)	±0.4 °C
Operating temperature	-10 to +60 °C	
Dimensions (L x W x D)	185 x 105 x 36 mm	
Weight	240 g	

Delivery incl. calibration protocol and 4 Mignon 1.5 V batteries.

Art. No.	Pack Qty.	€
LY99.1	1	162,35

Accessories:

Mignon battery/AA 1.5 V	**1022.2**	4 pieces	6,05

Thermohygrometer testo 608-H1/H2

By Testo. Ideal for monitoring room temperature and dew point in storage and clean rooms, laboratories, etc.

- Simultaneous display of **humidity and temperature**
- Dew point calculation td
- Max/min value monitoring
- Humidity sensor is insensitive to dew
- Ideal for desktops or hanging
- **Testo 608-H2 includes LED alarm which indicates when limit has been exceeded**

Technical specifications:

Model	testo 608-H1	testo 608-H2
Measuring range/resolution	+10.0 to +95.0 % RH 0.0 to +50.0 °C -20.0 to +50.0 °C td	+2.0 to +98.0 % RH -10.0 to +70.0 °C -40.0 to +70.0 °C td
Accuracy	±3 % RH ±0.5 °C	±2 % RH ±0.5 °C
Working temperature	0 to +50 °C	-10 to +70 °C
Dimensions (W x H x D)	120 x 89 x 40 mm	

Hygrometer testo 608-H1
Delivery incl. 9 V block battery.

Art. No.	Pack Qty.	€
X226.1	1	74,20

Alarm hygrometer testo 608-H2
Delivery incl. calibrating protocol and battery.

Art. No.	Pack Qty.	€
X227.1	1	107,50

Accessories:

E-Block 9 V battery	**1025.1**	1 piece	4,85

Pocket thermohygrometer testo 610

By Testo.
- With display light
- AUTO-OFF function saves batteries, can be switched off
- Min/Max function, hold function
- Dewpoint calculation (td)

Technical specifications:

Measuring range/resolution	0.0 to 100.0 % RH	-10.0 to +50.0 °C
Accuracy	±2.5 % RH (5.0 up to 95.0 % RH)	±0.5 °C
Dimensions (L x W x H)	119 x 46 x 25 mm	
Weight	250 g	

Delivery incl. wrist strap, belt pouch, protective cap, calibration protocol and 2 batteries Micro 1.5 V.

Art. No.	Pack Qty.	€
HY44.1	1	129,00

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Humidity sticks testo 605-H1

By Testo. Precise humidity sensor with long durability. With calculation of dew point. Sensor is insensitive to dew. AUTO-OFF-function (10 mins). With pivotable display.

Technical specifications:

Measuring range/resolution	5.0 to 95.0 % RH	0.0 to +50.0 °C
Accuracy	±3 % RH	±0.5 °C
Dimensions (L x W x D)	180 x 37 x 36 mm	

Delivery incl. mounting clip and 3 batteries Micro 1.5 V.

Type	Art. No.	Pack Qty.	€
Humidity stick	**P302.1**	1	95,70
Humidity stick with ISO Certificate of Calibration, 75.3 % RH	**P303.1**	1	192,45

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Thermohygrometer Dewpoint Pro

By Dostmann. Robust meter for measuring room climate in laboratories, buildings, etc.
- Fast-response capacitive humidity sensor (measuring cycle 1 s)
- Dew point calculation (td)
- Max/Min- and hold-function
- IP54-splashproof
- Battery life app. 1000 h at permanent run

Technical specifications:

Measuring range/resolution	0.0 to 99.0 % RH	-40.0 to +70.0 °C
Accuracy	±3 % RH (10 to 90 % RH) ±4 % RH (outside)	±0.5 °C
Dimensions (L x W x H)	170 x 50 x 17 mm	
Weight	100 g	

Delivery incl. 2 batteries, Micro 1.5 V.

Art. No.	Pack Qty.	€
CK09.1	1	70,85

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Hygro-thermometer

Precise, compact thermometer with simultaneous display of humidity and temperature. Two humidity reference cells 33 and 75 % RH enable monitoring and calibration. Also features min/max. display. Automatic switch-off.

Technical specifications:

Measuring range/resolution	0.0 to 99.8 % RH	-16.0 to +50.0 °C
Accuracy	±3 % RH	±1 °C
Dimensions (L x W x H)	175 x 42 x 16 mm	

Delivery incl. sturdy case, two reference cells and batteries.

Art. No.	Pack Qty.	€
L895.1	1	251,55

Accessories:

Button cell battery CR 2032 (3 V)	**P858.1**	1 piece	5,35

Precision hygrometer P770

By Dostmann. **For analysing relative and absolute humidity, temperature, dew-point and flow.** Integrated calibration function for easy compensation of sensor tolerances. **With two sensor connections.** Storage of max-, min-, hold- and average values. USB-Online-PC-interface. Can be battery or wall socket operated.
Dimensions: L 200 x W 93 x D 44 mm.

Technical specifications:

Measuring range/resolution	
Humidity Pt 100 Flow	0.0 to 100.0 % RH -200.0 to +850.0 °C 0.00 to 40.00 m/s
Accuracy	
Humidity Pt 100 Flow	±1.5 % RH ±0.1 °C (-100 to +200 °C) / ±0.1 % of m.v. (rest) 1 % of final value

Delivery incl. battery 9 V block. Comes without probe and power pack (please order separately).

Art. No.	Pack Qty.	€
X732.1	1	354,75

Accessories:

E-Block 9 V battery	**1025.1**	1 piece	4,85
Power supply for P700-series	**H198.1**	1 piece	32,20

Accessories for precision hygrometer P770

With cable, length 1 m.

Multi-purpose probe
For measuring humidity and temperature.
Measuring ranges: 0 to 100 % RH; -30 to +80 °C.

Length (mm)	∅ (mm)	Art. No.	Pack Qty.	€
120	20	**X825.1**	1	174,15

Flow sensor
For air and gases. Measuring range: 0.3 to 20 m/s.

Length (mm)	∅ (mm)	Art. No.	Pack Qty.	€
175	22	**X731.1**	1	779,40

Temperature sensor Pt 100
For measuring in liquid, gaseous and powdery media.
Measuring range -50 to +350 °C.

Length (mm)	∅ (mm)	Art. No.	Pack Qty.	€
150	3	**X722.1**	1	80,65
300	3	**X723.1**	1	86,00

Thermohygrometer P330

By Dostmann.
Robust hand-held meter for determining temperature and humidity.
- Capacitance humidity sensor
- Max/Min- and hold function
- Integral sensor holder
- Display background lighting

Technical specifications:

Measuring range/resolution	0 to 99 % RH	-40.0 to +70.0 °C
Accuracy	±3 % RH	±0.5 °C
Max. operating temp.	-40 to +70 °C	
Dimensions (L x W x H)	130 x 70 x 25 mm	
Weight	130 g	

Delivery incl. 2 batteries Mignon/AA 1.5 V.

Art. No.	Pack Qty.	€
AH55.1	1	110,75

Accessories:

Mignon battery/AA 1.5 V	**1022.2**	4 pieces	6,05

Thermohygrometer testo 625

By Testo. With integral capacitive humidity sensor head for measuring air humidity and temperature. Two row display for indicating relative humidity or dewpoint as well as temperature. The humidity sensor head can be removed when measuring inacessible places and attached to the handle with sensor lead (please order separately). **Further cordless measurement transfer to the meter is possible via radio handle and radio module (please order separately)**.

- Min/Max-values
- Hold-button for retaining measured value
- Display light
- Auto-Off function

Technical specifications:

Measuring ranges/resolution	0.0 to 100.0 % RH	-10.0 to +60.0 °C
Accuracy	±2.5 % RH (+5 to +95 % RH)	±0.5 °C
Working temperature	-20 to +50 °C	
Dimensions (W x D x H)	64 x 40 x 182 mm	
Weight	195 g	

Delivery incl. attachable humidity sensor head, E-Block-battery 9 V and calibrating protocol.

Art. No.	Pack Qty.	€
EH97.1	1	213,95

Accessories for Thermohygrometer testo 625

Handle for attachable humidity sensor head.
Delivery incl. sensor lead (cord length approx. 1.2 m).

Type	Art. No.	Pack Qty.	€
Handle for humidity sensor head	**EH98.1**	1	44,10
Accessories:			
Protective cover TopSafe	**EH74.1**	1	31,20
E-Block 9 V battery	**1025.1**	1	4,85

Radio module and radio handle for testo 625

Radio module for cordless transfer of measured data
Frequency 869.85 MHz FSK.
Please order radio handle separately.

Type	Art. No.	Pack Qty.	€
Radio module	**EH84.1**	1	40,85

Radio handle, technical specifications:

Measuring cycle	0.5 or 10 sec, adjustable on handle
Range	max. 20 m (open air test site)
Battery type	2 x Micro/AAA 1.5 V batteries

Type	Art. No.	Pack Qty.	€
Radio handle incl. batteries	**EH85.1**	1	96,75
Accessories:			
Battery Micro/AAA 1,5 V	**1021.2**	4	6,40

General information on calibration and calibrating meters

Meters with DAkkS Certificates of Calibration:
A DAkkS Certificate of Calibration is issued by a accredited testing agency (must be approved and is monitored by Deutsche Akkreditierungsstelle [German Accreditation Agency]). Meter meets national standard requirements and can be used in accordance with ISO 9000 Quality Assurance Standards.
Very low preset tolerance (lower than required for works certificate).

The user of DAkkS certified meters can therefore issue internal works certificates. This is particulary of advantage in the Quality Assurance Department of larger firms where measuring instruments used in the Production Department must be tested and calibrated at specific intervals.
Individual test points should be customized depending upon temperature ranges under measurement.

Meters with a Works Certificate of Calibration:
A works certificate of calibration is issued after carrying out a comparison measurement with a DAkkS calibrated meter.
Unit meets national standard requirements and can be used in accordance with **ISO 9000** Quality Assurance Standards.
Tolerance of measurement with works certificates is slightly higher than of a DAkkS certified unit. Individual test points should be customized depending upon temperature ranges under measurement.

Thermohygrometers

Precision thermohygrometer HygroPalm 22

By Rotronic. For determining relative humidity and temperature
- Also for measuring equilibrium moisture content and temperature in powders and granulates (only with penetration probe Pro)
- 1-point probe-adjustment via buttons
- With display light
- Battery control
- Casing material: ABS

Technical specifications:

Measuring range/resolution	0.0 to 100.0 % RH	-10.0 to +200.0 °C
Accuracy	±1.5 % RH	±0.3 K
Dimensions (L x W x D)	196 x 72 x 35 mm	
Weight	200 g	

Delivery incl. 9 V block battery. Without measuring probe, calibrating device and humidity standard, please order separately.

Art. No.	Pack Qty.	€
KX08.1	1	316,05

Accessories for thermohygrometer HygroPalm 22

Temperature sensor HC2A-S
Application areas: Indoor temperature control, temperature control during storage etc. With polyethylene filter as sensor protection. Measuring ranges: 0 to 100.0 % RH, -50.0 to +100.0 °C.

Type	Art. No.	Pack Qty.	€
Length 108 mm, ∅ 15 mm	**KX05.1**	1	282,75

Penetration probe, Basic
For measurement in dustfree bulk and building materials such as concrete, brick etc. Also suitable for corn, wheat and granulates. Not suitable for powdery substances. Measuring ranges: 0 to 100.0 % RH, -40.0 to +85.0 °C. With handle and cable (Length 2 m).

Type	Art. No.	Pack Qty.	€
Length 200 mm, ∅ 5 mm	**KX06.1**	1	703,05

Penetration probe Pro
Robust probe for measuring in dusty bulk materials such as flour, sugar and building materials like concrete, brick etc. With steel sinter filter. Measuring ranges: 0 to 100.0 % RH, -40.0 to +85.0 °C. With handle and cable (Length 2 m).

Type	Art. No.	Pack Qty.	€
Length 280 mm, ∅ 10 mm	**KX07.1**	1	780,45

Mini material humidity meter, HumidCheck

By Dostmann. With measurement scale for building material and wood. Automatic switch-off. Easy to operate: Remove protective cap and stick measuring electrodes into object to be measured.
With temperature display.

Technical specifications:

Measuring range/resolution	Wood Building material	6 to 42 % 0.2 to 2.0 %
Accuracy	Wood Building material	±2 % (<30 %) ±4 % (>30 %) ±0.1 % (<1.4 %) ±0.2 % (>1.4 %)
Dimensions (W x D x H)	40 x 20 x 80 mm	
Weight	50 g	

Delivery incl. wrist strap and 4 x1.5 V button cell batteries.

Art. No.	Pack Qty.	€
KT96.1	1	26,90

Accessories:

Cell battery V 13 GA (1.5 V)	**1938.1**	1 piece	4,85

Material hygrometer

By Dostmann. For measuring moisture in wood and buildings, e.g. for derived timber products, veneer, plaster, stone floors, paperboard etc. With graphic measuring scale for both parameters. Easy to operate: Remove the protective cap and stick the electrode into the object to be measured.

Technical specifications:

Measuring range	Wood: 6 to 44 % building material: 0.2 to 2.0 %
Accuracy:	Wood: ±1 % building material: ±0.05 %
Dimensions (W x D x H)	40 x 32 x 130 mm
Weight	100 g

Delivery incl. 3 button cell batteries CR 2032, 3 V.

Art. No.	Pack Qty.	€
EX62.1	1	64,45

Accessories:

Button cell battery CR 2032 (3 V)	**P858.1**	1 piece	5,35

Weather station

For inside measurements only. With thermometer, hygrometer and barometer. Round, with plastic case, ∅ 160 mm. Weight approx. 180 g. Accuracy: hygrometer ±5 %, temperature ±1 °C, barometer ±5-10 %.

Art. No.	Pack Qty.	€
A889.1	1	32,20

Weather station

For inside and outside. With thermometer, hygrometer and barometer. Stainless steel case, ∅ 160 mm. Weight approx. 440 g. Accuracy: barometer ±5-10 %, thermometer ±1 °C, hygrometer ±5 % RH.

Art. No.	Pack Qty.	€
Y246.1	1	66,65

Climate centre

For inside and outside. With hygrometer, barometer and thermometer. Stainless steel case. Dimensions: W 95 x H 280 x D 18 mm, display instruments ∅ 70 mm, weight 380 g.

Art. No.	Pack Qty.	€
X257.1	1	48,35

Satellite-supported meteorological radio station Galileo Plus

By TFA-Dostmann. Regional weather forecasting for 50 different areas in Germany. The meteorological radio stations identify the correct weather region automatically. Data is transmitted several times a day via satellite over a special radio network in 466 MHz frequency range.

- Weather forecast for today and the next 3 days
- Forecast with symbols (36 different weather symbols) for the 4 times of the day (morning, afternoon, evening, night)
- Indication of the highest and lowest temperatures expected for each day
- Transmission of local outside temperature (measuring range -40.0 to +60.0 °C) and air humidity (measuring range 1 to 99 % RH) via wireless outer sender (868 MHz) with max. range 100 m (free field)
- Outside sensor indicates either the current temperature or air humidity. Dimensions of sensor: L 40 x W 130 x D 25 mm
- Clock with alarm and date
- Dimensions of receiver: L 121 x W 131 x D 40 mm

Delivery incl. Receiver with 2 batteries Baby/C 1.5 V, sensor with 2 batteries Mignon 1.5 V.

Art. No.	Pack Qty.	€
HT61.1	1	73,10

Accessories:

Mignon battery/AA 1.5 V	**1022.2**	4 pieces	6,05
Baby/C 1.5 V battery	**1023.2**	2 pieces	4,85

Digital wireless rain gauge Monsun

By TFA-Dostmann. For wireless transmission of precipitation amount (up to 9999 mm) and ambient temperature (max. 30 m range in open air).

- Display of precipitation during the previous hour, 24 hours and total precipitation (since last reset), including time and date of storage
- Display of precipitation amount in a bar chart, the previous 7 days, 7 weeks or 7 months can be successively displayed
- Audible and visual alarms at onset of rainfall
- Max/Min function for interior and exterior temperature
- Programmable temperature alarm for interior and exterior
- Trend arrow for ambient temperature
- Self-draining rainwater tank
- Wall or table mountable receiver.

Technical specifications:

Measuring range	Precipitation amount	0 to 9999 mm
	Exterior temperature	-50 to +70 °C
	Interior temperature	-10 to +50 °C
Dimensions	Receiver unit	W 94 x D 25 x H 122 mm
	Transmitter unit	∅ 132 x H 160 mm
Power supply	Receiver unit	3 1.5 V batteries
	Transmitter unit	2 1.5 V batteries

Delivery incl. rainwater tank (transmitter unit) and batteries.

Art. No.	Pack Qty.	€
XA41.1	1	42,90

Accessories:

Spare exterior transmitter	**XH13.1**	1 piece	19,30
Mignon battery/AA 1.5 V	**1022.2**	4 pieces	6,05

① Pocket absolute pressure gauge, testo 511

By Testo.

- Display-light
- AUTO-OFF function saves batteries, can be switched off
- With barometric levelling
- Min/Max-function
- Tube connections for ID 4 and 6 mm

Technical specifications:

Measuring range/resolution	300.0 to 1200.0 hPa
Accuracy	±3.0 hPa
Units	hPa, mbar, Pa, mmH_2O, mmHg, inH_2O, inHg, psi, m, ft
Max. operating temperature	0 to +50 °C
Dimensions (L x W x D)	119 x 46 x 25 mm
Weight	255 g

Delivery incl. wrist strap, belt bag, protection cap, calibration protocol and 2 batteries Micro 1.5 V.

Art. No.	Pack Qty.	€
HY43.1	1	160,20

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

② Pocket differential pressure gauge testo 510

By Testo. For measuring low differential pressures (e.g. checking filter permeability), gasflow pressure measurement etc.

- With display light
- AUTO-OFF function saves batteries, can be switched off
- With temperature compensation
- Min/Max function, hold function
- With magnets on back for free-hand operation
- Tube connections for ID 4 and 6 mm

Technical specifications:

Measuring range/resolution	0.00 to 100.00 hPa
Accuracy	±0.03 hPa (0 to 0.30 hPa) ±0.05 hPa (0.31 to 1.00 hPa) ±(0.1 hPa + 1.5 % of m.v.) (1.01 to 100 hPa)
Units	hPa, mbar, Pa, mmH_2O, mmHg, inH_2O, inHg, psi
Max. operating temperature	0 to +50 °C
Dimensions (L x W x D)	119 x 46 x 25 mm
Weight	255 g

Delivery incl. silicone rubber connecting hoses (2 x 20 cm), wrist strap, belt pouch, protective cap, calibration protocol and 2 batteries Micro 1.5 V.

Art. No.	Pack Qty.	€
HY42.1	1	138,70

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Carbon dioxide meter Air CO_2ntrol 3000

By Dostmann. For monitoring the CO_2-concentration in buildings e.g. schools, universities and all public facilities.

- Case made of ABS plastic
- **Integrated 24-h data loggers** with READ function (measured values can be retrieved via display) and preset 30-min storage cycle
- Acoustic alarm goes off when a freely set CO_2-value is exceeded
- Battery or outlet operation (Battery life approx. 48 operating hours)

Technical specifications:

	Carbon dioxide	Temperature
Measuring range	0 to 3000 ppm	0 to +50.0 °C
Resolution	1 ppm (0 to 1000 ppm) 5 ppm (1001 to 2000 ppm) 10 ppm (2001 to 3000 ppm)	0.1 °C
Accuracy:	±50 ppm or 5 % (larger value is valid)	±1 °C or ±1 % (larger value is valid)
Dimensions (L x W x D)	165 x 80 x 23 mm	
Weight	600 g	
Current	230 V, 50/60 Hz	

Delivery incl. Power unit and 4 batteries Mignon 1.5 V.

Art. No.	Pack Qty.	€
KL61.1	1	223,60

Accessories:

Mignon battery/AA 1.5 V	**1022.2**	4 pieces	6,05

Carbon dioxide measuring device CP11

By Rotronic. Monitors CO_2 concentration, relative humidity and temperature.

- Integrated measured value memory and real-time clock
- Audible CO_2 alarm
- Maximum, minimum and average value display
- Calculates the dewpoint (TP) and wet bulb temperature (FKT)
- Large backlit display
- Adjustable auto power off function
- Logger programming, data transfer and representation with Windows compatible software
- Mini USB interface

Technical specifications:

Measuring range/resolution	
CO2	0 to 5 000 ppm
Humidity	0.10 to 99.95 % rel. hum.
Temperature	-20 to +60 °C
Accuracy	
CO_2	±30 ppm, ±5 % of the measured value
Humidity	2.5 % rel. hum. (10 to 90 % rel. hum)
Temperature	±0.3 K
General notes	
Measurement data memory	18,000 values with time stamp, automatic recording (ppm, % rF, °C) 99 single values with time stamp, manual recording (ppm, % rF, °C, TP, FKT)
Battery lifetime	approx. 50 h
Dimensions incl. sensor (H x W x D)	234 x 77 x 42 mm
Weight	290 g

Delivery incl. SW2.1 software, mini USB data cable, storage bag and 4 1.5 V Mignon batteries.
Please order mains adapter separately.

Standard colour selection fan RAL K5

With **213 colour cards**, with a dull finish. Contains colour register RAL 840-HR, coding colours RAL-F 14 and colours RAL-F 81. Ideal for exact determination of colour tone in paper and TLC chromatography, and to determine colours of chemicals, crystals and natural dyes for textile and food colouring.

Art. No.	Pack Qty.	€
0426.1	1	55,85

Rotilabo®-odour strips

For liquids. Made of filter carton 240 g/m². 5 blocks = 300 strips.
Dimensions: W 6 x L 135 mm in blocks of 60 strips.

Art. No.	Pack Qty.	€
1679.1	5	16,70

OZONE test sticks

Simple test for analysis of the OZONE-content in the air.
Test sticks should be placed in a wind-sheltered area and compared to a scale after 10 minutes.

Analysis	O_3
Scale graduation	<90 / 90-150 / 150-210 / >210 µg/m³
Colour change	from white to brown

Art. No.	Pack Qty.	€
L828.1	12	18,25

Test units

Quick test sticks Aquadur®

Ideal for semi-quantitative evaluation of **water mineral content (total hardness).** Suitable as a fast first test of hardness values. Measuring range from 0 °d to over 25 °d. Division into the following degrees of hardness: <3 °d, >5 °d, >10 °d, >15 °d, >20 °, >25 °d. Test stick is dipped into the water sample. The colour changes and hardness can be evaluated after 1 min by comparing it with the supplied scale.
Attention: Test paper should not be touched with fingers.
One pack contains 100 test sticks 6 x 95 mm.
Conversion: 1 °d = 1.8 °f = 1.25 °e = 17.8 mg/l $CaCO_3$

Art. No.	Pack Qty.	€
C725.1	100	23,60

Oil test papers

For speedy detection of oil in water and/or soil. The pale blue paper changes colour to dark blue upon contact with hydrocarbons, especially benzine, fuel oil, lubricating oil, etc.

Technical specifications:

Substance	Colour reactions just visible (mg/l water)	Colour reactions clearly visible (mg/l water)
Petroleum ether (bp. 40-80 °C)	250	400
Motor gasoline (super)	10	25
Fuel oil EL	5	10
Lubricating oil	1	5

Art. No.	Pack Qty.	€
L832.1	100	25,95

Water hardness kit

Testing reagent is added drop by drop to 5 ml water sample until colour changes. Each drop equals 1 °dH. Pack with 2 x 15 ml reagent.

Warning H226-H319-H336

Art. No.	Pack Qty.	€
0519.1	2 x 15 ml	19,90

Test papers

By Macherey-Nagel. For qualitative determination of ions and chemical compounds. The test paper changes colour above a specific detection limit.

Technical specifications:

Test paper	Verification of	Sensitivity limit / colour change
Plumbtesmo	Lead (Pb) Lead ions (Pb^{2+})	5 mg/l Pb^{2+} white-yellow to pink-red
Potassium iodide starch paper	Nitrite ions (NO_2^-) Free chlorine (Cl_2)	1 mg/l NO_2^- 1 mg/l free Cl_2 white to blue-violet
Lead acetate paper	Hydrogen sulphide (H_2S) Sulphide ions (S^{2-})	5 mg/l S^{2-} white to brown/black
Phosphatesmo KM	Sperm, acid phosphatase	in trace amounts white to violet
Watesmo	Water (e.g. in organic solvents)	in trace amounts light blue to dark blue

Test paper	Packaging	Art. No.	Pack Qty.	€

Programme extension!

Quantofix® test strips

By Macherey-Nagel. For semi-quantitive determination of various substances. The test strips consist of a 0.2 mm-thick plastic strip with testing paper attached to the lower end. After the test strip has been moistened, the colouration that appears is compared to a colour scale on the side of the can. The concentration value can be read or a concentration range can be estimated. Dimensions: L 95 x W 6 mm.

*1 Test strips with additional reagents
*2 Test strips with CE marking

② VISOCOLOR® *HE* test kits

By Macherey-Nagel. This highly sensitive colorimetric measuring technique enables analysis of minimal substance concentrations. Combined with the application of highly sensitive substances and the application of an optical trick, double irradiation, the **sensitivity compared to other VISOCOLOR® test kits is enhanced by 10 - 100 times**.
Contents: sturdy plastic box, the required reagents, a comparator block for holding the revolving 10-colour disc and the 2 measuring glasses.

* Method in accordance with basic chemical factors of German unit processes.

Photometer PF-12^{Plus} for water analysis

By Macherey-Nagel. Portable photometre for field and laboratory use with preprogrammed Visocolor®-ECO and Nanocolor® round cuvette tests
- Illuminated graphic display
- Automatic wavelength setting
- Cell shaft for round cells 16 mm AD
- USB-interface for data transfer and power supply
- Dust and waterproof casing according to IP 68

Technical specifications:

Optic	Automatic filter wheel with 7 interference filters
Wave lengths	345/436/470/540/585/620/690 nm
Wave length precision	±2 nm
Light source	Wolfram lamp
Photometric range	±3 E
Photometric accuracy	±1 %
Memory	1000 readings, GLP-conform
Interface	USB 2.0
Dimensions (L x W x D)	215 x 100 x 65 mm

Delivery incl. software DVD, 4 Mignon 1.5 V batteries, 4 empty cuvettes, funnel, beaker, syringe, USB-cord, calibrating cuvette and transport case. Please order USB-power adapter separately if required.

Art. No.	Pack Qty.	€
LP73.1 *	1	950,00

Accessories:

USB-power adapter	**LP74.1** *	1 piece	34,80
Spare cuvettes 16 mm AD with screw cap	**X367.1** *	20 pieces	32,90
Mignon battery/AA 1.5 V	**1022.2**	4 pieces	6,05

* Longer delivery times possible. Please check with our Sales Department

AL100 chlorine photometer

By Aqualytic. For free, bound and total chlorine.
- Internal ring buffer for 16 datasets with real-time clock and date
- Auto-Off function
- Countdown function to maintain reaction time

Determination of chlorine content using reagent tablets.
- Measurement of free chlorine using DPD No. 1
- Measurement of total chlorine using DPD No. 1 + DPD No. 3

Checking the detection accuracy and reproducibility of measurement results using reference standard kit (please order separately).

Technical specifications:

Measuring range/resolution	0.01 to 6.00 mg/l
Measurement tolerances of DPD reagent tablets	0.00 to 1.00 mg/l: ±0.05 mg/l 1.01 to 2.00 mg/l: ±0.10 mg/l 2.01 to 3.00 mg/l: ±0.20 mg/l 3.01 to 4.00 mg/l: ±0.30 mg/l 4.01 to 6.00 mg/l: ±0.40 mg/l
Optics	LEDs, interference filter and photosensor
Wavelength	530 nm Δ λ= 5 nm
Wavelength accuracy	±1 nm
Photometric accuracy at 20-25 °C	3 % FS
Protection class	IP 68
Permissible ambient conditions	5 to 40 °C at 30 to 90 % rel. humidity
Dimensions (L x W x H)	155 x 75 x 35 mm
Weight (incl. batteries)	approx. 260 g

Delivery incl. 3 glass round vials with covers, 1 stirring bar, 1 brush, DPD No. 1 + No. 3 reagent tablets, plastic case and 4 type Micro/AAA batteries.

Art. No.	Pack Qty.	€
YE08.1	1	439,70

Accessories:

DPD No. 1 reagent tablets (free chlorine)	**YE09.1**	100 pieces	22,80
DPD No. 3 reagent tablets (total chlorine)	**YE10.1**	100 pieces	22,80
Replacement cells with cover, H 48 x ∅ 24 mm	**YE11.1**	12 pieces	75,15
Reference standard kit for chlorine (0.5 and 2.0 mg/l)	**YE12.1**	1 piece	68,80
Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Turbidimeter AL250 T-IR

By Aqualytic. With a broad measuring range of 0.01 to 1100 NTU (= TE/F = FNU) and a detection limit of 0.01 NTU, it can be used in different areas from sewage to drinking water. For stained and colourless water.
- With infrared light source
- Backlight LCD display
- Automatic switch-off after 10 min to prolong battery life
- Internal ring buffer for 16 data records with real time clock and date
- Key pad

Technical specifications:

Measuring range	0.01 to 1100 NTU (Auto-range)
Resolution	0.01 to 9.99 NTU 10.0 to 99.9 NTU 100 to 1100 NTU
Accuracy	±2.5 % measured value or 0.01 NTU (0 to 500 NTU) ±5 % of measured value (500 to 1100 NTU)
Optic	Temperature-compensated LED (Wavelength 860 nm)
Dimensions (L x W x H)	190 x 110 x 55 mm
Weight	400 g

Delivery incl. 4 turbidity standards (<0.1, 20, 200, 800 NTU), E-Block-battery 9 V, 2 cuvettes and transport cases.

Art. No.	Pack Qty.	€
LP38.1	1	725,65

Accessories:

Set of turbidity standards (<0,1, 20, 200, 800 NTU)	**LP39.1**	1 piece	233,30
Set of measuring cuvettes with black lid, height 55 mm, ∅ 24 mm	**LP40.1**	12 pieces	111,80
E-Block 9 V battery	**1025.1**	1 piece	4,85

pH-papers

Rotilabo®-universal indicator papers type Eco

For fast and exact measurment of coloured or cloudy and aqueous solutions. Plastic tin with colour scale. On rolls, 5 m long, 7 mm wide.

pH-measuring range	pH graduation	Art. No.	Pack Qty.	€
0,0-10,0	1,0	**AP99.1**	1	6,25

Unisol Indicator solutions

By Macherey-Nagel. For pH measurement in weak buffered solutions, in pure water, in surface water and in highly diluted acids or alkalis. Droplets of an indicator solution are added to the sample and the reaction colour is compared to a colour chart.

Delivery incl. 100 ml dropper bottle containing reagent (sufficient for approx. 500 pH measurements), colour chart and 1 type 13/72 measuring cuvette.

pH-buffer solutions

pH-Buffer Solutions, ROTI®CALIPURE

- Manufactured from high purity buffer substances
- No need for time-consuming drying and weighing of reagents
- The buffer solutions are adjusted to their respective pH values by comparison with standard buffer solutions (according to DIN 19266 and based on primary reference materials of the PTB and/or NIST)
- Quick and precise calibration of measuring equipment
- Stabilised against algae and bacterial action

pH tester CHECK

By Dostmann. Handy digital-pH tester for measuring the pH value of small liquid quantities in narrow vessels.

- Permanently connected pH combination electrode
- Automatic calibration and temperature compensation
- HOLD function
- Battery status display

Technical specifications:

Measuring range	pH °C	0 to 14 0 to +50
Resolution	pH °C	0,1 0,5
Accuracy	pH °C	±0,1 ±1
Calibration		1-/2-/3-point calibration
Installed length		115 mm
Shaft ∅		12 mm
Shaft material		Plastic
Storage solution		3 M KCl
Protection rating		IP 65
Weight		70 g
Power supply		2 x button CR 2032 (3V)

Delivery incl. batteries.
Storage solution and pH buffer solutions, please order separately.

Fig.:
A: Longitudinal section through a pH single-rod measuring cell:
① Filler neck, ② Electrode,③ Reference electrolyte, ④ Outlet, ⑤ Reference outlet, ⑥ Diaphragm, ⑦ Internal buffer, ⑧ pH-sensitive glass membrane
B-F: Application-specific types of pH-sensitive glass membrane

Choosing the right pH single-rod measuring cell

During the pH measurement a pH single-rod measuring cell (see Fig. A) is inserted into the sample solution in such a way that the pH-sensitive glass membrane interacts with the hydrogen ions ("protons") in the sample solution. The resultant voltage potential is dependent on the concentration and is measured by the measuring instrument and converted to a pH value.

pH single-rod measuring cells are distinguished, among other things, by the reference electrolyte, the diaphragms, the shape of the glass membrane and the electrode material (glass or plastic). The sample solution dictates which electrode is most suitable for the pH measurement.

The **reference electrolyte** is stored inside the pH single-rod measuring cell. It is in contact with the sample solution via a special connection, the so-called diaphragm, and can flow into the sample solution in a controlled manner. Reference electrolytes are roughly subdivided into two categories - liquid electrolytes and gel electrolytes.

- pH single-rod measuring cells containing **liquid electrolyte** have a faster response time, greater measurement certainty and longer life. The electrolyte is refillable, but is also completely exchangeable and more heat resistant.
- pH single-rod measuring cells containing **gel electrolyte** incur virtually no loss of electrolyte during the measurement and do not need to be refilled. They are rugged, require little maintenance and affordable, but they are unsuitable for highly acidic/basic solutions with a low ion content.

The connection between the electrolyte and the sample solution is made in a different way. It is important that the diaphragm doesn't become clogged by the sample solution (e.g. by viscous solutions, suspensions, aqueous samples with a high protein content), as otherwise it will not be possible to obtain a correct pH measurement.

- The **ceramic diaphragm** has a porous structure which has a high chemical resistance, but is highly sensitive to contamination. This diaphragm is suitable for standard measurements in aqueous solutions which are free of suspended matter.
- The **platinum diaphragm** consists of fine, smooth platinum wires which are twisted together and fused into the glass shaft of the pH single-rod measuring cell. The electrolyte flows out through cavities between the platinum wires. The platinum diaphragm does not clog up as quickly as the ceramic diaphragm, but it is unsuitable for sample solutions with a strong oxidising or reducing effect.
- The **fibre diaphragm** is similar to the platinum diaphragm, but is less chemically stable. It comprises a non-metallic fibre bundle (e.g. made of nylon) and often contains a gel electrolyte.
- The **ground joint diaphragm** is suitable for measuring pH in contaminated solutions, sludge, suspensions, emulsions and viscous media. The bottom section of the electrode is ground and covered by a sleeve. The electrolyte flows out from the fine gap between the shaft and sleeve at a high velocity. This also allows the pH of sample solutions with a low ion content to be measured. The diaphragm can be cleaned very easily by pushing up the sleeve.
- The **hole diaphragm** is a small connecting hole between the gel electrolytes and the sample medium. This diaphragm is highly resistant to clogging because it does not have a reticular structure.

Depending on application, the pH-sensitive glass membrane is shaped in a specific way (see Fig. B-F).

- For standard applications, the glass membrane has either a **spherical** structure (B) or a **hemispherical** structure (C).
- For insertion measurements in semi-solid, pasty and solid samples, the glass membrane is **tapered** (D).
- For surface measurements and droplet-sized samples, the glass membrane is **flat** (E).
- For small quantities of fluid and sample solutions in narrow vessels, there is a micro version in which the glass membrane is **narrow** and **hemispherical** (F).

Temperature compensation

One of the key factors influencing pH measurements is the temperature. For this reason, only pH values which have been measured at the same temperature should be compared with one another. In order to correlate the pH value with the actual temperature of the sample solution, temperature compensation should be carried out. The temperature can either be entered manually into the pH meter or measured automatically by an additional temperature sensor.

Calibration

A pH single-rod measuring cell is characterised by its zero point and its slope. At a pH of 7 the electrical voltage at the zero point is approx. 0 mV. The slope describes the change of voltage between two pH units. Since these characteristics change as a function of time, the sensor should be calibrated regularly using a calibration solution with a known pH. This is particularly important **after cleaning, maintenance or long periods of storage** of the pH electrode. To obtain more exact test results, **2-point calibration** should be carried out at least once and the **pH buffer solutions is use should have a pH nearest to the expected pH values**.

Storage

pH single-rod measuring cells are stored in an **aqueous, solution with a high ion content**. A solution which matches the inner electrolyte is recommended. The pH 4 buffer solution can be used as an alternative. However, pH single-rod measuring cells should never be stored in distilled water.

For longer periods of storage (several weeks to months), pH single-rod measuring cells can also be stored in a dry state. The electrodes will age more slowly as a result, but the outer hydrated layer on the pH-sensitive glass membrane which forms through contact with aqueous solutions will be irreparably damaged. Therefore, pH single-rod measuring cells which have been stored in a dry state have to be wetted again prior to initial use. For this purpose, the pH single-rod measuring cell is regenerated overnight in the storage solution.

Care and maintenance

With proper care and maintenance, pH single-rod measuring cells will deliver more exact measurement results, shorter response times and last longer.

- After each measurement the electrode must be flushed with deionised water and stored in the storage solution. If the electrode is dabbed with a paper towel, its rough surface should not come into contact with the pH-sensitive glass membrane.
- pH single-rod measuring cells containing liquid electrolyte have to be refilled. It is important that the electrolyte level does not drop below that of the sample solution because it will otherwise flow into the electrode.
- To prevent crystallisation of the electrolyte, the electrolyte should be completely exchanged on a regular basis.
- If air bubbles form inside the measuring cell, they can be removed by carefully shaking the electrode. Air trapped in the vicinity of the glass membrane leads to unstable measurement values.
- If the electrodes or the diaphragm are contaminated, various cleaning solutions can be used.

Useful life

The pH single-rod measuring cell is a **consumable subject** to diminishing performance over time. Its useful life is considerably reduced by high temperatures (>50 °C) and measurements at extreme pH values in particular. However, the type of sample solution, duration and frequency of measurement and, not least, electrode maintenance are also factors which influence the useful life of the measuring cell. Ageing symptoms include longer response time, decreasing slope and zero shift.

LE series pH single-rod measuring cells

By Mettler-Toledo. Affordable pH single-rod chains for various applications.

Technical specifications:

Type	① LE407	② LE409	③ LE438
pH range	0 to 14	0 to 14	0 to 14

Overview of standard connections on pH meters

When selecting a pH single-rod measuring cell, pay attention to the connections. Standardised connections for the pH sensor and the coaxial connector acc. to DIN **19262** and the bayonet connector (**BNC**). For example, **cinch** and **banana** (4 mm) connections are suitable for the temperature sensor.

In the case of the temperature sensor, also pay attention to the sensor type. Either a temperature sensor of the type **NTC 30 kΩ** or **Pt1000** can be connected to most pH meters.

Connection	Connector (pH single-rod measuring cell)	Socket (pH meter)
Coaxial connector acc. to DIN 19262

Programme extension!

Storage sets for electrodes

For safe, standby storage of electrodes with shaft ∅ 12 mm.

Set - standard equipment: Screw cap GL 45 incl. 5 seals and bore hole for storing electrodes.

Set 1: Delivery without screw thread bottle and storage solution (please order separately).

Set 2: Delivery incl. 100 ml screw thread bottle and 250 ml storage solution art. no. T138.1.

Type	Art. No.	Pack Qty.	€
Set 1	**KH88.1**	1	32,15
Set 2	**KCN1.1**	1	39,25

Accessories for storage sets

Screw thread vials, 100 ml, H 100 mm

Made of DURAN®, transparent. Without pouring ring and cap.

T426.1	10	38,90

Redox-electrodes

By SI Analytics. With cable. Has platinum sensor material.
Reference system used silver/silver chloride. Electrolyte KCl 3 mol/l.
With ceramic diaphragm. Length 120 mm. Sensor diameter 1 mm.
Work temperature range 0 to 100 °C.

Type	Art. No.	Pack Qty.	€
With BNC connection	**C900.1**	1	315,00
With DIN connection	**C893.1**	1	251,55

AL10 hand-held pH meter

By Aqualytic.

- Splash-proof membrane keyboard
- Manual single-point or double-point calibration via trimmer

Technical specifications:

Measuring range/resolution	0.01 to 14.00 pH
Accuracy	±0.1 (pH 4.0-10.0) ±0.2 (pH 1.1-3.9 and pH 10.1-13.0) ±0.3 (pH 0.1-1.0 and pH 13.1-14.0)
Dimensions (L x W x H)	208 x 110 x 34 mm

Delivery incl. pH plastic electrodes with gel electrolyte and BNC connector, pH buffer solutions (pH 4.01 and pH 7.00, each 90 ml), protective cover for measuring in difficult conditions, case and E-type block 9 V battery.

Art. No.	Pack Qty.	€
YP68.1	1	179,55

Accessories:

Spare pH plastic electrodes	**YP69.1**	1 piece	75,25
E-Block 9 V battery	**1025.1**	1 piece	4,85

Pocket pH-meters

pH 7-series pocket pH meter

By Dostmann.

- Large screen with simultaneous display of pH or mV value and temperature
- Automatic or manual temperature compensation
- Confirmation when a stable measured value is reached
- Automatic or manual calibration
- Storage of current calibration and display of the electrode status
- Automatic switch-off after 20 min

Technical specifications for pH meter:

pH measuring range/ resolution	pH mV °C	0.00 to 14.00 ±1000 0.0 to +100.0
Accuracy	pH mV °C	±0.01 ±1 ±0.5
Connections	pH °C	BNC Cinch (NTC 30 KΩ)
Calibration - automatic - manual		 1-/2-/3-point calibration (predefined buffer) 1-/2-point calibration (user-defined buffer)
Dimensions (H x W x D)		196 x 86 x 33 mm

Technical specifications for pH combination electrodes:

pH electrode	201T	GEL	2PoreT
pH range	0 to 14		
Operating range (°C)	0 to +60		
Diaphragm	Ceramic	Double	Pores
Electrolyte / storage solution	Gel / 3 mol/l KCl	Gel / 3 mol/l KCl	Polymer / 3 mol/l KCl
Length (mm)	120	120	35
Shaft ∅ (mm)	12	12	6
Shaft material	Plastic		
Temperature sensor	NTC 30 KΩ	-	NTC 30 KΩ
Application	for generally aqueous solutions		for insertion measurements in solid and semi-solid samples such as meat, fruit, butter, etc.

Delivery incl. buffer solution pH 4.01 and 7.00 (per 75 ml), storage solution (35 ml), empty container for water, 100 ml measuring beaker, transport case and 3 Mignon 1.5 V batteries.

FiveGo™ portable pH meter

By Mettler-Toledo.

- Waterproof and dust-proof in accordance with protection class IP67
- Ergonomic design for comfortable handling
- Simple, user-friendly menu
- Automatic or manual temperature compensation
- Automatically or manually end a measurement; with acoustic and visual endpoint signal
- Automatic calibration with four predefined buffer groups
- Displays the current calibration and has data memory for 200 measurements

Technical specifications for the devices:

Measuring range/resolution	pH mV °C	0.00 to 14.00 -1999 to +1999 0.0 to +100.0
Accuracy	pH mV °C	±0.01 ±01 ±0.5
Connections	pH °C	BNC Cinch (NTC 30 kΩ)
Calibration		1-/2-/3-point calibration
Data memory		200 measurements, current calibration
Dimensions (L x W x H)		169 x 82 x 36 mm

The FiveGo series is available in the following different versions:

- F2-Meter without pH single-rod measuring cell
- F2-Standard with LE438-IP67 pH single-rod measuring cell for water-based samples, including emulsions and suspensions
- F2-Field with LE438-IP67 pH single-rod measuring cell and carrying case
- F2-Food with LE427-IP67 pH single-rod measuring cell for recess measurements in solid and semi-solid samples, such as meat, fruit, butter, yoghurt or cheese

Technical specifications for the pH single-rod measuring cells:

- LE438-IP67 with integrated temperature sensor (NTC 30 kΩ), pH range 0 to 14, range of application 0 to +80 °C, protection class IP67, nylon diaphragm, plastic shaft, shaft length/∅ 120/12 mm, gel-filled
- LE427-IP67 without temperature sensor, pH range 0 to 11, range of application 0 to +50 °C, protection class IP67, ceramic diaphragm, glass shaft, shaft length/∅ 16/6 mm, gel-filled; for automatic temperature compensation, the NTC 30 kΩ temperature sensor (art. no. Y734.1) can be connected. This is sold separately

Delivery incl. calibration bag (pH 4.01, 7.00 and 9.21), electrode clip, wrist strap and four 1.5 V AAA batteries.

Type	Design	Art. No.	Pack Qty.	€

Carrying case with 4 sample bottles	**EEP8.1**	1	89,50

Pocket pH-meters

Seven2Go™-series pocket pH meters

By Mettler-Toledo. Rugged pH meter designed to withstand the harshest environments. Waterproof and dustproof to IP 67. Impact protection housing.

- Automatic and manual temperature compensation
- Automatic, manual and timer-controlled endpoint determination
- User-defined intermittent measurement possible (max. operating time 1 h)
- Intelligent Sensor Management (ISM®) for automatic recognition of ISM® sensors and reading in calibration data

Other features of the Seven2Go™ pro pH/Ion S8 professional pH meter:

- Menu structure with full-text display in 12 languages
- Graphical LCD display
- Memory capacity for 2000 datasets incl. date and time (GLP-compliant)
- Data readout via Micro USB port

Technical specifications:

Seven2Go™ pro pH/Ion S8 standard kit	**CAL3.1**	1	963,00
Accessories:			
pH plastic electrode InLab® Expert Go-ISM®(IP 67), incl. 1.8 m fixed cable (BNC/Cinch), stem length/ ∅ 120/12 mm, gel-filled	**LN43.1**	1	345,00
pH plastic electrode InLab® Expert Go (IP 67), without ISM®, incl. fixed cable 1.8 m (BNC/Cinch), stem length/∅ 120/12 mm, gel-filled	**CY88.1**	1	265,00
Mignon battery/AA 1.5 V	**1022.2**	4	6,05

Pocket pH-meters, models pH 3110 and 3310

By WTW. Dust and waterproof. Come singly or in set.

Standard set equipment: professional case with integrated measuring station and separate compartments for accessories. Complete with stand, beaker, pH-buffer solutions and batteries.

Set 1: standard equipment with pH-meter, model 3110: electrode Sentix® 41 with integrated temperature sensor

Set 2: standard equipment with pH-meter model 3310: electrode Sentix® 41 with integrated temperature sensor, driver software for USB and USB cable (Length 1 m).

Technical specifications:

Model		pH 3110	pH 3310
Measuring range / Resolution	pH mV °C	-2.0 to +19.9, -2.00 to +19.99, -2.000 to +19.999 ±2000 -5.0 to +105.0	
Accuracy	pH mV °C	±0.1, ±0.01, ±0.005 ±1 mV ±0.1	
Connections	pH °C	DIN 19262 banana, 2 x 4 mm (NTC 30 kΩ/Pt 1000)	
AutoRead		Automatic	Automatic/Manual
Calibration		1-/2-/3-point	1-/2-/3-/4-/5-point
Calibration storage		Current calibration	5 calibrations retrievable
Display		7 segment LCD	LCD graphics, backlitt
Data storage		-	Manual 200 records and 5000 time-controlled
Interface		-	Mini-USB
Dimensions (H x W x D)		180 x 80 x 55 mm	
Power supply		4 Mignon/AA 1.5 V batteries	

Type	Design	Art. No.	Pack Qty.	€
3110	without accessories	**KT20.1**	1	535,35
3110	Set 1	**KT21.1**	1	669,75
3310	without accessories	**KT25.1**	1	663,30

Benchtop pH-meters

pH 50-series benchtop pH meters

By Dostmann.

- Large screen with simultaneous display of pH or mV value and temperature
- Automatic or manual temperature compensation
- Automatic calibration
- Saves the current calibration
- Confirmation when a stable measured value is reached

Technical specifications:

pH measuring range/ resolution	pH mV °C	0.00 to 14.00 ±1999 0.0 to +100.0
Accuracy	pH mV °C	±0.01 ±1 ±0.5 (+5 to +60), ±1 (outside)
Connections	pH °C	BNC Cinch (NTC 30 KΩ)
Calibration		1-/2-/3-point calibration (pH 4.01 / 7.00 / 10.01)
Data memory		25 measurements, current calibration
Dimensions (L x W x H)		160 x 190 x 70 mm
Power supply		100 to 240 V, 50/60 Hz

Technical specifications for pH combination electrode 201T:
Features integrated temperature sensor, pH-range 0 to 14, operating range 0 to +60 °C, ceramic diaphragm, gel-electrolyte, plastic shaft, shaft length/∅ 120/12 mm.

Delivery incl. buffer solution pH 4.01 and 7.00 (50 ml each), electrode holder and mains adapter.

Type	Design	Art. No.	Pack Qty.	€
pH 50	without pH combination electrode	**HAE2.1**	1	354,75
pH 50 Set	with pH combination electrode 201T	**HAE3.1**	1	406,35

Accessories:

pH single-rod measuring cell 201T with integrated temperature gauge; measuring ranges: 0 to 14 mS/cm, 0 to +60 °C; shaft length/∅ 120/ 12 mm; fixed cable L 1 m (BNC/Cinch)	**HAE4.1**	1	107,30
Temperature sensor NT55 (NTC 30 kΩ) with fixed cable L 1 m (Cinch)	**HAE5.1**	1	85,95
Electrode holder	**EHY1.1**	1	88,15

Laboratory pH meter Lab 855

By SI Analytics.

- Large easy-to-use LCD screen and clearly laid out keypad
- Simultaneous display of pH or mV value and temperature
- Can analyse and store current calibration data
- Adjustable calibration interval
- Stability control for identifying stable readings
- Automatic or manual temperature compensation
- Suitable for battery and mains operation
- Can be set to switch off automatically when battery-operated

Technical specifications:

Measuring range/resolution	pH mV °C	-2.000 to +19.999 ±1200.0 / ±2000 -5.0 to +105.0
Accuracy	pH mV °C	±0.005 ±0.3 / ±1 ±0.1
Connections	pH °C	DIN 19262 Banane, 2 x 4 mm (NTC 30 kΩ/Pt 1000)
Calibration		1-/2-/3-point calibration
Dimensions (L x W x D)		230 x 190 x 80 mm
Power supply		100 to 240 V, 50/60 Hz or 4 x 1.5 V AA batteries

Delivery incl. BlueLine pH electrode 14 pH, calibration pouch (4.00 and 7.00), electrolyte solution 3 mol/l KCl, tripod, universal power supply and batteries.

Art. No.	Pack Qty.	€
EPH2.1	1	900,85

Accessories:

Temperature sensor Pt 1000, made of stainless steel with 1 m fixed cable	**X765.1**	1	273,05
Spare pH-electrode BlueLine 14 pH, with integrated temperature sensor	**N521.1**	1	242,95

Benchtop pH-meters

FiveEasy™, FiveEasy Plus™ benchtop pH meters

By Mettler-Toledo.

- Space-saving design with large display
- Simple, user-friendly menu
- Automatic or manual temperature compensation
- Automatically or manually end a measurement; with acoustic and visual endpoint signal
- Automatic calibration with four predefined buffer groups
- Displays the current calibration

Technical specifications for the device:

Model		FiveEasy™	FiveEasy Plus™
Measuring range/resolution	pH mV °C	0.00 to 14.00 -2000 to +2000 0.0 to +100.0	-2.00 to 16.00 -2000 to +2000 -5.0 to +105.0
Accuracy	pH mV °C	±0.01 ±1 ±0.5	±0.01 ±1 ±0.3
Connections	pH °C	BNC Cinch (NTC 30 kΩ)	BNC Cinch (NTC 30 kΩ)
Calibration		1-/2-/3-point calibration	1-/2-/3-/4-/5-point calibration
Data memory		Current calibration	200 measurements, current calibration
Data transmission ports		-	RS 232, USB
Dimensions L x W x H (mm)		227 x 147 x 70	
Power supply		100 to 240 V, 50/60 Hz	

Technical specifications for the LE438 pH electrode:
For water-based samples, including emulsions and suspensions. Features an integrated temperature sensor (NTC 30 kΩ), pH range of 0 to 14, operating range of 0 to +80 °C, nylon diaphragm, plastic shaft (shaft length/ ∅ 120/12 mm respectively); gel-filled.

Delivery incl. electrode arm, calibration sachet (pH 4.01, 7.00 and 9.21) and 12 V power supply. F20- and FP20-standard models – also with LE438 pH electrode.

Model	pH electrode	Art. No.	Pack Qty.	€
FiveEasy™-F20-meter	-	**HY56.1**	1	426,00

Benchtop pH/ion meters SevenCompact™ S220

By Mettler-Toledo.

- Large colour display (4.3″) with Routine or Expert mode (e.g. for disabling Delete data or Edit data function)
- Menu navigation in 10 languages (DE, GB, FR, ES, IT, PT, CN, JP, KR, RU)
- Automatic 1-/2-/3-/4-/5-point calibration with predefined buffer groups or 1 user-defined group
- Automatic and manual temperature compensation
- Automatic, manual or timed endpoint detection
- Internal measured value memory: saving by pressing key or timed (intermittent) saving (interval is variable from 1 sec to 40 min)
- USB ports for exporting data via USB stick (datasets are exported as a text (.txt) file) or for connecting a USB keyboard
- It is possible to measure ion concentrations using additional ion-selective electrodes (ISE)

Technical specifications:

Measuring range / resolution	pH mV °C	-2.0 to 20.0; -2.00 to 20.00; -2.000 to 20.000 -2000.0 to +2000.0; -2000 to +2000 -5.0 to +130.0
Accuracy	pH mV °C	±0.002 ±0.2 ±0.1
Connections	pH °C	BNC Cinch (NTC 30 kΩ/Pt 1000)
Data memory		1000 sets
Communication ports		RS 232, USB-A, USB-B

pH meter SevenCompact™ S220-basic
Delivery incl. electrode holder and protective sleeve.
Please order pH single-rod measuring cell separately.

Art. No.	Pack Qty.	€
TA09.1	1	896,00

pH meter SevenCompact™ S220-U Kit-Version
Delivery incl. electrode holder, protective sleeve, Versatile Pro plastic pH electrode and two 20 ml buffer bags for pH 4.01/7.00/9.21/10.00.

Art. No.	Pack Qty.	€
TA10.1	1	1059,00

Accessories:

pH-electrode InLab® Versatile Pro, incl. fixed cable 1.2 m	**TA11.1**	1	215,00
pH-electrode InLab® Routine Pro with MultiPin™, connecting cable please order separately	**N504.1**	1	230,00
Connecting cable, length 1.2 m, MultiPin™ + BNC + cinch plug	**N505.1**	1	89,00
NTC 30 kΩ temperature sensor with 1.2 m fixed cable (Cinch)	**Y734.1**	1	83,30

Conductivity tester

Conductivity testers COND 1 and COND 5

By Dostmann.

- Large LCD display
- Waterproof and dust-proof in accordance with protection class IP 67
- Automatic temperature correction from 0 to +50 °C
- Confirmation when a stable measured value is reached
- Automatic calibration with display of the calibrated ranges
- For model COND 5: Multicolour back lighting for status display of measurement mode, calibration and alarm

Technical specifications:

Model		① COND 1	② COND 5
Measuring range	EC TDS Salinity °C	0 to 20 mS/cm 0 to 10 ppt - -	0 to 20 mS/cm 0 to 10 ppt 0 to 10 g/l 0 to +50 °C
Resolution	EC TDS Salinity °C	automatic automatic - -	automatic automatic automatic 0.1 °C

Battery Micro/AAA 1,5 V	**1021.2**	4	6,40

SD 70 conductivity tester

By Aqualytic.

- Rugged, water resistant housing (IP67)
- Automatic 1/2 point calibration (calibration standards: 1413 µS/cm, 12.88 mS/cm) and manual 1/2 point calibration (calibration standards: freely selectable)
- Automatic temperature compensation
- Automatic change-over from µS/cm to mS/cm
- Auto Off after 8 min
- Memory with capacity for 25 datasets incl. time and date

Technical specifications:

Measuring range / resolution	1 to 1999 µS/cm and 2.00 to 20.00 mS/cm 0.1 to 60.0 °C
Accuracy	±3 % of measuring range end value ±1 °C
Dimensions (L x W x D)	177 x 43 x 29 mm
Weight	126 g

Delivery incl. conductivity measuring cell, carry strap, plastic box and 2 batteries micro/AAA 1,5 V.

Art. No.	Pack Qty.	€

FiveGo™ portable conductivity meter

By Mettler-Toledo.

- Waterproof and dust-proof in accordance with protection class IP 67
- Ergonomic design for comfortable handling
- Simple, user-friendly menu
- Automatic or manual temperature compensation
- Automatically or manually end a measurement; with acoustic and visual endpoint signal
- Automatic calibration with three predefined standards
- Displays the current calibration and has data memory for 200 measurements
- Selectable reference temperature (20 or 25 °C)

Technical specifications for the device:

Measuring range/resolution	EC TDS °C	0.00 µS/cm to 200 mS/cm 0.01 mg/l to 200 g/l 0.0 to 100.0
Accuracy	EC TDS °C	±0.5% of the measured value ±0.5% of the measured value ±0.5 °C
Connection		LTW, 7-pin (IP 67)
Calibration		1-point calibration
Data memory		200 measurements, current calibration
Dimensions (L x W x H)		188 x 77 x 33 mm

Technical specifications for the conductivity sensor:
LE703-IP 67 with integrated temperature sensor, measuring range: 0.01 to 200 mS/cm, plastic shaft, shaft length/∅: 120/12 mm, range of application 0 to +80 °C.

Delivery incl. LE703-IP 67 conductivity sensor, calibration bag (1413 µS/cm and 12.88 mS/cm), electrode clip, wrist strap and four 1.5 V AAA batteries.

Seven2Go™-series pocket conductivity meter

By Mettler-Toledo. Rugged conductivity meter designed to withstand the harshest environments. Waterproof and dustproof to IP 67.
Impact protection housing.

- Automatic and manual temperature compensation
- Automatic, manual and timer-controlled endpoint determination
- User-defined intermittent measurement possible (max. operating time 1 h)
- Selectable reference temperature (20/25 or °C)
- Intelligent Sensor Management (ISM®) for automatic recognition of ISM® sensors and reading in calibration data

Other features of the Seven2Go™ pro S7:

- Menu structure with full-text display in 12 languages
- Graphical LCD display
- Memory capacity for 2000 datasets incl. date and time (GLP-compliant)
- Data readout via Micro USB port

Technical specifications:

Pocket conductometer Cond 3110-/3310-Set

By WTW. Robust, waterproof conductivity meters with parallel temperature display.

- 1-point calibration (calibration standard can be freely selected)
- Non-linear function for high-purity and natural water (non-cond.)
- Optional reference temperature (20 or 25 °C)

Additional features of Cond 3310:

- Integrated data logger
- USB-interface
- Turn-off temperature compensation
- Backlight graphic display
- Additional equipment: CD with driver software for USB and USB cable (Length 1 m)

Technical specifications:

Model		Cond 3110	Cond 3310
Measuring range/ resolution	Conductivity Temperature Salinity	0.1 µS to 1000 mS/cm -5.0 to +105.0 °C 0.0 to 70.0	
	TDS	-	0 to 1999 mg/l, 0 to 199.9 g/l
Accuracy	Conductivity Temperature	±0.5 % of reading ±0.1 °C	
Temperature compensation		Non-cond.	turn-off, non-cond., 0.000 to 10.00 %/C
Calibrating storage		Current calibration	5 calibrations retrievable
Display		7 segment LCD	LCD graphics, backlight
Data storage		-	Manual 200 and time-controlled 5000 records
Interface		-	Mini-USB
Dimensions (H x W x D)		180 x 80 x 55 mm	
Power supply		4 Mignon/AA 1.5 V batteries	

Delivery incl. 4-pol conductivity electrode TetraCon®325 (measuring range 0.001 to 1000 mS/cm), professional case with integrated measuring station and separate compartments for accessories, stand, beaker, conductivity test solutions 1413 µS/cm and batteries.

COND 51+ Set	with conductivity sensor 2301T (0 to 200 mS/cm, 0 to +60 °C)	**HXA9.1**	1	532,15

Accessories:

2301T conductivity sensor with integrated temperature gauge; measuring ranges: 0.01 to 200 mS/cm, 0 to +60 °C; shaft length/∅ 120/12 mm; fixed cable L 1 m (BNC/Cinch)	**HPL9.1**	1 piece	145,15
Conductivity sensor VPT 51 51 with integrated temperature gauge; measuring ranges: 0.1 to 1000 µS/cm, 0 to +60 °C; shaft length/∅ 120/12 mm; fixed cable L 1 m (BNC/Cinch)	**HPN0.1**	1 piece	256,95

NEW

Conductivity standards in sachets

The quantity of reagent contained in a sachet (25 ml) is sufficient for a single calibration.

- Traceable thanks to comparison with standard references from the National Institute of Standards and Technology (NIST)
- With certificate of analysis for documenting the quality, traceability and accuracy

Type	Accuracy	Art. No.	Pack Qty.	€
1413 µS/cm	±1 %	**KCX3.1**	20	32,20
12880 µS/cm	±1 %	**KCX4.1**	20	32,20

▶ Further calibration solutions for conductimetry see page 868, 870

FiveEasy™

By Mettler-Toledo.

- Space-saving design with large display
- Simple, user-friendly menu
- Automatic or manual temperature compensation
- Automatically or manually end a measurement; with acoustic and visual endpoint signal
- Automatic calibration with three predefined standards
- Saves the current calibration
- Selectable reference temperature (20 or 25 °C)

Technical specifications:

Measuring range/resolution	EC TDS °C	0.1 µS/cm to 200 mS/cm 0.01 mg/l to 200 g/l 0.0 to +100.0 °C
Accuracy	EC TDS °C	±0.5 % of the measured value ±0.5 % of the measured value ±0.5 °C
Connection		Mini-DIN
Calibration		1-point calibration
Dimensions (L x W x H)		227 x 147 x 70 mm
Power supply		100 to 240 V, 50/60 Hz

Technical specifications for the conductivity sensor:
LE703 featuring integrated temperature sensor,
measuring range: 0.01 to 200 mS/cm, plastic shaft
(shaft length/∅: 120/12 mm respectively), operating range of 0 to +80 °C,
1.0 m fixed cable (mini-DIN).

Delivery incl. LE703 conductivity sensor, electrode arm, calibration sachet (1413 µS/cm and 12.88 mS/cm) and 12 V power supply.

Art. No.	Pack Qty.	€
HY61.1	1	897,00

Conductivity sensors for the FiveEasy™ benchtop conductivity meter

Features an integrated temperature sensor (NTC 30 kΩ).

Technical specifications:

Type	① InLab® 720	② InLab® 751-4 mm	③ LE703
Measuring range	0.1 to 500 µS/cm	0.01 to 100 mS/cm	0.01 to 200 mS/cm
Operating range (°C)	0 to +100	0 to +100	0 to +80
Cell constant/cm	0.06	1.0	0.55
Cell type	2 platinum poles	2 platinum poles	4-pole graphite cell
Shaft material	Glass	Glass	Plastic
Stem length (mm)	120	120	120
Shaft ∅ (mm)	12	4	12
Application	For low-conductivity samples	For taking measurements in small containers	For general conductivity measurements

Delivery incl. 1 m fixed cable and mini-DIN connector.

Type	Art. No.	Pack Qty.	€
① Conductivity sensor InLab® 720, incl. 1.0 m fixed cable (Mini-DIN); measuring range 0.01 to 500 mS/cm	**PP35.1**	1	318,00
② InLab® 751-4 mm	**PP36.1**	1	479,00
③ LE703	**HY62.1**	1	142,00

Conductivity meters

Benchtop conductivity meter SevenCompact™ S230

By Mettler-Toledo.

- Large colour display (4.3″) with Routine or Expert mode (e.g. for disabling Delete data or Edit data function)
- Menu navigation in 10 languages (DE, GB, FR, ES, IT, PT, CN, JP, KR, RU)
- 1-point calibration with 5 predefined groups and 1 user-defined group incl. temperature chart
- Automatic and manual temperature compensation
- Selection of compensation method: Linear, Nonlinear, Ultra-pure water, Off
- Manual cell constant input
- Internal measured value memory: saving by pressing key or timed (intermittent) saving (interval is variable from 1 sec to 40 min)
- USB ports for exporting data via USB stick (datasets are exported as a text (.txt) file) or for connecting a USB keyboard

Technical specifications:

Measuring range / resolution	Conductivity:	0.001 to 1.999 µmS/cm 2.00 to +19.99 µmS/cm 20.0 to 199.9 µmS/cm 200 to 1999 µmS/cm 20.0 to 199.9 mS/cm 200 to 1000 mS/cm

Delivery incl. electrode holder, protective sleeve, conductivity sensor InLab 741®-ISM (0.001 to 500 µS/cm).

Art. No.	Pack Qty.	€
TA13.1	1	1637,00

Accessories for SevenCompact™ S230

By Mettler-Toledo.

4-pole conductivity sensor InLab® 731-ISM® (0-01 mS/cm)
With integrated temperature sensor. Stem material: epoxy.
Stem length: 120 mm, stem ∅ 12 mm. Temperature range: 0 to 100 °C.
Measuring range: 0.01 to 1000 mS/cm.

Art. No.	Pack Qty.	€
TA14.1	1	402,00

2-pole conductivity sensor InLab® 741-ISM® (0.001 µS/cm)
With integrated temperature sensor. Stem material: steel.
Stem length: 120 mm, stem ∅ 12 mm. Temperature range: 0 to 100 °C.
Measuring range: 0.001 to 500 µS/cm.

Art. No.	Pack Qty.	€
TA15.1	1	549,00

Conductivity standards ROTI®CALIPURE

Our conductivity standard solutions are made from high-quality reagents and therefore ensure maximum precision during calibration. They are ready for use and come supplied with a batch-specific certificate of analysis.

- 10 conductivity standards
- Variation in conductivity ±1 % (25 °C)
- Traceable to SRM from NIST
- Aqueous solution

NEW

OXY 7 oxygen meter

By Dostmann. For determining dissolved oxygen in liquids.

- Large LCD display with simultaneous display of measured value and temperature
- Automatic calibration with display of the calibrated ranges
- Confirmation when a stable measured value is reached
- Automatic and manual temperature compensation from 0 to +60 °C
- Automatic air pressure compensation
- Manual salinity compensation of 0 to 50 ppt
- Auto Off after 20 minutes

Technical specifications:

Measuring range	O_2 concentration	0 to 50 mg/l
	O_2 saturation	0 to 400%
	Pressure	0 to 1100 mbar
	°C	0 to +60.0 °C
Resolution	O_2 concentration	automatic
	O_2 saturation	automatic
	Pressure	1 mbar
	°C	0.1 °C
Accuracy (with sensor)	O_2 concentration	±0.30 mg/l (0.00 to 19.99 mg/l) ±0.75 mg/l (20.0 to 50.0 mg/l)
	O_2 saturation	±20% (0.0 to 199.9%) ±40% (200 to 400%)
	Pressure	±0.55 mbar
	°C	±0.5 °C
Connections	O_2 °C	BNC Cinch
Calibration		1-/2-point calibration
Dimensions (L x W x H)		86 x 196 x 33 mm
Weight		295 g
Power supply		3 x Mignon/AA 1.5 V

Delivery incl. polarographic oxygen sensor OXY DO7 with integrated temperature sensor, electrolyte solution (30 ml), standard zero calibration solution (30 ml), replaceable membrane, storage case and batteries.

Art. No.	Pack Qty.	€
HPK6.1	1	697,70

Accessories:

OXY DO7 oxygen sensor with fixed cable L 3 m (BNC/Cinch), 2 replaceable membranes and electrolyte solution	**HPK7.1**	1 piece	284,90
Set with 2 replaceable membranes for OXY DO7 sensor	**HPK8.1**	1 piece	63,45
Electrolyte solution (30 ml) for OXY DO7 sensor	**HPK9.1**	1 piece	32,20
Standard zero calibration solution (5 x 30 ml)	**HPL0.1**	1 piece	26,35
Mignon battery/AA 1.5 V	**1022.2**	4 pieces	6,05

Pocket oxygen meter Oxi 3310-Set

By WTW. Robust, waterproof pocket meter, battery operated

- Integrated data logger
- USB-interface
- Automatic air pressure compensation sensor
- Backlit graphic display
- Calibrating storage - 5 calibrations are retrievable

Set-equipment

- Meter incl. 4 Mignon/AA 1.5 V batteries
- Galvanic oxygen sensor CellOx®325 with 1.5 m cable (measuring range O_2-concentration: 0 to 50 mg/l)
- Professional case with integrated measuring station and separate compartments for accessories
- Cleaning agent and electrolyte solution
- 3 replaceable membrane heads
- Stand and beaker
- Driver software for USB
- USB-cable (Length 1 m)

Technical specificationsn:

Measuring range / Resolution	O_2-concentration	0.01 to 19.99 mg/l 0.0 to 90.9 mg/l
	O_2-saturation	0.1 to 199.9 % 0 to 600 %
	Partial pressure	0.1 to 199.9 hPa 0 to 1250 hPa
	Temperature	-5.0 to +50.0 °C
Accuracy	O_2-concentration	±0.5 % of reading
	O_2-saturation	±0.5 % of reading
	Partial pressure	±0.5 % of reading
	Temperature	±0.1 °C
Data storage		Manual 200 and time-controlled 5000 records
Interface		Mini-USB
Dimensions (H x W x D)		180 x 80 x 55 mm

	EC	±2 µS/cm (0 to 199.9 µS/cm) ±20 µS/cm (200 to 1999 µS/cm) ±0.2 mS/cm (2 to 20 mS/cm)
	TDS	±2 ppm (0.1 to 199.9 ppm) ±20 ppm (200 to 1999 ppm) ±0.1 ppt (2.00 to 10.00 ppt)
	Salinity	±2 mg/l (0.1 to 199.9 mg/l) ±20 mg/l (200 to 1999 mg/l) ±0.1 g/l (2.00 to 10.00 g/l))
	°C	±0.2 °C
Calibration	pH/EC	1-/2-/3-point calibration
Reference temperature	EC	+20 / +25 °C
Dimensions (L x ∅)		175 x 35 mm
Weight		130 g
Power supply		4 x Micro/AAA 1.5 V

Delivery incl. buffer solutions (pH 4.01 and 7.00), conductivity solution (1413 µS/cm), storage solution (3 M KCl), 2 measuring beakers, storage case and batteries.

Art. No.	Pack Qty.	€
HPK4.1	1	196,75

Accessories:

Spare electrode for PC 5	**HPK5.1**	1 piece	82,25
Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Combined measuring devices PM 2000 set

Automatic sensor recognition. Robust, coated alu-housing. Automatic calibration. Protective system IP 65.

pH-measurement
- Measuring range/resolution: pH 0.00 to 14.00
- Accuracy: ±0.01 pH
- Automatic temperature compensation: 0 to 100 °C

Conductivity measurement
- Measuring range: 0 µS/cm to 500 mS/cm in 5 measuring ranges
- Measuring cell with integrated temperature sensor
- Error of measurement: to 200 mS = 2 %, to 500 mS = 4 %
- Setting possibility for temperature coefficient (0-3.9 %) and reference temperature (20/25 °C)
- Dimensions of measuring cell: W 32 x D 18 x L 165 mm

Temperature measurement
- Measuring range: -50.0 to +150.0 °C; resolution 0.1 °C
- Accuracy of device: ±0.2 °C
- Probe Pt 1000 Class B

mV-measurement (Redox potential)
- Measuring range: -1000 mV to +1000 mV; resolution 1 mV
- Zero point can be set individually for Redox-electrodes

Technical specifications:

Display	8 digit x 14 segment LCD • 7 mm
Weight	350 g without probe
Housing	Aluminium (black coating)
Dimensions (L x W x H)	138 x 85 x 35 mm
Ambient temperature	0 to +50 °C

Delivery incl. pH/Redox-measuring pre-amplifier with temperature probe, pH-electrode pH62/A7, conductivity measuring cell, 3 lithium-batteries Mignon 1.5 V.
Without Redox electrode, please order separately if required.

Art. No.	Pack Qty.	€
HT24.1	1	600,95

Accessories:

Redox electrode Pt 110	**N389.1**	1 piece	135,45
pH-electrode pH62/AS7	**N385.1**	1 piece	79,35
pH/Redox measuring pre-amplifier with temp.-prove	**N384.1**	1 piece	174,15
Conductivity measuring cell	**X286.1**	1 piece	153,75

Multi-range meters

NEW

PC 7+ hand-held multimeter

By Dostmann. For measuring pH, conductivity and TDS.

- Large LCD display with simultaneous display of measured value and temperature
- Automatic and manual temperature compensation
- Confirmation when a stable measured value is reached
- Automatic calibration with display of the calibrated ranges
- Adjustable reference temperature, cell constant and temperature coefficient

Technical specifications:

Measuring range	pH mV EC TDS °C	0 to 14 pH ±1000 mV 0 to 200 mS/cm 0 to 100 g/l 0 to +100 °C
Resolution	pH mV EC TDS °C	0.1 / 0.01 pH 1 mV automatic automatic 0.1 °C
Accuracy	pH mV EC TDS °C	±0.01 pH ±1 mV ±0.4 µS/cm (0 to 19.99 µS/cm) ±4 µS/cm (20.0 to 199.9 µS/cm) ±40 µS/cm (200 to 1999 µS/cm) ±0.4 mS/cm (2.00 to 19.99 mS/cm) ±4 mS/cm (20.0 to 200.0 mS/cm) ±0.2 mg/l (0 to 19.99 mg/l) ±2 mg/l (20.0 to 199.9 mg/l) ±20 mg/l (200 to 1999 mg/l) ±0.2 g/l (2.00 to 19.99 g/l) ±1 g/l (20.0 to 100.0 g/l) ±0.5 °C
Connections	pH EC °C	BNC BNC Cinch
Calibration	pH EC	1-/2-/3-point calibration (predefined buffer) 1-/2-point calibration (user-defined buffer) 1-/2-/3-/4-point calibration (predefined buffer) 1-point calibration (user-defined buffer)
Reference temperature		+15 to +30 °C
Temperature coefficient		0 to 10.00 %/ °C
Cell constant		0.1 / 1.0 / 10 cm^{-1}
Dimensions (L x ∅)		86 x 196 x 33 mm
Weight		300 g
Power supply		3 x Mignon/AA 1.5 V

Delivery incl. pH single-rod measuring cell 201T (0 to 14 pH, 0 to +60 °C), conductivity sensor 2301T (0 to 200 mS/cm, 0 to +60 °C), buffer solutions (pH 4.01 and 7.00), conductivity testing solutions (1413 µS/cm and 12.88 mS/cm), storage solution (3 M KCl), measuring beaker, transport case and batteries.

Art. No.	Pack Qty.	€
HTE8.1	1	682,65

Accessories:

2301T conductivity sensor with integrated temperature gauge; measuring ranges: 0.01 to 200 mS/cm, 0 to +60 °C; shaft length/∅ 120/12 mm; fixed cable L 1 m (BNC/Cinch)	**HPL9.1**	1 piece	145,15
pH single-rod measuring cell 201T with integrated temperature gauge; measuring ranges: 0 to 14 mS/cm, 0 to +60 °C; shaft length/∅ 120/12 mm; fixed cable L 1 m (BNC/Cinch)	**HAE4.1**	1 piece	107,30
Mignon battery/AA 1.5 V	**1022.2**	4 pieces	6,05

Multi-parameter handheld meter AL15

By Aqualytic. For the measurement of pH/redox, conductivity/TDS and oxygen.

- Automatic/manual temperature compensation
- Min/Max and Hold functions
- Automatic/manual storage of up to 16,000 datasets
- Auto Off after 10 min
- Dimensions (incl. protective plating): L 220 x W 120 x D 40 mm. Weight 625 g

Technical specifications:

pH/redox	
Measuring range/resolution	0.01 to 14.00 pH -1999 to +1999 mV
Accuracy	±0.02 pH
Temperature compensation	Automatic: 0 to 65 °C, manual: 0 to 100 °C
Calibration	pH: 1-/ 2-/ 3-point calibration (pH 7. 4 and 10) Redox: 1-point calibration (calibration standards freely selectable)
Conductivity	
Measuring range/resolution	0.201 to 2.000 mS 2.01 to 20.00 mS 20.1 to 200.0 mS
Accuracy	±0.5 % of the measuring range end value
Temperature compensation	Automatic: 0 to 60 °C
Calibration	1-/ 2-/3-point calibration (calibration standards freely selectable)
TDS	
Measuring range/resolution	0.1 to 132.0 ppm / 0.1 ppm 132 to 1320 ppm / 1 ppm 1320 to 13 200 ppm / 10 ppm 13 200 to 132 000 ppm / 100 ppm
Accuracy	±2 % of the measuring range end value
Oxygen	
Measuring range/resolution	0.1 to 20.0 mg/l (dissolved O_2) 0.1 to 100 % (O_2 in air)
Accuracy	±0.4 mg/l ±0.7 %
Temperature compensation	Automatic: 0 to 50 °C
Salt correction	0 to 39 %
Air pressure compensation	0 to 8900 m

Delivery incl. pH plastic electrode with gel electrolyte and BNC connection, temperature sensor, conductivity measuring cell, pH buffers 4 and 7, plastic case and 4 mignon 1.5 V batteries. Does not include oxygen sensor and redox electrode; please order separately.

Art. No.	Pack Qty.	€
YT94.1	1	631,05

pH-/Conductivity meters SevenGo® Duo

By Mettler-Toledo. Portable two-channel meter for determining pH, mV, conductivity, TDS (Total Dissolved Solids) and salinity.

General information
- Robust, waterproof casing
- Data storage for 99 GLP-data records

pH-measurement
- Automatic 1-/2-/3-point pH calibration with 4 predefined and one user-defined buffer set
- Reproducible results through automatic limit point recognition, automatic buffer identification and temperature compensation

Conductivity measurement
- 1-point calibration with calibration standards (84 / 1413 / 12880 µS/cm)
- Linear temperature compensation
- Selectable reference temperature (20 or 25 °C)

Technical specifications:

Measuring range/resolution	pH EC mV °C Salinity TDS	0.00 to 14.00 0.01 µS/cm to 500 mS/cm -1999 to + 1999 -5.0 to +105 0.00 to 80.00 ppt 0.1 mg/l to 300 g/l
Accuracy	pH EC mV °C	±0.01 ±0.5 % ±1 ±0.5
Storage via keystroke		99 data records
Dimensions (W x D x H)		220 x 90 x 45 mm

pH-/Conductivity meter SevenGo® Duo model SG23-ELK:
Delivery incl. pH-electrode InLab® Expert Go-ISM®, conductivity sensor InLab® 738-ISM® (both IP 67, 2 m cable), 4 batteries Mignon 1.5 V and wrist strap.

Art. No.	Pack Qty.	€
LN41.1	1	1262,00

pH-/Conductivity meter SevenGo® Duo model SG23-FK5:
Delivery incl. pH-electrode InLab® Expert Go-ISM®, conductivity sensor InLab® 738-ISM® (both IP 67, 5 m cable), elastic protective cover, bag with buffer solutions pH (2 bags each; 4.01, 7.00), bag with calibrating standards conductive (2 bags each 1413 and 12880 µS/cm), sample bottles, 4 batteries Mignon 1.5 V, wrist strap and case.

Art. No.	Pack Qty.	€
LN42.1	1	1446,00

Accessories for SevenGo® Duo

By Mettler-Toledo.

① **Spare-IP67-pH-electrode InLab® Expert Go-ISM®:**
Delivery incl. integrated temperature probe and fixed cable (Length 1.8 m). Plastic shaft. Shaft length/∅ 120/12 mm. Gel-filled. BNC/Cinch contact plug.

Art. No.	Pack Qty.	€
LN43.1	1	345,00

② **Spare IP67-4-pole conductivity sensor InLab® 738-ISM®:**
Delivery incl. integrated temperature probe and fixed cable (Length 1.8 m). Plastic shaft. Shaft length/∅ 120/12 mm. Measuring range 0.01 to 1000 mS/cm.

Accessories:

pH single-rod measuring cell 201T with integrated temperature gauge; measuring ranges: 0 to 14 mS/cm, 0 to +60 °C; shaft length/∅ 120/12 mm; fixed cable L 1 m (BNC/Cinch)	**HAE4.1**	1 piece	107,30
2301T conductivity sensor with integrated temperature gauge; measuring ranges: 0.01 to 200 mS/cm, 0 to +60 °C; shaft length/∅ 120/12 mm; fixed cable L 1 m (BNC/Cinch)	**HPL9.1**	1 piece	145,15
Conductivity sensor VPT 51 51 with integrated temperature gauge; measuring ranges: 0.1 to 1000 µS/cm, 0 to +60 °C; shaft length/∅ 120/12 mm; fixed cable L 1 m (BNC/Cinch)	**HPN0.1**	1 piece	256,95

Overview of standard connections on pH meters

When selecting a pH single-rod measuring cell, pay attention to the connections. Standardised connections for the pH sensor and the coaxial connector acc. to DIN **19262** and the bayonet connector (**BNC**). For example, **cinch** and **banana** (4 mm) connections are suitable for the temperature sensor.

In the case of the temperature sensor, also pay attention to the sensor type. Either a temperature sensor of the type **NTC 30 kΩ** or **Pt1000** can be connected to most pH meters.

Connection	Connector (pH single-rod measuring cell)	Socket (pH meter)
Coaxial connector acc. to DIN 19262		
BNC		
Cinch		
Banana, 4 mm		

SevenExcellence™ combined measuring devices

By Mettler-Toledo. Professional modular system for the measurement of pH, redox, conductivity, TDS and salinity. Up to three modules can in be connected to a basic unit in variable configurations. This means that up to three parameters can be measured in one or more samples.

- High-resolution 7-inch colour display with touchscreen control
- Intuitive menu structure with full-text display (in 10 languages)
- 4-level user management hierarchy with different access rights
- Automatic calibration
- Flexible buffer selection and make-up; pH buffers from various groups can be combined with one another
- Automatic and manual temperature compensation
- Direct measurement or individual analysis methods (for standard conditions)
- Individual, intermittent or series measurement
- Automatic calculation of statistical data (mean values, standard deviation)
- Intelligent Sensor Management (ISM®) for automatic recognition of ISM® sensors and reading in calibration data
- GLP support (PIN protection, GLP-compliant printouts containing all relevant data and monitoring of measurement limits)
- Radio clock for precise display of time and date
- Data storage (20,000 data points, 250 analyses)
- Data export with USB stick or LabX®direct PC software
- Communication ports: USB, Ethernet and RS 232

Technical specifications:

pH/redox	
Measuring range/resolution	-2.000 to +20.000 pH -2000.0 to +2000.0 mV -30.0 to +130.0 °C
Accuracy	±0.002 pH ±0.1 mV ±0.1 °C
Calibration	1-/ 2-/ 3-/ 4-/ 5-point calibration (8 predefined buffer series and 20 user-defined buffer series)
Conductivity	
Measuring range/resolution	0.001 µS/cm to 2000 mS/cm -30.0 to 130.0 °C
Accuracy	±0.5 % of measuring range end value ±0.1 °C
Calibration	1-point calibration (13 predefined standards and 1 user-defined standard)
TDS	
Measuring range/resolution	0.00 mg/l to 1000 g/l
Accuracy	±0.5 % of measuring range end value
Salinity	
Measuring range/resolution	0.00 to 80.00 psu
Accuracy	±0.5 % of measuring range end value

SevenExcellence™ pH Kit Version S400

For the measurement of pH and redox potential.
Basic unit comprising a pH module, electrode holder, pH single-rod measuring cell InLab® Routine Pro-ISM®, buffer solutions (pH 4.01 / 7.00 / 9.21 / 10.00, 2 pouches of each), LabX®direct PC software, AC-adapter.

SevenExcellence™ EC Kit Version S700

For the measurement of conductivity, TDS and salinity.
Basic unit comprising a conductivity module, electrode holder, conductivity sensor InLab® 731-ISM®, conductivity standards (1413 / 12880 µS/cm, 2 pouches of each), LabX®direct PC software, AC-adapter.

SevenExcellence™ pH/EC Kit Version S470

For the measurement of pH, redox, conductivity, TDS and salinity.
Basic unit comprising a pH module, a conductivity module, electrode holder, pH single-rod measuring cell InLab®Expert Pro-ISM®, conductivity sensor InLab® 731-ISM®, buffer solutions (pH 4.01 / 7.00 / 9.21 / 10.00, 2 pouches of each), conductivity standards (1413 / 12880 µS/cm, 2 pouches of each), LabX®direct PC software, AC-adapter.

Portable anemometer

For measuring current wind speed with highest and mean values, temperature and windchill factor. Wind speed measurement in m/s, km/h, mph or kn. Display of wind force according to Beaufort on a bar graph-wind scale (0 to 12 bft). LCD-back lighting.

Technical specifications:

Measuring range / resolution	0.2 to 30.0 m/s -30.0 to +60.0 °C
Accuracy	±5 % ±1 °C
Dimensions (L x W x H)	98 x 39 x 17 mm
Weight	110 g

Delivery incl. neoprene bag, shoulder strap and cell button battery CR 2032.

Art. No.	Pack Qty.	€
EY92.1	1	53,70

Accessories:

Button cell battery CR 2032 (3 V)	**P858.1**	1 piece	5,35

Current sticks testo 405-V1

By Testo. Mini-anemometer with air current and volume flow measurement. Also features pivotable display. Pull-out telescope, max. 300 mm.

Technical specifications:

Measuring range	0 to 10 m/s -20 to +50 °C 0 to 99 990 m^3/h
Accuracy	±(0.1 m/s +5 % of m.v.) (0 to +2 m/s) ±(0.3 m/s +5 % of m.v.) (outside)
Resolution	0.01 m/s / 0.1 °C
Ambient conditions	0 to +50 °C
Sensor probe	Max. length 300 mm, ∅ 37/36 mm

Delivery incl. batteries (3 x Micro 1.5 V) and attachment clip.

Design	Art. No.	Pack Qty.	€
Without Certificate of Calibration	**P304.1**	1	121,50
With ISO Certificate of Calibration, (5 and 10 m/s)	**P305.1**	1	235,45

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Airflow meter testo 425

By Testo. Anemometer with permanently connected thermal flow probe (cord length approx. 1.2 m) incl. telescopic pipe (length of telescope max. 820 mm). Volume flow calculation via input of channel area.

- **Measures of temperature, flow and volume flow**
- Selective and temporal average determination
- Min/Max-values
- Hold-button for retaining measured value
- Display light
- Auto-off function

Technical specifications:

	Thermal	NTC
Measuring ranges	0 to +20 m/s	-20 to +70 °C
Accuracy	±0.03 m/s or 5 % of m.v.	±0.5 °C (0 to +60 °C) ±0.7 °C (outside)
Resolution	0.01 m/s	0.1 °C
Working temperature	-20 to +50 °C	
Dimensions (W x D x H)	64 x 40 x 182 mm	
Weight	285 g	

Delivery incl. airflow meter testo 425 with permanently connected flow probe incl. telescopic pipe, E-Block-battery 9 V and calibration protocol.

Art. No.	Pack Qty.	€

①

②

① Mini Luxmeter

For monitoring the lighting conditions in the workplace, warehouses etc.
- Measurement range: up to 40 000 Lux
- Automatic zero calibration
- AUTO-OFF function
- Max Hold display
- Backlit display

Technical specifications:

Measuring range	lx	200.0	2000	20 000	40 000
Resolution	lx	0.1	1	x 10	x 100
Accuracy	±5 %				
Photosensor	Silicon photodiode with filter				
Dimensions W x D x H (mm)	54 x 34 x 157				
Weight (g)	138				

Delivery incl. 9 V E-block battery .

Art. No.	Pack Qty.	€
PK79.1	1	54,85

Accessories:

E-Block 9 V battery	**1025.1**	1 piece	4,85

② Pocket Luxmeter LM37

Ideal for measuring intensity of light. Measuring range 0.01 to 40 000 Lux.
- Choose between lx- and fc-units (fc = foot candelas; 1 fc = 10.764 lx)
- Automatic or manual range-changing switch
- With automatic null balancing
- Low battery display and AUTO-OFF function (can be deactivated)
- Hold function

Technical specifications:

①

②

① Luxmeter

Ideal for measuring intensity of light. Measuring range 0.1 to 200 000 Lux. With large 3½ digit LCD display and data hold function. Compact, sturdy and easy-to operate. High accuracy and rapid readings. With automatic zero point alignment.

Technical specifications:

Measuring range	200, 2000, 20 000, 200 000 Lux
Accuracy	±3 % of m.v. ±4 % of m.v. ±10 digits >1000 Lux
Accuracy rerun	±2 %
Photosensor	Silicium-photo-diode
Working temperature	0 to +40 °C / 80 % rF
Power supply/Battery life	9 V / 200 h
Cable photosensor	1.5 m
Dimensions	photosensor: 100 x 60 x 27 mm optosensor: 135 x 72 x 33 mm
Weight	250 g

Art. No.	Pack Qty.	€
E513.1	1	110,75

② Luxmeter

For measuring lighting intensity within a range of 0.01 up to 400000 Lux
- With bar graph display
- Can choose between lx- and fc-units
- With exceeded range display
- Cosine-adjusted angle
- Min/Max-values and hold function
- Auto-power-off function

Technical specifications:

Max. operating temp.	-0 to 40 °C at 80 % rh				
Dimensions (W x D x H)	sensor: 60 x 29 x 92 mm unit: 72 x 35 x 150 mm				
Length of photo sensor cable	150 cm				
Weight	320 g				

Delivery incl. case and 6 Micro 1.5 V batteries.

Art. No.	Pack Qty.	€
EN32.1	1	143,00

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Further measuring instruments

UVA-meter

For mobile measurement of light quality e.g. ambient measurement for plant cultures, etc.

- With 3 measuring ranges
- Low battery display
- Hold function and maximum data logger
- UV-sensor spectrum 320 to 400 nm
- Exceeded range display

Technical specifications:

Measuring ranges	199.9 µW/cm²	1.999 mW/cm²	19.99 mW/cm²
Resolution	0.1 µW/cm²	0.001 mW/cm²	0.01 mW/cm²
Accuracy	±4 %		
Max. operating temperature	0-50 °C at 75 % rh		
Dimensions (W x D x H)	48 x 24 x 155 mm		
Weight	85 g		

Delivery incl. belt holster and 3 Micro 1.5 V batteries.

Art. No.	Pack Qty.	€
EN33.1	1	109,65

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Mini sound level meter

For monitoring permissible noise pollution levels in the workplace, e.g. assessment of office equipment (copiers, printers etc.), and for measuring industrial and environmental noise.

- Max-Min display
- AUTO-OFF function
- Backlit display

Technical specifications:

Measuring range	40.0 to 130.0 dB
Resolution	0.1 dB
Accuracy	±3 dB
Dimensions (W x D x H)	54 x 34 x 157 mm
Weight	131 g

Delivery incl. 9 V E-block battery and wind protection cap.

Art. No.	Pack Qty.	€
PK80.1	1	44,75

Accessories:

E-Block 9 V battery	**1025.1**	1 piece	4,85

Safety glasses 506U

By Univet. Acc. to **EN 166, EN 170.** Clear UV-protective lens made of PC with anti-scratch/anti-fog coating.

- Angle and length adjustable temples
- Soft ear pieces avoid pressure points
- Optimal wearing comfort and adaptation through soft, adjustable nose pad
- Weight 25 g

Frame colour	Art. No.	Pack Qty.	€
white/pink	**CNE8.1**	1	13,40
black/green	**CNE9.1**	1	12,10

ULTRAFIT ear plugs

By 3M. Acc. to EN 352-2. Pre-moulded ear plugs made of thermoplastic elastomer. Thanks to their flat design, they are a perfect fit for any ear canal. To wash the ear plugs use warm soapy water. **Reusable.**
Suitable for sensitive working areas in the foodstuffs and chemicals industries. SNR value: 32 dB.

Type	3M No.	Art. No.	Pack Qty. (pair)	€
① with safety cord	UF01000	**TE80.1**	50	116,10
② with storage box	UF01020	**TE81.1**	50	117,20

▶ Ear protection products from p. 610
▶ Safety glasses from p. 572

Further measuring instruments

Sound-level meter SL328

For monitoring the permitted noise exposure at the workplace and for measuring industrial and environmental noise, e.g. measurement of machine and appliance noise.

- Automatic range switch-over
- With lower and upper range display
- Max hold function for logging the maximum sound level or noise level maximum
- Electronic calibration via integrated oscillator (94 dB, 1 kHz)

Technical specifications:

Measuring range	32.0 to 130.0 dB
Resolution	0.1 dB
Accuracy	±1.5 dB
Dimensions (L x W x D)	206 x 42 x 25 mm
Weight	100 g

Delivery incl. wind protection screen and 2 batteries, Micro 1.5 V.

Art. No.	Pack Qty.	€
EY76.1	1	109,65

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Tachometer testo 465

By Testo. Visual, non-contact speed measurement using reflex marks. Min/max function. Auto-off function.

Technical specifications:

Measuring range	to 99 999 rpm
Distance to object measured	max. 350 mm (14 inch)
Auto-off function	30 sec (average/max./last readings are stored)
Dimensions (L x W x D)	144 x 58 x 20 mm
Weight	145 g

Delivery incl. meter with reflex marks and batteries (2 x Mignon 1.5 V) in a practical case.

Type	Art. No.	Pack Qty.	€
Tachometer set	**P306.1**	1	203,20

Accessories:

Reflex marks, self-adhesive	**P307.1**	5	22,60
Mignon battery/AA 1.5 V	**1022.2**	4	6,05

Geiger-counter Alphaix 3000

Alphaix for attachable Geiger counters. With 5-digit display, time mode for setting measuring intervals and with audible alarm (can be switched off). Battery operated with 9 V-Block battery.
Plastic housing L 120 x W 65 x D 30 mm.
Delivery incl. case for standard unit and counter tubes.
Without counter (please order separately).

Art. No.	Pack Qty.	€
8482.1	1	364,45

Counter tubes for Geiger-counter Alphaix 3000

End window counter type G

- For measuring alpha-radiation from 1.9 MeV, beta-radiation from 0.09 MeV and gamma-radiation from 0.01 MeV
- Dose measuring range 0.0001-1 R/H. Zero rate 30 IPM
- End window diameter 19.83 mm
- Detection limit 4 Bq for caesium 137 (distance 30 mm, length 10 minutes)
- Detection of carbon C^{14} possible

Art. No.	Pack Qty.	€
8484.1	1	408,50

Immersion counter type FSZ

- With two counter probes for measuring liquids and bulk material. Also ideal for foodstuffs with high liquid content.
- Measurement of gamma-radiation from 0.02 MeV and beta-radiation from 0.25 MeV
- Dose measuring range from 0.001-10 R/H. Zero rate 17 IPM
- Detection limit for dry measurements in bulk material in caesium 137 : 0.75 Bq for 25 grammes
- Detection limit for wet measurements in 100 ml caesium 137 solution: for 10 minutes = 63 Bq, for 20 minutes = 46 Bq.

Art. No.	Pack Qty.	€
8486.1	1	375,20

Multi-position counters

Mechanical table counter, multi-position. For counting blood cells, bacterial colonies or for other applications in which different samples must be counted repeatedly. Individual positions count to 999. With sums window for the total count, an acoustic signal is issued after 100 total counts. Rotary knob to reset to 0.

Delivery incl. printed labels for blood cell counts.

Type	L x W x H (mm)	Art. No.	Pack Qty.	€
6-digit	250 x 76 x 56	**ENK8.1**	1	235,45
9-digit	320 x 76 x 56	**ENK9.1**	1	320,35

Manual counter

For mechanical counting from 1 to 9999. Casing made of chromium-plated metal. The counter adds 1 number after each press of the button. Can be reset to 0 using the knob. With retainer ring. Casing ∅ 46 mm. Weight approx. 66 g.

Art. No.	Pack Qty.	€
EE53.1	1	12,40

Laser distance meter

For indoor measurements. Units of measurement: m, in or ft. Backlight display. Adjustable measuring plane (bottom and top edges). Auto power-off after 180 s. Data memory for last 20 readings.

Measurement programs: Individual measurement, continuous measurement (max. 100 measurements) e.g. for checking plans, addition/subtraction of individual measured values, volume measurement and indirect measurement using Pythagoras function.

Technical specifications:

Measuring range	0.050 - 50 m
Resolution	0.001 m (1 mm)
Accuracy	±1.5 mm (5 mm to 10 m)
Dimensions (L x W x D)	115 x 48 x 28 mm
Weight	300 g

Delivery incl. belt bag and 2 Micro 1.5 V batteries.

Art. No.	Pack Qty.	€
TY93.1	1	129,00

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Flow meters with propeller

With 2 hose connectors, length 25 mm, ∅ 6-11 mm. Minimum flow 150 ml/min. Pressure load max. 2 bar. Dimensions: W 90 x H 40 x D 15 mm. Weight 12 g.

Made of styrene-acrylonitrile (SAN)
For water and similar liquids.
Temperature stable up to +30 °C.

Colour	Art. No.	Pack Qty.	€
blue	**1736.1**	1	11,75
red	**E486.1**	1	11,40
black	**E487.1**	1	11,40

Made of polymethylene pentene (PMP)
Can be sterilized. Resistant to most chemicals.
Temperature stable up to +60 °C.

Colour	Art. No.	Pack Qty.	€
blue	**E488.1**	1	14,55
red	**1737.1**	1	14,85

Leakage monitors

Ideal for monitoring all equipment operated by water. Prevents flooding by **automatic water cut-off** via magnetic valve. Highly sensitive moisture sensor sets off audible alarm and closes magnetic valve upon detection of 0.5 mm water.

Technical specifications:

Magnetic valve	¾″-connection and 12 V safety low voltage
Minimum pressure difference	0.5 bar
Moisture sensor	with 2 m cable
Connector shell	with shockproof plug connector and socket

Leakage monitor I

Comes ready to use. With control unit, moisture sensor, magnetic valve and alarm buzzer.

Art. No.	Pack Qty.	€
H481.1	1	137,60

Leakage monitor II

Comes ready to use. With control unit, moisture sensor, magnetic valve and alarm buzzer. Plus machine switch-off function in emergencies (to 16 A, 220 V, 50 Hz).

Art. No.	Pack Qty.	€
H482.1	1	162,35

Accessories for leakage monitors I and II

Extension cord for moisture sensor.

Length (m)	Art. No.	Pack Qty.	€

5	**H500.1**	1	18,50
10	**H501.1**	1	21,45

Flow indicator with ball

Made of **SAN**, transparent, with ball and two hose fittings.
For easy visual monitoring of flow rates. Minimum flow rate: 140 ml/min for liquids, 8 l/min for gases. Temperature stable up to +50 °C.
Connectors for hose inside ∅ 6.5-10 mm.
Dimensions: W 102 x D 57 x H 14 mm. Weight 16 g.

Art. No.	Pack Qty.	€
TT47.1	1	14,80

AQUASTOP® II laboratory cooling water monitor

For monitoring cooling water flow and temperature in the laboratory.
For installation in apparatus that runs without permanent supervision.
Power supply and water supply are cut off in case of irregularities or when the preset temperature limit is exceeded.

Application:

- If the flow rate drops below the preset minimum level, the solenoid valve shuts off the coolant supply and connected electrical device (e.g. heating mantle) is de-energised.
- If the maximum temperature is exceeded, the solenoid valve stays open, the apparatus continues to be cooled and the electrical device is de-energised.

The temperature at the coolant outlet is recorded by the internal NTC sensor integrated in the flow sensor. As an option, an external Pt 100 temperature sensor which automatically deactivates the internal sensor can be installed in a freely selectable position on the test set-up (if required, please order separately).

Features:

- 2-line LED display for simultaneous display of flow rate and temperature
- LED for switching status and alarm indication
- Freely selectable alarm limits
- Acoustic pre-alarm alerts user before final deactivation
- With Schuko socket on the back

Technical specifications:

Flow measuring range	2 to 99 l/h
Temperature measuring range Internal NTC sensor External Pt 100 temperature sensor	 0 to +80 °C 0 to +250 °C
Setting accuracy	±1 l/h or ±1 °C
Fuse	16 A mT (load) 0.5 A mT (solenoid valve) 0.2 A mT (control)
Solenoid valve connections to tap to apparatus	 ¾ inch female thread ¾ inch male thread or ∅ 10 mm tubing connector
Rated power/rated current	35.5 kW / 15 A
Dimensions (W x H x D)	205 x 175 x 78 mm
Weight	1.3 kg
Power supply	230 V, 50 Hz

Delivery incl. solenoid valve, flow sensor with internal NTC sensor and tubing connectors for hoses with 10 mm internal ∅.

Electronic hanging balances HDB-series

By Kern. With Data-Hold function for "freezing" the weight reading for 5 s. Hook made of stainless steel, folding. AUTO-OFF function engages after 5 min without any load change. Dimensions: W 70 x D 25 x H 105 mm (with hook 195 mm). Weight approx. 150 g.
Delivery incl. 2 batteries Micro 1.5 V.

Model	Weighing range (kg)	Readability (g)	Art. No.	Pack Qty.	€
HDB 5K5N	5	5	**HK43.1**	1	60,00
HDB 10K10N	10	10	**HK44.1**	1	60,00

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Pocket balance model TEE 150-1

- **Weighing range 150 g. Readability 0.1 g**
- Blue, backlite LCD display
- AUTO-OFF function after 2 min without load change, function can be disabled.
- Dimensions of weighing pan: W 60 x D 64 mm
- Overall dimensions of balances: W 67 x D 100 x H 22 mm
- Weight approx. 100 g

Delivery incl. plastic cover and 2 Micro 1.5 V batteries.

Art. No.	Pack Qty.	€
HL50.1	1	38,00

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Pocket balance model TCB

By Kern.
- **Weighing range 200 g. Readability 0.1 g**
- Automatic switch-off after 3 min to prolong battery life
- TARA-function
- Weighing pan rotatable for overload protection
- Dimensions of scales: H 14 mm x Ø 80 mm
- Weight approx. 50 g.

Delivery incl. transport box and two cell-batteries 1.5 V.

Art. No.	Pack Qty.	€
X678.1	1	52,00

Accessories:

Cell battery V 13 GA (1.5 V)	**1938.1**	1 piece	4,85

Electronic pocket balances CM-series

By Kern. **With hinged lid.** Balances in the case are protected against all types of compressive stress. Fitted as standard with tare function, recipe program, automatic switch-off for longer battery life and integrated pocket calculator. Dimensions: balance W 85 x D 130 x H 25 mm, weighing pan 80 x 70 mm. Weight 150 g.
Delivery incl. 2 batteries 1.5 V micro and soft case.

Model	Weighing range (g)	Readability (g)	Art. No.	Pack Qty.	€
CM 150-1N	150	0,1	**P961.1**	1	50,00

EMB-series compact balances

By Kern.

- Large LCD-display with 15 mm high numbers
- Automatic switch-off after 3 min to prolong battery life, can be disabled
- External adjustment
- TARE-function
- Dimensions of weighing pan:
  ∅ 82 mm for EMB 100-3 and EMB 200-3
  ∅ 105 mm for EMB 200-2 and EMB 600-2
  ∅ 150 mm for all other models
- Dimensions of scales: W 170 x D 240 x H 39 mm
- Battery and outlet
- **Without power unit (please order separately if required)**

Delivery incl. batteries: EMB 2200-0: incl. 2 Mignon 1.5 V batteries.
All other models: incl. 9 V Block battery.

Table balances FCE and FCB-series

By Kern.

Features

- LCD display with 25 mm high digits
- External adjustment
- Power-supply or battery operation
- Dimensions of weighing platform: W 252 x D 228 mm
- Dimensions of balance overall: W 270 x D 345 x H 106 mm
- Automatic switch-off after 3 min without a change of load to prolong battery life

Battery not included, please order separately.
One E-Block 9 V battery is required.

Delivery incl. power unit and work protection cover.

FCE-series with weighing platform made of plastic (ABS)

Platform balances DE-A- and DE-D-series

By Kern.

Features

- Backlit LCD display with 25 mm high digits
- Function programs for number of items, recipe, percentage weighing and animal weighing
- RS 232 port
- External adjustment
- Power-supply or battery operation
- Dimensions of weighing platform made of stainless steel W 315 x D 305 mm
- Dimensions of display unit: W 225 x D 110 x H 45 mm

Battery not included, please order separately.
One E-Block 9 V battery is required.

Delivery incl. power supply unit.

Ranger® 3000-series battery-operated industrial balances

By Ohaus.

Applications:

- Piece counting, percent weighing, dynamic weighing (animal weighing), check weighing and accumulating
- Display memory function - display of last stable value, can be initiated manually or automatically
- Adjustable weighing units: kg or g

Equipment:

- External adjustment
- Dimensions of stainless steel weighing platform: W 300 x D 225 mm
- Backlight LCD display
- **Battery operation possible, up to 210 h runtime, approx. 12 h charging time**
- Integrated hook for below-balance weighing
- Adjustable levelling feet and spirit level on the front
- Stability indicator
- Battery charge level indicator
- Automatic deactivation during battery operation (can be switched off)
- RS 232 port

Delivery incl. universal power supply (100-240 V, 50/60 Hz).

External adjustment, non calibratable

Table balances FKB-series

By Kern.

Equipment:

- External adjustment
- Functions: part counting, formulation, percentage weighing and animal weighing
- Backlight display
- Suitable for battery and mains operation
- Auto-Off function, switches balance off after 3 min of non-use to conserve batteries, can be deactivated
- RS 232 data port
- Dimensions of stainless steel weighing plate: 240 x 240 mm

Technical specifications:

Model	Weighing range (kg)	Readability (g)	Reproducibility/linearity (±g)

Navigator precision balances

By Ohaus.

Application:

- Various weighing units are adjustable
- Functions: parts counting, percent weighing, check weighing, accumulating and display-hold function

Equipment:

- Stainless steel weighing platform
- External adjustment
- Backlight LCD display
- **Multifunctional infrared sensors for non-contact operation - e.g. contactless control of the zero/tare function to avoid specimen residues on the keypad**
- Spirit level on the front (lights up when switched on)
- Adjustable levelling feet with non-slip rubber pads
- Stability display and overload protection
- Upgradable with RS 232, USB or Ethernet port (please order separately)
- Battery or mains operation possible

Technical specifications:

Model	Weighing range (g)	Readability (g)	Reproducibility/linearity (±g)	Weighing pan (mm)

PCD-series precision balances

By Kern.

Features

- With separate platform for working in glove bags or fume cupboards
- External adjustment
- Functions: part counting, formulation, percentage weighing and animal weighing
- Backlight display
- Various weighing units can be set, e.g. g, ct, free value etc.
- With spirit level and levelling screws
- Draft shield for model PCD 250-3 and PCD 300-3: Dimensions of weighing space: W 146 x D 146 x H 80 mm
- Mains or battery operation
- Auto-Off function, switches balance off after 3 min of non-use to conserve batteries, can be deactivated

Technical specifications:

Model	Weighing range (g)	Readability (g)	Reproducibility/ linearity (±g)	Weighing pan (mm)
PCD 250-3 (W)	250	0.001	0.002 / 0.005	∅ 105

PCB-series precision balances

By Kern.

Features:

- Backlight LCD display
- Stainless steel platform (Models with ∅ 81 mm have ABS plastic platform)
- External adjustment
- Programs: Piece counting, recipes, percentage and animal weighing
- RS 232-interface
- All models uphold 0.001 g readability and have a wind protection ring
- Battery and outlet operation possible
- AUTO-OFF function after 3 mins to save batteries, feature can be disabled

Technical specifications:

Model	Weighing range (g)	Readability (g)	Reproducibility/ linearity (±g)	Weighing pan (mm)

BTG-series precision balances

Application:

- Percent and counting
- Select from 21 weight units: g, ct, kg, lb, etc.

Features:

- Stainless steel weighing platform
- Backlit display showing the capacity
- With external adjustment
- Three-door glass draft shield on the BTG-303 model (interior height of 150 mm)
- RS 232 data port
- Integrated battery operation for mobile use (up to 40 hrs runtime and approx. 12 hrs charging time)

Technical specifications:

Model	Weighing range (g)	Readability (g)	Reproducibility/linearity (±g)	Weighing pans (mm)
BTG-303 (W)	300	0.001	0.001/0.003	∅118
BTG-2002	2000	0.01	0.01/0.03	188 x 148
BTG-6001	6000	0.1	0.1/0.2	188 x 148

(W) = incl. draft shield

Delivery incl. mains adapter, external additional test weight (class M1) and dust cover (BTG-2002 and BTG-6001 models only).

Electronic laboratory balances 440-series

By Kern. Stainless steel weighing platform. With external adjustment. Programs: piece counting, recipes, percent-weighing and animal weighing with data interface RS 232. Work protection cover supplied as standard. With Art. No. LY72.1 a wind guard ring is also supplied. Can be battery or outlet operated. AUTO-OFF after 3 mins for longer battery life.

Delivery incl. power unit. Please order battery separately.
1 battery E-block 9 V is required.

Accessories:

E-Block 9 V battery	**1025.1**	1	4,85

Calibrated table balance GAB

By Kern. **Application examples:** dispensing balance for pharmacies; manual mixing of tea, coffee etc.

- Functions: piece counting and percentage weighing
- Weighing with tolerance range: entry of upper/lower limits. A visual signal supports dosing and sorting
- RS 232 port
- Stainless steel weighing plate: 294 x 225 mm
- Overall dimensions: W 320 x D 330 x H 125 mm

Delivery incl. mains adapter.

Electronic laboratory balances 572-series

By Kern. **Robust metal housing**. With external adjustment. Programs: piece counting, recipes, percentage weighing. With data interface RS 232. Self-explanatory operation via an informative yes/no-dialogue in the display. With flush-mounted weighing device. Dimensions: W 180 x D 310 x H 90 mm. Article Nos HT19.1 and HT20.1 comes with wind protection ring (∅ 160 mm, H 60 mm).

Technical specifications:

Model	Weighing range (g)	Readability (g)	Reproducibility / linearity (±g)	Weighing pan (mm)

EWJ-series precision balances

By Kern.
Application: piece counting and percent weighing.

Features:
- Timer-controlled automatic internal adjustment
- Capacity indication - LED strip indicates available weighing range
- Draft shield comprising four side parts (H = 90 mm) for models up to ≤600 g
- Spirit level
- RS 232 data port

Technical specifications:

Model	Weighing range (g)	Resolution (g)	Reproducibility/ linearity (±g)	Weighing pans (mm)
EWJ 300-3 (W)	300	0.001	0.001 / 0.003	∅ 80
EWJ 600-2M (W)	600	0.01	0.01 / 0.03	∅ 135
EWJ 3000-2 (W)	3000	0.01	0.01 / 0.03	∅ 135
EWJ 6000-1M	6000	0.1	0.1 / 0.3	155 x 145

(W) = incl. draft shield

Delivery incl. work safety hood and AC adapter (230 V, 50 Hz).

EW- and EG-series precision balances

By Kern.
Application:
- Piece counting, percentage weighing, weighing with tolerance range (upper and lower limiting values are programmable; possible setting in g, pieces or %)
- Capacity display
- Various weighing units such as g, ct, oz etc. can be set
- LCD-display with 16 mm high digits

Design:
- Weighing platform made of stainless steel
- **EW-Models with external adjustment, EG-Models with internal switch-on adjustment via knob on the side**
- Adjusting water level
- Bidirectional RS 232 data interface
- Wind protection comes in series with all 0.001-g-models, with removable lid and opening for pipetting (weighing platform W 158 x D 130 x H 78 mm)
- Dimensions of balance: with weighing platform ∅ 118 and 170 x 142 mm: W 180 x D 235 x H 75 mm, with weighing platform 180 x 160 mm: W 190 x D 265 x H 90 mm

Technical specifications:

FX-/FZ-series precision balances

By A & D.
Application:
- Percent, counting and animal weighing
- Selectable weight units: g, ct, etc.

Features:
- FX-i models have external adjustment
- FZ-i models have internal adjustment
- **All models with additional WP: Dust and water proofing acc. to IP 65**
- Draft shield for models with 0.001 g readability (internal height 85 mm)
- With RS 232 data port
- Overload protection
- Five-year warranty

Precision scales EK series, explosion-proof

By A & D.
For explosive areas in zones 0.1 and 2.

Application:
- Item counter and percentage weighing
- Acc. to ATEX: II 1G ia IIB T3 Ga
- With external adjustment

Features:
- Backlit display, deactivatable
- Auto power OFF for battery saving (battery life approx. 250 h with backlight off)
- Weighing pan made of stainless steel
- Anti-theft lug, bubble, levelling feet

Technical specifications:

Model	Weighing range (g)	Resolution (g)	Reproducibility/linearity (±g)	Weighing pans (mm)

ABS-N and ABJ-NM-series analytical balances

By Kern.

Application:

- Parts counting, percentage weighing and batching
- High stability mode and other filter settings are selectable

Equipment:

- ABS-N models have external calibration
- ABJ-NM models have internal automatic calibration, either after a change of temperature >2 °C or time controlled every 4 hours
- Spirit level
- Overall dimensions of balance incl. draft shield: W 210 x D 340 x H 325 mm
- Weighing space dimensions: W 174 x D 162 x H 227 mm

Technical specifications:

Pioneer™ Series semi-micro, analytical and precision balances

By Ohaus.
Application: item counting, percentage weighing and dynamic weighing.
Features:
- Backlit LCD display
- Glass draft shield with 3 sliding doors for models with 0.00001, 0.0001 and 0.001 g readability (interior height 200 mm)
- Models with draft shield are fitted with an antistatic rod for grounding (made from permanent static, electrically conductive ABS)
- Calibration vial, safety lug
- USB and RS 232 data interface

Technical specifications:

HR-series analytical balances

By A & D.
Application:
- Percent, counting, animal weighing
- Selectable weight units: g, mg, ct etc.

Features:
- HR-A model with external calibration function
- HR-AZ models with internal calibration function
- Backlit LCD display
- Removable full-sized draft shield (internal height 198 mm)
- The sliding doors of the draft shield tilt back to minimise space requirements
- With RS 232 data port
- Spirit level on the front
- Solid metal housing
- Overload protection
- 5 year warranty

Technical specifications:

Models	Weighing range (g)	Resolution (g)	Reproducibility/ linearity (±g)	Weighing pan ∅ (mm)

Entris®-series analytical and precision balances

By Sartorius.
Applications:
- Weighing in percent, counting, animal weighing, conversion, density measurement
- Selectable weight units: g, kg, mg, ct etc.

Features:
- Models with 0.0001 g readability (inner height 240 mm) are supplied with a full draft shield
- Models with 0.001 g readability (inner height 60 mm) readability are supplied with a round glass ring protector
- With RS 232 data interface, antitheft device and spirit level
- Monolithic weighing technology

Technical specifications:

Practum®-series analytical and precision balances

By Sartorius.

Applications:
- Percent weighing, checking, maximum value, counting, animal weighing
- Selectable weight units: g, kg, mg, ct etc.
- Made in Germany

Equipment:
- With external calibration function
- Touchscreen operation
- 10 different menu language options can be selected
- Full-sized draft shield for models with 0.0001 g / 0.001 g resolution (internal height 209 mm)
- Mini-USB port for automatic detection of Sartorius standard printer YDP40 (please order separately) or direct data transfer e.g. to Microsoft® Excel without additional software. Programmable interval for data output
- Menu lock for protection against accidental manipulation
- Levelling feet and glass level indicator on the front
- Anti-theft device for chain or cable

ABT-series semi-micro balances

By Kern.

Application:
- Programs: Piece counting, percentage weighing and recipes
- Different filter settings possible
- LCD-display with capacity display
- Different weighing units can be set, e.g. mg, g, ct

Features
- Monolithic weighing technology
- With internal automatic adjustment: that is dependent on time, temperature or individual per keystrokes
- RS 232-interface
- Stainless steel weighing platform
- Overall dimensions of balances incl. windbreak: W 217 x D 356 x H 338 mm
- All glass windbreak (inner height 223 mm)

Technical specifications:

Model	Weighing range (g)	Readability (g)	Reproducibility/Linearity (±g)	Platform (mm)
ABT 120-5DNM (W)	42 / 120	0.00001 / 0.0001	0.00002 / 0.00003 0.0001 / 0.0002	∅ 80

(W) = incl. windbreak

Delivery incl. work protection cover for display.

Model	Weighing range (g)	Pack Qty.	Not calibratable Art. No.	Not calibratable €	Calibrated ex works Art. No.	Calibrated ex works €

Analytical and precision balances, Adventurer® series

By Ohaus.

Application:

- Percentage weighing, parts counting, animal weighing, check weighing, density measurement, batching, display-hold function and totalising
- Selectable weight units

Features:

- All balances are available with external adjustment or with AutoCal™ - automatic time and temperature controlled internal calibration
- Colour touchscreen with graphical LCD display and additional mechanical buttons for tare, calibration etc.
- Removable stainless steel weigh pan
- Language selection (nine languages)
- Analytical full-sized draft shield for models with 0.0001 g / 0.001 g resolution (internal height 230 mm)
- Minimum sample weight function - a warning is displayed if the current sample weight is below the defined minimum sample weight
- **Two USB ports - one USB host port on the front for saving weighing data directly to a USB stick (not supplied) and an additional USB port on the back for connecting to a PC**
- RS 232 interface
- Integrated hook for below-balance weighing

Technical specifications:

Quintix®-series analytical and precision balances

By Sartorius.

Applications:

- Mixing, components, statistics, conversion, percent weighing, checking, maximum value, counting, animal weighing
- Made in Germany

Features:

- With isoCAL - fully automatic, temperature and time controlled internal calibration
- Touchscreen with easy menu navigation
- 10 different menu language options can be selected
- Full-sized draft shield for models with 0.0001 g / 0.001 g resolution (209 mm internal height)
- Mini USB port for automatic detection of Sartorius standard printer YDP40 (please order separately) or direct data transfer e.g. to Microsoft® Excel without additional software. Programmable data output interval
- Password protection - menu lock for protection against accidental manipulation
- Levelling feet and glass level indicator on the front
- Anti-theft device for chain or cable

Explorer series precision and analytical balances

By Ohaus.

Applications:

- Numerous balance applications (piece counting, percentage weighing, animal weighing, check weighing, batching etc.) and additional library for saving personal settings
- Various weighing units (e.g. g, mg, ct, etc.) can be set.
- High-resolution colour VGA touchscreen (145 mm diagonal) with QWERTY and block keypads
- Touchscreen display can be detached from the weighing platform (length of cable 1.5 m)

Equipment:

- Metal housing, ABS upper housing shell and stainless steel weighing pan
- All models have fully automatic time and temperature controlled internally calibrated (AutoCal)
- Full-sized draft shield for models with 0.0001 g and 0.001 readability (inside height 230 mm)
- Multifunctional sensors for non-contact operation - e.g. contactless control of the zero/tare function to avoid specimen residues on the keypad. Two sensors on the platform and two on the display are independently adjustable.
- With USB and RS 232 communication ports
- Integrated weighing hook on underside of balance and illuminated spirit level on the front

Technical specifications:

Secura®-series analytical and precision balances

By Sartorius.

Applications:

- Mixing, components, statistics, conversion, percent weighing, checking, maximum value, counting, animal weighing
- Made in Germany

Features:

- With isoCAL - internal calibration is performed automatically in a time or temperature controlled manner and after levelling
- Touchscreen optimised for users in the pharmaceuticals laboratory
- **Optoelectronic levelling sensor with interactive user guidance** (if the sensor detects deviations, the risk is indicated immediately and a specific help text is displayed)
- 10 different menu language options can be selected
- Full-sized draft shield for models with 0.0001 g / 0.001 g resolution (209 mm internal height)
- Three configurable safety levels
- Mini USB port for automatic detection of Sartorius standard printer YDP40 (please order separately) or direct data transfer e.g. to Microsoft® Excel without additional software. Programmable interval for data output
- Storage of completed calibration cycles incl. detected deviation

APC functions (Advanced Pharma Compliance) are possible:

- Monitoring of minimum sample weight according to USP
- Blocking of data transfer to printer or computer in case of uncertain weighing results, e.g. unlevelled balance etc.

Please note:

Activation of the APC functions by a separate service.
If this service is desired, additional costs apply.
Please ask our sales staff.

Hygrometer

Semi-micro balances and analytical balances, GR-series

By A & D.

Application:

- Percent, counting
- Selectable weight units: g, mg, ct

Features:

- With internal automatic calibration function which adapts to changes of temperature
- Automatic adaptation to ambient conditions
- **Door opening system** allows the user to open the left or right hand side of the weighing chamber from the front of the balance. For easy access with only one hand free.
- Full-sized draft shield (internal height 215 mm)
- Data storage function for storing 200 units of weighing data for output to PC. Windows-compatible software (for direct readout of data, e.g. in Excel), available for download free of charge.
- Interval storage mode (measuring cycle: 2 sec, 5 sec, 10 sec, 30 sec, 1 min, 2 min, 5 min or 10 min
- With RS 232 data port
- Spirit level on the front
- Five-year warranty

Technical specifications:

MB Basic-series hygrometers

By Ohaus.

Features on both models

- Illuminated display
- RS 232 interface
- 2 selectable switch-off criteria: automatic or time-controlled
- Display: % moisture or weight value as well as temperature and time

Model MB 23

- Heater: Infrared heating system

Delivery incl. protective cover. If you want a holder for sample bowls, please order separately.

Model MB 25

- Heater: halogen heating system

Delivery incl. protective cover and holder for sample bowls.

Technical specifications:

Model	MB 23	MB 25
Weighing range	110 g	
Temperature range	50 to 160 °C (5 °C increments)	
Heating technology	Infrared (no glass)	Halogen
Readability	0.1 % /0.01 g	0.05 % /0.005 g
Reproducibility	0.3 % (3 g sample) 0.2 % (10 g sample)	0.2 % (3 g sample) 0.05 % (10 g sample)
Time settings	1 to 99 min (30 sec increments to 60 min)	
Weighing pan	∅ 90 mm	
Scope of samples	Typically 3 to 20 g, min. 0.5 g	
Dimensions (W x D x H)	165 x 283 x 132 mm	
Weight	2.3 kg	
Power connection	100 to 240 V, 50/60 Hz	

Model	Art. No.	Pack Qty.	€
MB 23	**KT40.1** *	1	1055,00
MB 25	**KT41.1** *	1	1480,00

DAB 100-3 moisture analyser

By Kern.

Features:

- Backlight display: % humidity, % dry matter or weight loss in g
- Heat source: Halogen quartz glass heater
- Switch-off criteria:
  - Automatic switch-off (2 mg weight loss in 45 sec)
  - Scheduled switch-off (3 min up to 99 hrs 59 min in 10 sec intervals)
  - Manual switch-off by pressing a button
- Drying modes: Standard, gentle and quick drying
- Internal memory for automatic execution of 15 drying processes and five memory spaces for test results
- RS 232 data port
- Sample viewing window

Technical specifications:

Weighing range	110 g
Temperature range	40 to 199 °C (1 °C increments)
Readability	0.01 %/0.001 g
Reproducibility	0.05 % (5 g sample) 0.02 % (10 g sample)
Time range	3 min up to 99 hrs, 59 min
Weighing pan	∅ 92 mm
Dimensions (W x D x H)	240 x 365 x 180 mm
Weight	4.82 kg
Power supply	220 V, 50 Hz

Art. No.	Pack Qty.	€
EEK2.1	1	1050,00

Accessories:

Disposable aluminium sample pans, 90 mm	**YY18.1**	80	60,00
Glass fibre filter, ∅ 90 mm	**X838.1**	200	46,00
Calibration weight 100 g, F1	**N007.1**	1	44,00

Hygrometer DBS 60-3

By Kern.

Equipment:

- Displays: % humidity, % dry matter, ATRO % or weight loss in g
- Heat source: halogen quartz glass heater
- Switch-off criteria:
  AUTO = drying stops if the set weight loss remains constant for 30 s
  TIME = drying stops on expiration of the set time
  Manual = stop button
- Drying modes: standard drying, phase drying, soft drying, activatable preheating phase and rapid drying
- Internal memory for automatic execution of 10 drying programs and 100 drying processes carried out
- RS 232 data port
- Sample code for up to 99 samples, 2-digit, freely programmable
- Date and time display
- Specimen viewing window

Technical specifications:

Weighing range	60 g
Temperature range	50 to 200 °C (1 °C increments)
Readability	0.01 % / 0.001 g
Reproducibility	0.15 % (2 g specimen) 0.02 % (10 g specimen)
Time range	1 min to 12 h
Weighing pan	∅ 95 mm
Dimensions (W x D x H)	202 x 336 x 157 mm
Weight	4.2 kg
Power supply	220 to 240 V, 50/60 Hz

Art. No.	Pack Qty.	€
TE06.1	1	1270,00

Accessories:

Disposable aluminium sample pans, 90 mm	**YY18.1**	80	60,00
Glass fibre filter, ∅ 90 mm	**X838.1**	200	46,00
Calibration weight 50 g, F1	**N006.1**	1	39,60
Temperature calibration set	**TE07.1**	1	450,00

Hygrometer

Hygrometer MA35M

By Sartorius. For the determination of moisture content in organic and inorganic substances, e.g. in greases, oils, foodstuffs, building materials, wood or paper. For use in chemistry, pharmaceutics, environmental analytics or in sewage treatment plants.

Equipment:
- Heat source: infrared lamp
- RS 232 data port
- Display: % moisture content, % dry matter (residue), ATRO % or in weight values
- 2 selectable switch-off criteria: time controlled and automatic switch-off options (moisture determination ends if no significant weight loss is detected)
- A 30 g calibration weight is required for calibration of the moisture analyzer (please order separately)
- **With window for observation of the sample material**

Technical specifications:

Weighing range	35 g
Temperature range	40 to 160 °C (1 °C increments)
Readability	0.01 % / 0.001 g
Reproducibility	0.20 % (1 g specimen) 0.05 % (5 g specimen)
Time range	0.1 to 99 min
Weighing pan	90 mm
Dimensions (W x D x H)	224 x 366 x 191 mm
Weight	5.8 kg
Power supply	230 V, 50/60 Hz

Delivery incl. sample pan holder.

Art. No.	Pack Qty.	€
NT00.1	1	2390,00

Accessories:

Calibration weight 20 g, F1	**N005.1**	1	36,30
Calibration weight 10 g, F1	**N004.1**	1	34,00
Aluminium disposable sample trays, ∅ 90 x H 7 mm	**X837.1**	80	31,00
Glass fibre filter, ∅ 90 mm	**X838.1**	200	46,00

MB-series moisture analyser

By Ohaus.

Features of both models
- Halogen heating technology
- 4.3″, QVGA, TFT touchscreen and 4 mechanical buttons
- Display results: % moisture, % solids, % moisture absorption, time, temperature, weight, method name
- 13 operating languages
- RS 232, USB host, USB device

Model MB90
- 3 switch-off criteria (manual, time-controlled or automatic)
- Storage of up to 2 methods and 100 test results for each method
- 2 heating profiles (standard and fast)

Model MB120
- 7 switch-off criteria (manual, time-controlled, AutoFree selectable %/s, AutoFree selectable mg/s, A30, A60 and A90)
- Storage of up to 100 methods and 1000 test results for each method
- 4 heating profiles (standard, fast, gentle/ramp and gradual)

Technical specifications:

Model	MB90	MB120
Weighing range (g)	90	120
Temperature range (°C)	40 to 200 (1 °C increments)	40 to 230 (1 °C increments)
Readability	0.01 %/0.001 g	
Reproducibility	0.18 % (3 g sample) 0.02 % (10 g sample)	0.05 % (3 g sample) 0.015 % (10 g sample)
Time setting (h)	48	
Weighing pan (mm)	90	
Dimensions W x H x D (mm)	210 x 180 x 350	
Weight (kg)	5.23	
Power supply	100 or 240 V, 50/60 Hz	

Delivery incl. work protection cover and stainless steel sample tray holder.

Model	Art. No.	Pack Qty.	€

Accessories:

Aluminium disposable sample trays, ∅ 90 x H 7 mm	**X837.1**	80	31,00
Glass fibre filter, ∅ 90 mm	**X838.1**	200	46,00
Calibration weight 50 g, F1	**N006.1**	1	39,60

Balance table

For analytical laboratories. Absorbs oscillations and vibrations which would otherwise falsify weighing results. Workbench with aluminium profile frame and height-adjustable feet. Polished marble slab (36 kg) as integrated worktop, mounted on absorbent rubber elements. Balance plate dimensions: W 267 x D 405 x H 120 mm.
Outer dimensions fully assembled: W 770 x D 650 x H 815 mm.
Overall weight approx. 55 kg.

Ioniser for balances

By Kern. Suitable for neutralising static charge. Non-conductive samples, e.g. plastic, porcelain, glass etc. is often statically charged. The resultant electromagnetic field between the sample and balance can falsify the weighing result.

- For weighings in the milligramme range or finer
- Blower can be switched on and off

Technical specifications:

"Sample - ion source" distance	approx. 5 to 40 cm
Discharge time	9 s/5 cm, 13 s/10 cm, 100 s/40 cm (with the blower switched on)
Max. air volume	0.06 cm^3/min
Dimensions (W x D x H)	110 x 105 x 60 mm
Weight	310 g
Power supply	110 to 240 V, 50/60 Hz

② 2 + 2-way	**XK33.1**	1	8,85
③ 6-way	**XK34.1**	1	12,15

Socket strips Eco-line, 3-way with switch

Inclined socket arrangement. Illuminated for safety, 2-pole on/off switch.
Dimensions: W 240 x D 100 x H 65 mm. Max. 3500 W, 16 A.
Power supply 230 V.

Design	Art. No.	Pack Qty.	€
Cable length 3 m	**HHN0.1**	1	10,45
Cable length 5 m	**HHN1.1**	1	15,00

Socket strips

Made of highly breakproof special plastic. Inclined plug contacts enable 4/6 right-angle plugs to be used simultaneously. Integrated on/off switch indicates whether operational. With practical device for winding up and storing cable after use. Can also be attached to wall. Wall attachment device incl. With 2 m cable (4-way strip) and 3 m cable (6-way strip). Colour anthracite/bordeaux.

Design	Length (mm)	Art. No.	Pack Qty.	€
4-way socket strip	approx. 320	**E757.1**	1	15,20
6-way socket strip	approx. 410	**E758.1**	1	22,15

Socket strips 6-way

With surge and high-voltage protection.
Protects working appliances from destruction by surges, indirect lightning or spikes in the network up to 4500 A, e.g. by passing the current through inductive load resistors. Inclined plug contacts for up to 6 central and right-angle plugs. Suitable for appliances to max 16 A or 3680 W maximum load. 2-pole on/off switch with pilot light.1.5 m cable H05 VV-F 3G1,0. Shockproof plug 16 A, 230 V.

Colour	Art. No.	Pack Qty.	€
black	**P685.1**	1	24,70
light grey	**P686.1**	1	24,70

Socket strips, 4-way, IP44

Also for use outdoors. With self-closing lids, degree of protection IP 44. Approx. 2 m rubber/neoprene connection cable. Screw hole for fastening. W 410 x D 100 x H 50 mm. Max. 3680 W, 16 A. Power supply 250 V.

Art. No.	Pack Qty.	€
HHN7.1	1	16,10

Multiple socket outlets

IP54-Socket block for 5 plugs

For heavy-duty applications and outdoor use. Splash-proof (IP 54).
Shockproof and breakproof plastic enclosure.
Connection with **RCCB-socket (residual current circuit breaker)**
30 mA protects against dangerous electrical accidents.
Illuminated 2-pin on/off switch with protective lid. 5 splashproof sockets with gasket ring and self-closing flap lid for protection against dirt, in compliance with VDE. Sockets in 45°-array. Cord length 5 m.
Dimensions: L 480 x W 80 x H 62 mm.

Art. No.	Pack Qty.	€
KP32.1	1	50,50

Current distributor with 4 x socket output

With shockproof plug. Made of a highly breakproof special plastic.
With 3 m power cable (rolled up in housing). Very flat (height 60 mm), ∅ 180 mm. Colour black/white.

Art. No.	Pack Qty.	€
E759.1	1	13,90

Socket outlet, 4-way with USB charging function

Made of aluminium. For connecting and switching units directly on the table.
Protective contact socket outlets in 45° arrangement.
2 USB charging sockets. (Total charging current max. 2100 mA).
Safety switch illuminated, 2-pole on/off switch. Cable length: 1.8 m.
Dimensions: W 377 x D 150 x H 95 mm. Max. 3500 W, 16 A.
Power supply 230 V.

Art. No.	Pack Qty.	€
HHN2.1	1	36,45

Safety cable reel

With automatic overheating and accident protection system.
Current is out of at +55 °C and red control lamp flashes.
Wattage 220 V/4 A. Designed for max. 3500 W when cable is rolled out.
With 4 grounded socket outlets and cable with shockproof plug.
Dimensions: H 230 x D 105 mm, ∅ 190 mm.

Design	Art. No.	Pack Qty.	€
Length of cord 5 m	**HHN3.1**	1	20,65
Length of cord 10 m	**4687.1**	1	25,80

Extension leads

PVC-sheathed flexible cord. With shockproof plug.

5	**Y204.1**	1	18,75

Plug time switch with storage capacity for 20 switching modes

Shortest indexing time 1 min, every minute programmable. Battery reserve: 3 years. 20 slots (10 in, 10 out). 7-day indexing program with block structure: Daily blocks (Mon-Sun., Mon-Sat, Mon-Fri, Sat-Sun, individual days). Manual changeover between summer/winter time, 12/24 hr mode. An engageable random generator delays the indexing commands by up to 30 minutes. Permissible ambient temperature: -10 to +50 °C. Switching power 16 A. Electrical supply 230 V / 50/60 Hz. **Delivery without** batteries. A CR 2032 (3 V) round cell battery is required for operation. Please order separately.

Art. No.	Pack Qty.	€
CH61.1	1	48,20

Accessories:

Button cell battery CR 2032 (3 V)	**P858.1**	1 piece	5,35

Time switch

Mechanical and has daily cycle with 96 switching modes. Simple to programme. Shortest switching interval 15 min. accurately synchronized with the power outlet. Working temperature -10 to +55 °C. Max. load 3500 W. Dimensions: H 145 x W 74 x D 39 mm.

Art. No.	Pack Qty.	€
A405.1	1	20,75

Time switch with thermo sensor

Enables time or temperature controlled switching. Operational in time mode, temperature mode or both modes simultaneously. **Time mode** provides 3 possible on/off periods every 24-hours. **Thermostat mode** automatically switches the connected device on when a preset temperature has not been attained.

Technical specifications:

Ideal for temperatures	0 to +40 °C
Accuracy	±1 °C
Sensor cable	1 m
Max. load	up to 3500 W
Dimensions (H x W x D)	130 x 55 x 55 mm
Weight	250 g

Delivery incl. battery Micro 1.5 V.

Art. No.	Pack Qty.	€
C012.1	1	48,35

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Plug time switch

Mechanical. Has a weekly cycle (7 x 24 h). Shortest switching interval is 2 hours. Simple programming (every 2 h) with manual switch. With 84 switching modes. With switching status indicator. Max. load 3500 W.

Art. No.	Pack Qty.	€
C536.1	1	30,65

One-hour signal timers

In plastic housing. With spring drive. When the set time has elapsed, a discreet but easily audible bell signal sounds.
Dimensions: W 70 x D 40 x H 70 mm. Weight approx. 108 g.

Accessories:

Button cell battery CR 2032 (3 V)	**P858.1**	1 piece	5,35

Rotilabo®-timer

Count-down/count-up feature. Maximum runtime 99 min, 59 s.
Start/stop button with visual timer status indicator (green = time counting down; red = preset time expired).
After the countdown stops, an acoustic signal sounds for 1 min and is indicated visually. Two different volumes or mute mode can selected.
Timer memory function for 3 times. Includes stand, magnet for fixing to metal surfaces and hanging attachment.
Dimensions: L 90 x W 60 x D 20 mm.
Delivery incl. 2 1.5 V micro batteries.

Art. No.	Pack Qty.	€
TA16.1	1	16,10

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

NEW

Count-down timer cube

Cube with 4 preset expiry times. **Simple time entry:** The desired time is selected by turning the corresponding side up. **5, 15, 30 or 60 min can be selected**. The count-down display counts seconds backwards.
Pulsating LED signals operation (can be deactivated).
Adjustable alarm tone (off/quite/loud).
Activatable pre-alarm (10 s before the time expires).
Dimensions: W 60 x D 60 x H 60 mm. Weight 70 g.
Delivery without batteries. Requires 2 1.5 V micro batteries.

Art. No.	Pack Qty.	€
HPC6.1	1	16,10

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

2-channel timer

With two independent channels for separate time measurement.
Count-down/Count-up. Maximum runtime 99 min, 59 sec.
Start/stop button with visual timer status indicator
(green = time counting down; red = preset time expired).
After the countdown stops, an acoustic signal sounds for 1 min and is indicated visually. Two different volumes or mute mode can selected.
Includes stand, magnet for fixing to metal surfaces and hanging attachment.
Dimensions: L 88 x W 75 x D 20 mm.
Delivery without batteries. Requires 2 micro 1.5 V batteries.

A802.1	1	16,75

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Triple Timer XL

With large display (80 x 60 mm) and clock. Three separate timers in one device. All three displays have a count-down function. Max. run time 19 h, 59 min and 59 sec. After the count-down is complete a beep sounds for 1 min and the timer begins to count up. Count-up function for display with 1/100 second display. Memory function. With mounting magnet, wall mount and folding stand. Dimensions: W 103 x D 121 x H 20 mm.
Delivery incl. 2 micro 1.5 V batteries.

Art. No.	Pack Qty.	€
PT76.1	1	18,85

Accessories:

Battery Micro/AAA 1,5 V	**1021.2**	4 pieces	6,40

Laboratory timer

With 24-hour clock and calendar. Count down/count up function.
Extra large LCD display (L 140 x W 40 mm).
Can be programmed for 23 h, 59 min, 59 sec. Alarm signal at „0“. Timer memory function. Dimensions: L 160 x W 90 x D 68 mm.
Delivery incl. battery Baby 1.5 V.

Art. No.	Pack Qty.	€
Y224.1	1	94,50

Accessories:

Baby/C 1.5 V battery	**1023.2**	2 pieces	4,85

Rotilabo®-timer 3-line

Large 3-line LCD display. **Three separate timers in one unit.** Countdown/countup for all three displays and memory function. Counts up to 99 h, 59 min and 59 sec. Alarm signal at "zero". Clock with 12/24 h adjustable format. With clip for hanging and standing and with magnet. Dimensions: W 83 x H 70 x D 22 mm. Weight 80 g.
Delivery incl.1.5 V cell battery.

Art. No.	Pack Qty.	€
P874.1	1	24,50

Accessories:

Cell battery V 13 GA (1.5 V)	**1938.1**	1 piece	4,85

Rotilabo®-stopwatch

Splashproof. 24 hour running time. 1/100 sec display over 30 minutes. Split-time display. Also features clock, calendar and alarm function. Snooze function.
Dimensions: L 69 x W 59 x D 19 mm.
Delivery incl. 1.5 V button cell battery.

Art. No.	Pack Qty.	€
L423.1	1	9,85

Accessories:

Cell battery V 13 GA (1.5 V)	**1938.1**	1 piece	4,85

Stopwatches

Hand stopwatch

Splash-proof. Max. runtime 23 h 59 min 59 sec. 1/100 sec display over 30 minutes. **With count-down timer function.** Readable time intervals. Additionally with time, date, hourly signal and alarm.
Dimensions: W 62 x D 25 x H 75 mm. Weight 95 g.
Delivery incl. button cell battery CR 2032, 3 V.

Art. No.	Pack Qty.	€
EK01.1	1	26,85

Accessories:

Button cell battery CR 2032 (3 V)	**P858.1**	1 piece	5,35

Winding stopwatches

Winding by hand. Brass housing, chrome-plated.

Technical specifications:

Model	**① Basic**	**② Classic**
Max. measuring range	15 min	30 min
Resolution	1/10 sec	1/5 sec
Start/Stop	Winder	Winder
Resetting	Winder	Zero setting
Interval button	No	Yes
Dimensions	∅ 50 mm	
Weight	100 g

Mignon battery/AA 1.5 V	**1022.2**	4 pieces	6,05

Pocket calculators

Chemistry-/LifeScience-pocket calculator Chemcode®

Design:
- Keypad with classification of elements and numerical keypad
- Keys for nucleotides for DNS (A, T, G, C) and RNS (A, U, G, C)
- Two-line display with scroll-function
- Scientific calculating functions
- Dimensions: L 136 x W 110 x D 14 mm

Stoichiometric functions

Display: molar mass, ideal gas volume, weighing-in mass in g, amount of substance in mol.

Calculation: total formula, share of single elements or element groups in % or g, amount of substance in g. Conversion of substance concentration (mol/l; molarity) into substance mass concentration (g/l) and inverse, mass-% in molarity. When diluting, it determines the volume to be used in litres and calculates the substance amount in mmol during titration.

Molecularbiological function for PCR®

Display: protein codes, %-share of guanin and cytosin, molar mass of nucleotide sequence and protein sequence, substance amount in nmol, optical density, substance amount of DNS-portion in ng, melting temperature of oligonucleotide.

Lexical functions
- Conversion in °C, F and Kelvin
- Retrieval of different constants (Avogadro, Faraday etc.)
- Function to retrieve chemical, physical and biological properties of the elements and additional information such as melting point, boiling point, electron gativity, detection year, etc.

Delivery incl. 4 spare batteries, cell CR 2025.

Art. No.	Pack Qty.	€
CE95.1	1	120,40

Accessories:

CR 2025 button cell battery (3 V)	**CH14.1**	1 piece	5,35

Solar standard calculator Sharp EL-243S

8-digit LCD display. Solar and battery operated. With root and percentage calculation. Memory. Hinged protective cover (folds by 180°).
Dimensions (open): 11 x 104 x 64 mm, weight approx. 51 g.
Delivery incl. backup-battery.

Art. No.	Pack Qty.	€
LN02.1	1	9,15

Solar pocket calculator LCD1000P

By Olympia. **Water and dustproof housing** according to IP 54.
With shock-absorbing rubber edges. 12-digit LCD display.
Solar and battery operated. Root/percentage calculation. Memory.
Dimensions: L 158 x W 106 x H 40 mm. Weight approx. 146 g.
Delivery incl. backup battery.

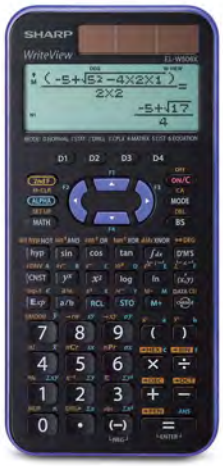
Art. No.	Pack Qty.	€
LN01.1	1	24,35

NEW

Sharp EL-340W solar-powered pocket calculator

12-digit display, movable. Solar- and battery-powered. Number of decimal places (F-3-2-0-A) can be selected. Four-key memory. "00" button. Correction button. Tax calculation. With function for calculating roots and percentages. Dimensions: W 127 x L 185 x H 17 mm, weight 199 g. **Delivery incl.** CR2032 backup battery.

Art. No.	Pack Qty.	€
KCT4.1	1	21,45



Scientific calculator Sharp EL-W506X-VL

Combined solar and battery operation.
4-line display with 96 x 32 dot matrix. Direct algebraic input logic.
4 freely assignable keys for frequently used functions.
4 cursor keys for quick input/processing. Memory retention.
With 556 functions, such as mathematical, trigonometric, statistical and scientific functions. 9 memory variables.
Database with natural constants and metric conversions.
Dimensions: L 168 x W 80 x H 14 mm. Weight 100 g.
Delivery incl. protective cover and backup battery.

Art. No.	Pack Qty.	€
CHA8.1	1	34,55

Solar scientific calculator TI-30 X II S

2-line display for statistics and scientific functions. **11-digit, scrollable entry line** and 10-digit results line. **Combined solar and battery operation.** With many functions, such as automatic simplification of fractions, trigonometry functions, 5 storage variables, random number generator, etc. Dimensions: W 82 x D 155 x H 19 mm. **Delivery incl.** protective bag and backup battery.

Art. No.	Pack Qty.	€

High-pressure laboratory autoclaves from Roth

Have a wide application range in research laboratories or for routine examinations. All autoclaves follow the current safety standards and are extremely robust. They should only be operated by qualified staff after taking all of the necessary safety precautions. Features include extremely reliable safety system (bursting disc) which automatically reduces the pressure and prevents the autoclave from being damaged in the case of excess pressure.

Examples of applications:

- Gas reactions under pressure
- Hydrogenation
- Anorganic chemical synthesis
- Organic-chemical synthesis
- Crystal growing
- Material testing
- Disintegration of organic cells

OVERVIEW
High-pressure laboratory autoclaves from ROTH

	Model 0	Model I	Model II			Model IV
Max. working volume (ml)	50	100	200	300	250	500
Max. working pressure (bar)	100	100	100	100	200	100
Heating mantle	none	10 S	20 S	30 S	30 S	50 S
Sampling possible	no	no	yes			yes
Stirrer connection possible	no	no	yes			yes
Temp. measurement in autoclave possible	no	no	yes			yes

High-pressure laboratory autoclave Model 0

50 ml/100 bar
Model 0 is the smallest autoclave in our range. Initially it was developed for prelimenary tests at room temperature. **It is the steel test tube for all pilot studies and pretrials where high pressure is required. It is ideal for situations where glass carius tubes may present a danger.** Model 0 has a threaded head with a threaded opening for fitting to equipment. Openings can be plugged with threaded stoppers.
Sealed with PTFE gaskets (max. 180 °C) or fine silver gaskets (max. 300 °C).
Longer delivery periods possible depending on the size of the autoclave ordered!

Technical specifications: Model 0

Inner volume	75 ml
Working volume	50 ml
Height	approx. 135 mm
Weight	approx. 835 g
Material	made of V4A high grade steel 1.4571
Working temperature	-60 to +300 °C
Working pressure	max. 100 bar
Test pressure	300 bar at +20 °C
Outer-∅ of beaker/head	40/54 mm
Inner-∅ of beaker	30 mm
Base shape	flat outside and inside
Connection thread in head	G ¼″

Basic equipment consists of:

High-pressure laboratory autoclave Model I

100 ml/100 bar

Model I is the standard model in the Roth manufacturing range. Used mostly for in preliminary testing. Model I consists of an autoclave cylinder and a threaded autoclave head. The head has a thread on top for attachment of adapter (to fit bursting disc, pressure gauge and valve). Openings can be plugged with threaded stoppers. Sealed with PTFE gaskets (max. 180 °C) or fine silver gaskets (max. 300 °C). **Longer delivery periods possible depending on the size of the autoclave ordered!**

Technical specifications: Model I

Inner volume	135 ml
Working volume	100 ml
Height	approx. 220 mm
Weight	1210 g
Material	made of V4A high grade steel 1.4571
Working temperature	-60 to +300 °C
Working pressure	max. 100 bar
Test pressure	300 bar at +20 °C
Outer-∅ of beaker/head	40/54 mm
Inner-∅ of beaker	30 mm
Base shape	flat outside and inside
Connection thread in head	G ¼″
Adapter I (T-adapter), with bursting plate protection	
Material	V4A-high grade steel 1.4571 (Adapter to fit bursting disc, valve and pressure gauge)
Adapter openings	G ½″ for pressure gauge G ¼″ for valve

▶ For an overview of "High-pressure laboratory autoclaves" see page 922

▶ PTFE-spray, see page 1174

Attention

Due to the shape of the screw thread, cold setting of cylinder and head is possible when screwing these on. This usually leads to them sticking when opening and the thread breaking as a result.

The conducted reaction necessitates coating the thread with a release agent such as PTFE spray (Art. No. K007.1).

Warning: Do not use PTFE screw thread tape!

High-pressure laboratory autoclave Model II

200/300 ml/100 bar, 250 ml/200 bar

Model II is ideal for all reactions where spontaneous gas development and a quick increase in pressure are expected. The units are operated with a large bursting disc, that is built into the autoclave head. Therefore it offers maximum safety in the laboratory. The enlarged autoclave head is screwed directly onto the autoclave cylinder. It contains the bursting disc holder at the top and three threaded openings at the side. For connections with: valves, reduction adapters for pressure gauges and temperature sensors or bursting disk safety device II, (when using magnetic stirrer head MRK 10). Threaded openings can be closed with screw stoppers. Sealed with gaskets made of PTFE (max 180 °C) or fine silver (max 300 °C).

Longer delivery periods possible depending on extent of order!

Technical specifications: Model II

Autoclave head II	
Material	Made of V4A high grade steel 1.4571
Outer-∅ of beaker	69 mm, top head opening for bursting disc 28.100/28.200 or magnetic stirrer MRK 10
Three additional openings on the side of head	G ¼″ for valve, reduction adapter for pressure gauge and temperature sensor or bursting disc safety device II for use with magnetic stirrer head MRK 10

Sampling possible	no	no	yes			yes
Stirrer connection possible	no	no	yes			yes
Temp. measurement in autoclave possible	no	no	yes			yes

Attention

Due to the shape of the screw thread, cold setting of cylinder and head is possible when screwing these on. This usually leads to them sticking when opening and the thread breaking as a result.

The conducted reaction necessitates coating the thread with a release agent such as PTFE spray (Art. No. K007.1).

Warning: Do not use PTFE screw thread tape!

▶ For an exact description of autoclave accessories, see page 927

High-pressure laboratory autoclave Model IV

500 ml/100 bar

Model IV is the largest autoclave in our manufacturing range.
It represents an improved version of the original version from which the other models are derived. Model IV consists of a high grade steel cylinder with flange. The solid stainless steel lid is screwed onto the flange with eight screws. The autoclave head is fitted for a large bursting disc. This provides maximum safety in situations where spontaneous gas production and a quick increase in pressure might occur.
The large autoclave is screwed directly onto the cylinder.
It contains the bursting disc holder at the top and three threaded openings at the side. For connection with: valvesa, reduction adapters for pressure gauges and temperature sensors or bursting disk safety devices II, (when using magnetic stirrer head). Threaded openings can be closed with screw stoppers. Sealed with gaskets made of PTFE (max. 180 °C) or with fine silver gaskets (max. 300 °C).

Longer delivery periods possible depending on the size of the order!

Technical specifications: Model IV

Model IV, consists of cylinder, head, 8 hexagon head bolts and -nuts	
Inner volume	700 ml
Working volume	500 ml
Height	425 mm
Material	made of V4A high grade steel 1.4571
Working temperature	-60 to +300 °C
Working pressure	max. 100 bar
Test pressure	300 bar at +20 °C
Outer-∅ on beaker	60 mm
Inner-∅ of beaker	50 mm
Outer-∅ of lid	125 mm
Base shape	flat outside and inside
Autoclave head II	
Material	made of V4A high grade steel 1.4571
Outer-∅	64 mm; top head opening for bursting disc 28.100 or magnet stirrer MRK 10
Three additional openings on the side of head	G ¼″ for valve, reduction adapter for pressure gauge and temperature sensor or bursting disk safety device II for use with magnetic stirrer head MRK 10

Glass liners

It has been proven to be extremely worthwhile to use glass liners in autoclaves when working with very viscous or smearing substances. These special vessels are designed to cope with the pressure and the temperature strain in autoclaves.

500	320	48	**2099.1**	1	30,05

Advice for working with silver gaskets
When working with silver gaskets, it is essential to tighten the screw threads very tightly to achieve the necessary seat. We therefore recommend annealing the silver gaskets at +850 °C before use - the gaskets remain softer and more pliable, even when cool, and seal more efficiently.

Autoclaving accessories

Fine control- and check valve

Made of stainless steel. For high pressure laboratory autoclaves.
With 6 mm swagelock tube connection. Multi-positioning range.
Max. pressure range: to max. 210 bar, temperature range: to max. +205 °C.
Delivery incl. screw thread adapter made of high-grade steel
(6 mm pipe for ¼″).

Fine control valve

Art. No.	Pack Qty.	€
H745.1	1	360,15

Optional:

Tube connector fitting

Made of stainless steel. For fine control- and check valve (output side).
Suitable for tubing inner-diameter ¼″.

Art. No.	Pack Qty.	€
H746.1	1	27,95

Screw thread adapter

Made of stainless steel. (6-mm-pipe for ¼″)

Art. No.	Pack Qty.	€
P437.1	1	49,05

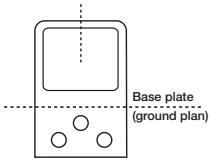
Pressure gauges

Parts that are in contact with the medium (threaded adapter, spring-pipe) are made of high grade steel. White face with black numbers.
Spring-pipe meter technique. With security glass.

Technical specifications:

Temperature media	max. +100 °C
Ambient temperature	-25 to +60 °C
Threaded adapter	G ½″, radial underneath
Outer diameter pressure gauge	100 mm

Measuring range	Art. No.	Pack Qty.	€
0-160 bar	**2031.1**	1	203,20
0-250 bar	**2036.1**	1	203,20



Assembly

Type	Art. No.	Pack Qty.	€
Base plate 41, ideal as holder for screwing on autoclave Model 0 and I	**2072.1**	1	450,45
Base plate 55, ideal as holder for screwing on autoclave Model II	**2074.1**	1	478,40

Sampling connections

With welded-in connection pipe.
For insertion or removal of gaseous or liquid samples.

- Material: V4A high grade steel 1.4571
- Working temperature: max. +300 °C
- Working pressure: max. 200 bar

Adapter with immersion rod 2 for laboratory autoclave Model II (200 ml)

Art. No.	Pack Qty.	€
2043.1	1	891,20

Adapter with immersion rod 3 for laboratory autoclave Model II (250/300 ml)

Art. No.	Pack Qty.	€

Adapter with immersion rod 4 for laboratory autoclave Model IV (500 ml)

Art. No.	Pack Qty.	€
K457.1	1	891,20

Threaded stoppers

To close a connection opening G¼″ or G½″.
(e.g. Adapter 2207.1)

Type	for opening	Art. No.	Pack Qty.	€
A	¼ ″	**2052.1**	1	64,40
C	½ ″	**2038.1**	1	282,75

Bursting discs

To be used **for sealing** the bursting disc of the **fine silver gaskets**!
Working temperature max. +300 °C. Made of high-grade steel.

Type	Outside ∅ (mm)	Innner ∅ (mm)	Reaction pressure (bar)	Art. No.	Pack Qty.	€
8.100 E	14	8	100	**2199.1**	1	123,65
28.100 E	40	28	100	**2203.1**	1	130,10
28.060 E	40	28	60	**8135.1**	1	130,10
28.200 E	40	28	200	**2204.1**	1	130,10

Temperature measurements

The temperature probe consists of a thermoelement with an iron-copper nickel thermopair. The thermoelement is welded in a protective tube made of high grade steel 1.4541. It collects the temperature values in the inside of the autoclave and transmits them to WRT 2000x regulator.
Unit displays temperature and regulation of heating unit can be carried out.

To seal, only fine silver gaskets should be used to prevent repeated replacement, which would shorten life expectancy of autoclave.

Temperature probes Fe-Cu-Ni, with fine silver gasket, ∅ 1.5 mm

Length (mm)	Art. No.	Pack Qty.	€
220	**2115.1**	1	338,65

Connection cable between heating mantle/sensor	**KCX9.1**	1	159,10

Gas discharge

PTFE-tubing sheathed in stainless steel for connection to pressure reducer or for direct connection of high pressure tube to gas cylinder in combination with gas cylinder adapter
(Art. No. 2066.1, please order separately).

Technical specifications:

Inner-∅	4.8 mm
Outer-∅	8 mm
Min. bursting pressure	825 bar
Operating pressure	205 bar
Operating pressure valid for working temperature	+20 to +50 °C
Temperature range	-55 to +235 °C
Min. bending radius	51 mm
Length	1.5 m
Thickness of PTFE-tube	1 mm

PTFE-tubing with NPT-inner thread ¼″, on 6 mm connecting sleeve for gas cylinder adapter (Art. No. 2066.1, please order seperately).

Art. No.	Pack Qty.	€
H996.1	1	331,10

PTFE-tubing with NPT-outer thread ¼″, on 6 mm connecting sleeve

Art. No.	Pack Qty.	€
N246.1	1	278,45

Gas cylinder adapter
For **direct connection** of high pressure tube to gas cylinder (max. operating pressure 200 bar). **Please specify gas type**.

Art. No.	Pack Qty.	€
2066.1	1	166,65

Stirrer with permanent magnetic clutch

Type MRK 10. Absolutely gas tight. Vacuum-tight.

Technical specifications:

Height	172 mm
∅	44 mm
Maximum pressure	200 bar
Maximum temperature	300 °C
Torque	20 N · cm
Viscosity	to 1500 mPa · s
Material	V4A high grade steel 1.4435
Working temperature	max. 300 °C
Working pressure	max. 200 bar
Rpm	max. 5000 rpm

Delivery without adapter and gasing stirrers. Please order separately.

Magnet stirrer type MRK 10

Art. No.	Pack Qty.	€
2359.1	1	o. r.

Adapter M 42 - M 30
Adapter for connecting autoclave head II to magnetic stirrer

NEW

Heating mantles with magnetic stirrer

Specially designed for Roth's high-pressure laboratory autoclaves.
To ensure optimum distribution and use of heat, the heating mantles are precisely adapted to the dimensions of the individual autoclave beaker.

Features:
- High temperature stability
- Integrated magnetic stirrer with continuous speed adjustment without direct drive
- Heating and stirrer can be activated separately
- Temperature adjustment using the digital display and display of the actual temperature of the heating mantles
- **Integrated contact thermometer with full functionality. Option to directly connect the medium temperature sensor thermocouple type J/Fe-Cu-Ni (please order temperature measuring sensor and connection cable separately)**
- Additional safety: Temperature limiter for the internal and external temperature sensors

Technical specifications:

Magnetic stirrer drive	
Speed range	150 to 1500 rpm
Temperature regulator	
Operating temperature range	Adjustable to any value between +8 °C **above** room temperature and 300 °C
Setting accuracy	±1 K
Control accuracy	±8 K
Control accuracy with temperature measuring sensor in the medium	±3 K
Control	Internally via heating mantle, externally via separate temperature gauge (available as an option)
Dimensions (W x D x H)	
Model 10 S	220 x 250 x 319 mm
Model 20 S	220 x 250 x 334 mm
Model 30 S	220 x 250 x 414 mm
Model 50 S	220 x 250 x 455 mm
Power supply	230 V, 50/60 Hz

Type	Heating output (W)	For laboratory autoclaves	Art. No.	Pack Qty.	€

Benchtop steam sterilisers, CertoClav EL-series

By CertoClav. With aluminium chamber.
For steam heating of substances and use in research and development.
Applications: preparation of nutrient media, as well as sterilisation of waste, utensils, bottles and instruments.

Equipment:
- Lid with bayonet lock
- Quadruple pressure safety: safety lock to precvent opening under pressure, antilock safety valve, pressure relief valve and pressure relief vent
- Pressure regulation by control valve
- Alternate versions with different temperature / pressure levels (125/140 °C or 115/121 °C) are available

Technical specifications:

Model	EL 12L	EL 18L
Capacity (l)	12	18

By CertoClav.

Additional wire basket for CertoClav EL 18L
For easy filling with sterilizable material. Inside ∅ 225 mm, H 170 mm. Mesh width: 1/4 inch. 2nd wire basket for model EL 18L or spare wire basket for model EL 12L.

Art. No.	Pack Qty.	€
TL65.1	1	170,85

Seal service kit for EL-series
With cover and valve seal, including seal for steam release cock, pressure gauge and steam release valve.

Art. No.	Pack Qty.	€
TL66.1	1	49,40

Benchtop autoclaves CertoClav Classic and MultiControl 2

By CertoClav. With stainless steel chamber. For culture media processing, as well as sterilisation of equipment and waste. No water connection required. Complementary to the large autoclaves. Space-saving positioning on the laboratory bench.

- Quadruple pressure safety: safety lock to prevent opening under pressure, antilock safety valve, pressure relief valve and pressure relief vent
- CertoLock for locking the lid with a single movement of the hand

CertoClav Classic:

Controlled by precision valves and thermostat. With timer.
Models available with sterilisation temperature of 125/140 °C or 115/121 °C.

CertoClav MultiControl 2:

With freely programmable control system (room temperature to 140 °C). Standard sterilisation programs preinstalled. USB port for connectivity to PC inc. basic software (to display process data).

Technical specifications:

Model	Classic	MultiControl 2
User interface	Manual	LCD display
USB port	-	yes
Timer	analog (0 to 60 min or continuous operation)	digital (1 min to 14 d)
Process logging	-	PC software
Capacity (l)	18	
Test pressure (bar)	4.1	
Inner dimensions (mm)	H 300, ∅ 260	
Outer dimensions (mm)	H 550, ∅ 270	
Diagonal (mm)	424	
Max. wire basket capacity	1 wire basket (please order separately)	
Thermometer measuring range (°C)	0 to 160 / 2-increment scale	Room temp. to 140 (via LCD display)
Pressure gauge measuring range (bar)	0 to 4 / 0.1-increment scale	
Steam outlet cock (mm)	∅ 10	
Power consumption (W)	1300	
Weight (kg)	13	
Power supply	230 V, 50/60 Hz	

Delivery incl.

Classic model: steam outlet cock, precision thermometer and pressure gauge.

MultiControl 2 model: electronic control unit, precision pressure gauge, steam outlet cock and PC software. Please order wire basket separately.

Model	Temperature/pressure level	Art. No.	Pack Qty.	€

NEW

CertoClav Vacuum Pro-series horizontal table-top autoclave

By CertoClav. For the sterilisation of liquids, solids and waste, e.g. instruments, hollow bodies, porous materials, textiles, plastics, etc.

- Chamber material: stainless steel 1.4301
- Sterilisation temperature 105 to 134 °C, Sterilisation pressure 0.2 to 2.1 bar
- 7″ touch-screen user interface
- 12 sterilisation programs
- Video step-by-step guide can be activated directly on the steriliser
- Integrated steam generator separated from the chamber
- Integrated water tank for distilled water (approx. 4 litres)
- Connections for report generation: USB, SD card, RS 232 and RS 485
- Network-enabled with Ethernet, LAN and Wi-Fi
- Flexible PT-1000 media temperature sensor to measure and regulate the temperature directly in the medium

Technical specifications:

Volume	22 l
Inner dimensions (∅ x D)	250 x 450 mm
Outer dimensions (L x W x H)	650 x 500 x 430 mm
Loading capacities for bottles	46 x 50 ml, 23 x 100 ml, 15 x 250 ml or 8 x 500 ml
Tray set W x L middle drawer Tray set W x L upper/lower drawer	220 x 430 mm 170 x 430 mm
Weight	63 kg
Power supply	220 V, 50/60 Hz

Delivery incl. 3 drawers, drawer enclosure, handle, quick connect waste water hose and CertoCloud basic license.
Please order base plate for bottles and flasks separately.

Pressure digestion vessels

For disintegrations in the Microwave

The energy of microwaves is ideal for disintegrating small sample volumes. Microwaves only interact with the sample material not with the containers. Samples can be heated to boiling point and higher within seconds.

Rotilabo®-digestion vessels are made of isostatically pressed pure TFM. TFM is a modified PTFE made by Hoechst and contains thermoplastic fluorocarbon resins. Therefore an even, pore-free surface can be ensured. Residues from previous samples can not contaminate the measurements.

① Rotilabo®-hydrolysis and digestion vessels

Made of isostatic pressed pure TFM. For samples up to 0.5 g. Vessels are form-stable under pressure (up to 25 bar) and temperature stable (max. 160 °C). Sealing membrane prevents loss of evaporating sample, rupture membrane provides additional safety against pressures that exceed the limit. Collecting vessels and a hose are optionally available for protection of the microwave. They can be used to divert and collect gases and fluids in case the sealing and rupture membrane burst. Please order hose and collecting vessel separately.

Delivery incl. 10 sealing membranes made of PFA and 10 rupture membranes made of PTFE.

Volume (ml)	Innner ∅ (mm)	Inner height (mm)	Max. pressure (bar)	Max. temp. (°C)	Art. No.	Pack Qty.	€
5	15	32	25	+160	**E138.1**	1	342,95

20	22	60	20	+150	**E140.1**	1	450,45
50	33	62	20	+150	**E141.1**	1	623,50
100	35	110	15	+140	**E142.1**	1	559,00

② Rotilabo®-digestion vessels with inserts

With inserts (Inliner) made of TFM. The same can be said for these containers as for the previous hydrolysis and digestion vessels. The easily changed inliners are used for precise weighing of samples, because the whole vessel is usually too heavy for most precision balances. It is also possible to analyse several samples with the same vessel. Collecting vessels and a hose are optionally available to protect the microwave. They can be used to divert and collect gases and fluids in case the sealing and rupture membrane burst. Please order hose and collecting vessel separately.

Delivery incl. 10 sealing membranes made of PFA and 10 rupture membranes made of PTFE.

FKUv-series refrigerators

By Liebherr.

General specifications of both models

- Cooling temperature is adjustable from +1 to +15 °C
- With dynamic cooling system (switchable fan, for even temperature distribution)
- Digital temperature display (resolution 1 °C)
- Temperature constancy ±4 K
- Outer design: sheet steel, white, powder coated
- Door opening alarm - if the door is opened for longer than 60 s (can be deactivated)
- Automatic thaw system

FKUv 1610-22
With insulating door made of powder-coated sheet steel.

FKUv 1613-22
With glass door. Additional LED-ceiling light can be switched separately.

Technical specifications:

Type	FKUv 1610-22	FKUv1613-22
Cooling capacity (l)	130	
Number of grills	3 (adjustable)	
Outer dimensions (W x D x H) mm	600 x 611 x 830

Freezers GGU 1550-21 and GGv 5860-41

By Liebherr.

General specifications of all models

- Housing made of stainless steel
- Power fail indicator
- Door opening alarm
- With lockable door

GGU 1550-21

- **With static cooling**
- Digital temperature display (resolution 1 °C)
- Temperature constancy ±5 °C
- Manual thawing
- 4 shelves/evaporator plates

GGv 5860-41

- **With convection cooling**
- NoFrost technology - products are frozen with cooled recirculated air and moisture is discharged into the open
- Digital temperature display (resolution 1 °C)
- Temperature constancy ±2 °C
- Automatic defrost system
- Height of adjustable feet: 150 to 180 mm

Technical specifications:

Type	GGU 1550-21	GGv 5860-41
Cooling capacity (l)	133	490
Cooling temperature (°C)	-9 to -26	-14 to -28
Number of shelves	4 wire baskets, removable	5 height-adjustable grid shelves with stop and pull-out stop, 1 bottom grid

Laboratory freezer Froster-Labo 330

By Kirsch.

- Freezing temperature can be adjusted from -5 to -30 °C
- Digital temperature display (Resolution 1 °C)
- Recirculates air cooling for consistent temperature control (switches off when door is opened)
- The freezing cycle is reversed automatically and after a limited time for rapid defrosting
- Drip water evaporation occurs in refrigerating machine room
- Min/Max-temperature storage
- Optic and acoustic limit value alarm
- Outer casing made of galvanized sheet steel, powder coated
- Adjustable feet compensate for uneven surfaces
- With lockable door

Technical specifications:

Refrigerating capacity (l)	300
Alarm	yes
Grids	4
Power (W)	500

LCv 4010 laboratory fridge-freezer combination

By Liebherr.

- Adjustable cooling temperature (2 separately adjustable refrigeration circuits)
  Fridge unit: +3 to +16 °C
  Freezer unit: -9 to -30 °C
- Fridge unit with recirculated-air ventilation system, freezer unit with static cooling system
- Digital temperature display
  Resolution, fridge unit: 0.1 °C
  Resolution, freezer unit: 0.1 °C (to -19.9 °C) or 1 °C (from -20 °C onwards)
- Temperature constancy
  Fridge unit: ±2.0 K
  Freezer unit: ±3.5 K
- With lockable door
- Memory for Min/Max temperatures
- Memory function for storing the last three temperature alarms and power failures with date/time/duration of alarm
- Audible and visual limit alarms
- Audible and visual door opening alarms
- Feedthrough for external temperature sensor (∅ 10 mm)
- Energy consumption in 24 h: 1,800 kWh

Technical specifications:

	Fridge unit	Freezer unit
Cooling capacity (l)	240	105
Freezing temperature (°C)	+3 to +16	-9 to -30
Number of surfaces	4 grates, plastic coated	3 drawers
Outer dimensions (mm):		
Width Depth Height	600 615 2000	
Inner dimensions (mm):		
Width Depth Height	440 435 1105	431 435 597
Thawing method	Automatic	Manual
Weight (kg)	91	
Power supply	220-240 V, 50/60 Hz

* Longer delivery times possible. Please check with our Sales Department.

LCexv 4010 fridge-freezer combination explosion protected

By Liebherr.
Same as model LCv 4010, but with explosion protected interior in compliance with the safety requirements of EU Directive 94/9/EC (ATEX 95) for the storage of explosive and highly flammable substances in enclosed containers.
Delivery incl. 4 glass shelves for the cooling unit (instead of plastic-coated racks).

Art. No.	Pack Qty.	€
AET2.1 *	1	2621,95

* Longer delivery times possible. Please check with our Sales Department.

Laboratory freezer chests

By Liebherr.

- Temperature adjustment range from -10 to -45 °C
- Digital temperature display
- Resolution: 0.1 °C (to -19.9 °C) or 1 °C (from -20 °C onwards)
- Temperature constancy ±2.5 K
- With static cooling
- Inner shell material: aluminium, white coated
  Door/lid material: steel
- Integrated interior light in chest lid
- Memory for Min/Max temperatures
- Memory function for storing last three temperature alarms and power failures with date/time/duration of alarm
- Audible and visual limit alarms
- Audible and visual lid opening alarms
- Feedthrough for external temperature sensor (∅ 10 mm)

Technical specifications:

Type	LGT 2325	LGT 3725	LGT 4725

NEW

Ultra-low temperature freezer -86 °C HERAfreeze™ HFC390TV

By Thermo.

- Cooling temperature is adjustable from -50 to -86 °C
- Outer housing made of robust steel with powder-baked finish
- Stainless steel interior
- Alphanumeric LED display shows thresholds, system status and alarm messages
- Set-up adjustable for high-temperature and low-temperature alarm
- Backup battery (NiCd Gel battery 12 V) to preserve the display and alarm functions for 48 hours in the event of a power failure
- Access code to protect the setpoint defined
- Lockable door handle
- RS 232 interface and 4 mA up to 20 mA analog outputs

Technical specifications:

Cooling capacity	85 l
Outer dimensions (mm)	
Width Depth Height	724 759 1133
Inner dimensions (mm)	
Width Depth Height	470 470 417
Energy consumption in 24 h	5.3 kWh
Weight	196 kg
Power supply	230 V, 50 Hz

Refrigerators/Freezers, explosion-proof

TCS-series thermostat cabinets

By Aqualytic. For continuous temperature control in different applications, e.g. microbiological research, BSB requirements etc.

- Temperature range +2 to +40 °C, infinitely adjustable in 0.1 °C increments
- Illuminated LED temperature display for actual/nominal values
- Temperature constancy ±1.0 °C
- With internal sockets for devices which require a power supply, e.g. magnetic stirrer
- Built-in cooling and heating units
- Lockable door
- With height-adjustable grids

Technical specifications:

Type	TC 135 S / TC 140 G	TC 175 S	TC 255 S / TC 256 G	TC 445 S
Cooling capacity (l)	135/140	175	255/255	445
Inserts:				
Grids Bottom grid	3 1	3 1	4 1	4 1

Explosion-proof laboratory fridges

Explosion-proof in accordance with the guidelines on "Working Safely in Laboratories BG-I 850-0". Enclosed spaces in which hazardous, explosive atmospheres can develop, e.g. rooms where flammable liquids are stored, must be explosion-protected.

- Cooling temperature is infinitely variable from +1 to +15 °C
- Selectable temperature ranges: 1 (= lowest cooling capacity) to 5 (= highest cooling capacity)
- Mechanical control unit
- Digital temperature display (resolution 1 °C)
- Sheet steel housing with impact resistant powder coating
- With lockable door and height-adjustable glass base
- Dynamic cooling system (with forced air ventilation)
- Models EX 220, EX 300 and EX 490 have a fan stop function which switches off the fan when the door is opened
- Automatic condensation drainage into inner catch tank

Technical specifications:

Type	EX 160	EX 220	EX 300	EX 490
Cooling capacity (l)	160	220	300	490
Number of glass shelves	3	4	5	5

Refrigerators Mediline, explosion-proof models LKUexv 1610 and LKexv 3910

By Liebherr.
With explosion-proof interior acc. to EU Guideline 94/9/EG (ATEX 95).

General specifications for both models

- Refrigeration temperature adjustable from +3 to +16 °C
- With hot-air ventilation
- Digital temperature display (Resolution 0.1 °C)
- Temperature constancy ±2.0 K
- Memory for min/max temperatures
- Memory function for last three temperature alarms and power cuts with date/time/duration of alarm
- With lockable door
- Optic and acoustic limit value alarm
- Optic and acoustic open door alarm
- Automatic defrosting

Technical specifications:

Model	LKUexv 1610	LKexv 3910
Cooling volume (l)	130	344
Alarm	Yes	Yes
Number of glass shelves	3	5
Outer dimensions (mm):		
Width Depth Height	600 615 820	600 615 1840
Inner dimensions (mm):		
Width Depth Height	455 435 669	455 435 1650

Refrigerators Mediline, explosion-proof models LGUex 1500 and LGex 3410

By Liebherr.
With explosion-proof interior acc. to EU Guideline 94/9/EG (ATEX 95).

General specifications for both models

- Static cooling
- Digital temperature display
  Resolution 0.1 °C (to -19.9 °C) resp. 1°C (from -20 °C)
- Temperature constancy ±2 K
- Memory for min/max temperatures
- Memory function saves the last three temperature alarms and power cuts with date/time/duration of alarm
- With lockable door
- Optic and acoustic limit value alarm
- Optic and acoustic open door alarm
- Manual defrosting

LGUex 1500
Cooling temperature adjustable from -9 to -26 °C

LGUex 3410
Cooling temperature adjustable from -9 to -30 °C

Technical specifications:

Model	LGUex 1500	LGex 3410
Cooling capacity (l)	129	284
Alarm	yes	yes
Drawers Basket	3 1	8 -
Compartment height (mm)	149	185

Flake ice maker

Laboratory freezers, Froster-Labex series, explosion-proof

By Kirsch. Interior explosion-proof, in compliance EU guideline 94/9/EG (ATEX 95) and in comp. with laboratory guidelines BGR 120, nr. 3.8.

Model Froster-Labex-70
- Cooling temperature from -15 to -22 °C
- Temperature selection range:
  1 (= lowest cooling capacity) to 5 (= highest cooling capacity)
- With analogue actual value thermometer on inside of door
- Outer cabinet made of galvanized sheet steel, powder-coated
- Manual defrosting

Model Froster-Labex-96
- Cooling temperature adjustable from -5 to -25 °C
- Digital temperature display (Resolution 1 °C)
- Min/Max temperature storage
- Optical and acoustic limiting value alarm
- Outer cabinet made of galvanized sheet steel, powder-coated
- With condense water tray for manual emptying of inner condensate

Technical specifications:

Model	Froster-Labex-70	Froster-Labex-96
Cooling capacity (l)	70	95
Alarm	No	Yes
Output (W)	100	160
Grids Gully grating Drawers	2 1 1	2 - -
Outer dimensions (mm)		
Width Depth Height	480 510 740	540 540 850
Inner dimensions (mm)		
Width Depth Height	350 410[1)] 550	440[2)] 420[3)] 470
Energy consumption in 24 h (kWh)	1,6	2,6
Weight	34 kg	42 kg
Mains supply	220-240 V, 50/60 Hz	

[1)] Usable depth, top 90 mm, bottom 200 mm less
[2)] Usable width 20 mm less
[3)] Usable depth 50 mm less

Type	Art. No.	Pack Qty.	€
Froster-Labex-70	**KL27.1** *	1	2483,25
Froster-Labex-96	**KL28.1** *	1	3493,75

Cone ice makers SCOTSMAN® B-series

For making solid and crystal clear cone ice.
Applications: laboratories and industry.

- Stainless steel version, air cooled
- Built-in reservoir
- Insulated removal flap for reduced condensation
- Ice cone size: approx. H 30.5 x ∅ 34 mm (20 g)
- Suitable for use with drinking water and demineralised water

Technical specifications:

Type	B 2508	B 3015
Max. output in 24 h (kg)	25	31
Reservoir capacity (kg)	8	15
Dimensions (W x D x H) mm	390 x 515 x 640	467 x 570 x 690
Operating limits: Room temperature Water temperature Water pressure	min. 10 °C / max. 43 °C min. 5 °C / max. 38 °C min. 0.8 bar / max. 5 bar	
Weight (kg)	31	34
Power supply	230 V, 50 Hz	

Delivery incl. 1 ice scoop, connecting hose ¾″ (length 1.5 m), 1 discharge hose (∅ 20 mm, length 1.5 m).

Type	Art. No.	Pack Qty.	€
B 2508	**NH38.1** *	1	1096,50
B 3015	**NH39.1** *	1	1367,40

* Longer delivery times possible. Please check with our Sales Department.

Flake ice maker

RF-series flake ice maker with ice storage tank Manitowoc Ice

Range of applications: laboratories, research institutes and industry.
Ideal for production of flake and/or broken ice at a temperature of -0.5 °C.
The ice is crystalline-shaped and suitable for pouring.

- With free water drainage
- With integrated storage tank
- Outside cabinet made of stainless steel
- Air-conditioned
- Separate on/off switch
- Suitable for working with drinkng water and demineralised water
- Height adjustable feet (110 to 150 mm)

Technical specifications:

Model	RF 0244	RF 0266P	RF 0385	RF 0399
Max. production volume in 24 h (kg)	82		151	
Tank content (kg)	18	27	40	54
Power consumption (W)	700		1000	
Dimensions (mm)				
Width Depth Height	500 660 842	500 660 952	738 690 1003	783 690 1172
Permissible working temperature	10 to 43 °C			
Weight (kg)	71/75	76/80	102/106	109/113
Power supply	230 V, 50 Hz			

Delivery incl. 1 ice scoop and connection tubes
(one each 1.5 m supply and drainage hose with ¾″-thread).

Type	Art. No.	Pack Qty.	€
RF 0244	**LP30.1** *	1	3042,25
RF 0266	**LP31.1** *	1	3096,00
RF 0385	**LP32.1** *	1	3440,00
RF 0399	**LP33.1** *	1	3526,00

* Longer delivery times possible. Please check with our Sales Department.

Flake ice machines with ice storage tank SCOTSMAN® AF-series

Applications: laboratories, research institutes and industry.

- Stainless steel model, air-cooled
- Environmental-friendly safety refrigerant

The ice flakes have a temperature of -0.5 °C; the irregular, large surface has an extremely good cooling effect.
Each flake is saturated, firm and doesn't stick together.

Model EF 103 AS
With additional waste water pump (waste water can be pumped up to a height of 1.7 m or up to a distance of 15 m).

**All models can be converted to work with demineralized water (conductivity <30 µS) at an extra charge.
Please check with our Sales Department.**

Technical specifications:

Type	AF 80 AS	EF 103 AS
Max. production volume in 24 h (kg)	70	105
Storage capacity (kg)	25	30
Power input (W)	330	470
Dimensions W x D x H (mm)	535 x 626 x 933	592 x 622 x 1126
Operating limits: Room temperature (°C) Water temperature (°C) Water pressure (bar)	 min. 10 / max. 40 min. 5 / max. 35 min. 1 / max. 5	
Weight (kg)	51	63
Current	230 V, 50 Hz	

Delivery incl. 1 scoop, 1 connection hose ¾″ (length 1.5 m),
1 drainage hose (∅ 20 mm, length 1.5 m).

Type	Art. No.	Pack Qty.	€
AF 80 AS	**CK94.1** *	1	3509,90
EF 103 AS	**CK95.1** *	1	4196,80

* Longer delivery times possible. Please check with our Sales Department.

Flake ice maker

NEW

Flake ice maker with separate store RFS series

By Manitowoc.

① **General details of flake ice maker**

- For large production quantities
- Stainless steel design (inside/outside), air-cooled
- Separate On/Off switch
- HACCP-compliant
- Suitable for use with drinking water and demineralised water
- Various combinations of flake ice makers and store available

Technical specifications:

Type	RFS 0300 A	RFS 0650 A
Max. output in 24 h (kg)	171	332
Power consumption (W)	650	1050
Dimensions W x D x H (mm)	559 x 599 x 600	
Perm. operating temperature (°C)	10 to 43	
Weight (kg)	79	104
Power supply	230 V, 50 Hz	

② **General details of base ice store**

- Easy removal of ice due to flap with locking mechanism
- Constant cooling temperature through PE insulation
- Ice shovel holder
- Adjustable feet height (110 to 150 mm)

Technical data of store:

Type	B 320	B 420
Capacity (kg)	95	141
Dimensions W x D x H (mm)	559 x 864 x 965	559 x 864 x 1270
Weight (kg)	34	49

Delivery incl. connection set (1.5 m supply and drain hose with ¾″ thread) and 180 ml ice shovel.

Type	Art. No.	Pack Qty.	€
RFS 0300 A with store B 320	**HPK0.1** *	1	4531,15

Natural gas	165	360	**CHT9.1**	1	57,90

Laboratory gas burners with suction foot

Acc. to DIN, DVGW approved. Connection for hose with 9.5 mm internal ∅. Suitable for propane gas or natural gas.

With suction foot:
- For stability on all smooth surfaces
- Accidental movement of the burner is largely avoided
- No metal in contact with the standing area

Technical specifications:

Gas type	Temperature (°C)	Consumption (l/h)	Head ∅ (mm)
Propane gas	① 1220 ② 1210 ③ 1320	① 40 ② 44 ③ 50	① 17 ② 17 ③ 17
Natural gas	① 1300 ② 1260 ③ 1290	① 115 ② 125 ③ 145	① 17 ② 17 ③ 17

Laboratory gas burners with double lever stopcock

Acc. to DIN, with DVGW-approval. Connection for hose with inner-∅ 10 mm. For propane gas or natural gas. With double lever stopcock, pilot flame and air regulation.

For gas type	Overall height (mm)	Weight (g)	Art. No.	Pack Qty.	€
Propane gas	150	290	**CX71.1**	1	57,80
Natural gas	150	290	**CX72.1**	1	57,80

Gas burners

Ideal for propane or natural gas. With **DVGW seal**. Non-tilting base and low centre of gravity guarantee high stability. Burner can be removed from base. Inclination angle can be set to 60°/90°/120° with locking device. With separate chimney for low flame and regulating valve to switch over from main to low flame. A regulating mechanism for air supply enables precise setting of flame temperature. Height depending on angle 100 mm/107 mm, weight 530 g. Suitable for continuous use.

For gas type	Art. No.	Pack Qty.	€
Propane gas	**H612.1**	1	161,75
Natural gas	**H613.1**	1	161,75

Safety lab burners according to Teclu

With thermo sensor safety valve (if the flame extinguishes or the gas supply is interrupted, the safety valve closes automatically). Solid round base. With air regulation and needle valve.

For gas type	Overall height (mm)	Weight (g)	Art. No.	Pack Qty.	€
Propane gas	180	650	**NA04.1**	1	134,40
Natural gas	180	650	**NA05.1**	1	134,40

Rotilabo®-safety gas tubes

For supplying Bunsen burners that operate using gas in accordance with DIN 30665. With non-buckling, elastic coupling sleeve, suitable for all three gas groups acc. to DVGW-Worksheet G 260, controlled and tested as per DIN-DVGW-Reg.-No. DG - 4607 AU 2366. Not suitable for connection to gas cylinders. Inner-∅ 9 mm.

Flame 100 gas safety burner

Ideal for sterilization of microbiological instruments and graduated heating of dental tools.

- Housing and burner tube made of stainless steel
- With button function: flame is lit by pressing and extinguished by releasing the function button
- With ignition and flame control, clogging monitor, and overheating protection
- Continuous cartridge operation: 65 min with CV 360, 230 min with C 206, 550 min with CV 470 plus, 210 min with CG 1750
- Suitable for stationary natural gas and propane/butane gas. If cartridges are required, please order gas adapter and cartridge separately
- Operation possible by a foot pedal or an external infrared motion sensor

Technical specifications:

Button	Start / stop with timer, 60 min
Foot pedal	Standard (flame while foot pedal pressed, foot pedal optional)
IR sensor	Standard (flame while hand in detection range of sensor; IR sensor optional)
Dimensions (W x H x D)	89 x 34 x 88 mm
Height with burner tube	94 mm
Weight	385 g

Delivery incl. variable power supply (100 to 240 V, 50/60 Hz), hose nozzle and injectors for natural gas, propane / butane gas. Without foot pedal or IR motion sensor (please order separately, if required).

Gas safety burner

Fuego SCS basic gas safety burners

Ideal for heating, burning off, annealing and for application in microbiological safety workbenches.

- 2 standard programs for pedal control
- Featuring an additional button function; flame is lit by pressing, and extinguished by releasing the function button
- Housing/control element made of stainless steel and glass, UV- and solvent resistant
- Burner head can be removed and taken apart
- Tilt adjustment right/left
- Cartridge continuous operation: 40 min with CV 360, 170 min with C 206, 370 min with CV 470 plus,150 min with CG 1750
- Safety devices include: gas safety cutoff, Ignition, flame and temperature monitoring, contamination and assembly monitoring, automatic switch-off and residiual heat indicator
- Ideal for natural gas or propane-/butane gas. Should you require cartridge operation, please order the gas adapter and cartridges separately

Technical specifications:

Operating mode:	
Pedal	Standard (Flame when pedal is pressed down) Start/Stop with monitoring timer (up to 60 min)
Dimensions (W x H x D)	103 x 49 x 130 mm
Weight	700 g

Delivery incl. pedal, switching power supply (100 to 240 V, 50/60 Hz), hose nozzle with union nut, loop holder and nozzles for natural gas, propane-/butane gas.

Safety laboratory gas burner Fuego SCS / SCS pro

General specifications of both models:

Ideal for heating, burning-off and annealing as well as for use in microbiological safety workbenches.

- Animated graphic display with buzzer: installation and operating instructions with symbols, user ID, gas consumption display and cooling time reminder
- Casing/control elements made of stainless steel and glass, UV and solvent proof
- 6 programs for DoubleClick IR sensor, key, pedal and temperature control for precise heating of media with burning time display
- Safety devices: see Fuego SCS basic
- Zero-pressure shutoff: for releasing residual gas pressure after use
- Angle adjustment and removable burner head
- Ideal for natural, propane or butane gas. If cartridges are required, please order gas adapter and cartridge separately

Fuego SCS pro

- Same as Fuego SCS, but **with independent supply**
- Additional tilt sensor with gas safety shutoff

Delivery incl. 2 x 1.2 V Mignon batteries.
Operating time: up to 9 h continuous duty. Charging time: approx. 3 h.

Technical specifications:

Foot pedal	Standard (flame when pedal is pressed) Start/stop with watchdog timer (1 sec to 2 h)
IR sensor, DoubleClick (connectible)	Start/stop with watchdog timer (1 sec to 2 h) Auto-Off with timer (1 sec to 2 h)
Detection range of IR sensor	5-100 mm, adjustable
Dimensions (W x D x H)	103 x 130 x 49 mm

Delivery incl. IR sensor, inoculation loop holder, power adapter, hose connector with union nut and nozzles for natural gas, propane/butane gas.
Without foot switch (if required, please order separately).

Gas safety burner

Gasprofi 1 SCS *micro* gas safety burner

Space-saving laboratory gas burners for microbiology, cell biology and biotechnology.

Features:

- 4 standard programs for IR-sensor and foot pedal
- Featuring an additional button function; flame is lit by pressing, and extinguished by releasing the function button
- Housing and control element are made of stainless steel
- Can be fueled either with natural gas or propane-/butane gas
- Inclination adjustment can be set on right/left
- Cartridge continuous operation: 45 min with CV 360, 170 min with C 206, 345 min with CV 470 plus
- Removable burner head

Technical specifications:

Foot pedal	Standard (flame when pedal is pressed down) Start/Stop with control timer, 60 min
IR-sensor	Start/Stop with control timer, 60 min Auto-Off with learning function: 1 sec to 60 min
Coverage area of IR-sensors	5-50 mm, adjustable
Dimensions (W x H x D)	85 x 49 x 86 mm
Weight	930 g

Delivery incl. stainless steel foot pedal, IR-sensor, nozzles for natural gas and propane-/butane gas, hose nozzle with union nut and power supply plug. Should you require cartridge operation, please order the gas adapter and cartridge separately.

Fully automatic inoculating loop carousels auto*loop*^{PRO}

Enables **safety laboratory burners, like the Fuego SCS-series**, to be moved to sterilizing stations. The microprocessor-controlled carousel identifies when loops are removed and returned, and it automatically rotates and controls sterilizing. For max. 4 inoculating loops.

Features:

- Fully graphic DOT-Matrix display shows extraction position of cool loops and remaining cooling time, residual heat display and flame sterilisation time
- Adjustable sterilizing time: 1 to 15 sec, adjustable cooling time: 1 to 45 sec
- Made completely of stainless steel and anodised aluminium. Display is protected by special glass
- Sterilisation monitor controls the safe and reliable sterilisation of the inoculating loops. Symbol indicates if inoculating loops have been sterilized properly. 3-step setting of sensor intensity (low to high annealing intensity possible, for thin or thick inoculating wire)
- Excess temperature protection and residual heat display
- Dimensions: W 135 x H 305 x D 180 mm
- Power supply via burner pedal bush

Delivery incl. 4 loop holders, 4 inoculating loops and base. Safety lab gas burner, Fuegeo SCS-series, is required to operate the carousel (please order separately if not available).

Art. No.	Pack Qty.	€
LH88.1	1	1139,50

Accessories for auto*loop*^{PRO}

Splash protection
For safe handling of pathogenic material, slotted.

Art. No.	Pack Qty.	€

Gas safety burner

Gas safety burner, phoenix II

For use in microbiological safety work benches.

- LED colour display with choice of languages
- Plain text menu navigation and display of burning time left
- UV-resistant, can be flamed (stainless steel housing, special glass display)
- Can be tilted left or right
- 4 operating modes:
  Button function: flame activation and deactivation by pressing function button. Flame extinguishes after a preset period
  IR sensor: contact-free activation of flame via IR sensor. Flame extinguishes after a preset period
  Foot-operated push-button: flame burns as long as the foot press-button remains pressed
  Foot switch: flame burns when the foot switch is pressed and extinguishes when pressed again or after a preset time
- Flame, ignition and contamination monitoring
- Ideal for natural, propane or butane gas. Can be operated with gas cartridges CV 360. C 206 and CV 470 plus (please order the required gas adapter separately) or from the central gas supply

Technical specifications:

Foot-operated push-button	Conventional
Foot switch	Start/stop or with automatic shut-off (1 s to 120 min)
IR sensor operation	Start/stop with automatic shut-off (1 s to 120 min)
Detection range IR sensor	Three ranges can be selected: directly on the sensor, 30 mm or 80 mm
Dimensions (W x D x H)	125 x 160 x 85 mm

Delivery incl. IR sensor, stainless steel foot-operated push-button/ foot switch and power unit (100 to 240 V, 50/60 Hz), hose fitting, natural gas and propane/butane nozzles.

Flame 110 overhead gas burner

Heats dental tools, sterilises microbiological instruments or flame deburred/ flame polished plastic and rubber mouldings in an industrial environment.

- **Variable flame from any direction – even upside down (depending on positioning)**
- With button function: flame is started and stopped by pressing the function button
- With gas safety shutoff and overtemperature protection
- Can be operated using optional footswitch or external IR motion sensor. If required, please order separately.

Technical specifications:

Button	Start / stop with timer, 60 min
Foot pedal	Standard (flame while foot pedal is pressed; please order foot pedal separately)
IR sensor	Standard (flame while hand in detection range of sensor; please order IR sensor separately)
Dimensions (H x ∅)	135 x 88 mm
Weight	580 g

Delivery incl. fixing plate for overhead attachment and 100 to 240 V power supply, 50/60 Hz. Without gas adapter and cartridge (please order separately).

Inoculation loop sterilisers

Infrared sterilising station SteriMax-series

By WLD-TEC. For sterilizing inoculating loops, needles and instruments. Ideal for laboratories and safety workbenches where gas and open fires cannot be used. Simply hold the inoculating loop in the quartz glass sterilizing tube to sterilize. The loop is sterile after approx. 5 to 7 seconds.

- Made of stainless steel
- Residual heat display warns against high temperatures
- Angle can be adjusted 7 times
- Integrated splash protection
- Trays for 3 instruments

Technical specifications:

Model	SteriMax 15	SteriMax 21
Quartz glass tube-∅ (mm)	15	21

Infrared inoculation loop steriliser SteriMax smart

By WLD-TEC. Specially focussed infrared light creates an IR hotspot and sterilises inoculation loops at a temperature from 750 to 1000 °C within 5-10 sec.

- Auto start by non-contact IR sensor technology
- Adjustable sterilisation and cool-down timer for two users by touch operation
- Ready for use straight from the box without heat-up phase
- Dynamic Thermocontrol sterilisation timer for the utilisation of residual heat to speed up subsequent sterilisation cycles
- Housing made of special toughened glass and stainless steel
- With removable quartz glass annealing tube

Technical specifications:

Quartz glass annealing tube	
Temperature	750 to 1000 °C
Outer/inner ∅, length	19/16 mm, 112 mm
General information:	
Timers	Sterilisation timer: 5-10 sec Inoculation loop cool-down timer: 0-25 sec
Safety devices	Residual heat indicator, overtemperature protection and autom. unit switch-off
Power requirement	approx. 600 W
Heat source	IR halogen spotlamp
Dimensions (W x H x D)	110 x 170 x 200 mm
Weight	1.8 kg
Power supply	220-240 V, 50/60 Hz

Delivery incl. quartz glass annealing tube, inoculation loop holder with ∅ 3 mm inoculation loop and support for 3 inoculation loop holders.

Electrical Bunsen burner BA6101

Suitable for laboratories in which no gas and naked flames are allowed to be used. Ideal for heating test tubes, crucibles, small bottles and beakers. Max. temperatur 800 °C. The ceramic heating element is located in the upper part of the stainless steel cylinder. 80 % of max. temperature is reached in approx. 4 min and maximum temperature is reached in approx. 12 min.

Equipment: heat output regulator MC5 with special sleeve for attaching a stand rod (max. ∅ 12.5 mm) and indicator lamps for "Power On" and "Output regulator operation".

Technical specifications:

Max. temperature	800 °C
Inner dimensions of heating element (∅ x H)	60 x 45 mm
Outer dimensions of chimney (∅ x H)	120 x 180 mm
Dimensions of heat output regulator (W x D x H)	95 x 130 x 105 mm
Output	480 W
Power supply	220 V, 50/60 Hz

Delivery incl. variable heat output regulator MC5.

Infrared burner IRB 1

By Edmund Bühler. Compact. Is extremely effective because it uses modern IR-radiation burner technology. Excellent for speedy, no-contact heating operations in laboratories, schools and at work. On/off switch with control lamp. Housing remains cool. Long-life infrared radiator element. Additional power control switch available. Max. temperature of **heating surface 750 °C.** Power supply: 250 W, 230 V. Dimensions: L 100 x W 100 x H 100 mm, weight 850 g.

Art. No.	Pack Qty.	€
L487.1	1	320,35

Accessories:

Power control switch	**L488.1**	1	285,95
Support rod for IRB 1 & 2	**L489.1**	1	20,75

Infrared burner IRB 2

By Edmund Bühler. Infrared heater for high temperatures up to **900 °C**. **With integrated output control**, for variable adjustment between 0 and 100 %. Speedy and even heating **with no open flame.** Electronic parts are protected against overflowing liquids. Features also include additional side protection of burner. With ceramic heating element and excess temperature protection. Comes in safe-to-touch enclosure. **Embedded grips** enable safe transport. A cross recess allows flat vessels to be laid directly on heating element. Electrical supply: 800 W/230 V. Dimensions: W 150 x D 150 x H 170 mm, weight 2250 g.

PK59.1	1	52,15

Kettle

By Severin. Casing made of high grade stainless steel, capacity approx. 1.5 l. Power capacity approx. 1800 W. Cordless with separate base. **Automatic steam stop.** On/off switch. Continuously adjustable thermostat with indicator lamp. The water heater cuts out after the set temperature or the boiling point is reached. **360°-central-cordless-system (can be attached from any direction)**. Overheating (heating element switches off automatically when there is no water in kettle or when the heating element becomes calcified) and excess temperature safety system. Covered heating element. Cord storage.
Colour stainless steel, brushed/black. Power supply 220 V, 50 Hz.

Art. No.	Pack Qty.	€
Y533.1	1	45,10

Kettle with temperature adjustment

Made of stainless steel and glass. Volume 1.7 l. Adjustable temperature from 40 to 100 °C in 5 °C steps. Automatic switch-off after the set temperature has been reached. Separate keep-hot function for approx. 30 min (selectable only in the temperature range from 40 to 95 °C). With LCD display. Detachable lid for easier cleaning, large opening. Concealed heating element. Overheating protection. Power 2200 W. Dimensions: W 240 x D 150 x H 260 mm.
Power supply 220-240 V, 50/60 Hz.

Art. No.	Pack Qty.	€
HHY9.1	1	84,20

Thermos flasks Columbus 2000

By Leifheit. With practical snap. High-quality, double-walled vacuum flask. With aroma press button for single-handed pouring.
Contents 1 litre.

Immersion thermostats SC 100, SC 150 and AC 200

By Thermo.

Standard thermostats SC 100 and SC 150

- Simultaneous display of set and actual temperature
- Display resolution 0.1 or 0.01 °C can be selected
- Pumps have a 2 step turbulence reduction system
- USB interface (except SC 100)
- Head can be turned in 90°-increments in bath
- Immersion depth 90 to 145 mm
- Over-temperature warning
- **With screw clamp for bath tub max. 26 mm**

Advanced Thermostat AC 200

like SC 100 and SC 150, but also comes with:

- Pumps have a 3 step turbulence reduction system
- Programmable application temperature alarm with user-selected signal tone (on/off), safe temperature condition or switch-off function
- Interval programming, with the option of being able to alter the interval during operation
- Timer with real-time clock for critical applications
- **With bath bridge (adjustable from 300 to 800 mm) for attaching to bath tubs**

Technical specifications:

Model	SC 100	① SC 150	② AC 200
Working temperature (°C)	+25 to +100	+25 to +150	+25 to +200
Temperature constancy (K)	±0.02		±0.01
Heating capacity (W)	2000		
Max. pump pressure (mbar)	300		475
Max. flow (l/min)	17		20
Max. pump pressure (mbar)	-		330
Dimensions W x H x D (mm)	165 x 333 x 195		165 x 368 x 195
Safety class	I (NFL)	III (FL)	

I (NFL) = non-flammable liquids
III (FL) = flammable liquids

Circulating thermostats with integral bath

By Thermo.

- Has a pump circulating set and is ideal for tempering external and closed applications
- Simultaneous display of set and actual temperature
- Display resolution 0.1 or 0.01 °C can be selected
- Bath tubs made of polyphenylene oxide (PPO)
- Thermostat heads can be turned invariably in 90° steps in bath (except SC 100-S5P)
- Pumps with 2 step turbulence reduction system
- Tube olives for tubes with inner-∅ 8 and 12 mm
- Integrated handles
- If bath lid or cooling spiral are required, please order separately

Technical specifications:

Model	① SC 100-S5P	SC 100-S14P	SC 100-S21P
Working temperature (°C)	Working temperature of 13 °C **over** room temperature to +100 °C

Immersion thermostat, model MA

By Julabo.
- MULTI-DISPLAY (LED) for actual value and up to 3 desired values, excess and insufficient temperature warning functions, excess temperature protection and for pumping capacity stage
- PID-Temperature control with disturbance offset
- **Pumping capacity electronically adjustable in steps**
- Membrane keypad for setting desired values, warning and safety values and various other menu functions
- Early-warning system warns of sinking liquid levels before safety cut-off engages
- Adjustable excess temperature protection system has LED indicator
- With RS 232-interface
- Excess temperature and sub-level protection for flammable tempering liquids (FL)

Technical specifications:

Working temperature	+20 to +200 °C
Temperature constancy	±0.01 K
Heater capacity	2 kW
Max. flow	11 to 16 l/min
Max. pump pressure	0.45 bar
Dimensions (W x D x H)	130 x 150 x 330 mm

Delivery incl. clamps for max 26 mm thick bath tubs.

Art. No.	Pack Qty.	€
Y891.1 *	1	1417,00

* Longer delivery times possible. Please check with our Sales Department.

Attachable cooling spiral

By Julabo.
For immersion thermostat MA.
Suitable for working near the ambient temperature.

Immersion thermostats Alpha, Silver and Gold

By Lauda.

① **Alpha**
- Three-key operation
- LED-display with 0.1 °C display resolution
- Display of set and actual temperature
- Heating and malfunction indicator lamps
- With timer function (max. runtime 99 h, 59 min)
- With screw clamp for saple tubs up 25 mm thick

② **Silver**
- LCD-display with 0.01 °C display resolution
- Operated with cursor keys and softkeys
- Simultaneous display of set and actual temperature
- Pump with six adjustable output levels
- With screw clamp for sample tubs up 25 mm thick
- USB-port

③ **Gold**
- Colour TFT-display with 0.01 °C display resolution
- Operated with cursor keys and softkeys
- Simultaneous display of set and actual temperature
- Graphical display of temperature characteristics
- Interval programming
- Timer
- Programmer with five programs and 150 segments
- Pump with six adjustable output levels
- With screw clamp for sample tubs up to 25 mm thick
- USB-port

Technical specifications:

Model	① Alpha	② Silver	③ Gold

CXX9.1	1	99,00

Immersion thermostats with baths Alpha A-series

By Lauda. For tempering liquids to max +85 °C in open vessels.

- 3-key operation
- LED-Display, display resolution 0.1 °C
- Actual or set value
- With timer function (max. runtime 99 h, 59 min)
- Control indicator lamp for heating and breakdown
- Pump capacity can be reduced to 5 l/min
- Thermostats can be attached via clamp and are therefore suitable for all standard baths (bath depth min. 150 mm)
- Can be upgraded with pump circulating set and ideal for tempering external, closed applications (please order separately)

Technical specifications:

Model	Alpha A 6	① Alpha A 12	Alpha A 24
Working temperature (°C)	+25 to +100		
Temperature constancy (K)	±0.05		
Heating capacity (W)	1500		
Max. pump pressure (mbar)	200		
Max. flow (l/min)	15		
Bath volume (l)	2.5 to 5.5	8 to 12	18 to 25
Bath opening (mm) Bath depth (mm)	145 x 161 150	235 x 161 200	295 x 374 200
Safety class	I (NFL)		

I (NFL) = non-flammable liquids

Delivery incl. bath made of stainless steel.

Type	Art. No.	Pack Qty.	€
Alpha A 6	**KP36.1** *	1	1225,00
Alpha A 12	**KP37.1** *	1	1300,00

Circulating bath thermostats

Circulating thermostats E5-series

With possible temperature control in stainless steel bath.
Temperature control of small, external,
closed vessels possible via pressure pump.

E5-series

- For max. working temperatures +100 °C
- Programmable timer function (up to 99.99 min)
- LCD display, display resolution 0.1 °C
- Actual or set value reading, (set value reading via keystroke, actual value reading is permanently visible)
- Adjustable key locking mechanism
- Limit value signal optical and/or acoustic
- Adjustable set value limit and automatic alarm
- Excess temperature and sub-level protection for non flammable temperature control liquids (NFL)

E5s-series

Like model E5, however for max working temperatures +150 °C.

Technical specifications:

Model	E5-B4	E5-B6	E5-B12	E5-B16
Working temperature (°C)	+25 to +100			
Constancy of temperature (K)	±0.1			
Heating capacity (W)	1000

Bath/circulation thermostats, CORIO™ CD-B-series

By Julabo. For internal standard applications.
Flexible use, e.g. for changing bath tanks.

- External pump connections each with 2 connectors for hoses with 8 and 12 mm inner ∅
- Simple changeover between internal and external circulation
- USB port
- Integrated drain screw (except in model CD-B5)

Technical specifications:

Model	CD-B5	① CD-B13	② CD-B27
Working temperature (°C)	+20 to +150		
Temperature constancy (K)	±0.03		
Display resolution (°C)	0.1		
Setting resolution (°C)	0.1		
Heating output (W)	2000

Circulating bath thermostats

Heat thermostats E 4 S and E 20 S

By Lauda. With bath tubs rated for up to 200 °C.
Inner basin made of stainless steel. Outer shell made of powder-coated sheet steel. Supplied complete with cooling spiral.

Circulating thermostat E 4 S
- **For temperature control of external, closed circuits and simultaneous temperature control in a thermostat bath**
- LCD display with 0.01 °C display resolution
- Operated with cursor keys and softkeys
- Simultaneous display of set and actual temperature
- USB port
- Pump connections with 13 mm plastic connector as standard
- **Delivery incl.** bath lid

Heat thermostat E 20 S
- **For internal temperature control of liquids in a bath**
- LCD display with 0.01 °C display resolution
- Operated with cursor keys and softkeys
- Simultaneous display of set and actual temperature
- USB port
- **Delivery without** bath lid (please order separately)

Technical specifications:

Model	E 4 S	E 20 S
Working temperature	+20 to +200 °C	
Temperature constancy	±0.01 K	
Heating output	2.0 kW	
Max. pump pressure	0.55 bar	
Max. flow	22 l/min	
Bath capacity	3.5 l	19 l

Circulating thermostats with stainless steel bath

By Thermo. For temperature control of external, closed circuits, e.g. densimeters, viscometers, photometers, refractometers, etc. Simultaneous temperature control in thermostat bath possible.

- Simultaneous display of set and actual temperature
- Display resolution 0.1 or 0.01 °C can be selected
- Stainless steel bath for oil
- Thermostat heads can be turned invariably in 90° steps in the bath
- Pumps with 2 step turbulence reduction system
- Drainage outlet (on the front)
- Bath with handles
- Olives for tubes with 8 and 12 mm inner-Ø
- A water cooling coil is optionally available (please order separately).

Technical specifications:

Model	SC 150-S13	SC 150-S21

Circulating bath thermostats

Bath and circulating thermostats models MA-12 and MA-26

By Julabo. For external temperature control of measuring instruments, gauge heads and other closed objects. Simultaneous temperature control in thermostat bath possible.

- MULTI-DISPLAY (LED) indicates actual value, up to 3 set values, excess and low temperature warning signals, excess temperature protection and pump performance stages
- Setting/display resolution 0.01 °C (to 99.99 °C), 0.1 °C (from 100 °C)
- PID-Temperature control with disturbance offset
- **Pumping capacity electronically adjustable in steps**
- Keypad for setting desired values, warning and safety values and various other menu functions
- Early-warning system warns of sinking liquid levels before safety cut-off engages
- Adjustable excess temperature protection system has LED indicator
- With RS 232-interface
- Excess temperature and sub-level protection for flammable tempering liquids (FL)

Technical specifications:

Model	MA-12	MA-26
Working temperature (°C)	+20 to +200	
Temperature constancy (K)	±0.01	
Heater capacity	2 kW	
Max. flow (l/min)	11 to 16	
Max. pump pressure (bar)	0.45	
Bath opening W x D (mm)	220 x 150	220 x 300
Bath depth (mm)	200	200
Bath volume (l)	12	26
Dimensions W x D x H (mm)	300 x 430 x 450	360 x 610 x 450

Delivery incl. stainless steel bath tub, lid for tub, cooling spiral and pump outlets.

Type	Art. No.	Pack Qty.	€
Model MA-12	**Y893.1** *	1	2526,00
Model MA-26	**Y894.1** *	1	2846,00

* Longer delivery times possible. Please check with our Sales Department.

Circulating bath thermostat PC300-S7

By Thermo. For temperature control in bath or external open and closed circuits.

- 8-language full text display and numerical input via keys in large colour display
- Powerful pressure and suction pump allows open and closed external applications
- Pump with 5-stage turbulence reduction system
- 5-interval programming with 10 segments; options for ramp processing during operation
- Programmable application temperature alarm with signal that can be selected by the user (On/Off) or switch-off function
- Timer with real-time clock for critical applications
- USB interface
- With stainless steel bath
- Thermostat heads can be turned invariably in 90° steps on the bath
- Drain orifice (on the front) and handles
- Connectors for tubes with 8 and 12 mm inner ∅

Technical specifications:

Working temperature (°C)	+20 to +300 °C
Temperature constancy (K)	±0.01 K
Heating output (W)	3000 W
Max. flow (l/min)	24 l/min
Max. pump pressure (mbar)	560 mbar
Max. pump suction (mbar)	380 mbar
Bath capacity (l)	7 l
Bath opening (mm) Depth (mm)	239 x 110 mm 200 mm
Safety class	III (FL)

III (FL) = flammable liquids

Delivery incl. circulation set for external circulation and bath lid.

Art. No.	Pack Qty.	€
PE45.1 *	1	3546,00

Accessories for circulating bath thermostats PC300-S7 and PC200-S30

By Thermo.

Attachable cooling spiral for PC300-S7

Art. No.	Pack Qty.	€
PE47.1 *	1	312,00

* Longer delivery times possible. Please check with our Sales Department.

Recirculating coolers

Thermoelectric circulation thermostats LAUDA LOOP

By Lauda.
Applications: temperature control for refractometers, polarimeters, electrophoresis chambers or small bioreactors.
- Refrigerant-free temperature control with Pertier technology
- Power-controlled fans
- 3-key operation with OLED display, display resolution 0.1 °C
- RS 232 interface

Technical specifications:

Model		LOOP L 100	LOOP L 250
Alpha		4 to 80	
Temperature constancy (K)		±0.1	
Heating output (W)		200	400
Cooling capacity (W)	20 °C	120	250
	10 °C	60	130
Max. pump pressure (mbar)		800	
Max. flow (l/min)		2.6	
Capacity (l)		0.3	
Dimensions: W x D x H (mm)		175 x 301 x 266	261 x 368 x 312
Weight (kg)		6.9	11.9
Power supply		230 V, 50/60 Hz	

Delivery incl. pump connection glands for hoses with ID 6.4 mm.

Type	Art. No.	Pack Qty.	€
LOOP L 100	**HHY7.1** *	1	1895,00
LOOP L 250	**HHY8.1** *	1	2960,00

* Longer delivery times possible. Please check with our Sales Department.

Accel-series circulating coolers

By Thermo. For external, closed applications with water as a tempering medium, for example for cooling electrophoresis equipment.
The integrated stainless steel bath design minimises the volume and evaporation of tempering medium, however it does not allow access to the bath for direct tempering of samples.
Features:
- Digital temperature display
- LCD-Display with multi-lingual text menu control (German, English, French)
- 5 user-defined set temperatures
- Energy savings feature
- Liquid level indicator
- 2.8 litres internal volume of bath
- Pump speed control - allows the user to set the pump speed at either 50 or 100 % for tighter control
- Pump for hoses with 12 mm inner-∅
- With discharge nozzle on the front for convenient changing of water
- USB-port
- Low-level alarm

Technical specifications:

Model	Accel 250	Accel 500
Working temperature range (°C)	-10 to +80	
Temperature constancy (K)	±0.1	
Heating power (W)	2000	
Cooling capacity at 20 °C (W)	250	500
Pump pressure (mbar)	300	
Pump rate of delivery (l/min)	15	
Dimensions L x W x H (mm)	620 x 232 x 487	
Weight (kg)	30	

Type	Art. No.	Pack Qty.	€
Accel 250	**PE51.1** *	1	2477,00
Accel 500	**APT5.1** *	1	3018,00

* Longer delivery times possible. Please check with our Sales Department.

Recirculating coolers

F-series compact recirculating coolers

By Julabo. **Applications:** rotary evaporator, Soxhlet extractors, distillation equipment, gas chromatographs etc.
For external, closed-circuit applications.

Equipment:
- LED temperature display, display resolution 0.1 °C
- PID temperature control
- Draincock for easy drainage
- Level indicator

Technical specifications:

Model		① F250	② F500	F1000
Working temperature range (°C)		-10 to +40	0 to +40	
Temperature constancy (K)		±0.5		
Heating output (W)		0		
Cooling capacity (W)	20 °C	250	500	1000
	10 °C	220	400	700
	5 °C	210	300	550
	0 °C	180	250	250
	-5 °C	90	-	-
Max. pump pressure (mbar)		350	500	1000
Max. pump flow (l/min)		15	24	23
Capacity (l)		1.7 to 2.6	5 to 7.5	7 to 9.5
Dimensions W x D x H (mm)		240 x 400 x 520	375 x 440 x 590	375 x 490 x 640
Weight (kg)		27	34	45
Power supply		230 V, 50 Hz		

Delivery incl. 2 hose connectors suitable for hoses with 8 and 10 mm inner ∅ (model F250) or hoses with 8 and 12 mm inner ∅ (model F500, F1000).

Type	Art. No.	Pack Qty.	€
F250	**AXX4.1** *	1	2060,00
F500	**AXX5.1** *	1	2935,00

* Longer delivery times possible. Please check with our Sales Department.

Microcool recirculating coolers

By Lauda.
Applications: cooling of rotary evaporators, distillation systems and analytical apparatus, as well as supply of cold traps.

Features
- LED temperature display, display resolution 0.1 °C
- Time-controlled starting and shutdown of the circulation chiller (Auto-Start or Auto-Shut-Down-Timer)
- Illuminated sight glass for checking the thermostating liquid level
- Filler neck on top of apparatus at front
- Removable front grid for cleaning the condenser
- RS 232 interface

Additional features of MC 600 and MC 1200
- Bypass adjusting wheel for regulating the pump pressure
- Pressure gauge for displaying the pump pressure
- Four rollers with holding brakes

Technical data:

Model	① MC 250	② MC 600	③ MC 1200
Working temperature range	-10 to +40 °C		
Temperature constancy	±0.5 °C		
Heating capacity	0 W		
Cooling capacity (W)			
+20 °C	250	600	1200
+10 °C	200	500	1050
0 °C	150	360	750
-10 °C	90	150	400
Pump pressure (mbar)	350	1300	
Pump delivery rate (l/min)	16	35	
Capacity (l)	2 to 4	4 to 8	7 to 14
Timer	1 min up to 99 h, 59 min		
Dimensions W x D x H (mm)	200 x 350 x 465	350 x 480 x 595	450 x 550 x 650
Weight (kg)	26	51	64
Power supply	230 V, 50 Hz		

Delivery incl. 10 mm pump connector (model MC 250).
Two 10 mm hose connectors with a G ¾" union nut are required for models MC 600 and MC 1200. Please order separately.

Type	Art. No.	Pack Qty.	€
① MC 250	**AEP2.1** *	1	2190,00
② MC 600	**AEP3.1** *	1	3020,00
③ MC 1200	**AEP4.1** *	1	3810,00

Accessories:

10 mm hose connector with G ¾" union nut	**AEP5.1** *	1	14,65

* Longer delivery times possible. Please check with our Sales Department.

Refrigerating thermostats

Refrigerating circulating thermostats

By Thermo. For temperature control in bath or for open and closed external circuits.

- Simultaneous display of set and actual temperature
- Display resolution 0.1 or 0.01 °C can be selected
- Stainless steel bath
- Thermostat heads can be turned invariably in 90° steps on the bath
- Drain cock (on the front)
- With integrated handles
- Olives for tubes with 8 and 12 mm inner ∅

Technical specifications:

Model	SC 100-A10	SC 150-A25
Working temperature (°C)	-10 to +100	-25 to +150
Temperature constancy (K)	±0.02	
Heating output (W)	2000	
Cooling capacity at 20 °C (W)	240	500
Max. flow (l/min)	17	
Max. pump pressure (mbar)	300	
Bath capacity (l)	6	12
Bath opening (mm) Depth (mm)	137 x 124 150	173 x 183 200
Safety class (FL)	I	III

I (NFL) = non-flammable liquids
III (FL) = flammable liquids

Delivery incl. bath lid and circulation set for external circulation.

Type	Art. No.	Pack Qty.	€
SC 100-A10	**PC14.1** *	1	2801,00
SC 150-A25	**PC15.1** *	1	3893,00

Refrigerating circulating thermostats, CORIO™ CD-F-series

By Julabo. For temperature control of samples in baths or for enclosed external instruments such as refractometers, polarimeters, photometers, viscosimeters, electrophoresis cells, chromatography columns and rotary evaporators.

- External pump connections each with 2 connectors for hoses with 8 and 12 mm inner ∅
- With drain outlet
- Handles (front and back) for easy transportation
- USB port

Technical specifications:

Model		① CORIO™ CD-200F	② CORIO™ CD-300F	② CORIO™ CD-600F
Working temperature range (°C)		-20 to +150	-25 to +150	-35 to +150
Temperature constancy (K)		±0.03

Refrigerating thermostats

Table refrigerating thermostats Alpha RA-series

By Lauda. For controlling temperature of external, closed electric loads. Simultaneous internal temperature control possible.

- 3-key operation
- LCD display, display resolution 0.1 °C
- Actual or set value
- With timer function (max. runtime 99 h, 59 min)
- Control lamp for heating, cooling and breakdown.
- Front panel can be removed to clean the condenser
- With drain outlet on the back to empty tempering liquid
- Bath tubs made of stainless steel

Technical specifications:

Model	Alpha RA 8	Alpha RA 12	Alpha RA 24
Working temperature (°C)	-25 to +100		
Temperature constancy (K)	±0.05		
Heating capacity (W)	1500		
Cooling capacity at 20 °C (W)	225	325	425
Max. pump pressure (mbar)	200		
Max. flow (l/min)	15		
Bath volume (l)	5 to 7.5	9.5 to 14.5	14 to 22
Bath opening (mm)	165 x 190	300 x 190	350 x 290
Bath depth (mm)	160		
Safety class	I (NFL)		

I (NFL) = non-flammable liquids

Delivery incl. lid for bath and circulating pump kit.

Type	Art. No.	Pack Qty.	€
Alpha RA 8	**KP41.1** *	1	3070,00
Alpha RA 12	**KP42.1** *	1	3640,00

* Longer delivery times possible. Please check with our Sales Department.

Table refrigerating thermostat models RE 415 S and RE 415 G

By Lauda. For controlling temperature of external loads. Simultaneous internal temperature control possible. Compact outer dimensions.
Delivery incl. thermostat with drain outlet, recessed handles and bath lid.

① **RE 415 S**
- LCD display with 0.01 °C display resolution
- Operation by means of cursor keys and softkeys
- Simultaneous display of set and actual temperature
- USB port
- Hose connectors for hoses with 10 mm inside ∅

② **RE 415 G**
- Colour TFT display with 0.01 °C display resolution
- Operation by means of cursor keys and softkeys
- Simultaneous display of set and actual temperature
- Graphical display of temperature characteristics
- Interval function
- Timer
- USB port
- Hose connectors for hoses with 10 mm inside ∅

Technical specifications:

Model	① RE 415 S	② RE 415 G
Working temperature	-15 to +200 °C	
Temperature constancy	±0.02 K	
Display resolution	0.01 °C	
Setting resolution	0.01 °C	
Heating output	2.0 kW	2.6 kW
Cooling capacity at 20 °C	180 W	
Max. pump pressure	0.55 bar	
Max. flow	22 l/min	
Bath capacity	4 l	
Bath opening / bath depth	130 x 105 / 160 mm	
Safety class	III (FL)

Refrigerating thermostats

Refrigerating circulating thermostat model F12-MA

By Julabo. For temperature control of external closed instruments such as photometers, refractometers, viscometers, etc. Simultaneous temperature control of smaller objects is possible directly in the thermostat bath. Equipped with drain valve for emptying tempering liquid and with removable ventilation grid.

- MULTI-DISPLAY (LED) indicates actual value, up to 3 set values, excess and low temperature warning signals, excess temperature, and stage pump performance protection
- PID-Temperature control with disturbance offset
- **Pumping capacity electronically adjustable in steps**
- Membrane keypad for setting desired values, warning and safety values and various other menu functions
- Early-warning system warns of sinking liquid levels before safety cut-out engages
- Adjustable excess temperature protection visible via LED
- With RS 232-interface
- Excess temperature and sub-level protection for flammable tempering liquids (FL)

Technical specifications:

Working temperature	-20 to +200 °C
Temperature constancy	±0.01 K
Heater capacity	2 kW
Cooling capacity at 20 °C	160 W
Max. flow	11 to 16 l
Max. pump pressure	0.45 bar
Bath opening (W x D)	150 x 160 mm
Bath depth	150 mm
Bath volume	4.5 l
Dimensions (W x D x H)	200 x 360 x 560 mm

Art. No.	Pack Qty.	€
Y896.1 *	1	3717,00

* Longer delivery times possible. Please check with our Sales Department.

①

Refrigerating circulating thermostats AC-series

By Thermo. For temperature control in bath or for open and closed external circuits.

- Simultaneous display of set and actual temperature
- Display resolution 0.1 or 0.01 °C can be selected
- Stainless steel bath
- Thermostat heads can be turned invariably in 90° steps on the bath
- Drain cock (on the front)
- With integrated handles
- Connectors for tubes with 8 and 12 mm inner-∅
- A bath lid is included with the AC 150-A25 B model. If a bath lid is required for the AC 150-A10B model, please order separately.

Technical specifications:

Model	**AC 150-A10B**	**① AC 150-A25B**
Working temperature (°C)	-10 to +100	-25 to +150
Temperature constancy (K)	±0.01	
Heating capacity (W)	2000	
Cooling capacity at 20 °C (W)	250	500
Max. pump pressure (mbar)	475	
Max. flow (l/min)	20	
Max. pump pressure (mbar)	330	
Bath volume (l)	18 to 30	13 to 20
Bath opening (mm)	295 x 375	220 x 243
Bath depth (mm)	200	230
Safety class	III (FL)	

III (FL) = flammable liquids

Delivery incl. circulating set for external circulation.

Type	Art. No.	Pack Qty.	€
AC 150-A10B	**LP68.1** *	1	4212,00
AC 150-A5B	**LP69.1** *	1	4346,00

VersaCool 7 refrigerating circulating thermostats

By Thermo. For heating and cooling. For external closed-circuit temperature control tasks or direct use in circulating baths.

- Languages: German, English, French and four others
- Intuitively operated colour touchscreen (screen size 14.4 cm)
- Electronically adjustable pump output levels (40 to 100 %)
- Graphical display of temperature profile
- Programmable with 30 program steps for up to 10 different programs (max. process time per program step 999 h, max. 10 repetitions per step)
- Integrated data logger incl. 4 GB SSD card
- USB port for reading out the data logger and storing ramp profiles. Ramp profiles can be used for various baths by using the download and upload functions of the USB flash drive
- Overtemperature protection
- RS 232, RS 485 and Micro USB port
- Bluetooth communication port - for remote control and monitoring via iOS or Android smartphone
- Timer function
- Pt 100 external sensor connection for measurement and control in external system. Please order temperature sensor Pt 100 separately

Technical specifications:

Operating temperature range		-20 to +150 °C
Temperature constancy		±0.02 K
Heating capacity	at 230 V at 115 V	2000 W 1200 W
Cooling capacity	20 °C 0 °C -10 °C -20 °C	425 W 200 W 100 W 50 W
Max. pump pressure		1200 mbar
Max. pump flow		14.6 l
Bath capacity		7 l
Bath opening		173 x 297 mm
Bath depth		150 mm
Dimensions (W x D x H)		258 x 585 x 474 mm
Safety class		III (FL)
Weight		36 kg
Power supply		200-240 V, 50/60 Hz to 100-120V, 50/60 Hz

III (FL) = flammable liquids

Delivery incl. bath lid (can be attached to open right or left or placed loosely on top), 2 hose connectors for hoses with 8 and 12 mm inner ∅ and 4 GB SSD card.

Art. No.	Pack Qty.	€
CAY7.1 *	1	6808,00

* Longer delivery times possible. Please check with our Sales Department.

Refrigerating circulating thermostats F32-ME and FP50-ME

By Julabo. For heating and cooling. For external closed-circuit temperature control tasks or direct use in thermostat baths.

Equipment:

- VFD display for indicating set values and actual values, display resolution 0.01 °C
- PID temperature control
- Electronically adjustable pump output levels
- Early warning system for low liquid level.
- Adjustable high temperature cut-out
- Integrated programmer for 1 program with 10 program steps
- Pt 100 external sensor connection for measurement and control in external system. If external control is required, please order Pt 100 sensor separately

Technical specifications:

Model		**① F32-ME**	**② FP50-ME**
Working temperature (°C)		-35 to +200	-50 to +200
Temperature constancy (K)		±0.01	
Heating output (W)		2000	
Cooling capacity (W)	20 °C 0 °C -20 °C -30 °C -40 °C	450 390 150 60 -	900 800 500 320 160
Max. pump pressure (mbar)		230 to 450	
Max. pump flow (l/min)		11-16	
Bath volume (l)		8	
Bath opening (mm)		180 x 120	
Bath depth (mm)		150	
Dimensions W x D x H (mm)		310 x 420 x 640	420 x 490 x 700
Safety class		III (FL)	
Weight (kg)		37	55
Power supply		230 V, 50 Hz	

III (FL) = flammable liquids

Delivery incl. 2 hose connectors for hoses with 8 and 10 mm inner ∅.

Type	Art. No.	Pack Qty.	€
F32-ME	**AXY6.1** *	1	5442,00

* Longer delivery times possible. Please check with our Sales Department.

Water baths

Low-temperature circulation thermostat AC200-G50

By Thermo. For temperature control of samples in baths or for open external instruments such as jacketed reaction vessels. Typical applications: material tests, analytical equipment, calibration and crystallisation.

- Languages: German, English, French and two others
- Timer with real-time clock
- Ramp programming for 1 ramp with 30 steps
- Alarm for temperature too high/too low, level alarm
- 3 stage pump
- External pump connections each with 2 connectors for hoses with 8 and 12 mm inner ∅

Technical specifications:

Working temperature		-50 to +200 °C
Temperature constancy		±0.01 K
Display resolution		0.01 °C
Setting resolution		0.01 °C
Heating capacity		2000 W
Cooling capacity at	20 °C -20 °C -40 °C	1000 W 600 W 180 W
Max. pump pressure		475 mbar
Max. flow		20 l/min
Max. pump suction		330 mbar
Bath opening Bath depth		208 x 104 mm 200 mm
Bath capacity		6 to 12 l
Dimensions (W x D x H)		419 x 554 x 851 mm
Weight		62 kg
Safety class		III (FL)

III (FL) = flammable liquids

Delivery incl. bath lid.

Art. No.	Pack Qty.	€
CYX2.1 *	1	6388,00

* Longer delivery times possible. Please check with our Sales Department.

Water baths, WB-series

- Stainless steel inner tank
- LCD display for displaying nominal/actual temperature values
- Integrated digital clock (1 min to 99 h, 59 min or continuous)
- Overheating protection
- Heater exposed on floor

WB-12 and WB-22: operating temperature range from 5 °C **and** room temperature to 100 °C (adjustment range from 10 to 100 °C).

WB-22-P: operating temperature range from 5 °C **and** room temperature to 85 °C (adjustment range from 10 to 85 °C). With built-in circulation pump for faster and more even heat distribution within the bath.

Technical specifications:

Model	WB-12	WB-22	WB-22-P
Useable volume			
Capacity approx. (l)	12	22	22
Width (mm)	390	490	490
Depth (mm)	220	290	290
Height (mm)	150	150	150
Units			
Width (mm)	480	680	680
Depth (mm)	310	365	365
Height incl. lid (mm)	375	395	395
Temperature constancy (±K)	0.5	0.5	0.2
Heating capacity (kW)	900	1100	1100
Max. number of test tubes	4	8	8
Weight	12	18	19
Power supply	230 V, 50 Hz		

Delivery incl. removable shelf and stainless steel cover.

Test tube rack for WB series water baths

Type	Art. No.	Pack Qty.	€
for 20 test tubes with ∅ 13 mm	**EEA6.1**	1	57,95
for 20 test tubes with ∅ 18 mm	**EEA7.1**	1	57,95
for 5 test tubes with ∅ 31 mm	**EEA8.1**	1	57,95

Water baths Aqualine

By Lauda.
For working temperature range 30 to 95 °C (temperature settings range from 10 to 95 °C).
- Inside tub made of stainless steel
- Homogeneous temperature distribution and easy cleaning as heating elements are under bath tub (no fixtures inside tub)
- With digital temperature display
- Integrated overheating protection

Technical specifications:

Model	AL 5	AL 12	AL 18	AL 25
Useable space				
Volume (l)	5	11.7	18.2	25.2
Bath opening (mm)	300 x 151	329 x 300	505 x 300	505 x 300
Bath depth (mm)	150	150	150	200
Units

Water baths WBT-series

For working range from 25 to 100 °C.
- Inside tub made of stainless steel
- Microprocessor-controlled temperature control units
- Digital temperature display
- Adjustable upper and lower desired value limit
- Visual and/or acoustic limit value alarm (acoustic)
- With dry run protection
- The memory function saves 3 parameter combinations of set temperature and time
- Tub is empied via outlet with screw drain plug on base. A drain cock is also available as an option (please order separately)
- Water bath WBT 1 is supplied with a round flad lid, all other models are equipped with a slanting lid
- Heater exposed on floor.

Delivery incl. removable shelf.

Water baths

Water bath precision series

By Thermo.

- **For a working temperature range of 30 to 100 °C** (except for the GP 02 model which can only be used up to 90 °C)
- Microprocessor-controlled temperature regulator
- Digital temperature display
- Integrated timer for programming on/off times, timer function (1 to 99 mins) or continuous operation
- Memory function can save up to four setpoint temperatures
- Equipped with protection against overheating
- Model GP 15 Dual (5/10 l) comes with two baths, the temperature of which can be controlled separately. A different temperature can be set for each bath.
- Heating elements under the bath tank (no fittings in bath tank)
- Internal water drainage tube with integrated quick-release coupling (only with models GP 10, GP 20, GP 28 and GP 15 Dual)

Pura™-series water baths

By Julabo.

For a temperature range from 25 to 99.9 °C.

- Digital temperature display
- Internal timer function (max. 99 h, 59 min in 1-min steps), with signal after expiry of the time, optionally with or without heating switch-off
- Integrated drain cock (for tubes with ID 12 mm)
- Easy to clean, since there are not fittings in the bath
- USB port
- Enamelled basin base
- Boil-dry protection and carrier handles installed
- **Foldable bath cover available as accessory, please order separately**

Water baths WNB-series

By Memmert.

Features

- Temperature setting ranges from 10 to 95 °C, with additional boiling level optional
- Control range begins at least 5 °C **above** ambient temperature
- Available with shaking device (see next page)
- With programmable hold-time and switch-on delay
- Electronic microprocessor-PID-regulator
- Mechanical temperature limiter TB
- Integrated digital clock (from 1 min to 99 h and 59 min)
- Stainless steel work area
- Bath can be emptied via outlet valve
- Heater is located under deep-drawn, easy-to-clean ribs.
- **We recommend ordering the matching floor grid if no test tube racks are to be used**

Heating bath HBR 4 control with magnetic drive

By IKA. **Effective volume 4 l**. Interior is free of heating coils (no fixtures in bath tub). Made of stainless steel. Optionally low-viscosity oil (50 mPas) or water as heat transfer medium. Digital display for desired, actual and safety temperatures as well as for speed. **Integrated magnetic drive rotates heating medium,** which enables better heat distribution in bath. Heating element under the bath tank (no fittings in bath tank). With RS 232-interface. Two carrying handles.

Technical specifications:

Heating function	
Temperature range	Room temp. max 200 °C
Heating capacity	1000 W
Setting accuracy	±1 K
Deviation (3 l H_2O, 90 °C)	±1 K
Temperature display	digital
Stirrer drive	
rpm-range	100 to 800 rpm
General specifications	
Volume	4 l
Inner height / -∅	Height 160 mm, ∅ 200 mm
Outer height / -∅	Height 250 mm, ∅ 250 mm
Weight	4.4 kg
Power supply	230 V, 50/60 Hz

Art. No.	Pack Qty.	€
LN86.1	1	3425,00

① Set of rings for water bath HBR 4 control

To cover bath. Consists of 10 rings with a ∅ of 25 to 185 mm. Prevents dust, heat loss or water contamination of oil baths and oil mist formation when working with oil.

Art. No.	Pack Qty.	€
9700.1	1	480,00

② Intermediate bottom for water bath HBR 4 control

Made of stainless steel. For better heat distribution or without disrupting the movement of the rotating stirring bar.

Art. No.	Pack Qty.	€
9689.1	1	220,00

Oil baths, ONE-series

By Memmert.

Features

- Temperature setting ranges from +20 to +200 °C
- Control range begins at least 5 °C above ambient temperature
- Digital setpoint setting (0.1 °C-increments) and actual value display
- Integrated digital clock (1 min to 999 h)
- Stainless steel work area
- With programmable hold-time and switch-on delay
- We recommend ordering the corresponding grid if no test tube rack is to be used
- Bath can be emptied via outlet valve

Water bath with circulation pump WPE 45

By Memmert.

Equipment:

- Digital display for temperature or countdown timer (1 min to 999 h)
- Pump can be switched on and off
- Pump switch-off at end of program
- Textured stainless steel housing
- Bath drainage by drain valve
- For use, we recommend a bottom grid (please order separately)

Overheat protection (3-level)

- If overheating occurs due to a fault, the heater is switched off when the setpoint is exceeded by approx. 10 °C.
- Independently working, adjustable electronic overtemperature controller TWW (protection class 3.1) or temperature limiter TWB (protection class 2)
- Mechanical temperature limiter TB (protection class 1) for heater switch-off when max. bath temperature is exceeded by approx. 30 °C

Technical specifications:

Working temperature range	15 °C **above** room temperature up to +95 °C and additional boiling mode (only available when pump is switched off)
Temperature adjustment range	10 to 95 °C
Temperature constancy (in time/space)	±0.1/±0.3 °C
Display resolution	0.1 to 95 °C
Heating output	2800 W
Capacity	45 l
Inner dimensions (L x W x H)	590 x 350 x 220 mm
Outer dimensions (L x W x H)	818 x 516 x 401 mm
Weight	35 kg
Power supply	230 V, 50-60 Hz

Delivery incl. stainless steel gable cover.

Art. No.	Pack Qty.	€

Shaking water bath SBS40

By Stuart.

- Optionally available with tray for back and forth shaking movements (type SBS40/1) or tray for circular movements (type SBS40/2)
- The shaking movement is produced by inserting the tray
- Loading configurations per tray: e.g. Erlenmeyer flasks - 8 x 250 ml or 6 x 500 ml or 4 x 1000 ml
- Each tray includes 15 springs for attaching bottles, beakers and bulbs in different sizes
- Digital temperature display (resolution 0.1 °C)
- With overheating protection and drain cock

Technical specifications:

Capacity	24 l
Working temperature range	Infinitely adjustable from 19 to 95 °C, control range starts at 10 °C above ambient temperature
Temperature stability	±0.25 °C
Shaking frequency	20 to 130 rpm, infinitely adjustable
Shaking amplitude (stroke)	20 mm
Inner dimensions (W x D x H)	300 x 500 x 200 mm
Outer dimensions (W x D x H)	335 x 580 x 320 mm
Weight	17 kg
Power supply	230 V, 50 Hz

Delivery without stainless steel cover, shaking tray and test tube racks (please order separately).

Art. No.	Pack Qty.	€

WNB-series water baths with shaking device

By Memmert.

- Adjustment range from 10 to 95 °C, with additional heat setting
- Range of adjustment begins at 5 °C **above** ambient temperature
- Integrated digital clock (1 min to 99 h and 59 min)

With 15 mm horizontal back-and-forth shaking strokes.
Continuously variable frequency adjustment (35 to 160 strokes per min).
Delivery incl. mounting frame for perforated mounting plate and test tube rack. Bath drainage by drain valve.

Note: to operate the water bath, you require either a perforated mounting plate with fixing clamps or test tube racks (please order separately). The perforated mounting plate includes a holding basket which is also sufficient for general operation.

Without lid. If a stainless steel lid is required, please include with first order.

Insert racks for 90 test tubes ∅ 18.0 mm	**N908.1** *	1	125,00
Insert racks for 25 test tubes ∅ 32.0 mm	**N909.1** *	1	125,00

Insert racks for test tubes for WNB 29 and 45

Type	Art. No.	Pack Qty.	€
Insert racks for 216 test tubes ∅ 14.5 mm	**YL78.1** *	1	233,00
Insert racks for 180 test tubes ∅ 18 mm	**YL79.1** *	1	233,00
Insert racks for 54 test tubes ∅ 32 mm	**YL80.1** *	1	233,00

* Longer delivery times possible. Please check with our Sales Department.

▶ Microcentrifuge tube see page 490

Digital single/dual block thermostats

For precise heating of reaction vials, test tubes, type Falcon® centrifuge tubes and 96 well PCR trays.

- Stainless steel housing
- With LED temperature display
- Integrated timer function
- Suitable for one or two interchangeable blocks depending on model

Technical specifications:

Working temperature range	5 °C **above** ambient temperature up to 150 °C
Temperature adjustment range	0 to 150 °C
Resolution / accuracy	±0.3 °C / 0.1 °C
Integrated timer	1 min to 99 h, 59 min in 1-min steps or continuous operation container blocks
Heating-up time	approximately 35 min to 100 °C
Dimensions (W x D x H)	210 x 290 x 120 mm
Power supply	230 V, 50/60 Hz

Delivery incl. lift rod for changing blocks and detachable lid for microlitre container blocks. Does not include interchangeable blocks (please order separately).

Type	Capacity	Art. No.	Pack Qty.	€
Single block thermostat	1 interchangeable block	**PY25.1**	1	385,95
Dual block thermostat	2 interchangeable blocks	**YC47.1**	1	475,15

Interchangeable blocks for single/dual block thermostats

Made of aluminium.

Interchangeable blocks for reaction vials
Dimensions: W 90 x D 76 x H 51 mm

Type	Usable for	Art. No.	Pack Qty.	€
48 reaction vials 0.2 ml	Single/dual	**PY26.1**	1	138,70
24 0.5 ml reaction vials	Single/dual	**PY27.1**	1	138,70
24 1.5 ml reaction vials	Single/dual	**PY28.1**	1	138,70
20 reaction vials 2.0 ml	Single/dual	**PY29.1**	1	138,70

Interchangeable blocks for test tubes/sample vials
Dimensions: W 90 x D 76 x H 51 mm

Type	Usable for	Art. No.	Pack Qty.	€
20 tubes ∅ 12 mm	Single/dual	**PY30.1**	1	138,70
12 tubes ∅ 16 mm	Single/dual	**PY31.1**	1	138,70
6 tubes ∅ 20 mm	Single/dual	**YC48.1**	1	107,25
6 tubes ∅ 25 mm	Single/dual	**YC49.1**	1	107,25

Interchangeable blocks for type Falcon® centrifuge tubes
Dimensions: W 90 x D 76 x H 83 mm

Type	Usable for	Art. No.	Pack Qty.	€
12 centrifuge tubes 15 ml	Single/dual	**PY32.1**	1	138,70
5 centrifuge tubes 50 ml	Single/dual	**PY33.1**	1	138,70

Interchangeable block for custom fabrication
Dimensions: W 90 x D 76 x H 51 mm

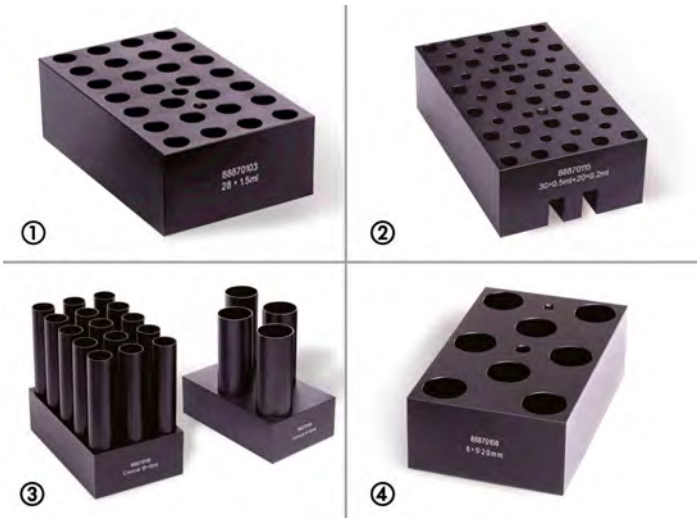
Type	Usable for	Art. No.	Pack Qty.	€
Without drill holes	Single/dual	**YC50.1**	1	107,25

Interchangeable blocks for 96 well PCR trays and microtitration plates

Please note: only 1 PCR block or microtitration plate can be used in a dual-block thermostat (due to block size).

Type	Usable for	Art. No.	Pack Qty.	€
PCR plate, 96 well (with/without frame)	Single	**PY34.1**	1	292,40
PCR plate, 96 well (with/without frame)	Dual	**YC51.1**	1	277,35
Microtitration plate, 96 well	Dual	**YC52.1**	1	209,65

Block thermostats



Touchscreen block thermostats

By Thermo. For precision temperature control of reaction vials, test tubes and centrifuge vials of the type Falcon®.

- 4.3″ touchscreen display with time and temperature display
- PID thermostat
- Integrated timer function
- 10 user-definable programs for up to 5 successive steps with different temperature and operating time
- Connectivity for external Pt 1000 temperature sensor (please order separately); in this case, temperature is controlled and displayed using the external sensor instead of the built-in temperature sensor

Technical specifications:

Operating temperature range	5 °C **above** ambient temperature up to 130 °C
Temperature adjustment range	0 to 135 °C
Resolution / accuracy	±1 °C / 0.1 °C
Timer	0 to 99 h 59 min in 1 min increments or continuous operation
Heating-up time	1/2 block thermostat: 30 to 130 °C approximately 20 min 4-block thermostat: 30 to 130 °C approximately 25 min
Dimensions (W x D x H)	1-block thermostat: 200 x 373 x 100 mm 2-block thermostat: 200 x 403 x 100 mm 4-block thermostat: 200 x 535 x 100 mm
Weight	1-block thermostat: 3.4 kg 2-block thermostat: 3.7 kg 4-block thermostat: 5.1 kg
Power supply	200-240 V, 50/60 Hz

Delivery incl. lift rod for changing blocks.
Does not include interchangeable blocks (please order separately).

Type	Capacity	Art. No.	Pack Qty.	€
1-block thermostat	1 exchangeable thermoblock	**CTN8.1**	1	521,00
2-block thermostat	2 exchangeable thermoblocks	**CTN9.1**	1	591,00
4-block thermostat	4 exchangeable thermoblocks	**CTP0.1**	1	722,00

Exchangeable thermoblocks for touchscreen block thermostats

① Exchangeable thermoblock for reaction vials
Dimensions: W 124 x D 76 x H 39 mm.

Type	Art. No.	Pack Qty.	€
28 reaction vials 1.5 ml	**CTP1.1**	1	63,70
28 2 reaction vials 2.0 ml	**CTP2.1**	1	63,70

② Combined exchangeable thermoblocks for reaction vials
Dimensions: W 124 x D 76 x H 39 mm.

Type	Art. No.	Pack Qty.	€
30/20 reaction vials 0.5/0.2 ml	**CTP3.1**	1	123,00
18/10 reaction vials 1.5/2.0 ml	**CTP4.1**	1	90,00

③ Exchangeable thermoblocks for centrifuge vials of type Falcon®
Dimensions: W 124 x D 76 x H 113 mm.

Type	Art. No.	Pack Qty.	€
15 centrifuge tubes 15 ml	**CTP5.1**	1	299,00
4 centrifuge tubes 50 ml	**CTP6.1**	1	299,00

④ Exchangeable thermoblocks for test tubes
Dimensions: W 124 x D 76 x H 39 mm.

Type	Art. No.	Pack Qty.	€
15 tubes ∅ 16 mm	**CTP7.1**	1	85,60
12 tubes ∅ 18 mm	**CTP8.1**	1	85,60
8 tubes ∅ 20 mm	**CTP9.1**	1	69,20

External temperature sensor

Type	Art. No.	Pack Qty.	€
External Pt 1000 temperature sensor	**CTT0.1**	1	27,50

Single-block thermostat Accublock™ Mini

For precision temperature control of 12 x 1.5 ml reaction vials.

- Temperature adjustment via digital display
- Digital display of actual temperature
- Acoustic timer adjustable from 1 min to 19 h, 59 min (has no effect on heater performance; no shutdown upon expiration of the timer)
- Integrated aluminium block; ports have been adapted to fit 1.5 ml reaction vials

Technical specifications:

Operating temperature range	5 °C **above** ambient temperature up to 100 °C
Temperature adjustment range	20 to 101 °C
Resolution	0.1 °C
Temperature accuracy	±0.2 °C
Heating-up time	approximately 20 min to 100 °C
Dimensions (W x D x H)	110 x 140 x 55 mm
Weight	1.4 kg
Mains connection	230 V, 50/60 Hz

Delivery incl. AccuRack™ for fast loading and unloading of reaction vials.

Art. No.	Pack Qty.	€
PE74.1	1	374,10

Rotilabo®-block thermostat model H 250

Block thermostat for use in biological, physical and chemical laboratories.

Features

- Two removeable aluminium blocks
- Digital temperature display (set/actual value)
- **With connection for external temperature sensor (please order separately)**
- Control LED for heating, set/actual value control and time
- **Integrated short-time alarm (1 to 480 min), time setting in minute increments.**
- Switching function of timer:
  1. Timer without influencing heater function
  2. Timer switches the heater off after the time has lapsed
- Stainless steel casing with solid Al hotplate
- **For faster heating times and higher temperature precision: the block inserts can be fixed to the hotplate with a screw**

Technical specifications:

Working temperature range	+25 to +250 °C
Temperature constancy	±0.1 K
Heating times	to 100 °C approx. 15 min to 200 °C approx. 30 min
Timer signal	acoustic
Unit dimensions (W x D x H)	240 x 280 x 110 mm
Dimensions of heating blocks (W x D x H)	78 x 115 x 49 mm
Heating capacity	500 W
Voltage	230 V, 50/60 Hz

Delivery incl. block thermostat H 250, screws, 6 kt-wrench and removal rod. Comes without heating blocks (please order separately).

Cooling and heating block thermostat TK 23

By Hettich Benelux. For dry, clean and speedy **cooling and heating.** For centrifuge tubes, sample vials and microtiter plates.

Features:

- **Cooling function up to 16 °C below room temperature, heating up to +90 °C**
- Active counter-cooling with Peltier elements
- LCD-display with background lighting for all set and actual values
- **Allows direct input of temperature curves**

Programmable control:
Programmable with 30 program steps for up to 9 different programs. Program-parameters: Set temperature, process time (max. 99 h / endless), rise time (The time in which the set temperature should be reached) etc.

Technical specifications:

Working temperature range	16 °C **below** room temperature up to +90 °C
Temperature setting range	-10 to +90 °C
Accuracy / Resolution	±0.1 °C / 0.1 °C
Medium heating speed	approx. 4 °C/min from +41 °C
Medium cooling speed	approx. 5 °C/min below +20 °C approx. 2 °C/min to +20 °C
Dimensions (W x D x H)	220 x 345 x 195 mm

Delivery without changing block
(please order the changing block separately).

Type	Capacity	Art. No.	Pack Qty.	€
Cooling and heating block thermostat TK 23	2 changing blocks	**HA03.1**	1	1803,85

Changing blocks for block-thermostat TK 13

By Hettich Benelux. For additional suitable blocks, please see changing blocks for cooling and heating ThermoMixers.

Changing blocks for centrifuge tubes

Type	Art. No.	Pack Qty.	€
24 reaction vials 1.5 ml tapered	**AY23.1** *	1	244,05
24 reaction vials 2.0 ml cylindrical	**AY24.1** *	1	244,05

Changing blocks for sample tubes

Type	Art. No.	Pack Qty.	€
14 centrifuge tubes, each 15 ml, type Falcon®	**AY27.1** *	1	337,55

* Longer delivery times possible. Please check with our Sales Department.

Heating thermoshaker

By Thermo. For heating and mixing in 0.5/1.5 ml reaction vials, 50 ml test tubes or 96-well plates. With circular shaking action.

Applications: cultivating bacteria and yeast, enzyme reactions, denaturation of DNA, RNA and proteins, etc.

- VFD display
- PID controller for constant shaking action and precise temperature control
- Programmable with 10 program steps for max 7 different programs (program parameters: nominal temperature, process time per program step and shaking frequency)
- 2 timer modes (1 min to 99 h, 59 min):
  - Process time does not begin to elapse until nominal temperature is reached
  - Timer starts immediately after setting the required process time

Technical specifications:

Operating temperature range	5 °C **above** ambient temperature up to +100 °C
Temperature adjustment range	0 to +100 °C
Resolution / accuracy	±0.5 °C / 0.1 °C
Average heating rate:	approx. 5 °C/min from +41 °C
Max. recommended shaking frequency	Block for 96 well plates: 150 to 1500 rpm Block for 0.5 ml vials: 150 to 1200 rpm Block for 1.5 ml vials: 150 to 1200 rpm Block for 50 ml tubes: 150 to 800 rpm
Timer	1 min to 99 h, 59 min / continuous operation
Shaking stroke	2 mm
Dimensions (W x D x H)	249 x 325 x 120 mm
Weight	8.3 kg
Voltage	230 V, 50/60 Hz

Delivery without interchangeable block (please order separately).

Shaking movement	Capacity	Art. No.	Pack Qty.	€
round	1 insertion block	**ATX7.1** *	1	1176,00

Cooling and heating thermoshaker Basic and Pro

Applications: enzyme reactions, transformations, denaturation of DNA and RNA, isolation of DNA fragments from agarose gels, proteins, protein purification and cultivation of bacteria or yeasts.

Features:
- Two-line plain text display with backlit LCD display
- Simultaneous display of actual and nominal values
- Timer operation: 1 min to 99 h, 59 min; adjustable in 1 min increments or continuous operation
- Shortmix function

Heating thermoshaker Basic
- For rapid heating and mixing
- Memory function saves 5 combinations of rpm and time parameters

Cooling and heating thermoshaker Pro
- For cooling, heating and mixing
- 5 individually adjustable program segments with an option for combining segments to create a ramp or to activate each segment individually

Technical specifications:

Operating temperature range	Basic: Pro:	5 °C **above** room temperature up to +100 °C 20 °C **below** room temperature up to +100 °C
Temperature adjustment range	4 to +100 °C	
Resolution / accuracy	<±0.5 / 0.1 °C	
Average heating rate:	from 20 to 100 °C in approx. 13 min	
Medium cooling rate *	Basic: Pro:	- from 100 to 20 °C in approx. 14 min from 20 to 4 °C in approx. 13 min
Timer	1 min to 99 h, 59 min / continuous operation	
Shaking frequency	200 to 1500 rpm adjustable in increments of 10	
Shaking stroke	2 mm	
Dimensions (W x D x H)	220 x 280 x 170 mm	
Weight	9 kg	
Voltage	230 V, 50 Hz	

*at 22 °C room temperature

Delivery without exchangeable thermoblocks (please order separately; refer to Exchangeable thermoblocks for cooling and heating thermoshaker Basic and Pro).

Cooling and heating Thermoshaker thermal mixer

By Thermo.
Applications: genetic analysis, DNA and RNA extraction, sample preparation and many more.

Features

- Heating/cooling and shaking can be performed independently
- LCD display shows setpoint and actual values for runtime, shaking frequency and temperature
- Digital timer function with alarm signal
- Short heating and cooling times, and shaking frequency reached fast

Technical specifications:

Operating temperature range		15 °C **below** room temperature up to +100 °C
Temperature adjustment range		4 to +100 °C
Accuracy	at 4 °C at 37 °C at 100 °C	±0.6 K ±0.1 K ±0.3 K
Resolution		0.1 °C
Average heating rate:		5 °C/min
Medium cooling rate		from 100 to 25 °C in approx. 15 min (5 °C/min) from 25 to 4 °C in approx. 8 min (1.8 °C/min)
Timer		1 min to 96 h (in 1-min increments)
Shaking frequency		250 to 1400 rpm adjustable in increments of 10
Shaking stroke		2 mm
Dimensions (W x H x D)		205 x 130 x 230 mm
Weight		4 kg
Voltage		120-240 V, 50/60 Hz

Delivery without interchangeable blocks (please order separately, see exchangeable thermoblocks for cooling and heating Thermoshaker thermal mixer).

Heating thermoshaker, models MHR 13 / MHR 23 / MHL 23

By Hettich Benelux. For dry, clean and speedy **heating and mixing**. For centrifuge tubes, vials and microtiter plates.

Round shaking movement (Model MHR 13 / 23): Particularly ideal for dissolving critical DNA-pellets in the tips of conical centrifuge tubes.

Linear shaking movement (Model MHL 23): Jerky movement for better mixing of low sample volumes in the µl-range.

Features for all models:

- With timer, short-mix-function (e.g. for vortexing) and interval shaking with snipping effect
- Background-light LCD-display for all set and actual values
- **With direct input of temperature curves with different shaking frequencies**
- Control unit can be removed for connection to an extension lead

Programmable control:
Programmable with 30 program steps for max 9 different programs. Program-parameters: Set temperature, process time (max. 99 h / infinite), rise time (time in which the set temperature should be reached), shaking frequency, interval shaking, breaks etc.

Double heating thermoshaker MHR 23 / MHL 23
Suitable for 2 insertion blocks. Same position when stopped.

Technical specifications:

Working temperature range	3 °C **above** room temperature to +130 °C
Temperature setting range	0 to +140 °C
Accuracy / resolution	±0.1 °C / 0.1 °C
Medium heating speed	approx. 4 °C/min from +41 °C approx. 5 °C/min to +40 °C
Shaking frequency	MHR 13 / MHR 23: 200 to 1500 rpm MHL 23: 200 to 1300 rpm
Shaking stroke	3 mm
Dimensions (W x D x H)	220 x 345 x 160 mm
Voltage	110/220 V, 50 Hz

Delivery incl. control panel. Comes without changing blocks (please order separately, see changing blocks for cooling and heating thermoshakers).

Type	Shaking movement	Capacity	Art. No.	Pack Qty.	€

Cooling and heating thermoshaker MKR 13 and MKR 23

By Hettich Benelux. For dry, clean and speedy **cooling, heating and mixing**. Suitable for centrifuge tubes, vials and microtiter plates.

Round shaking movement: Especially suited for dissolving critical DNA-pellets in the conical tips of conical centrifuge tubes.

Features:

- **Cooling function up to 16/10 °C below room temperature, heating up to +100/75 °C**
- Active counter-cooling with Peltier elements
- The coolers with speed-regulated ventilators conduct the heat and the cold outside
- With timer, short-mix-function (e.g. for vortexing) and interval shaking with snipping effect
- LCD-display with background lighting for all set and actual values
- **Direct input of temperature curves with different shaking frequencies.**

Programmable control:
Programmable with 30 program steps for up to 9 different programs. Program-parameters: Set temperature, process time (max. 99 h / endless), rise time (the time in which the set temperature should be reached), shaking frequency, interval shaking, interval etc.

Technical specifications:

Working temperature range	MKR 13: 16 °C **below** room temperature to +100 °C MKR 23: 13 °C **below** room temperature to +75 °C
Temperature setting range	MKR 13: -10 to +105 °C MKR 23: 0 to +75 °C
Accuracy / Resolution	MKR 13: ±0.1 °C / 0.1 °C MKR 23: ±0.3 °C / 0.1 °C
Medium heating speed	approx 5 °C/min from +41 °C approx 6 °C/min to +40 °C
Medium cooling speed	approx 3 °C/min below +20 °C approx 7 °C/min to +20 °C
Shaking frequency	MKR 13: 200 to 1500 rpm MKR 23: 200 to 1200 rpm
Shaking lift	3 mm
Dimensions (W x D x H)	220 x 345 x 195 mm
Voltage	110/220 V, 50 Hz

Delivery incl. control panel. Comes without insertion block (please order separately, see insertion blocks for cooling and heating thermoshakers).

Type	Shaking movement	Capacity	Art. No.	Pack Qty.	€
MKR 13	round	1 Changing block	**HA02.1** *	1	2257,50
MKR 23	round	2 Changing blocks	**KA68.1** *	1	2711,15

Interchangeable blocks for cooling and heating thermoshaker

By Hettich Benelux.
Suitable for models
MHR 13, MHR 23, MHL 23, MKR 13, MKR 23 and TK 23.
Made of aluminium.

Interchangeable blocks for centrifuge tubes

Type	Art. No.	Pack Qty.	€
96 reaction vials 0.2 ml tapered	**AY21.1** *	1	244,05
8 reaction vials 0.5 ml tapered	**AY22.1** *	1	244,05
24 reaction vials 1.5 ml tapered	**AY23.1** *	1	244,05
24 reaction vials 2.0 ml cylindrical	**AY24.1** *	1	244,05
24 reaction vials 0.5 and 1.5 ml (combined block)	**ANN7.1** *	1	338,65

Interchangeable blocks for sample vials

Type	Art. No.	Pack Qty.	€
24 sample vials ∅ 10.3 x D 46 mm, round bottom	**AY25.1** *	1	337,55
24 sample vials ∅ 16.5 x D 46 mm, round bottom	**AY26.1** *	1	337,55
24 sample vials ∅ 12.0 x D 20 mm, flat bottom	**TA95.1** *	1	244,05
24 sample vials ∅ 15.0 x D 30 mm, flat bottom	**TA96.1** *	1	244,05
24 sample vials ∅ 17.0 x D 30 mm, flat bottom	**TA97.1** *	1	244,05
24 sample vials ∅ 19.0 x D 25 mm, flat bottom	**TA98.1** *	1	244,05
12 sample vials ∅ 23.0 x D 56 mm, flat bottom	**TA99.1** *	1	244,05
8 sample vials ∅ 28.0 x D 40 mm, flat bottom	**TC00.1** *	1	337,55

Interchangeable blocks with lid (for block insulation) for centrifuge tubes

Type	Art. No.	Pack Qty.	€
14 centrifuge tubes, each 15 ml, type Falcon®	**AY27.1** *	1	337,55
6 centrifuge tubes, each 50 ml, type Falcon®	**AY28.1** *	1	337,55

Interchangeable blocks for cuvettes

Type	Art. No.	Pack Qty.	€
36 rectangular cells, 12.5 mm outer width	**TC01.1** *	1	337,55

Interchangeable blocks for deepwell plate

Type	Art. No.	Pack Qty.	€
96-well deepwell plate	**TC02.1** *	1	337,55

Interchangeable blocks for custom design

Type	Art. No.	Pack Qty.	€
Without hole, H 25 mm	**TC03.1** *	1	224,70
Without hole, H 37 mm	**TC04.1** *	1	244,05
Without hole, H 50 mm	**TC05.1** *	1	244,05

Interchangeable blocks for microtiter plates

Type	Art. No.	Pack Qty.	€
Microtiter plate 96, U-/V-profile	**AY29.1** *	1	337,55
Microtiter plate 96, flat profile	**AY30.1** *	1	337,55

Interchangeable blocks for PCR®-plates

Type	Art. No.	Pack Qty.	€
PCR-plate 96, V-profile	**AY31.1** *	1	337,55
PCR-plate 384	**AY32.1** *	1	337,55

Interchangeable blocks for DURAN®-bottles

Type	Art. No.	Pack Qty.	€
2 DURAN® bottles 50 ml, ∅ 47 mm, D 60 mm	**ANN8.1** *	1	395,60
1 DURAN® bottle 250 ml, ∅ 71.5 mm, D 74 mm	**ANN9.1** *	1	450,45

Interchangeable blocks for cryo-vials

Type	Art. No.	Pack Qty.	€
24 cryo-vials, ∅ 13 mm, D 30 mm, flat bottom	**ANP0.1** *	1	338,65
24 cryo-vials, ∅ 13 mm, D 40 mm, round bottom	**ANP1.1** *	1	338,65

* Longer delivery times possible. Please check with our Sales Department.

Rotary evaporators

NEW

Rotary evaporators RV 3-series

By IKA. Usable in the chemical, pharmaceutical and bio-industry, in the fields of research and development, production and quality assurance, in laboratories and in plant engineering.

- 4-l water heating bath with digital temperature display and handles
- Mechanical end stop for lift
- Manual lift
- Adjustable insertion angle
- Continuous speed adjustment via rotary knob and display scale
- Piston fixture with integral push-off mechanism for easy changing of evaporating flasks

Technical specifications:

Speed range	20 to 300 rpm
Temp. range of heating bath	up to 99 °C
Heating output	1350 W
Setting accuracy	1 K
Control deviation	1 K
Heating bath capacity	4 l
Dimensions of heating bath (W x D x H)	330 x 325 x 190 mm
Hose connectors	For hoses ID 8 mm (water and vacuum hoses)
Dimensions with glassware (W x D x H)	440 x 330 x 530 mm
Weight	8 kg
Voltage	100-240 V, 50/60 Hz

Delivery incl. heating bath and vertical glassware. With PTFE inlet tube and 1000 ml evaporating flask (NS 29/32) and 1000 ml receiving flask (KS 35/20).

Type	Design	Art. No.	Pack Qty.	€
RV 3 V	Standard glassware	**KAX8.1** *	1	2098,00
RV 3 V-C	Coated glassware	**HTX5.1** *	1	2237,00

* Longer delivery times possible. Please check with our Sales Department

RV 8-series rotary evaporators

By IKA.

General information:

- Manual lift with integrated safety lift-out-function (single-handed operation, suitable for left and right handed users)
- Digital displays for rotation speed and heating bath temperature
- Adjustable immersion angle and height
- Piston fixture with integral push-off mechanism for easier changing of evaporating flasks
- Available in two versions: with standard glassware or coated glassware (condenser and receiving flask are coated for shatter protection).

Heating bath HB digital

- Universal water / oil heating bath with integral carrying handles
- Locking function prevents accidental changing of heating bath settings
- Run-dry monitoring
- Adjustable safety temperature

Technical specifications:

Speed range	5 to 300 rpm
Temp. range of heating bath	From room temperature to 180 °C
Heating output	1300 W
Setting accuracy	1 °C
Control deviation	±1 K
Heating bath capacity	4 l
Dimensions of heating bath (W x D x H)	330 x 325 x 190 mm
Adjustable head angle	0 to 45 °
Hose connectors	For hoses ID 8 mm (water and vacuum hoses)
Dimensions without glassware (W x D x H)	510 x 345 x 490 mm
Dimensions with glassware (W x D x H)	630 x 345 x 760 mm
Weight	17.2 kg

Delivery incl. heating bath and vertical glassware. With PTFE inlet tube and 1000 ml evaporating flask (NS 29/32) and 1000 ml receiving flask (KS 35/20).

Model	Design	Art. No.	Pack Qty.	€
RV 8 V	Standard vertical glassware	**NH24.1** *	1	2638,00
RV 8 V-C	Coated vertical glassware	**NH25.1** *	1	2786,00

* Longer delivery times possible. Please check with our Sales Department.

①

Rotary evaporator RV 10-series

By IKA.

General features of all models:

- **Motorised lift (stroke displacement 140 mm) with adjustable height limit**
- Digital speed display
- Rotates intermittently clockwise and anticlockwise for drying processes (interval cycle for direction reversal is adjustable from 1 to 60 s)
- Timer function for time lapse controls (1 to 199 min)
- Water-oil heating bath with integrated carry handles
- Heating bath with adjustable safety circuit
- Push-off mechanism to loosen tightly fitting flasks
- Includes Woulff bottle

RV 10 digital

- Temperature adjustment/display via scale
- Control deviation ±5 K
- Heating bath with digital temperature display
- Control deviation ±1 K

① **RV 10 auto**

Model with integrated vacuum controller for automatic distillation, both for volume-based processes and full drying depending on application.

- Integrated solvent library contains distillation-specific parameters for standard distillation, expandable by user.
- Programmable volume-controlled distillation processes
- Colour graphic display shows distillation curves
- Ramp programming (speed/time and vacuum/time)
- Automatic ventilation and switch-off of heating bath after test

Technical specifications:

Model	RV 10 digital	RV 10 auto
Speed range	20 to 280 rpm	
Temp. range of heating bath	From room temperature to 180 °C	
Heating output	1300 W	
Setting accuracy	1 K	
Control deviation	±1 K	
Heating bath capacity	4 l	
Dimensions of heating bath (W x H x D)	330 x 325 x 190 mm	
Adjustable head angle	0 to 45 °	
Integral vacuum controller	no	yes
Required accessories	-	Solenoid valve RV 10.4002
Hose connectors	For hoses ID 8 mm (water and vacuum hoses)	
Dimensions without glassware (W x D x H)	530 x 410 x 570 mm	
Dimensions with glassware (W x D x H)	680 x 410 x 990 mm	
Weight	28 kg	

Delivery incl. heating bath and vertical glassware. A PTFE inlet tube, 1000 ml evaporator flask (NS 29/32) and 1000 ml receiving flask (KS 35/20) are included.
Available in two versions: with standard glassware or coated glassware (condenser and receiving flask are coated for shatter protection).

RV 10 digital

Model	Design	Art. No.	Pack Qty.	€
RV 10 digital V	Standard glassware	**PE52.1** *	1	3979,00
RV 10 digital V-C	Coated glassware	**PE53.1** *	1	4312,00

RV 10 auto

Additional **delivery incl.** magnetic valve laboratoryvacuum RV 10.4002. (The integrated check valve prevents external interference with the working pressure of the recipient. Tube clip for tubes ID 10 mm.)

Model	Design	Art. No.	Pack Qty.	€
RV 10 auto V	Standard glassware	**PE54.1** *	1	6600,00
RV 10 auto V-C	Coated glassware	**PE55.1** *	1	7002,00

* Longer delivery times possible. Please check our Sales Department.

▶ Vacuum pump systems, see p. 381

Rotary evaporators

Rotary evaporators Hei-VAP-series

By Heidolph. For standard distillation, crystallization, upgrading solutions and separating solvents.

General features for all models:

- Control panel: Removeable, with cable connection (length 1.3 m) for remote control operation
- Fast and easy reduction of steam feedthrough
- Heating bath switches off automatically when set bath temperature has been exceeded by 5 °C or when water level is too low
- Double-wall heating bath protects against burns and insulates against heat loss
- Safe changing of bath liquid via nozzle
- All models are available either as a space-saving version with vertical cooler (Model G3) or in the standard version with diagonal cooler (G1)
- XL-cooler for higher evaporation rate through improved seal and extended cooling surface

① **Hei-VAP Value digital**

- Digital display showing nominal and actual heating bath temperatures
- Model with manual lift
- Rotary speed and temperature of hotbath can be set via knobs

Hei-VAP Advantage HL

- Model with manual lift
- Digital 3.5" LCD display with speed indicator, heating bath temperature and steam temperature (Please note: A boiling temperature sensor is required to indicate the steam temperature. Please order separately.)
- With timer function to end operation automatically

② **Hei-VAP Advantage ML**

- Like Hei-VAP Advantage HL, but with motor-driven lift
- The sample with motor-driven lift evaporators is protected against thermal damage, because the flask is automatically lifted out of bath in the event of a power cut.

Technical specifications:

Model	Hei-VAP Value HL	Hei-VAP Advantage HL	Hei-VAP Advantage ML
Manual / Motor-driven lift	Manual lift		Motor-driven lift
Lifting speed	manually		approx. 30 mm/s
Speed range	20 to 280 rpm		
Speed indicator	Digital	3.5“ LCD display	
Temperature range of heating bath	20 to 210 °C		
Heating power	1300 W		
Control accuracy of heating bath	±1 K		
Volume of heating bath	4.5 l		
∅ Heating bath	255 mm		
Timer	no	yes	yes
Remote control functions - Start Rotation - Start Heating bath - Lift	 yes yes no	 yes yes no	 yes yes yes
Dimensions W x D x H (mm)	395 x 490 x 430		395 x 420 x 430
Evaporation rate 20/40 °C - Acetone - Ethanol - Water	2.4 / 4.7 l/h 1.6 / 3.2 l/h 0.5 / 1.0 l/h		
Voltage	230 V, 50/60 Hz		

Delivery incl. devices with heating bath and glass kit. Glass kit consists of glass sleeve shaft, cooler, discharge tube, evaporator flask 1000 ml (standard ground joint 29/32) and collecting flask 1000 ml (standard ground joint 35/20).

N°ICE electronic ice bath

By Techne. Space-saving sample chiller with general-purpose heat treatment bath for various vial types and sizes. Ceramic beads are used instead of ice as a chilling medium. This allows unlimited cooling times and avoids the problem of floating samples in thawing ice as well as contamination by coolants. As a time saving option, the bucket of beads can be pre-incubated in the fridge and simply inserted into the unit as and when required.

- Peltier cooling technology
- Max. capacity approx. 60 1.5 ml vials
- Ceramic beads are autoclavable and suitable for multiple use

Technical specifications:

Temperature range / resolution	0.0 to 40.0 °C
Temperature accuracy	±1 °C
Average cooling time from 20 to 4 °C	approx. 60 min
Average cooling time from 20 to 0 °C	approx. 3-4 h
Dimensions (L x W x H)	190 x 240 x 225 mm
Dimensions of heat treatment bath (L x W x H)	155 x 108 x 70 mm
Weight	4.5 kg
Power supply	100-230 V, 50/60 Hz

Delivery incl. aluminium heat treatment bath and 1.7 kg of ceramic beads (∅ 1.5-2.5 mm).

Art. No.	Pack Qty.	€
AKN5.1	1	1290,00

Accessories:

Replacement heat treatment bath	**AKN6.1**	1	118,00
Replacement ceramic beads, ∅ 1.5-2.5 mm, 1.7 kg	**AKN7.1**	1	107,00

▶ Drying cabinets from p. 1006

Inca mini microtiter plate incubator

For a single standard microtiter plate.

- Minimum space requirement
- Temperature or runtime display (3-digit LCD display)
- Timer with audio signal (does not affect heater function; no deactivation on expiration of timer).
- ABS plastic housing

Technical specifications:

Temperature range	+5 °C **above** ambient temperature up to 45 °C
Resolution of temperature display	0.5 °C
Temperature adjustment range	10 to 45 °C
Temperature variation	±0.5 °C
Timer	1 to 999 min in 1-min increments
Dimensions (W x D x H)	120 x 180 x 100 mm
Permissible ambient temperatures	10 to 40 °C at 80 % rel. humidity
Heating output	15 W
Weight	920 g
Power supply	100-230 V, 50/60 Hz

Art. No.	Pack Qty.	€
YX78.1	1	493,45

Rotilabo®-microtest plates

Made of transparent **PS**. With 96 alphanumerically coded cavities. Different base profiles available. Produced under sterile working conditions. Stackable.
Dimensions: L 128 x W 85 x H 15 mm.

Delivery without cover plate, please order separately.

Type	Volume per well (µl)	Art. No.	Pack Qty.	€
① U-profile (round)	345	**9291.1**	100	47,20
② V-profile (conical)	335	**9292.1**	100	53,70
③ F-profile (flat)	405	**9293.1**	100	58,05

Cover plates for Rotilabo®-microtest plates

Made of **PS**. Prevents contaminations and liquid loss.

9297.1	100	42,95

DipSlide incubator EM4

Lightweight, small incubator specially designed for DipSlides. With transparent, easily removable cover for quick insertion and removal of DipSlides. Easy to operate, even for inexperienced users. A stand insert and a thermometer are also supplied. Also usable without a stand for incubation of Petri dishes and contact plates.

Technical specifications:

Capacity	23 DipSlides
Temperature range	Room temperature to 44 °C
Capacity	4 l
Inner dimensions (W x H x D)	180 x 125 x 180 mm
Outer dimensions (W x H x D)	230 x 180 x 230 mm
Weight	1,5 kg
Power supply	220 V, 25 W

Art. No.	Pack Qty.	€
KK43.1	1	461,20

Cultura® M mini incubator

For the incubation of 18 dip slides (e.g. Roti®-DipSlides) or 12 petri dishes for verification of bacteria, fungi and yeasts, as well as other small-sized vials.

- **Operating temperature range from +5 °C above room temperature to 45 °C; temperature adjustment range from 25 to 45 °C**
- Thermometer in tube with special petroleum filling. Measuring range 7 to 60 °C. Graduations 1 °C. Accuracy ±1 °C. Dimensions: H 95 x ∅ 25 mm.
- Transparent full-vision door for visual inspection
- Minimal footprint, i.e. space-saving

Technical specifications:

Volume	4 l
Temperature variance	±1 °C
Internal dimensions (W x D x H)	220 x 150 x 120 mm
External dimensions (W x D x H)	310 x 168 x 155 mm
Weight	1.1 kg
Power supply	230 V, 50 Hz

Delivery incl. test thermometer in tube and shelf.

Art. No.	Pack Qty.	€
AHH9.1	1	235,45

Accessories for Cultura® M mini incubator

Multirack

Suitable for mini incubator Cultura® M. Made of ABS.
For 18 vials (∅ 25 to 30 mm). Dimensions: W 213 x D 142 x H 50 mm.

Art. No.	Pack Qty.	€
AHK0.1	1	75,20

Mini incubator

Space-saving unit for incubating culture bottles, petri dishes, microtitration plates and other small-volume vessels.

- **Operating temperature range from + 5 °C above ambient temperature to 60 °C; temperature adjustment range from 20 to 60 °C**
- Cable conduit (∅ 55 mm) at the rear
- Loading options, e.g. 48 petri dishes or 28 microtitration plates in 96 well format
- Thermometer holder (∅ 7 mm) on the top allows the inner temperature to be monitored

Technical specifications:

Capacity	9.2 l
Temperature deviation at 37 °C	±0.7 °C
Inner dimensions (W x Dx H)	230 x 200 x 200 mm
Outer dimensions (W x D x H)	285 x 280 x 335 mm
Shelves: standard / max. number	1 / 3
Shelf dimensions (L x W)	220 x 180 mm
Weight	8.3 kg
Power supply	230 V, 50/60 Hz

Delivery incl. 1 shelf. Please order thermometer separately.

Art. No.	Pack Qty.	€
YC53.1	1	525,70

Accessories:

Additional shelf, L 220 x W 180 mm	**YC54.1**	1	48,35
Glass thermometer, -20 to +100 °C, 1 °C graduations	**E742.1**	1	11,80

Small incubator Heratherm IMC18

By Thermo.

- Minimal footprint for space-restricted lab areas
- Microprocessor control
- Round edges make it easy to clean
- With Peltier cooling
- Interior lighting facilitates sample monitoring
- Fan for air circulation; runs permanently and is not adjustable

Technical specifications:

Capacity	18 l
Temperature range	17 to 40 °C
Resolution of temperature display	1 °C
Temperature deviation at 37 °C	temporal: ±0.2 °C, spatial: ±1.2 °C
Inner dimensions (W x H x D)	180 x 310 x 290 mm
Outer dimensions (W x H x D)	260 x 415 x 470 mm
Shelves: Standard / max. quantity	2 / 3
Max. load-carrying capacity of removable insert	2 kg
Weight	7.2 kg
Power supply	100-240 V, 50/60 Hz

Delivery incl. 2 shelves.

With glass front – standard model

General Protocol and **Advanced Protocol models**

General features:
- **Outside temperature range:**
  General Protocol model: from +5 °C above room temperature to 75 °C
  Advanced Protocol model: from +5 °C above room temperature to 105 °C
- Interior made of stainless steel
  General Protocol model: stainless steel 1.4016
  Advanced Protocol model: stainless steel 1.4301
- Housing interior with round edges make it easy to clean
- With additional interior glass door
- RS 232 port
- Natural convection minimizes dessication of samples; air circulation achieves more accurate temperatures
- Outlet connection 230 V, 50 Hz
- **Delivery incl.** 2 removable inserts

Technical specifications:

[1] Depth of handle and display (65 mm) not included in the measurement; adjustable feet (35 mm)
not included in height - clearance required to back wall: 80 mm

[2] Values refer to: fan switched off/fan at full speed

General Protocol incubators
- Integrated timer (1 min up to 99 h, 59 min)
- Microprocessor control
- Actual temperature display
- Setting accuracy ±0.1 K
- Automatic over temperature alarm

Models with natural convection

Type	Volume (l)	Temperature range up to °C	Art. No.	Pack Qty.	€
IGS60	75	75	**PL96.1** *	1	1269,00
IGS100	117	75	**PL97.1** *	1	1790,00
IGS180	194	75	**PL98.1** *	1	2491,00

* Longer delivery times possible. Please check with our Sales Department.

Incubators Advanced Protocol
- Digital timer for daily/weekly on/off cycles
- Setting accuracy ±0.1 K
- Cable conduit (∅ 50 mm) at the rear
- Automatic over temperature alarm
- With varnished housing
- With air-circulation fan: dual convection with settable fan speed from 0 (corresponds to natural convection) to 100 %

Models with air-circulation fan

IN and INplus incubators

By Memmert.

General features:

- **Operating temperature range from 5 °C above room temperature to 80 °C**
  Set temperatures from 20 to 80 °C
  Adjustment accuracy 0.1 K
- Interior made of stainless steel (1.4301)
- Fully insulated stainless steel door (two-wing from size 450 upwards)
- **With additional inner glass door**
- Fresh air supply by electronically adjustable exhaust flap
- Structured stainless steel housing
- Incl. factory calibration certificate valid for +37 °C

Other features:

- **Natural air circulation (convection)**
- German, English, French and Spain language options
- Digital timer (adjustable from 1 min to 99 d, 23 h) or continuous duty
- "SetpointWAIT" function - process time does not start until the nominal temperature is achieved

Technical specifications:

INplus models

- Two graphical TFT displays with touchscreen for operation and display of temperature, program runtime, air damper position and graphical display of program flow
- Integrated data logger with 10-year memory
- **Display of recorded log data (max. 10000 values correspond to approx. 1 week) directly on the instrument**
- Application-specific correction of heat output distribution between the upper and lower heating groups within an adjustment range from -50 to +50 %
- With Ethernet communication port for log data readout as well as for transmitting and launching programs and online logging
- With sterilization program: 4-hour program at 160 °C for sterilization of the interior incl. all fittings and all sensors
- **USB port for installing programs and reading out the data logger incl. software (to create ramp programs and 7-day programs)**
- Definition of individual Min/Max values for high/low temperature protection

Programme extension!

Microbiological incubators, models BD and BF

By Binder.

General features:

- **Operating temperature range from 7 °C and room temperature to 100 °C**
  Setting temperatures from 30 to 100 °C
  Setting accuracy: ±0.1 °C
- Models with volumes of 400 l or higher come with a double-panel door
- With integrated timer with range from 0 to 99 h
- With additional inner door of safety glass
- 100 °C disinfection routine for reduced cross-contamination
- Adjustable air renewal and rear exhaust ∅ 50 mm
- Class 3.1 temperature safety device (DIN 12880) with visual alarm
- Mains connection 230 V, 50/60 Hz

Models BD/BF 56, BD/BF 115 and BD/BF 260 also have:
USB port for recording data (time, actual temperature value, set temperature value, etc.)

Technical specifications:

Models		BD 23	BD 56/ BF 56	BD 115/ BF 115	BD 260/ BF 260	BD 400/ BF 400	BD 720/ BF 720

Heratherm high-capacity incubators

By Thermo.

General features:

- Free-standing units with fixed rollers
- With internal glass door
- Stainless steel interior
- RS 232 port
- Mains connection 230 V, 50 Hz

Technical specifications:

Type	IGS400	IGS750	IMH400-S	IMH750-S
Capacity (l)	405	747	381	702
Inner dimensions (mm)				
Width	544	1004	544	1004
Height	1307	1307	1335	1335
Depth	569	569	524	524
Outer dimensions[1] (mm)				
Width	778	1261	778	1261
Height	1545	1545	1545	1545
Depth	770	770	770	770
Removable shelves				
Delivery incl.	2			
Max. capacity	39			
Other				
Rated power (W)	1200	1500	1400	1600
Weight (kg)	145	201	144	205
Temperature deviation at 37 °C				
temporal (°C)	±0.4		±0.2	
spatial (°C)	±0.5	±1.3	±0.2	±0.3

[1] not including depth of handle and display (65 mm) and height of rollers (108 mm); required clearance to rear panel 120 mm.

Delivery incl. 2 stainless steel perforated shelves.

General Protocol:

- **Operating temperature range from +5 °C above room temperature to 75 °C**
- With natural convection
- Integrated timer (1 min to 99 h, 59 min)
- Actual temperature display; setting accuracy ±0.1 K

Type	Volume (l)	Temperature range up to °C	Art. No.	Pack Qty.	€
IGS400	405	75	**XH26.1** *	1	4283,00
IGS750	747	75	**XH27.1** *	1	5861,00

Advanced Protocol:

- **Operating temperature range from +5 °C above room temperature to 105 °C**
- Setting accuracy ±0.1 K
- Mechanical convection - 2-stage fan: can run fast or slow, but cannot be switched off
- Cable feedthrough (∅ 19 mm), e.g. for fitting sensors
- An audible alarm sounds if the door is accidentally left open
- Switch on/off after a pre-set time
- Weekly setting or real-time control
- Programmable control for temperature ramps and dwell times (memory for 10 programs each with 10 individual steps)

Type	Volume (l)	Temperature range up to °C	Art. No.	Pack Qty.	€
IMH400-S	381	105	**XH28.1** *	1	5355,00
IMH750-S	702	105	**XH29.1** *	1	6764,00

Accessories for Heratherm high-capacity incubators

By Thermo.

Perforated shelf kit: 1 shelf with 2 supports.

for type	Art. No.	Pack Qty.	€
IGS400, IMH400-S	**XH30.1** *	1	215,00
IGS750, IMH750-S	**XH31.1** *	1	287,00

* Longer delivery times possible. Please check with our Sales Department.

Incubator inserts

Made of PP, stackable. For easy organisation of petri dishes and convenient transfer to other incubation or storage systems.
With 16 ventilation holes and 2 labelling spaces.
Outer dimensions: L 251 x W 237 x H 35 mm.
Loading options: e.g. 5 Petri dishes ∅ 100 mm or 15 Petri dishes ∅ 60 mm or 21 culture bottles 25 cm².

Art. No.	Pack Qty.	€
YC19.1	3	60,75

Peltier cooling incubators IPP-series

By Memmert.

General features:

- **Operating temperature range from 0 to 70 °C**
  Set temperatures from 0 to 70 °C
  Adjustment accuracy 0.1 K
- Interior made of stainless steel (1.4301)
- Fully insulated stainless steel door (two-wing from size 450 upwards)
- **With additional inner glass door**
- Structured stainless steel housing
- Incl. factory calibration certificate valid for +10 °C and +37 °C

Other features:

- Language settings: German, English, French and Spanish
- Digital timer (adjustable from 1 min to 99 d, 23 h) or continuous duty
- "SetpointWAIT" function - process time does not start until the nominal temperature is achieved

Technical specifications:

Model sizes	**30**	**55**	**110**	**260**

Cooling incubators

Peltier cooling incubators KT-series

By Binder.

General features:

- **Operating temperature range: from 4 to 100 °C**
  Setting accuracy: ±0.1 °C
- 5.7 inch LCD monitor and turn/push button for input
- Variable time and weekday programming
  - Storage capacity for up to 60 programs (in KT 53 version) or 100 programs (in KT 115 version)
  - Measurement data can be saved to internal memory
  - Readout of programs and data via USB port
  - Adjustable fan speed (min. speed 30 %)
- With additional inner door of safety glass
- Ethernet interface
- Class 3.1 temperature safety device (DIN 12880) with visual and audible alarms

Technical specifications:

Models	KT 53	KT 115
Volume (l)	53	102

Cooling incubators KB-series

By Binder.

General features:

- **Operating temperature range:**
  KB 23: from 0 to 100 °C
  KB 53 and KB 115: from -5 to 100 °C
  Setting accuracy: ±0.1 °C
- **Cooling compression refrigerator**
- Controller with 2 programs each with 10 individual steps
  - Integrated 7 day programmable timer with real time function
  - Adjustable ramp function via program editor
  - Adjustable fan speed (min. speed 30 %)
- With additional inner door of safety glass
- Class 3.1 temperature safety device (DIN 12880) with visual and audible alarms
- Mains connection 230 V, 50 Hz

Technical specifications:

Cooling incubators

Cooling incubators Heratherm® IMP series

By Thermo.
Applications: Development processes for new products, quality assurance in the food, beverage and cosmetics industry, water analysis, as well as cell culture and microbiological analyses.

General features:
- **Operating temperature range: from 5 to 70 °C**
  Setting accuracy: ±0.1 °C
- Pelleting technology
- Heated door minimizes condensation
- Timer with weekly/daily or real-time mode
- Programming option for defined temperature ramps, with cooling and dwell time: storage of up to 10 programs with 10 temperature stages, loop program and selection mode at end of cycle
- Adjustable over-temperature shut-down
- Fan speeds adapt for power optimization
- Inside glass door for sample monitoring
- **Cable conduit for data monitoring (42 mm) on rear side**
- RS 232 interface
- Stainless steel interior (1.4301/ASTM 304)

CO_2 incubator Midi 40

By Thermo. For use in cell culture to breed small cultures, or where space is limited in the laboratory.

- **Working temperature from +5 °C above room temperature to 60 °C (in steps of 0.1 °C) and CO_2 concentrations up to 20 % (in steps of 0.1 %)**
- Digital display for easy input of °C, CO_2 content and alarm limits
- Setpoints can be secured using a key-operated switch to prevent unwanted alteration of the operating parameters
- Seam-free interior made of stainless steel (non-corrosive stainless steel, type 304) with 4 extractable shelves
- Removable water container for a relative humidity of up to 95 %
- Inside door made of safety glass is heated by the outside door to avoid condensation
- To supply the incubator with CO_2, a separate gas cylinder or a central compressed-gas tank is required
- Conditioned water (demineralised/distilled and autoclaved and/fully desalinated/distilled and autoclaved) is required for humidification

Technical specifications:

Capacity	40 l
Temperature deviation at 37 °C	±0.4 K
CO_2 consistency	±0.10 %
Internal dimensions (W x D x H)	305 x 355 x 355 mm
Outer dimensions (W x D x H)	470 x 597 x 465 mm
Dimensions perforated trays (W x D)	343 x 292 mm
Required input pressure	1.0 bar, 99.5 Vol.-% medical classification CO_2
Intake-air filtration	CO_2 filter, PTFE filter 0.3 µm
Weight	32 kg
Power supply	230 V, 50/60 Hz

Delivery incl. 4 perforated stainless steel trays, water container (∅ 12.7 mm), CO_2 filter and hose set (ID 1.59 mm, AD 6.35 mm, approx. L 0.5 m).

Art. No.	Pack Qty.	€
ETT3.1 *	1	4143,00

* Longer delivery times possible. Please check with our Sales Department.

CO_2 incubator BB 15

By Thermo. With air jacket heating for constant temperature as well as a second control circuit that assumes control of the set temperature in the case of a fault. The chamber floor is used as water reservoir (an electric suction pump is included in the scope of delivery for changing the water). The large water surface and direct heat transfer from the heated base achieve a faster humidity recovery time.

- **Working temperature from 3 °C above room temperature to 55 °C (in steps of 0.1-°C) and CO_2 concentrations up to 20 % (in steps of 0.1-%)**
- Digital display for °C and CO_2 content
- Tube penetration 42 mm in the rear wall allows operation of additional devices
- Stainless steel interior
- Constant moisture at 37 °C approx. 95 % rF
- Additional inside door made of glass, heated outside door
- To supply the incubator with CO_2, a separate gas cylinder or a central compressed-gas tank is required
- Conditioned water (demineralised/distilled and autoclaved and/fully desalinated/distilled and autoclaved) is required for humidification

Technical specifications:

Capacity	151 l
Temperature deviation time / space	±0.1 / ±0.5 K
CO_2 consistency	±0.3 %
Inner dimensions (W x H x D)	470 x 607 x 530 mm
Outer dimensions (W x H x D)	637 x 867 x 766 mm
Dimensions perforated trays (W xD)	423 x 455 mm
Shelves **Delivery incl.** / max. capacity	3 / 10
Required input pressure	0.8 to 1.0 bar, 99.5 Vol.-% medical CO_2 quality
Intake-air filtration	CO_2 filter, PTFE filter 0.3 µm, filter housing PP
Weight	70 kg
Power supply	230 V, 50/60 Hz

Delivery incl. 3 perforated plate insert, hose set (ID 4 mm, AD 10 mm, approx. L 3 m), CO_2 filter and electric immersion pump.

Art. No.	Pack Qty.	€
ETT4.1 *	1	5274,00

LHT high-temperature laboratory ovens

By Carbolite Gero.

- For maximum temperatures of 400, 500 or 600 °C depending on unit type
- Only 10 minutes recovery time at 400 or 500 °C after the door has been open for 1 min
- Polished stainless steel inner chamber
- Rugged powder coated outer housing
- High-performance recirculating air fan in the inner chamber (non-regulable)
- Adjustable digital overtemperature protection
- PID thermostat with digital display (nominal/actual temperature display)

Technical specifications:

Type	LHT 4/30	LHT 5/30	LHT 6/30
Capacity (l)	30		
Max. temperature (°C)	400	500	600

NEW

ED-S and FD-S Solid.Line drying ovens

- **Operating temperature range from +7 °C (ED-S) or +10 °C (FD-S) above room temperature to 250 °C**
- APT.line™ preheating chamber technology
- Adjustable exhaust air flap
- Controller with timer function (1 min to 99 h)
- Integrated Class 2 temperature safety device (DIN 12880) with visual alarm

ED-S
With natural air movement (convection)

FD-S
With circulating air (fan speed cannot be controlled or deactivated)

Universal heating and drying cabinets

By Memmert.
UN, UNplus, UF and UFplus models

General features:
- **Operating temperature range from 5 °C (UN/UNplus) or 10 °C (UF/UFplus) above room temperature to 300 °C**
  Set temperatures from 20 to 300 °C
  Adjustment accuracy to 99.9 °C: 0.1 K from 100 °C: 0.5 K
- Interior made of stainless steel (1.4301)
- Fully insulated stainless steel door (two-wing from size 450 upwards)
- Fresh air supply by electronically adjustable exhaust flap
- Structured stainless steel housing
- **Incl.** factory calibration certificate valid for +160 °C
- **Power supply of models 30 to 260: 230 V, 50/60 Hz**
  Power supply of models 450 and 750:
  400 V and 3 x 220 V, 50/60 Hz

Other features:
- German, English, French and Spain language options
- Digital timer (adjustable from 1 min to 99 d, 23 h) or continuous duty
- "SetpointWAIT" function - process time does not start until the nominal temperature is achieved

1) With castors, movable and lockable
2) Less 39 mm for forced air circulation (convection) equipment
3) Door handle: 56 mm

Delivery incl. stainless steel grids
(models 30 and 55: 1 grid, models 75 to 750: 2 grids)

Models UN and UF
- Graphical single TFT display with touchscreen for operation and display of temperature, program runtime and air flap position
- Integrated data logger with 10-year memory
- With Ethernet communication port for log data readout
- Overtemperature protection
- **Additional feature of UF model:** low-noise air turbine for air circulation mode (air turbine can be adjusted and switched off)

Type UN, with natural air circulation (convection)

* Longer delivery times possible. Please check with our Sales Department.

Models UNplus and UFplus
- Two graphical TFT displays with touchscreen for operation and display of temperature, program runtime, air damper position and graphical display of program flow
- Integrated data logger with 10-year memory
- **Display of recorded log data (max. 10000 values correspond to approx. 1 week) directly on the instrument**
- Application-specific correction of heat output distribution between the upper and lower heating groups within an adjustment range from -50 to +50 %
- With Ethernet communication port for log data readout as well as for transmitting and launching programs and online logging
- Definition of individual Min/Max values for high/low temperature protection
- **USB port for installing programs and reading out the data logger incl. software (to create ramp programs and 7-day programs)**
- **Additional feature of UF/UFplus models:** low-noise air turbine for air circulation mode (air turbine can be adjusted and switched off)

Drying and warming cabinets

Heratherm drying cabinets

By Thermo.
General Protocol and Advanced Protocol models

General features:
- **Temperature range:**
  General Protocol model: 50 to 250 °C
  Advanced Protocol model: 50 to 330 °C
- Interior made of stainless steel
  General Protocol model: stainless steel 1.4016
  Advanced Protocol model: stainless steel 1.4301
- Smooth housing interior and round edges make it easy to clean
- Automatic over temperature alarm
- Microprocessor control
- Setting accuracy ±1 K
- RS 232 port
- **Natural convection** for gentle drying and heating with low air turbulence (e. g. powder or film) or **air circulating** for fast drying and heating
- Outlet connection 230 V, 50 Hz

Technical specifications:

Drying cabinets Heratherm Advanced Protocol
- Switch on/off after a pre-set time
- Weekly setting or real-time control
- Programmable control for temperature increase interval times (memory for 10 programs each with 10 individual steps)
- Bushing (∅ 19 mm) at the back enables sensor to be inserted, e.g. for independent data monitoring
- Housing varnished on outside
- Models with air-circulation fan: controllable fan speed for application-specific air flow rates (cannot be switched off completely)

* Longer delivery times possible. Please check with our Sales Department.

Model FED
With forced air circulation (fan)
- Adjustable fan speed (min. speed 30 %)
- 1 programmable temperature ramp
- RS 422 port
- Timer function selection:
  - Heater is switched off when set time expires
  - The set timer does not start until the actual value reaches the selected set value. Heater is switched off when the set time expires.
  - Heater is switched on after set time expires and stays in continuous operation.

Heratherm high capacity drying cabinets

By Thermo.
General features:
- Free-standing units with fixed rollers
- Stainless steel interior
- RS 232 port
- Mains connection 230 V, 50 Hz

Technical specifications:

Type	OGS400	OGS750	OMH400	OMH750
Capacity (l)	419	774	396	731
Inner dimensions (mm)				
Width	544	1004	544	1004
Height	1307	1307	1335	1335
Depth	590	590	545	545
Outer dimensions[1] (mm)				
Width	778	1261	778	1261
Height	1545	1545	1545	1545
Depth	770	770	770	770
Removable shelves				
Delivery incl.	2			
Max. capacity	39			
Other				
Rated power (W)	2400	3000	2400	3000
Weight (kg)	136	182	135	185
Temperature deviation at 150 °C				
temporal (°C)	±0.5		±0.3	±0.4
spatial (°C)	±3.0	±3.7	±2.1	±3.1

[1] not including depth of handle and display (65 mm) and height of rollers (108 mm); required clearance to rear panel 120 mm.

Delivery incl. 2 removable shelves.

General Protocol:
- **Operating temperature range from 10 °C above room temperature to 250 °C**
- With natural convection
- Integrated timer (1 min to 99 h, 59 min)
- Actual temperature display; setting accuracy ±1 K

Type	Volume (l)	Art. No.	Pack Qty.	€

* Longer delivery times possible. Please check with our Sales Department.

Advanced Protocol:
- **Operating temperature range from10 °C above room temperature to 250 °C**
- Setting accuracy ±1 K
- Mechanical convection - 2-stage fan: can run fast or slow, but cannot be switched off
- Cable feedthrough (∅ 19 mm), e.g. for fitting sensors
- An audible alarm sounds if the door is accidentally left open
- Switch on/off after a pre-set time
- Weekly setting or real-time control
- Programmable control for temperature ramps and dwell times (memory for 10 programs each with 10 individual steps)

Economy laboratory furnaces ELF series

By Carbolite Gero. For temperatures up to 1100 °C.

- General-diffuse heating coils on both side walls
- Furnace chamber comprising vacuum formed fibre insulation
- With abrasion-resistant base plate
- Double-walled housing for low ambient temperatures
- Short heating-up times of approx. 35 min
- Exhaust vent (∅ 30 mm)
- Forward hinged door
- PID thermostat with digital display (nominal/actual temperature display)
- Input of a temperature control profile with 2 segments (heating rate and hold time) using the timer function
- Built-in timer function (runtime: 99 h and 59 min)
- The timer can be operated in 5 different modes, e.g. the timer waits until the set temperature is reached, then begins to count down and on expiration shuts off the heater.
- **Please pay attention to supply voltages**

Technical specifications:

Type	ELF 11/6b	ELF 11/14b	ELF 11/23

AAF Series Economy muffle/ashing furnaces

By Carbolite Gero. For temperatures up to 1100 °C.

- Ceramic muffles heated from 4 sides for good temperature homogeneity (AAF 11/3 and AAF 11/7), AAF 11/18 model is heated from 2 sides with covered heating elements
- Parallel swing-up doors
- Hot door insulation is always facing away from the user
- Vacuum-formed fibre insulation
- Heating-up time: approx. 100 min
- Preheated air intake for optimal temperature distribution
- Air exchange rate: approx. 5 to 6 air changes per minute
- Exhaust outlet with vent (∅ 50 mm)
- With door contact switch
- PID thermostat with digital display (nominal/actual temperature display)
- Input of a temperature control profile with 2 segments (heating rate and hold time) using the timer function
- Built-in timer function (runtime: 99 h and 59 min)
- The timer can be operated in 5 different modes, e.g. the timer waits until the set temperature is reached, then begins to count down and on expiration shuts off the heater.
- **Please pay attention to supply voltages**

Vacuum drying cabinets

Vacuum drying cabinet Heraeus® VT-series

By Thermo. Fields of application: pharmaceutics, biochemistry, cosmetics industry and electronics. Ideal for gentle, rapid drying and for thermal treatment of temperature-sensitive or easily decomposable substances and electronic components. Vacuum drying eliminates any danger of contamination of sensitive samples through floating particles and the risk of oxidation is lower.

General features of all models:

- **Working temperature of 15 °C above room temperature to +200 °C**
- Max. physical temperature tolerance ±4 °C (at 200 °C)
- Analogue pressure display
- **Attainable end vacuum: 0.01 mbar**
- Inner trays are made of corrosion-proof, electropolished stainless steel (1.4571)
- Double-plated safety glass in door window
- Microprocessor-controlled temperature regulator
- Digital temperature display
- Jacket heating
- Temperature control limiter (protection class 2 in acc. with DIN 12880)
- In-house vacuum or a vacuum pump is required for operation. Please order vacuum connection set separately.

VT 6025 comfort
Inert gas connection (AD ∅ 4 mm) with precision valve and pressure relief valve for precise discharge of non-flammable, non-toxic gases (VDI 20465).

Technical specifications:

Effective space volume	25 l
Outer dimensions (W x D x H)	480 x 450 x 600 mm
Inner dimensions (W x D x H)	300 x 307 x 275 mm
Trays: standard / max. number	2 / 4
Nominal output	1.3 kW
Tube shaft for vacuum connection	∅ 20 mm
Weight	58 kg
Power supply	230 V, 50/60 Hz

Type	Design	Art. No.	Pack Qty.	€
VT 6025	without inert gas connection	**Y718.1**	1	5098,00

Vacuum drying cabinets VD series

By Binder.
Fast, gentle drying of temperature-sensitive samples.

- **Operating temperature range from room temperature 15 °C to 200 °C**
- Reliable end vacuum up to 0.01 mbar
- Controller with ramp function (2 programs each with up to 10 sections)
- Setting of temperature, runtime, temperature-dependent delayed switch-off, delayed switch-on, weekly programs
- **Inert gas connection**
- Safety glass with splinter protection
- Class 2 temperature limiter (DIN 12880) with visual alarm
- Interior and door insides made of stainless high-grade steel V4A
- In-house vacuum or a vacuum pump is required for operation

Delivery without vacuum closure set for pumps (please order separately).

Technical specifications:

Type	VD 23	VD 53
Volume (l)	23	53
Inner dimensions W x H x D (mm)	285 x 295 x 285	400 x 340 x 400

Tubes furnace

Tube furnace MTF series

By Carbolite Gero.
For the heat treatment of small amounts of samples. Directly wound resistance wire heating system on a ceramic supporting tube.

- Horizontal configuration; control is located directly below the furnace
- PID temperature controller with digital display
- Input of a temperature control profile with 2 segments (heating rate and hold time) using the timer function
- Built-in timer function (runtime: 99 h and 59 min)
- The timer can be operated in 5 different modes, e.g. the timer waits until the set temperature is reached, then begins to count down and, on expiry, shuts off the heater.

Technical specifications:

Electric barrel heaters WODL-series

By Winkler. Ideal for heating and reducing the viscosity of solids and liquids in barrels and canisters allowing them to be filled into smaller containers or pumped more easily.

Features:
- Direct heating at place of installation
- Outside casing made of siliconised glass cloth
- Simple attachment via tension belt with adjustable snap lock
- Temperature range: room temp. max 70 °C
- Infinitely adjustable temperature setting (Scale in 10 °C-steps)
- 3 m connecting cable
- Voltage 230, 50/60 Hz

Technical specifications:

Model	Container	Output (W)	Dimensions W x L (mm)	Heated length (mm)
WODL-30	Canister 30 l	75	200 x 1020	900
WODL-60	Canister 60 l	150	300 x 1250	1200

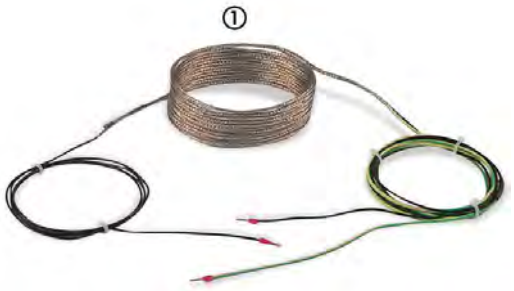
Heating leads



Laboratory heating cords HSS-series

With braided resistance wires. Ideal for temperatures **to max. 450 °C.**
High flexibility enables cord to be used for extremely close coiling radius (<15 mm). **Not moisture proof.**

- Connector cable: 1.5 m
- Min. bending radius: 6 mm
- ∅: 3.5 to 4.5 mm
- No shockproof plug, please order separately

For control system, see accessories for heating leads.

Model	Length (m)	Power (W)	Art. No.	Pack Qty.	€
I	0,6	75	**C996.1**	1	76,35
II	1	100	**C997.1**	1	82,60

Installation set

For assembling a shockproof plug to heating cords or cables.
Set consists of shockproof plug and a silicone tube.
Silicone tube: Length 1.5 m, ∅ 8 mm.

Art. No.	Pack Qty.	€
E059.1	1	24,65

Glass fabric tape

With silicone adhesive. To attach heating leads. Adhesive to +200 °C.
Dimensions width 15 mm, length 50 m.

Art. No.	Pack Qty.	€
E060.1	1	85,90

Glass fiber tape

Ideal for bending and wrapping heating leads and temperature sensors.
Suitable to max. +450 °C.
Dimensions: 0.16 mm thick, width 25 mm, length 50 m.

Art. No.	Pack Qty.	€
E061.1	1	35,50

▶ Temperature control unit for heating leads see page 1015

Laboratory heating tapes HBSI/HBS-series

Technical specifications:

Type	① HBSI	② HBS
Nominal temperature	200 °C	450 °C
Mains connection:	1.5 m	0.5 m
Min. bending radius	20 mm	10 mm
Dimensions (thickness x width)	5 x 24 mm	5 x 30 mm

For control system, see accessories for heating leads.

① HBSI-Heating tape

Ideal for **temperatures to max. 200 °C. Moisture-proof.**
With braided resistance wires. Flexible, hard-wearing and grounded. Protective grounding on each individual lead. Covered in a silicone sheath for extra protection against environment influence or mechanical damage. PTFE insulation also protects heating conductor from chemical influence.
Delivery incl. shockproof plug.

Model	Length (m)	Power (W)	Art. No.	Pack Qty.	€

Temperature control unit HT 30

Accessories for heating leads and heating tapes

Multi-purpose use. With 220 V socket. Capacity 2200 W. With electronic power output to 10 A. The unit enables controlled and gentle heating of heating lines/heating mantles. Electronic power disc allows connected nominal capacity to be reduced from 100 % to 0 % or to be adjusted to individual needs. Adjustment of digital desired value for exact setting of required temperature **(control and operation process possible only via separate Pt 100 sensor)**. The actual temperature can read off an LED trend display or an optional actual temperature display (please order separately).

Technical specifications:

Switching capacity at 220 V	2300 W
Accuracy	1 %
Gain control	0.5 % to 5 %
Protection class	I
System of protection	IP 30
Mains cable	1.5 m (detachable), with shock proof plug on the backside
Dimensions of enclosure	75 x 115 x 145 mm

Delivery without temperature sensor, please order seperately.

Art. No.	Pack Qty.	€
E047.1	1	575,15

Temperature sensor Pt 100 for thermostat HT 30

Sheath made of stainless steel 1.4571.

For regulating heating cords and heating tape

With cable (L 1 m) and connector.

CHC8.1	1	176,30

Pilz®-standard heating mantles WHG series

By Winkler. For working temperatures up to 450 °C.

- Heating element made of highly flexible glass fiber yarn for even heat distribution and gentle treatment of round flasks
- With heating zone switch
- **Up to 1000 ml with the built-in heating zone switch in the feed cable, from 2000 ml heating zone switch in housing**
- Heating mantles 500 to 20000 ml: Bottom opening ∅ 60 mm
- Attachment to support rings or tripod stands with clasps
- Length of power cable: 1.5 m
- **With protective switch**
- Power supply voltage: 230 V, 50/60 Hz

Shockproof plug with multi-pole coupling

③ For heating mantles in the WHG and WHLG series
Doesn't have residual current circuit breaker function.
Use when the operator network incorporates a residual current circuit breaker system. Cable length 1.0 m. Voltage 230 V.

Art. No.	Pack Qty.	€
PP37.1	1	19,30

Please note:
Older heating mantles may only be operated with a residual current circuit breaker (FI).

Pilz®-heating mantles WHLG series

By Winkler. For working temperatures up to 450 °C.
- Heating element made of highly flexible glass fiber yarn for even heat distribution and gentle treatment of round flasks
- Plastic coated metal housing
- **Model WHLSG2/ER - With spill-proof heating basin made of metal for catching any spilt liquids should the glass vessel break**
- With integrated fitting for connection of stand clamps. Please order stand clamps separately.
- Length of power cable: 1.5 m
- **With protective plug**
- Power supply voltage: 230 V, 50/60 Hz

① Model WHLG2 - With built-in heating zone switch

Heating mantles

① ②

Heating mantles ITA-series

- Max. heating temperature range up to 450 °C
- Heating element protected against escape of fluid
- Infinitely variable temperature control via dial with 10-step scale
- "Chimney effect" for cool housing outer walls
- LED power indicator during operation
- Housing surface made of ABS
- Version with electro-magnetic stirring function available
- Dimensions: W 192 x D 290 x H 131 mm
- Power supply voltage: 230 V, 50 Hz

CFS battery capillary filling device

To quickly and safely fill melting-point determination capillaries. Suitable for capillaries with a diameter of 1 to 1.5 mm and a length of 60 to 100 mm.
- Lengthy stoking and tapping are no longer required, the capillaries are cleanly and repeatedly filled to the bottom
- No direct contact with dangerous substances
- Clear housing protects against glass breakage

Usage:
The capillaries are carefully inserted into the filling funnel until their open side matches the lowest point of the funnel. Insert the funnel containing the capillaries into the unit. By turning the funnel guide, the height is adjusted until the capillaries touch the bottom and the funnel overlaps the guide by a few millimetres (see figure). The funnel is filled with a spatula tip's worth of the sample, and the unit switches on. The capillaries are filled using powerful vibrations. The unit switches off automatically after 10 seconds. The filling process can be repeated as often as required.

Note: The samples must be dry and finely powdered.
Unit dimensions: ∅ 80 x height 140 mm.
Delivery incl. AC-adapter.

Art. No.	Pack Qty.	€
YT60.1	1	304,25

MPM series melting point measuring units

For measuring the melting point of pulverulent substances in glass capillaries.

Equipment features of all models:

- Digital temperature control
- Indirect, non-glare and anti-dazzle illumination of the substance during visual measurement using the magnifier
- Height-adjustable table tripod (360 to 460 mm)
- With USB interface
- Software makes it possible to create a measurement log in PDF format (incl. diagram with transparency progression for the MPM-HV 3 model)

MPM-HV 3 semi-automatic/fully automatic multi-function unit
For testing one sample.
Choice of two measuring procedures (visual or automatic).
Fully automatic measurement: Set the required temperature (approx. 3 °C below the expected melting point).
Once the preselected temperature is reached, a filled capillary is inserted.

MPM-H 3 semi-automatic unit
For testing a maximum of three samples at the same time.
Semi-automatic melting point measuring unit. Once the preselected temperature is reached, a filled capillary is inserted and a visual inspection of the capillary is performed using the magnifier. After the "Start" button is pressed again, the unit continues to heat up at a rate of 1 °C/min.
As soon as the sample has melted, the value can be read on the display.

Technical specifications:

Measuring range	25.0 to 360.0 °C
Resolution	0.1 °C
Accuracy	±0.4 °C
Heat-up rate during quick heating	To 200 °C – approx. 4 min to 350 °C – approx. 8 min
Heat-up rate during measuring	1 °C/min
Magnifier	3-way
Dimensions (W x D x H)	230 x 65 x 260 mm
Weight	Unit 4 kg, tripod 2.8 kg
Power supply	115-230 V, 50 Hz

Delivery incl. required melting point measuring unit and 100 melting point tubes, USB cable, software and protective cover.

Microscope slide drying bench MH6616

By Electrothermal. For faster preparation of microscope slides.
For up to 50 microscope slides (76 x 26 mm). Suitable for temperatures ranging from 10 °C **above** room temperature to 100 °C.

Microscope slides can be placed in various positions:

- On the drying bars
- Leaning against the drying bars
- Placed flat without the drying bars

Technical specifications:

Heating output	150 W
Max. hot plate temperature	100 °C
Dimensions (W x D x H)	390 x 180 x 95 mm
Heating output	150 W
Weight	1.8 kg
Power supply	230 V, 50/60 Hz

YL72.1	1	652,00

Tissue flotation bath MH8517

By Electrothermal. For flotation and drying of sectioned tissue samples. Suitable for use in pathological, histological, chemical and bacteriological laboratories.

- Matt black PTFE coating on aluminium vessel allows observation and manipulation of specimens
- With wide edge for placement and drying of sections
- A temperature of 45 °C is reached in approx. 40 min
- With over-temperature cut-out
- A bath lid is available to protect water against contamination. Please order separately

Technical specifications:

Capacity	2.25 l
Temperature range	from 10 °C **above** room temperature to 70 °C (temperature adjustment range from 30 to 80 °C)
Accuracy	±0.5 °C
Inner dimensions (∅ x H)	220 x 80 mm
Outer dimensions (∅ x H)	330 x 140 mm
Output	240 W
Weight	2.7 kg
Power supply	230 V, 50/60 Hz

▶ Pots adapted for induction see page 128

Glass ceramic hotplate CT 2203/TC

- Housing made of brushed stainless steel
- Dual circuit heating technology
- Large heating zone can be switched on (∅ 210 mm)
- Schott Ceran® cooking surface
- With 9-stage heating power
- Heating element with extremely short warm-up time
- Control lamp, residual heat display
- Automatic operating time limitation
  (1 to 10 h depending on cooking temperature stage)

Technical specifications:

Heating power	1000 W (∅ 140 mm) 2200 W (∅ 210 mm)
Max hotplate temperature	460 °C
Heated zone	∅ 140 or ∅ 210 mm
Dimensions (W x D x H)	305 x 410 x 75 mm
Weight	3.2 kg
Power supply	230 V, 50/60 Hz

Art. No.	Pack Qty.	€
EY75.1	1	214,50

Induction hotplate CT 2215/IN

A magnetic coil generates the heat directly in the bottom of the pot.
Can only be used with induction-suitable pots.

- Housing made of stainless steel
- Schott Ceran®-hotplate
- Temperature selection in 21 stages from 60 to 260 °C
- Power selection in 9 stages
  (70/130/180/270/350/500/820/1280/2200 W)
- Electronic regulation using touch controls
- Timer: 1 to 99 min
- Pot detector
- Automatic power-off and audio signal
- Residual heat and operation indicator

Technical specifications:

Heating output	2200 W
Temperature selection is stages from	60 to 260 °C, adjustable in 10 °C increments
Heated zone	∅ 80 to 200 mm
Dimensions (L x W x H)	380 x 333 x 65 mm
Electrical supply	230 V, 50/60 Hz

Art. No.	Pack Qty.	€
NA86.1	1	204,15

Twin hotplate CT 3400/E

- With brushed stainless steel housing and Ceran®-glass-ceramic cooktop
- Freely-adjustable energy control using retractable rotary knob
- Dual-circuit heating technology:
  1st heating zone: ∅ 145 mm
  2nd heating zone: selectable ∅ (140 or 210 mm)
- Warning lamps, residual heat indicator and overheating protection

Technical specifications:

Heating capacity	∅ 145 mm = 1200 W ∅ 140/210 mm = 2200 W
Max. hot plate temperature	460 °C
Dimensions (W x D x H)	550 x 310 x 65 mm
Weight	3.7 kg
Power supply	230 V, 50/60 Hz

Art. No.	Pack Qty.	€
CHK9.1	1	285,95

A 121 °C

Stainless steel pots

Made of high-grade 18/10 steel. With sandwich base and handles. Suitable for use on hot plates and induction hobs, not usable on magnetic stirrers. Suitable lids please order separately. Autoclavable.

Hotplates

REC digital hotplate

- Glass ceramic installation surface
- Digital display of hotplate nominal temperature (adjustable in 5 °C increments)
- Hot Top Indicator (hot surface warning)
- Elevated control panel for protection against leaking fluids

Technical specifications:

Heating output	800 W
Max. hot plate temperature	25 to 550 °C
Control accuracy	±10 K
Mounting surface	180 x 180 mm
Dimensions (W x D x H)	203 x 344 x 94 mm
Weight	3.3 kg
Power supply	230 V, 50/60 Hz

Art. No.	Pack Qty.	€
ACP8.1	1	311,75

CultureTemp™ 37 °C cell culture hotplate

Housing made of PP, hotplate made of aluminium. Improves the viability of cells after removal from the incubator. With digital display and non-adjustable hotplate temperature of 37 °C. Acoustic timer adjustable from 1 to 15 min (has no effect on heater performance; no shutdown upon expiration of the timer). With LED for monitoring the heating function.

Technical specifications:

Hotplate temperature	37 °C (non-adjustable)
Temperature stability	±1 °C
Timer	1 to 15 min in 1-min increments
Set-up dimensions (W x D)	203 x 178 mm
Dimensions (W x D x H)	249 x 254 x 57 mm
Weight	1.1 kg
Power supply	230 V, 50/60 Hz

Art. No.	Pack Qty.	€
CHC7.1	1	536,45

Digital hotplates C-MAG HP-series

By IKA.

General information for all models

- Base made of glass ceramics
- Temperature setting via digital display (LED)
- Digital display of hotplate desired temperature
- Error code malfunction indicator
- Fixed safety circuit of 550 °C
- Hot Top Indicator (warning in case of hot surface)

Models C-MAG HP 7 and C-MAG HP 10:
Additionally with DIN-socket 12878 for connecting an electronic contact thermometer e.g. ETS-D5 for high-precision temperature control.

Technical specifications:

Model	C-MAG HP 4	C-MAG HP 7	C-MAG HP 10
Heating capacity (W)	250	1000	1500

Hotplates US150 and UC150

By Stuart.

Features

- Microprocessor-controlled heating element
- Platforms are optionally available in glass ceramic (generally good resistance to chemical attack, high temperature, 120 x 120 mm heated zone) or aluminium (very rugged, 150 x 150 mm heated zone)
- Temperature control with LED display, colour LEDs aid reading current actual temperature
- Safety warning lamp comes on at temperatures over 50 °C

Technical specifications:

Model	US150	UC150
Heating output (W)	700	500
Hotplate material	Aluminium/silicon coated	Glass ceramic
Heated zone (mm)	150 x 150	120 x 120
Max. hotplate temperature (°C)	325	450
Hotplate surface (mm)	150 x 150	150 x 150
Dimensions W x D x H (mm)	172 x 248 x 120	172 x 248 x 120
Weight (kg)	2.2	
Mains connection	230 V, 50 Hz

Digital hotplate SD 160

By Stuart. Hotplate with high temperature stability.

- Microprocessor-controlled
- Safety warning indicator light for temperatures over +50 °C
- Digital display with simultaneous desired/actual temperature readings
- Aluminium hotplate enables even heat distribution

Technical specifications:

Heater capacity	700 W
Max. hotplate temp.	8 °C **above** ambient temperature up to 325 °C
Adjustable temperature	20 to 325 °C
Display resolution	1 °C
Temperature fluctuation in working plate area	±0.2 °C at 37 °C ±1.0 °C at 150 °C
Temperature stability	±0.25 °C
Surface hotplate (W x D)	160 x 160 mm
Dimensions (W x D x H)	190 x 300 x 110 mm
Weight	2.5 kg
Current	230 V, 50 Hz

AH85.1	1	859,00

Infrared laboratory cooker SLK 12

By SI Analytics.

- With glass-ceramic hob
- Heating area with 2 zones for small and large vessels
- Stainless steel housing with steel base
- Non-heated edge zones allow vessels to be partially heated or completely taken off the hob
- Indicator lamp for indication of operating state and residual heat

Technical specifications:

Heating output	700/1700 W
Max. hot plate temperature	approx. 550 °C
Heated zones	∅ 110 / ∅ 180 mm
Hotplate surface (W x D)	300 x 300 mm
Dimensions (W x D x H)	330 x 300 x 73 mm
Weight	4.5 kg
Power supply	230 V, 50/60 Hz

Art. No.	Pack Qty.	€
TP34.1	1	525,70

Hotplates

Infrared hotplate CR 300

By Stuart.
- Chemically resistant ceramic surface
- With safety warning lamp for temperatures over 50 °C
- Efficient infrared heating at 900 W
- Heats 1 litre of water 30 % faster than conventional ceramic hotplates at 1200 W
- For a liquid volumes up to 10 l

Technical specifications:

Heater capacity	900 W
Max. hotplate temp.	50 to 450 °C
Heated area	∅ 140 mm
Surface hotplate (W x D)	300 x 300 mm
Dimensions (W x D x H)	300 x 365 x 105 mm
Weight	4 kg
Current	230 V, 50 Hz

Art. No.	Pack Qty.	€
EE52.1 *	1	1018,00

* Longer delivery times possible. Please check with our Sales Department.

Hotplates CB 500 and SB 500

By Stuart. With a large working surface for heating several samples, e.g. 30 beakers à 100 ml. Safety warning lamp for temperatures over +50 °C.

Technical specifications:

Model	**CB 500**	**SB 500**
Heating capacity (W)	2250	1500
Hotplate material	ceramic	aluminium
Heated zone (mm)	450 x 250	500 x 300
Max. hotplate temp. (°C)	50 to 375	50 to 300
Surface hotplate W x D (mm)	500 x 300	
Dimensions W x D x H (mm)	520 x 360 x 130	
Weight (kg)	12	
Current	230 V, 50 Hz	

Model	Art. No.	Pack Qty.	€
CB 500	**Y407.1** *	1	995,00
SB 500	**Y408.1** *	1	985,00

* Longer delivery times possible. Please check with our Sales Department.

Hotplates CB 300 and SB 300

By Stuart. Safety warning indicator light for temperatures over 50 °C.

Technical specifications:

Model	**CB 300**	**SB 300**
Heating capacity (W)	1200	600
Hotplate material	ceramic	aluminium
Heated zone (mm)	200 x 200	300 x 300
Max. hotplate temp. (°C)	50 to 450	50 to 300
Surface hotplate W x D (mm)	300 x 300	
Dimensions W x D x H (mm)	300 x 365 x 105	
Weight (kg)	6	
Current	230 V, 50 Hz	

Model	Art. No.	Pack Qty.	€
CB 300	**Y409.1** *	1	765,00
SB 300	**Y410.1** *	1	750,00

* Longer delivery times possible. Please check with our Sales Department.

Digital hotplates SD 300 and SD 500

By Stuart. With large surface area for simultaneous heating of several samples.
- Microprocessor-controlled
- Surface area Model SD 300: 300 x 300 mm
  Surface area Model SD 500: 300 x 500 mm
- Digital display with a resolution of 1 °C
- Aluminium hotplate enables even heat distribution

Technical specifications:

Model	**SD 300**	**SD 500**
Heater capacity	600 W	1500 W
Max. hotplate temp.	50 to 300 °C	
Temperature fluctuation in working plate area	±2 °C	
Temperature stability	±1.5 °C	
Dimensions (W x D x H)	320 x 365 x 105 mm	520 x 360 x 130 mm
Weight	6.0 kg	12.0 kg
Current	230 V, 50/60 Hz	

Type	Art. No.	Pack Qty.	€
SD 300	**AH86.1** *	1	1022,00
SD 500	**AH87.1** *	1	1145,00

* Longer delivery times possible. Please check with our Sales Department.

Laboratory cooker/stirrer model SLR

By SI Analytics. For stirring and heating liquids.
- With glass-ceramic hotplate
- Residual heat display and excess temperature protection
- Temperature shock resistance over 700 °C
- With large, clear LCD display
- **Bar graph indicates average speed of stirrer and average heating capacity**
- Heating capacity can be set in 24 different stages
- By attaching Pt 1000 temperature sensor the temperature control can be regulated between 25 °C and 200 °C (accuracy ±2 to ±5 K) depending on amount of liquid, heat capacity and ambient temperature
- Please order temperature sensor, support rod and holder separately

Technical specifications:

Heating function	
Heating capacity	900 W
Heated area	∅ 155 mm
Max. hotplate temp.	approx. 550 °C
Setting accuracy with temp. sensor	1 °C
Digital set/actual temperature with connected temperature sensor	
Stirring function	
Max. speed	100 to 1100 rpm
Setting accuracy	approx. 10 rpm
Set/actual speed display	yes
Max. stirring volume	20 l
General specifications	
Hotplate surface	235 x 235 mm
Dimensions (L x W x H)	370 x 240 x 85 mm
Max. load	25 kg
Current	230 V, 50/60 Hz

Art. No.	Pack Qty.	€
T989.1	1	938,50

Accessories for laboratory cooker SLR

By SI Analytics.

Temperature sensor
With stainless steel shaft (V4A). Sensor Pt 1000.
Measuring range -30 to +200 °C. Length 170 mm, ∅ 4 mm.
1 m fixed cable with 2 x 4 mm pin plug.

Art. No.	Pack Qty.	€
T990.1	1	210,70

Support rod
With fastening nut (M8) made of stainless steel. Length 450 mm, ∅ 10 mm.

Art. No.	Pack Qty.	€
T991.1	1	57,95

Holder
For temperature sensor Pt 1000.
Clamp with extension rod made of stainless steel.

Art. No.	Pack Qty.	€
T992.1	1	206,40

Acid-resistant hotplate CP 300

By Stuart. Ideal for aggressive liquids, concentrated acids or alkaline solutions, for trace analysis etc.

Design:
- Hotplate enclosure made of PTFE with ceramic hotplate surface
- Safety warning indicator light for temperatures over +50 °C
- Remote controllable via separate control unit with PTFE-coated connection lead (control unit can be positioned outside working area)

Technical specifications:

Heating power	900 W
Hotplate material	Ceramic
Housing material	PTFE
Max. hotplate temp.	400 °C
Heated area	200 x 200 mm
Surface hotplate (W x D)	300 x 300 mm
Dimensions (W x D x H)	320 x 360 x 60 mm
Control line: Length	2 m
Weight	11 kg
Current	230 V, 50 Hz

Art. No.	Pack Qty.	€
KN92.1 *	1	3199,00

* Longer delivery times possible. Please check with our Sales Department.

Rotilabo®-mini magnetic stirrer M 3

- For stirring volumes up to 3 l
- Continuously adjustable speed range
- ABS housing

Technical specifications:

Stirring volume (H_2O)	3 l
Max. speed	1100 rpm
Motor power (output):	0.6 W
Mounting surface	130 x 150 mm
Permissible operating temperature	5 to 40 °C at 80 % rel. humidity
Dimensions (W x D x H)	130 x 150 x 50 mm
Weight	400 g
Power supply	100 to 240 V, 50/60 Hz

Art. No.	Pack Qty.	€
AAN1.1	1	81,70

Magnetic stirrers

Mini magnetic stirrer Topolino

By IKA. For maximum stirring volume 250 ml.
- Infinitely variable speed range
- PP base

Technical specifications:

Stirring volume (H_2O)	250 ml
Speed range	300 to 1800 rpm
Motor power: Input / output	1.1 / 0.8 W
Max. magnetic rod (L x ∅)	40 x 6 mm
Platform size	∅ 80 mm
Max. operating temperature	5 to 40 °C at 80 % rh
Dimensions (W x D x H)	95 x 110 x 40 mm
Weight	300 g

Delivery incl. power unit.

Art. No.	Pack Qty.	€
KE48.1	1	109,00

Small magnetic stirrer – AGE

Robust epoxy-coated steeling casing.
Control panel is recessed to protect it against leaking liquids.

Technical specifications:

Stirring volume (H_2O)	8 l
Speed	100 to 1200 rpm
Motor rating input / output	40/30 W
Mounting surface	171 x 190 mm
Dimensions (W x D x H)	171 x 190 x 75 mm
Permissible ambient conditions	5 to 40 °C at 80 % rel. humidity
Weight	1.8 kg
Power supply	230 V, 50 Hz

Art. No.	Pack Qty.	€
EHY7.1	1	162,35

RSM-series magnetic stirrers

RSM-10 B
- Speed adjustment via digital display (LED display)
- ABS housing and platform

RSM-01 S
- With stainless steel platform
- Solid metal housing
- Levelling feet for uneven surfaces

Technical specifications:

Type	**① RSM-10 B**	**② RSM-01 S**
Max. stirring capacity H_2O (l)	3	20
Speed (rpm)	100-1500	0-1500
Motor power: input / output (W)	5 / 3	30 / 18
Speed display	LED	-
Speed display accuracy (rpm)	10	-
Installation surface (mm)	∅ 135	
Dimensions W x D x H (mm)	155 x 215 x 75	160 x 280 x 85
Weight (kg)	0.8	2.8
Power supply	200-240 V, 50/60 Hz	

Type	Art. No.	Pack Qty.	€
RSM-10 B	**XP52.1**	1	161,25
RSM-01 S	**XP53.1**	1	295,65

Magnetic stirrers

Small magnetic stirrer MINI-MR standard

By IKA. Ideal for simple stirring operations **to 1000 ml**.
White set-up plate with centring points, ideal for titrations and for observing colour reactions.

Technical specifications:

rpm range:	2500 rpm
Motor power: reception / delivery	3/2 W
Platform	115 x 115 mm, Polyester foil
Outer dimensions (W x H x D)	115 x 37 x 129 mm
Weight	250 g
Current	100-240 V, 50/60 Hz

Art. No.	Pack Qty.	€
0863.1	1	219,00

Magnetic stirrers, lab disc

By IKA. Adjustable reversing operation with direction change every 30 sec.
- High IP protection (IP 65)
- Flat housing

Technical specifications:

Max. Stirring volume (H_2O)	800 ml
Speed range	150 to 1500 rpm
Motor power: Input / Output:	5 / 3 W
Platform size	∅ 100 mm
Dimensions (W x D x H)	116 x 175 x 12 mm
Current	100 to 240 V, 50/60 Hz

Art. No.	Pack Qty.	€
KX33.1	1	289,00

Small magnetic stirrer Hei-Mix S

By Heidolph. Electronic speed control.
With PVDF platform and polyamide housing.

Technical specifications:

Stirring volume (H_2O)	5 l
Speed max.	2200 rpm
Connection capacity	7 W
Platform	∅ 104 mm
Dimensions (W x D x H)	126 x 140 x 80 mm
Max. operating temperature	0-40 °C at 80 % rh
Weight	1.2 kg

Art. No.	Pack Qty.	€
EP84.1	1	234,00

Small magnetic stirrer, color squid / big squid

By IKA. With digital speed display (LED).
Glass platform, plastic base made of TPC-ET.

Technical specifications:

Model	**① color squid**	**② big squid**
Max. stirring volume (H_2O)	1000 ml	1500 ml
Max. speed	0 to 2500 rpm	
Speed display	digital	
Motor power: Intake / Output	3 / 2 W	
Platform	∅ 115 mm	∅ 160 mm
Dimensions W x D x H (mm)	145 x 160 x 45 mm	183 x 203 x 45
Power supply	100 to 240 V, 50/60 Hz	

Type	Art. No.	Pack Qty.	€
① Color squid white	**KX28.1**	1	299,00
② Big squid white	**KX23.1**	1	299,00

Mono Direct and Maxi Direct Digital magnetic stirrers

By Thermo.

General specifications of both models

- Nonwearing Cimarec stirrer drive
- Stainless steel housing
- Automatic start-up for safe acceleration of the stirring rod

Mono Direct

- Up to 3 litres stirring capacity
- LED status display

Maxi Direct Digital

- Up to 5 litres stirring capacity
- With digital stirring speed display
- Constant stirring at low speeds of 80 rpm
- A memory function stores the most recent settings

Technical specifications:

Model	Mono Direct	Maxi Direct Digital
Max. stirring capacity H_2O (l)	3	5
Speed (rpm)	130 to 1000	80 to 2000
Dimensions W x D x H (mm)	180 x 215 x 35	
Output settings (W)	1/5	5/10/15/20
Protection class	IP 32	IP 62
Perm. operating temperatures	-10 to +40 °C at 95 % rH	
Weight (g)	1400	2500

Type	Art. No.	Pack Qty.	€
Mono Direct	**X543.1**	1	209,00
Maxi Direct Digital	**LY28.1**	1	504,00

Portable magnetic stirrer SM27

By Stuart. Housing made of ABS-plastic. **Outlet or battery-operated**, can also be used in climatic cabinest, incubators and in field research. Battery-service life approx. 600 h.

Technical specifications:

Max. stirring volume (H_2O)	1.5 l
rpm range	to 1300 rpm
Ambient temperature	-0 to 40 °C at 80 % rh
Dimensions (W x D x H)	150 x 160 x 70 mm
Weight	1.3 kg

Delivery incl. 4 Mono 1.5 V batteries. Please order power unit separately.

Art. No.	Pack Qty.	€
CC53.1	1	449,00

Accessories:

Power unit for magnetic stirrer SM27	**CC54.1**	1 piece	98,70
12-V-Adapter (for cigarette lighter)	**CC55.1**	1 piece	79,95
Mono/D 1.5 V battery	**1024.2**	2 pieces	6,35

Magnetic stirrers C-MAG MS-series

By IKA.

- Glass ceramic platform
- Offset operation surface protects against spilt liquids

Technical specifications:

Model	C-MAG MS 4	C-MAG MS 10
Max. stirring volume H_2O (l)	5	15
rpm-range	100 to 1500 rpm	
Motor power: Input / Output	15 / 1.5 W	
Platform surface W x D (mm)	100 x 100	260 x 260
Dimensions W x D x H (mm)	150 x 260 x 105	300 x 415 x 105
Permissible working temperature	5 to 40 °C at 80 % rh	
Weight (kg)	3	6
Power supply	230 V, 50/60 Hz	

Type	Art. No.	Pack Qty.	€
C-MAG MS 4	**LN38.1**	1	499,00
C-MAG MS 10	**LN40.1**	1	749,00

Magnetic stirrers

NEW

KMO 3 basic magnetic stirrer

By IKA.
- Illuminated, flat mounting surface made of glass (intensity can be adjusted to three different levels, max. 15000 lx)
- Locking button
- Automatic reversal of direction of rotation (30, 60, 90 or 120 s) can be set

Technical specifications:

Stirring capacity (H_2O)	5 l
Speed range	10 to 1500 rpm
Setting accuracy speed	10 rpm
Motor power	9 W
Mounting surface (W x D)	140 x 120 mm
Dimensions (W x H x D)	153 x 62.5 x 227 mm
Weight	1.2 kg
Permissible operating temperatures	5 to 40 °C at 80% RH
Power supply	100-240 V, 50/60 Hz

Art. No.	Pack Qty.	€
KAA8.1	1	749,00

Magnetic stirrer POWER DIRECT

By Thermo.
Powerful magnetic stirrer for max 40 litre stirring volume.
Compact and flat design. Broad magnetic field enables stirring over a 40 mm range. Ideal for thick glass bases, round flasks or double-shelled containers.
- Stainless steel housing
- Quick-stop within 2 sec
- 4-stage stirring power (5/10/15/20 watt)
- Digital display for exact speed setting
- Memory function for last settings

Technical specifications:

Stirring volume (H_2O)	100 ml to 40 l
Rpm range	100 to 2000 rpm
Dimensions (W x D x H)	240 x 294 x 30 mm
Tolerable working temperature	-10 to +40 °C at 95 % rF
Weight	3 kg

Delivery incl. long-range power unit (100-240 V/24 VDC).

Art. No.	Pack Qty.	€
Y822.1	1	881,00

Magnetic followers, KOMET 50

By Thermo. Extra strong magnetic followers, more than three times the torque of conventional followers. PTFE-coated.
Round. Dimensions: ∅ 21 mm x L 50 mm.
Ideal for magnetic stirrer POWER DIRECT.

Art. No.	Pack Qty.	€
Y825.1	1	38,90

A 121 °C

Rotilabo® Economy magnetic bars

PTFE coated. Similar to cylindrical magnetic bar, but with rounded edges to intensify the stirring effect even at low speeds. Autoclavable.

∅ (mm)	Length (mm)	Art. No.	Pack Qty.	€
3	12	**XA17.1**	10	10,55
8	25	**XA18.1**	10	13,90
8	40	**XA19.1**	10	15,95
8	50	**XA20.1**	10	21,00

▶ For magnetic stirring rods, see page 1045

Magnetic stirrers MegaMag Genie® and Digital MegaMag Genie®

By Scientific Industries. From gentle to intensive mixing of low-viscous liquids. Housing made of ABS/PC.

① **MegaMag Genie®**
Strong magnetic stirrer for up to 38 litres.

② **Digital MegaMag Genie®** like MegaMag Genie®, but additionally with speed and time setting (Timer function) via digital display. Speed can be increased in 10 rpm increments.

Technical specifications:

Model	MegaMagGenie®	Digital MegaMag Genie®
Number of stirring points	1	
Stirring volume (H_2O) per stirring point (l)	38	
Speed range (rpm)	200 to 1300	
Speed display	Scale	Digital
Timer	-	1 to 99 min or permanent operation
Platform size L x W (mm)	305 x 305	
Dimensions L x W x H (mm)	305 x 310 x 130	
Permissible ambient conditions	0 to 38 °C at 95 % rh	
Weight	3000 g	

Type	Art. No.	Pack Qty.	€
① MegaMag Genie®	**HH66.1**	1	818,10
② Digital MegaMag Genie®	**HH67.1**	1	1024,50

Programmable magnetic stirrer MagStir Genie® and multipoint stirrer MultiMagStir Genie®

By Scientific Industries.
General features of both models:

For gentle mixing (e.g. of cell suspensions) in interval operation. Reversing mode can be adjusted for a more effective mixing of the medium.

- Microprocessor-controlled
- Stirring power can be pre-selected (Low, Medium, High) depending on the different stirring requirements, e.g. stirring power "High" for viscous liquids
- Interval and reversing mode possible

Four programs are available:

- **Manual-Mode**
  For stirring without/with a direction of rotation change-over (reversal operation) and timer-function (1 sec to 99 h).
- **Automatic-Mode**
  For activating operator-defined stirring profiles.
- **Profile-Mode**
  For programming and saving 4 operator-defined stirring profiles. Each stirring profile can save 9 different intervals e.g. speed, stirring direction (clockwise or anti-clockwise), intervals acceleration (from 5 to 300 rpm per sec) and time (including stirring intervals).
- **Setup-Mode**
  For programming the manual mode. The following are programmable: ramp acceleration from 5 to 300 rpm per sec (i.e. the time required until the set speed has been reached), the stirring power as well as the length and interval function of the automatic rotational direction change-over (adjustable from 1 sec to 59 min).

Multipoint magnetic stirrers MultiMagStir Genie®

With 4 synchronous-running stirring points for routine testing. Suitable for 4 Erlenmeyer flasks or 1000 ml beakers.

Technical specifications:

Model	MagStir Genie®	MultiMagStir Genie®
Number of stirring places	1	4
Max. stirring volume (H_2O) per stirring place	4000 ml	1000 ml
Distance between stirring points	-	165 mm
Speed max.	10 to 1800 rpm	10 to 1200 rpm
Speed accuracy	±0.1 %	
Max. operating temperature	0 to 38 °C at 95 % rh	
Area per stirring point	∅ 100 mm	∅ 75 mm
Dimensions (W x D x H)	160 x 200 x 55 mm	325 x 375 x 48 mm
Max. load	5000 g	10000 g
Weight	1000 g	3200 g

Magnetic stirrers

Magnetic stirrers MOBIL 10 and MOBIL 25, remote-controllable

By Thermo.

General features of both models:

Ideal for stirring in warming cabinets, climatic test cabinets and cold chambers. Also for integration in systems.

- Remote-controllable (wired) via separate control unit, Telemodule 10 M
- Motor quick-stop without after-running for high operational safety, protects glass vessels from breaking
- Infinitely adjustable speed

Magnetic stirrer MOBIL 10

Easy-to clean and robust casing **made of POM**

Magnetic stirrer MOBIL 25

Watertight and pressure-resistant enclosed stainless steel casing for direct stirring in hot water baths or in steam sterilizers

Technical specifications for magnetic stirrers:

Type	MOBIL 10	MOBIL 25
Max. stirring volume (H_2O)	0.1 to 20 l	
rpm range	100 to 1000 rpm	
Stirring capacity	10 W	
Housing material	POM	high-grade steel 1.4305
Dimensions (∅ x H)	128 x 34 mm	
Control line length/∅	2 m/0.4 mm	
Max. operating temperature	+5 to +56 °C at 95 % rh	-10 to +143 °C in saturated steam
Permissible operating overpressure/vacuum	-	+3.0/-1.0 bar
System of protection	IP 66	IP 68
Weight	0.7 kg	1.7 kg

Technical specifications for Telemodule 10 M:

Constancy of speed	±1 %
Nominal stirring power	10 W
Dimensions (W x D x H)	63 x 96 x 50 mm
Safe ambient temperature	+10 to +40 °C at 80 % rh
System of protection	IP 20
Weight	0.5 kg
Current	230 V, 50/60 Hz

Delivery without control unit Telemodule 10 M, please order separately (is required to operate device).

Type	Art. No.	Pack Qty.	€
MOBIL 10, without Telemodule 10 M	**EH13.1** *	1	458,00
MOBIL 25, without Telemodule 10 M	**EH14.1** *	1	938,00

Accessories:

Control unit Telemodule 10 M	**EH15.1** *	1	262,00

* Longer delivery times possible. Please check with our Sales Department.

Micro Magnetic stirrer Cimarec

By Thermo. With induction drive. Compact design for low stirring volumes. Ideal for operation in demanding environments and water baths.

Micro magnetic stirrer

- High temperature resistance up to 95 °C in water and 120 °C in air
- Hermetically-sealed stainless steel housing, waterproof and dustproof to IP 68
- Can be remotely controlled with separate Telemodul 20 C control unit

Telemodul 20 C control unit

- Graphic display
- Vertical mixing (Shake mode)
- 3 function-definable program keys for quick starting of routines
- Three-stage adjustable start-up times for safe acceleration of the magnetic rod
- Intermittent operation with freely selectable stirring times and intervals as well as rotation direction reversal (5 sec to 1 h)
- Four-stage adjustable nominal stirring power (25/50/75/100 %)

Technical specifications of magnetic stirrer:

Max. stirring capacity (H_2O)	1 l
Speed range	130 to 1400 rpm
Stirring power	2/4/6/8 W
Dimensions (W x D x H)	48 x 48 x 16 mm
Control cable length / ∅	2 m / 4 mm
Perm. operating temperature in air	-10 to +120 °C at 95 % rH
Perm. operating temperature in water	0 to +95 °C at 100 % rH
Protection class	IP 68
Weight	0.2 kg

Technical specifications of Telemodul 20 C:

Speed constancy	±1 %
Output voltage	20 VDC
Dimensions (W x D x H)	155 x 165 x 95 mm
Perm. ambient temperature	0 to +40 °C at 80 % rH
Electrical supply	100-240 V, 50/60 Hz

Delivery incl. Micro Magnetic stirrer and Telemodul 20 C control unit.

Art. No.	Pack Qty.	€
LY27.1	1	769,00

Magnetic stirrer Compact 20, remote controllable

By Thermo. For stirring applications directly in water baths (up to +50 °C), hot and cold chambers, in damp brooding chambers and for built in systems.

Magnetic stirrer Compact 20
- Stainless steel housing
- Non-wearing Cimarec-inductive drive
- Remote controllable via separate control unit Telemodul 20 C
- Hermetically sealed; waterproof in compliance with IP 68

Technical specifications:

Max. stirring volume (H_20)	1.5 l
Rpm range	130 to 1400 rpm
Dimensions (W x D x H)	120 x 120 x 35 mm
Control line: Length / ∅	2 m/4 mm
Max. operating temperature	-10 to +56 °C at 100 % rh
Permissible operating temperature in water	0 to +50 °C
Weight	1 kg

Control unit Telemodul 20 C
- Microprocessor steering
- Grafic display
- Vertical mixing (shake-mode)
- 3 allocatable program keys for speedy starting of routines, the last setting at any one time will be automatically stored
- Three-stage adjustable start-up time for safe acceleration of magnetic rod
- Interval operation with freely selectable stirring and break times plus reversal of rotation direction (5 sec to 1 h)
- Four-stage adjustable nominal stirring power (25/50/75/100 %), higher power for viscous fluid volumes, reduced power for heat-free long-term operation

Technical specifications:

Constancy of speed	±1 %
Nominal stirring power	20 W
Output voltage	20 VDC
Dimensions (W x D x H)	155 x 165 x 95 mm
Safe ambient temperature	0 to +40 °C at 80 % rh
Input voltage	100-240 V, 50/60 Hz
Weight	0.6 kg

Delivery incl. Magnetic stirrer Compact 20 and control unit Telemodul 20.

Art. No.	Pack Qty.	€
EH16.1 *	1	777,00

* Longer delivery times possible. Please check with our Sales Department.

Digital 6 and 15 multipoint magnetic stirrer

- Stainless steel plate
- Digital speed display
- Constant speed, even after changes in medium viscosity
- With timer (1 to 900 sec or continuous mode) or adjustable reversing mode with opposite direction of rotation (5 to 900 sec)

Technical specifications:

Type	Digital 6	Digital 15
Magnetic stirrer drive		
Number of stirring points	6	15
Stirring capacity per stirring point (ml)	400	250
Clearance between stirring points (mm)	100	74
Speed display	LED	
Motor power: input/output (W)	3.6/3.0	9/8
Speed range (rpm)	80-1500	
Setting accuracy (rpm)	10	
Footprint per stirring point (mm)	∅ 85	∅ 64
Other		
Dimensions: W x D x H (mm)	230 x 370 x 52	
Permitted operating temperature	5 to 40 °C at 80% rel. humidity	
Weight (kg)	1.75	2.1
Power supply	100-240 V, 50-60 Hz	

Type	Art. No.	Pack Qty.	€

Digital 15 multipoint magnetic stirrer	**EHY9.1**	1	917,00

Magnetic stirrers

Multi-position magnetic stirrer POLY 15

By Thermo. Durable Cimarec-stirring mechanism. Powder-coated stainless steel housing. Digital display enables exact speed setting.
Memory function stores final settings used.
For max. 15 x 250 ml beakers or 6 x 1000 ml Erlenmeyer flasks.

Technical specifications:

Stirring points	15
Volume per stirring place	1 to 800 ml
Stirring capacity	10 W
Rpm	130 to 990 rpm
Dimensions (W x D x H)	240 x 420 x 35 mm
Ambient working temperature	-10 to +40 °C at 95 % rh
Weight	6000 g

Art. No.	Pack Qty.	€
X544.1	1	841,00

Multipoint magnetic stirrers 6 and 15

By Thermo.
Features
- With Cimarec stirring mechanism
- Stainless steel shell. Hermetically sealed.
  Shell is therefore water/dustproof, easy to clean and to service
- **Not suitable for underwater operation**
- 4-stage (5/10/15/20 watt) adjustable stirring power; higher power output for larger and viscose stirring volume, reduced power for heat-free, long-time operation
- **4-digit LED display**
- Memory function stores final settings used

Technical specifications:

Model	Multipoint 6	Multipoint 15
Number of stirring points, e.g. for	6 6 Erlenmeyer flasks 1000 ml	15 15 glass beakers 250 ml
Distance between points	130 mm	65 mm
Volume per stirring place	1 ml to approx. 3000 ml	
Rpm range:	80 to 2000 rpm	
Dimensions (W x D x H)	240 x 420 x 35 mm	
Protective system acc. to DIN 40050	IP 64	
Ambient temperature	-10 to +56 °C at 100 % rh	
Current	230 V, 50/60 Hz

RO series multi-position magnetic stirrer

By IKA. A silent-running coil drive ensures identical speeds in all stirring positions. This allows mass screenings to be performed under reproducible conditions.

- Digital speed display
- Stainless steel surface
- Stirring positions are arranged in line to make maximum use of surface area (1 x 5. 2 x 5 or 3 x 5)
- Adjustable reversing mode with change of direction (adjustable to 30/60/90/120 s)
- Eco mode for fatigue-free extended operation with reduced output (max. speed is limited to 600 rpm)

Technical specifications:

Model	RO 5	RO 10	RO 15
Magnetic stirrer drive			
Number of stirring positions	5	10	15
Max. stirring capacity per stirring position (l)	0.4		
Max. stirring capacity with other vessels (l)	2	4	6
Distance between stirring positions (mm)	90		
Speed display	LED		
Speed range (rpm)	0 to 1200		
Setting accuracy (rpm)	10		
Installation surface (mm)	120 x 470	190 x 470	280 x 470

Multi-position magnetic stirrer with heater type AM4

- Four independently controlled stirring/heating positions
- With aluminium hotplates
- Powerful motor keeps stirring speeds constant even when viscosity changes

Technical specifications:

Magnetic stirrer drive	
Number of stirring points	4
Max. stirring capacity (H_2O) per stirring position	15 l
Speed display	Scales
Speed per stirring position	50 to 1500 rpm
Heating function	
Max. temperature per stirrer/hotplate	50 to 370 °C
Heating capacity	4 x 600 W
Installation area per stirrer/hotplate	∅ 155 mm
Centre-to-centre distance between individual stirring positions	186 mm
Other	
Dimensions (W x D x H)	715 x 246 x 115 mm
Weight	8.6 kg

Multipoint magnetic stirrer with hotplate SB 162-3

By Stuart.
Equipment:

- Hotplates with aluminium/silicone alloy for uniform temperature distribution
- The stirring/heating points have independent control system
- With separate safety warning lamp for each stirrer/hotplate; lights up when hotplate temperature exceeds 50 °C

Technical specifications:

Magnetic stirrer drive	
Number of stirring points	3
Max. stirring volumes (H_2O) per stirring point	15 l
Speed display	Scales
Rpm range	100 to 1500 rpm
Heating function	
Max. temperature per stirrer/hotplate	325 °C
Heating output	3 x 700 W
Installation area per stirrer/hotplate	160 x 160 mm

Magnetic stirrers with heating RSM-10HS and RSM-10HP

- Temperature and speed adjustment via digital display (LED display)
- Digital display of nominal and actual temperature
- **Direct connection for medium temperature probe Pt 1000** (if required, please order separately)
- Fixed safety circuit of 320 °C
- Platform made of stainless steel or ceramic coated steel (optional)

Technical specifications:

Type	**RSM-10HS**	**RSM-10HP**
Magnetic stirrer drive		
Max. stirring capacity (H_2O)	3 l	
Speed range	200 to 1500 rpm	
Speed display	LED	
Speed display accuracy	10 rpm	
Motor rating input / output	5 / 3 W	
Heating function		
Hotplate material	Stainless steel	Ceramic coated steel
Temperature range	From room temperature to 280 °C	
Temperature display	LED	
Heating output	500 W	
Temperature control accuracy	±10 K	
Control accuracy with sensor probe immersed in medium (please order sensor separately)	±2 K	
Set-up area	∅ 135 mm	
Other		
Dimensions (W x D x H)	155 x 215 x 100 mm	
Weight	1.4 kg	
Power supply	200-240 V, 50/60 Hz

YK80.1	1	64,50

Rotilabo®-magnetic stirrer with heating MH 20 Digital set with integrated contact thermometer

- Temperature and speed setting via digital display
- Integrated contact thermometer with full functionality for direct control of the medium temperature up to 250 °C via Pt 100 sensor (please order accessory for fastening the sensor separately)
- Aluminium hotplate with protective coating made of ceramic
- Constant speed, even after changes in medium viscosity
- A safety warning lamp indicates temperatures above 50 °C
- Adjustable safety circuit for the hotplate temperature (50 to 370 °C)

Technical specifications:

Magnetic stirrer drive	
Max. stirring capacity (H_2O)	20 l
Speed display	digital
Max. speed	50 to 1500 rpm in steps of 10 rpm
Heating function	
Heating output	630 W
Temperature display	digital
Temperature range for hotplate	50 to 370 °C
Setting accuracy	±1 K with temperature sensor ±5 K without temperature sensor
Control accuracy with temperature sensor in the medium	±2 K
Control accuracy, temperature without sensor	±10 K
Mounting surface	∅ 155 mm
Other	
Dimensions (W x D x H)	165 x 280 x 115 mm
Weight	2.6 kg
Power supply	230 V, 50-60 Hz

Delivery incl. heating and magnetic stirrer MH 20 Digital and stainless steel temperature sensor Pt 100, ∅ 3 mm, L 250 mm.

AREC.T heating and magnetic stirrer with timer

- Digital display of heating plate setpoint temperature
- Hotplate made of white ceramic
- With elevated control panel to protect against leaking liquids
- Safety warning lamp comes on at temperatures over 50 °C
- Powerful motor keeps stirring speeds constant even when viscosity changes
- **Timer - switches the stirring and heating function off on expiration of the preset countdown**

Technical specifications:

Magnetic stirrer drive	
Max. stirring capacity (H_2O)	15 l
Speed display	Scale
Max. speed	50 to 1500 rpm
Motor power input	30 W
Heating function	
Heating capacity	800 W
Temperature range	Room temperature to 550 °C
Temperature display	LED
Setting accuracy	±5 K
Control accuracy	±10 K
Mounting surface	180 x 180 mm
Countdown function	
Timer function	1 to 999 min in 1-min increments
Other	
Dimensions (W x D x H)	203 x 344 x 94 mm
Weight	3.5 kg
Power supply	230 V, 50/60 Hz

Art. No.	Pack Qty.	€
CKK2.1	1	451,50

Heating and magnetic stirrers

US152 and UC152 series heating and magnetic stirrer

By Stuart.

Features:

- Microprocessor-controlled heating system
- Platforms are optionally available in glass ceramic (good resistance to chemicals, withstands high temperature, 120 x 120 mm heated zone) or aluminium (very rugged, 150 x 150 mm heated zone)
- A safety warning lamp indicates temperatures above 50 °C

US152 and UC152 with scale

Temperature control with LED display, colour LEDs aid reading current actual temperature.

US152D and UC152D with LED display

With digital display of actual temperature.
Operating temperature range from 5 °C and room temperature to 325/450 °C (model US152D/UC152D).
Minimum setting temperature 25 °C.
Setting accuracy/resolution: ±5 °C. Control accuracy ±10 °C.

Technical specifications:

RH series heating and magnetic stirrer

By IKA.

- With adjustable safety circuit for hot plate temperatures from 50 to 370 °C
- With DIN 12878 socket for connecting an electronic contact thermometer, e.g. ETS-D5 (please order separately, see contact thermometer), to control the medium temperature.

Additional features of RH digital

- Digital display of temperature and speed
- Error code display
- Easy operation by membrane keyboard

Technical specifications:

Type	RH basic	RH digital
Magnetic stirrer drive		
Stirring volume of H_2O (l)	15	
Motor power: input / output (W)	15/2	
Speed display	Scale	LED
Speed range (rpm)	50 to 2000	
Heating function		
Heating power (W)	600	
Temperature display	Scale	LED
Temperature range (°C)	50 to 320	
Setting accuracy (K)	-	±5
Control accuracy (K) with temperature probe in medium (please order contact thermometer ETS-D5 separately)	±0.5	
Installation surface (mm)	∅ 135	
Other		
Dimensions W x D x H (mm)	160 x 246 x 90	
Weight (kg)	2	
Power supply	220-240 V, 50/60 Hz

Magnetic stirrers with heating C-MAG HS-series

By IKA.

General information for all models

- Hotplate made of glass ceramics
- Temperature setting via digital display (LED)
- Digital display of hotplate desired temperature
- Error code malfunction indicator
- Fixed safety circuit of 550 °C
- Hot Top Indicator (Warning in case of hot surface)

Models C-MAG HS 7 and C-MAG HS 10:
Additionally has a DIN-socket 12878 for connecting to an electronic contact thermometer e.g. ETS-D5 for high-precision temperature control.

Technical specifications:

Model	C-MAG HS 4	C-MAG HS 7	C-MAG HS 10
Magnetic stirrer drive			
Max. stirring volume H_2O (l)	5	10	15
Speed indicator	Scale		
rpm-range	100 to 1500 rpm		
Motor power: Input / Output	15 / 1.5 W		
Heating function			
Heating output (W)	250	1000	1500
Temperature range (°C)	50 to 500		
Control accuracy (K)	±10		
Platform surface W x D (mm)	100 x 100	180 x 180	260 x 260
Other			
Dimensions W x D x H (mm)	150 x 260 x 105	220 x 330 x 105	300 x 415 x 105
Weight (kg)	3	5	6
Power supply	230 V, 50/60 Hz		

Type	Art. No.	Pack Qty.	€
C-MAG HS 4	**LN35.1**	1	499,00
C-MAG HS 7	**LN36.1**	1	549,00
C-MAG HS 10	**LN37.1**	1	749,00

Heater and magnetic stirrer AREX-6 digital complete set

- Heating plate made of aluminium with ceramic coating
- Clear white LED display with icons for easy identification and navigation through the menus
- Temperature and speed setting via digital display
- Integrated contact thermometer with full functionality, for direct control of the medium temperature up to 250 °C via Pt 100 sensor
- Timer function - switches the stirring and heating function off on expiration of the preset countdown
- Adjustable reversing mode with change of direction (from 5 s to 99 min, 59 x in 1s steps)
- Independent safety circuits protect the device in the event of overtemperature
- Adjustable max. temperature limit
- Probe Detector Alarm: Detects if the temperature sensor is not immersed in the medium
- Resistant cast housing (IP 42)
- Constant speed, even after changes in medium viscosity

Technical specifications:

Magnetic stirrer drive	
Max. stirring capacity (H2O)	20 l
Speed display	digital
Max. speed	30 to 1700 rpm in steps of 5 rpm
Heating function	
Heating output	600 W
Temperature range	Room temperature to 370 °C
Temperature display	digital
Setting accuracy	1 °C
Control accuracy	±1 °C
Mounting surface	∅ 135 mm
Countdown function	
Timer function	1 to 99 min in 1-min increments
Other	
Dimensions (W x D x H)	160 x 280 x 105 mm
Weight	2.6 kg
Power supply	230 V, 50/60 Hz

Delivery incl. stainless steel temperature measuring probe Pt 100 (∅ 3 mm, L 250 mm), tripod rod and holder for temperature sensor.

Art. No.	Pack Qty.	€
HLN1.1	1	648,25

Accessories for heater and magnetic stirrer AREX-6 Digital

Spare stainless steel temperature sensor Pt 100, ∅ 3 mm, L 250 mm	**EYH0.1**	1	99,90
Temperature sensor, glass-coated Pt 100, ∅ 5 mm, L 250 mm	**HLN2.1**	1	143,00
Silicone protective hood for AREX-6 Digital	**HLN3.1**	1	25,65

Magnetic stirrer with heater C-MAG HS 7 complete set

By IKA.

Magnetic stirrer with heater C-MAG HS 7

- Ceramic glass heating plate
- Temperature setting via digital display (LED)
- Digital display of set heating plate temperature
- Error code display in the event of mistake
- Fixed safety circuit of 550 °C
- Hot Top Indicator (hot surface warning)
- Bushing for connecting a contact thermometer ETS-D5

Technical specifications:

Magnetic stirrer drive	
Max. stirring capacity (H_2O)	10 l
Speed display	Scale
Speed range	100 to 1500 rpm
Motor rating input / output	15 / 1.5 W
Heating function	
Heating output	1000 W
Temperature range	50 to 500 °C
Control accuracy	±10 K
Set-up dimensions (W x D)	180 x 180 mm
Other	
Dimensions (W x D x H)	220 x 330 x 105 mm
Weight	5 kg
Electrical supply	230 V, 50/60 Hz

Contact thermometer ETS-D5:
Control of medium temperature with display of actual temperature. Bushed connection according to DIN 12878 for connecting a contact thermometer. Temperature regulation to prevent overheating.

Technical specifications:

Measuring/control range	-50 to 450 °C
Resolution	0.1 °C
Measuring accuracy	±0.2 K
Setting accuracy	±0.1 K
Control deviation	±0.5 K
Dimensions (W x D x H)	82 x 22 x 83 mm

Complete set, delivery incl.

- Heating and magnetic stirrer C-MAG HS 7
- Contact thermometer ETS-D5 incl. stainless steel temperature sensor Pt 1000
- Support rod, holding rod and boss head clamp

Art. No.	Pack Qty.	€
LY79.1	1	849,00

C-MAG HS-Digital series heater and magnetic stirrer

By IKA.

- Ceramic glass heating plate
- Large LCD display for simultaneous display of actual and nominal hot plate temperature (actual temperature display by connected temperature sensor with 0.1 °C resolution)
- Direct connectivity for Pt 1000.60 medium temperature sensor
- **Integrated contact thermometer with full functionality**
- Error code display in the event of fault
- Hot surface warning
- Safety circuit with default setting of 550 °C for hot plate temperature

Technical specifications:

Model	HS 4 digital	HS 7 digital	HS 10 digital
Magnetic stirrer drive			
Max. stirring capacity H_2O (l)	5	10	15
Motor power: power input / output (W)	15 / 1.5		
Speed display	Scale

Magnetic stirrers with heating MR Hei-Standard

By Heidolph.
Features:
- Heating power 800 W
- Max stirring volume 20 l
- Hotplate made of silumin with ceramic layer
- Independent safety circuit switches off the heating 25 °C over the preset hotplate temperature with a separate circuit
- Residual heat warning

Technical specifications:

Magnetic stirrer drive	
Max stirring volume (H_2O)	20 l
Speed range	100 to 1400 rpm
Control accuracy of speed	±2 %
Heater function	
Heating power	800 W
Temperature range	Room temperature to 300 °C
Setting accuracy	±5 K
Control accuracy temperature	±5 K
Platform size	∅ 145 mm
Other	
Dimensions (W x D x H)	173 x 277 x 94 mm
Weight	2.6 kg

Art. No.	Pack Qty.	€
HA08.1	1	625,00

Accessories:

Silicone cover	**HA09.1**	1	18,00

▶ Contact thermometer see page 1044

MR Hei-Tec and MR Hei-Connect magnetic stirrer with heating

By Heidolph.
- Digital display of hotplate set temperature and set speed
- Heating power 800 W
- Max. stirring volume 20 l
- Hotplate made of silumin with ceramic layer
- Independent safety circuit switches off the heating 25 °C over the preset hotplate temperature with a separate circuit
- **Direct connection of medium temperature sensor PT 1000 possible**. (Please order required temperature sensor and accessories for mounting the sensor probe separately).
- Integrated contact thermometer with full functionality
- Residual heat warning

Model MR Hei-Connect
- With RS 232 interface for process documentation and reproducible results
- With timer function (1 to 999 min)

Technical specifications:

Magnetic stirrer drive	
Max stirring volume (H_2O)	20 l
Rpm range	100 to 1400 rpm
Control accuracy of speed	±2 %
Heater function	
Heating power	800 W
Temperature range	Room temperature to 300 °C
Setting accuracy	±1 K
Control accuracy temperature	±5 K
Control accuracy with optional sensor in medium	±1 K
Platform size	∅ 145 mm
Other	
Dimensions (W x D x H)	173 x 277 x 94 mm
Weight	2.6 kg

Heating and magnetic stirrer RCT basic *safety control*

By IKA.

- Temperature and speed control via digital display
- Digital display of preset safe temperature limit
- Hot top indicator (warns when surface is hot)
- Adjustable safety circuit to regulate hotplate temperature (50 to 360 °C)
- Hotplate made of aluminium
- **Direct connection of medium temperature sensor PT 1000 possible**. (Please order the accessories for attaching the sensor separately).
- Integrated contact thermometer with full functionality
- DIN socket 12878 for connecting an electronic contact thermometer e.g. ETS-D5 for precise temperature control (please order separately, see contact thermometer)

Technical specifications:

Magnetic stirrer drive	
Max stirring volume (H_2O)	20 l
Motor power: input / output	16 / 9 W
Speed display	digital
Rpm range	50 to 1500 rpm
Heater function	
Heating power	600 W
Temperature display	digital
Temperature range	Room temperature to 310 °C
Setting accuracy	±1 K
Control accuracy with temperature sensor in medium (contact thermometer ETS-D5 please order separately)	PT 1000: ±1 K ETS-D5: ±0.5 K
Platform size	∅ 135 mm
Other	
Dimensions (W x D x H)	160 x 270 x 85 mm
Weight	2.5 kg

Delivery incl. protective hood and PT 1000 temperature sensor.

Heater and magnetic stirrer RCT digital

By IKA.

- Hot plate made of aluminium
- Clear display, including set-point/actual value display of temperature and speed
- Housing surface made of hardened glass for optimum cleaning and chemical resistance
- **Integrated contact thermometer with full functionality for direct control of the medium temperature**
- Detects "Sensor in medium"
- Adjustable safety circuit (50 to 360 °C)
- **Integrated timer function**
- Adjustable automatic reversal of direction of rotation (10 sec to 10 min) and pause time (3 sec to 5 min)
- **Direction of rotation of magnetic motor settable to left or right**
- Warning if surface becomes too hot
- USB/RS 232 interface

Technical specifications:

Magnetic stirrer drive	
Max. stirring capacity (H2O)	20 l
Speed range	50 to 1500 rpm in increments of 10 rpm
Speed display	LCD
Heating function	
Heating output	600 W
Temperature display	LCD
Temperature range	Room temp. up to 310 °C
Setting accuracy	1 °C
Control accuracy with temperature measuring sensor in the medium	0.5 K
Mounting surface	∅ 135 mm
Countdown function	
Timer function	99 h, 99 min and 59 sec
Other	
Dimensions (W x D x H)	160 x 270 x 85 mm
Weight	2.4 kg
Power supply	220-230 V, 50/60 Hz

Delivery incl. stainless steel temperature measuring sensor Pt 1000.60 (∅ 3 mm, L 230 mm).

Heating and magnetic stirrers with large hotplate model CB 302 and SB 302

By Stuart.

Features

- Hotplate comes either in chemically-resistant ceramic or robust aluminium
- Safety warning lamp for temperatures over 50 °C

Technical specifications:

Model	CB 302	SB 302
Magnetic stirrer drive		
Max stirring volume (H_2O)	15 l	
Speed display	Scale	
rpm range	100 to 1500 rpm	
Heating function		
Heating power	1200 W	600 W
Temperature range	Max. room temperature 450 °C	Max. room temperature 300 °C
Hotplate material	Ceramic	Aluminium
Heated area	200 x 200 mm	300 x 300 mm
Hotplate surface	300 x 300 mm	
Other		
Dimensions (W x D x H)	300 x 365 x 105 mm	
Weight	7 kg	
Power supply	230 V, 50 Hz	

Type	Art. No.	Pack Qty.	€
CB 302	**KN93.1** *	1	971,00
SB 302	**KN94.1** *	1	998,00

* Longer delivery times possible. Please check with our Sales Department.

RET control-visc safety magnetic stirrer with heater

By IKA.

Type

- Digital display of time and speed
- Straightforward TFT display for easy navigation through menus
- Temperature display resolution 0.01 °C
- Connectivity for Pt 100.70 temperature probe
- **Integrated contact thermometer with full functionality**
- Timer and countdown function
- Magnet break-off detection, intermittent mode
- USB and RS 232 ports for activation and documentation of the magnetic stirrer

pH function

- With integrated pH electrode connection (BNC socket)
- Measuring range 0 to 14 pH; resolution 0.01 pH; accuracy ±0.1 pH
- Does not include pH single-rod measuring cell (please order separately; you will find a large selection of pH electrodes with BNC connectors in the section "Measuring instruments")

Integrated weighing function

- Max. weighing range 5000 g, readability 1 g
- Linearity ±1 g

Technical specifications:

Magnetic stirrer drive	
Max. stirring capacity (H2O)	20 l
Motor rating input / output	16/9 W
Speed display	TFT
Speed range	50 to 1700 rpm
Heating function	
Heating output	600 W
Temperature display	TFT
Temperature range	Room temp. up to 340 °C
Setting accuracy	±0.1 K
Control accuracy with temperature probe immersed in medium	±0.2 K
Mounting surface	∅ 135 mm
Other	
Dimensions (W x D x H)	160 x 270 x 85 mm
Power supply	220-240 V, 50/60 Hz

Delivery incl. Pt 100.70 stainless steel temperature probe and type H 104 protective hood.

Magnetic stirrer with heating MR Hei-End

By Heidolph.

- Heater capacity 800 W
- **Digital display of speed and temperature (set- and actual value)**
- Max stirring volume 20 l
- Hotplate made of silumin with ceramic layer
- Independent safety circuit switches the heating off as soon as a pre-set temperature difference, above the set-temperature has been reached
- With display indicating residual heat when the device has been switched off until the temperature falls below 50 °C
- Comes with RS 232 interface and analog outlet
- A Pt 1000 temperature sensor can be connected directly (please order separately)
- Residual heat warning

Technical specifications:

Magnetic stirrer drive	
Max. stirring volume (H_2O)	20 l
Speed display	digital
Rpm range	30 to 1400 rpm
Control accuracy of speed	±1 %
Heating function	
Heater capacity	800 W
Temperature display	digital
Ideal for temperatures	max. room temperature 300 °C
Setting accuracy	±1 K
Control accuracy temperature	±5 K
Control accuracy with sensor in medium (with optional PT 1000)	±0.2 K
Platform	∅ 145 mm
Others	
Dimensions (W x D x H)	173 x 277 x 94 mm
Weight	2.6 kg

Contact thermometer ETS-D5

By IKA.

- For all magnetic stirrers with contact thermometer terminals according to DIN 12878
- Temperature control overheating
- Different control modes (= operating modes) can be selected

Technical specifications:

Temperature	
Temperature measuring range	-50 to 450 °C
Resolution	0.1 °C
Accuracy	±0.2 K
Setting accuracy	0.1 K
Standard tolerance	±0.5 K
General specifications	
Dimensions without sensor (W x D x H)	82 x 22 x 83 mm
Current	230 V, 50 Hz

Delivery incl. stainless steel sensor Pt 1000 type H 67.60 (L 260 mm, ∅ 3 mm) and connector cable. Please order the accessories for attaching the contact thermometer separately.

Stirring magnet fish-clip® holders

Ideal for stirring sensitive liquids such as cell suspensions or tissue cultures. Magnet is placed into vessel with the flexible rotor clamp and can be fixed over the vessel base at the required height. When the magnetic stirrer is switched on the rod magnet will turn with controlled movements, protecting the substance and vessel. The support rod does not turn and the stopper remains gastight.

- Rotor and support rod made of PVDF
- Support rod: length 250 mm, ∅ 10 mm
- Stable to 160 °C, autoclavable

Delivery incl. magnetic follower.

Type	Art. No.	Pack Qty.	€

Roti®-Speed-stirrer

For universal use, e.g. for stirring even the smallest samples in reaction vials etc.

- Ergonomic pen handle
- High-quality steel spring chuck and quality ball bearings for perfectly smooth operation
- Locking button enables easy changing of tools
- **Speed infinitely adjustable from 5000 to 20 000 rpm**
- Powerful motor for constant torque
- Length 220 mm, weight 230 g
- Complete with mains adapter in portable case
- **Please order stirring apparatus separately!**

③ Stand set for RSO series laboratory stirrers

With locknut to additionally secure the stand rod and prevent accidental removal. Chucking capacity of cross sleeve for stand and extension arm: 4 to 24 mm. Max. weight load: 5 kg.
Dimensions: W 200 x D 310 x H 800 mm.
Delivery incl. stand plate, stand rod, cross sleeve and immersion limiter to prevent accidental piercing of the vessel base.

NEW

Hei-TORQUE core stirrer

By Heidolph. Suitable for low- to medium-viscosity media.
Digital target/actual speed display.
Timer function (1 s to 99 h, 59 min and 59 s).
"Max button" for short-term operation at maximum speed.
"Quick-Chuck" with clamping range from 0.5 to 10.5 mm.

Technical specifications:

Stirring capacity (H_2O)	25 l
Max. viscosity	10,000 mPa · s
Motor power: input/output	105/75 W
Max. torque at the stirrer shaft	40 N · cm
Speed range	20 to 2000 rpm
Speed display	TFT display, monochrome, 2"
Extension arm ∅/length	13 x 160 mm
Dimensions W x H x D	70 x 281.5 x 195 mm
Weight	2.3 kg
Power supply	100–240 V, 50/60 Hz

Delivery without stirring tool, stand and boss head
(please order separately – see stirrer accessories).

EUROSTAR 20-series electronic laboratory stirrers

By IKA. A microprocessor controlled system ensures that a constant speed is maintained. Electronic safety circuit for shutting off device in case of fault or overload. Discrepancies between nominal and actual speeds are corrected automatically and continuously. For constant speed even with changes in medium viscosity.

- Digital speed display
- Continuously variable speed
- Push-through stirrer shafts
- Chuck tensioning range 0.5 to 10 mm (EUROSTAR 20 digital only)
- EUROSTAR 20 high speed digital: drive shaft with tapered seat for supplied precision stirrer shaft R 6000 (L 280 mm, max. immersion depth 220 mm). Special precision stirrer is separately available.

Technical specifications:

Model	**① EUROSTAR 20 digital**	**② EUROSTAR 20 high speed digital**
Stirring volume of H_2O (l)	15	20
Max. viscosity (mPa · s)	10000	
Motor power: power input / output (W)	56/44	171/133
Max. torque at the stirrer shaft (N· cm)	20	
Speed range (rpm)	30 to 2000	150 to 6000
Speed display	LED	
Extension arm ∅ / length (mm)	16/220	
Dimensions W x D x H (mm)	86 x 208 x 248	86 x 208 x 325
Weight (kg)	4.4	5.3
Power supply	230 V, 50/60 Hz	

Delivery without stirring tool, stand and sleeve
(please order separately - see Stirrer accessories).

EUROSTAR 60/100 control electronic laboratory stirrers

By IKA. **With removable remote control and digital TFT display.**
A microprocessor controlled system ensures that a constant speed is maintained. **Integrated torque trend indicator** measures the change in viscosity of the sample. Electronic safety circuit for shutting off device in case of fault or overload. Discrepancies between nominal and actual speeds are corrected automatically and continuously.
For constant speed even with changes in medium viscosity.

- Programmable functions, e.g. start/stop function (adjustable up to 9 h, 59 min, 59 sec)
- **Integrated temperature measurement function (a temperature sensor is required to display temperatures, please order separately)**
- Intermittent mode (adjustable up to 59 min, 59 sec)
- Timer (adjustable up to 99 h, 59 min, 59 sec)
- Continuously variable speeds
- Push-through stirrer shafts
- With RS 232 port and USB port
- Chuck tensioning range 0.5 to 10 mm

Technical specifications:

Model	EUROSTAR 60 control	EUROSTAR 100 control
Stirring volume of H_2O (l)	40	100
Max. viscosity (mPa · s)	50000	70000

Agitator types

Anchor agitator: Reduced deposits on the vessel wall. Tangential stream with high shear rate. Suitable for semi-fluid mediums (medium to high viscosity).

Dissolver agitator: Radial stream. High turbulence and shear forces. For use at medium to high speeds.

Surface agitator: Less turbulence. Gentle handling of the product. For use at low to medium speeds.

Half-moon agitator: The semi-round shape of the agitator blade is ideally suited to agitating in round-bottomed flasks, the tip function makes it easy to insert the agitator shaft into vessels which have been ground or have a narrow neck. Suitable for agitating liquids with low to medium viscosity. For use at medium speeds.

Propeller agitator: Standard agitator. Axial direction. For mixing mediums with low to medium viscosity. Ideal for homogenising and suspending.

Centrifugal agitator: Double-leaf; thanks to the moveable agitator leaf, the agitator shaft can be easily inserted into the vessels with a narrow neck. The leaves open when the speed increases. For use at medium to high speeds.

S2-series H-stands

S2 and S2 XXL models
Made of V2A. The support rod is additionally secured with a nut which prevents it from being unscrewed accidentally. Support rod ∅ 25 mm. With levelling screw. Max. weight load: 4 kg.

Tele S2 model
same as S2 and S2 XXL but with retractable support rod variable in length from 725 to 1025 mm. Support rod ∅ 32 mm.

Stirring blades made of high-grade steel

Encased in PTFE. Stirrer is completely made of PTFE. High-grade steel core provides for the required hold in the spring chuck of stirrer. Stirring unit and blade are firmly attached together: will not be separated in the rotating media once stirrer has been switched off. As the stirred materials only have contact with PTFE, the stirring blades are almost totally chemical-resistant and are stable during high temperature operations. **Stirring blades are similar to (KPG) glass blades and can be replaced by them. With tapered collet, for easier clamping of stirrer shafts.**

Flexible glass agitator coupling

For stirring in glass apparatus with KPG-stirrers. Counterbalances any inexactness in assembly. An exact alignment of agitator motor and shaft is unnecessary. Operates as an elastic link between laboratory stirrer and agitator shaft. Ideal for motor shafts with 8 to 10 mm chucking capacity and stirring tools with ∅ 8 to 10 mm shaft.

Art. No.	Pack Qty.	€
KL60.1	1	104,85

All-purpose stirrer plugs

For round flasks. Glass part made of borosilicate. Liner, sealing and pressure screw made of PTFE. Mostly chemical and temperature stable. Reliably leakproof, even during long-term use. Total length 140 mm. Patented under DE 35 12 647. Can be used without lubricant.

Flock testers AL-series

By Aqualytic. For various applications, e.g. for testing the effectiveness of flocculants and precipitants.

AL30 analog
- Accommodates 4 low form beakers up to 1000 ml in size
- Portable, for mobile use
- Stirring points are arranged in a circle around a lamp
- Switchable centre column light (OFF/ON)
- Speed and time adjustment by rotary knob
- Height adjustment of the stirrer blades during operation
- **Delivery incl.** 12-V adapter (for the cigarette lighter) and mains adapter

AL40 and AL50
- Accommodates 4/6 low or high form beakers up to 1000 ml in size
- Illuminated back panel for glare-free sample observation
- Switchable backlight (OFF/ON)
- Continuously variable stirring speed
- Digital rpm and timer display
- Height adjustment of the stirrer blades during operation
- **Delivery incl.** mains adapter

Technical specifications:

Type	AL30 analog	AL40	AL50
Number of stirring points	4	4	6
Speed range	20-40-50-100-120 rpm	10 to 300 rpm / continuous operation	
Timer	0 to 30 min / continuous operation	0 to 999 min / 0 to 99 h / continuous operation	
Dimensions L x W x H (mm)	250 x 320 x 250	645 x 347 x 260	935 x 347 x 260
Weight (kg)	4.9	13	17
Power supply	100-240 V, 50/60 Hz		

Delivery without beakers, please order separately.

Flocculator SW6

By Stuart. For reproducible analysis of flocculation conditions during sewage water treatment.

- **For simultaneous treatment of 6 samples in beakers up to 1000 ml**
- Uniform adjustable stirring speed for similar conditions on all sampling areas
- Digital-display for speed and time
- **With timer-function**
  Acoustic alarm indicates end of set time and all stirring units are switched off. The timer then counts the minutes from when the agitor blades stand still
- The stainless steel agitor blades can be adjusted in height during the run
- The device has an illuminated base and black rear wall for antiglare and high-contrast observation of samples
- **Memory-function stores 2 parameter-combinations of speed and time**

Technical specifications:

Number of stirring places	6
rpm range	25 to 250 rpm
Timer function	0 to 99 min /continuous run
Output	200 W
Dimensions (W x D x H)	750 x 210 x 460 mm
Weight	17 kg
Current	230 V, 50 Hz

Delivery without beakers, please order separately.
Devices for simultaneous addition of reagents and flocculators is also available.

T 18 digital ULTRA-TURRAX®-dispersing system complete set

By IKA.
Dispersing system T 18 digital ULTRA-TURRAX®
High-speed dispersing system. Additional speed range enables working at high peripheral velocity.
- With digitised speed display
- Compact, slim form

Technical specifications:

Motor capacity: input / ouput	500 W / 300 W
Speed adjustment	progressively adjustable
rpm range	3000 to 25 000 rpm
Speed display	LED
Dimensions (W x D x H)	87 x 106 x 271 mm
Weight	2500 g
Protective system in acc. with DIN 40050	IP 20
Current	220-240 V, 50/60 Hz

Dispersing tool S 18 N - 19 G
Technical specifications:

Operative range	10 to 1500 ml
∅ stator	19 mm
∅ rotor	12.7 mm
Materials touching product	PTFE, AISI 316L

Complet set delivery incl.
- Ultra Turrax®
- Extension rod and dispersing tools S 18 N - 19 G
- Boss head and stand must be ordered separately

Dispersing System ULTRA-TURRAX® T 25 digital

By IKA.
High-performance dispersing system with a wide field of application.
Examples of application:
For producing emulsions and dispersions, for homogenizing sewage samples and for sample preparation.
- Workable volume (H_2O): 1 to 2000 ml
- Infinitely variable speed setting
- **With digital speed display**

Technical specifications:

Motor power: reception / delivery	700/500 W
rpm range	3000 to 25 000 rpm
Speed display	digital
Dimensions (W x D x H)	87 x 106 x 271 mm
Weight	2.5 kg
Mains connection	220-240 V, 50/60 Hz

Delivery incl. ULTRA-TURRAX® T 25 digital with extension rod (L 175 x ∅ 13 mm). Please order dispersing tools, boss head, and stand separately.

NEW

ULTRA-TURRAX® T 25 easy clean digital dispersion unit

By IKA.
Application: homogenising samples, emulsifying cosmetics or suspending paints.

- Processing volume (H_2O): 1 to 2000 ml
- Brushless motor with low noise level
- Continuous speed adjustment
- With digital speed display
- Integrated timer function (max. 1 s to 99:59 h)
- Special tools available for quick and easy cleaning of the dispersion tools (only S 25 EC-C-18G-ST)
- USB interface

Technical specifications:

Motor rating (input/output)	500/400 W
Speed range	3000 to 25,000 rpm
Speed display	LED
Dimensions (W x D x H)	89 x 161 x 270 mm
Weight	4.5 kg
Power supply	220-240 V, 50/60 Hz

Delivery incl. ULTRA-TURRAX® T 25 easy clean digital with extension arm (L 175 x ∅ 13 mm).
Please order dispersion tool, sleeve and stand separately.

Compact Ultrasonic Processors UP50H and UP100H

By Hielscher.
- Small, compact ultrasonic processors
- Application range: ultrasonic processingor homogenizing of liquids and disintegration of cells
- With pulse switch for temperature sensitive samples
- Useable as hand or stand unit (please order stand separately)

Technical specifications:

Model	UP50H	UP100H
For vol. max. (ml)	200	500
Output (W)	50	100
Working frequency	30 kHz, is regulated automatically	
Power regulator	Amplitude 20 to 100 %, infinitely variable	
Pulse range	10 to 100 % per seconde, infinitely variable	
Dimensions L x W x H (mm)	180 x 130 x 50	
Protection	IP 40	
Weight (g)	800	
Power supply	230 V, 50/60 Hz	

Delivery incl. unit with case and stand holder for stand with ∅ 16 mm, without sonotrode (please order separately).

Type	Art. No.	Pack Qty.	€

Ultrasonic homogenizers SONOPULS-series

By Bandelin.
Application: Cell disruption, homogenizing, emulsifying, suspending, process acceleration, sonochemistry and degassing.
- LED-display for pulsation, time as well as actual value display of the amplitude
- Amplitude setting range: 10 to 100 %
- Ultrasonic operation modes: Continuous or pulsating (for temperature-sensitive samples); Pulse range 10 to 100 %, can be saved
- Continuous run or timer operation (adjustable 1 s to 99 min; can be saved)
- Operating frequency 20 kHz constant sound
- Outlet supply: 230 V, 50/60 Hz

Technical specifications:

Model	SONOPULS HD 2070-set	SONOPULS HD 2200-set
For volume to	50 ml	900 ml
Max. HF-power	70 W	200 W
Scope of delivery	• Generator • Ultrasonic transformer • Graduated horn SH 70 G • Micro tip MS 73, ∅ 3 mm	• Generator • Ultrasonic transformer • Booster horn SH 213 G • Titan plate TT 13, ∅ 13 mm

Please order support frame separately.

Digital ultrasonic disintegrator UP200Ht

By Hielscher.
Applications: sample preparation, homogenisation, dispersion, disagglomeration (e.g. nanoparticles), emulsification, lysis and cell disruption, extraction, degassing and sonochemistry.

- Use as handheld device or mounted on a stand
- Colour touch display and digital setting and monitoring functions
- Amplitude or power output control
- Countdown function: 0.1 sec to 99 d
- Automatic data storage on integrated SD card reader in 100 ms cycles; records amplitude, power output, time and temperature
- Temperature range monitoring: acoustic irradiation is interrupted if the medium temperature is above or below the setpoint
- Operation and monitoring via LAN cable, i.e. a browser can be used for display and remote control (no need to install software on PC)
- With LED sample illuminator
- Protection against dry running

Technical specifications:

Output	200 W
Operating frequency	26 kHz
Power output control	Amplitude 20 to 100 %, continuously variable in 1 % increments
Pulse range	10 to 100 % per second, in 0.1 sec increments, 100 % = continuous duty
Temperature display (with connected sensor)	-50 to +200 °C
Dimensions (W x H x D)	300 x 190 x 90 mm
Weight	1.4 kg
Power supply	100 to 240 V, 50/60 Hz

Delivery incl. carry case, boom arm (L 200 x ∅ 12 mm), cross clamp, 3 m network cable, 1 GB SD/USB combo card and Pt 100 temperature sensor. Please order sonotrodes and stand separately.

Cell disruptors Disruptor Genie® analog and digital

By Scientific Industries. Suitable for a variety of homogenization processes of yeast cells, bacteria, plant and animal tissue and pellet resuspensions using glass beads (please order separately), or anything that requires extremely violent high-speed agitation.

Disruptor Genie® analog
- With fixed set speed
- Timer: 0 to 15 minutes or continuous operation

Disruptor Genie® digital
- With variable speed control
- Timer: 0 to 99 min or continuous operation
- After 10 minutes, the mixer switches to "sleep"-mode

Technical specifications:

Type	Disruptor Genie® analog	Disruptor Genie® digital
Speed range	2850 rpm	Adjustable from 1000 to 2850 rpm
Speed display/timer	- / scale	digital / digital
Time range	0 to 15 min	0 to 99 min
Dimensions (L x W x H)	165 x 122 190 mm	
Weight	4.5 kg	
Electrical supply	230 V, 50/60 Hz	

Delivery incl. TurboMix®-holder and mount for 12 microcentrifuge tubes 1.5/2.0 ml. Glass beads please order separately.

Tissue	1.0

BeadBeater®

For rapid, efficient and safe cell disintegration.

Method of operation:
A fast running impeller wheel accelerates the movement of small beads in a specially formed vessel to a very high speed. The system is completely hermetically sealed and allows no air to enter into the sample, preventing harmful aerosols from forming. The unit is easy-to-use and maintenance free. The beads precipitate within a few seconds and can be reused.

- Suitable for sample volume max. 100 g (wet weight) in 200 ml media
- Ideal for sensitive proteins and enzymes

Delivery incl. 350 ml vessel made of PC. Beads please order separately.

BagMixer® 400-series

By Interscience. The Bag Mixer® ensures safe and easy separation of bacteria from solid samples. A sterile plastic bag is added together with the closed sample and a diluent into the Bag Mixer®. For most samples 30 to 60 seconds mixing is sufficient. The filtrate can then be removed with a pipette and analysed immediately without any danger of changing or contamination. Housing and mixing chamber are made of rustproof stainless steel.

BagMixer® 400 P
- With stainless steel flap
- Preset speed (8 strokes/s)
- Adjustable mixing time: 30 to 210 sec or permanent run

BagMixer® 400 W
- With glass flap made of armour plate glass
- Preset speed (8 strokes/s)
- Adjustable mixing time: 30 to 210 sec or permanent run
- **Delivery incl**. drip pan

BagMixer® 400 CC
- With glass flap made of armour plate glass
- LCD display indicates mixing time and speed
- Variable speed setting: 4, 6, 8 or 10 strokes/s
- Adjustable mixing time: 1 sec to 1 h with count-down display or permanent run
- With additional indicator display for mixing blade intensity
- Distance between mixing blades and door can be adjusted for better results
- **Delivery incl.** drip pan

Technical specifications:

Capacity	50 to 400 ml
Dimensions (L x W x H)	420 x 260 x 265 mm
Weight	16.5 kg
Current	220/110 V, 50/60 Hz

Note: stainless steel rack can only be used in combination with closure clips (please order separately).

Type	Art. No.	Pack Qty.	€
① BagMixer 400 P	**KL16.1** *	1	1859,75
② BagMixer 400 W	**T211.1** *	1	2320,95

Accessories for homogenizers

Homogenizing bags

Sterile. Whirl-Pak® made of PE for use with homogenizer (Stomacher® 400 circulator, Bag Mixers®). Thickness: 100 µm. With labelling area and filter. A third layer of finely perforated PE enables solids to be separated when used in homogenizers.

Type	Art. No.	Pack Qty.	€
Homogenizing bags W 150 x H 230 mm	**P310.2**	250	219,30
Homogenizing bags W 190 x H 300 mm	**P311.2**	250	273,05

BagMixer® 400 S / SW lab blenders

By Interscience. Effective mixing of solid or liquid samples in laboratory blender bag. Optimal microorganism extraction. Sample material is quickly prepared for analysis without complex cleaning.

General specifications of both models
- Digital display of speed and time
- Adjustable mixing intensity
- Removable pedals
- 4 adjustable speeds: 4, 6, 8, 10 impacts/sec
- Adjustable mixing time: 1 to 59 minutes or continuous operation
- LightCode System: colour LED light under the door indicates the mixing status (green: mixing operation finished; orange: active mixing operation)
- LED interior light
- Integrated drip pan
- Low noise (approx. 48 dB)

② **SW model**
- Window flap with double glazing
- LiquidSensor: mixing stops immediately and automatically if a leak is detected by the sensor

Technical specifications:

Capacity	50 to 400 ml
Dimensions (W x D x H)	290 x 450 x 37 mm
Weight	26 kg
Power supply	110-240 V, 50/50 Hz

Type	Art. No.	Pack Qty.	€

Homogeniser bag stand BagOpen®

For opening and holding bags.
For single 400 ml bags. Self-adhesive pads adhere to the outer walls of the bag and to the side walls of the stand and hold the bag open. Reduces risk of sample contamination.
Dimensions: W 80 x D 150 x H 250 mm.
Delivery incl. 2 adhesive pads.

Art. No.	Pack Qty.	€
XX17.1	1	117,20

Stomacher® 400 circulator

By Seward.
Ideal for extracting, mixing, homogenizing or dispersing.
Capacity 80 to 400 ml. The Stomacher® 400 circulator is indispensible in the laboratory when preparing and blending food samples and other substances for analysis. The sample and diluent are placed into the machine in a sealed plastic bag. The bag is held securely in the unit during treatment. There is no contact between the sample and machine. This eliminates any danger of contamination. With regard to hygiene, security and general efficiency the Stomacher® 400 circulator compares well with other units, which must be cleaned or even sterilized after use. Blending takes only 30 seconds for most substances.

Procedure:
Two reciprocating paddles beat against the bag repeatedly and press its contents against the door. This quiet and yet powerful movement distributes the sample quickly so that the extraction of soluble substances and the detection of even deep-seated micro-organisms is easier than when using standard blending processes.The sample can be removed from the bag with a pipette after blending. The Stomacher® 400 circulator can be reused again immediately.

Special Characteristics:
- Control panel: keyboard and LCD display
- Count Down display indicates processing
- User-defined speed and time setting
  - 3 programs can be stored for easier operation
  - Setting possibilities:
  1.) Paddle speed (rpm: 200/low, 230/normal, 260/high)
  2.) Time (from 1 sec to 99 min and 59 sec)
- Durable and robust aluminium casing

Dimensions: W 350 x D 335 x H 280 mm. Weight 23 kg.
Power supply 220 V, 50 Hz

Delivery incl. 1000 homogenizing bags standard.

Type	Art. No.	Pack Qty.	€
Stomacher® 400 circulator	**H453.1** *	1	4830,00
Rack for 10 Stomacher® bags	**H454.1** *	1	167,70

A 10 basic analysis mill

By IKA. Comminutes hard, brittle materials, as well as soft and fibrous materials. Integrated cooling water connections (for hoses with an inner ∅ of 8 mm). A choice of stainless steel beaters and a cutter that can be swapped depending on the material to be comminuted.
Can only be operated with the lid closed.

- Digital timer (can be set to between 1 sec and 5 min) that shows the comminuting time
- Interval function (if the timer function has been activated, the equipment runs for 15 sec and then stops for 1 sec, repeating this pattern until the set time has elapsed)

Technical specifications:

Usable volume	50 ml
Power: Consumption/output	300/240 W respectively
Max. duty time	5 min on/10 min off
Max. speed (fixed)	25,000 rpm
Max. circumferential speed	70 m/sec
Max. feed size	6 mm (impact grinding) 10 mm (cutting)
Grinding chamber can be cooled by	Water: Yes Dry ice: Yes Liquid nitrogen: No
Dimensions (W x D x H)	130 x 145 x 250 mm
Weight	2.9 kg
Power supply	220-240 V, 50/60 Hz

Delivery incl. ① A 10.1 stainless steel beater (stainless steel 1.4034) suitable for most brittle materials up to a Mohs hardness of 5 and A 10.4 grinding chamber reducer (stainless steel 1.4301) for small sample material volumes.

Art. No.	Pack Qty.	€
EEA9.1	1	1749,00

Accessories for A 10 basic analysis mill

By IKA.

② **A 10.3 carbide beater**
Made from tungsten carbide for relatively hard materials up to a Mohs hardness of 9.

Art. No.	Pack Qty.	€
EEC0.1	1	235,00

③ **A 10.2 star-shaped cutter**
For fibrous materials such as paper and plant material, as well as plastics, including material with a low specific weight.

EEC1.1	1	127,00

Mohs' hardness scale
Designation of degree of hardness of minerals, metals and other products at different hardness stages. Each stage is marked by a reference mineral.

1 Mohs	talc	6 Mohs	feldspar
2 Mohs	gypsum	7 Mohs	quartz
3 Mohs	calcite	8 Mohs	topaz
4 Mohs	fluorspar	9 Mohs	corundum
5 Mohs	apatite	10 Mohs	diamond

A11 basic analysis mill

By IKA. Batch mills with two milling processes:
- **Impact milling of hard, brittle grinding material** with a stainless steel beater up to max. Mohs' hardness scale 6 (beater is included in delivery)
- **Blade milling of soft, fibrous grinding material** with a cutting knife (not included in delivery)

Damp and sticky process materials can be ground with addition of water. A standard grinding beaker made of ETFE, fiber-glass reinforced with stainless steel inlet (AISI 316L), effective volume 80 ml is included in the delivery. This enables you to embrittle the grinding material with liquid nitrogen directly in the grinding chamber.

Technical specifications:

Capacity: input / output	300 / 160 W
Max. operating time	Short-time service (KB 1/10): 1 min ON / 10 min OFF
On-load speed	19 500 rpm
No-load speed	28 000 rpm
Peripheral speed	53 m/s
System of protection	IP 43
Dimensions (W x D x H)	85 x 85 x 240 mm
Weight	1500 g
Mains supply	230 V, 50/60 Hz

La Moulinette XXL blender

Blends foods such as meat, nuts, herbs and vegetable samples within just a few seconds.

- Motor power 1000 W
- Easy to operate - to blend samples, simply push down the lid about three times
- Total capacity 550 ml, capacity of blending container 300 g
- Cover for processing viscous foods
- Transparent container for monitoring food preparation
- Cable storage compartment
- Dimensions: W 194 x H 353 x D 194 mm
- Weight 2.8 kg
- Mains connection 230 V, 50 Hz

Art. No.	Pack Qty.	€
CCE4.1	1	120,40

Universal mixer RBB pro

For milling, mixing and emulsifying.

Features:

- 3 adjustable speeds (4000, 8000 and 14000 rpm)
- **Power consumption 550 W**
- Stainless steel motor housing, chrome plated
- Safety control system: motor only runs when lid is closed
- With soft start feature (prevents liquids from splashing up after switching on)
- With overload/overheating safety cut-out
- With pulse function, for stirring briefly
- Blending beaker is impact resistant and dishwasher safe, capacity 2 l
- Dimensions total: H 493, ∅ 190 mm
- Dimensions of mixer attachments: H 265 x W 182 mm
- Power supply: 230 V, 50 Hz

Delivery incl. specified blending beaker and lid with hole for adding ingredients.

Type	Art. No.	Pack Qty.	€
Universal mixer with polycarbonate beaker	**PT04.1**	1	848,20
Universal mixer with stainless steel beaker	**PT05.1**	1	1056,75

Laboratory universal mixer with type RMBL sound protection hood

For reducing, mixing and emulsifying.

Features:
- 6 speed settings
- Version with protective hood for noise reduction and increased safety in the laboratory
- 12 storable cycles for automatic processing (max. cycle duration 30 min, time is determined by current mixing operation)
- Pulse function
- Stainless steel motor base
- Thermal circuit breaker

Technical specifications:

Power requirement	900 W for continuous operation
Speed settings	1300, 3500, 6000, 8700, 12 000 and 16 000 rpm
Dimensions	W 225 x D 265 x H 495 mm
Weight	app. 10 mm
Power supply	230 V, 50 Hz

Delivery incl. sound protection hood. Without mixing attachment (please order required mixing attachment separately).

Art. No.	Pack Qty.	€
CYX5.1	1	1515,75

Mixing attachments for universal mixer RMBL

Cutter head type "Laboratory":
Made of stainless steel. For ultra fine processing and low quantities.

Cutter head "High-Power":
Made of stainless steel. 4 blades shaped for optimal stirring, intensive and quick processing, as well as crushing ice cubes.

Type	Art. No.	Pack Qty.	€
125 ml glass attachment incl. laboratory cutter head	**CYX6.1**	1	276,30
250 ml glass attachment incl. laboratory cutter head	**CYX7.1**	1	285,60
500 ml glass attachment incl. laboratory cutter head	**CYX8.1**	1	422,50
1000 ml glass attachment incl. laboratory cutter head	**CYX9.1**	1	459,05
2000 ml polycarbonate attachment incl. High-Power cutter head	**CYY0.1**	1	183,85
2000 ml stainless steel attachment incl. High-Power cutter head	**CYY1.1**	1	378,40

Universal mixer GK 900 W

For thorough reducing, mixing and emulsifying.

Features
- Infinitely adjustable from 1000 to 17 000 rpm
- **Power consumption 900 W**
- Die cast zinc motor housing, chrome-plated
- With soft start (prevents liquid from splashing up after switching on)
- Safety control: motor only runs lid is attached
- With overload and overheating protection
- Motor block dimensions: height 226 mm, ∅ 190 mm
- Power supply: 230 V, 50/60 Hz

Choice of four different mixing beakers:
- 4 l polycarbonate attachment. Dimensions: W 300 x H 280 mm
- 2 l polycarbonate attachment. Dimensions: W 240 x H 280 mm
- 4 l stainless steel attachment. Dimensions: W 290 x H 300 mm
- 2 l stainless steel attachment. Dimensions: W 230 x H 280 mm

Type	Art. No.	Pack Qty.	€
Universal mixer with 4 l polycarbonate beaker	**X534.1**	1	1363,10
Universal mixer with 2 l polycarbonate beaker	**CYX3.1**	1	1170,70
Universal mixer with 4 l stainless steel beaker	**CYX4.1**	1	1548,00
Universal mixer with 2 l stainless steel beaker	**X535.1**	1	1363,10

Test tube shaker lab dancer

By IKA. For mixing small sample amounts via touch function.
- For small tubes with a ∅ of up to 30 mm such as test tubes, centrifuge tubes and vials
- With preset rpm of 2800 rpm

Technical specifications:

Shaking movement	Rotary
Shaking lift	4.5 mm
Speed range	2800 rpm
Max. shaking volume	1 test tube 50 ml
Motor power: Input / output	1.2 / 0.8 W
Dimensions (W x H x D)	100 x 70 x 110 mm
Weight	550 g

Delivery incl. wall power supply 12 V.

Art. No.	Pack Qty.	€
AN62.1	1	299,00

Vortexer, small shakers

NEW

Rotilabo® Mini Vortex test tube shaker

Made from ABS and silicone materials. Specially designed for low space requirements and mixing small sample quantities by means of a touch function.

- For small containers with a diameter of up to 30 mm such as test tubes, centrifuge tubes, reaction vials, etc.
- With fixed speed setting of 4500 rpm
- Quiet operation with good mixing effect

Technical specifications:

Shaking motion	Circular, vibrating
Shaking stroke	6 mm
Speed range	4500 rpm
Dimensions (W x H x D)	110 x 75 x 130 mm
Weight	0.9 kg
Power supply	100-240 V, 50/60 Hz

Delivery incl. plug-in power supply 12 V and two standard silicone attachments.

Art. No.	Pack Qty.	€
HXH6.1	1	99,15

Rotilabo®-vortex mixing adapters

For 1.5 ml microcentrifuge tubes. Ideal for all vortex or test tube shakers with rubber plate or mounting device for test tubes. Features solid shaft with affixed round plate for holding microcentrifuge tubes.
A second movable plate prevents the tubes from falling out.
Shaft length 165 mm with rounded grip (∅ 25 mm) on top end.

Design	Art. No.	Pack Qty.	€
For 8 micro-centrifuge tubes	**L660.1**	1	121,50
For 20 micro-centrifuge tubes	**L661.1**	1	137,60

RS series test tube shakers

General information for both models
For mixing small sample quantities in test tubes, centrifuge tubes, reaction vials etc.

- Continuous / touch operation
- Robust housing design
- Slip-resistant silicon feet

RS-VF 10
With fixed speed of 2500 rpm

RS-VA 10
With variable speed control from 0 to 2500 rpm

Technical specifications:

Type	RS-VF 10	RS-VA 10
Shaking motion	circular, vibrating	
Shaking stroke	4 mm	
Speed range	2500 rpm	0-2500 rpm
Dimensions (W x H x D)	127 x 160 x 130 mm	
Weight	3.5 kg	
Mains connection	220-230 V, 50 Hz	

Delivery incl. standard attachment for test tubes and small containers.

Type	Art. No.	Pack Qty.	€
RS-VF 10	**PX87.1**	1	133,30
RS-VA 10	**PX88.1**	1	165,55

Accessories for RS series test tube shakers

One-hand attachment, large
For single-handed shaking of Erlenmeyer flasks, bottles etc.
With rubber mat (∅ 99 mm).

Art. No.	Pack Qty.	€
PX89.1	1	34,40

Vortexer, small shakers

Test tube shaker with infrared sensor type ZX4

- IR sensor mode or continuous duty is selectable
- When the non-contact IR sensor is activated, the test tube shaker starts the typical vortex movement at the previously set speed as soon as a test tube is detected in the immediate vicinity
- Rugged housing with non-slip feet

Technical specifications:

Shaking motion	Circular, vibrating
Shaking stroke	4.5 mm
Speed range	0 to 3000 rpm
Dimensions (W x D x H)	150 x 165 x 130 mm
Weight	2.7 kg
Mains voltage	100 to 240 V, 50/60 Hz

Delivery incl. standard attachment for test tubes and small vessels.

Art. No.	Pack Qty.	€
ACN9.1	1	177,40

Accessories for test tube shaker type ZX4

① **Attachment for 19 1.5/2.0 ml reaction vials**

Art. No.	Pack Qty.	€
ACP0.1	1	39,05

② **Attachment for 5 sample vials ∅ 16 mm**

Art. No.	Pack Qty.	€
ACP1.1	1	39,05

Art. No.	Pack Qty.	€
ACP2.1	1	47,65

Vortex mixer with multifunctional attachment

Suitable for continuous or intermittent operation, with touch function, activated by applying pressure to the shaker attachment.

- With multifunctional attachment for six different vial types and a microtiter plate:
  2 x 50 ml centrifuge vials (horizontal loading)
  2 x 15 ml centrifuge vials (horizontal loading)
  4 x 1.5/2.0 ml reaction vials (vertical loading)
  6 x 0.5 ml reaction vials (vertical loading)
  24 x 0.2 ml reaction vials (vertical loading)
  2 x 5 ml reaction vials (horizontal loading)
  1 x microtiter plate

- A standard attachment for single-handed shaking of test tubes and vials is also integrated in the multifunctional platform
- Speed adjustment in 3 stages
- Attachment can be removed for cleaning

Technical specifications:

Shaking motion	Circular, vibrating
Shaking stroke	3.7 mm
Speed range	1000, 2000 or 3000 rpm
Dimensions (W x H x D)	171 x 197 x 190 mm
Weight	4 kg
Power supply	220 to 240 V, 50/60 Hz

Art. No.	Pack Qty.	€
CNH7.1	1	225,75

▶ Stands for centrifuge tubes see page 237

Vortexer, small shakers

Shaker Vortex Genie® 1

By Scientific Industries.

- Robust construction with high stability
- For speedy and intensive mixing of samples
- Unit starts automatically at maximum speed by pressing down the holder, thus reducing the vortex time

Technical specifications:

Shaking motion	rotary
Speed max.	2700 rpm
Safe ambience conditions	-0 to +38 °C at 95 % rh
Dimensions of unit (L x W x H)	165 x 122 x 190 mm
Weight	4.0 kg
Current	230/240 V, 50 Hz

Delivery incl. standard holder (Inner-∅ 25 mm) for one-handed shaking of test tubes, sample vials and centrifuge tubes.

Art. No.	Pack Qty.	€
AH32.1	1	315,00

Accessories for shaker Vortex Genie® 1

By Scientific Industries.

Shaker dish (∅ 75 mm)

For single-handed shaking of beakers, Erlenmeyer flasks, bottles etc.
Delivery without rubber plate (please order separately, necessary for operating with shaker dish).

Art. No.	Pack Qty.	€
P507.1	1	34,35

Rubber plate, with knobs

Art. No.	Pack Qty.	€
P508.1	1	34,35

Test tube shakers REAX top and REAX control

By Heidolph. Compact, high-performance shakers. Relatively heavy, pressurized housing for high safety. The shaker has been constructed in such a way that it prevents splashing liquid from penetrating into the unit. Practical changeover switch from interval to continuous operation.

Technical specifications:

Model	REAX top	REAX control
Motion	circular, vibrating	
Shaking frequency	0 to 2500 rpm	
Orbit	5 mm	
Control accuracy	not controlled	±2 %
Power consumption	42 W	42 W
Weight	3300 g	
Dimensions (W x D x H)	134 x 172 x 105 mm	
System of protection	IP 22	
Ambient temperature	+5 to +40 °C at 85 % rh	

Delivery incl. small receptacle plate for vials up to 20 mm ∅.

Type	Art. No.	Pack Qty.	€
REAX top	**L952.1**	1	284,00
① REAX control	**L953.1**	1	414,00

Accessories for REAX top and REAX control

By Heidolph.

② **Mounting plate, large**
For flasks up to 50 ml.

Art. No.	Pack Qty.	€
L954.1	1	32,00

③ **Supporting rod with vessel holder**
For secure holding of test tubes and flasks in continuous operation. Supporting rod made of V2A, length 210 mm.

Art. No.	Pack Qty.	€
H826.1	1	78,00

④ **Holding rack 10**
For max. 10 centrifuge tubes (∅ 10 mm, L 60 mm).

Art. No.	Pack Qty.	€
L955.1	1	32,00

Vortexer, small shakers

Vortex-Genie®-series

By Scientific Industries. Robust and reliable shakers for speedy mixing and shaking of samples

- Multiple accessories: e.g. adapter tops for test tubes, beakers, centrifuge tubes etc.
- Adapter tops can be changed easily with the snap fit system

① **Vortex-Genie® 2**
Interval operation (with automatic start and by pressing the top) or permanent run possible.

② **Vortex-Genie® 2T with integrated timer**
Possible settings: 1 to 60 sec (Interval operation), 1 to 60 min (Hands-free mode) or permanent run.

③ **Digital Vortex-Genie® 2 with speed and time adjustment (Timer function) via digital display**
Possible settings: 1 to 99 sec (Interval operation), 1 to 99 min (Hands-free mode) or permanent run. Mixer switches over to "Sleep"-mode after 10 minutes without operation. Speed can be increased in 10 rpm increments.

④ **Digital Vortex Genie® 2 Pulse**
same as Digital Vortex Genie® 2, with additional functions (but without touch function):

- Programmable pulse function for various applications
- Depending on the selected pulse and interval times, the mixer can be used for high-speed and intensive mixing of specimens or for intermittent mixing
- The programmable pulse function is, for example, suited to heat-sensitive specimens which are required to be held in suspension without heating
- Pulse and interval times (On/Off) are adjustable from 0.1 sec to 99 min

Technical specifications:

Model	① Vortex-Genie® 2	② Vortex-Genie® 2T	③ + ④ Digital Vortex-Genie® 2/ Digital Vortex Genie® 2 Pulse
Shaking movement	circular		
Speed display/Timer	Scale/No	Scale/Scale	Digital/Digital
rpm range (rpm)	600 to 2700	600 to 2700	500 to 2850
Timer: Interval operation Hands-free mode	-	 1 to 60 sec 1 to 60 min	 1 to 99 sec 1 to 99 min
Dimensions L x W x H (mm)	165 x 122 x 165		
Permissible ambient conditions	0 to 38 °C at 95 % rh		
Weight (kg)	4		
Mains supply	230 V, 50/60 Hz		

Delivery incl. standard top (Inner-∅ 25 mm) and shaking plate (∅ 75 mm).

Type	Art. No.	Pack Qty.	€
① Vortex-Genie® 2	**P505.1**	1	364,45

Shaker dish	**P507.1**	1	34,35
Rubber plate	**P508.1**	1	34,35

Accessories for Vortex-Genie®-series

By Scientific Industries.

④ **Shaker dish and holder for microcentrifuge tubes**
For shaking and mixing samples in microcentrifuge tubes.

Type	Art. No.	Pack Qty.	€
Shaker dish ∅ 15 cm	**P509.1**	1	50,00
Holder for 60 microcentrifuge tubes	**P510.1**	1	30,35

⑤ **Shaker dish and holder for micro well plates**
Ideal for shaking cell cultures and other samples in microwell plates.

Type	Art. No.	Pack Qty.	€
Shaker dish ∅ 15 cm	**P509.1**	1	50,00
Holder for microtitre plates	**P511.1**	1	31,00

⑥ **Angular dish and rubber bands**
For shaking and mixing samples in beakers, Erlenmeyer flasks, bottles. Vessels are safely secured with rubber bands.

Type	Art. No.	Pack Qty.	€
Angular dish	**P512.1**	1	128,50
Rubber bands	**P513.1**	2	9,90

⑦ **Angular dish and holders for test tubes**
For shaking several test tubes simultaneously.

Type	Art. No.	Pack Qty.	€
Angular dish	**P512.1**	1	128,50
Holder for 12 test tubes 9-16 mm	**P514.1**	1	17,75
Holder for 8 test tubes 14-29 mm	**P515.1**	1	23,60
Holder for 4 test tubes 29-37 mm	**P516.1**	1	17,35

Holder for centrifuge tubes
For shaking and mixing samples in centrifuge tubes.

Type	Art. No.	Pack Qty.	€
Holder for 12 centrifuge tubes 15 ml (∅ 17 x L 120 mm)	**LY19.1**	1	165,05
⑧ Holder for 6 centrifuge tubes 50 ml (∅ 30 x L 115 mm)	**LY20.1**	1	150,50
⑨ Holder for 6 centrifuge tubes 50 ml, 6 centrifuge tubes 15 ml and 12 microcentrifuge tubes 1,5/2,0 ml	**XX95.1**	1	187,05

Vortexer, small shakers

Vortex 2 test tube shaker

By IKA. For short operation (touch function) or continuous operation.
- Stands firmly thanks to sturdy zinc die-cast casing
- Attachments click into place
- Numerous accessories, e.g. attachments for reaction vessels, microtitration plates, etc.

Technical specifications:

Shaking motion	Circular, vibrating
Shaking stroke	4 mm
Speed range	500 to 2500 rpm
Dimensions (W x D x H)	120 x 140 x 138 mm
Weight	3.9 kg
Power supply	220-240 V or 115 V or 100 V, 50/60 Hz

Delivery incl. standard attachment VG 3.1.

Art. No.	Pack Qty.	€
EHP7.1	1	229,00

Attachments for Vortex 2

By IKA.

RS-series platform shakers

Suitable for agitating 5 Petri dishes, with optional attachment for Erlenmeyer flasks.

- Max. load capacity: 3 kg
- Continuous speed adjustment

Technical specifications:

Model	RS-OS 5	RS-LS 5
Type of motion	orbital	linear
Speed range (rpm)	0 to 200	
Shaking amplitude (stroke in mm)	20	
Shaking area W x D (mm)	240 x 240	
Dimensions W x D x H mm	245 x 125 x 310	
Weight (kg)	3.1	
Perm. ambient conditions	4 to +40 °C at 80 % RH	
Power supply	100 to 240 V, 50/60 Hz	

Delivery incl. tray top with 6 fixing straps.

Type	Art. No.	Pack Qty.	€
RS-OS 5	**CAX8.1**	1	499,90

Spring clips for 500 ml flasks (max. 4)	**CAY6.1**	1	43,70

Digital orbital shaker

- Circular movement
- Plates, petri dishes, glass plungers and culture bottles can be secured flexibly using rubber straps
- Digital display of speed and running time
- Electronic speed control with softstart function
- Loading options: e.g. 9 x 250 ml Erlenmeyer flasks or 4 x 500 ml Erlenmeyer flasks or 4 x 1000 ml Erlenmeyer flasks or 16 x 250 ml beakers or 4 x 1000 ml beakers

Technical specifications:

Speed control range	20 to 300 rpm
Shaking amplitude (stroke)	19 mm
Timer	1 min to 49 h or continuous operation
Shaking surface area	279 x 279 mm
Dimensions (W x D x H)	314 x 312 x 197 mm
Loading capacity	4.5 kg
Ambient conditions	+2 to +40 °C at 80 % rel. humidity
Power supply	100-240 V, 50/60 Hz

Delivery incl. platform with rubber mat and 8 rubber straps.

Art. No.	Pack Qty.	€
PY67.1	1	736,40

Platform shaker mini 100 Orbital-Genie™

By Scientific Industries.

- Max. load capacity: 3 kg
- Continuous speed adjustment
- Optionally extendible to 3 tiers with additional platforms (see figure ①; please order separately)

Technical specifications:

Action	orbital
Speed range	20 to 100 rpm
Shaking amplitude (stroke)	19 mm
Shaking area (W x D)	290 x 290 mm
Dimensions (W x D x H)	350 x 350 x 90 mm
Weight	3.5 kg
Permissible ambient conditions	0 to +38 °C at 95% RH
Power supply	230 V, 50 Hz

Delivery incl. dish attachment and anti-slip mat.

Art. No.	Pack Qty.	€
HHP1.1	1	883,65

① Attachment system for Mini 100 Orbital-Genie™

By Scientific Industries.
With additional platforms, extendible as 2nd and 3rd tier.
Shaking area dimensions 290 x 290 mm.
Dimensions: W 318 x D 318 x H 114 mm. Weight 1.3 kg.

Art. No.	Pack Qty.	€
HHP2.1	1	168,80

Shakers Titramax 100 and Vibramax 100

By Heidolph. For universal use.
- Motion: circular vibrating
- Infinitely adjustable speed setting
- Speed display scale
- With overheating protection
- Minimal self-heating
- Maintenance-free motor

Technical specifications:

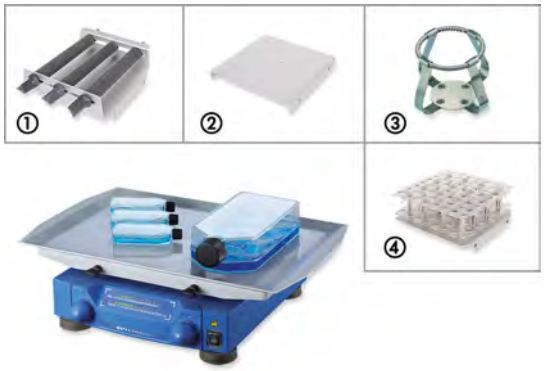
Model	Titramax 100	Vibramax 100
rpm range	150 to 1350 rpm	
Orbit	1.5 mm	3 mm
Weight capacity	2 kg	
Time switch	0 to 120 min or continuous run	
Power consumption	15 W	
Dimensions of working surface (W x D)	220 x 220 mm	
Dimensions of unit (W x H x D)	245 x 125 x 310 mm	
System of protection	IP 30	
Weight	5500 g	
Current	230/240 V, 50/60 Hz	

① **Titramax 100**
The purpose-made holders can hold up to 4 microtiter plates, size 85 x 128 mm.

② **Vibramax 100**
Standard equipment: Rubber platform with beaded edge.
Optional accessory: platform with two tension rollers (please order separately).

Type	Art. No.	Pack Qty.	€
Titramax 100	**H831.1** *	1	898,00
Vibramax 100	**H832.1** *	1	918,00
Accessories:			
③ Universal-top for Vibramax 100, with 2 adjustable tighteners	**H833.1** *	1	125,00
Clamping roller for universal attachment	**LY48.1** *	1	35,00

* Longer delivery times possible. Please check with our Sales Department.



Orbital shaker KS 130 basic complete set

By IKA. Suitable for mixing liquids in various vessels through the use of different attachments.

- Circular movement
- Speed display: 10 LED display bar with scale in graduations of 80 rpm
  Time adjustment: 10 LED display bar with scale in increments of 5 min
- Max. shaking weight: 2 kg

Technical specifications:

Speed control range	80 to 800 rpm
Shaking amplitude (stroke)	4 mm
Timer	5 to 50 min or continuous duty
Dimensions (W x D x H)	270 x 316 x 98 mm
Perm. ambient conditions	+5 to +50 °C at 80 % rel. humidity
Weight	8.8 kg

Delivery incl. dish attachment AS 130.3 (surface area: W 340 x D 220 mm) for culture bottles and petri dishes with integrated non-slip mat.

Art. No.	Pack Qty.	€
PA19.1	1	1499,00

Attachment systems and accessories for KS 130 basic shaker

By IKA.

① **Universal attachment AS 130.1**
Can be adjusted to fit all types of vessel with infinitely adjustable clamping rolls. Surface area: 220 x 220 mm.
Delivery incl. 3 clamping rolls.

Model	Art. No.	Pack Qty.	€
Universal attachment AS 130.1	**PA23.1**	1	313,00

② **Fixing clip attachment AS 130.2**
Suitable for shaking round bottomed flasks, volumetric flasks and Erlenmeyer flasks, etc. Dimensions: W 230 x D 230 x H 24 mm.
Holding clamps not included (please order separately).

Model	Art. No.	Pack Qty.	€
Fixing clip attachment AS 130.2	**PA24.1**	1	94,00

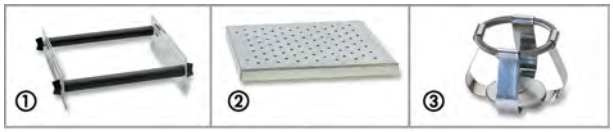
③ **Fixing clips**

Model	Art. No.	Pack Qty.	€
Fixing clips for 25 ml flasks (max. 20)	**X185.1** *	1	22,00
Fixing clips for 50 ml flasks (max. 12)	**X186.1** *	1	22,00
Fixing clips for 100 ml flasks (max. 12)	**X187.1** *	1	22,00
Fixing clips for 200/250 ml flasks (max. 4)	**X188.1** *	1	43,00
Fixing clips for 500 ml flasks (max. 4)	**X189.1** *	1	43,00

* Longer delivery times possible. Please check with our Sales Department.

④ **Test tube attachment AS 130.4**
For intensive shaking of small tubes, test tubes and centrifuge tubes, etc. For 64 test tubes with diameters from 10 to 16 mm.
Minimum test tube height: 80 mm. Dimensions: W 200 x D 230 x H 95 mm.

Model	Art. No.	Pack Qty.	€
Test tube attachment AS 130.4	**PA25.1**	1	211,00



Rotamax 120 platform shaker

By Heidolph. Suitable for agitating 5 petri dishes, with optional attachment for Erlenmeyer flasks up to 1000 ml.

- Max. load capacity: 2 kg
- Continuous speed adjustment
- Speed display with scale

Technical specifications:

Type of motion	Orbital
Speed range	20-300 rpm
Shaking amplitude (stroke)	20 mm
Timer	0-120 min / continuous operation
Shaking area (W x D)	220 x 220 mm
Dimensions (W x H x D)	245 x 125 x 310 mm
Weight	5.5 kg
Perm. ambient conditions	0 to +50 °C at 80 % rH
Power supply	230 V, 50/60 Hz

Delivery incl. non-slip rubber mat with raised edge.

Art. No.	Pack Qty.	€
LY47.1	1	985,00

Accessories for Rotamax 120 platform shaker

By Heidolph.

① **Universal attachment**
With 2 adjustable clamping rollers

Product	Art. No.	Pack Qty.	€
Universal attachment	**H833.1** *	1	125,00

Clamping roller for universal attachment
Additional clamping roller suitable for universal attachment.

Product	Art. No.	Pack Qty.	€
Clamping roller for universal attachment	**LY48.1** *	1	35,00

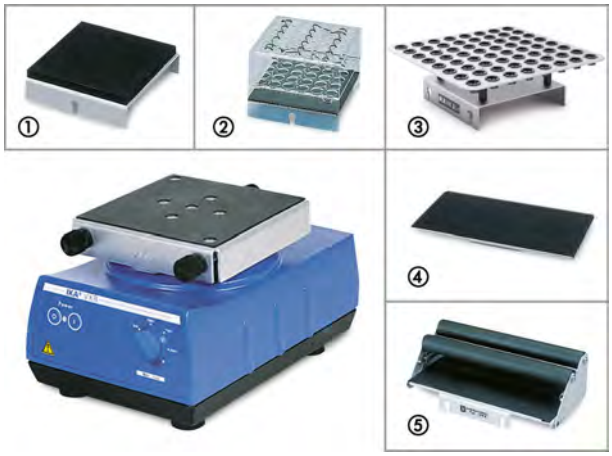
② **Tablar 100 perforated platform**
For shaking Erlenmeyer flasks. Perforated for individual arrangement of flasks, secured with spring clips.
Delivery without spring clips (please order separately).

Product	Art. No.	Pack Qty.	€
Tablar 100 perforated platform	**LY49.1** *	1	75,00

③ **Spring clips for Tablar 100**

Product	Art. No.	Pack Qty.	€
Spring clips for 25 ml flasks (max. 16)	**HL12.1** *	1	18,00
Spring clips for 50 ml flasks (max. 16)	**HL13.1** *	1	21,00
Spring clips for 100 ml flasks (max. 8)	**HL14.1** *	1	24,00
Spring clips for 250 ml flasks (max. 5)	**HL15.1** *	1	31,00
Spring clips for 500 ml flasks (max. 3)	**HL16.1** *	1	33,00
Spring clips for 1000 ml flasks (max. 2)	**HL17.1** *	1	39,00

* Longer delivery times possible. Please check with our Sales Department.



Shaker VXR basic Vibrax®

By IKA.

Features

- Movement: circular
- Infinitely adjustable speed setting
- Speed display with scale
- Load max. 2 kg (including platform)
- Units have been designed for continuous operation
- **Delivery without platform** (please order separately)

Technical specifications:

Rpm range	0 to 2200 rpm
Shaking stroke	4 mm
Motor power: input / output	35/13.2 W
Dimensions (W x D x H)	157 x 247 x 130 mm
Weight (without platform)	5700 g

Art. No.	Pack Qty.	€
Y517.1	1	1399,00

Top systems for shaker VXR basic

By IKA.

① **Single-hand top VX 1**
For shaking single, not fixed vessels from 1 to 250 ml.
Dimensions: W 130 x D 135 x H 40 mm. Weight 160 g.

Art. No.	Pack Qty.	€
Y518.1	1	89,00

② **Test tube glass holder VX 2**
For up to 36 test tubes or centrifuge tubes with ∅ 16 mm.
Dimensions: W 140 x D 145 x H 115 mm. Weight 300 g.

Art. No.	Pack Qty.	€
Y519.1	1	369,00

③ **Test tube rack VX 2E**
For shaking of up to 64 1.5 ml test tube.
Dimensions: W 210 x D 210 x H 39 mm. Weight 368 g.

Art. No.	Pack Qty.	€
Y520.1	1	359,00

④ **Tray top VX 7**
For gentle shaking, e.g. culture flasks and petri dishes.
Dimensions: W 410 x D 210 x H 40 mm. Weight 740 g.

Art. No.	Pack Qty.	€
Y521.1	1	261,00

⑤ **Universal top VX 8**
For quick and secure clamping of e.g. two 500 ml Erlenmeyer flasks.
Span range 25 to 135 mm. Min. height of vessel 80 mm.
Dimensions: W 265 x D 136 x H 60 mm. Weight 760 g.

Art. No.	Pack Qty.	€
Y522.1	1	628,00

Shakers

By Heidolph. Infinitely adjustable speed. With timer or permanent run capabilities. Different attachments can be mounted as required. Weight 8 kg. Electrical supply 230/240 V, 50/60 Hz.

Technical specifications:

Model	UNIMAX 1010	PROMAX 1020	DUOMAX 1030	POLYMAX 1040
Motion	circular	back and forward	see-saw	three dimensional tumbling
Shaking frequency (rpm)	30-500	20-250	2-50	2-50
Orbit (mm)	10	32	-	-
Angle	-	-	5°	5°
W x D x H (mm)	320 x 375 x 125	320 x 375 x 125	320 x 375 x 185	320 x 375 x 195
Table (mm)	258 x 290	258 x 290	258 x 290	258 x 290
Speed display	digital	digital	Scale	Scale
Timer	digital 0 - 999 min	digital 0 - 999 min	timer 0 - 120 min	timer 0 - 120 min

Delivery incl. rubber support with beaded rim. Can be used with incubator (compatible with Incubator 1000, Art. No. H844.1).

① UNIMAX 1010

Rotating (circular) movement. Digital display. Membrane keyboard control panel. Shaking frequency can be set with the turn switch.

Art. No.	Pack Qty.	€
H834.1 *	1	1521,00

PROMAX 1020

Back and forward movement. Digital display. Key pad control panel. Shaking frequency can be set with the turn switch.

Art. No.	Pack Qty.	€
H835.1 *	1	1474,00

DUOMAX 1030

Seesaw motion, angle of inclination 5°. Rotary switch control.

Art. No.	Pack Qty.	€
H836.1 *	1	1412,00

③ POLYMAX 1040

Three dimensional tumbling motion, angle of inclination 5°. Rotary switch control.

Art. No.	Pack Qty.	€
H837.1 *	1	1430,00

* Longer delivery times possible. Please check with our Sales Department.

Accessories for UNIMAX 1010, PROMAX 1020, DUOMAX 1030 and POLYMAX 1040

By Heidolph.

Type	Art. No.	Pack Qty.	€
Tray for 14 Erlenmeyer flasks 50 ml	**H838.1** *	1	180,00
Tray for 9 Erlenmeyer flasks 100 ml	**H839.1** *	1	166,00
② Tray for 5 Erlenmeyer flasks 250 ml	**H840.1** *	1	153,00
Tray for 4 Erlenmeyer flasks 500 ml	**KA78.1** *	1	151,00
Tray for 2 Erlenmeyer flasks 1000 ml	**KA79.1** *	1	142,00
Tray with 2 tension rolls, general-purpose use	**H841.1** *	1	246,00
Tray for 4 separating funnels 50 ml or 100 ml	**H842.1** *	1	236,00

* Longer delivery times possible. Please check with our Sales Department.

Incubator 1000 for 5 kg-class shakers

By Heidolph.

Properties

- Rapid heating, no condensation in system
- Dimensions of incubation hood: W 546 x H 267 x D 394 mm
- Suitable for large volume or high vessels, e.g. Erlenmeyer flasks up to 1000 ml
- Compatible with Unimax 1010, Promax 1020, Duomax 1030 and Polymax 1040 models (please order separately)
- Hinged hood

Technical specifications of heating module:

Ideal for temperatures	+5 °C **over** room temperature to 65 °C
Heating	electr. recirculating air heating with fan
Heating capacity	300 W
Temperature control	electronic, with 2-digit display of set and actual value
Temperature accuracy	±2 K to 50 K; ±4 K from 50 to 65 K
Temperature sensor	Pt 100
Power supply	230/240 V, 50/60 Hz

Delivery incl. heating module with incubation hood.

Art. No.	Pack Qty.	€
H844.1 *	1	1761,00

* Longer delivery times possible. Please check with our Sales Department.

Shaker Multi Reax

By Heidolph.

Properties:

- Digital rpm display
- Motion: circular, vibrating
- Has overheating protection
- Time switch: 0 to 999 min (with acoustic signal) or continuous run
- With space for 26 tubes, ∅ 10 to 16 mm, length max. 160 mm and for 12 tubes, ∅ 16 to 32 mm, length max. 120 mm

Technical specifications:

rpm	150 to 2000 rpm
Orbit	3 mm
Power consumption	33 W
Dimensions of unit (W x D x H)	270 x 410 x 172 mm
Safe ambient conditions	-0 to +50 °C at 80 % rh
Weight	9800 g
Current	230/240 V, 50 Hz

Art. No.	Pack Qty.	€
Y359.1 *	1	1311,00

* Longer delivery times possible. Please check with our Sales Department.

Small shakers KM 2 battery-driven and KM 2

By Edmund Bühler.

② **Small shakers KM 2 Battery**

- Circular shaking movement
- LED display to set the speed and runtime, as well as the representation of the charging status
- Low heat emission also enables **use in refrigerators or incubators** (working temperature between +4 and +45 °C at 95 % rF.)
- Mains-free operation via rechargeable battery (minimum operating time under max. load 40 h)
- Battery can be recharged with a mains/battery charger or switched on permanent run. Mains pack have to be placed outside refrigerator/incubator.

Delivery incl. basic unit including vibration platform and fine-rib mat.

① **Small shaker KM 2**

- Space-saving circular shaker
- LED display to set the speed and runtime
- Robust, hard-wearing shell

Delivery incl. basic unit including vibration platform and fine-rib mat.

Technical specifications for KM 2 battery-driven and KM 2:

rpm range	30 to 220 rpm
Shaking amplitude (stroke)	20 mm
Time switch	0 to 99 h, 59 min /continuous run
Shaking surface (W x D)	200 x 295 mm
Max. load	2 kg
Dimensions (W x D x H)	250 x 415 x 145 mm
Weight	approx. 10 kg

Type	Art. No.	Pack Qty.	€
KM 2 battery-driven with mains pack	**H696.1** *	1	1917,80
KM 2	**L646.1** *	1	1479,20

* Longer delivery times possible. Please check with our Sales Department.

Accessories for KM 2 battery and KM 2

By Edmund Bühler.

③ **Universal tray**

Can be individually fit with spring clips. Length 300 x W 356 mm. Suitable for loading e.g. 8 x 500 ml or 12 x 250 ml Erlenmeyer flasks. Without spring clips (for spring clips, see shaker-accessories).

Art. No.	Pack Qty.	€
L647.1	1	212,85

Tension roller KM

To fix standing vessels safely on small shaker KM 2 battery-driven and KM 2. Suitable for loading e.g. 2 x 1000 ml or 9 x 100 ml Erlenmeyer flasks. Tension roller KM is attached to the rim of shaker vibrating plate with star grip screws.

Art. No.	Pack Qty.	€
T519.1	1	47,30

KL 2 combination shaker

By Edmund Bühler. Practical small shaker which can be switched over at any time **from circular to reciprocating movement**.

- **Max. load: 2 kg**
- Variable, electronic control
- Accessories (Tension roller, Clamping roller, Spring roller, see shaker accessories)
- Suitable for loading e.g. 4 x 500 ml or 2 x 1000 ml Erlenmeyer flasks
- Standard equipment: basic unit including platform system with 3 tension rollers h and fine-rib mat

Technical specifications:

rpm range	30 to 420 rpm
Shaking amplitude (stroke)	8 mm
Time switch	0 to 120 min / continuous run
Shaking surface (W x D)	300 x 300 mm
Dimensions (W x D x H)	355 x 455 x 195 mm
Weight	12.5 kg
Current	230 V, 50/60 Hz

Art. No.	Pack Qty.	€
P436.1 *	1	1749,05

* Longer delivery times possible. Please check with our Sales Department.

Flask shaker SF1

By Stuart. Simulates a powerful hand movement.

- For max. 8 Erlenmeyer flasks or 500 ml screw thread bottles
- Robust construction with 4 vibration-absorbing feet

Technical specifications:

Speed	8-800 oscillations/min
Timer	10-60 min / permanent operation
Shaking amplitude (stroke)	1.5 mm
Load capacity	3 kg
Dimensions (W x D x H)	780 x 270 x 240 mm
Weight	8.3 kg
Mains supply	230 V, 50 Hz

Delivery incl. clamps.

Art. No.	Pack Qty.	€
EP81.1 *	1	1787,00

* Longer delivery times possible. Please check with our Sales Department.

Laboratory shakers Unimax 2010, Promax 2020 and Polymax 2040

By Heidolph. Can be used with various tops for mixing liquids in Erlenmeyer flasks, staining troughs and Petri dishes.

- Digital Speed display
- **Large platform for holding numerous samples, shaking surface: W 390 x D 340 mm**
- Max. load capacity 10 kg

Technical specifications:

Model	Unimax 2010	Promax 2020	Polymax 2040
Movement type	circular	reciprocating	tumbling
Speed range (rpm)	20 to 400		2.5 to 50
Shaking amplitude stroke (mm)	20		-
Angle of inclination (°)	-		5
Timer	0-120 min / permanent operation		
Dimensions W x D x H (mm)	426 x 455 x 135		426 x 455 x 208
Perm. ambient conditions	0 to +50 °C at 80 % rh		
Weight (kg)	16		
Power supply	230/240 V, 50 Hz		

Delivery incl. rubber top with beaded edge rim.

Type	Art. No.	Pack Qty.	€
Unimax 2010	**HL06.1** *	1	2192,00
Promax 2020	**HL07.1** *	1	2296,00
① Polymax 2040	**HL08.1** *	1	2321,00

* Longer delivery times possible. Please check with our Sales Department.

Adapter systems and accessories for laboratory shakers

By Heidolph.

② Base frame for tension rollers

Together with tensions rollers for attaching various vessels.
Delivery without tensions rollers, please order separately.

Type	Art. No.	Pack Qty.	€
Base frame for tension rollers	**HL09.1** *	1	170,00

③ Tension roller for base frame

Together with base frame for attaching various standing vessels.
Suitable for loading: e.g. 20 Erlenmeyer flasks 100 ml or 9 Erlenmeyer flasks 500 ml. Please order at least 2 rollers.

Type	Art. No.	Pack Qty.	€
Tension roller for base frame	**HL10.1** *	1	54,00

④ Universal tray 2000

For shaking Erlenmeyer flasks. With bore holes for individual mounting with spring clips.
Delivery without spring clips, please order separately.

Type	Art. No.	Pack Qty.	€
Universal tray 2000	**HL11.1** *	1	170,00

⑤ Spring clips for universal tray 2000

Type	Art. No.	Pack Qty.	€
Spring clip for 25 ml flask (max. 36)	**HL12.1** *	1	18,00
Spring clip for 50 ml flask (max. 36)	**HL13.1** *	1	21,00
Spring clip for 100 ml flask (max. 23)	**HL14.1** *	1	24,00
Spring clip for 250 ml flask (max. 12)	**HL15.1** *	1	31,00
Spring clip for 500 ml flask (max. 9)	**HL16.1** *	1	33,00
Spring clip for 1000 ml flask (max. 5)	**HL17.1** *	1	39,00
Spring clip for 2000 ml flask (max. 3)	**KA43.1** *	1	55,00

* Longer delivery times possible. Please check with our Sales Department.

Compact shakers KS-series

By Edmund Bühler.
Models KS:

- Model KS 15 A: circular movement
- Model KS 15 B: reciprocating movement
- Without digital display

Models KS control:

- Model KS 15 A control: circular movement
- Model KS 15 B control: reciprocating movement
- With digital display of set/actual speed
- Preset-function of last selected setting respectively programming of selective sequences (shaking frequency/length possible)

Technical specifications:

Speed range	30 to 420 rpm
Shaking amplitude (stroke)	17 mm
Weight capacity	15 kg
Time switch	KS 15 A/B control: 1 min - 100 h / continuous operating KS 15 A/B: 0- 120 min or continuous run
Dimensions (W x D x H)	510 x 490 x 150 mm
Weight	22 kg
Current	230 V, 50/60 Hz

Delivery without top (please order separately).
With the incubation hood TH 15 unit can be used as shaking incubator (please order separately Art. No. L492.1, see shaker-accessories).

Type	Art. No.	Pack Qty.	€
KS 15 A	**P432.1** *	1	1811,40
KS 15 B	**P433.1** *	1	1872,65
KS 15 A control	**L490.1** *	1	2288,70
KS 15 B control	**L491.1** *	1	2355,35

* Longer delivery times possible. Please check with our Sales Department.

Accessories for compact shakers KS-series

By Edmund Bühler.

Standard attachment Combifix KS

Attachment rack with 3 tensioning bars and finely fluted rubber mat. Shaking surface 400 x 275 mm. For safe attachment of standing vessels. Can be loaded with: e.g. 20 Erlenmeyer flasks 100 ml or 2 Erlenmeyer flasks 2000 ml. Can also be used for other vessels when additional bars are used (see shaker accessories).

Art. No.	Pack Qty.	€
T497.1 *	1	367,65

Universal tray KS

Coated tray with holes which can be individually fit with spring clips or test tube racks. Shaking surface 430 x 300 mm.
Suitable for loading e.g. 15 x 250 ml or 5 x 1000 ml Erlenmeyer flasks.
Delivery without spring clips
(please order separately, see shaker-accessories).

Art. No.	Pack Qty.	€
P434.1 *	1	240,80

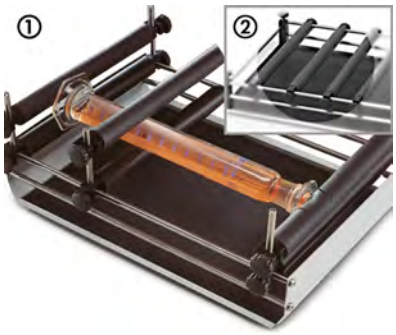
* Longer delivery times possible. Please check with our Sales Department.

Clamping roller / Spring roller

Fits
- Compact shaker KS 15A/B (L490.1, L491.1, P432.1, P433.1)
- Compact shaker (P436.1)
- Standard tray KS (T497.1)

For securing spherical separating funnels both rollers are required.

Type	Art. No.	Pack Qty.	€
Clamping roller	**L669.1**	1	117,20
Spring roller	**L670.1**	1	103,45



Tension rollers h / v

Fits

Compact shaker KS 15A/B (L490.1, L491.1, P432.1, P433.1), compact shaker KL 2 (P436.1) and standard tray KS (T497.1)

Tension roller h

Ideal for securing all vessels with flat base, e.g. Erlenmeyer flasks, glass beakers, test tube holders.

Tension roller v

Is used in combination with tension roller h to secure lying vessels or to support the side of tall vessels.

Max distance between rollers: 60 mm

Type	Art. No.	Pack Qty.	€
① Tension roller v	**L668.1**	1	86,45
② Tension roller h	**P435.1**	1	69,70

Test tube trays made of stainless steel

Can be secured to platforms with tension bars h. Can be attached to the standard trays: in combination with the swivel base (please order separately). Swivel base also enables the angle of the rack to be varied.

Type	Art. No.	Pack Qty.	€
for 68 test tubes ∅ 14 mm	**T498.1**	1	68,95
for 44 test tubes ∅ 16 mm	**T499.1**	1	68,95

Incubation hood TH 15

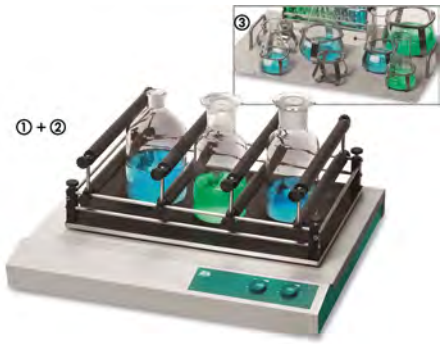
Fits
- Compact shaker KS 15A/B (L490.1, L491.1, P432.1, P433.1)
- Micro titre plate shaker TiMix 5 (T490.1, T491.1, T492.1)

Technical specifications:

Ideal for temperatures	+5 °C over room temperature to +50 °C
Temperature sensor	Pt 100
Control accuracy	±1 % of set value
Air circulation	240 m^3/h
Dimensions (L x W x H)	510 x 460 x 470 mm
Power supply	230 V, 50/60 Hz, 343 VA

Art. No.	Pack Qty.	€
L492.1 *	1	3219,65

* Longer delivery times possible. Please check with our Sales Department.



Universal shakers SM 30

By Edmund Bühler. Desktop shakers for high load in permanent run.

- All desired parameters can be set with control knobs
- Electronic speed control with gentle start-up
- Consistant of speed and run times are also possible with different loads
- Time switch: 0 to 120 min or continuous run
- Different shaking movements:
  Model A: revolvable
  Model B: see-saw (horizontal)
  Model C: can be switched over from circulating to see-saw

Together with the incubation hood TH 30 can be used as a shaking incubator (Please order incubation hood separately).

Technical specifications:

Speed range	15 to 300 rpm, infinitely variable
Shaking amplitude (stroke)	26 mm (Models A + C) 30 mm (Model B)
Max. load	30 kg
Ambient temperature	5 to 50 °C at 85 % rh
Dimensions (W x D x H)	680 x 615 x 160 mm
Weight	32 kg
Current	230 V, 50/60 Hz

Delivery incl. base unit plus vibrating plate and rubber mat. Comes without holder (please order desired holder separately).

Type	Art. No.	Pack Qty.	€
① Model A	**AH15.1** *	1	2911,10
Model B	**AH16.1** *	1	2972,40
Model C	**AH17.1** *	1	3853,90

Attachment systems for universal shakers SM 30

By Edmund Bühler.

Attachment rack Combifix SM, Set A

Rack with 5 tensioning bars h. For secure attachment of different standing vessels. Can be loaded with: e.g. 6 Erlenmeyer flasks 2000 ml or 20 Erlenmeyer flasks 250 ml.

Art. No.	Pack Qty.	€
AH18.1 *	1	409,60

② **Platform rack Combifix SM, Set B**

Rack with 4 tensioning bars h and 4 tensioning bars v.
Ideal for clamping horizontal vessels between the bars or for high vessels.
Distance between bars h + v: max. 60 mm.
Loading: e.g. 6 Erlenmeyer flasks 2000 ml or 12 Erlenmeyer flasks 500 ml.

Art. No.	Pack Qty.	€
AH19.1 *	1	510,65

③ **Universal tray SM**

Laminated board with bore holes for individual attachment of spring clips and test tube racks. Can be loaded with: e.g. 11 Erlenmeyer flasks 1000 ml or 23 Erlenmeyer flasks 250 ml.
Delivery without spring clips and test tube racks
(please order separately, see shaker accessories).

Art. No.	Pack Qty.	€
AH20.1 *	1	275,20

* Longer delivery times possible. Please check with our Sales Department.

Incubation hood TH 30

By Edmund Bühler. Heating and cooling chambers with standard and UV-lighting. Combined with the SM-shakers it can be used either as a complete shaking incubator or independently. A socket for smaller appliances is mounted inside the hood.

Standard features:

- Coated metal casing with 3 windows
- The front door opens upwards
- Safety switch-off of UV-light and automatic stop of shaker when front door is opened (when combined with universal shakers SM 30)

Technical specifications:

Ideal for temperatures	5 °C above room temperature to 50 °C
Temperature constancy	±1 % of desired value
Lighting	Standard 15 W UV-lighting 15 W
Temperature sensor	PT 100
Inner dimensions (W x D x H)	660 x 540 x 430 mm (High enough for 2 l Erlenmeyer flasks)
Outer dimensions (W x D x H)	680 x 610 x 560 mm
Weight	33 kg
Current	230 V, 50/60 Hz

Art. No.	Pack Qty.	€
AH21.1 *	1	4094,70

Options:
Extended temperature range up to 60 °C.
Installation of additional heating appliances is possible to achieve temperatures of max 60 °C. **Please order with first order, if required.**

Art. No.	Pack Qty.	€
AH22.1 *	1	258,00

Cooling device for TH 30

Installation of cooling coil and connecting sleeves for connection of an external cooling device (circulating cooler etc. Please order separately). Depending on the cooling capacity of the cooling device, temperatures of app. 5 °C below room temperature can be achieved.
Please order with first order, if required.

Art. No.	Pack Qty.	€
AH23.1 *	1	589,10

* Longer delivery times possible. Please check with our Sales Department.

CO_2-resistant orbital shaker KM CO_2

By Edmund Bühler.

Features:

- Circular movement
- High-grade materials and stainless steel components especially for CO_2 concentrations up to 20 % and humidity of up to 95 % rF
- External control unit (corded L 2.0 m, ∅ 12 mm) with LED display for speed (resolution 5 rpm) and runtime (resolution 1 min). Control unit can be fastened to magnetic surfaces.
- Low heat emission

Technical specifications:

Speed control range	30 to 220 rpm
Shaking amplitude (stroke)	20 mm
Load capacity	2 kg
Timer	0 to 99 h, 59 min or continuous operation
Shaking area (W x D)	200 x 295 mm
Dimensions (W x D x H)	230 x 340 x 145 mm
Permissible ambient conditions	4 to 45 °C at 95 % rel. humidity; 0 to 20 % (CO_2 concentration)
Weight	7.6 kg
Power supply	230 V, 50/60 Hz

Delivery incl. external control unit and base unit with rubber mat.

Art. No.	Pack Qty.	€
ENE2.1	1	2413,40

Accessories for CO_2-resistant orbital shaker KM CO_2

By Edmund Bühler.

Universal tray

For individual equipping with spring clips. L 300 x W 356 mm. Variable loading options, e.g. 5 x 1000 ml Erlenmeyer flasks or 12 x 250 ml Erlenmeyer flasks.
Delivery without spring clips (spring clips see shaker accessories).

Art. No.	Pack Qty.	€
L647.1	1	212,85

Tension roller KM

For secure fastening of standing vessels. Suitable for loading e.g. 2 x 1000 ml or 12 x 50 ml Erlenmeyer flasks. The tension roller KM is attached to the rim of shaker vibrating plate with star grip screws.

Art. No.	Pack Qty.	€
T519.1	1	47,30

CO_2 resistant orbital shaker

By Thermo.

Features:

- Circular movement
- Protects specially treated mechanical components against CO_2 concentrations of up to 20 % and humidity of up to 95 %
- External control unit (corded L 2.0 m, ∅ 6 mm) with LED display for speed (resolution 1 rpm) and runtime (resolution 1 min)
- Low-maintenance magnetic drive
- Minimal heat emission, does not affect the conditions inside the CO_2 incubator
- Stainless steel construction for protection against corrosive CO_2 gas

Technical specifications:

Speed control range	30 to 300 rpm
Shaking amplitude (stroke)	19 mm
Load capacity	6 kg
Timer	0 to 99 h 59 min or continuous operation
Dimensions (W x D x H)	360 x 300 x 96 mm (shaker) 95 x 158 x 26 mm (control unit)
Permissible ambient conditions	4 to 60 °C at 95 % rel. humidity; 0 to 20 % (CO_2 concentration)
Weight	13 kg
Power supply	100-240 V, 50/60 Hz

Delivery incl. external control unit. Without all-purpose aluminium pullout tray and fixing clips (please order separately).

Art. No.	Pack Qty.	€
CXT3.1	1	2624,00

Accessories for CO_2 resistant orbital shaker

All-purpose aluminium pullout tray

For shaking Erlenmeyer flasks. Perforated for individual arrangement of flasks, secured with spring clips.
Delivery without fixing clips (please order separately).

Fixing clips for 5000 ml flasks (max. 1)	**CXX4.1**	1	87,50

Test tube racks

Variable inclination angle. Dimensions: L 285 x W 125 x H 175 mm.

Type	Art. No.	Pack Qty.	€
For 40 ∅ 16 mm tubes (max. 2)	**CXX5.1**	1	84,10

Shakers for microtitration plates

Shaker Multi Vortex Genie®

By Scientific Industries. Robust and reliable shaking device for mixing and shaking of samples in Erlenmeyer flasks or vials.

Properties

- Digital display for speed and time
- Speed increase in steps of 10 rpm
- Robust metal case
- Secure stand at high speed thanks to supports with high vibration damping
- Can be loaded with e. g. max. 6 Erlenmeyer flasks 250 ml or 2 multi racks each for 12 test tubes (max. tube ∅ 10-29 mm, length min. 85 mm)
- After 10 minutes not in use, the mixer switches to "sleep" mode

Technical specifications:

Type of motion	circular, vibrating
Speed control range	250 to 950 rpm
Timer	1 to 99 min or continuous operation
Orbit	4 mm
Shaking area (W x D)	238 x 264 mm
Loading capacity	4.0 kg
Dimensions (W x D x H)	310 x 270 x 195 mm
Perm. ambient conditions	0 to +38 °C at 90 % rH
Weight	11.3 kg
Power supply	230 V, 50 Hz

Delivery incl. platform with clamp/tension roller (for securely attaching standing vessels) and 2 multi-racks.

Art. No.	Pack Qty.	€
LX88.1 *	1	2270,40

* Longer delivery times possible. Please check with our Sales Department.

MicroPlate Genie®-series microtitre plate shakers

By Scientific Industries. Specially designed for small samples in MT plates.

- Circular movement
- High speed for optimal mixing

MicroPlate Genie®
For powerful shaking of 1 MT plate.

Digital MicroPlate Genie® Pulse
like MicroPlate Genie®, but with extra functions:

- Digital display of speed and running time
- Choice of standard shake mode or pulse mode
- Depending on the selected pulse and pause duration, rapid and vigorous mixing or an intermittent mixing function is available
- Pulse and pause duration (On/Off) is adjustable from 0.1 sec to 99 min

Multi-MicroPlate Genie®
For reliable shaking of 4 MT plates. An additional attachment for a further 4 MT plates is optional (please order separately).

Technical specifications:

Type	MicroPlate Genie®	Digital MicroPlate Genie® Pulse	Multi-MicroPlate Genie®
Number of microtitration plates	for 1 MT plate		for 4 MT plates (8 MT plates with optional attachment)
Speed control range (rpm)	750 to 2700	500 to 2850	750 to 2700
Shaking amplitude (mm)	1		
Speed display/Timer	Scale/Scale	Digital / Digital	Scale/Scale
Time range	1 to 60 min / continuous duty		
Dimensions W x D x H (mm)	165 x 165 x 165		350 x 240 x 165
Weight (kg)	2.75		3.7
Power supply	230 V, 50/60 Hz		

Image	Type	Art. No.	Pack Qty.	€
①	MicroPlate Genie®	**CH98.1** *	1	636,40
②	Digital MicroPlate Genie® Pulse	**XP69.1** *	1	840,65
③	Multi-MicroPlate Genie®	**EH53.1** *	1	824,55

* Longer delivery times possible. Please check with our Sales Department

Attachment for Multi-MicroPlate Genie®

By Scientific Industries. For 4 additional MT-plates attached.
As a 2nd rack on top of the standard attachment.
Can only be used together with Multi-MicroPlate Genie® (EH53.1).

Art. No.	Pack Qty.	€
EH54.1	1	149,45

Shakers for microtitration plates

Magnetic shaker Monoshake

By Thermo. Ideal for shaking liquids in microwell plates
- Space efficient overall size
- Movement: circular
- Automatic centric zero positioning of shaking platform

Technical specifications:

Rpm range	100 to 2000 rpm
Shaking amplitude (stroke)	2 mm
Accuracy zero position	±0.1 mm
Ambient temperature	+5 to +40 °C at 95 % rh
Housing material	Aluminium/brass (nickel-plated)
Dimensions (W x D x H)	146 x 103 x 47 mm
Current	230 V, 50 Hz

Art. No.	Pack Qty.	€
X826.1 *	1	882,00

* Longer delivery times possible. Please check with our Sales Department

▶ For microtiter plates, see page 479

Rotilabo®-microtest plates

Made of transparent **PS**. With 96 alphanumerically coded cavities.
Different base profiles available. Produced under sterile working conditions.
Stackable.
Dimensions: L 128 x W 85 x H 15 mm.
Delivery without cover plate, please order separately.

Type	Volume per well (µl)	Art. No.	Pack Qty.	€
① U-profile (round)	345	**9291.1**	100	47,20
② V-profile (conical)	335	**9292.1**	100	53,70
③ F-profile (flat)	405	**9293.1**	100	58,05

▶ For multichannel pipettors, see page 449

Compact microtiter shaker

By Thermo.
For strong shaking of 4 MT plates.

- Digital display of speed and running time
- Reaction vial holders are optionally available as accessories (please order 2 identical frames separately).
  2 frames must be attached to the MT shaker for a balanced operation.

Technical specifications:

Speed control range	150 to 1200 rpm
Shaking amplitude	3 mm
Timer	1 min to 99 h, 59 min / continuous operation
Shaking area (W x D)	267 x 185 mm
Load capacity	4 kg
Permissible ambient conditions	4 to 60 °C at 80 % rel. humidity
Weight	7.7 kg
Dimensions (W x D x H)	249 x 329 x 127 mm
Power supply	100-240 V, 50/60 Hz

Art. No.	Pack Qty.	€
HKP3.1	1	912,00

Accessories:

Holder for 80 (5 x 16) reaction vials 1.5 ml	**HKP4.1**	1	28,10
Holder for 30 x 3 ml 10 x 15 ml centrifuge tubes	**HKP5.1**	1	23,10
Holder for 12 (2 x 6) 50 ml centrifuge tubes	**HKP6.1**	1	23,10

Shakers for microtitration plates

Microwell plate shakers TiMix 5

By Edmund Bühler.
Available with either platforms for **8 or 16 microtitre plates**.
A variety of other platforms enable various other applications.
Adjustable mass balance ensures stability with different loads.
Temperature control of samples is possible when an incubation hood (TH 15) is placed on device (please order separately).

Model TiMix 5

High speed for best possible mixing of small sample volumes.
Delivery incl. basic unit without platform (please order separately).

Model TiMix 5 control

With digital display of set/actual speed. Preset-function of last selected setting or programming of selective sequences possible (shaking frequency/length).
Delivery incl. basic unit without platform (please order separately).

Technical specifications:

Model	TiMix 5	TiMix 5 control
Time switch	0 to 120 min /continuous run	1 min to 30 h / continuous run
rpm range	100 to 1400 rpm, electronically infinitely variable	
Shaking amplitude (stroke)	3 mm	
Weight capacity	max. 5 kg	
Shaking surface (W x D)	400 x 300 mm	
Dimensions (W x D x H)	460 x 470 x 188 mm	
Weight	approx. 18 kg	

Type	Art. No.	Pack Qty.	€

L492.1 *	1	3219,65

* Longer delivery times possible. Please check with our Sales Department.

Incubation shaker

Microtitration plate shakers SSM5 and SSL5

By Bibby Scientific.

- A combination of high speed and low amplitude produces the vibration shaking action required to mix small quantities
- Digital display of speed and running time
- Reaction vial holders are optionally available as accessories (please order separately). Up to 2 racks can be attached to one appliance

Technical specifications:

Type	SSM5	SSL5
Number of microtitration plates	For 4 MT plates	For 8 MT plates
Speed display	LED	
Speed control range (rpm)	250 to 1250 in increments of 10	
Shaking amplitude	1.5 mm	
Timer display	LED	
Timer	1 s to 9999 min / continuous operation	
Shaking area (mm)	220 x 220	306 x 306
Load capacity (kg)	1	2
Permissible ambient conditions	4 to 40 °C at 80 % rel. humidity	
Dimensions W x D x H (mm)	240 x 300 x 160	360 x 420 x 160
Power supply	230 V, 50 Hz	

Delivery incl. anti-slip mat.

Type	Art. No.	Pack Qty.	€
SSM5	**YH91.1** *	1	1005,00
SSL5	**YH92.1** *	1	1989,00

Accessories:

Holder for 50 microcentrifuge tubes 1.5 ml	**YH93.1** *	1	130,00
Holder for 50 microcentrifuge tubes 0.5 ml	**YH94.1** *	1	126,00
Holder for 50 microcentrifuge tubes 0.2 ml	**YH95.1** *	1	119,00

* Longer delivery times possible. Please check with our Sales Department.

NEW

Incubation shaker for microtiter plates

By Ohaus. For immunoassays and hybridizations.

- **For 4 standard microtiter plates**
- LED display for temperature, speed and time
- Timer with acoustic alarm
- Setpoint memory: display of last value set
- Soft start
- Available with standard lid or with opaque lid for light-sensitive samples

Technical specifications:

Temperature range	+5 °C **above** ambient temperature up to 65 °C
Resolution of temperature display	1 °C
Temperature adjustment range	5 to 65 °C
Temperature constancy	±0.5 °C at 37 °C
Speed control range	100 to 1200 rpm
Shaking amplitude (stroke)	3 mm
Timer	1 s to 9999 min or continuous operation
Dimensions (W x D x H)	279 x 432 x 197 mm
Weight	13.6 kg
Power supply	230 V, 50/60 Hz

Type	Art. No.	Pack Qty.	€
With transparent lid	**HTA4.1** *	1	1730,00
With opaque lid	**HTA5.1** *	1	1730,00

* Delivery times may apply to these products. Please check with our Sales Department

Incubation shaker

Small incubation shaker

By Ohaus. For cell cultures, bacteria suspensions and hybridizations.
- LED display for temperature, speed and time
- Timer with acoustic alarm
- Setpoint memory: display of last value set
- Soft start

Technical specifications:

Shaking movement	circular
Temperature range	+5 °C **above** ambient temperature up to 65 °C
Resolution of temperature display	1 °C
Temperature adjustment range	5 to 65 °C
Temperature constancy	±0.5 °C at 37 °C
Speed control range	100 to 1200 rpm
Shaking amplitude (stroke)	3 mm
Timer	1 to 9999 min or continuous operation
Shaking area (W x D)	197 x 279 mm
Internal dimensions (W x D x H)	211 x 287 x 145 mm
Dimensions (W x D x H)	279 x 432 x 270 mm
Weight	13.6 kg
Power supply	230 V, 50/60 Hz

Delivery incl. universal attachment for fastening retaining clips for Erlenmeyer flasks (please order retaining clips separately).

Art. No.	Pack Qty.	€
HTC1.1 *	1	1970,00

Incubation shaker 2D/3D

By Ohaus. For hybridization processes, cell cultures, blotting techniques and colouring/dying of gels.
- LED display for temperature, speed/inclination angle and time
- Timer with acoustic alarm
- Inclination angle adjusts electronically (even when device is in operation)
- Setpoint memory: display of last value set
- Soft start

Technical specifications:

Model	**Thermo-Shake 2D**	**Thermo-Shake 3D**
Action	Rocking motion	Wobbling motion
Temperature range	+5 °C **above** ambient temperature up to 65 °C	
Resolution for temperature display (°C)	1	
Set temperature (°C)	5 to 65	
Temperature constancy	±0.5 °C at 37 °C	
Speed control range (rpm)	1 to 50	1 to 30
Tilt angle (°)	0 to 15	0 to 20
Timer	1 to 9999 min or continuous operation	
Shaking area W x D (mm)	191 x 254	184 x 235
Internal dimensions W x D x H (mm)	197 x 273 x 97	197 x 273 x 86
Dimensions W x D x H (mm)	279 x 432 x 297	
Weight (kg)	10	
Power supply	230 V, 50/60 Hz	

Delivery incl. base tray with universal mat.

Incubation shaker

KS 3000 i control incubator shaker

By IKA. For shaking, mixing and heating/cooling samples.
- Circular movement
- LED display for speed and time adjustment as well as temperature
- With RS 232 port and USB port
- Additional PT 1000.60 temperature probe for temperature control directly within samples (included)

Technical specifications:

Temperature range	5 °C **above** ambient temperature up to +80.0 °C
Temperature accuracy / resolution	±0.1 °C / 0.1 °C
Control accuracy with sensor probe	±0.5 K
Speed control range	10 to 500 rpm
Shaking amplitude (stroke)	20 mm
Timer	1 min to 999 h or continuous operation
Inner dimensions (W x D x H)	330 x 330 x 260 mm
Outer dimensions (W x D x H)	465 x 695 x 430 mm*
Heating output	1000 W
Power supply	230 V, 50/60 Hz

*Required floor space: 600 x 600 mm

Delivery without rack attachment
(please order desired rack attachment separately).

By IKA.

① **Universal attachment AS 260.1**

Suitable for use with all types of vessel thanks to infinitely adjustable clamping rolls. Installation surface 320 x 320 mm. Variable loading options, e.g. 8 250 ml Erlenmeyer flasks or 15 100 ml Erlenmeyer flasks.

Delivery incl. 4 clamping rolls.

Type	Art. No.	Pack Qty.	€
Universal attachment AS 260.1	**X182.1** *	1	523,00

② **Fixing clip attachment AS 260.2**

Suitable for shaking round-bottom flasks, volumetric flasks and Erlenmeyer flasks, etc. Dimensions: W 330 x D 330 x H 24 mm.
Does not include fixing clips (please order separately).

Type	Art. No.	Pack Qty.	€
Fixing clip attachment AS 260.2	**X184.1** *	1	134,00

Fixing clips

Type	Art. No.	Pack Qty.	€
Fixing clips for 25 ml flasks (max. 31)	**X185.1** *	1	22,00
Fixing clips for 50 ml flasks (max. 23)	**X186.1** *	1	22,00
Fixing clips for 100 ml flasks (max. 23)	**X187.1** *	1	22,00
Fixing clips for 200/250 ml flasks (max. 11)	**X188.1** *	1	43,00
Fixing clips for 500 ml flasks (max. 9)	**X189.1** *	1	43,00
Fixing clips for 1000 ml flasks (max. 5)	**PA26.1** *	1	43,00

③ **Dish attachment AS 260.3**

For the gentle movement of cell cultures or nutrient media in petri dishes etc. Installation surface: 320 x 320 mm.

Type	Art. No.	Pack Qty.	€
Dish attachment AS 260.3	**X183.1** *	1	113,00

* Longer delivery times possible. Please check with our Sales Department.

Incubation shaker KS 4000 i control

By IKA.
- Movement: circular
- LED display for speed and time setting plus temperature
- Integrated PID temperature control
- With RS 232 interface
- Socket for use of an additional PT 1000.60 temperature probe in the working area (included)

Technical specifications:

Temperature range	5 °C **above** room temperature to +80.0 °C
Temperature constancy / Resolution	±0.1 °C / 0.1 °C
Speed range	10 to 500 rpm
Control accuracy with sensor probe	±0.5 K
Shaking amplitude (stroke)	20 mm
Time switch	1 min to 999 h or permanent run
Max. load	20 kg
Height of interior	280 mm
Outer dimensions (W x D x H)	580 x 750 x 520 mm*
Heating power	1000 W
Power supply	230 V, 50/60 Hz

*Required floor space 600 x 600 mm

Delivery without top attachment
(please order desired attachment separately).

Art. No.	Pack Qty.	€
KH89.1 *	1	6049,00

Top attachment systems for KS 4000 i control

By IKA.

① **Universal top AS 4000.1**

Attachment holder with 6 infinitely adjustable tension rollers for universal fit to all vessels. Floor space W 380 x D 410 mm.
Can hold: e.g. 2 Erlenmeyer flasks 2000 ml or 9 Erlenmeyer flasks 500 ml

Product	Art. No.	Pack Qty.	€
Universal top AS 4000.1	**KH90.1** *	1	838,00

② **Clamp holder AS 4000.2**

For shaking Erlenmeyer flasks and bottles with a circular cross-section.
Doesn't come with clamps (please order separately).

Product	Art. No.	Pack Qty.	€
Clamp holder AS 4000.2	**KH91.1** *	1	698,00

Retaining clamps

Product	Art. No.	Pack Qty.	€
Retaining clamps for 25 ml flasks (max. 50)	**X185.1** *	1	22,00
Retaining clamps for 50 ml flasks (max. 48)	**X186.1** *	1	22,00
Retaining clamps for 100 ml flasks (max. 25)	**X187.1** *	1	22,00
Retaining clamps for 250 ml flasks (max. 16)	**X188.1** *	1	43,00
Retaining clamps for 500 ml flasks (max. 12)	**X189.1** *	1	43,00
Retaining clamps for 1000 ml flasks (max. 7)	**PA26.1** *	1	43,00

③ **Top attachment for dishes AS 4000.3**

For gentle shaking of cell cultures or nutrient media in Petri dishes.
Floor space W 430 x D 430 mm.

Product	Art. No.	Pack Qty.	€
Tray top AS 4000.3	**KH92.1** *	1	183,00

* Longer delivery times possible. Please check with our Sales Department.

Incubation shaker

Incubator shakers SI-500

By Stuart. Ideal for tempering samples and at the same time shaking and mixing them.

- Circular movement
- Digital LED-display for speed, timer and temperature
- Smoked acrylic glazing
- With pull-out platform for easy removal and filling of samples
- With timer: at the end of the preset time, the shaking movement stops and the temperature is maintained
- Air circulation for constant heating of samples
- With USB-interface for recording the temperature sequence
- Suitable for loading: e.g. 12 Erlenmeyer flasks 250 ml or 9 Erlenmeyer flasks 500 ml or 6 Erlenmeyer flasks 1000 ml
- Alternatively 4 centrifuge or vial racks can be attached. Tilt angle can be adjusted by 30°. Please order reaction and centifuge tube racks separately.

Technical specifications:

Temperature range	5 °C **above** room temperature to 60 °C
Constancy of temperature / Resolution	±0.5 °C / 0.1 °C
Speed range	30 to 300 rpm
Shaking amplitude (stroke)	16 mm
Max. load	10 kg
Timer	1 sec to 9 d
Shaking area (W x D)	335 x 335 mm
Inner dimensions (W x D x H)	422 x 408 x 250 mm
Outer dimensions (W x D x H)	450 x 474 x 522 mm
Heating power	250 W
Weight	30 kg
Power supply	230 V, 50/60 Hz

Delivery incl. platform with 4 tensioning bars and USB-cable.

Art. No.	Pack Qty.	€
KA99.1 *	1	4741,00

* Longer delivery times possible. Please check with our Sales Department.

Racks made of stainless steel for SI-500

By Stuart.

Type	Art. No.	Pack Qty.	€
for 64 reaction tubes 1.5 ml	**KC00.1**	1	355,00
for 25 centrifuge tubes 15 ml	**KC01.1**	1	355,00
for 12 centrifuge tubes 50 ml	**KC02.1**	1	355,00

Incubation shaker MaxQ Digital 4000 set

By Thermo.

- Circular movement
- Digital display for speed, time and temperature on three individual displays
- Visual/audible signals alert you to temperature and speed deviate from optimal levels
- Automatic unbalanced load sensor stops the device if increased vibration is detected. An acoustic/visual alarm is issued at the same time.
- Soft start feature prevents sudden starts and stops.
- **Clamp starter kit** comprising 1 x 250 ml, 1 x 500 ml, 1 x 1000 ml and 1 x 2000 ml flask clamps

Technical specifications:

Temperature range	10 °C **above** ambient temperature up to +80 °C
Temperature accuracy / resolution	±0.1 °C / 0.1 °C
Speed control range	15 to 500 rpm
Shaking amplitude (stroke)	19 mm
Max. load	22.7 kg
Timer	0.1 min to 999.9 h or continuous operation
Inside dimensions (L x W x H)	508 x 533 x 330 mm
Outside dimensions (L x W x H)	813 x 572 x 559 mm
Heating output	1000 W
Weight	75.8 kg
Power supply	230 V, 50/60 Hz

Delivery incl. universal tray (457 x 457 mm), clamp starter kit (holding clamps for flasks from 250 to 2000 ml) and adhesion mat (210 x 210 mm).

Art. No.	Pack Qty.	€

Tilt/roller mixer RS-TR series

Simultaneous rolling and tilting movement for thorough mixing of samples, e.g. in centrifuge tubes and sample tubes. For vessels with max. ∅ 100 mm.

RS-TR 05:
with variable speed control from 0 to 70 rpm using analog rotary knob with scale.

RS-TR 10:
with speed control from 10 to 70 rpm with illuminated LCD display for setting time and speed.

Technical specifications:

Model	RS-TR 05	RS-TR 10
Number of rollers	6	
LCD display	-	Yes
Timers	-	1-1199 min or continuous operation
Speed range (rpm)	0 to 70	10 to 70
Dimensions per roller L x ∅ (mm)	280 x 30	
Dimensions W x D x H (mm)	260 x 490 x 120	
Ambient conditions	5 to 40 °C at 80 % rel. humidity	
Weight (kg)	5.1	5.5
Power supply	100-240 V, 50/60 Hz	

Type	Art. No.	Pack Qty.	€
RS-TR 05	**XK30.1**	1	424,65
RS-TR 10	**XK31.1**	1	747,15

Tilt/roller mixers SRT series

By Stuart. With simultaneous rolling and tilting movement for thorough mixing.

- With spillage tub
- Rollers are easily removable to accommodate larger vessels with max. ∅ 100 mm
- Removable side panels prevent tubes from falling out accidentally during operation

Two models with different roller numbers available:
SRT6 and SRT9: With fixed speed of 33 rpm
SRT6D and SRT9D: With variable speed control from 5 to 60 rpm, digital speed display and timer function.

Technical specifications:

Model	① SRT 6	SRT 9	SRT 6D	② SRT 9D
Number of rollers	6	9	6	9
Timer	-		1 sec to 90 min or 1 min to 9 h	
Speed	33 rpm		5 to 60 rpm	
Amplitude	16 mm			
Dimensions of each roller (L x ∅)	340 x 30 mm			
Dimensions (W x D x H)	565 x 240 x 110 mm	565 x 360 x 110 mm	565 x 240 x 110 mm	565 x 360 x 110 mm
Permissible working temp.	4 to 60 °C at 80 % rh			
Weight	5.1 kg	6.9 kg	5.1 kg	6.9 kg
Power supply	230 V, 50 Hz			

Type	Art. No.	Pack Qty.	€
SRT 6	**HA30.1**	1	945,00
SRT 9	**HA31.1**	1	1153,00

NEW

RM 2 tilting roller mixer

By Edmund Bühler. Gentle tilting and rolling movement for complete mixing. For all standard tube sizes, bottles and other cylindrical vessels up to ∅ 80 mm. LED display for speed and operating time. Powder-coated metal housing. Removable rollers and collecting tray.

Technical specifications:

Shaking motion	Tilt/roll motion
Number of rollers	6
Timer	0 to 99 h, 59 mins or continuous operation
Speed control range	5 to 80 rpm, adjustable in 5 rpm increments
Speed display	LED
Dimensions per roller (L x ∅)	300 x 32 mm
Dimensions (W x D x H)	244 x 465 x 115 mm
Permissible ambient conditions	5 to 45 °C at 85% RH
Weight	7.3 kg
Power supply	100 to 240 V, 50/60 Hz

Delivery incl. 6 plastic rollers and collecting tray.

Art. No.	Pack Qty.	€
HYK6.1	1	2177,95

Overhead attachment for RM 2 roller mixer

Features 12 slots for Falcon® 50 ml centrifuge tubes (slot ∅ 29.5 mm) for gently rolling overhead mixing.

KAX7.1	1	269,85

Small Bottle cell culture roller mixer

By Wheaton. Suitable for bottles with ∅ 108 to 121 mm.
Both outer rollers can be moved to the inside so that bottles with ∅ 75 mm can also be accommodated. Each tier is designed to hold at least 2 bottles.

Technical specifications:

Capacity	2 positions
Can be extended with **optional** accessories up to	6 positions with 2 additional tiers
Speed range (depending on bottle ∅)	0.1 to 3.8 rpm (max. bottle ∅ 110 mm)
Max. bottle dimensions	∅ 108 to 121 mm, max. L 290 mm
Dimensions (W x D x H)	320 x 325 x 180 mm
Permissible ambient conditions	10 to 40 °C at 80 % rel. humidity
Weight	8.2 kg
Power supply	100 to 240 V, 50/60 Hz

Delivery incl. standard roller system for 2 bottles.
Please order extension kit for additional bottles separately.

Art. No.	Pack Qty.	€
EPX8.1	1	1550,15

Extension kit (tiers) for Small Bottle roller mixer

By Wheaton. For extension with max. 2 additional platforms as 2nd and 3rd tiers. Each tier must be ordered separately.

EPX9.1	1	475,15

Mini-Bottle cell culture roller mixer

By Wheaton. Specially designed for mixing and stirring small quantities in bottles. For serum bottles (from 30 ml), media bottles (100 to 125 ml) and culture tubes (38 x 200 mm). Each tier is designed to hold at least 4 bottles.

Technical specifications:

Capacity	4 positions
Can be extended with **optional** accessories up to	12 positions with 2 additional tiers
Speed range (depending on bottle diameter)	3 to 45 rpm (max. bottle ∅ 38 mm) 2 to 30 rpm (max. bottle ∅ 60 mm)
Max. bottle dimensions	∅ 38 to 60 mm, max. L 240 mm
Dimensions (W x D x H)	320 x 325 x 180 mm
Permissible ambient conditions	10 to 40 °C at 80 % rel. humidity
Weight	8 kg
Power supply	100 to 240 V, 50/60 Hz

Delivery incl. standard roller system for 4 bottles.
Please order extension kit for additional bottles separately.

Art. No.	Pack Qty.	€
EPX7.1	1	1827,50

Extension kit (tiers) for Mini-Bottle roller mixer

EYH1.1	1	625,65

Tilting mixers Speci-Mix and Vari-Mix for sample tubes

By Thermo. For gentle, tilt-mixing of samples in sample tubes

Speci-Mix: with fixed speed 18 rpm and fixed tilt angle of 48°

Vari-Mix: with variable speed control in the range 2 to 20 rpm and manual tilt angle setting from 1 to 48°

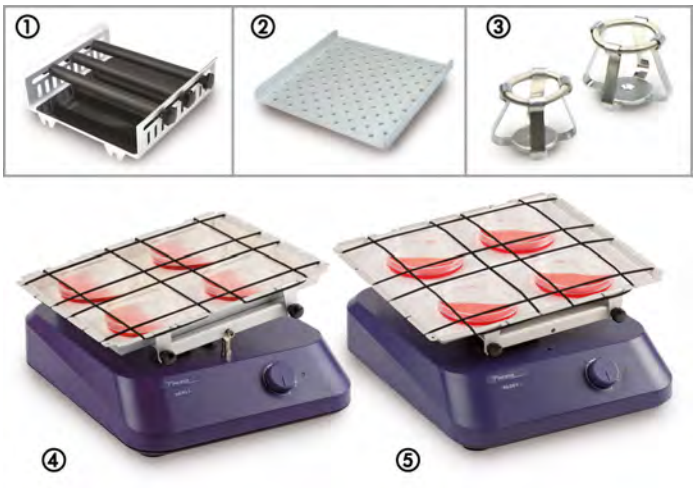
Silicone attachment can be used on both sides. A closing lip integrated on one side prevents short tubes from slipping (L<107 mm). The other side is intended for longer tubes.

Technical specifications:

Model	Speci-Mix	Vari-Mix
Type of motion	Tilt motion	
Number of sample tubes	8 (L 10-20 mm) or 3 (L 22-30 mm)	16 (L 10-20 mm) or 7 (L 22-30 mm)
Speed (rpm)	18	2-20
Tilt angle (°)	48	1 to 48
Dimensions: L x W x H (mm)	139 x 191 x 107	139 x 381 x 107
Ambient conditions	+4 to +40 °C at 80 rF	
Weight (kg)	1.4	26

Delivery incl. attachment made of silicone.

Type	Art. No.	Pack Qty.	€
Speci-Mix	**PP08.1**	1	437,00
Vari-Mix	**PP09.1**	1	700,00



Rocking and 3D-shakers RS-series

- Continuous speed adjustment
- With optional tray for Erlenmeyer flasks or with additional universal tray for adaptation to all types of vial through infinitely adjustable clamping rolls (please order desired tray separately)

Technical specifications:

Model	④ RS-RS 5	⑤ RS-DS 5
Action	Rocking motion	Wobbling motion
Speed range (rpm)	up to 80	
Tilt angle	7°	
Shaking area W x D (mm)	240 x 240	
Load capacity (kg)	3	
Permissible ambient conditions	4 to +40 °C at 80 % RH	
Dimensions W x D x H (mm)	270 x 330 x 110	
Weight (kg)	2.9	3.2
Power supply	100-240 V, 50/60 Hz	

Delivery incl. tray top with 6 fixing straps.

Type	Art. No.	Pack Qty.	€

GyroMini™ and Enduro MiniMix™ 3D rocker shakers

General specifications of both models
- Space-saving design with small footprint
- Speed and angle of inclination are preset

① **GyroMini™ 3D rocker shaker**
For sample tubes. For gentle mixing of samples, e.g. in blood sample tubes or centrifuge tubes.

Loading options: 60 x 1.5/2.0 ml reaction vials or 16 x 15 ml centrifuge tubes or 8 x 50 ml centrifuge tubes or 20 x 7 ml standard blood sample tubes.

② **Enduro MiniMix™ 3D rocker shaker**
For sensitive gels and blots. The smaller angle of inclination prevents gels/blots from drying out and/or breaking.

Technical specifications:

Model	GyroMini™	Enduro MiniMix™
Type of motion	Orbital 3D rocking motion	
Speed range (rpm)	20	
Tilt angle (°)	20	5
Shaking area W x D (mm)	240 x 170	
Load capacity (g)	800	
Dimensions W x D x H (mm)	240 x 170 x 150	
Permissible ambient conditions	+4 to +40 °C at 80 % rel. humidity	
Weight (kg)	0.88	
Power supply	230 V, 50 Hz

Rocker 3D-series wobble shakers

By IKA. Various attachments are available for different applications. Ideal for shaking low-foaming samples, DNA extraction, colouring and decolouring.

Rocker 3D basic:
Fixed tilt angle and speed.

Rocker 3D digital:
- With digital speed and timer display
- Manually adjustable tilt angle

Technical specifications:

Model	Rocker 3D basic	Rocker 3D digital
Type of motion	Wobble motion	
Speed display	-	LED
Speed range (rpm)	30	5 to 80
Timer display	-	LED
Timer	-	1 sec to 99.9 h or continuous operation
Tilt angle (°)	8	0 to 15
Shaking area W x D (mm)	240 x 240	
Load capacity (kg)	2	
Ambient conditions	4 to 50 °C at 80 % rel. humidity	
Dimensions W x D x H (mm)	280 x 330 x 165	280 x 330 x 185
Weight (kg)	2.2	
Power supply	100-240 V, 50/60 Hz	

Delivery incl. basic table, ① non-slip all-purpose mat for securing culture bottles, petri dishes etc.

Type	Art. No.	Pack Qty.	€

3D rocker shakers GyroTwister™

With orbital 3D rocking motion. For DNA extraction, staining and destaining of gels and for cultivation/aeration applications.

- Continuous speed adjustment
- Model with fixed or adjustable tilt angle

Technical specifications:

Model	Standard	Vario
Type of motion	Orbital 3D rocking motion	
Speed range	3-60 rpm	
Timer	20 to 120 min or continuous operation	
Tilt angle	7° (fixed)	Manual adjustable from 3 to 10°
Shaking surface area, platform type M (L x W)	300 x 300 mm	
Load capacity	5 kg	
Dimensions (W x D x H)	330 x 352 x 210 mm	
Permissible ambient conditions	+4 to +70 °C at 80 % rel. humidity	
Weight	6.6 kg	
Power supply	230 V, 50 Hz	

Delivery incl. platform type M (L 300 x W 300 mm) with integrated anti-slip mat and dimpled mat for test tubes.

Type	Art. No.	Pack Qty.	€
Standard	**YC55.1**	1	1193,25
Vario	**YC56.1**	1	1408,25

Platforms for GyroTwister™

Delivery incl. anti-slip mat.

Platform type L
Dimensions: L 400 x W 400 mm.

Type	Art. No.	Pack Qty.	€
Platform type L	**YC57.1**	1	177,40

Platform type XL
Dimensions: L 500 x W 500 mm.

Type	Art. No.	Pack Qty.	€
Platform type XL	**YC58.1**	1	199,20

① 3D gyratory shakers SSM3 and SSL3

By Stuart. **With circulating 3D-seesaw movement.** Ideal for DNA-extraction, staining and bleaching gels, and for particularly low foaming.

General information for both models
- Gentle seesaw movement
- Digital LED-display for speed and timer
- Can alternatively be extended to 3 levels with 2 additional platforms (see diagram; please order separately)

① **Model SSM3**
- Mini-platform for minimal sampling
- Shaking surface (W x D) 235 x 235 mm
- Space efficient design

③ **Model SSL3**
- Large platform for holding numerous samples
- Shaking surface (W x D) 335 x 335 mm

Technical specifications:

Model	SSM3	SSL3
Motion	Circular 3D-seesaw movement	
rpm range	5 to 70 rpm	
Time switch	0 to 999 min or continuous run	
Angle of inclination	Manually adjustable from 3 to 12°	
Shaking surface (W x D)	235 x 235 mm	335 x 335 mm
Weight capacity	3 kg	10 kg
Dimensions (W x D x H)	240 x 300 x 165 mm	360 x 420 x 170 mm
Ambient temperature	+4 to +40 °C at 80 % rh	
Weight	5 kg	10 kg
Power supply	230 V, 50/60 Hz	

Delivery incl. 1 platform with integrated anti-slip mat.

Type	Art. No.	Pack Qty.	€
SSM3	**AT53.1** *	1	918,00
SSL3	**EP82.1** *	1	1245,00

② Platform for 3D gyratory shaker SSM3 and SSL3

By Stuart.
With two further platforms as 2nd and 3rd levels.
Quick to assemble, no tools required.
Delivery incl. 8 retaining bars.

For model	Art. No.	Pack Qty.	€
SSM3	**AT54.1** *	1	236,00
SSL3	**EP83.1** *	1	308,00

* Longer delivery times possible. Please check with our Sales Department.

NEW

TL 2 3D laboratory rocking shaker

By Edmund Bühler. Powder-coated metal housing. With slow three-dimensional movement for even, gentle mixing. For homogeneous mixing in culture bottles and petri dishes or flasks. Ideal e.g. for breeding cell cultures and DNA extractions. LED display for setting the speed and operating time.

Technical specifications:

Shaking motion	Orbital 3D rocking motion
Speed control range	1 to 22 rpm
Speed display	LED
Timer	0 to 99 h, 59 mins or continuous operation
Tilt angle	8° fix
Shaking area (W x D)	220 x 220 mm
Max. load	2 kg
Dimensions (W x D x H)	250 x 415 x 118 mm
Permissible ambient conditions	5 to 45 °C at 85% RH
Weight	9.1 kg
Power supply	100 to 240 V, 50/60 Hz

Delivery incl. basic unit, including vibration plate with rubber anti-slip mat.

Art. No.	Pack Qty.	€
HYK4.1	1	1781,30

Accessories: Expansion tray for TL 2 3D laboratory rocking shaker

By Edmund Bühler.
Can be expanded with an additional platform as a second level.
Height: 80 mm.
Delivery incl. rubber anti-slip mat.

Art. No.	Pack Qty.	€
HYK5.1	1	125,80

Tube-Revolver test tube rotator

By Thermo. For mixing samples in test tubes.
- With LED speed display
- Turntable can be positioned at any angle (exception: turntable for 50 ml centrifuge tubes can only be positioned horizontally or vertically)
- Turntable are easy to replace
- Overhead mixing function with activable agitation mode (additional shaking every 40° during every second rotation cycle)
- Max. 4 turntables can be attached at once (exception: only 1 turntable can be attached for 50 ml centrifuge tubes)

Technical specifications:

Speed:	10 to 40 rpm
Dimensions (W x D x H)	225 x 154 x 195 mm
Permissible operating temperature	4 to 60 °C at 80 % rel. humidity
Weight	1,2 kg
Power supply	100-240 V, 50/60 Hz

Delivery incl. 2 turntables for 7 centrifuge tubes 15 ml, 2 turntables for 7 blood collection tubes 5/7 ml, 2 turntables for 15 reaction vials 1.5/2.0 ml, 2 turntables for 21 reaction vials 0.5/0.8 ml and 1 turntable for 6 centrifuge tubes 50 ml.

Art. No.	Pack Qty.	€
ATX1.1	1	367,00

By Thermo.

For	Art. No.	Pack Qty.	€
7 centrifuge tubes 15 ml (∅ 16-17 mm)	**ATX2.1**	2	9,20
7 blood collection tubes 5/7 ml (∅ 12-13 mm)	**ATX3.1**	2	9,20
15 reaction vials 1.5/2.0 ml (∅ 10-11 mm)	**ATX4.1**	2	9,20
21 reaction vials 0.5/0.8 ml (∅ 7.5-8.5 mm)	**ATX5.1**	2	9,20
6 reaction vials 50 ml (∅ 28-29 mm)	**ATX6.1**	1	13,85

Rotator Revolver Mixer for reaction vials and sample tubes

For a variety of mixing tasks in microbiology, biochemistry and histochemistry.

- Sample containers can be positioned horizontally and vertically, as well as in any intermediate position
- Both halves of the particular rotary module can be arranged separately
- With fixed speed of 20 rpm
- Gentle horizontal mixing for applications such as hybridisation (rolling mixing motion); or vertical positioned tubes for overhead mixing of blood sample tubes for example
- Rotary module halves can be fixed without tools

Technical specifications:

Speed	20 rpm
Dimensions (W x D x H)	239 x 127 x 225 mm
Permissible operating temperature	4 to 65 °C at 80 % rel. humidity
Weight	2.0 kg
Mains connection	230 V, 50/60 Hz

Delivery incl. rotary module for 36 reaction vials 1.5/2.0 ml.
Please order any required additional rotary modules separately.

Art. No.	Pack Qty.	€

Trayster overhead mixer for reaction vials and test tubes

By IKA. For a wide range of mixing applications in molecular biology.
For mixing samples in reaction vials, test tubes and blood sample tubes.
Suitable for separating and mixing powdery and liquid samples.
With soft rotating overhead mixing function.

Trayster basic: With fixed speed
Trayster digital: With infinitely variable speed adjustment and timer function

Technical specifications:

Model	① Trayster basic	② Trayster digital
Speed display	-	LED
Speed range (rpm)	20	5-80
Timer display	-	LED
Timer	-	1 s to 99 h or continuous operation
Permissible ambient conditions	4 to +50 °C at 80 % rel. humidity	
Dimensions W x D x H (mm)	460 x 160 x 150	
Weight (kg)	1.7	
Power supply	100-240 V, 50/60 Hz	

Delivery incl. standard pullout tray for a total of 3 inserts.
Inserts are not included. Please order separately.

Rotators SB 2 and SB 3

By Stuart. Ideal for gentle mixing samples in culture tubes, blood vials or sample tubes.

- Rotary dish for different vessels available
- Angle of rotary dish is adjustable
- **Model SB 2**: with fixed speed
- **Model SB 3**: with variable speed, digital speed display and timer function

Technical specifications:

Model	SB 2	SB 3
Rpm	20 rpm	adjustable from 2-40 rpm
Speed display	none	digital
Timer function	none	1 to 999 min
Dimensions (W x D x H)	200 x 270 x 240 mm	
Max. operating temperature	4 to 60 °C at 80 % rh	
Weight	3200 g	
Power supply	230 V, 50 Hz	

Delivery incl. base unit without rotary dish.
Please order the desired rotary dishes separately.

Rotator Genie™

By Scientific Industries. Overhead rotator for mixing specimens in reaction vials, culture tubes, test tubes etc.

- Easy, tool-free platform replacement
- The platforms can be loaded from both sides (assuming they are loaded evenly)

Standard platform

① With rubber straps for flexible attachment of different vessels and tubes with diameters of up to 85 mm. For strap length adjustment, clamps are provided at the centre of the platform.
② The standard platform attaches variably to the mixer at an angle of 90°. Various mixing actions are possible thanks to the flexible attachment system and different tube placements.

③ **Magnetic platform**

Mounts for tubes and other specimens can be attached to the magnetic plate (please order mounts separately).

Technical specifications:

rpm:	5 to 35 rpm
Dimensions of standard platform	260 x 260 mm
Dimensions of magnetic platform	292 x 292 mm
Overall dimensions (W x D x H)	400 x 175 (290 with horizontal platform) x 400 mm
Weight	5.2 kg
Mains connection	230 V, 50/60 Hz

Type	Art. No.	Pack Qty.	€
① ② Rotator Genie with standard platform and 8 straps	**PH63.1**	1	991,15
③ Rotator Genie with magnetic platform	**PH64.1**	1	1025,55

Multi-functional shaker Roto-Shake Genie®

By Scientific Industries. Extremely versatile shaker with tilting, revolving and shaking movements. Depending on the positioning of the vials, different mixing movements can be attained: revolving, tilting/shaking, tilting/revolving, tilting/rolling, revolving/rolling as well as a combination of these movements. The moving part consists of a double-sided, magnetic stainless steel plate, 34 x 20 cm. Easy to operate, **Change-over from rotating to tilting movement as achieved using a single hand movement.** Holders for vials with a diameter of 10 to 13 mm, 15 to 17 mm, or 28 to 30 mm or magnetic strips for holding the bags 75 x 75 mm can be placed on the magnetic plates.

Technical specifications:

Dimensions (L x W x H)	508 x 252 x 267 mm (With mounted platform: width 305 mm)
Weight	11 800 g
Speed	Tilting: infinitely variable from 10 to 70 cycles per minute. Revolving: infinitely variable from 5 to 35 rpm
Vibrating angle	±10° from the horizontal line
Ambient conditions	0 to 38 °C

Delivery incl. 1 Multi-function mixer Roto-Shake Genie®, 1 holder with 12 clips for 10 to 13 mm tubes, 1 holder with 6 clips for 15 to 17 mm tubes, 1 holder with 3 clips for 28 to 30 mm tubes, 4 magnetic strips for 2 bags 75 x 75 mm, 1 shaking platform (203 x 305 mm) with slip-resistant map for petri dishes etc.

Temperature-controllable multifunction mixer Enviro-Genie®

By Scientific Industries. Mixing, stirring and tempering units for 5 different applications: **cooling - incubating - rotating - tilting/shaking - stirring**

- Easy-to-read, digital display
- With large window for viewing samples
- **Change-over from rotating to tilting in one movement**
- Holders for vials and other vessels, e.g. for blood and sample vials, centrifuge tubes, tissue culture bottles, staining vessels, sample bags can be placed on the magnetic platform.
- **Temperature range adjustable from +4 to +75 °C**
- With visual and acoustic alarm for temperature and time
- Programmable timer function (up to 96 h)
- **Two magnetic stirrers are integrated in the incubator**, Reverse mode is possible. Max. stirring amount per platform: 1 litre. Platform-∅: 90 mm each.
- RS 232-interface

Technical specifications:

Speed	
Rotating	1 to 35 rpm
Tilting	2 to 70 cycles per min
Stirring	1 to 2000 rpm
Heating and cooling function	
Ideal for temperatures	+4 to +75 °C
Resolution	0.1 °C
Accuracy	±0.2 °C
Dimensions	
Outer dimensions (W x D x H)	622 x 495 x 368 mm
Inner dimensions (W x D x H)	362 x 254 x 260 mm

Mixer BagRotator

By Scientific Industries. Even overhead, rotational movements for mixing substances in sample bags and blood bags etc.

- Suitable for simultaneous mixing of 40 bags each with 300 ml volume
- The rotary module (= basket) is divided into 8 compartments; each compartment can be filled with 5 bags
- The extremely gentle mixing movement prevents accidental damage to bag
- Speed remains constant even with maximum load

Technical specifications:

Fixed speed	3 rpm
Dimensions (W x D x H)	508 x 252 x 267 mm
Weight	7.7 kg
Current	230 V, 50 Hz

Art. No.	Pack Qty.	€
CH97.1 *	1	1172,85

* Longer delivery times possible. Please check with our Sales Department.

Overhead mixer REAX 20-series

By Heidolph. Enables overhead rotation of vessels of different sizes and properties. Suitable for mixing cylinders and wide neck bottles with a length of 160 to 270 mm and diameter up to 136 mm. Ideal for water, sewage water and mud analysis in accordance with DIN 36414. Infinitely adjustable speed range.

Technical specifications:

Model	REAX 20/4	REAX 20/8	REAX 20/12
Capacity	4 bottles	8 bottles	12 bottles
Speed	1 to 16 rpm		
Output (W)	280 W		
Dimensions W x H x D (mm)	490 x 465 x 520	770 x 465 x 520	1050 x 465 x 520
Perm. ambient conditions	0 to 40 °C at 80 % rh		
Weight (kg)	23	28	33
Mains supply	230 V, 50 Hz		

Delivery incl. holder for 2 l-bottles.

Product	Capacity	Art. No.	Pack Qty.	€
Overhead mixer REAX 20/4	4 bottles	**KH64.1** *	1	2756,00
Overhead mixer REAX 20/8	8 bottles	**H830.1** *	1	3111,00
Overhead mixer REAX 20/12	12 bottles	**KH65.1** *	1	3529,00

Accessories:

▶ Homogenizing bags, see page 259

① Rotilabo®-mini-centrifuge

With openings for **6 microcentrifuge tubes** 1.5/2.0 ml. Maximum speed **6000 rpm** (equivalent to 2000 x g). **Small, handy and powerful. Start and stop** are **controlled by an extra switch**. Features transparent polycarbonate lid. Centrifuge is supplied with adapter for 0.5 ml micro-centrifuges tubes. Dimensions: H 120 x W 130 x D 150 mm. Weight: 494 g. Power supply 220 V, 50/60 Hz.

Art. No.	Pack Qty.	€
T464.1	1	252,65

② Rotilabo®-centrifuge with butterfly-rotor

Same as Art. No. **T464.1**, however suitable for PCR-strips of 2 x 8 microcentrifuge tubes at 200 µl per strip.

Art. No.	Pack Qty.	€
T465.1	1	231,15

Mini-centrifuge with microscope slide rotor

For speedy drying of microscope slides, e.g. for micro-array analysis. Suitable for all micro-array slides 25 x 76 x 1 mm. Dries micro-array substrates in less than 10 s.

- Rotor capacity: 2 microscope slides
- The liquid is retained in the microscope slide cassettes
- Cassettes can be removed for cleaning or replaced when necessary
- Max. speed 4000 tr/min (500 to 850 x g)
- Space efficient, compact unit (∅ 127 mm)

Art. No.	Pack Qty.	€
AH48.1	1	579,45

Accessories:

Spare cassettes for microscope slides	**AH49.1**	1 Pair	137,60

Microlitre centrifuges

Rotilabo®-mini-centrifuge "Uni-fuge"

- Replaceable rotor system
  (for easy insertion and removal of all rotors included in delivery)
- **Start and stop are controlled by a supplementary switch**
- Small, handy and powerful
- With transparent PC-lid

Technical specifications:

Speed max.	6000 rpm
Max. RCF	2000 x g
Dimensions (W x D x H)	130 x 150 x 120 mm
Weight	494 g
Power supply	220 V, 50/60 Hz

Delivery incl. standard rotor for centrifuge tubes 6 x 1.5/2.0 ml, adapter for 0.5 ml centrifuge tubes and a rotor for PCR®-tube strips with 2 x 8 centrifuge tubes à 200 µl per strip.

Art. No.	Pack Qty.	€
CX73.1	1	231,15

Mini G mini centrifuge

By IKA.

- Max. capacity: 8 x 1.5/2.0 ml reaction vials
- Rotor interchangeable without tools
- **Digital operating time display (adjustable from 1 to 99 min)**

Technical specifications:

Max. speed	6000 rpm
Max. RCF	2000 x g
Dimensions (W x D x H)	155 x 175 x 105 mm
Power supply	230 V, 50/60 Hz

Delivery incl. standard rotor for 8 x 1.5/2.0 ml reaction vials and a rotor for PCR® tube strips with 4 x 8 reaction vials, each 200 µl per strip and adapters for 0.5/0.4/0.2 ml reaction vials.

Art. No.	Pack Qty.	€
XT15.1	1	313,00

Rotilabo®-microlitre centrifuge Gusto™

- Max. capacity: 12 x 1.5/2.0 ml reaction vials
- Digital display of speed and running time
- Actual status display during operation
- Pulse button for short spin
- Optional display of rpm or x g
- Rotor changing without tools

Technical specifications:

Max. speed	12500 rpm adjustable in increments of 100
Min. speed	500 rpm
Max. RCF	9800 x g
Operating time	1 s to 30 min, adjustable in increments of 1 s per short cycle
Dimensions (W x H x D)	171 x 114 x 203 mm
Power supply	100-240 V, 50/60 Hz

Delivery incl. 12-place microlitre rotor with lid, PCR® tube strip rotor for 4 x 8 tube strips à 200 µl per strip and 12 adapters for 0.5 and 0.2 ml reaction vials.

Art. No.	Pack Qty.	€
XP51.1	1	708,45

Microlitre centrifuges

Microlitre centrifuge CD-2012 high speed

Features:
- Max. capacity: 12 x 1.5/2.0 ml reaction vials
- Illuminated display of speed and running time
- Optional display of rpm or x g
- Impulse button for short spinning of samples

Technical specifications:

Max. speed	15000 rpm, adjustable in increments of 100
Min. speed	500 rpm
Max. RCF	15100 x g
Operating time	30 sec to 99 min, adjustable in steps of 1 sec / continuous operation / short cycle
Dimensions (W x H x D)	260 x 250 x 140 mm
Weight	6 kg
Power supply	110-240 V, 50/60 Hz

Delivery incl. 12-position microlitre rotor with lid.

Art. No.	Pack Qty.	€

for reaction vials 0.5 ml	**HEA9.1**	24	52,70

Microlitre centrifuge MIKRO 185

By Hettich. Sample preparation for molecular biological applications, as well as in the PCR laboratory and much more.
- Max. capacity 24 x 1.5/2.0 ml reaction vials
- Adjustment of centrifuging time, rpm or RCF by means of membrane keyboard

Technical specifications:

Max. speed	13300 rpm, adjustable in increments of 100 rpm
Min. speed	500 rpm
Maximum RCF (in rotor type 1226)	17008 x g
Operating time	1 to 99 min / continuous duty / short cycle (pulse key)
Dimensions (H x W x D)	228 x 262 x 352 mm
Weight	10 kg
Power supply	208-240 V, 50/60 Hz

Delivery without microlitre rotor. Please order separately.

Art. No.	Pack Qty.	€
ANP9.1	1	1270,65

Microlitre rotors for MIKRO 185

By Hettich.

① **24-tube microlitre rotor (45°) type 1226**
- For 24 x 1.5/2.0 ml reaction vials
- Max. speed 13300 rpm max. RCF 17008 x g

Delivery incl. lid with bioseal, phenol resistant and autoclavable.

Type	Art. No.	Pack Qty.	€
24-tube microlitre rotor type 1226	**ANT0.1**	1	341,85

12-tube microlitre rotor (45°) type 1252
- For 12 x 1.5/2.0 ml reaction vials
- Max. speed 13300 rpm max. RCF 14041 x g

Delivery incl. lid.

Type	Art. No.	Pack Qty.	€
12-tube microlitre rotor type 1252	**ANT1.1**	1	268,75

18-tube microlitre rotor (45°) for Spin Column Kits type 1213
- For Micro Spin Column Kits (micro tubes with filter cartridge) 18 x 1.5/2.0 ml
- Max. speed 13300 rpm max. RCF 15030 x g

Delivery without lid. Please order separately if required.

Type	Art. No.	Pack Qty.	€
18-tube microlitre rotor type 1213	**ANT2.1**	1	268,75
Lid type 1246 with bioseal for rotor type 1213	**ANT3.1**	1	196,75

Accessories:

Microlitre centrifuges

Heraeus® Pico® and Fresco® microlitre centrifuges

By Thermo.

General information for all models

- **Max. capacity: 24 x 1.5/2.0 ml centrifuge tubes**
- Available in the 17 000 x g- and 21 100 x g version
- Optional display of rpm or x g
- Speed can be increased in increments of 100
- Various sets available with different rotors. e.g. a two-row rotor for holding 18 x 1.5/2.0 ml- and 18 x 0.5 m centrifuge tubes

Cooling centrifuge models Fresco® 17 and Fresco® 21

- Cooled microlitre centrifuges
- With stop-period cooling

Technical specifications:

Model	Pico® 17 and Fresco® 17	Pico® 21 and Fresco® 21
Maximum speed	13 300 rpm	14 800 rpm
Minimum speed	300 min^{-1}	
Maximum RCF	17 000 x g	21 100 x g
Operating time	1 to 99 min / Continuous Run / Quick Run	
Temperature setting range	Pico® 17 / 21: Air-cooled or without cooling function	
	Fresco® 17 / 21: -9 to +40 °C in 1 °C increments	
Dimensions (H x W x D)	Pico® 17 / 21: 243 x 225 x 352 mm	
	Fresco® 17 / 21: 295 x 330 x 445 mm	
Power supply	230 V, 50/60 Hz	

Heraeus® Pico® and Fresco® packages with 1 rotor

Centrifuge incl. 24 x 1.5/2.0 ml rotor with aerosol-tight ClickSeal lid.

Type	Art. No.	Pack Qty.	€
Heraeus® Pico® 17 with 24-place rotor	**HE09.1** *	1	1802,00

Microlitre centrifuges MIKRO 200/200 R

By Hettich.

Standard features for both models:

- **Max capacity: 24 x 1.5/2.0 ml centrifuge tubes**
- Motor-driven lid lock
- Parameter input via keypad
- Actual value display during run
- Impulse button for quick-run pre-centrifuging
- "Open lid" button
- RCF button
- Safety: lid catch, emergency unlock, motor overheating protection and automatic unbalance switch-off

Cooling Centrifuge Mikro 200 R

- Infinitely adjustable from -10 to +40 °C in 1 °C increments
- Pre-cooling function (in 10 to 15 min to +4 °C)
- Stand-by cooling maintains desired temperature
- Cooling automatically switches off when lid is open or after a pre-set time

Technical specifications:

Model	MIKRO 200 classic	MIKRO 200 R cooled
Maximum rpm speed	14 000 rpm, adjustable in 100 increments	
Minimum rpm speed	500 rpm	
Maximum RCF	18 626 x g	
Operation time	1 to 99 min / continuous run / short run	
Temperature range	-	**-10 °C to +40 °C**
Min. Temperature at max. speed	-	+4 °C
Dimensions (W x H x D)	275 x 260 x 347 mm	281 x 260 x 547 mm
Weight	11.5 kg	28.5 kg
Power supply	220-240 V, 50/60 Hz	

Delivery without rotor. Please order separately.

Type	Art. No.	Pack Qty.	€
MIKRO 200 classic	**AA69.1** *	1	1856,55
MIKRO 200 R cooled	**AA70.1** *	1	4530,05

Accessories for MIKRO 200/200 R centrifuges

By Hettich.

Angle rotor for max 24 centrifuge tubes 1.5 / 2.0 ml

50° angle, with aerosol-tight lid, autoclavable.

Type	Art. No.	Pack Qty.	€
Angle rotor for 24 x 1.5/2.0 ml	**AA71.1** *	1	324,65

Reducing bushes

Type	Art. No.	Pack Qty.	€

Adapter sleeves for 0.2 ml reaction vials	**AA67.1** *	6	12,05

Reducing bush for conical 1.5 ml centrifuge tubes

Positive reduction, recommended for high-speed centrifuging.

Type	Art. No.	Pack Qty.	€
Adapter sleeve, tapered, for 1.5 ml vials	**AA68.1** *	6	13,50

* Longer delivery times possible. Please check with our Sales Department.

Microlitre centrifuges

Table centrifuges Mikro 220 / 220 R

By Hettich.

General specifications for both models

- 9 braking and starting ramps plus unbraked run-out possible
- Memory capacity for 10 programs
- Automatic rotor recognition
- Optional display of rpm or x g upon entry of rotor radius
- Window in lid
- Metal housing
- Safety features: Emergency unlocking device, motor overheating protection, unbalance switch-off

Cooling centrifuge Mikro 220 R cooled

- Infinitely variable from -20 to +40 °C in 1 °C-increments
- Precooling function

Technical specifications:

Model	Mikro 220 classic	Mikro 220 R cooled
Max. speed (in microlitre rotor)	18 000 rpm, adjustable to increments of 10	
Min. speed	500 rpm	
Max. RCF (in microlitre rotor)	31 514 x g	
Min. RCF	24 x g	
Operation time	1 to 99 min, continuous run, impulse key	
Temperature range	-	-20 to +40 °C
Dimensions (W x D x H)	330 x 420 x 313 mm	330 x 650 x 313 mm
Weight	21 kg	42 kg
Power supply	220-240 V, 50/60 Hz	

Delivery without rotor (please order separately).

Compact PCR plate centrifuge C1000

For 2 PCR plates in 96-well format.
- Suitable for skirted, non-skirted or semi-skirted plates (with/without half frame)
- To prevent soiling inside the rotor, only PCR plates that have been hot-laminated or sealed with film should be used
- PCR plates are inserted vertically into the rotor
- Fast centrifugation of droplets or condensate

Technical specifications:

Max. speed	2500 rpm
Max. RZB	500 x g
Max. capacity	2 PCR plates
Dimensions (W x D x H)	190 x 210 x 183 mm
Weight	1.5 kg
Voltage	230 V, 50/60 Hz

Art. No.	Pack Qty.	€
PP33.1	1	686,95

Adapter for strips and small PCR plates

The adapter's dimensions are identical to those of a standard 96 well PCR plate. Suitable for 0.2 ml PCR tubes, 8 ml PCR reaction vials, 12 ml PCR reaction vials, 24 well PCR plates and 48 well PCR plates.

Art. No.	Pack Qty.	€
TA20.1	2	61,10

Haematocrit centrifuge 200

By Hettich. For determining the percentage by volume of erythrocytes in blood. Haematocrit determination for diagnostic purposes and drug testing.
- Adjustment of time and speed
- Remaining runtime and rotational speed are shown on the display
- Safety: lid locking and holding, imbalance switch-off

Technical specifications:

Max. speed	13000 rpm, adjustable in increments of 100 rpm
Min. speed	500 rpm
Max. RCF	16060 x g
Operating time	1 to 99 min / continuous duty / short cycle (pulse key)
Dimensions (H x W x D)	228 x 262 x 352 mm
Weight	10 kg
Power supply	208-240 V, 50/60 Hz

Delivery without haematocrit rotor. Please order separately.

Art. No.	Pack Qty.	€
ANX2.1	1	1785,60

Rotor for haematocrit centrifuge 200

By Hettich.
24-tube haematocrit rotor
- For 24 standard capillary tubes
- Each capillary has its own chamber and is cushioned by holding trays at the outer rim
- Max. speed 13000 rpm max. RCF 16060 x g

Delivery incl. lid with integrated evaluation disc.

Art. No.	Pack Qty.	€
ANX3.1	1	152,65

Manual centrifuge

By Hettich. With 4-place oscillating rotors for 15 ml centrifuge tubes.
- With clamp device (max. span width approx. 40 mm) for attaching the centrifuge to lab desktops, etc.
- Dimensions: W 140 x D 175 x H 285 mm
- Weight approx. 0.9 kg

Technical specifications:

Max. capacity	4 x 15 ml
Speed max.	3000 rpm
Max. RCF	1076 x g
Max. tube length	125 mm
Max. tube ∅	17 mm

Delivery without oscillating rotor, please order separately.

Type	Art. No.	Pack Qty.	€
Manual centrifuge, without rotor	**EE90.1**	1	146,20
Accessories:			
4-place oscillating rotor	**EE91.1**	1	132,25

Rotilabo®-centrifuge tubes

Made of highly transparent **PP**. Lid made of PE. **Sterile** or non-sterile. With printed, black graduation. Certified free of nucleases, endotoxins and metals (<1 ppm). Not cytotoxic. Temperature stability: from -80 to +122 °C.

Without vertical lip, with white labelling area, centrifugable (fixed angle rotor) max. 17 000 x g (15 ml-vials) resp. 20 000 x g (50 ml-vials).

Volume (ml)	Design	∅ x H (mm)	Packaging	Art. No.	Pack Qty.	€

CD-0412 small benchtop centrifuge

With 12-slot angle rotor (45°) for centrifuging blood sample vessels, urine test tubes and centrifuge tubes (Falcon type).

- Illuminated display
- Centrifugation time, in rpm or x g
- The timer starts once the selected speed is reached
- Safety: Cover lock, speed monitoring system and protection against overheating

For use of the following types of vessel:
- 12 x 15 ml standard test tubes (∅ 17 x L 100 mm)
- 6 x 15 ml Falcon centrifuge tubes (∅ 17 x L 120 mm)
- 12 x 2.7-4.3 ml blood vials (∅ 13 x L 75 mm)
- 12 x 4.5-4.9 ml blood vials (∅ 11 x L 92 mm, ∅ 13 x L 90 mm)
- 12 x 7.5-10 ml blood vials (∅ 15/16 x L 92 mm)
- 12 x 9-10 ml blood vials (∅ 16 x L 92 mm)
- 12 x 9.5-10 ml urine test tubes (∅ 15 x L 100 mm)

Technical specifications:

Maximum speed	4500 rpm, adjustable in increments of 100 rpm
Minimum speed	300 rpm
Maximum RCF	2490 x g
Operating time	30 s to 99 min/continuous run function/short cycle (pulse key)
Dimensions (W x D x H)	140 x 255 x 245 mm
Weight	6.7 kg
Power supply	100-240 V, 50/60 Hz

Delivery incl. 12-slot angle rotor, adapter set (socket-∅ inner 16 mm, H 80 mm) and spacers (H 21 mm).

EEE2.1	1	747,15

EBA 200 and 200 S small centrifuge

By Hettich. For centrifugation of blood and urine samples, clarification of water and soil samples, etc.

General specifications of both models:
- Lid can be opened at the touch of a button
- Housing and lid made of impact resistant plastic, metal lid inner
- Overheating protection
- **With 8-tube angle rotor**

For use of the following types of vessel:
- 8 x 15 ml standard test tubes (∅ 17 x L 100 mm)
- 4 x 15 ml centrifuge tubes of type Falcon (∅ 17 x L 120 mm)
- 4 x 8 ml urine test tubes (∅ 16 x L 125 mm)
- 8 x 7.5-10 ml blood collection tubes (∅ 15/16 x L 92 mm)
- 8 x 4.5-4.9 ml blood collection tubes (∅ 11 x L 92 mm, ∅ 13 x L 90 mm)
- 8 x 10 ml blood collection tubes (∅ 15 x L 102 mm)

Technical specifications:

Model	**EBA 200**	**EBA 200 S**
Max. speed	6000 rpm, adjustable in increments of 100 rpm	8000 rpm, adjustable in increments of 100 rpm
Min. speed	500 rpm	
Max. RCF	3461 x g	6153 x g
Operating time	1 to 99 min / continuous duty / short cycle (pulse key)	
Dimensions (H x W x D)	228 x 262 x 352 mm	
Weight	8 kg	10 kg
Power supply	208-240 V, 50/60 Hz	

Delivery incl. 8-tube angle rotor for max. capacity 8 x 15 ml.

Type	Art. No.	Pack Qty.	€
EBA 200	**ANT4.1**	1	1113,70
EBA 200 S	**ANT5.1**	1	2067,25

Adapter type 1054-A for 5/6 ml vials (∅ 12 x L 75/82 mm)	**ANT6.1**	1	20,40

Small centrifuge EBA 270

By Hettich. **With 6-slot oscillating rotor** for centrifuging blood sample vessels, urine test tubes and standard centrifuge tubes.

- Variable speed and cycle time
- Display of parameters during centrifugation
- "Open lid" key for one-touch opening
- Safety: lid lock, emergency lid lock release, imbalance switch-off and metal lid
- Stainless steel centrifuging chamber

For use of the following types of vessel:

- 15 ml standard test tubes (∅ 17 x L 100 mm)
- 5/6 ml standard test tubes (∅ 12 x L 75/82 mm)
- 2.6-2.9 ml blood sample vessels (∅ 13 x L 65 mm), 2.7-3 ml (∅ 11 x L 66 mm)
- 4-5.5 ml blood sample vessels (∅ 15 x L 75 mm), 4.5-5 ml (∅ 11 x L 92 mm), 4.9 ml (∅ 13 x L 90 mm), 7.5-8.5 ml (∅ 15 x L 92 mm), 9-10 ml (∅ 16 x L 92 mm), 10 ml (∅ 15 x L 102 mm)
- 1.6-5 ml urine test tubes (∅ 13 x L 75 mm), 4.5-7 ml (∅ 13 x L 100 mm), 4-7 ml (∅ 16 x L 75 mm), 8.5-10 ml (∅ 16 x L 100 mm)

Technical specifications:

Max. speed	4000 rpm, adjustable in increments of 100 rpm
Min. speed	500 rpm
Max. RCF	2254 x g
Operating time	1 to 99 min 59 sec / continuous or intermittent duty
Dimensions (W x D x H)	326 x 389 x 239 mm
Weight	13 kg
Mains connection	208-240 V, 50/60 Hz

Delivery incl. 6-slot oscillating rotor (90), 6 sleeves with hole ∅ 17.5 x L 80 mm and 6 sleeves with hole-∅ 17.5 x L 50 mm.

Art. No.	Pack Qty.	€
PH35.1	1	1198,65

Medifuge small benchtop centrifuge with 2-in-1 hybrid rotor

By Thermo. With eight-slot hybrid rotor for centrifuging blood sample vessels, urine test tubes and standard centrifuge tubes. Depending on whether fixed-angle buckets (45°) or swing-out buckets (90°) are used in the rotor, various types of centrifugation are possible. Mixed bucket configurations (fixed-angle and swing-out buckets) are also possible.

- Centrifugation time, variably adjustable in rpm or x g
- Memory for four programs with one-touch button
- Three braking profiles – standard, soft and brake off

For using the following vessel types:

Fixed-angle buckets

- 8 x 15 ml centrifuge tubes, Falcon type (∅ 17 x L 120 mm)
- 8 x 15 ml standard test tubes (∅ 17 x L 100 mm)
- 8 x 6/12/15 ml glass tubes (∅ 12/16 x L 100/125 mm)
- 8 x 1.2-4.3 ml blood vials (∅ 8-13 x L 66/75 mm)
- 8 x 4.5-4.9 ml blood vials (∅ 11 x L 92 mm/∅ 13 x L 90 mm)
- 8 x 7.5-10 ml blood vials (∅ 15/16 x L 92 mm)
- 8 x 9-10 ml blood vials (∅ 16 x L 92 mm)
- 8 x 9.5-10 ml urine test tubes (∅ 15 x L 100 mm)

Swing-out buckets

- 8 x 15 ml standard test tubes (∅ 17 x L 100 mm)
- 8 x 6/12/15 ml glass tubes (∅ 12/16 x L 100 mm)
- 8 x 1.2-4.3 ml blood vials (∅ 8-13 x L 66/75 mm)
- 8 x 4.5-4.9 ml blood vials (∅ 11 x L 92 mm, ∅ 13 x L 90 mm)
- 8 x 7.5-10 ml blood vials (∅ 15/16 x L 92 mm)
- 8 x 9-10 ml blood vials (∅ 16 x L 92 mm)
- 8 x 9.5-10 ml urine test tubes (∅ 15 x L 100 mm)

Technical specifications:

Maximum speed	4900 rpm, adjustable in increments of 100 rpm
Minimum speed	300 rpm
Maximum RCF	Fixed-angle bucket: 3114 x g Swing-out bucket: 3490 x g
Operating time	1-99 min/continuous run function/short cycle (pulse key)
Dimensions (W x D x H)	241 x 325 x 450 mm
Power requirement	130 W
Weight	15.5 kg
Power supply	220-230 V, 50/60 Hz

Delivery incl. DualSpin™-rotor with fixed-angle and swing-out bucket set (each with eight fixed-angle and swing-out buckets) and adapter set for various vessels.

Art. No.	Pack Qty.	€
EEE1.1	1	1145,00

Benchtop centrifuge Frontier FC 5706

By Ohaus. For sample preparation and sedimentation of cells, yeasts, bacteria, etc.

- Optional display of rpm or x g
- Backlit LCD display
- Depending on the rotor, suitable for max. 6 x 50 ml centrifuge tubes of type Falcon® or 12 x 15 ml standard tubes
- Lid with locking system
- Unbalance sensor

Technical specifications:

Max. speed	6000 rpm, adjustable in increments of 50 rpm
Min. speed	200 rpm
Max. RZB (in angle rotor)	4427 x g
Operating time	10 secs to 99 h, 99 min, 99 secs or continuous operation
Dimensions (W x D x H)	291 x 392 x 266 mm
Weight	10.5 kg
Power supply	230 V, 50/60 Hz

Delivery without rotor (please order separately).

Adapter for 30-ml vessels	**HNT2.1**	2	82,10
Adapter for 15 ml standard test tubes	**HNT3.1**	2	82,10
Adapter for 15 ml tubes of type Falcon®	**HNT4.1**	2	57,00

Benchtop centrifuge Rotofix 32 A

By Hettich. For sample preparation in research and industrial laboratories.

Design:

- Display of actual status during run
- Window in lid
- Automatic rotor recognition
- Optional display of rpmor x g
- Metal casing and lid are covered with a blow/scratchproof coating
- Safety: lid locking device and tumbler, unbalance switch-off, emergency unlocking device

Technical specifications:

Max. speed (in angular rotor)	6000 rpm
Min. speed	500 rpm
Max. RCF (in angular rotor)	4146 x g
Setting range	in steps of 100
Operation time	1 to 99 min / continuous operation / button for short run
Dimensions (W x D x H)	366 x 430 x 257 mm
Weight	25 kg

Delivery without rotor, please order separately.

Type	Art. No.	Pack Qty.	€
Table centrifuge Rotofix 32 A	**EC34.1** *	1	1932,85

Accessories for Rotofix 32 A

By Hettich.

① **12-place fixed angle rotor type 1613 for 15 ml vials**
For 12 standard 15 ml vials with round base (∅ 17 x L 100 mm) or 6 centrifuge tubes 15 ml (∅ 17 x L 120 mm) with conical base.
Max. speed 6000 rpm, max. RCF 4146 x g.

Type	Art. No.	Pack Qty.	€
12-place angular rotor Type 1613	**EC35.1** *	1	312,85

② **8-place swinging bucket rotor type 1617 (45°) for 15/50 ml centrifuge tubes**
For 50 ml centrifuge tubes with conical base (∅ 29 x L 115 mm).
An additional adapter is required for 15 ml centrifuge tubes (∅ 17 x L 120 mm), please order separately.
Max. speed 4000 rpm, max. RCF 2469 x g.

Type	Art. No.	Pack Qty.	€
8-place oscillating rotor Type 1617	**EC36.1** *	1	612,75
Adapter for centrifuge tubes 15 ml	**EC37.1** *	1	22,05

③ **4-place swinging bucket rotor type 1624 (90°) for tube beaker**
For attaching 4 tube beakers. Max. speed 4000 rpm, max. RCF 2308 x g.
Please order tube beakers separately.

Type	Art. No.	Pack Qty.	€
4-place oscillating rotor Type 1624	**EC38.1** *	1	346,15

Tube beaker for standard 15 ml tubes
For centrifuging standard 15 ml tubes (∅ 17 x L 100 mm) with round base.
Number of tubes: 4 tubes per beaker, 16 tubes per rotor.
4 tube beakers are required when working with swinging bucket rotor Type 1624.

Type	Art. No.	Pack Qty.	€
Tube beaker for rotor Type 1624	**EC39.1** *	1	35,50

* Longer delivery times possible. Please check with our Sales Department.

EBA 280 small centrifuge

By Hettich. Centrifugation of water and soil samples as well as sedimentation of cells, yeasts, bacteria, etc.

- Programmable control system with 10 memory slots
- Adjustment of centrifuging time, rpm or RCF
- Input of start and stop times in increments from 1 to 9
- Safety: lid locking and holding, emergency lid lock release

Technical specifications:

Max. speed	6000 rpm, adjustable in increments of 100 rpm
Min. speed	500 rpm
Maximum RCF (in rotor type 1226)	3703 x g
Operating time	1 to 99 min / continuous duty / short cycle (pulse key)
Dimensions (H x W x D)	242 x 326 x 389 mm
Weight	11 kg
Power supply	200-240 V, 50/60 Hz

Delivery without rotor. Please order separately.

Benchtop centrifuges Universal 320 / 320 R

By Hettich.

General specifications for both models

- Short accelerating and breaking times
- It is possible to select between 9 breaking and accelerating intervals or a brakeless run-out
- Memory capacity for 10 programs
- Automatic rotor recognition
- Optional display of rpm or x g upon entry of rotor radius
- Simple rotor change
- Window in lid
- Metal housing
- Security: emergency unlocking device, motor overheating protections, unbalance switch-off

Cooling centrifuge Universal 320 R cooled

- Infinitely variable from -20 to +40 °C in 1 °C-increments
- Precooling function

Technical specifications:

Model	Universal 320 classic	Universal 320 R cooled
Max. speed (in microlitre rotor)	15 000 rpm, adjustable to steps of 10	
Min. speed	500 rpm	
Max. RCF (in microlitre rotor)	21 382 x g	
Min. RCF	24 x g	
Operation time	1 to 99 min, continuous run, impulse key	
Temperature range	-	-20 to +40 °C
Dimensions (W x D x H)	395 x 520 x 346 mm	401 x 695 x 346 mm
Weight	29 kg	52 kg
Power supply	220-240 V, 50/60 Hz	

Delivery without rotor (please order separately).

Benchtop centrifuges Heraeus Megafuge 8-series

By Thermo.

General specifications of both models:

- 2 profiles configurable for fast or gentle acceleration and deceleration times
- Optional display of revolutions in rpm or x g
- Safe rotor-changing at the touch of a button (without additional tools) for quick changeover between various applications and easy cleaning
- 3 program memory with one-touch key, with naming option
- Direct, brushless induction motor
- Illuminated display
- Text messages in various languages: German, English, French, Spanish, Russian, Italian and Dutch
- **Annual inspection acc. to BGR 500 recommended**

Megafuge 8R cooling centrifuge

- Infinitely adjustable from -10 to +40 °C in increments of 1 °C
- Precool function

Technical specifications:

Model	Megafuge 8	Megafuge 8R
Max. speed (in microlitre rotor)	14 000 rpm adjustable in increments of 100	
Min. speed (rpm)	300	
Max. RCF (in microlitre rotor)	21 693 x g	
Min. RCF	10 x g	
Max. runtime	9 h 99 min / continuous operation / Quick Run	
Temperature adjustment range (°C)	-	-10 to +40
Dimensions W x D x H (mm)	370 x 480 x 310	460 x 670 x 320
Weight (kg)	35	71

Benchtop centrifuges Megafuge 16/16R

By Thermo.

General specifications of both models:

- 6 program presets with speed buttons
- Multilingual display of programming steps, run conditions, alarms and servicing information
- Selection of 9 acceleration profiles and 10 braking profiles
- Optional display of revolutions in rpm or x g
- **Easy tool-less** fitting and changing of rotors with a single push of a button
- **Electronic** imbalance detection
- Motor-operated lid lock
- **Annual inspection acc. to BGR 500 recommended**

Megafuge 16R cooling centrifuge

- Infinitely adjustable from -10 to +40 °C in increments of 1 °C
- Precool function

Technical specifications:

Model	Megafuge 16	Megafuge 16R
Max. speed (in microlitre rotor)	15200 rpm adjustable in increments of 100	
Min. speed	300 rpm	
Max. RCF (in microlitre rotor)	25830 x g	
Min. RCF	17 x g	
Max. runtime	1 min to 9 h, 99 min / continuous operation / Quick-Run	
Temperature adjustment range	-	-10 to +40 °C
Dimensions H x W x D (mm)	360 x 440 x 605	360 x 623 x 605
Weight (kg)	57.5	91.5
Power supply	230 V, 50/60 Hz	

Delivery without rotor (please order separately).

Type	Art. No.	Pack Qty.	€
Megafuge 16	**XP77.1** *	1	3613,00
Megafuge 16 R	**XP78.1** *	1	6036,00

* Longer delivery times possible. Please check with our Sales Department.

Rotors and accessories for Megafuge 16/16R

By Thermo.

Type	① TX-400 (90°)	② Micro 30 x 2	③ M-20
Max. capacity (ml)	4 x 400	30 x 1.5/2.0	6 MT plates
Max. speed (rpm)	5000	15200	4000
Max. RCF	4696 x g	25830 x g	2272 x g

① **Oscillating rotor TX-400 (90°)**

- Max. capacity 4 x 400 ml
- Max. speed 5000 rpm max. RCF 4696 x g
- **Delivery without** round cup, lid and adapter for tubes (please order separately). 4 round cups and 4 adapters are required for operation.

Type	Art. No.	Pack Qty.	€
Oscillating rotor TX-400	**XP79.1** *	1	1399,00
Round cup for TX-400	**XP80.1** *	4	1253,00
ClickSeal lid for round cups	**XP81.1** *	4	347,00

Adapter for oscillating rotor TX-400

Nominal capacity of vessel	15 ml type Falcon®	50 ml type Falcon®	25 ml universal tubes	250 ml type Nalgene® Oak Ridge bottle
Number of vessels per rotor	36	16	12	4
Required number of adapters per rotor	4			
Max. vessel length (mm)	121	116	110	135
Max. vessel ∅ (mm)	17	29.5	25	62
Bottom shape	Conical		Round	

Type	Art. No.	Pack Qty.	€
Adapter for 15 ml type Falcon® vessels	**XP82.1** *	4	352,00
Adapter for 50 ml type Falcon® vessels	**XP83.1** *	4	352,00
Adapter for 25 ml universal tubes	**XP84.1** *	4	372,00
Adapter for 250 ml Oak Ridge bottle	**XP85.1** *	4	353,00

Accessories for Megafuge 16/16R

By Thermo.

② **30-place angle rotor for 30 x 1.5/2.0 ml Micro reaction vials**

- **Aerosol tight**
- Max. capacity 30 x 1.5/2.0 ml
- High performance: max. 15200 rpm max. RCF 25830 x g
- **Delivery incl.** aerosol-tight lid

Type	Art. No.	Pack Qty.	€
Microlitre rotor type 30 x 2	**XP86.1** *	1	1049,00
Reducing sleeves for 0.5 ml centrifuge tubes	**X118.1** *	24	169,00
Reducing sleeves for 0.2 ml centrifuge tubes	**X121.1** *	24	169,00

③ **Microtitration plate rotor M-20**

- For 2 x 3 standard microtitration plates or 2 x 1 deepwell plates
- Max. speed 4000 rpm max. RCF 2272 x g
- Max. H 65 mm
- **Delivery incl.** 2 supports and 2 adapters, but without lid (if a lid is required, an additional support set with lid must be ordered separately).

Type	Art. No.	Pack Qty.	€
Microtitration plate rotor M-20	**XP89.1** *	1	1534,00

Aerosol tight support set with lid for microtitration plate rotor M-20
Microtitration plates max. H 45 mm.

Type	Art. No.	Pack Qty.	€
Aerosol-tight support set	**XP90.1** *	2	868,00

* Longer delivery times possible. Please check with our Sales Department.

Ultrasonic baths

Mini ultrasonic cleaning unit

For cleaning spectacles, instruments and other small parts.
Plastic housing with oscillating tray made of stainless steel 1.4301.

- Timer (1, 3, 5, 7 or 9 min selectable)
- Operating frequency approx. 42 kHz

Technical specifications:

Capacity	0.5 l
Outer dimensions (L x W x H)	193 x 120 x 123 mm
Inner dimensions of tank (L x W x H)	160 x 90 x 50 mm
Inner dimensions of perforated basket (L x W x H)	140 x 70 x 40 mm
Ultrasonic output	40 W
Power supply	220-240 V, 50/60 Hz

Delivery incl. cover and basket made of plastic.

Art. No.	Pack Qty.	€
EXH1.1	1	58,60

Mini ultrasonic cleaning unit

For cleaning small parts.
Vibration tank and housing made of stainless steel 1.4301.
Power supply 220-240 V, 50/60 Hz.

- Timer 1-60 min or continuous operation
- Operating frequency approx. 40 kHz

Technical specifications:

Capacity	0.7 l
Outer dimensions (L x W x H)	175 x 110 x 175 mm
Inner dimensions of tank (L x W x H)	150 x 85 x 65 mm
Inner dimensions of perforated basket (L x W x H)	145 x 80 x 55 mm
Ultrasonic output	60 W

Delivery incl. cover and perforated basket made of stainless steel.

Art. No.	Pack Qty.	€
CLL4.1	1	141,90

Mini ultrasonic cleaning unit with heater

For cleaning small parts.
Vibration tank and housing made of stainless steel 1.4301.
Power supply 220-240 V, 50/60 Hz.

- Timer 1-15 min or continuous operation
- Heating is adjustable up to approx. 80 °C
- Operating frequency approx. 45 kHz

Technical specifications:

Capacity	0.8 l
Outer dimensions (L x W x H)	200 x 110 x 160 mm
Inner dimensions of tank (L x W x H)	180 x 90 x 50 mm
Inner dimensions of perforated basket (L x W x H)	178 x 85 x 40 mm
Ultrasonic output	60 W
Heating capacity	120 W

Delivery incl. cover and perforated basket made of stainless steel.

Art. No.	Pack Qty.	€
CLL5.1	1	188,15

Ultrasonic baths

Ultrasonic cleaning units H-series

Compact universal cleaning units for cleaning laboratory utensils, allowing faster dissolution and degassing of fluids.
Vibration tank and housing made of stainless steel 1.4301.
Mains connection 220-240 V, 50/60 Hz.

Features:
- Timer 1-60 min or continuous operation
- Heating is adjustable up to approx. 80 °C
- Operating frequency approx. 45 kHz
- Models H 30 to H 120 with outlet

Technical specifications:

Model	Capacity (l)	Inner dimensions of tank L x W x H (mm)	Outer dimensions L x W x H (mm)	Heating output (W)	Ultrasonic output (W)
H 22	1.65	240 x 140 x 65	300 x 170 x 225	150	120
H 30	2.6	240 x 140 x 100	300 x 165 x 225	180	180
H 40	3.55	300 x 150 x 100	330 x 175 x 225	200	240
H 60	5.3	300 x 150 x 150	330 x 175 x 290	250	240
H 120	9	500 x 135 x 150	600 x 165 x 355	350	300

Delivery incl. cover and perforated basket made of stainless steel.

Model	Volume (l)	Inner dimensions of perforated basket L x W x H (mm)	Art. No.	Pack Qty.	€
H 22	1,65	220 x 120 x 50	**CPK5.1**	1	310,70

Digital ultrasonic cleaning units, D-series

High-performance universal cleaning units with digital display for cleaning laboratory utensils, allowing faster dissolution and degassing of fluids.
Vibration tank and housing made of stainless steel 1.4301.
Mains connection 220-240 V, 50/60 Hz.

Features:
- Timer 1-30 min or continuous operation
- Heating is adjustable up to approx. 80 °C
- Power control 50/100 %
- Sweep technology
- Degas function
- Operating frequency approx. 40 kHz
- Models D 30 to D 280 with outlet

Technical specifications:

Model	Capacity (l)	Inner dimensions of tank L x W x H (mm)	Outer dimensions L x W x H (mm)	Heating output (W)	Ultrasonic output (W)
D 20 Q	1.55	150 x 140 x 100	175 x 165 x 225	60	80
D30	2.6	240 x 140 x 100	265 x 165 x 225	120	160

Ultrasonic baths

Ultrasonic compact baths

By Bandelin.

- Power supply 230 V, 50/60 Hz
- Robust stainless steel shell
- Unit frequency 35 kHz
- Protected against drips and splashes
- For intensive and gentle cleaning of glassware, metal parts, electronic components, instruments etc.
- For degassing liquids
- For accelerating slurry processes
- For manufacturing emulsions

① SONOREX SUPER ultrasonic compact baths

- Timer 1 to 15 min or continuous run
- Type "H"-units with heating 30-80 °C, can be set in 5°-increments (except Type RK 31 H: Heating cannot be adjusted but is permanently set at 65 °C)

② SONOREX DIGITEC ultrasonic compact baths

- Membrane keypad with clear symbols
- Timer 1 to 30 min or continuous run
- "H"-units with heating 20 to 80 °C, adjustable in 5°-increments
- Safety switch-off after 12 h
- LED-display for temperature and heating phase
- Warning-LED for excess temperature
- Degas - function can be activated

① SONOREX SUPER ultrasonic compact baths

Delivery without perforated basket and lid (optional) (please order separately).

SONOREX PR 140 D/DH ultrasonic pipette cleaner

By Bandelin. Ultrasonic pipette cleaner to gently clean volumetric glass or plastic devices up to a length of 755 mm.

- Short cleaning times
- Timer (1, 2, 3, 4, 5, 10, 15, 30 min or continuous run)
- Particularly robust thanks to the V4A stainless steel tray (1.4571)
- Drop handles for easier transportation
- Ball valve means that it can be emptied quickly and easily
- Model PR 140 DH with optional heating (can be adjusted from 20-80 °C) to increase the cleaning effect, e.g. in the case of grease residue and stubborn soiling

Technical specifications:

Model	**PR 140 D**	**PR 140 DH**
Capacity	Min. 9 to max. 18 l	
Inner dimensions (L x W x H)	150 x 150 x 895 mm (useful depth 850 mm)	
Outer dimensions (L x W x H)	330 x 330 x 1003 mm	
Operating frequency	35 kHz	
Peak ultrasonic output	860 W	
HF power	200 W_{eff}	
Heating output	-	700 W
Weight	19.5 kg	19.7 kg
Power supply	230 V, 50/60 Hz	

Number of pipettes to be cleaned in the pipette basket:
9 mm ∅ - approx. 90 pcs; 10.7 mm ∅ - approx. 55 pcs;
14 mm ∅ - approx. 35 pcs; 20.0 mm ∅ - approx. 15 pcs;
29 mm ∅ - approx. 10 pcs.

Delivery incl. stainless steel lid and PE pipette basket (inner dimensions: ∅ x H 120 x 275 mm).

Type	Art. No.	Pack Qty.	€
Model PR 140 D	**ECX9.1** *	1	3155,15
Model PR 140 DH	**ECY0.1** *	1	3499,15

* Longer delivery times possible. Please check with our Sales Department.

Ultrasonic baths

Ultrasonic units, Elmasonic S series

By Elma. For intensive cleaning of laboratory instruments made of glass, plastic and metal. Suitable for degassing HPLC-solvents and beverage samples containing carbon dioxide.

- Operating frequency 37 kHz
- Housing made of stainless steel
- **Sweep-Function:** continuous frequency change for fast and consistent cleaning
- **Degas-Function:** for degassing cleaning solutions and liquids
- Timer 0-30 min and continuous run, safety switch- off after 12 h
- Quick run function on the S 30 and later models
- Some models have a heating component which can run dry, and is infinitely adjustable from 30-80 °C („H“ devices)
- **Autostart-function:** Ultrasonic cleaning begins when the preselected cleaning temperature has been reached
- LED displays for ultrasound function and heating („H“ devices only)

Delivery without perforated basket and lid (optional) (please order separately).

Elmasonic P digital ultrasonic cleaning units

By Elma.

- Stainless steel vibration tank and housing
- Digital LED display for clear indication of frequency, output, actual and nominal temperatures and timer
- 3/8″ drainage valve on back of unit (operated at the side)
- Ultrasonic frequency is switchable between 37 kHz (basic cleaning, mixing, dissolving) and 80 kHz (mild cleaning, low noise)
- Ultrasonic intensity is adjustable from 30 % (for sensitive surfaces) to 100 % in increments of 10%
- Automatic frequency switch-over for simultaneous coarse and fine cleaning
- **Sweep function** for an optimised sound field distribution
- **Pulse function** for intensification of ultrasonic cleaning power by up to 20 %
- Auto **Degas function** for quick degassing
- Temperature-controlled ultrasonic cleaning
- Dry run safe heating, adjustable from 30 to 80 °C in increments of 10°
- Automatic safety switch-off at a bath temperature of 90 °C or after more than 12 h of continuous duty

Elmasonic S 50 R

By Elma. Ultrasonic cleaning unit for cleaning test sieves, HPLC solvent degassing and sample preparation. With microprocessor-controlled ultrasound modes and special programs for routine laboratory applications and cleaning tasks.

- **Sieve cleaning function:**
  Strong cleaning pulses make for optimal sieve cleaning
- **Degas/(Autodegas) function:**
  Efficient and noise-reduced degassing of HPLC solvents and carbonate drink samples
- **Sample preparation function:**
  For routine tasks such as mixing, dissolving, dispersing and cleaning
- Short-time operation between 1 and 30 minutes or continuous duty, adjustable using rotary switch
- LED display of set cleaning time and remaining cleaning time
- Cleaning bath made of cavitation resistant stainless steel
- Can be connected to laboratory stand for noise-reduced operation
- Plastic carry handles

Technical specifications:

Outer dimensions of unit	∅ 260 x H 350 mm
Inner dimensions of bath	∅ 240 x H 130 mm
Total power consumption	150 W
Effective ultrasonic power	150 W
Max. ultrasonic power	600 W
Ultrasonic frequency	37 kHz
Max. filling capacity	5.3 l
Weight	5 kg

Delivery without accessories (please order separately).

Noise protection boxes for ultrasonic cleaning devices

By Elma. Noise protection boxes for ultrasonic cleaning devices reduce typical cavitation noises by approx. 20 dBA and subjective noises by 75 %. Cover made of Plexiglas to identify the unit function and fill level. Integrated air extraction to remove steam from the box, manually connectible. This allows the box to be used directly at work stations in chemical laboratories, dental laboratories and workshops.

Technical specifications:

Ultrasonic baths

Ultrasonic devices Elmasonic xtra TT

By Elma. Powerful ultrasonic baths with permanently integrated sweep function for uniform cleaning. Oscillating bath made of cavitation resistant stainless steel. With LED display for ultrasonic and heating function.

- Ultrasonic frequency 37 kHz
- Permanently integrated sweep function for uniform distribution of the ultrasonic power in the entire cleaning bath
- Switchable dynamics function enhances the ultrasonic peak performance and improves the cleaning effect
- Permanent operation of brief operation adjustable between 1 and 30 minutes
- Temperature selectable from 30-80 °C in steps of 5°
- Adjustable limit temperature, LED warning display if exceeded
- Auto-start function: ultrasonic starts automatically when the preselected temperature is reached
- Drain ball valve 3/8″
- Heating protected against dry running
- Automatic safety switch-off after 8 hours continuous operation or 90 °C bath temperature
- Removable power cable with rubber connector

Ultrasonol® 7 - neutral

Gentle on materials, this special cleaner assists and intensifies the ultrasonic cleaning process.

- Also suitable for sensitive objects and materials. Non-irritating and non-toxic
- Non-flammable, non-gassing, biodegradable
- Liquid concentrate pH 7

Use 2-10 % in water.

Reaction time approx. 10 min; after washing, rinse thoroughly and dry.

CC47.1	1 l	16,70

Ultrasonic cleaner Elma clean 65

Gentle neutral cleansers with corrosion inhibitor.

For instruments and metals made of sensitive materials such as glass, plastic, rubber and metal. Removes finger prints, dust, pigments, light greases and oils.

Dosage: 2-5 % at 20-80 °C.

Danger H318

Art. No.	Pack Qty.	€
CC45.1	1 l	15,05

Ultrasonic cleaner EC 60

Acidic instruments cleaner for the laboratory and workshop.

Suitable for cleaning laboratory equipment and tools made of stainless steel, glass and plastic. Removes metal oxides and mineral dirt, e.g. lime, rust, mineral oils and greases.

Dosage: 1-10 % at 40-70 °C, in immersion bath without ultrasound >3 %.

RBS® laboratory cleaning agent

Advantages at a glance:

- **No residues:** all RBS® cleaning agents wash off without leaving any traces. No residues of cleaner are visible on the cleaned article after rinsing. For consistent and error-free analytical results.
- **Safe and environmentally friendly:** RBS® cleaning solutions produce no harmful vapours or unpleasant odours under normal working conditions, and therefore are safe to use. All surfactants contained in the product are biodegradable.
- **Effective:** efficiently removes stubborn residues due to excellent emulsifying, wetting and dispersing properties. A safe alternative to hazardous bases or acid mixtures (e.g. alkaline baths, chromic-sulphuric acid).
- **Inexpensive:** RBS® cleaning agents are highly economical due to their low usage concentration.

- Effective cleaning of laboratory glassware, plastics, porcelain, ceramics, crystal, stainless steel, etc. in laboratories (analysis, monitoring, research and development), universities, institutes, industry etc.
- Effective against grease, oils, salts, limes, proteins, radioactive contamination and other chemical and biological residues.
- Suitable for manual cleaning, dishwashers and ultrasound baths or for automatic cleaning in immersion bath

RBS laboratory cleaning agent

RBS® 25

Alkaline liquid laboratory cleaning concentrate
- **For manual cleaning**
- **For cleaning in immersion baths and ultrasonic baths**

Cleans and degreases surfaces and objects made of glass, ceramics, porcelain, synthetics, or stainless steel. Also suitable for industrial applications (processing of electronic components, wafers, lenses, etc.).

- pH value use concentration 2 %: approx. 11.9
- Density 1.094 g/ml
- Foaming
- **Ingredients:** sodium hydroxide, sodium hypochloride solution, surfactants, phosphates

Use concentration: 20 ml per litre of water. Temperatures up to approx. 50 °C accelerate the cleaning process. Items to be cleaned should remain in the immersion bath for 3 hours. Rinse thoroughly with deionised water.

Danger H290-H314-EUH031

Art. No.	Pack Qty.	€
AL89.1	5 l	61,20

RBS® 35

Alkaline liquid laboratory cleaning concentrate
- **For mechanical cleaning and normal dirt**
- **For cleaning in immersion baths and ultrasonic baths**
- **Also suitable for use with hard water**

For cleaning and degreasing all non-corrosive materials and surfaces. Also suitable for industrial cleaning and degreasing of metals, electronic components, wavers, lenses, etc. Rinses off trace-free.

- pH value use concentration 2 %: approx. 11.5
- Density 1.07 g/ml
- Slightly foaming
- **Ingredients:** sodium hydroxide, tetrapotassium diphosphate, sodium carbonate, sodium hypochlorite solution, surfactants

Use concentration: 20 ml per litre of water; increase the dosage for stubborn dirt.
Rinse thoroughly with deionised water.

9238.1	1 l	16,80
9238.2	5 l	68,70
9238.4	20 kg	195,65

RBS® 50

Highly alkaline liquid laboratory cleaning concentrate
- **For stubborn dirt**
- **For universal cleaning, immersion bath and ultrasonic bath cleaning, as well as for laboratory dishwashers**

For cleaning and degreasing all non-ferrous materials and surfaces. Also removes problematic substances such as radioactive residues, Canada balsam, silicones, etc. For industrial applications to treat metal parts, lenses, electronic components, etc. Rinses off trace-free.

- pH pure product: 13.5
- Density 1.244 g/ml
- Non foaming
- Also suitable for use with hard water
- **Ingredients:** tetrapotassium diphosphate, sodium hydroxide, sodium hypochlorite solution, mineral salts

Use concentration:
Manual and automatic cleaning: 10 ml per litre of water.
Cleaning in dishwashers and ultrasonic baths :
3-5 ml per litre of water. Dishwasher cleanable, particularly effective in combination with RBS NA 2 and/or RBS R 60.
Rinse thoroughly with deionised water.

RBS® Neutral T

Neutral liquid laboratory cleaning concentrate
- **For manual or automatic cleaning**
- **In tissue culture and microbiology**

Suitable for all, particularly sensitive materials and surfaces. Non-corrosive, no damaging influence on the culture growth.

- **Chlorine-free**
- pH-neutral cleaning solution
- Density 1.072 g/ml
- Slightly foaming
- **Ingredients:** surfactants, isotridecanol, ethylene glycol monophenyl ether, phosphates
- Biodegradable

Use concentration: 4 to 6 % v/v depending on amount of dirt.
Rinse thoroughly with deionised water.

Art. No.	Pack Qty.	€
0180.1	1 l	17,00
0180.2	5 l	64,40

RBS laboratory cleaning agent

RBS® IND 470

Alkaline liquid laboratory cleaning concentrate for decontaminating radioactive residues (tested for ^{99}Mo, ^{192}Ir, ^{131}I). Also removes greases, silicone oils, carbonates, metal particles, dust and organic substances. Suitable for automatic or manual ultrasound cleaning of objects, containers and surfaces made of glass, stainless steel and plastic.
Halogen free (Cl; I; Br; F < 20 µg/g) and **phosphate-free** (P < 5 µg/g).

- pH pure product: 14.0
- Density at 20 °C: 1.06
- Slightly foaming
- **Ingredients:** potassium hydroxide, isotridecanol, surfactants
- Unsuitable for corrodible metals
- Also suitable for use with hard water

Use concentration: 2 % v/v for normal contamination, temperatures up to approx. 50 °C accelerate the cleaning process. Soak parts to be decontaminated in a 10 % solution at 60 °C for at least 6 h. Rinse thoroughly with deionised water.

TA00.2	20 kg	156,95

RBS® pF T

Alkaline liquid laboratory cleaning concentrate
- **Phosphate-free**
- **For manual or automatic cleaning**
- **Also suitable for use with hard water**

Particularly suitable for use in analytic laboratories. Equalizes water hardness. Rinses off trace-free.

- pH value use concentration 2 %: approx. 11.8
- Density 1.072 g/ml
- Slightly foaming
- **Ingredients:** tetrasodium salt, sodium hydroxide, sodium carbonate, sodium hypochloride solution, surfactants
- Biodegradable

Use concentration: 20 ml per litre of water; increase the dosage for stubborn dirt.
Rinse thoroughly with deionised water.

9243.2	5 l	68,70
9243.4	20 kg	220,40

RBS® T 115

Alkaline liquid laboratory cleaning concentrate with excellent emulsifying and wetting properties. For self and manual cleaning or use in ultrasonic baths. Strongly recommended for laboratory glass, quartz, porcelains or synthetics. Removes organic and inorganic substances such as fats, proteins, distillation residues, and biological contaminants. Reduces water hardness and counteracts scaling. Is free of phosphates and is therefore suitable for use in analytical labs. Biodegradable.

- **Phosphate-free**
- pH of a 2 % cleaning solution: 11.7
- Density at 20 °C: 1.08
- Slightly foaming
- **Ingredients:** tetrasodium salt, sodium hydroxide, sodium carbonate, sodium hypochlorite solution, surfactants
- Unsuitable for corroding metals and sensitive materials
- Also suitable for use with hard water

Use concentration: 2 % v/v, higher concentrations can be used to remove stubborn dirt. Temperatures up to approx. 50 °C accelerate the cleaning process. Rinse thoroughly with deionised water.

RBS for laboratory dishwashers

RBS® T 105

Alkaline liquid laboratory cleaning concentrate. For self and manual cleaning or use in ultrasound baths. Suitable for laboratory glassware, stainless steel, porcelain and plastics. Removes organic and biological substances, such as greases, distillation residues, proteins and cell cultures. Reduces water hardness and counteracts scaling.
Rinses off easily without leaving a residue.

- pH-value cleaning solution 2 %: 11.8
  pH-value concentrate: 13.3
- Density at 20 °C: 1.12
- Foaming
- **Ingredients:** tetrapotassium diphosphate, surfactants, sodium hypochlorite solution
- Unsuitable for corrodible metals
- Also suitable for use with hard water

Use concentration: 2 % v/v, higher concentrations can be used to remove stubborn dirt. Temperatures up to approx. 50 °C accelerate the cleaning process.
Rinse thoroughly with deionised water.

Warning H319

Art. No.	Pack Qty.	€
PY99.1	5 l	37,85

RBS® T 230

Neutral liquid laboratory cleaning concentrate for cleaning sensitive materials such as volumetric glassware, aluminium, zinc, tin, PS or PC. Non-corrosive and fully biodegradable. Self-acting (no mechanical cleaning required). Also suitable for use in microbiology, as it has no harmful effect on culture growth.

- **Chlorine- and oxidant-free**
- pH-neutral cleaning solution
- Density at 20 °C: 1.07
- Non-corrosive, non-toxic and non-irritant
- Slightly foaming
- **Ingredients:** surfactants, isotridecanol, ethylene glycol monophenyl ether, phosphates
- Also suitable for use with hard water

Use concentration: 4 to 6 % v/v, i.e. 40 to 60 ml RBS® T 230 per litre of water depending on contamination. Objects should be fully immersed for cleaning.
Application time: 2 to 12 h. Temperatures up to approx. 60 °C accelerate the cleaning process. Stubborn dirt be removed by brush or rinsing prior to application. Rinse thoroughly with deionised water.

Warning H319

Art. No.	Pack Qty.	€
LY17.1	5 l	38,20

RBS® T 305

Acidic liquid laboratory cleaning concentrate for manual cleaning.
Particularly well suited to the removal of grease, oils, limescale residue, metal oxides, salts and inorganic residues from glass, ceramic, porcelain and non-corrosive stainless steel surfaces, and acid-resistant synthetics.Also for cleaning floors, workbenches and animal cages.
Apply the cleaning agent, allow it to act; if necessary, brush off and rinse thoroughly with water.

- **Free of chlorine**
- pH value use concentration: 1.5 to 1.2
- Density 1.40 g/ml
- Foaming
- **Ingredients:** phosphoric acid, isotridecanol, surfactants
- Biodegradable
- Also suitable for use with hard water

Use concentration: 2 to 5 % v/v depending on amount of dirt.

Danger H290-H314

Art. No.	Pack Qty.	€
KT39.1	5 l	49,40

RBS® A 285 SOLID pF

Powder-based, alkaline high-performance detergent for laboratory dishwashers

Suitable for laboratory glassware, stainless steel, porcelain and alkali-resistant plastics. Removes greases, oils, distillation residues and other organic and mineral substances. Rinses off trace-free.

- Free of phosphates, EDTA and NTA
- pH value use concentration 0.3 %: 11.4
- **Ingredients:** anionic and non-ionic surfactants, carbonates, silicates, sodium hydroxide
- Surfactants, biodegradable
- Also suitable for use with hard water

Use concentration: 0.1 % m/v, for high levels of contamination or high water hardness, the concentration can be increased to 3 g per litre. Temperature between 50 and 95 °C accelerate the cleaning process. Especially in combination with RBS® A 375 and/or RBS® R 60 pF. Rinse with deionized water.

Danger H315-H318-H335

HNY8.1	4,5 kg	50,35

RBS for laboratory dishwashers

RBS® A 375

Liquid, acidic pre-rinse and neutralisation agent for laboratory glassware washers
Removes lime scale deposits, hydroxides and many other residues from glass, plastic, porcelain, ceramic, crystal, stainless steel etc.

- **Free of surfactant, chlorine and phosphate**
- Rinses off easily without leaving a residue
- Also suitable for use with hard water
- Non foaming
- pH value (0.5 %): 2.6
- **Ingredients:** citric acid, lactic acid

Prewash: removes stubborn dirt and stains, increasing the effectiveness of alkaline main cleaning concentrates.
Rinsing: neutralises alkaline cleaning concentrate residues after the main cleaning cycle and protects the garment and machine from lime scale deposits.

Use concentration: 0.2 % (in the case of stubborn dirt/stains or hard water, the concentration can be increased up to 0.5 %).
Rinse with deionised water to ensure residue-free results.
Particularly effective in combination with RBS® 50.

Danger H315-H318

Art. No.	Pack Qty.	€
TK44.1	5 l	45,05

RBS® NA 2

Liquid, acidic pre-rinse and neutralisation agent for laboratory glassware washers

Prewash: removes stubborn dirt such as carbonates, hydroxides, salts and organic bases. Enhances the performance of alkaline main wash cycle detergents.
Rinsing: neutralizes alkaline detergent residues and prevent limescale deposits on the parts cleaned and in the dishwashers.

- **Free from tensides and chlorine**
- pH value use concentration: 2.2 to 1.8
- Density 1.378 g/ml
- Non-foaming
- **Ingredients:** phosphoric acid

Use concentration: 0.2 to 0.5 % v/v. Particularly effective in combination with RBS® SOLID, RBS® B 210 T or RBS® 50. Rinse with deionised water.

Danger H290-H314

Art. No.	Pack Qty.	€
AL93.1	5 l	57,85

RBS® B 210 T

Mildly alkaline cleaning concentrate for laboratory glassware washers
- **For sensitive instruments and parts in laboratories and industry**
- **High cleaning effect**

Effectively removes dust and inorganic contaminants. Also suitable for aluminium and synthetics, such as PC and PS. No defoamers or neutralising agents.

- **Free from chlorine**
- pH value in use concentration: 9.7
- Density 1.178 g/ml
- **Ingredients:** Na-EDTA, diethylene glycol, mineral salts
- Also suitable for use with hard water

Use concentration: 0.5 % v/v. Higher concentrations can be used to remove stubborn contamination. Temperatures from 40-60 °C speed up the cleaning process.
Rinse with deionised water.

Danger H318

Art. No.	Pack Qty.	€
KC19.1	5 l	62,90

RBS® R 60

Liquid, slightly acidic neutralisation agent for laboratory glassware washers

Neutralizes alkaline detergent residues and prevents limescale deposits on item cleaned and in the dishwashers. Accelerates the drying process and produces a glossy finish.

- **Free of chlorine**
- pH value use concentration: 6.3 to 3.6
- Density 1.016 g/ml
- Non-foaming
- **Ingredients:** surfactants, sodium cumolsulphonate, 2-propanol, phosphoric acid

Use concentration: 0.1 to 0.3 % v/v. Particularly effective in combination with RBS® 50 and/or RBS® SOLID. Rinse with deionised water.

Warning H226-H290-H315-H319-H412

N333.3	25 kg	165,55

neodisher® LaboClean FT

By Dr. Weigert. **Liquid, alkaline cleaning agent**.
Oxidizing, **free of tensides.**

Particularly effective for residue-free cleaning of pharmacy glassware, infusion flasks, glassware for cell and tissue cultures, as well as in the areas of microbiology, virology and nuclear medicine. Removes residual nutrient media, blood, protein, radioactive contamination, residues of tissue cultures and cell layers as well as other organic residues. Contains phosphates, potassium hydroxide and sodium hypochlorite. Reduced efficiency with hard water .

Disinfecting agents for surfaces

BODE X-Wipes

All-purpose fleece wipes dispenser system for filling with all liquid Bode surface disinfectants.
Absorbent and tear resistant fleece wipes made of 100 % PET (60 g/m^2) ensure optimal release of active ingredients during disinfection.

- Colour sealing cap for easier differentiation between products in use
- Smooth surfaces and 3-part lid system protect against contamination or evaporation of the solution
- Minimal processing required before use of fleece roll in the foil bag, bag can be filled directly with application solution
- Shelf life of application solution: approx. 28 days

Applications:
disinfection of surfaces in areas where a maximum of hygiene, economy and utility is required. Suitable for pre-cleaning and disinfection of non-soakable medical instruments and endoscopes.

Kohrsolin® extra tissues

Aldehyde-containing disinfection wipes with virucidal activity for daily prophylactic disinfection as well as for specific disinfection where a broader spectrum of efficacy is required.
Applications: for washable surfaces on medical devices and inventory, and in hygiene-sensitive areas in the pharmaceuticals industry, cosmetics industry and laboratories.
Spectrum of activity: bactericidal, yeasticidal, fungicidal, tuberculocidal, mycobactericidal, sporicidal (Clostridium difficile spores), limited virucidal efficacy (incl. HBV, HIV, HCV), virucidal and effective against murine norovirus, hepatitis A virus, polyoma virus and rotavirus.

- Supplied with **Kohrsolin® extra** pre-soaked, ready-to-use disinfection wipes
- Rapid and comprehensive action
- Good material compatibility
- Practical wipe folding system allows easy and safe removal of individual tissues from the resealable flowpack packaging
- High-quality, tear resistant and absorptive PET fleece, Wipe size 180 x 200 mm
- Good wetting and cleaning, leaves minimal residue

Use disinfectants carefully. Always read labels and product information carefully before use.

Danger H317-H350

Type	Art. No.	Pack Qty.	€
Flowpack containing 80 wipes	**APA0.1**	1	n. a.

Bacillol® 30 tissues

Nonaggressive disinfection wipes for rapid disinfection of sensitive surfaces in food processing areas, in sensitive areas where there is direct contact with products, surfaces in healthcare facilities as well as surfaces of medical devices and inventory. Also suitable for the disinfection of displays, keyboards and control panels on sensitive equipment.
Spectrum of activity: bactericidal, yeasticidal, limited virucidal efficacy (incl. HBV, HIV, HCV, polyoma virus, rotavirus and murine norovirus).

- Supplied with **Bacillol® 30 Foam** pre-soaked, ready-to-use disinfection wipes
- Rapid and comprehensive action
- Aldehyde, colourant and fragrance free
- Tested for material compatibility with PC, PS, Plexiglas®, latex and synthetic leather (examination tables etc.)
- Practical wipe folding system allows easy and safe removal of individual tissues from the resealable flowpack packaging
- High-quality, tear resistant and absorptive PET fleece, Wipe size 180 x 200 mm
- Good wetting and rapid drying

Use disinfectants carefully. Always read labels and product information carefully before use.

Warning H226-H319

Type	Art. No.	Pack Qty.	€
Flowpack containing 80 wipes	**ANY9.1**	1	n. a.

Kohrsolin® FF tissues

Aldehyde-containing disinfection wipes for prophylactic surface disinfection.
Applications: for washable surfaces on medical devices and inventory, and in hygiene-sensitive areas in the pharmaceuticals industry, cosmetics industry and laboratories.
Spectrum of activity: bactericidal, yeasticidal, fungicidal, limited virucidal efficacy (incl. HBV, HIV, HCV) and effective against murine norovirus, adeno virus, polyoma virus and rotavirus.

- Supplied with **Kohrsolin® FF** pre-soaked, ready-to-use disinfection wipes
- Formaldehyde-free
- Excellent material compatibility
- Practical wipe folding system allows easy and safe removal of individual tissues from the resealable flowpack packaging
- High-quality, tear resistant and absorptive PET fleece, Wipe size 180 x 200 mm
- Good wetting and cleaning, leaves very little residue

Use disinfectants carefully. Always read labels and product information carefully before use.

Flowpack containing 80 wipes	**APA1.1**	1	n. a.

Disinfecting agents for surfaces

Mikrobac® tissues

Nonaggressive alcohol and aldehyde-free disinfection wipes for rapid disinfection of sensitive, alcohol-sensitive medical devices and work surfaces in clinics, surgeries, nursing homes and laboratories.
Spectrum of activity: bactericidal, yeasticidal, limited virucidal efficacy (incl. HBV, HIV, HCV) and effective against murine norovirus, adeno virus, polyoma virus and rotavirus.
Active ingredients: didecyldimethylammonium chloride and benzyl-C12-18-alkyl dimethyl ammonium chloride.

- Fast-acting
- Alcohol, aldehyde, colourant and fragrance free
- Excellent material compatibility
- Practical wipe folding system allows easy and safe removal of individual tissues from the resealable flowpack packaging
- High-quality, tear resistant and absorptive PET fleece
- Good wetting and cleansing effect

Use disinfectants carefully. Always read labels and product information carefully before use.

Mikrobac® Tissues
Wipe size 180 x 200 mm. For convenient disinfection of small surfaces, range approx. 1 m².

Compressed air dedusting spray

This dry, oil-free compressed gas leaves no residue and is non-flammable in accordance with Directive 2008/47/EC. The compressed gas has a low global warming potential (GWP = 7). The spray can with attachable spray tube allows dust and dirt to be blown out in a targeted manner. The balanced spray system generates spraying pressure of medium strength and can therefore be used even on delicate components without any issues.

Application examples:
- Blowing out dust and dirt in electronics and precision mechanics
- For use on delicate components such as lenses and sensors in measurement technology, microscopy, photography and the optical industry

Propellant: hydrofluorolefin (HFO)

Delivery incl. spray tube for targeted application.
Warning H229

Art. No.	Pack Qty.	€

High pressure compressed air spray 67

With extra-strong spray jet.
This dry, oil-free compressed gas leaves no residue and is non-flammable in accordance with Directive 2008/47/EC. With low global warming potential (GWP = 7). The spray can with attachable spray tube allows dust and dirt to be blown out in a targeted manner. The extra-strong spray system generates a high spraying pressure and is therefore particularly suitable for removing stubborn dirt over large surfaces.

Application examples:
- Blowing out stubborn dust and dirt deposits in electronics and precision mechanics
- The high spraying pressure is ideal for cleaning large surfaces in control cabinets, plants and machines

Propellant: hydrofluorolefin (HFO).

Delivery incl. spray tube for targeted application.
Warning H229

KIMTECH® Science laboratory tissues

By Kimberly-Clark.

- Two-ply, white, bleached without using chlorine
- **Made of 100 % pure pulp** - therefore particularly absorbent and soft
- Suitable for application with solvents and chemicals
- Low-fluffing and especially ideal for sensitive areas
- Excellent for wiping smaller amounts of liquid and for cleaning pipettes and slides

PROFI floor mops

By Leifheit. With convenient foot control and changeable mop heads for universal use on all floor surfaces. Aluminium handle with hanging loop and non-slip grip. Flexible, flat-folding 360-degree swivel head enables effective cleaning in a wavy line. Wiping width 420 mm.
Delivery incl. PROFI micro duo mop head.

Type	Length (mm)	Art. No.	Pack Qty.	€
Aluminium handle	140	**XP59.1**	1	50,50
Extending handle	80-135	**XP60.1**	1	51,40

Mop heads for PROFI floor mops

① **PROFI micro duo**
Duo-fibre system enables easy dirt pickup. Suitable for all floor types. Washable at 60 °C.

Art. No.	Pack Qty.	€
XP61.1	1	22,55

② **PROFI cotton plus**
Containing cotton, ideal for tiles and stone floors. Also removes coarse dirt. Washable at 60 °C.

Art. No.	Pack Qty.	€
XP62.1	1	22,55

③ **PROFI static plus**
For dry cleaning. Attracts dust and hair using static electricity. Washable at 40 °C.

Art. No.	Pack Qty.	€
XP63.1	1	22,55

PROFI Evo mop wringer

By Leifheit. Made of PP. Capacity: 8 litres. Sturdy foot-operated mop wringer allows cleaning without bending down, using force or getting hands in dirty water.
The wringer can be stowed inside the bucket to save space.
With sturdy carry handle and two built-in castors for easy transport.
Ideal for use in combination with PROFI floor mops.

Art. No.	Pack Qty.	€
XP64.1	1	85,50

Powerslide window wiper

By Leifheit. Made of ABS. For streak-free cleaning of smooth surfaces. Movable joint reduces wrist strain. Locking mechanism on handle to control wiping angle. Wiper width 280 mm.

Art. No.	Pack Qty.	€
XP65.1	1	12,80

Brush and dustpan set

By Leifheit. Made of PP. Ergonomic non-slip handle. With special bristles and flexible rubber lip for easy collection of dirt. Large dirt chamber for safe transport.

Art. No.	Pack Qty.	€
XP66.1	1	14,55

Rotilabo®-brush and dustpan set

Made of PP. Square. Dustpan with brush comb and lip.
Bristles made of polymex. L 330 x W 195 x H 90 mm.

Art. No.	Pack Qty.	€
ET50.1	1	6,40

Bagless floor vacuum cleaner

By Bosch.

- SmartSensor control: Sensor-controlled power monitoring with an LED signal for perfect cleaning results
- QuattroPower System: High-performance technology for excellent cleaning with low energy consumption
- SilenceSound System™: For especially quiet operation
- Fully automatic SelfClean system: Avoids contact with dust when cleaning the filter
- Intelligent SelfClean system: Automatic self-cleaning of the integrated filter system
- Washable HEPA hygiene filter. Suitable for allergy sufferers
- Telescopic tube with clip lock
- Electronic suction power regulation with rotary control
- Ergonomic premium handle for effortless vacuuming
- Easy to switch off and put away
- Automatic cable retraction system
- 4 swivel castors

Technical specifications:

Dimensions (W x H x D)	310 x 320 x 470 mm
Weight	6.7 kg (without suction accessories)
Power consumption	700 W
Power supply	220–240 V, 50 Hz
Sound power level	66 dB (A)
Energy efficiency class	A
Dust emission class	A
Hard floor surface cleaning class	A
Carpet flooring cleaning class	C
Dust container volume	3 l
Cable length	8 m
Operating radius	11 m
Incl. accessories	1 x switchable roller nozzle, 1 x hard floor surface nozzle, 1 x upholstery nozzle, 1 x crevice nozzle, 1 x furniture brush

Art. No.	Pack Qty.	€
KCY8.1	1	418,20

Floor vacuum cleaner GL 30 ProEnergy

By Bosch.

- QuattroPower System: High-performance technology for excellent cleaning with low energy consumption
- Very light weight and practical to handle
- Less frequent replacement of dust bags and lower follow-on costs due to large 4 l dust bag volume
- Washable high-performance hygiene filter. Exhaust air is cleaner than the room air. Suitable for allergy sufferers
- With electronic suction power regulation with rotary control, telescopic tube, filter change display, automatic cable retractions, 4 castors, park and set-aside aid

Technical specifications:

Dimensions (W x H x D)	260 x 287 x 400 mm
Weight	4.3 kg (without suction accessories)
Power requirement	650 W
Power supply	220-240 V, 50 Hz
Sound power level	75 dB (A)
Energy efficiency class	A
Dust emission class	A
Hard floor surface cleaning class	b
Carpet flooring cleaning class	c
Dust bag volume	4 l
Length of cable	7 m
Action radius	10 m
Incl. accessories	1 x switchable roller nozzle SilentClean Premium, 1 x crevice nozzle, 1 x upholstery nozzle

Multi-purpose vacuum cleaner NSG uClean 1432 ST

For dry and wet cleaning. Suitable for dust, coarse dirt particles and water.

Features:
- 32 l impact resistant special plastic container
- Water level detection
- Carry handle with hose reel and connector fixture
- Storage depots for accessories
- 2 swivel castors
- Parking aid

Technical specifications:

Dimensions	L 42 x B 39 x H 64 cm
Weight	9,3 kg
Container volume	Gross 32 l, dust 28 l, water 21 l
Power requirement	max. 1400 W
Vacuum	max. 259 mbar
Air flow	max. 69 l/s
Splash protection	IP 24
Length of cable	8 m
Suction hose	L 1.75 m/∅ 4.9 cm
Incl. accessories	1 suction hose (∅ 4.9 cm, 1.75 m), 2 suction pipes (length 50 cm), 1 floor nozzle (width 36 cm), 1 coarse dirt nozzle, 1 crevice nozzle (length 16 cm), 1 fleece filter bag, 1 foam filter for extracting water and 1 dust filter cartridge.

Wet and dry battery-operated vacuum cleaner

By Fakir. Cordless vacuum cleaner for wet and dry spills.
Capacity for dry dirt 400 ml, for liquids 250 ml. Dust container is easy to empty, washable filter. With lithium ion battery and charge indicator light. Operating time up to 23 min.

Technical specifications:

Dimensions (W x H x D)	115 x 128 x 410 mm
Weight	985 g
Power consumption	7.4 V; 2 Ah
Mains connection, charging dock	100-240 V, 50/60 Hz

Delivery incl. 1 x crevice nozzle, 1 x upholstery brush, 1 x liquids nozzle, 1 x charging dock with accessories deposit for wall mounting.

HNP5.1	1	79,45

Air pressure suction gun

For dust extraction. Has a NW 10 connection for flexible pressure tubing to fit pneumatic systems or pressure gas bottles (nitrogen, air, argon). The easy to empty dust bag made of felt can be disposed off completely if needed. Vacuum hose and vacuum nozzle are 20 cm in length when connected and can be rotated in every direction. The opening slit is 70 x 5 mm. For air pressure up to approx. 6 bar. Suction volume 700 l/min. Vacuum 40 kPa (0.4 bar). Weight approx. 700 g.

Type	Art. No.	Pack Qty.	€
Air pressure suction gun	**5776.1**	1	267,70
Spare dust bag with screw cap	**5777.1**	1	91,40

Air pressure gun made of aluminium

Electroplated, robust version. With short jet for thin stream. Working pressure up to 15 bar. Equipped with lever valve, connector for tubing with inner span 7 mm. With integrated loop for hanging.

5454.1	1	17,00

Silicone greases Rotisilon®

Rotisilon® A

Grease for glass connections and lubricant for rubber on glass.
Liquid, temperature range -48 to +150 °C.

Art. No.	Pack Qty.	€
0830.1	250 ml	17,10
0830.2	1 l	46,15

Rotisilon® B

All-purpose grease, especially suitable for stopcocks.
Vaseline-like, transparent, temperature range from -45 to +180 °C.

Art. No.	Pack Qty.	€
0836.1	250 g	27,85
0836.2	1 kg	93,45

Rotisilon® C/D

For normal vacuum (water jet pump). Paste consistency, transparent, temperature stable from -40 to +200 °C.

Art. No.	Pack Qty.	€
8537.1	100 g	24,65

KWS-grease

For vacuum, high vacuum and backflow distillation.
Silicone-free, acid- and alkali-proof. For greasing ground glass joints, can be applied at temperatures between -40 and +200 °C. Vapour pressure 10^{-5} mbar. Excellent adhesion viscosity and releasing properties.

Art. No.	Pack Qty.	€
0930.2	50 g	29,90
0930.1	100 g	52,15

Vaseline

For lubricating ground joints, desiccators, stopcocks, etc. Silicone-free, FDA-compliant. Density approx. 0.8 g/cm³, melting point approx. 52 °C.

Art. No.	Pack Qty.	€
E746.1	Tube with 100 g	4,25

KORASILON®-pastes

For use as grinding paste, sealing paste, lubricant and protective paste. Moisture repellent. Also suitable as a sealant for electrical appliances, as a lubricant paste for cooling units and as a mould release agent. Temperature resistant in the range -50 to +200 °C.

Type	Art. No.	Pack Qty.	€
low viscosity	**0855.1**	35 g	6,40
medium viscosity	**0856.1**	35 g	6,40
high viscosity	**0857.1**	35 g	6,40

KORASILON®-pastes assortment

Assortment of 2 x each tube low viscosity, medium viscosity and high viscosity.

Art. No.	Pack Qty.	€
0858.1	6 x 35 g	29,60

KORASILON® M-S 2 pastes

For use as an anti-friction, lubricating and release agent for grinding, apparatus, seals, valves, cables and wires etc. Suitable for use as an assembly aid and as a protective and sealing paste. Colourless, odourless, non-toxic, insoluble in water, resistant to salt water and hot steam. Good electrical insulation, inert to many chemicals and resistant to micro-organisms.

Compliant with BfR Recommendation XV. Silicone.
Compliant with FDA 178.3570 "Lubricants with incidental food contact".
With NSF-H1 approval.
Temperature stable from -40 to +200 °C.

Type	Art. No.	Pack Qty.	€
M-S 2-300, low viscosity	**APA5.1**	35 g	11,00
M-S 2-270, medium viscosity	**APA6.1**	35 g	11,00
M-S 2-200, high viscosity	**APA7.1**	35 g	11,00

Grinding grease, water-soluble

Transparent grinding grease, washes off with water.
Vacuum-proof up to 10^{-3} mbar. Usable from -30 to +200 °C without change in consistency. Does not resinify. Biodegradable.

Art. No.	Pack Qty.	€
E691.1	80 g	27,85

▶ Glass components, see page 147

APIEZON®-lubricants

High lubricating and gettering properties.
Extremely low steam pressures.

- Chemically inert
- Silicone free
- Non-toxic
- Temperature resistant
- 10 years shelf life

Type	Features	Melting point	Steam pressure (at +20 °C)	Temperature range	Art. No.	Pack Qty.	€
AP 100	**High vaccum;** good lubrication, resists alkali, acid and corrosive gases. Particulary good for polished ground glass joints.	+47 °C	7 x 10^{-11} torr	+10 to +30 °C	**C986.1**	50 g	150,50
AP 101	Heavy duty grease for a **wide temperature range**. Medium vacuum.	> +200 °C	<1 x 10^{-5} torr	-40 to +180 °C	**C987.1**	50 g	73,65
L	Special quality lubricant, free of additives for high vacuums. With high absorption capacity for other hydrocarbons. High resistance to radation. **Can also be used in stationary phases in gas chromatography**. Free of halogene.	+47 °C	7 x 10^{-11} torr	+10 to +30 °C	**1682.1**	50 g	147,30
M	All-purpose lubricant, similar to type L, but stiffer. Free of halogene.	+44 °C	1,7 x 10^{-9} torr	+10 to +30 °C	**1683.1**	100 g	118,25
N	High vacuum lubricant **for cryo-applications**, rubbery, tenacious. Free of halogene.	+43 °C	6 x 10^{-10} torr	-269 to +30 °C	**1684.1**	25 g	155,90
T	All-purpose lubricant. For medium vacuum. Free of halogene.	+125 °C	4,6 x 10^{-9} torr	+10 to +120 °C	**1685.1**	25 g	134,40
H	Versatile lubricant for very high temperatures. Does not melt at high temperatures over 40 °C.	> +250 °C	1,7 x 10^{-9} torr	-10 to +240 °C	**1686.1**	25 g	139,75

APIEZON®-waxes and sealing agent

APIEZON®-waxes W, W 40, W 100
Provides lasting, high-vacuum sealing, excellent gettering properties and low vapour pressure. Is resistant to acids such as hydrofluoric acid, nitric acid and acetic acid. Can be removed with hydrocarbons and chlorinated hydrocarbons.

APIEZON®-sealing kit Q
Ideal for sealing joints and for filling cracks. Especially suitable for vacuum technology when extremely low vapour pressure is not required. Waterproof.

.

Type	Features	Melting point	Steam pressure (at +20 °C)	Temperature range	Art. No.	Pack Qty.	Packaging	€
W	Sealing agent for seams which can heat up during operation.	80 to 90 °C	4.5 x 10^{-9} torr	-10 to +75 °C	**AL06.1**	1 kg	Block	119,35
					AL06.2	~20 g	Stick	8,55
W 40	Sealing agent can be poured into or around a seam.	40 to 50 °C	6 x 10^{-8} torr	-10 to +35 °C	**AL07.1**	250 g	Can	145,15
W 100	The soft wax reduces the risk of cracking in response to vibration loads.	50 to 60 °C	4.5 x 10^{-9} torr	-10 to +45 °C	**AL08.1**	250 g	Can	145,15
Sealing kit Q	Versatile sealing compound for vacuum technology.	40 to 50 °C	1 x 10^{-4} torr	-10 to +30 °C	**AL09.1**	1 kg	Can	145,15

APIEZON®-high-temperature vacuum lubricant PFPE 501

Chemically inert lubricant, gliding and sealing agent based on perfluoropolyether and PTFE. Can be used between -15 and +250 °C.

- Extremely resistant to solvents and aggressive chemicals (including halogens, nitric acid, as well as gaseous and liquid oxygen)
- High load-carrying capacity, as well as excellent sliding friction thanks to film-forming, highly dense perfluoropolyether structure
- Non-flammable, not poisonous
- Versatile; protects, lubricates and seals stock, valves, gears, threads, o-rings, seals, etc.

Technical specifications:

Relative density at 25 °C	2003 g/cm^3
Steam pressure at 25 °C	1.3 x 10^{-12} torr
Four-ball test acc. to ASTM D2266 (40 kg)	0.94 mm

Art. No.	Pack Qty.	€
YT61.1	100 g	177,40

PTFE paste

Suitable for sealing fine threads and cuts. High viscosity, good lubrication properties, good electrical resistance properties. Chemically inert. Temperature stable from -30 to +300 °C.

Art. No.	Pack Qty.	€
0124.1	100 g	133,85

Limesoil

Super lubricant® for quick fit connections and stopcocks. Protects glass against seizing and metals against corrosion. Produces a non-tearing film and is resistant to aggressive substances such as methylisobutylketone, IPA, etc. No flowing, no pulling strings.
Temperature range: -40 to +185 °C. Steam pressure: 9.33 x 10^{-4} N/m^2 (7 x 10^{-6} Torr) at +20 °C and 1.33 N/m^2 (10^{-2} Torr) at +100 °C.

Art. No.	Pack Qty.	€
3067.1	50 g	57,95

Ballistol®-oil and -spray

Pure, mildly alkaline special oil with cleaning, conserving, protecting, regenerating, impregnating, lubricating and disinfecting properties. Low surface tension, wets even the smallest cracks and gaps. Does not gum or cure. Free from chlorinated hydrocarbons, environmentally friendly and biologically degradable. Also suitable for use on wood and leather. Dermatologically tested and approved for parts coming into contact with product in the foodstuffs industry.

Ballistol®-oil

Sprayflon®

Multi-purpose PTFE-lubricant, gliding and separating agent with extremely low friction factor. Resistant against water, oil and aggressive substances. Anti-adhesive, dirt repellent, prevents freezing and is temperature stable to +260 °C. Free of grease and silicone. Propellant propane/butane.

Danger H222-H229

Art. No.	Pack Qty.	€
K007.1	300 ml	16,60

Paraloid™ B-72

Transparent, light-resistant thermoplastic acrylic resin for conserving samples. Also ideal for coating and sealing wood, stone, metals, and other materials. The coat is permanently stable and non-yellowing.
Compatible with cellulose, silicone, PVC, and many other plastics and metals. Resistant to water and many chemicals. Dissolves in toluene or ethyl acetate. Can be applied with brush, spray gun or in immersion bath. Hardens by air drying or heat exposure (approx. 30 mins at 150 °C)

Art. No.	Pack Qty.	€
9639.1	1 kg	63,35
9639.2	5 kg	180,10

KORASILON universal silicone spray

Solvent-free, ready-to-use release agent, lubricant and preservative with dielectric properties and a wide range of applications:

- **Lubricant:** reduces surface friction and optimises lubrication effect
- **Impregnating agent:** water and dirt repellent
- **Antifreeze:** prevents freezing and sticking of seals
- **Preservative and care product** for rubber, plastics, wood, metals etc.
- **Release agent:** allows residue-free demoulding of plastic products
- **Electrically insulating**, prevents current leakage at electrical contacts
- Heat resistant up to approx. 350 °C

Delivery incl. additional spray nozzle with extension capillary tubing.

Danger H222-H229

Art. No.	Pack Qty.	€
5432.1	400 ml	9,90

KORASILON release agent M

Silicone-based mould release agent for duromers and thermoplastic materials. With high, long-lasting release capacity. Its extremely thin spray film is easy to apply and provides improved lubricity, surface gloss and scratch resistance.
Heat resistant up to approx. 150 °C, leaves no residues on hot surfaces.

Danger H222-H229-H315-H336-H411

Art. No.	Pack Qty.	€
0895.1	400 ml	9,25

Zaponlack varnish

Fast drying, clear varnish with a nitrocellulose base. Crystal clear, for protecting copper or brass against oxidation, and for fixing paper, wood, glass, leather, etc. Apply by brushing, spraying or dipping.

Hot glue gun Gluematic 5000

By Steinel. Cordless hot melt applicator with extremely high melting capacity.

- Very short heating times
- Glue is heated automatically when the unit is placed onto the charger
- Electronic temperature control using state-of-the-art PTC heating technology
- Continuous operation with power cable possible
- Energy-saving standby mode
- Mechanical glue stick feeder for speedy, well-metred working
- Replaceable glue nozzles

Technical specifications:

Dimensions (L x W x H)	185 x 32 x 180 mm
Weight (without stand)	330 g
Output	Working phase approx. 120 W, warm-up phase approx. 500 W
Warm-up phase	3-5 min.
Melt temperature	210-220 °C
Delivery rate	approx. 22 g/min.

Delivery incl. charger with drip protection, short nozzle ∅ 2.0 mm, long nozzle ∅ 2.8 mm, 5 Ultra Power glue stick, power cable.

Electro insulation tape

Made of high-gloss PVC, synthetic rubber adhesive. Heat resistant from -10 to 105 °C. Resistant to moisture, oil, diluted acids and alkalis, as well as UV radiation. Penetration resistance 40 kV/mm. Good adhesive force and high flexibility, elongation at break ≥ 160 %, tear strength 18.0 N/mm^2.
Width 19 mm, thickness 0.19 mm, roll length 20 m, weight 100 g.

Art. No.	Pack Qty.	€
1256.1	1 roll	5,75

Scotch Mount 4032 double-sided adhesive foam tape

Double-sided self adhesive, made of polyurethane. For fixing down surfaces to prevent slipping, or as a stick-on tape for pin-up boards, posters, etc. Slightly stretchable, good adhesion, and is easy to remove.
Width 25 mm, 0.8 mm thick.

Art. No.	Pack Qty.	€
1283.1	1 roll (11 m)	29,60

▶ More adhesive tapes starting on page 707

Temperature stable adhesive tapes

Self-adhesive tape. Ideal for extreme temperatures. Temperature stable from **-196 to +287 °C**. Suitable for use in the cryo sector, incubators, autoclaves, sterilizers, etc. Surface with textile finish, can be marked.

Width (mm)	Length (m)	Art. No.	Pack Qty.	€
12,7	7,6	**L034.1**	1	33,35
19,0	7,6	**L035.1**	1	37,60
25,4	7,6	**L036.1**	1	57,85

PTFE thread sealant tape

Protects, seals and secures all types of thread. Highly flexible, usable from -190 to +260 °C. Chemically inert. Tape width 12 mm, thickness 0.08 mm. Roll length 12 m.

Art. No.	Pack Qty.	€
1715.1	3 rolls (36 m)	5,35

tesaband® Premium

Fabric tape, 25 mm wide. Wear and tear resistant. Good adhesion even on rough surfaces. Can be written on. Temperature resistant up to +130 °C.

Art. No.	Pack Qty.	€
1263.2	1 roll (25 m)	24,30

PTFE flat sealing tape

Self-adhesive, for pipe connections and other surfaces.
Soft, easily adaptable, smoothes out irregularities.
Temperature range: -240 to +270 °C. Pressure range: up to 120 bar.
Vacuum leakage rate for helium: 1.3 x 10^3 mbar/sec at 20 N/m^2.
Surface pressure. Width 3.0 mm, 1.5 mm thick.

Art. No.	Pack Qty.	€
0801.1	2,5 m	41,00

▶ PTFE-spray, see page 1174

O-ring set from Loctite®

Ideal for making different sized O-ring seals. Work pack with approx. 20 g special glue, cutter, 1 m elastic bands each with ∅ 1.6; 2.4; 3.0; 5.7 and 8.4 mm and instructions. Drying time for rings approx. 10 min.

Art. No.	Pack Qty.	€
1725.1	1 set	90,00

Heat protection foil

Self-adhesive, made of 0.05 mm thick aluminium foil.
Ideal for covering windows and other smooth surfaces. 50 cm wide.
Temperature stable up to +80 °C.

Art. No.	Pack Qty.	€
0193.1	roll 5 m	23,60

Sekuroka®-velcro fastening

Easily removable, consists of loop and hook components with self-adhesive back. Fastener is closed by gently pressing hooks into the loops. Ideal for applications where a high amount of opening and closing is expected. Approx. 2.5 mm thick when closed.
Length 230 cm, width 25.4 mm.

Art. No.	Pack Qty.	€
K956.1	1	45,70

- Hotplates, see page 1019
- Temperature control baths, see page 964

Sekuroka®-snap fastening

Self-adhesive, flexible. With interlocking semi-spherical heads (62 heads/cm^2). Provides extremely secure and resilient connections to most materials with high, permanent adhesive power.
Approx. 5.8 mm thick when closed. Length 230 mm, width 25.4 mm.

Art. No.	Pack Qty.	€
0295.1	1	39,25

Gas-leak tester

Gas-leak tester Roth

Special liquid for finding smallest leaks in tubing or hollow spaces that are under gas or air pressure. Nontoxic, non-inflammable, non-corrosive. Suitable for compressed air, butane, natural gas, town gas, propane, CO_2, O_2, N_2, H_2 and ammonia. Spray possible leakage area.
Bubbles appear at site of leak.

Art. No.	Packaging	Pack Qty.	€
2686.1	Pump spray bottle	500 ml	17,15

ECO leak finder spray

For reliable location of leaks on gas pipes and compressed air systems. Produces easily visible foam bubbles at the site of leaks. Suitable for e.g. natural gas, propane, butane, acetylene, nitrogen, carbon dioxide, refrigerant and oxygen. Compatible with plastics and metals, non-corrosive. DVGW-tested in accordance with DIN EN 14291:NG-5170AS0069 and with NSF-P1 registration for food technology.

Propellant: N_2O.

Warning H229-H319

Art. No.	Pack Qty.	€
HAN3.1	500 ml	10,70

Gas leak detector testo 316-1

By Testo. Ideal for tracing leaks in pipes, flanges, screw connectors, gas pipes etc. For methane. With visual and acoustic alarm.
Sensor has extremely short reaction time.

Technical specifications:

Measuring range	0 to 10.000 ppm CH4
Alarm threshold	>200 ppm LED yellow / >10.000 ppm LED red
Battery life	>5 h
Working temperature	4 to 45 °C
Dimensions (L x W x H)	190 x 57 x 42 mm
Weight	300 g

Delivery incl. battery (9 V).

Art. No.	Pack Qty.	€
P757.1	1	215,00

Rotitherm® heating and cooling mediums

For filling water baths, cooling chests, thermostats, etc.

45	for 0,20 m^2	**A755.1**	100	42,95

▶ For heating baths, see page 977
▶ Further silicon oils see chapter chemicals A-Z

Boiling pebbles

Prevent delayed boiling. Ensure uniform distillation of low-viscosity liquids.

Type A: for standard distillation. Natural stone product mainly made of quartz. Contains small amounts of iron. Granules are approx. 5-8 mm. Suitable for vacuum distillation.

Art. No.	Pack Qty.	€
1691.1	75 g = about 1000 pebbles	17,15

Type B: for analysis. Natural, alkalic alumosilicates, without ceolit. Granules are approx. 5 mm.

Art. No.	Pack Qty.	€
1692.1	80 g = about 1700 pebbles	18,85

Boiling pebbles made of PTFE

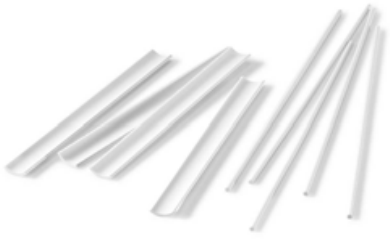
Irregularly formed granulate. Prevent uncontrolled overheating of solutions during warming up of volatile liquids. Resistant and inert against most aggressive chemicals (acids, bases, hydrocarbons).
Doesn't scratch glass and leaves no powdery deposits.
Maximum working temperature +260 °C. Granules 1 to 5 mm.

Art. No.	Pack Qty.	€
L429.1	50 g	7,50

Boiling pebbles, resistant

For preparative and analytical operations in biochemistry, biotechnology, microbiology, microanalysis, etc. Can be used in vacuumes and in high-vacuum distillation, even with minimal amounts of liquid. Do not abrade or absorb solvents, are immediately effective after every interruption. Are also suitable for strong acids, bases, aggressive solvents and oxidation agents. Can be sterilized by calcinating. Granules are approx. 3-4 mm.

Art. No.	Pack Qty.	€
H751.1	50 g = ca. 1785 pebbles	30,65



Magnesia scoops

For annealing and incineration of samples, as well as for the production of oxygen melts for the detection of chromium, manganese etc. and for bead tests. W 9 x L 100 mm.

Art. No.	Pack Qty.	€
6537.1	25	21,45

Magnesia rods

Ideal for flame analysis of sodium, etc. For borax-bead analysis of cobalt. For bead tests. ∅ 1.5 x L 140 mm.

Art. No.	Pack Qty.	€
6543.1	25	24,30

Glass beads

Reflex beads made of soda-lime glass. Specific weight approx. 2.5 g/cm^3.

Technical Specifications:
Apparent density depending on size 1.46-1.51 kg/l. Refraction index 1.5188. Chemical composition: SiO_2 72.3 %; Na_2O 13.3 %; CaO 8.9 %; MgO 4.0 %; other 1.5 %.

∅ (mm)	Art. No.	Pack Qty.	€
0,25-0,5	**A553.1**	1 kg	27,85

2,85-3,45	**A557.1**	1 kg	27,85

Glass beads

Glass beads made of high-purity soda-lime glass. Manufactured using a special process which can produce beads of extremely accurate roundness from a 4 mm size range.

- very smooth surface
- low proportion of air bubbles

Can be used as stirring and mixing beads for aerosol sprays or as a ball valve for bottle caps. Because of their high purity the beads can used as grinding and dispersing beads during wet grinding of pigments, agrochemicals, biological and other preparations.

Technical specifications: Refractive index 1.5159. Chemical composition: SiO_2 68.1 %; Na_2O 15.0 %; CaO 8.3 %; MgO 2.5 %; Al_2O_3 3.3 %; other 2.80 %. Specific weight approx. 2.5 g/cm^3.

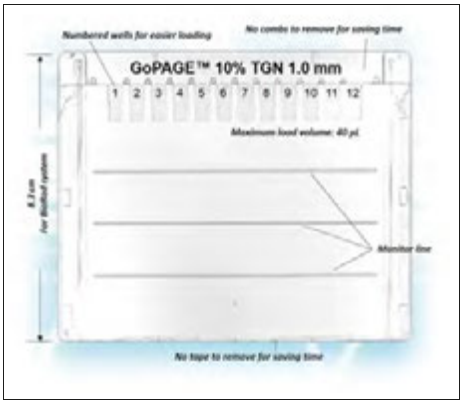
GoPAGE™ Precast Gels NEW ready-to-use

- **Particularly long shelf life** - Up to 12 months from date of manufacture when stored at 4 °C
- **Easy to use** - No comb or tape to remove
- Easy to load samples - Numbered wells; extended and fixed well separator to prevent sample carryover; loading volume up to 30 µl/wells
- **Easy to monitor** - Transparent reference lines on the gel cassette help to monitor electrophoresis
- **Good separation efficiency** - Enhanced band sharpness
- **Wide separation range** - Available as homogeneous and adjusted gradient gels for a wide range of protein separation
- **Compatibility** - Two cassette sizes suitable for most mini-gel tanks

Store at +4 °C
Transport temp.: cooled

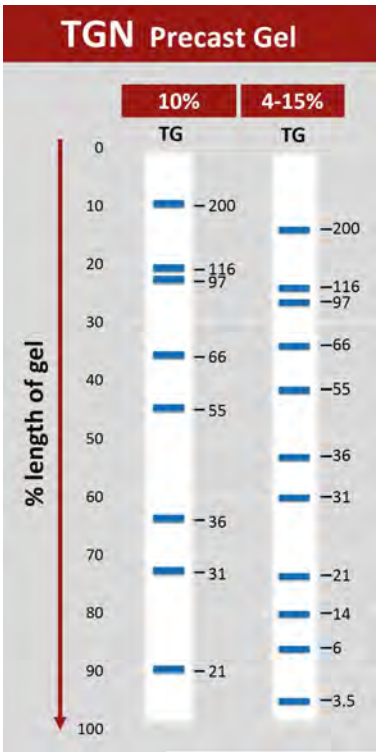


Important information on refrigerated transports

All products identified as being particularly temperature-sensitive are shipped in **special ice boxes with freezer packs or in dry ice.**
Additional costs resulting from such, **will be invoiced** (further information on request).

Please note:
In order to guarantee optimum product quality, the dispatch of refrigerated transport products will be carried out **on Mon and Tue only outside Germany!**
Slight delays in delivery are therefore possible.

PAGE Precast Gels



GoPAGE™ TGN (**T**ris-**G**lycine **N**ovel) Precast Gels are ready-to-use acrylamide gels for SDS-PAGE running in Tris-Glycine buffer system. With unique formula, GoPAGE™ TGN Precast Gels perform enhanced resolution, sharper bands, and longer shelf life as compared with conventional Laemmli Tris-HCl gels. The protein migration patterns in GoPAGE™ TGN series, however, are similar with typical Laemmli Tris-HCl gels, and thus GoPAGE™ TGN Precast Gels are compatible to traditional SDS-PAGE and subsequent analyses.

GoPAGE™ TGN Precast Gels include 4 % polyacrylamide stacking gels.

They are available gels:

- Gradient gels (4 to 15 %)
- Gels with fixed (10 %) concentrations of polyacrylamide

in 12-well format.

Two available cassette sizes, **Mini (10 x 8,3 cm)** and **Midi (10 x 10 cm)**, are compatible with most popular protein electrophoresis systems.

GoPAGE™ Precast Gels NEW

Gels are supplied shrink-wrapped in Tris/Glycin buffer (preserved).

Product	Wells	Max. Vol. / well	Buffering system	Gel strength	Gel plates (L x W)	Gel measures (L x W)	Art. No.	Pack Qty	€

PAGE Precast Gels

Compatibility GoPAGE™

The GoPAGE™ ready-made gels **Mini (10 x 8,3 cm)** ideally fit into the chambers of the Bio-Rad® system as well as into similar small chambers of other manufacturers.

The **Midi gels (10 x 10 cm)** are well compatible with the vertical electrophoresis chambers from Roth (Art. No. Y001-Y004 and 3501-3503). Please refer to the table below for compatibility with chambers from other manufacturers.

Unit	10 x 10 cm
BioRad® Mini PROTEAN® I, II & III and Ready Gel® Cell	not comp.

Rotiphorese®-Acrylamide Ready-Made Solutions

The right choice for each and every application

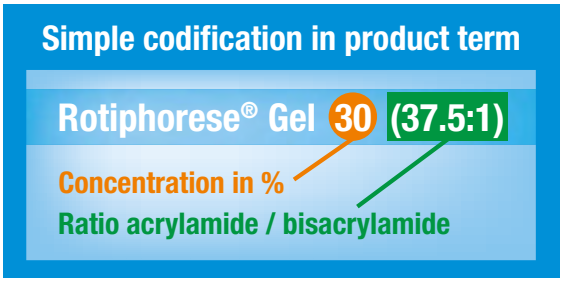
The large variety of different Rotiphorese®-solutions provides you with the right product for each and every application. Rotiphorese®-gel solution may be used both in protein and nucleic acid electrophoresis. Rotiphorese®-ready-to-use solutions for manual sequencing facilitate the preparation of sequencing gels of a constant high quality - also suitable for automatic sequencers.

Safe

Acrylamide ia a strong nerve poison which has clearly proved to be carcinogenic and to change the genetic make-up during animal testing. Acrylamide is resorbed primarily through the skin. The formation of dust when working with the solid matter is particularly critical.
A hazard which can be easily avoided by using the Rotiphorese® ready-to-use solution.

Superior quality

Rotiphorese®-Acrylamide and -Bisacrylamide solutions from ROTH have the highest purity level. They are produced from substances free from acrylic acid. Oxidation products are removed from the solution by a selective absorption process. A new formation of such and/or polymerisation of the solution is prevented by gaseous stabilisation of the solution.
In order to guarantee a high consistency of our Rotiphorese®-solutions, each batch undergoes electrophoretic testing.



Recommendation for Use of Rotiphorese® Ready-Made Gel Solutions

Analysis of	Gel solution	Art. No.
Proteins/peptides >15 kDa, DNA fragments and DNA/protein interaction	Gel 30 (37,5:1)	3029.1
	Gel 40 (37,5:1)	T802.1
Proteins/peptides <30 kDa and DNA oligonucleotides	Gel 40 (29:1)	A515.1
DNA sequences (manual sequencing)	Rotiphorese®-DNA sequencing system	A431.1
	Gel 40 (19:1)	3030.1
DNA sequences (short-run automat. sequencing)	NF solution 40 % (19:1)	A516.1
DNA sequences (long-run automat. sequencing)	NF solution 30 % (29:1)	A124.1
	NF solution 40 % (29:1)	A121.1

Ready-Made Solutions ready-to-use Acrylamide/Bisacrylamide-Mix

Rotiphorese® Gel 30 and Gel 40 are ready-to-use, gas-stabilised acrylamide solutions with different concentrations and with different ratios of acrylamide to bisacrylamide. Rotiphorese®-ready-to-use solutions can be used directly.

Rotiphorese® Gel 30 (37,5:1)

ready-to-use, gas stabilised, aqueous 30 % acrylamide and bisacrylamide stock solution at a ratio of 37,5:1
For preparation of protein gels in electrophoresis.
Storage temp.: +8 °C

T802.1	1 l	glass	74,10 €
Original pack 6 x 1 l			70,40/1 l

Acrylamide and Bisacrylamide Stock Solutions

PAGE solutions are always a mixture of acrylamide and bisacrylamide. Acrylamide forms linear polymers, whereas bisacrylamide crosslinks these linear polymers forming pores of a special size. The pore size may be altered by varying the total gel concentration (% T) and the percentage of the crosslink (% C). With the Rotiphorese® stock solutions the desired T/C rate can be produced. You need an acrylamide stock solution (Gel A or Gel A-40) and a bisacrylamide stock solution (Gel B).

For detailed instructions regarding gel preparation with Rotiphorese® Gel A, A-40 and B please see user manual and technical information brochure „PAGE Instructions“.

Rotiphorese® Gel A

30 % acrylamide solution

Storage temp.: +8 °C

Danger H302-H315-H319-H317-H340-H350-H361f-H372

Ready-to-use, stabilised 30 % acrylamide stock solution. In combination with Rotiphorese® Gel B (2 % bisacrylamide stock solution, Art. No. 3039) gels with up to 20 % total acrylamide concentration can be produced.

3037.2	250 ml	glass	21,40 €
3037.1	1 l	glass	53,65 €

General technical information

Rotiphorese® NF ready-to-use Ready-to-Use Solutions for Automated Sequencing

Rotiphorese® ready-to-use solutions for automated sequencing **are special fluorescence-free acrylamide/ bisacrylamide mixtures** of highest quality as required for automatic sequencing.
Made from 4x cristallised acrylamide.

Rotiphorese® NF-Acrylamide/ Bis-solution 30 % (29:1)

ready-to-use, gas stabilised, aqueous 30 % acrylamide and bisacrylamide stock solution at a ratio of 29:1, fluorescence free

Made from 4x cristallised acrylamide. Tested for automatic sequencers.
Storage temp.: +8 °C

Danger H302-H315-H317-H319-H340-H350-H361f-H372

A124.1	250 ml	glass	48,30 €
A124.2	1 l	glass	147,20 €
Original pack 6 x 1 l			139,84/1 l

Rotiphorese® NF-Acrylamide/ Bis-solution 40 % (19:1)

ready-to-use, gas stabilised, aqueous 40 % acrylamide and bisacrylamide stock solution at a ratio of 19:1, fluorescence free

Made from 4x cristallised acrylamide. Tested for automatic sequencers.
Storage temp.: +8 °C

Danger H302+H332-H315-H317-H319-H340-H350-H361f-H372

A516.1	250 ml	glass	50,00 €

Rotiphorese® NF-Acrylamide/ Bis-solution 40 % (29:1)

ready-to-use, gas stabilised, aqueous 40 % acrylamide and bisacrylamide stock solution at a ratio of 29:1, fluorescence free

Made from 4x cristallised acrylamide. Tested for automatic sequencers.
Storage temp.: +8 °C

Danger H302+H332-H315-H317-H319-H340-H350-H361f-H372

A121.1	250 ml	glass	40,35 €

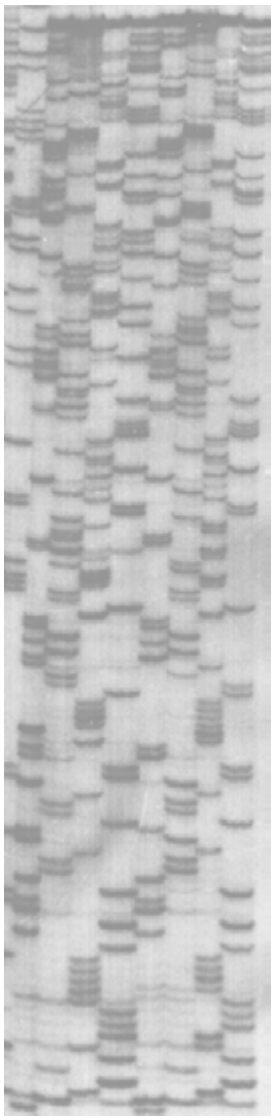
- Fluorescence free urea see page 1191
- Fluorescence free 10 x TBE buffer see page 1201

Instructions for use
can be found on the Internet next to the product description.

Fluorescence-free
NF acrylamide solutions are very well suited for application in fluorescence-labelled automated sequencing, e.g. using LI-COR or ABI slab gel sequencers.

Ready-Made Solutions for Manual Sequencing

- For preparing 4-20 % sequencing gels
- No tedious dissolving of urea
- Prevents acrylamide dusts
- Simple handling



Rotiphorese® DNA sequencing system

Set of ready-to-use solutions for preparation of DNA sequencing gels.
Storage temp.: +4-15 °C

Danger H340-H350-H372-H361f-H302-H315-H319-H317

Convenient set containing three ready-made solutions for easy and fast casting of sequencing gels. Solutions are produced in Rotiphorese® quality and are perfectly matched - providing superior, reproducible quality and high sequence resolution.
Handling is most simple: Measure and mix certain amounts of all three components, add APS and TEMED, and cast the gel.

The following components are included:
1 l Rotiphorese® sequencing gel concentrate (Art. No. 3043.1) - ready-to-use, stabilised solution of 25 % acrylamide/bisacrylamide 19:1 with 50 % urea (8,3 M).
1 l Rotiphorese® sequencing gel diluent (Art. No. 3047.1) - 50 % (g/v; 8,3 M) solution of urea in water.
250 ml Rotiphorese® sequencing gel buffer concentrate (Art. No. 3050.1) - 10x TBE with 50 % urea (8,3 M).
Detailed instructions-for-use are included in the set. One set is sufficient for 50 6 % gels (30 x 40 cm) with 40 % urea (e.g. in Roth Sequencing Electrophoresis Unit, Art. No. AE28.1).

A431.1	1 kit	glass	109,55 €

Rotiphorese® Sequencing gel concentrate

Ready-to-use solution (19:1) for the preparation of gels containing 0-20 % monomer, for electrophoresis.
Storage temp.: +4-15 °C

Danger H302-H315-H319-H317-H340-H350-H361f-H372

Ready-to-use, stabilised solution of 25 % acrylamide/bisacrylamide 19:1. For the preparation of polyacrylamide sequencing gels containing 0-20 % monomer; 23,75 % acrylamide,1,25 % methylene bisacrylamide and 50 % urea (8,3 M). Cross linking 5.
Also part of the DNA sequencing system (Art. No. A431.1).

3043.2	100 ml	glass	13,90 €
3043.1	1 l	glass	60,10 €
Original pack 6 x 1 l			57,10/1 l

Rotiphorese® Sequencing gel diluent

50 % (g/v; 8,3 M) solution of urea in water for diluting Rotiphorese® Sequencing gel concentrate.
Storage temp.: +4-15 °C
Also part of the DNA sequencing system (Art. No. A431.1).

3047.1	1 l	glass	37,55 €
Original pack 6 x 1 l			35,67/1 l

Rotiphorese® Sequencing gel buffer concentrate

50 % (g/v; 8,3 M) solution of urea in 10x TBE (1 M Tris-borate, 20 mM EDTA buffer, pH 8,3), for electrophoresis.
Storage temp.: +4-15 °C

Warning H315-H319

Also part of the DNA sequencing system (Art. No. A431.1).

ready-to-use

Rotiphorese®-PAGE Matrix Buffer plus

4x concentrated SDS-PAGE matrix buffer, for electrophoresis

Ready-made buffer solution for pouring of optimized SDS-PAGE gels.

SDS-Page buffer, Gel matrix buffer

Storage temp.: +4 °C • Transport temp.: cooled

- Increases protein separation quality significantly
- Superior band dissemination from 5 kDa to 250 kDa
- Higher gel strength and longer shelf life
- Compatible with all common gel loading and running buffers
- Compatible with all common gel staining methods
- Also well suitable for 2D gels and prior to Western Blotting
- 250 ml sufficient for approx. 100 mini gels

Rotiphorese®-PAGE Matrix Buffer plus is a 4x concentrated gel matrix buffer for enhanced protein separation and significantly higher gel strenth. Rotiphorese®-PAGE Matrix Buffer plus can be used for preparation of both stacking gel and resolving gel by simply replacing the Laemmli/TRIS-, or TRICIN-, buffer system. Even gels with stacking gels of only one acrylamide concentration, show a protein separation quality comparable to that of gradient gels. Band depiction is significantly enhanced compared to standard buffer systems.
Rotiphorese®-PAGE Matrix Buffer plus also provides increased gel strength, making handling of the gels much more convenient, for instance during separation of the glass plates or during transport. Gel stability is increased, leading to longer shelf lifes of self-made gels. Gels prepared with Rotiphorese®-PAGE Matrix Buffer plus may also very well be used for 2D protein analysis or for subsequent Western Blotting onto NC or PVDF membranes.

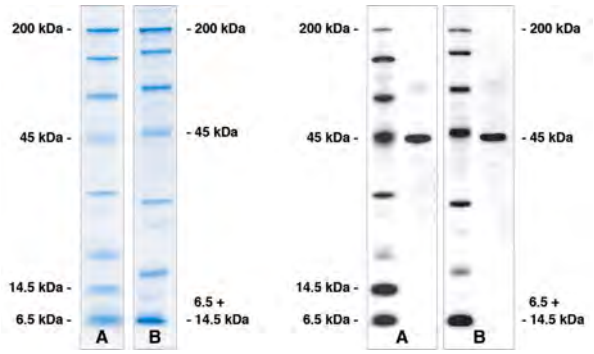

Figure 1 and 2:
Coomassie® stained gel and Western blot. HeLa extract on PVDF, detected via HRP chemoluminescence.
A: 10 % PAGE using Rotiphorese®-PAGE Matrix buffer plus,
B: 12 % PAGE using standard Tris glycine SDS buffer.

Figure 4:
Stability of a 6 % PA gel.

One bottle of 250 ml is sufficient for pouring of approx. 100 mini gels.

8996.1	250 ml	plastic	115,60 €

Roti®-Stock 20 % SDS

ready-to-use S

BioScience-Grade, ready-to-use, 0,2 µm filtered

For molecular biology and electrophoresis.

SDS 20 % ready-to-use solution

Danger H318-H315-H335

20 % stock solution sodium dodecyl sulphate. Store the solution away from light in a dry place. SDS-stock solution and other solutions containing SDS should not be cooled below 24 °C otherwise the SDS may precipitate. The crystals can be easily resolubilised by heating them between 30 to 50 °C.
With original seal.

Composition:

20 % SDS in deionised water, 0,2 µm filtered

Roti®fair 10% SDS

for 1000 ml/pouch, for biochemistry, molecular biology and electrophoresis

Anionic detergent for preparation of bioanalytical solutions.

SDS powder (pouch), Sodium dodecyl sulphate, Sodium lauryl sulphate, Dodecyl sulphate sodium salt, Lauryl sulphate sodium salt, SLS

Danger H228-H302+H332-H315-H318-H335-H412

Exactly pre-weighed pouches for convenient and rapid preparation of SDS solution.
Prepared solution may be sterilized by filtration (0,22 µm). The solution should be stored at room temperature. SDS-stock solution and solutions containing SDS should not be cooled below 24 °C otherwise the SDS may precipitate. The crystals can be easily resolubilised by heating them between 30 to 50 °C.
10 % SDS solution is prepared by dissolution of 1 pouch in 1000 ml highly pure water.

Formulation:

Prepared solution contains: 10 % SDS, pH value 3,0 ±0,05, when prepared in deionized or distilled water.

1157.1	5 pouches	box	618,15 €

Roti®fair SDS 0.5g

0,5 g/tablet, for biochemistry, molecular biology and electrophoresis

Anionic detergent for preparation of bioanalytical solutions.

SDS (tablet), Sodium dodecyl sulphate, Sodium lauryl sulphate, Dodecyl sulphate sodium salt, Lauryl sulphate sodium salt, SLS

Danger H228-H302+H332-H315-H318-H335-H412

Exactly pre-weighed tablets for convenient and rapid preparation of SDS solution.
Roti®fair SDS 0.5g may also be used for preparation of SDS containing solutions, by adding the favoured number of SDS tablets directly during preparation of the solution.
Prepared solution may be sterilized by filtration (0,22 µm). The solution should be stored at room temperature. SDS-stock solution and solutions containing SDS should not be cooled below 24 °C otherwise the SDS may precipitate. The crystals can be easily resolubilised by heating them between 30 to 50 °C.
10 % SDS solution is prepared by dissolution of 1 tablet in 5 ml highly pure water. Concentrations of 0,05-20 % may be prepared.

Formulation:

Prepared solution contains when prepared in deionized or distilled water: SDS in favoured concentration, dependent on the amount of water used.

1156.1	50 tablets	plastic	48,30 €

Roti®fair reagents

High-pure reagents and buffer mixes in pouches or as tablets.

Agaroses and Gelling Reagents

Our agarose Roti®garose is a neutral polysaccharide which is obtained in many purification steps from the cell wall of certain algae, called Rhodophyceae. Roti®garose forms very clear gels with all standard running buffers and will result in a sharp and clear separation of your biomolecules. Extremely pure agarose with very low interference binding to staining reagents. Roti®garose produces a low background and high contrast appearance after staining.

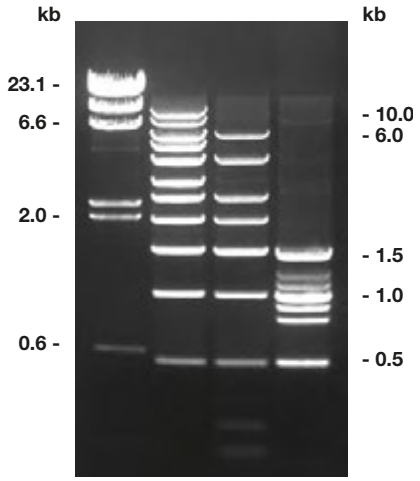
- For clear and sharp bands
- Gels with high transparency
- Low background
- Suitable for all standard running buffers and high-speed buffer systems
- Compatible with all nucleic acid staining systems
- Non-toxic in cell immobilisation assays
- Of course DNase and RNase free

Roth has the right agarose for every application:

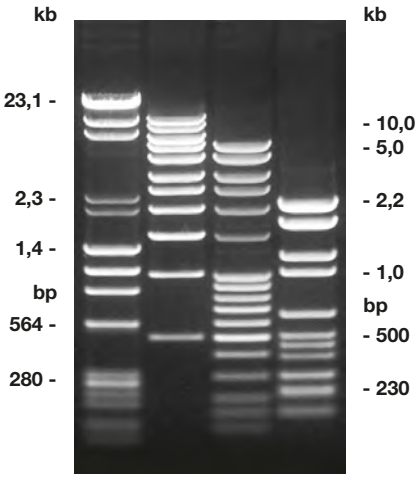
Roti®garose	Art. No.	Application
Standard	3810	Routine gels, student´s courses, general analyses (1-20 kb).
NEEO ultra quality	2267	All standard applications, qualitative and quantitative gels, screening and blotting. Range 500 bp-20 kb.
Agarose Tablets	HP67	Highly reproducible gels, or simple applications in students courses. Suitable for all standard-gels (0,5-0,25 %). For fragments ≥300 bp.
GTQ	6352	Genetic engineering quality, for DNA-elution of fragments ≥500 bp without melting the agarose*
Broad Range	T846	For the total analytical range (200 bp up to 40 kb), Pulsed-Field electrophoresis, blotting, shift assays. Ideal when only a few agaroses are to be used in the laboratory.
Pulsed-Field	3771	Separation of large fragments (up to 20 kb), Pulsed Field gel electrophoresis (PFGE)
HR PLUS	HP30	Analysis of fragments between 100 and 3000 bp
High Resolution	K297	Analysis of fragments between 50 and 1000 bp
Low Melt	6351	With low melting and gelling temperatures (MT ≤65,5 °C, GT ≤28 °C). For gel elution from melted agarose. Range 500 bp-20 kb.
LM / PCR	HP31	Genetic engineering quality with low melting and gelling temperatures (MT ≤65 °C, GT ≤35 °C). For DNA-elution of fragments <1500 bp from melted agarose.
Super LM	HP45	With extremely low melting and gelling temperatures. (MT ≤62 °C, GT ≤20 °C). For gel elution from melted agarose. Recommended for in-gel analysis, capillary electrophoresis and cell and tissue culture. For fragments ≥1000 bp.
MEEO ultra quality	2268	With medium EEO. For immune, serum and antibody electrophoresis. Range 500 bp-10 kb.
HEEO ultra quality	2269	With high EEO. For protein precipitation and countercurrent electrophoresis.
Synergel®	0184	Agarose additive for finer pore formation. Increases the separative power of the agarose. For fragments from 10 bp up.

* **Tip:** Use Kit Roti®-Prep Gel Extraction (Art. No. 8510.1)

1.2 % agarose in 1 x TAE



1.2 % agarose in 1 x TAE



Agarose Standard

RNAse-/DNAse-free

Roti®garose for DNA/RNA-electrophoresis

General agarose for routine gels, student's courses, and standard analyses (1 kb-20 kb).

- Inexpensive agarose for routine gels and standard analyses
- Good separation efficiency for nucleic acids of 1 to 20 kb length
- Easily melting, non-foaming agarose
- Low background fluorescence after ethidium bromide staining
- Very cost-effective

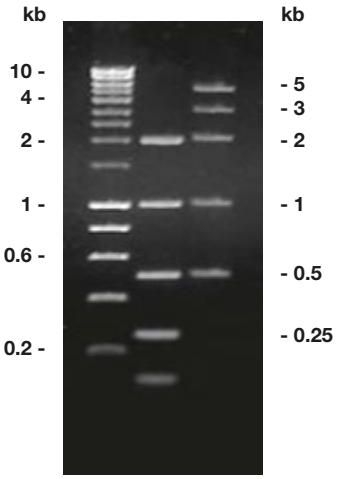
Roti®garoses and gel electrophoresis.

1 % agarose in 0.5 x TBE



Agarose-Tablets

RNAse-/DNAse-free

Roti®garose 0,5 g agarose/tablet

Standard agarose with low EEO, for routine analyses (≥300 bp).

- Easy-to-use and safe tablets for constant gel strength and well reproducible gels
- Reliable agarose for routine analyses
- for detection of inserts or PCR amplificates of over 300 bps
- Agarose with high gel strength, applicable from 0,5 to 2,5 %
- Compatible with all standard running buffers and nucleic acid-staining methods

Guarantee analysis:

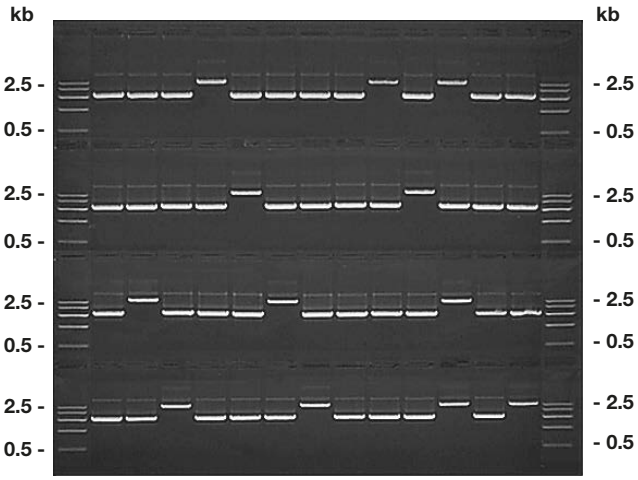
1.5 % agarose in 1 x TAE



Agarose GTQ

RNAse-/DNAse-free

Roti®garose genetic engineering quality

Especially tested agarose for gel elution and biomolecular approaches (500 bp-20 kb).

- Genetic technology quality (GTQ)
- For preparative DNA/RNA-electrophoresis of 500 bp to 20 kb
- Recommended for all molecular-biological routine methods like blotting, cloning, sequencing etc.
- No DNA binding
- No inhibition of restriction enzymes and ligases
- Particular low gel background after ethidium bromide staining

Figure: High-through put screening with very short running distance. Plasmids of 2,65 and 4,36 kb. Lanes 1 and 15: Roth DNA marker short run 1 (Art. No. 0146.1) 0,2 µg per lane.

Agarose as Gelling Reagent

Chemically, agarose is a galactan which is capable of forming extremely solid gels, even at a low concentration. The pore size of the gels is determined by the concentration of the agarose used. Because there are no ionic groups in the gel, hydrophilic materials without any interaction with the gel matrix will also be separated according to their size. The high hysteresis of the agarose, that is the thermal stability after solidification, ensures that the gels remain reliably stable even during heat-producing running conditions.

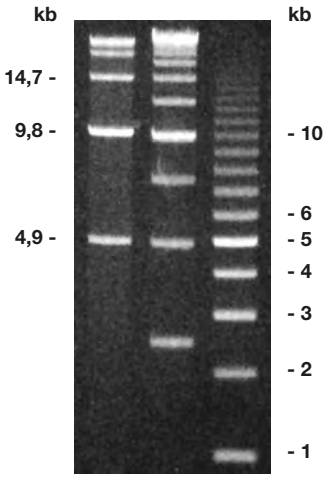
0.5 % agarose in 1 x TAE



Agarose Broad Range

RNAse-/DNAse-free

Roti®garose BioScience-Grade

For gel electrophoresis, total size range (200 bp-40 kb).

- High-molcular linear polymer of particularly high DNA mobility in electrophoresis
- The ideal choice for Pulse Field gel electrophoresis
- Excellent for resolving DNAfragments between 200 bp and 40 kb in conventional gel electrophoresis
- Low EEO allows speedy and efficient resolution of very large DNA-molecules
- Extremely high gel strength guarantees good handling even at low concentrations of 0,3 % agarose
- Also suitable for separation of particles like ribosomes, virions or chromosomes

Guarantee analysis:

Agarose Pulsed-Field

RNAse-/DNAse-free

Roti®garose for Pulsed Field electrophoresis, genetic engineering quality

Special agarose for separation of large fragments (20-50 kb).

- Optimised for separation of fragments of 20 to 50 kb or for Pulsed Field Gel Electrophoresis (PFGE)
- High gel-strength agarose for tearproof gels that are easy to handle
- High DNA mobility for fast and efficient gel electrophoresis
- Low background fluorescence after ethidium bromide staining
- In general, suitable for separation of fragments larger than 1000 bp
- Tested for absence of DNAses, RNAses and DNA binding

Figure (left to right): 0,3 % Agarose Pulsed-Field, extended 1kbp Ladder (1 µg) and High Molecular Weight Marker (0,3 µg, heated for 10 mins. at 65 °C); then same markers on 0,5 % Agarose Pulsed-Field.

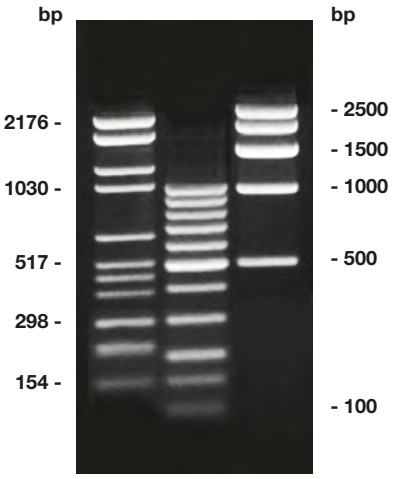
Electroendosmosis (EEO)

Osmotic liquid migration caused by electric current

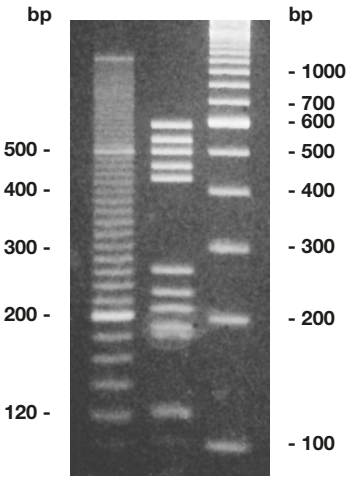
In gel matrices of agarose gels, minor impurities caused by cations (sulphate ester) are frequent. When an electric field is applied they move in the direction of the cathode, generating an electroosmotic flow (EOF) of the entire aqueous medium towards the negative pole. The migration speed of the flow depends, amongst other things, on the strength of the electric field and the frictional force generated by the gel matrix. The EOF always runs in the direction of the cathode, that is opposite to the movement of the anions separated during nucleic acid electrophoresis, and slows down their migration.

In the event of an agarose with high EEO, many cations are present, which generate a strong EOF. Furthermore, the gel strength is low, causing only weak frictional force. The strong EOF can lead to a change of behaviour during the run of the negatively-charged molecules (DNA/RNA) when using the agarose MEEO or HEEO. In extreme case anions with low self-mobility can even be diverted and transported in the direction of the cathode, causing band shifting.

1.5 % agarose in 1 x TAE



3 % agarose in 1 x TAE



Agarose HR-PLUS

RNAse-/DNAse-free

Roti®garose for analytical gels

Special agarose for use in the main analytical range (100 bp-3 kb).

- Reliable agarose for routine analyses in the range of 100 to 3000 bp
- Superior separation efficiency and high gel strength, usable in concentrations of up to 3 % agarose
- Very well suited for analysis of PCR amplificates, restriction digests and for blotting
- Low gel background
- Compatible with all standard nucleic acid-staining methods
- Separation range in 1 x TAE:
  1 % proof agarose gel: 1000-3000 bp
  1,5 % proof agarose gel: 300-2000 bp
  2,5 % proof agarose gel: 100-1000 bp

Agarose High Resolution

RNAse-/DNAse-free

Roti®garose for small fragments

Special agarose for PCR gels and small DNA fragments (50 bp-1 kb).

- High resolution of PCR-products and DNA fragments in the 50-1000 bp range
- Low gel background after staining, even for highly concentrated gels
- Can be used in concentrations of up to 5 % agarose
- Low DNA binding and low EEO for efficient separation of very small fragments
- Tip: cool the gel for 30 mins. at 4-8 °C before use for superior separation
- Separation range in 1 x TAE:
  1,8 % proof agarose gel: 500-1000 bp
  3,0 % proof agarose gel: 150-600 bp
  4,5 % proof agarose gel: 50-350 bp

Agarose Low Melt

RNAse-/DNAse-free

Roti®garose with low melting and gelling temperature

Particularly for gel elution and in-gel-application in a wide size range (500 bp-20kb).

Hydroxyethyl agarose

- Low melting point and low gelling temperature
- High transparency and very low self fluorescence. For particular clear gels.
- The ideal solution when nucleic acid fragments or proteins are to be recovered after electrophoretic resolution
- Suitable for enzymatic reactions in liquid agarose (in-gel-applications)
- Excellent for immobilising microorganisms and virus-plaque-assays
- Suitable for cell culture applications (animal and plant)
- Tested for stability after autoclaving

Agarose LM/PCR

RNAse-/DNAse-free

Roti®garose with low melting and gelling temperature, genetic engineering quality

Particularly for gel elution of small fragments (50 bp-1500 bp).

Hydroxyethyl agarose

High resolution low melting agarose in genetic engineering quality. For optimal fragment separation, DNA recovery and cloning of PCR amplificates.

- Low melting point and low gelling temperature
- Fine resolution of fragments from 50 to 1500 bp
- Very well suited for analysis and recovery of PCR amplificates and fragments derived from restriction digests
- Also well suitable for in-gel-applications
- Low gel background, compatible with all standard nucleic acid-staining methods
- Low viscosity agarose, recommended for use in concentrations of 3 to 6 % agarose. Note: gels of 2 % agarose and lower are fragile

Agarose Super LM

RNAse-/DNAse-free

Roti®garose with particularly low melting and gelling temperature

Particularly for gel elution from melted agarose, capillary electrophoresis and in-gel processing (≥1000 bp).

Hydroxyethyl agarose

- Fine resolution of fragments over 1000 bp
- Very well suited for analysis and recovery of longer PCR amplificates or other longer fragments like vectors, rare cutter digestions etc.
- Recommended for in-gel-applications, virus plaque-assays and tissue/cell culture applications
- Low gel background, compatible with all standard nucleic acid-staining methods
- Lower gel strength than Agarose Low Melt. Recommended for use in concentrations of over 1 % agarose

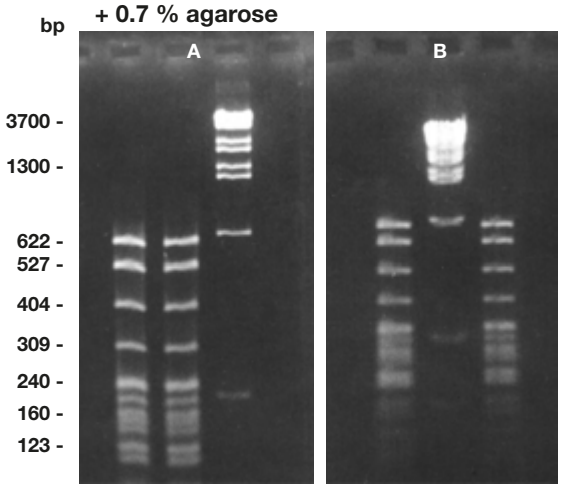
1.5 % Synergel™ + 0.7 % agarose **4 % agarose**



Synergel™

RNAse-/DNAse-free

≥99 %, for gel electrophoresis

Agarose additive

Storage temp.: +20 °C

- Enhances separation of nucleic acid fragments
- For extremely clear gels

Synergel™ is a synergistic gelling and sieving agent consisting of a modified polysaccharide which, when combined with agarose, forms a hydrogen bonded binary gel system. The addition of Synergel™ to agarose improves gel performance by providing superior separation and definition of DNA fragments up to 30 kb. A gel mixture containing 0,7 % agarose and 0,7 % Synergel™, e.g., will produce improved results when compared to a 2 % agarose-only gel. Synergel™ also provides greater optical clarity, which allows higher quality photodocumentation of stained gels.

Figure 1 compares separation qualities of **A:** 1,5 % Synergel™ / 0,7 % agarose and **B:** 4 % high-resolution agarose (NuSieve®). Please see also figures for pUC19 markers T149 and X901.

Standard buffer systems like phosphate, acetate or borate buffered Tris-EDTA may be used in forming the gel. RNA may also be separated in this system by using a 2,2 M formaldehyde-containing buffer. Nucleic acid may be electroeluted or transferred to membranes following standard Southern/Northern blotting protocols.

Type analysis:

Colour.	white to almost white powder

DNase, RNase.	none detected

0184.2	10 g	plastic	31,10 €
0184.1	100 g	plastic	218,15 €

Please note our **Technical Information Brochure** on the Internet next to the agaroses:

Roti®garoses and gel electrophoresis.

How to Calculate Required Synergel™

1. What percentage agarose gel is currently being used?
2. The gel will inevitably contain 0.7 % agarose (the minimum agarose concentration required to ensure gel stability). Hence, subtract 0.7 % from the agarose total.
3. Divide the difference by 2. The result is the percentage of Synergel™ to be added to the 0.7 % agarose.

Example:

Convert a 1 % agarose to a 1 % Synergel™/agarose gel

a. Substract 0.7 % from the 1 % agarose: 1 % - 0.7 % = 0.3 %
b. Divide the difference by 2: 0.3 % : 2 = 0.15 %
c. 0.15 % (150 mg / 100 ml) is the amount of Synergel™ added to 0.7 % agarose (0.7 g / 100 ml) to produce the functional equivalent of a 1 % agarose gel.

Carrier Ampholytes
Roti®lyte

40 % solution in water, sterile filtered (0,2 µm)
Carrier ampholytes for isoelectric focussing (IEF).

- Reliable formation of a finely graded linear pH gradient
- Sharp band resolution due to high buffer capacity at pI
- High conductivity, no overheating of the gel
- Short staining- and destaining periods
- Compatible with all standard staining methods

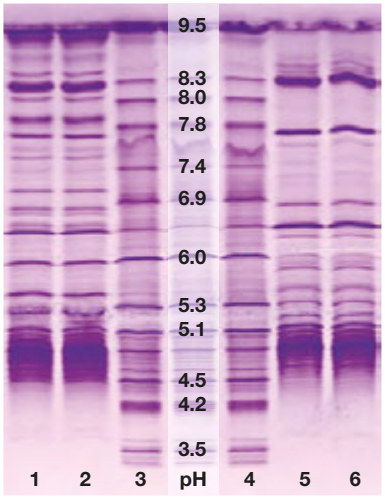

Figure:
pH range 3-10, gel thickness 350 µm
Lanes 1, 2, 5, 6: Potato extracts (10 µl)
Lanes 3, 4: Protein standard (10 µl)

Roti®lyte carrier ampholytes consist of a diverse mixture of sterile filtered hydrous polyamino-polysulfone-polycarboxylic acids. Due to the multitude of isoelectric points (pIs) present, those amphoteric molecules form a very finely graded, linear pH gradient in the electric field, hence making them particularly suitable for isoelectric focusing (IEF).
Roti®lyte carrier ampholytes excel by their high buffer capacity and conductivity, leading to excellent band definition. Even proteins differing by just 0,01 pH units may be discriminated efficiently. Due to their low molecular weight of 1000 Da in maximum, the ampholytes disperse quickly in the gel, therefore guaranteeing an even distribution of sample proteins during IEF. Since there is virtually no unspecific binding of dyes, no background staining happens, and Roti®lyte ampholytes are perfectly compatible with all standard staining methods. They are well soluble in trichloroacetic acid, and may easily be removed from the gel during subsequent fixation.

Store unopened bottles at +4 °C. Opened bottles should be aliquoted and stored at -20 °C. Avoid frequent freeze and thaw cycles. Added in 3-5 % working concentration to acrylamide- or agarose gel solution.

Electrophoresis Gel Buffer Solutions

Time sparing ready-made buffers saving valuable time and significantly reducing your effort to prepare electrophoresis buffers. Each batch is manufactured from reagents of the highest purity and is subsequently filtered.

For gel electrophoresis and molecular biology. ready-to-use

Rotiphorese® 10x SDS-PAGE

10x concentrated SDS-PAGE running buffer, for electrophoresis.

Tris-glycine-SDS buffer

Solution consisting of 0,25 M Tris, 1,92 M glycine and 1 % (w/v) SDS in distilled, deionised water for protein analysis.
Acc. to Laemmli (1970), *Nature* 227:680.

Concerning the Rotiphorese® buffers 10x TAE, 50x TAE and 10x TBE

During prolonged storage salt crystals may precipitate, which are easily resolubilised by gentle heating and shaking. The quality of the buffer is not affected by this procedure. Do not take out buffer solution when any precipitate is visible.

Rotiphorese® 50x TAE Buffer

Buffer concentrate for DNA electrophoresis.

Storage temp.: +20 °C

Warning H315-H319-H335

50-times concentrated running buffer, containing 2 M Tris, 1 M acetic acid and 50 mM EDTA in distilled, deionised water; pH 8,5.
Mix before use!

Original pack 2 x 5 l			67,93/5 l

Rotiphorese® 10x TAE Buffer *light*

with reduced EDTA concentration

Buffer concentrate for DNA electrophoresis, ideal for DNA elution gels or in-gel-applications.

Storage temp.: +20 °C

Rotiphorese® 10x TAE-buffer *light* is particularly ideal for agarose gels in DNA-elution. Although the reduced EDTA-content lowers the contamination of the eluted DNA with EDTA and therefore prevents any interference of enzymatic activity, e.g. from ligases, isomerases or polymerases, the buffer properties still remain totally intact.
Particularly suitable for in-gel-applications when used with Rotigarose® Low Melt (Art. No. 6351).
10-times concentrated serial buffer, containing 0,4 M Tris-acetate and 1 mM EDTA in distilled, deionised water; pH 8,3.
Mix before use!

0122.1	1 l	glass	26,80 €
Original pack 6 x 1 l			25,46/1 l

PAGE – polyacrylamide gel electrophoresis
General technical information

Roti®fair reagents

High-pure reagents and buffer mixes in pouches or as tablets.

Roti®-fair - the new range of user-friendly reagent formulations. For simplest application, optimal quality and reproducible results. One tablet or the content of one pouch is simply dissolved in the respective amount of water - the desired solution is ready for use. Simply adapt the amount of water in order to vary the concentration, for instance for preparation of a higher concentrated stock solution.

- **Easy-to-use** - simply dissolve contents of one pouch or one tablet in water
- **Timesaving** - no need for weighing of several reagents or adjustment of pH
- **Convenient** - dry reagents for direct use spare preparation of long-term stored stock solutions
- **Reliable** - stringent quality control ensures high lot-to-lot consistency

Roti®fair SDS-PAGE

for electrophoresis

Buffer for protein electrophoresis.

SDS-PAGE powder (pouch), Tris-glycine-SDS buffer

Warning H315-H319-H335

Exactly pre-weighed pouches for convenient and rapid preparation of SDS-PAGE solution.
Running buffer for protein gel electrophoresis. Contains SDS und may therefore also used with SDS-free gels. Nach: Laemmli (1970), *Nature* 227:680.
Prepared solution may be sterilized by filtration (0,22 µm). For storage, buffer solution should be kept at room temperature.
1x SDS-PAGE solution is prepared by dissolution of 1 pouch in 1000 ml respectively 5000 ml highly pure water.

Formulation:

Prepared 1x SDS-PAGE solution contains: 25 mM Tris, 0,192 M glycine, 0,1 % SDS, pH-value 8,3 ±0,05, when prepared in deionized or distilled water.

For 1000 ml/pouch

1249.1	10 pouches	box	91,95 €

For 5000 ml/pouch

1250.1	10 pouches	box	195,15 €

Roti®fair 50x TAE

for electrophoresis

Buffer concentrate for DNA electrophoresis.

TAE powder (pouch)

Warning H315-H319-H335

Exactly pre-weighed pouches for convenient and rapid preparation of TAE solution.
Running buffer for DNA gel electrophoresis. TAE is recommended for gel analysis of large fragments and for gel elution, when high recovery rates are needed. Additionally, TAE is the buffer of choice for native or denaturing RNA gels.
Prepared solution may be sterilized by filtration (0,22 µm).
For long-term storage, buffer solution should be kept at room temperature.
50x TAE solution is prepared by dissolution of 1 pouch in 500 ml respectively 1000 ml highly pure water.

Formulation:

Prepared 50x TAE solution contains: 2 M Tris acetate, 50 mM EDTA , pH-value 8,3 ±0,05, when prepared in deionized or distilled water.

For 500 ml/pouch

1234.1	5 pouches	box	418,20 €

For 1000 ml/pouch

1240.1	5 pouches	box	747,15 €

Roti®fair 1x TBE

for 1000 ml/pouch, for electrophoresis

Buffer for DNA electrophoresis.

TBE powder (pouch)

Danger H315-H319-H335-H360FD

Exactly pre-weighed pouches for convenient and rapid preparation of TBE solution.
Running buffer with high buffering capacity for DNA gel electrophoresis. TBE is recommended for analytical gels, high-through-put gels, small fragments, and when sharp band resolution is required. Due to the lower EDTA content, TBE is well suited for gels prior to cloning, however, recovery rate is generally lower than from TAE gels.

Formulation:

Prepared 1x TBE solution contains: 89 mM Tris-Borat, 2 mM EDTA, pH-value 8,3 ±0,05, when prepared in deionized or distilled water.

1241.1	10 pouches	box	80,10 €

Roti®fair 5x TBE

for 1000 ml/pouch, for electrophoresis

Buffer concentrate for DNA electrophoresis.

TBE powder (pouch)

Danger H315-H319-H335-H360FD

Description see Roti®fair 1 x TBE (Art No. 1241).

Formulation:

Prepared 5x TBE solution contains: 0,445 M Tris borate, 10 mM EDTA , pH-value 8,3 ±0,05, when prepared in deionized or distilled water.

1242.1	10 pouches	box	174,70 €

Roti®fair 10x TBE

for 1000 ml/pouch, for electrophoresis

Buffer concentrate for DNA electrophoresis.

TBE powder (pouch)

Danger H315-H319-H335-H360FD

Description see Roti®fair 1 x TBE (Art No. 1241).

Formulation:

Prepared 10x TBE solution contains: 0,89 M Tris borate, 20 mM EDTA , pH-value 8,3 ±0,05, when prepared in deionized or distilled water.

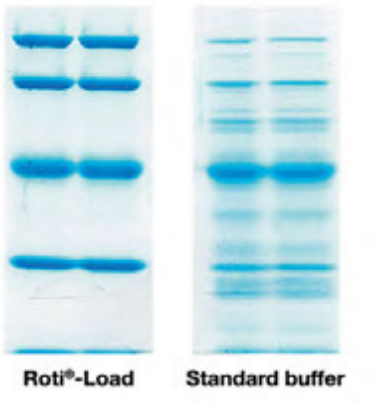
1243.1	10 pouches	box	289,75 €

Gel Loading Buffers for Proteins

ready-to-use

Roti®-Load 1 (reducing) as well as **Roti®-Load 2 and 3 (non-reducing)** represent special gel loading buffers for protein gel electrophoresis. They have been designed to protect your proteins during sample preparation and to stabilise sensitive peptide bonds. Protein degradation is efficiently prevented by those buffer systems. Roti®-Load are 4x concentrated ready-to-use solutions, which may be used directly for sample loading.

Roti®-Load 1 and 2: Modified formulation acc. to Laemmli (*Nature* 227, 1970).



Roti®-Load 1

reducing, 4x conc.

Protein gel loading buffer, modified formulation acc. to Laemmli.

Storage temp.: +15-25 °C

Danger

H302+H332-H311-H315-H317-H318-H373-H411

- Formulation acc. to Laemmli (modified)
- Stabilises peptide bands
- Prevents protein degradation
- Improves gel separation

Well tested and proven sample buffer for protein gel electrophoresis that has been modified and further developed based on the original formulation acc. to Laemmli (Nature 227, 1970).
Roti®-Load 1 prevents degradation of proteins while heating during sample preparation, additionally keeping the sample pH value constant during gel electrophoresis. Being a phosphate-buffered ready-to-use solution, Roti®-Load 1 already contains all necessary denaturing and reducing reagents, bromophenol blue as dye and glycerol as density increasing reagent.

Contains SDS (approx. 8 % w/v), β-mercapto ethanol (approx. 20 % v/v), glycerol (approx. 40 % v/v) and bromophenol blue (approx. 0,015 % w/v). Phosphate buffered.

K929.1	10 ml	glass	18,20 €
K929.2	4 x 10 ml	glass	53,25 €
K929.3	10 x 10 ml	glass	122,05 €

Roti®-Load 2

non reducing, 4x conc.

Protein gel loading buffer, modified formulation acc. to Laemmli.
For protein complexes, secondary structures, and for native gels.

Storage temp.: +20 °C

- Formulation acc. to Laemmli (modified)
- Stabilises peptide bands
- For protein complexes and secondary structures
- For native gels

Well tested and proven sample buffer for protein gel electrophoresis that has been modified and further developed based on the original formulation acc. to Laemmli (Nature 227, 1970).
For depiction of protein complexes, secondary structures, and for native gels.
Roti®-Load 2 prevents degradation of proteins while heating during sample preparation, additionally keeping the sample pH value constant during gel electrophoresis. Being a phosphate-buffered ready-to-use solution, Roti®-Load 2 already contains all necessary denaturing reagents, bromophenol blue as dye and glycerol as density increasing reagent. Roti®-Load 2 may be supplemented with 20 µl/ml DTT solution (1 M), in order to gain a loading buffer using DTT as reducing reagent rather than β-Mercaptoethanol.

Contains SDS (approx. 8 % w/v), glycerol (approx. 40 % v/v) and bromophenol blue (approx. 0,015 % w/v). Phosphate buffered.

K930.1	10 ml	glass	15,60 €

Roti®-Load 3 (LDS)

non reducing, 4x conc.

Protein gel loading buffer for ready-made gels and cooled gels.

Storage temp.: +20 °C

Warning H315-H319

- Optimised for ready-made gels
- Superior solubility at low temperatures
- Stabilises proteins in the gel

Modified, non-reducing protein sample-gel loading buffer for gels under denaturing or native conditions. During sample preparation and heating, Roti®-Load 3 (LDS) efficiently prevents degradation of your proteins, also stabilising the pH value during the run. This new gel loading buffer is based on a triethanolamine buffered ready-to-use solution, in which the standard sodium dodecylsulphate (SDS) has been replaced by lithium dodecylsulphate (LDS). At low temperatures, LDS is much better soluble than SDS. Hence, no crystallisation of LDS takes place, and protein stability as well as band resolution is significantly enhanced. Additionally, the formulation of Roti®-Load 3 (LDS) has been optimised for ready-made gels, particularly Roti®-PAGE gels, but also ready-made gels of other standard suppliers. For reducing conditions, Roti®-Load 3 (LDS) may be supplemented with 20 µl/ml DTT solution (1 M) or with β-mercaptoethanol.

Contains LDS (approx. 4 % w/v), glycerol (approx. 40 % v/v) and Ficoll 400 (approx. 4 % w/v), plus phenol red (approx. 0,025 % w/v) and Coomassie® G250 (approx. 0,025 % w/v). Triethanolamine buffered.

3359.1	10 ml	glass	21,00 €

Selecting a suitable Roti®-Load gel loading buffer for proteins

Roti®-Load 1 is suitable **for all PAGE standard gels**. It has denaturing and reducing properties.

Roti®-Load 2 is suitable **for protein complexes, secondary structures and native gels**. It has denaturing properties, but it does not have reducing properties. It is possible to enrich the buffer solution with reducing agents such as ß-Mercaptoethanol or DTT.

Roti®-Load 3 is suitable **for native gels, precast gels and cooled gels**. The buffer solution contains LDS. Unlike SDS, LDS does not crystallise out at low temperatures. In addition, the buffer solution is optimally adapted for precast gels. Roti®-Load 3 has denaturing properties, but does not have reducing properties. It is possible to enrich the buffer solution with reducing agents such as ß-Mercaptoethanol or DTT.

Glycerine is the standard reagent for increasing the density of samples.

SDS (sodium dodecyl sulphate), LDS (lithium dodecyl sulphate) are anionic surfactants. They form a negatively charged mantle around the protein molecules, which results in a denaturing effect. This process is reversible. Irreversible denaturation only occurs if the samples are boiled. Negative charging allows the molecules to be separated during electrophoresis.

ß-mercaptoethanol, DTT (dithiothreitol) are reducing agents which split disulphide bridges in protein molecules. Increased unfolding of the molecule occurs. This process is reversible.

Gel Loading Buffers for Nucleic Acids

ready-to-use

The ROTH gel loading buffers are special buffers for nucleic acid electrophoresis. Each batch is tested for its functionality in electrophoresis. The gel loading buffers are ready-to-use solutions, which may be used directly.

Roti®-Load DNA buffer solutions contain Tris, sodium acetate and EDTA, with additional tracking dyes. For increasing the density when loading the gel, they are available in three different variations - with glycerol, ficoll and saccharose.

Roti®-Load RNA buffer solution contains formamide, MOPS, sodium acetate, EDTA and formaldehyde and bromophenol blue, and has been adjusted to pH 7,0. Due to the included ethidium bromide, the DNA is stained already during gel loading.

Roti®-Load DNAstain is a new generation of gel loading buffers providing fluorescent and non-toxic staining of DNA even during gel loading (see also next page).

Product	Use	Concentration	Dye	Incl. DNA stain	Figure	Art. No.	Pack Qty	€
Roti®-Load DNA (with glycerol)	Standard applications, routine gels	6x	BP, XC	-	①	**X904.1**	5 x 1,8 ml	39,70

BP = Bromphenol blue XC = Xylene cyanole OG = Orange G EG=EvaGreen® EB = Ethidium bromide

Storage temp.: -20 °C
Safety instructions see chapter Chemicals A-Z

Selecting a suitable Roti®-Load gel loading buffer for Nucleic Acids

Care should be taken to ensure that the dyes contained in the gel stop before smallest relevant DNA bands. This ensures that the buffer can be stopped in time. However, the selected dyes may overlay the bands shown. In this case, select a loading buffer that does not contain any unwanted dyes.

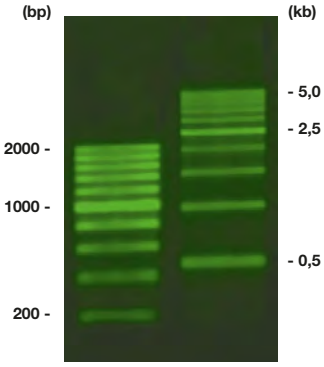
Bromophenol blue and xylene cyanol can be used as colour markers in all **standard gels**. If a relevant band is overlaid by one of these colour markers, choose a gel loading buffer containing Orange G. If **small fragments** are to be assayed, the gel loading buffer should contain Orange G in order to mark the run. If relevant bands are overlaid, however, a choice can be made between bromophenol blue or xylene cyanol depending on the size of the bands. A loading buffer without xylene cyanol is usually used for assaying **large fragments**.

Glycerine is the standard reagent for increasing the density of samples.

Ficoll® 400 produces particularly well-defined bands.

Sucrose provides the greatest increase in density.

Gel Loading Buffers



For UV- and blue light

Roti®-Load DNAstain

ready-to-use | DNAse-free

6x conc. gel loading buffer, ready-to-use, DNAse-free

DNA-gel loading buffer with fluorescent DNA-dye EvaGreen®.
Storage temp.: -20 °C • Transport temp.: room temp.

- Alternative for ethidium bromide, non-toxic, non-mutagen
- Nearly as sensitive as ethidium bromide, up to 1,5 ng/mm² nucleic acid
- For use with common broad-band ethidium bromide photo filters
- Excitation possible via UV light (320 nm) and blue light (~470 nm)
- Compatible with all usual down-stream applications

New, versatile reagent for gel loading and simultaneous staining of double stranded nucleic acid in agarose- and polyacrylamide gels.
Roti®-Load DNAstain detects up to 0,2 ng per band, and is, therefore, as sensitive as ethidium bromide. Due to its most simple application as gel loading buffer it reduces the time needed for gel analysis significantly.
This innovative reagent contains the intercalating dye EvaGreen®, which has been developed specifically for DNA analysis. DNA integrity is not influenced by EvaGreen®; hence, gel eluted DNA may directly be applied to standard down-stream applications, like, e.g., ligation, PCR, transformation, transfection etc. without interfering effects. Due to the low membrane permeability of the dye, Roti®-Load DNAstain is non mutagenic, non toxic, and environment friendly.
Roti®-Load DNAstain can be excited by UV- and blue light, making it fully compatible with standard UV-transilluminators as well as with modern blue-light illumination (see also Rotiphorese® PROfessional runVIEW, Art. No. 4849.1). When excited, nucleic acid-bound Roti®-Load DNAstain emits a brightly coloured green fluorescence (525 nm) that may be documented by all usual broadband ethidium bromide- or SYBR® Green foto filters.

The **figure** depicts 50 ng DNA per band, or 75 ng (1000 bp and 2,5 kb), respectively. Each lane has been loaded and concurrently stained using 1 µl Roti®-Load DNAstain.

Excitation maximum (bound to DNA): approx. 320 nm and 470-500 nm
Emission maximum (bound to DNA): 525 nm
1 ml is sufficient for running and staining of approx. 500 lanes.

Roti®-Load DNAstain 1

Roti®-Load DNAstain 1 contains: Tris, EDTA, bromophenol blue, xylencyanol, EvaGreen®.
Recommended for staining of dsDNA- and dsRNA-fragments of over 500 bp.

5783.1	1,0 ml	plastic	37,55 €
5783.2	5 x 1,0 ml	plastic	114,95 €

Roti®-Load DNAstain 2

Roti®-Load DNAstain 2 contains: Tris, EDTA, xylencyanol, orange G, EvaGreen®.
Emission maximum (bound to DNA): 525 nm
Recommended for staining of dsDNA- and dsRNA-fragments of 100-2000 bp.

5784.1	1,0 ml	plastic	37,55 €
5784.2	5 x 1,0 ml	plastic	114,95 €

Roti®-Load DNAstain 3

Roti®-Load DNAstain 3 contains: Tris, EDTA, orange G, EvaGreen®.
Recommended for staining of dsDNA- and dsRNA-fragments of under 500 bp.

6472.1	1 ml	plastic	37,55 €
6472.2	5 x 1,0 ml	plastic	114,95 €

Protein Markers Roti®-Mark

Perfect separation behaviour in the gel. Protein markers from Roth are acylated and pre-reduced, for optimal running behaviour in the gel. For each batch, intensity of bands is optimised and electrophoretically tested. All protein markers are offered as ready-to-use solutions which may be applied directly to the gel.

Roti®-Mark ALL BLUE ① NEW ready-to-use

Protein marker, prestained
Size range: 10-240 kD
Number of protein bands: 12
Number of lanes/ml: approx. 200 (mini gels)

Storage temp.: -20 °C • Transport temp.: room temp.

Roti®-Mark ALL BLUE consists of 12 blue prestained proteins from 10 to 240 kD. For better orientation in the gel the 25 kD and the 72 kD fragment are enhanced in their mass. Roti®-Mark ALL BLUE is an ideal size marker for controlling the gel run during SDS-PAGE and for reliable evaluation of transfer efficiency during Western Blot. The ready-to-use marker is dissolved in Tris-glycine buffer for direct application to the gel.
Please note: Reliable size determination of proteins cannot be performed using prestained markers.

2242.1	250 µl	plastic	91,30 €
2242.2	2 x 250 µl	plastic	166,10 €

Please note: Reliable size determination of proteins cannot be performed using prestained markers. For this, we recommend the use of our unstained marker Roti®-Mark 10-150 PLUS (Art. No. X879) with one prestained protein.

Roti®-Mark BI-PINK ② ready-to-use

Protein marker, prestained
Size range: 10-175 kD
Number of protein bands: 11
Number of lanes/ml: approx. 200 (mini gels)

Storage temp.: -20 °C • Transport temp.: room temp.

Protein marker including bicolour-prestained proteins of 10 up to 175 kD. In order to visualise separation during the gel run and for better orientation in the gel, three proteins of approx. 10, 40 and 90 kD have been prestained in blue in addition to the pink coloured bands. All proteins excel by having a very even running behaviour and form distinct bands. The marker is designed as ready-to-use solution for direct application to the gel.
Fig.: 15 % SDS-PAGE (Tris)

8269.1	500 µl	plastic	170,95 €

Roti®-Mark TRICOLOR ③ ready-to-use

Protein marker, prestained
Size range: 10-245 kD
Number of protein bands: 12
Number of lanes/ml: approx. 200 (mini gels)

Storage temp.: -20 °C • Transport temp.: room temp.

Protein marker including tricolour-prestained proteins of 10 up to 245 kD. In order to visualise separation during the gel run and for better orientation in the gel, two proteins of approx. 25 and 75 kD have been prestained in green and red, respectively, in addition to the blue coloured bands. All proteins excel by having a very even running behaviour and form distinct bands. The marker is designed as ready-to-use solution for direct application to the gel.
Fig.: 4-20 % gradient SDS-PAGE (Tris)

8271.1	2 x 250 µl	plastic	170,95 €

Roti®-Mark TRICOLOR XTRA ④ NEW ready-to-use

Protein marker, prestained
Size range: 10-310 kD
Number of protein bands: 12
Number of lanes/ml: approx. 200 (mini gels)

Storage temp.: -20 °C • Transport temp.: room temp.

Roti®-Mark TRICOLOR XTRA is a tricolour-prestained marker covering an extra range of molecular weights from 10 to 310 kD. In order to visualise separation during the gel run and for better orientation in the gel, there is, besides the blue coloured proteins, one protein prestained in green (25 kD) and two proteins in red (75 and 310 kD). All bands excel by having a very even running behaviour and a good differentiation. Roti®-Mark TRICOLOR XTRA is an ideal size marker for controlling the gel run during SDS-PAGE and for reliable evaluation of transfer efficiency during Western Blot. The ready-to-use marker is dissolved in Tris-glycine buffer for direct application to the gel.

Roti®-Mark PETIT ② ready-to-use

Protein marker, not prestained
Size range: 3,5-40 kD
Number of protein bands: 7
Number of lanes/ml: approx. 200 (mini gels)
Storage temp.: -20 °C • Transport temp.: room temp.

Roti®-Mark PETIT is a finely graded protein marker for small size range. It consists of four genetically engineered proteins with defined, regular molecular weight and, in addition, of three native proteins for better visualization of the small size range. The marker is dissolved in non-reducing Laemmli buffer and can be used directly.
Roti®-Mark PETIT is an ideal addition to Roti®-Mark 10-150 (Art.-No. T850).
Fig.: 16,5 % SDS-PAGE (Tris-Tricine)

9299.1	100 µl	plastic	64,40 €
9299.2	500 µl	plastic	188,15 €

Roti®-Mark 10-150 ③ ready-to-use

Protein marker, not prestained
Size range: 10-150 kD
Number of protein bands: 8
Number of lanes/ml: approx. 200 (mini gels)
Storage temp.: -20 °C • Transport temp.: room temp.

Warning H319

Roti®-Mark 10-150 consists of a set of genetically engineered proteins with defined, regular molecular weight. The proteins are not glycosylated and therefore display homogeneous electrophoretic behaviour. An enhanced 40 kD band provides easy orientation in the gel.
Roti®-Mark 10-150 has been assembled from a set of **His-tagged, recombinant proteins** that may be detected during Western-Blot analysis using anti-His antibodies.
Fig.: 4-20 % gradient SDS-PAGE (Tris)

T850.1	500 µl	plastic	121,40 €
T850.2	100 µl	plastic	53,65 €

Roti®-Mark 10-150 PLUS ④ ready-to-use

Protein marker with additional prestained protein
Size range: 10-150 kD
Number of protein bands: 9
Number of lanes/ml: approx. 200 (mini gels)
Storage temp.: -20 °C • Transport temp.: room temp.

Warning H319

Reliable size determination as well as control of running behaviour and transfer.
This marker represents an advanced version of marker Roti®-Mark 10-150 and is supplemented with an additional prestained carbo anhydrase (approx. 31 kD). Roti®-Mark 10-150 PLUS consists of a set of genetically engineered proteins with defined, regular molecular weight. The proteins are not glycosylated and therefore display homogeneous electrophoretic behaviour. Whilst in prestained markers the apparent molecular size in the gel may differ from the actual size of the proteins, Roti®-Mark 10-150 PLUS exhibits a strictly size-dependent running behaviour. The additional prestained protein enables easy control of the run as well as of the subsequent transfer. Therefore, this marker adds the benefits of prestained protein markers to a reliable determination of the molecular weight of separated proteins. The enhanced 40 kD-band allows easy orientation in the gel.
Roti®-Mark 10-150 PLUS has been assembled from a set of **His-tagged, recombinant proteins** that may be detected during Western-Blot analysis using anti-His antibodies.
Fig.: 4-20 % gradient SDS-PAGE (Tris)

Instructions for use
can be found on the Internet next to the product description.

DNA Markers

Roth offers a multifaceted marker range including DNA markers for each application required. Our DNA-markers produce sharp, clear bands. Terminally, the unregular markers carry sticky *Eco*RI sites and, therefore, end-labelling methods can be applied easily.

Unevenly Distributed DNA Markers

These markers are recommended for DNA quantitation in the gel.
DNA amounts of all bands are depicted in the included instructions-for-use.

pUC19-Marker ready-to-use ① ready-to-use

DNA marker ready-to-use
Size range: 26-501 bp
Number of fragments: 10
Number of lanes per ml: approx. 200 (mini gels)
Storage temp.: -20 °C • Transport temp.: room temp.

The marker was manufactured using pUC19-DNA and restriction endonuclease *Msp* I.
Made from natural plasmids: fragment sizes can be validated!
DNA-ladder for analysis of small DNA fragments. The concentration of the individual fragments is equimolar so that rough quantification of the analysed DNA is possible.
The ready-to-use pUC19-marker has already been dissolved in 1x concentrated gel loading buffer Roti®-Load DNA (with glycerol, Art. No. 0100.1) and can be used directly. It has a concentration of 0,1 µg DNA/µl marker-solution.
Fig.: 1 % agarose (NEEO, Art. No. 2267) + 2 % Synergel™ (Art. No. 0184)

X901.1	500 µl (50 µg)	plastic	61,20 €
X901.2	4 x 500 µl (4 x 50 µg)	plastic	218,15 €

pUC19/Msp I ②

DNA marker + gel loading buffer
Size range: 26-501 bp
Number of fragments: 10
Number of lanes per 100 µg: approx. 200 (mini gels)
Storage temp.: -20 °C • Transport temp.: room temp.

The marker was manufactured by using pUC19-DNA and restriction endonuclease *Msp* I.
Made from natural plasmids: fragment sizes can be validated!
DNA-ladder for analysis of small DNA fragments. The concentration of the individual fragments is equimolar so that rough quantification of the analysed DNA is possible.
Fig.: 1 % agarose (NEEO, Art. No. 2267) + 1 % Synergel™ (Art. No. 0184)
The DNA marker is supplied in lyophilised form. Sample buffer for dissolving the lyophilised DNA-fragments is included.

T149.1	50 µg + gel loading buffer	plastic	77,30 €
T149.2	4 x 50 µg + gel loading buffer	plastic	263,40 €

pBR328-Marker ready-to-use ③ ready-to-use

DNA marker ready-to-use
Size range: 154-2176 bp
Number of fragments: 11
Number of lanes per ml: approx. 200 (mini gels)

Storage temp.: -20 °C • Transport temp.: room temp.

The marker was manufactured by mixing fragments obtained by restriction digest of pBR328 using the endonucleases *Hinf* I and *Bgl* I.
Made from natural plasmids: fragment sizes can be validated!
DNA-ladder for analysis of small DNA fragments. The concentration of the individual fragments is equimolar so that rough quantitation of the analysed DNA is possible.
The ready-to-use pBR328-marker has been dissolved in 1x concentrated gel loading buffer Roti®-Load DNA (with glycerol) and can be used directly. It has a concentration of 0,1 µg DNA/µl marker-solution.

The DNA marker is supplied in lyophilised form. Sample buffer for dissolving the lyophilised DNA-fragments is included.

T146.1	50 µg + gel loading buffer	plastic	76,90 €

Lambda Hind III / phiX Hae III Marker ⑤

DNA marker + gel loading buffer
Size range: 72-23130 bp
Number of fragments: 17
Number of lanes per 100 µg: approx. 200 (mini gels)

Storage temp.: -20 °C • Transport temp.: room temp.

Versatile marker for depiction of all standard DNA fragment lengths.
By mixing high molecular weight Lambda (*Hind* III) fragments with short-sequence phiX-174 (*Hae* III) fragments a marker was designed which covers a broad range from 200 bp up to 20 kb. Most fragments are distributed in an equimolar way, additionally allowing rough DNA quantification in the gel. Due to this equimolarity, however, the smallest bands of 125 bp, 118 bp and 72 bp can not be detected efficiently in standard gels. Optimal results are obtained with a running distance of approx. 10 cm.
The marker was manufactured by restricting unmethylated DNA with the restriction endonucleases *Hind* III and *Hae* III. Depending on the application, the lyophilised marker can be resolubilised directly in the sterile-filtered 1x-gel loading buffer Roti®-Load DNA (with glycerol) (Art. No. 0100.1) or in TE-buffer.
Fig.: 1 % agarose (NEEO, Art. No. 2267).

CP49.1	50 µg + gel loading buffer	plastic	141,80 €

Lambda Hind III Marker ⑥

DNA marker + gel loading buffer
Size range: 125-23130 bp
Number of fragments: 8
Number of lanes per 100 µg: approx. 200 (mini gels)

Storage temp.: -20 °C • Transport temp.: room temp.

The marker was manufactured by using unmethylated Lambda-DNA and restriction endonuclease *Hind* III.
Classical standard for analysis of middle-range DNA fragments. Since the marker is produced by restriction digest of Lambda-DNA, fragments are mostly distributed in an equimolar way (with the exception of the 4361 bp fragment), additionally allowing rough quantification of the DNA analysed. Depending on the application, the lyophilised marker can be resolubilized directly in the sterile-filtered 1x-gel loading buffer Roti®-Load DNA (with glycerol) (Art. No. 0100.1) or in TE-buffer.
Fig.: 1 % agarose (NEEO, Art. No. 2267)

X910.1	100 µg + gel loading buffer	plastic	61,20 €

see page 1283

Tips for estimating the amount of DNA in agarose gels

- Please make sure to quantitatively dissolve the comparative DNA (e.g. the marker) in buffer, in order to obtain the full DNA-concentration.
- Allow the gel to run far enough so that the bands have adequate space, the DNA can then disperse in the bands and stain well.
- Stain the gel thoroughly - we recommend staining after the gel run. Staining the DNA by adding ethidium bromide to the agarose will not achieve an even distribution in the gel and is frequently not quantitative.
- Apply several lanes of comparative-DNA with different quantities so that various bands can be compared. A calibration curve may also be plotted to determine the exact concentration.
- For comparison it is best to use bands of similar size to your DNA (maximum ±50 % of the fragment length).
- Ethidium bromide is integrated much more effectively between the base pair stacks in linear DNA than in cyclic DNA. Therefore, please make sure that the conformation of the DNA whose concentration you wish to estimate is identical to that of the comparative DNA. In the event of cyclic DNA, i.e. isolated plasmids, cyclic DNA should also be used, e.g. plasmid-DNA pUC19 (Art. No. X911.1) or pBR322 (Art. No. X912.1). If you are using a DNA-marker as a comparative DNA and wish to measure cyclic DNA, you should initially linearize an aliquot of the DNA through restriction digestion and apply the preparation to the gel.
- In the event of a Lambda/*Hind* III marker: Do not use the 4.4 kb band of the marker for concentration analysis, as it is often not quantitatively present but coupled to the large fragment via the cos-site. Should you require the 4.4 kb band, please take care to heat the marker prior to applying (5 minutes at 65 °C).
- Only use the large marker fragments of a Lambda marker for concentration estimation when your fragments are in the same size range. Many visual systems do not depict the staining of the large bands proportionally to the DNA-amount.

The DNA-markers are supplied ready-to-use or in lyophilised form. Gel loading buffer for dissolving the lyophilised DNA-fragments is included. We use Roti®-Load DNA with glycerol (Art. No. 0100.1) as gel loading buffer. The dissolved markers are ready-to-use and can be applied to gels immediately.

Tips for use of DNA length markers

- Storage: Store marker in small aliquots at -20 °C. One aliquot can be stored at +4 °C for permanent use.
- Application amount: Apply more marker when markers with higher band numbers are used. Applied amount can be reduced, however, for short separation distances. Application on polyacrylic amide gels may be reduced to ⅛ to ½ of the marker amount used for agarose gels.
- Fast running gels: Roth markers are established with respect to high separation efficiency even when applying high voltages. Be sure, however, to use sufficient and fresh gel running buffer made with water of good quality.
- "Falsely" running bands: Under extreme conditions, (e.g. high voltages, short running distances, salt content in the probes >150 mM) implausible results may occur, which are often caused by partial strand separation of the DNA. For amendments we recommend: a) Supplementation of the marker with restriction enzyme buffer in order to increase the salt content, b) use lower separation voltages, c) make sure to efficiently remove evolving heat, e.g. by cooling the gel prior to or during the run.

20 bp-DNA-Fluoro-Ladder ① ready-to-use

DNA-Marker ready-to-use, prestained with DNA fluorescent dye
Size range: 20-200 bp
Number of fragments: 10
Number of lanes per ml: approx. 200 (Minigel)

Storage temp.: -20 °C • Transport temp.: room temp.

Regular DNA ladder for the analysis of very small DNA fragments. Delivered in *ready-to-use* format for direct application to gels. The 100 bp fragment has been enhanced for easy analysis of the gel. Orange G was included as tracking dye. The bands of the marker are prestained with the fluorescent dye EvaGreen®, which has been developed specifically for DNA analysis. Due to the low membrane permeability of the dye, the marker is non mutagenic, non-toxic, and environment friendly. It can be excited by UV- and blue light, making it fully compatible with standard UV-transilluminators as well as with modern blue-light illumination (see also Rotiphorese® PROfessional runVIEW, Art. No. 4849.1). When excited, the nucleic acid-bound dye emits a brightly coloured green fluorescence that may be documented by all usual broadband ethidium bromide filters or SYBR® Green foto filters.
Excitation maximum (bound to DNA): approx. 320 nm and 470-500 nm
Emission maximum (bound to DNA): 525 nm
The 20 bp-DNA-Fluoro-Ladder is an ideal addition to the with EvaGreen® prestained gel loading buffer Roti®-Load DNAstain 3 (Art. No. 6472).

8262.1	500 µl (50 µg)	138,70 €

50 bp-DNA-Fluoro-Ladder ② ready-to-use

DNA-Marker ready-to-use, prestained with DNA fluorescent dye
Size range: 50-500 bp
Number of fragments: 10
Number of lanes per ml: approx. 200 (Minigel)

Storage temp.: -20 °C • Transport temp.: room temp.

Regular DNA ladder for the analysis of small DNA fragments. Delivered in *ready-to-use* format for direct application to gels. The 250 bp fragment has been enhanced for easy analysis of the gel. Orange G was included as tracking dye.
The bands of the marker are prestained with the fluorescent dye EvaGreen®, which has been developed specifically for DNA analysis. Due to the low membrane permeability of the dye, the marker is non mutagenic, non-toxic, and environment friendly. It can be excited by UV- and blue light, making it fully compatible with standard UV-transilluminators as well as with modern blue-light illumination (see also Rotiphorese® PROfessional runVIEW, Art. No. 4849.1). When excited, the nucleic acid-bound dye emits a brightly coloured green fluorescence that may be documented by all usual broadband ethidium bromide filters or SYBR® Green foto filters.
Excitation maximum (bound to DNA): approx. 320 nm and 470-500 nm
Emission maximum (bound to DNA): 525 nm
The 50 bp-DNA-Fluoro-Ladder is an ideal addition to the with EvaGreen® prestained gel loading buffer Roti®-Load DNAstain 3 (Art. No. 6472).

8263.1	500 µl (50 µg)	121,40 €

100 bp-DNA-Fluoro-Ladder ③ ready-to-use

DNA-Marker ready-to-use, prestained with DNA fluorescent dye
Size range: 100-1000 bp
Number of fragments: 10
Number of lanes per ml: approx. 200 (Minigel)

Storage temp.: -20 °C • Transport temp.: room temp.

Regular DNA ladder for the analysis of small DNA fragments. Delivered in ready-to-use format for direct application to gels. The 500 bp fragment has been enhanced for easy analysis of the gel. Orange G and xylene cyanole were included as tracking dyes.
The bands of the marker are prestained with the fluorescent dye EvaGreen®, which has been developed specifically for DNA analysis. Due to the low membrane permeability of the dye, the marker is non mutagenic, non-toxic, and environment friendly.
It can be excited by UV- and blue light, making it fully compatible with standard UV-transilluminators as well as with modern blue-light illumination (see also Rotiphorese® PROfessional runVIEW, Art. No. 4849.1). When excited, the nucleic acid-bound dye emits a brightly coloured green fluorescence that may be documented by all usual broadband ethidium bromide filters or SYBR® Green foto filters.
Excitation maximum (bound to DNA): approx. 320 nm and 470-500 nm
Emission maximum (bound to DNA): 525 nm
The 100 bp-DNA-Fluoro-Ladder is an ideal addition to the with EvaGreen® prestained gel loading buffer Roti®-Load DNAstain 2 (Art. No. 5784).

8264.1	500 µl (50 µg)	111,30 €

200 bp-DNA-Fluoro-Ladder ④ ready-to-use

DNA-Marker ready-to-use, prestained with DNA fluorescent dye
Size range: 200-2000 bp
Number of fragments: 10
Number of lanes per ml: approx. 200 (Minigel)

Storage temp.: -20 °C • Transport temp.: room temp.

Regular DNA ladder for the analysis of DNA fragments. Delivered in *ready-to-use* format for direct application to gels. The 1000 bp fragment has been enhanced for easy analysis of the gel. Bromophenol blue and xylene cyanole were included as tracking dyes.
The bands of the marker are prestained with the fluorescent dye EvaGreen®, which has been developed specifically for DNA analysis. Due to the low membrane permeability of the dye, the marker is non mutagenic, non-toxic, and environment friendly. It can be excited by UV- and blue light, making it fully compatible with standard UV-transilluminators as well as with modern blue-light illumination (see also Rotiphorese® PROfessional runVIEW, Art. No. 4849.1). When excited, the nucleic acid-bound dye emits a brightly coloured green fluorescence that may be documented by all usual broadband ethidium bromide filters or SYBR® Green foto filters.
Excitation maximum (bound to DNA): approx. 320 nm and 470-500 nm
Emission maximum (bound to DNA): 525 nm
The 200 bp-DNA-Fluoro-Ladder is an ideal addition to the with EvaGreen® prestained gel loading buffer Roti®-Load DNAstain 1 (Art. No. 5783).

8265.1	500 µl (50 µg)	99,90 €

500 bp-DNA-Fluoro-Ladder ⑤ ready-to-use

DNA-Marker ready-to-use, prestained with DNA fluorescent dye
Size range: 500-5000 bp
Number of fragments: 10
Number of lanes per ml: approx. 200 (Minigel)

Storage temp.: -20 °C • Transport temp.: room temp.

Regular DNA ladder for the analysis of DNA fragments. Delivered in *ready-to-use* format for direct application to gels. The 2500 bp fragment has been enhanced for easy analysis of the gel. Bromophenol blue and xylene cyanole were included as tracking dyes.
The bands of the marker are prestained with the fluorescent dye EvaGreen®, which has been developed specifically for DNA analysis. Due to the low membrane permeability of the dye, the marker is non mutagenic, non-toxic, and environment friendly. It can be excited by UV- and blue light, making it fully compatible with standard UV-transilluminators as well as with modern blue-light illumination (see also Rotiphorese® PROfessional runVIEW, Art. No. 4849.1). When excited, the nucleic acid-bound dye emits a brightly coloured green fluorescence that may be documented by all usual broadband ethidium bromide filters or SYBR® Green foto filters.
Excitation maximum (bound to DNA): approx. 320 nm and 470-500 nm
Emission maximum (bound to DNA): 525 nm
The 500 bp-DNA-Fluoro-Ladder is an ideal addition to the with EvaGreen® prestained gel loading buffer Roti®-Load DNAstain 1 (Art. No. 5783).

8266.1	500 µl (50 µg)	87,00 €

1 kbp-DNA-Fluoro-Ladder ⑥ ready-to-use

DNA-Marker ready-to-use, prestained with DNA fluorescent dye
Size range: 1000-10000 bp
Number of fragments: 10
Number of lanes per ml: approx. 200 (Minigel)

Storage temp.: -20 °C • Transport temp.: room temp.

Regular DNA ladder for the analysis of big DNA fragments. Delivered in *ready-to-use* format for direct application to gels. The 5 kb fragment has been enhanced for easy analysis of the gel. Bromophenol blue and xylene cyanole were included as tracking dyes.
The bands of the marker are prestained with the fluorescent dye EvaGreen®, which has been developed specifically for DNA analysis. Due to the low membrane permeability of the dye, the marker is non mutagenic, non-toxic, and environment friendly. It can be excited by UV- and blue light, making it fully compatible with standard UV-transilluminators as well as with modern blue-light illumination (see also Rotiphorese® PROfessional runVIEW, Art. No. 4849.1). When excited, the nucleic acid-bound dye emits a brightly coloured green fluorescence that may be documented by all usual broadband ethidium bromide filters or SYBR® Green foto filters.
Excitation maximum (bound to DNA): approx. 320 nm and 470-500 nm
Emission maximum (bound to DNA): 525 nm
The 1 kb-DNA-Fluoro-Ladder is an ideal addition to the with EvaGreen® prestained gel loading buffer Roti®-Load DNAstain 1 (Art. No. 5783).

8267.1	500 µl (50 µg)	76,90 €

▶ **DNA-gel loading buffers** with fluorescent dye EvaGreen®
see page 1205

Please note: Reliable size determination of unstained DNA fragments cannot performed using prestained markers.
To make the running distances comparable it is necessary to stain the DNA fragments, too. We recommend using the gel loading buffer Roti®-Load DNAstain. The buffer contains - as well as the Fluoro ladders - the non-toxic fluorescent dye EvaGreen®, which is detectable with UV- and blue light.

Evenly Distributed DNA Markers (Unstained)

20 bp-DNA-Ladder ① ready-to-use

DNA marker ready-to-use
Size range: 20-200 bp
Number of fragments: 10
Number of lanes per ml: approx. 200 (mini gels)

Storage temp.: -20 °C • Transport temp.: room temp.

Regular DNA ladder for the analysis of very small DNA fragments. Delivered in ready-to-use format for direct application to gels. The 100 bp fragment has been enhanced for easy analysis of the gel. All fragments are quantified, enabling quantitation of sample DNA in the gel. In order to avoid overlay of bands by bromophenol blue or xylene cyanol, Orange G was included as dye. We recommend use of this marker on the following special agaroses: High Resolution (Art. No. K297), HR-PLUS (Art. No. HP30), LM/PCR (Art. No. HP31), or an agarose with additional Synergel™ (Art. No. 0184). The 20 bp DNA-Ladder is highly compatible with the 100 bp DNA-Ladder *equimolar* (Art. No. T834). The two markers can easily be combined, resulting in a highly versatile ladder from 20 bp up to 1000 bp (right lane in figure).
Fig.: 1,4 % agarose (High Resolution, Art. No. K297) + 0,8 % Synergel™ (Art. No. 0184) in 1 x TAE.

2805.1	500 µl (50 µg)	plastic	121,40 €

50 bp-DNA-Ladder ② ready-to-use

DNA marker ready-to-use
Size range: 50-500 bp
Number of fragments: 10
Number of lanes per ml: approx. 200 (mini gels)

Storage temp.: -20 °C • Transport temp.: room temp.

Regular DNA ladder for the analysis of small DNA fragments. Delivered in ready-to-use format for direct application to gels. The 250 bp fragment has been enhanced for easy analysis of the gel. All fragments are quantified, enabling quantitation of sample DNA in the gel. In order to avoid overlay of bands by bromophenol blue or xylene cyanol, Orange G was included as dye. We recommend use of this marker on the following special agaroses: High Resolution (Art. No. K297), HR-PLUS (Art. No. HP30), LM/PCR (Art. No. HP31), or an agarose with additional Synergel™ (Art. No. 0184). The 50 bp DNA-Ladder is highly compatible with the 100 bp DNA-Ladder *equimolar* (Art. No. T834). The two markers can easily be combined, resulting in a highly versatile ladder from 50 bp up to 1000 bp (right lane in figure).
Fig.: 1,1 % agarose (High Resolution, Art. No. K297) + 0,8 % Synergel™ (Art. No. 0184) in 1 x TAE.

2810.1	500 µl (50 µg)	plastic	102,05 €

The DNA-markers are supplied ready-to-use or in lyophilised form. Gel loading buffer for dissolving the lyophilised DNA-fragments is included. We use Roti®-Load DNA with glycerol (Art. No. 0100.1) as gel loading buffer. The dissolved markers are ready-to-use and can be applied to gels immediately.

For direct detection of the marker DNA in the gel under UV- or blue light we recommend to use lyophilized marker DNA. The marker DNA is first solubilized in sterile water or 1xTE buffer, then Roti®-Load DNAstain (6x conc.) is added. The so prepared marker may be aliquoted and stored at -20 °C.

Roti®-Load DNAstain contains a fluorecent dye which may be excited by UV- or blue light, emitting at 525 nm.

T835.2	4 x 50 µg + gel loading buffer	plastic	295,65 €

200 bp-DNA-Ladder ⑥ ready-to-use

DNA marker ready-to-use

Size range: 200-2000 bp
Number of fragments: 10
Number of lanes per ml: approx. 200 (mini gels)

Storage temp.: -20 °C • Transport temp.: room temp.

Regular DNA ladder for the analysis of DNA fragments. Delivered in *ready-to-use* format for direct application to gels. The 1000 bp fragment has been enhanced for easy analysis of the gel. All fragments are quantified, enabling quantitation of sample DNA in the gel. Bromophenol blue and xylene cyanol are included as tracking dyes. We recommend use of this marker on the following special agaroses: HR-PLUS (Art. No. HP30), LM/PCR (Art. No. HP31), or an agarose with additional Synergel™ (Art. No. 0184). The 200 bp DNA-Ladder is highly compatible with the 20 bp DNA-Ladder (Art. No. 2805). The two markers can easily be combined, resulting in a highly versatile ladder from 20 bp up to 2000 bp .

8272.1	500 µl (50 µg)		90,20 €

250 bp-DNA-Ladder ⑦

DNA ladder + gel loading buffer

Size range: 250-8000 bp
Number of fragments: 16
Number of lanes per 100 µg: approx. 200 (mini gels)

Storage temp.: -20 °C • Transport temp.: room temp.

Universal marker for size analysis of plasmids and DNA-insertions. Two fragments of 1500 and 2500 bp have been reinforced for easy orientation in the gel. The DNA amount per band has been optimised in such a way that a small running distance and low amounts of marker are sufficient for optimum separation.
Fig.: 1,8 % agarose (NEEO, Art. No. 2267)
The ladder is supplied in lyophilised form. Gel loading buffer for dissolving the lyophilised DNA-fragments is included.

T918.1	50 µg + gel loading buffer	plastic	83,35 €

500 bp-DNA-Ladder ⑧ ready-to-use

DNA marker ready-to-use

Size range: 500-5000 bp
Number of fragments: 10
Number of lanes per ml: approx. 200 (mini gels)

Storage temp.: -20 °C • Transport temp.: room temp.

Regular DNA ladder for the analysis of DNA fragments. Delivered in *ready-to-use* format for direct application to gels. The 2500 bp fragment has been enhanced for easy analysis of the gel. All fragments are quantified, enabling quantitation of sample DNA in the gel. Bromophenol blue and xylene cyanol are included as tracking dyes. We recommend use of this marker on the following special agaroses: GTQ (Art. No. 6352), Broad Range (Art. No. T846), or an agarose with additional Synergel™ (Art. No. 0184). The 500 bp DNA-Ladder is highly compatible with the 50 bp DNA-Ladder (Art. No. 2810). The two markers can easily be combined, resulting in a highly versatile ladder from 50 bp up to 5 kb.

8273.1	500 µl (50 µg)		71,95 €

1 kbp DNA-Ladder ⑨

DNA ladder + gel loading buffer

Size range: 500-10000 bp
Number of fragments: 11
Number of lanes per 100 µg: approx. 200 (mini gels)

Storage temp.: -20 °C • Transport temp.: room temp.

Universal marker for electrophoretic separation of fragments between 500 bp and 10 kb, optimally suited for size determination of inserts, plasmids, and restricted DNA. The mass of the larger fragments was reduced, allowing to obtain clear and distinct bands with short running distances even for the large marker fragments.
The terminal sticky *Eco*R I-restriction sites allow simple labelling of the marker fragments via end-labelling techniques.
The 1 kbp DNA-ladder is highly compatible with the 100 bp DNA-ladder (equalised: T833.1).
Fig.: 1.2 % agarose (NEEO, Art. No. 2267). Additional band at 125 bp.
The DNA-ladder is supplied in lyophilised form.
Gel loading buffer for dissolving the lyophilised DNA-fragments is included.

Y014.1	50 µg + gel loading buffer	plastic	37,55 €
Y014.2	4 x 50 µg + gel loading buffer	plastic	129,55 €

The DNA-markers are supplied ready-to-use or in lyophilised form. Gel loading buffer for dissolving the lyophilised DNA-fragments is included. We use Roti®-Load DNA with glycerol (Art. No. 0100.1) as gel loading buffer. The dissolved markers are ready-to-use and can be applied to gels immediately.

Instructions for use
can be found on the Internet next to the product description.

DNA-Ladder combi ⑩

DNA marker + gel loading buffer

Size range: 100-10000 bp
Number of fragments 20
Number of lanes per 40 µg + 100 µg: approx. 200 (mini gels)

Storage temp.: -20 °C • Transport temp.: room temp.

Versatile DNA-marker combination for gels and DNA-fragments of different size. DNA-ladder combi combines the advantages of the 100 bp ladder, equalized (Art. No. T833), with the versatile 1 kbp DNA-ladder (Art. No. Y014). Subsequently we now have a marker set that completely covers both the medium size range up to 10 kb (see figure of Art. No. Y014) as well as enabling clear size analysis in the small fragment range. The two markers come in separate tubes to ensure high flexibility in the laboratory. They can, therefore, be used separately or combined. The bands below 500 bp were enhanced aligning their intensity in the gel to the large fragments. The 500 bp band was specially enhanced for easy orientation in the gel.
The **figure** shows a gel mixture of 0,9 % Agarose + 0,5 % Synergel® with (left to right): 0,4 µg 100 bp Ladder, equalized + 0,3 µg 1 kbp Ladder; 0,5 µg 1 kbp Ladder, 0,4 µg 100 bp Ladder, equalized. The DNA-ladder is supplied in lyophilised form. Gel loading buffer for dissolving the lyophilised DNA-fragments is included.

CL22.1	20 µg + 50 µg + gel loading buffer	plastic	112,80 €

DNA Markers for Short Runs

Marker	PCR-Marker DNAscore	DNA-Marker short run 1	DNA-Marker short run extended	DNA-Marker ccc-Plasmid
Art. No.	T917 (fig. 1)	0146 (fig. 2)	CL05 (fig. 3)	0149 (fig. 4)
Size range (bp)	500 - 1500	500 - 2500	100 - 6000	3000 - 12000
Number of fragments	7	5	9	3
Reinforced bands at (bp)	500, 1000, 1500	1500	1500	-
Quantitation	possible	possible	possible	-

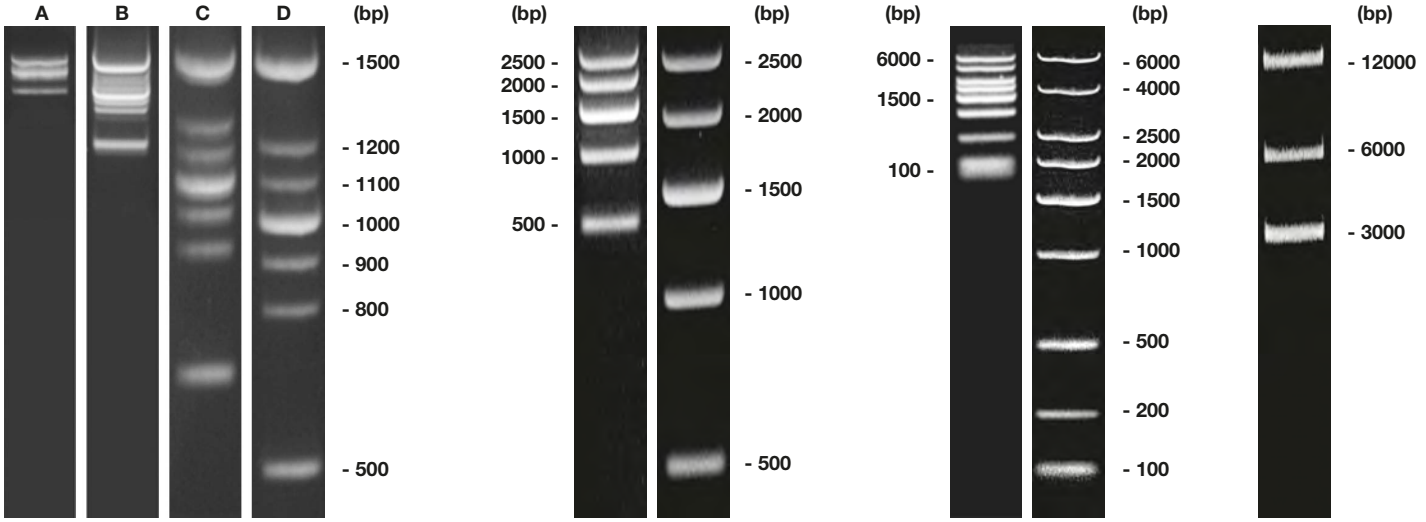
Delivery	lyophilised	lyophilised	lyophilised	lyophilised



① ② ③ ④

PCR-Marker DNA*score* ①

DNA marker + gel loading buffer
Size range: 500-1500 bp
Number of fragments: 7
Reinforced bands: 500 bp, 1000 bp, 1500 bp
Band for DNA quantitation: 1000 bp
Number of lanes per 100 µg: approx. 200 (mini gels)

Storage temp.: -20 °C • Transport temp.: room temp.

PCR-Marker DNAscore resolves extremely quickly and is therefore excellent for analysing PCR-fragments and for routine-analysis.
The 500 bp, 1000 bp and 1500 bp bands have been reinforced in their intensity for speedy and simple orientation.
The special 1000 bp band allows the marker to be used for quantifying in gel. Depending on the resolved segment, the marker changes its appearance (see **figure**):
A) 1,0 cm: The marker shows three bands (500 bp, 1000 bp, 1500 bp).
B) 1,5 cm: Four satellite bands flank the 1000-bp-band.
C) 3-4 cm: All bands are resolved. Efficient size analysis of fragments with a difference of 50 bp is possible.
D) 6-7 cm: The marker can also be used for quantfying after approx. 6 cm run: the 1000-bp-band corresponds to140 ng DNA (when loading 0,5 µg DNA-marker).

T917.1	50 µg + gel loading buffer	plastic	83,75 €

DNA-Marker short-run 1 ②

DNA marker + gel loading buffer
Size range: 500-2500 bp
Number of fragments: 5
Number of lanes per 100 µg: approx. 400 (mini gels)
The perfect DNA-marker for very short gel running distances and high-through-put approaches.

Storage temp.: -20 °C • Transport temp.: room temp.

Best results are already obtained at 18 mm running distance in a 1,5 % agarose gel (see figure). The fragment mass is optimised for very short runs. The 1500 bp fragment has been enhanced for easy analysis of the gel.
Fig.: 1,5 % agarose (NEEO, Art. No. 2267). Left - running distance 18 mm, Right - running distance 40 mm.

0146.1	50 µg + gel loading buffer	plastic	75,15 €

DNA-Marker short-run *extended* ③

DNA marker + gel loading buffer
Size range: 100-6000 bp
Number of fragments: 9
Number of lanes per 100 µg: approx. 300 (mini gels)

Storage temp.: -20 °C • Transport temp.: room temp.

New DNA marker, optimised for all standard applications in the lab. Due to the lesser number of fragment bands, the short-run, extended DNA-Marker separates very efficiently even on very short running distances, making it a versatile tool also for high-throughput and short-term electrophoresis. Best results are already obtained at 15 mm running distance / 7 minutes runtime in a 1,5 % agarose gel with 0,3 µg DNA loading per lane (see **figure**).
The fragment mass is optimised for very short runs and the enhanced 1 500 bp fragment provides easy orientation for analysis.
Fig.: Left - 1,5 % agarose (NEEO, Art. No. 2267), running distance 15 mm. Right - 1,2 % agarose, running distance 35 mm.

CL05.1	50 µg + gel loading buffer	plastic	87,00 €

DNA-Marker ccc-plasmid ④

DNA marker + gel loading buffer
Size range: 3000-12000 bp
Number of fragments: 3
Number of lanes per 100 µg: approx. 1000 (mini gels)
A “covalently closed circle“ DNA-marker for rapid determination of plasmid size and estimation of plasmid concentration following DNA-preparation.

Storage temp.: -20 °C • Transport temp.: room temp.

The excellent separation efficiency of the marker even on short running distances allows for the application in high-throughput approaches. Best results are already obtained at 20 mm running distance in a 1,2 % agarose gel (see figure).
Fig.: 1,2 % agarose (NEEO, Art. No. 2267), running distance 20 mm.

0149.1	10 µg + gel loading buffer	plastic	63,35 €

The DNA-ladders are supplied in lyophilised form. A short-run-optimised sample buffer for dissolving the lyophilised DNA-fragments is included (Art. No. 0099.1).
The dissolved markers are ready-to-use and can be applied to gels immediately.

Staining of Protein Gels

ROTH provides a large selection of high-quality staining kits and reagents for proteins, differing in their sensitivity and range of application.
The table below will help you to select the staining method best suitable for your particular application.

Summary Staining of Protein Gels

Product	Sensitivity	Description
Roti®-Black P	1 ng/mm²	**Silver** staining kit. Highly sensitive. Simple, fast and reproducible.
Roti®-Blue	10 ng/mm²	Coomassie®-solution for colloidal staining of proteins. **Destaining not required**. Non-fixing staining for protein gel elution possible. Proteomics-compatible.
Roti®-Blue quick	10 ng/mm²	Solution for **rapid**, highly specific **staining** of proteins. **Destaining not required.** Non-fixing staining, compatible with blotting and Proteomics.
Rotiphorese®-Blue R	50 ng/mm²	**Coomassie®** staining solution concentrate for rapid staining
Coomassie® Blue G250 (C.I. 42655)	60 ng/mm²	Dye for performing Coomassie® staining. OD_{max} = 595
Coomassie® Blue R250 (C.I. 42660)	50 ng/mm²	Dye for performing Coomassie® staining. OD_{max} = 550

Coomassie® Gel Staining
Basics and mechanisms of Coomassie® dyes

Roti®-Blue quick ready-to-use

ready-to-use 1x conc. solution
Solution for rapid, sensitive staining of protein gels.
Storage temp.: +4 °C

- Particularly fast, specific staining
- First bands are visible within 3 mins.
- No background - no destaining necessary
- Very simple application without heating, methanol, or acetic acid
- Stabilised for a longer shelf life

Roti®-Blue quick provides a new, very fast staining method for proteins in polyacrylamide gels. Due to the modern formulation, the dye binds highly specifically to proteins, but not to the gel matrix, hence eliminating the need to destain the gel. First bands are clearly visible within 3 mins.!

Protein amount / band	Approximate staining duration
≥1 µg	3 mins.
≥100 ng	15 mins.
≥10 ng	60 mins.

The sensitivity of staining equals that of Roti®-Blue (Art. No. A152), so bands of 10 ng protein can be detected.
Roti®-Blue quick is, therefore, approx. 5times more sensitive than standard Coomassie® staining solutions. Roti®-Blue quick staining is also fully compatible with usual down-stream applications like, membrane transfer & Western blotting, MS analysis (incl. MALDI) and protein gel elution.

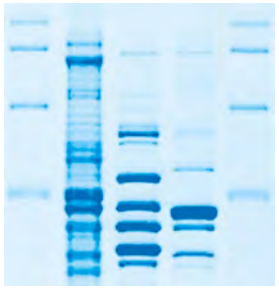

Figure:
SDS-PAGE with 3 µl Roti®-Mark Standard and samples.
Staining duration: 20 mins.

1 l solution is sufficient for approx. 40 mini gels.

4829.1	250 ml	glass	67,20 €
4829.2	1 l	glass	228,45 €
Original pack 6 x 1 l			217,03/1 l

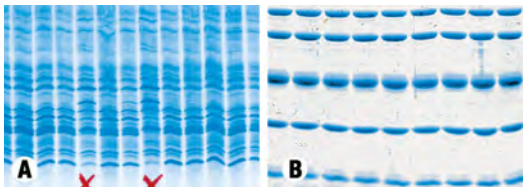
Roti®-Blue ready-to-use

5x concentrated

Colloidal Coomassie® staining solution for protein gels.
Storage temp.: +20 °C

- Most simple application
- No destaining necessary
- 5 x more sensitive than Coomassie® R250

Roti®-Blue is a colloidal Coomassie® brilliant blue G250 staining agent for proteins in polyacrylamid gels. Its colloidal features enable the staining agent to be bound to the proteins with high specificity and only minimally to the gel matrix. There is no longer any need for the extensive washing steps for background decoloring. Roti®-Blue is approximately 5 x more sensitive than standard Coomassie® staining solutions. Staining time takes 2 to 12 hours depending on the desired band intensity.
Due to the fact that proteins may be stained without fixing the gel, membrane transfer and gel elution are still possible following staining.
Particularly well suited for staining prior to MS-analyses (e.g. MALDI) and prior to gel elution.



Figures:
A: Horizontal IEF for determination of wheat-varieties.

Roti®-Black P

silver staining kit for proteins

Danger H272-H301+H311+H331-H314-H317-H341-H350-H370-H410

- Sensitive silver staining
- Transparent gel
- Reliable results

Roti®-Black is a kit for speedy, reproducible silver staining of proteins in free and foil-supported gels.
High sensitivity in combination with very low background enables detection of proteins from 1 ng/mm² on. 1 kit is adequate for staining 10 gels. Staining can be performed in unsupported gels without methanol. Included is an easy-to-follow instruction manual which will guarantee reliable results.

This Kit contains sodium thiosulphate (Art. No. L534), silver nitrate (Art. No. L535), empty test tubes (Art. No. L536), formaldehyde (Art. No. L537), and sodium carbonate (Art. No. L538).
Contents of this Kit may not be bought separately. Shipped without racket.

L533.1	for 10 gels of 10 ml vol. each	78,40 €
L533.2	for 10 gels of 40 ml vol. each	94,50 €

Silver nitrate

≥99,9 %, for staining of proteins, Proteicolor®

$AgNO_3$

M 169,88 g/mol

Danger H272-H314-H400-H410

Proteicolor® is a special quality silver nitrate for reproducible staining of proteins and 1,2 Diol-groups, of glycoproteins and polysaccharides in polyacrylamide and agarose gels. Staining with Proteicolor® can also be used for highly sensitive identification of RNA and DNA.

6207.1	50 g	plastic	137,10 €

Silver staining of proteins and DNA-gels

Roti®-Black silver staining kits have been optimized to provide you with the most sensitive staining possible. Adding **thiosulfate** during the sensibilization and generation process reduces the background and increases contrast (acc. to Blum *et al.*, (1987) *Electrophoresis* 8:93-9). **Formaldehyde** should preferably be fresh when applied and it reduces the silver ions (Ag^+) to so-called silver seed crystals.

We recommend to:

- Wash the gels carefully after each step otherwise there may be side reactions in the form of stains, spots, increased background or secondary bands.
- Fix the gels carefully. Inadequate fixation impairs band formation and increases the background. Fresh and high-quality fixatives should be used and adapted to the volume and duration of gel strength.

Staining of DNA Gels

Nucleic acid dyes for agarose and acrylamide gels, for laboratories and practical applications. We offer you high-quality stains with high sensitivity (silver stains), standard stains (ethidium bromide) in user-friendly dropper bottles, and non-toxic fluorescent dyes for blue or UV light.
The following table provides an overview of the various stains and their respective sensitivity levels.

Summary Staining of Nucleic Acid in Gels

Product	Sensitivity	Description	Excitation
Roti®-Black N	<0.1 ng/mm²	**Silver** staining of DNA polyacrylic amide gels	White light
Roti®-Black NSeq	<0.1 ng/mm²	**Silver** staining of DNA sequencing gels	White light
Ethidium bromide solution	1.5 ng/mm²	Standard **fluorescent** staining	254-330 nm, 500 nm UV- and blue light
EvaGreen® fluorescent dye	1.5 ng/mm²	Non-toxic, green **fluorescent** staining	320 nm, 470-500 nm UV- and blue light
Roti®-GelStain	1.5 ng/mm²	Non-toxic, green **fluorescent** staining	290-320 nm UV-light
Roti®-GelStain Red	1.5 ng/mm²	Non-toxic, red **fluorescent** staining	310 nm, 540 nm UV- and blue light
Roti®-Load DNAstain gel loading buffer	1.5 ng/mm²	Non-toxic, green **fluorescent** staining Dye: EvaGreen®	320 nm, 470-500 nm UV- and blue light
Roti®-Methylene blue staining concentrate	10 ng/mm²	Reversible, non-toxic **blue** staining	White light

Colorimetric Staining of Nucleic Acids in Gels

Roti®-Black N

silver staining kit for DNA-polyacrylamide gels

Danger H272-H301+H311+H331-H314-H317-H341-H350-H370-H410

- Ultra-sensitive
- Easy-to-follow guide
- Transparent gel

Roti®-Black N is a kit for ultra-sensitive and reproducible staining of DNA in polyacrylamide gels.
Detection limit for DNA is <0.1 ng/mm². Roti®-Black N is, therefore, an excellent alternative to using radioactivity or bioluminescent systems.
Roti®-Black N results in an intensive staining of nucleic acids, yet the gel matrix remains highly transparent. The enclosed instruction manual is easy to follow and guarantees reliable results.
This Kit contains silver nitrate (Art. No. N770), formaldehyde (Art. No. N771), sodium thiosulphate (Art. No. N772), sodium carbonate (Art. No. N774), and stop solution (Art. No. N773).
Contents of this Kit may not be bought separately. Shipped without racket.

N769.1	for 10 gels of max. 10 ml gel volume	97,75 €
N769.2	for 10 gels of max. 40 ml gel volume	170,95 €

Roti®-Black NSeq

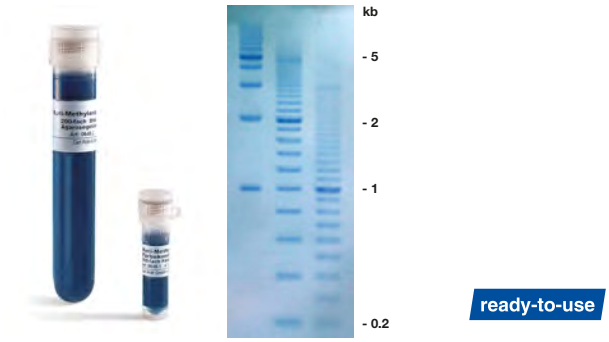
silver staining kit for sequencing gels

Danger H272-H301+H311+H331-H314-H317-H341-H350-H370-H410

Roti®-Black NSeq is a kit for ultra-sensitive and reproducible staining of DNA in denaturing and non-denaturing gels.
Detection limit <0.1 ng/mm².
Roti®-Black NSeq is the ideal choice for detecting minute DNA amounts in sequencing gels (Microsatellite-DNA or SSLP – simple sequence length polymorphisms). The enclosed instruction manual is easy to follow and guarantees reliable results. The gels are stained on the glass plate.

This Kit contains silver nitrate (Art. No. P082), formaldehyde (Art. No. P083), sodium thiosulphate (Art. No. P084), sodium carbonate (Art. No. P085), and stop solution (Art. No. P086).
Contents of this Kit may not be bought separately. Shipped without racket.

P081.1	for 10 gels of max. 48 ml gel volume	139,25 €



ready-to-use

Roti®-Methylene blue staining concentrate

For reversible staining of DNA in agarose gels, 200x concentrate.
Storage temp.: +4 °C

Warning H226-H319

- Highly reversible alternative to ethidium bromide
- High sensivity (in minimum 10 ng/band)
- No transilluminator required
- Solution can be used repeatedly
- Sufficient for more than 50 mini gels

The staining solution was specially developed for sensitive staining of DNA in agarose gels. Sensitivity reaches up to 10 ng per DNA-band. Staining can be conducted in a simple staining bowl, a transilluminator is not required. The diluted staining solution can be used several times.
Roti®-Methylene blue staining concentrate binds to the negativly charged DNA backbone by salt bridges formed through quaternary ammonia complexes. The staining is very easy to remove by washing or replacement by salts.

Applications: DNA agarose gels, DNA polyacrylic amide gels, reversible staining of Southern- and Northern-blots.
12 ml Roti®-methylene blue staining concentrate is sufficient for more than 50 mini gels.

0648.1	3 ml	plastic	38,20 €
0648.2	12 ml	plastic	113,85 €

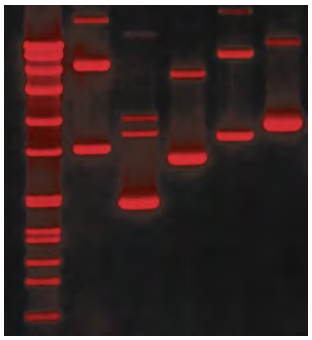
Non-Toxic Fluorescent Staining of Nucleic Acids in Gels

Non-toxic and non-carcinogenic dyes for fluorescent staining of nucleic acids in agarose gels. Highly sensitive and applied just like ethidium bromide.

The **Roti®-GelStain** dyes are used as additives to the gel solution and the running buffer, partly also post-run staining is possible.

Eva Green® is added directly to the loading buffer. Ready-made loading buffers with Eva Green® are the **Roti®-Load DNAstain** solutions.

All dyes can be excited by UV light, additionally, Eva Green® and Roti®-GelStain Red can be excited by blue light. Resulting signals may be detected by ethidium bromide broadband photo filters.



For UV- and blue light

Roti®-GelStain Red

ready-to-use | DNAse-free

for electrophoresis

Red fluorescent staining reagent for non-toxic staining of nucleic acids in agarose gels and polyacrylamide gels.

Alternative for ethidium bromide, Ethidium bromide substitute

Storage temp.: +4 °C

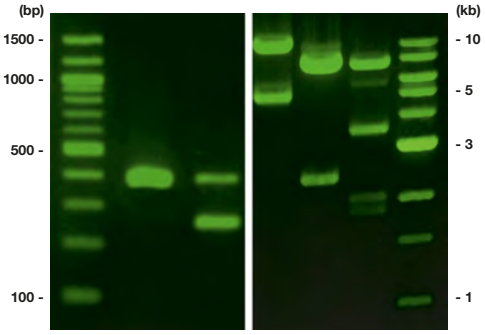
- Alternative to ethidium bromide, non-toxic, non-mutagen
- Detection of > 0.3 ng nucleic acid per band
- Usuable with the same filters as ethidium bromide
- Excitation via UV light (310 nm) and blue light (540 nm)
- Compatible with all usual down-stream applications

Roti®-GelStain Red is a new designed red fluorescent dye that can be used like ethidium bromide for staining in gel (addition to gel solution). Due to the low membrane permeability of the dye Roti®-GelStain Red is non-mutagenic and non-toxic. It is suitable for staining of dsDNA, ssDNA and RNA. Bound to nucleic acid it emits a brightly red fluorescence that can be documented by all usual ethidium bromide foto filters. Roti®-GelStain Red is compatible with all usual down-stream applications.
Excitation maximum (bound to DNA): approx.310 nm and 540 nm
Emission maximum (bound to DNA): 630 nm

Type analysis:

Appearance. ..... red, transparent liquid, no precipitation
Staining of DNA in agarose gels. ..... complies
Staining of DNA in PA gels. ..... complies

0984.1	1 ml	plastic	100,95 €
0984.2	1 x 5 ml	plastic	450,45 €



For UV-light

Roti®-GelStain

ready-to-use

Fluorescent staining, ready-to-use, for electrophoresis

For non-toxic fluorescent staining of nucleic acids in agarose gels. Green fluorescence.

Storage temp.: +4 °C

Roti®-GelStain is a new, versatile staining reagent for detection of all nucleic acids in agarose gels.

- Alternative for ethidium bromide, non-toxic, non-mutagen
- Nearly as sensitive as ethidium bromide, up to 1,5 ng/mm² nucleic acid
- For use with common broad-band ethidium bromide photo filters
- Compatible with all usual down-stream applications

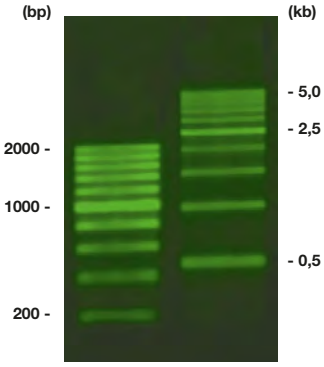
The dye may be used exactly in the same way as ethidium bromide - for staining in-gel, staining through running buffer, or post-run staining -, and may replace this toxic and potentially mutagen reagent completely. Roti®-GelStain detects up to 1,5 ng/mm² nucleic acid, which is approx. 0,2 ng per band, and is, therefore, nearly as sensitive as ethidium bromide.
When bound to nucleic acids in agarose gels, Roti®-GelStain emits a brightly green fluorescence that may be documented by all usual broad-band ethidium bromide or SYBR® Green foto filters. Roti®-GelStain is compatible with all standard down-stream applications and has been successfully tested for use with gel extraction, ligation, transformation and transfection.

The **figure** depicts amplicons of a mouse genotyping (left), and restriction digested DNA (right), respectively, separated in 2,5 and 1 % agarose Roti®garose NEEO with Roti®-GelStain (5 µl / 100 ml agarose). Pictures were taken using standard ethidium bromide photo filters.With kind permission of Prof. R. Slany, Dept. of Genetics, Friedrich Alexander University, Erlangen.

Excitation maximum (bound to DNA): 290-320 nm
Emission maximum (bound to DNA): 515 nm
Suitable for staining of dsDNA, ssDNA and RNA.

1 ml is sufficient for staining of approx. 600 minigels (with 30 ml agarose each).

3865.1	1 ml	plastic	95,60 €
3865.2	5 x 1 ml	plastic	429,50 €



For UV- and blue light

Roti®-Load DNAstain

ready-to-use | DNAse-free

6x conc. gel loading buffer, ready-to-use, DNAse-free

DNA-gel loading buffer with fluorescent DNA-dye EvaGreen®.
Storage temp.: -20 °C • Transport temp.: room temp.

- Alternative for ethidium bromide, non-toxic, non-mutagen
- Nearly as sensitive as ethidium bromide, up to 1,5 ng/mm² nucleic acid
- For use with common broad-band ethidium bromide photo filters
- Excitation possible via UV light (320 nm) and blue light (~470 nm)
- Compatible with all usual down-stream applications

New, versatile reagent for gel loading and simultaneous staining of double stranded nucleic acid in agarose- and polyacrylamide gels.
Roti®-Load DNAstain detects up to 0,2 ng per band, and is, therefore, as sensitive as ethidium bromide. Due to its most simple application as gel loading buffer it reduces the time needed for gel analysis significantly.
This innovative reagent contains the dye EvaGreen®, which has been developed specifically for DNA analysis. DNA integrity is not in fluenced by EvaGreen®; hence, gel eluted DNA may directly be applied to standard down-stream applications, like, e.g., ligation, PCR, transformation, transfection etc. without interfering effects. Due to the low membrane permeability of the dye, Roti®-Load DNAstain is non mutagenic, non toxic, and environment friendly.
Roti®-Load DNAstain can be excited by UV- and blue light, making it fully compatible with standard UV-transilluminators as well as with modern blue-light illumination (see also Rotiphorese® PROfessional runVIEW, Art. No. 4849.1). When excited, nucleic acid-bound Roti®-Load DNAstain emits a brightly coloured green fluorescence (525 nm) that may be documented by all usual broadband ethidium bromide- or SYBR® Green foto filters.

The **figure** depicts 50 ng DNA per band, or 75 ng (1000 bp and 2,5 kb), respectively. Each lane has been loaded and concurrently stained using 1 µl Roti®-Load DNAstain.

Excitation maximum (bound to DNA): approx. 320 nm and 470-500 nm
Emission maximum (bound to DNA): 525 nm
1 ml is sufficient for running and staining of approx. 500 lanes.

Roti®-Load DNAstain 1

Roti®-Load DNAstain 1 contains: Tris, EDTA, bromophenol blue, xylencyanol, EvaGreen®.
Recommended for staining of dsDNA- and dsRNA-fragments of over 500 bp.

5783.1	1,0 ml	plastic	37,55 €
5783.2	5 x 1,0 ml	plastic	114,95 €

Roti®-Load DNAstain 2

Roti®-Load DNAstain 2 contains: Tris, EDTA, xylencyanol, orange G, EvaGreen®.
Recommended for staining of dsDNA- and dsRNA-fragments of 100-2000 bp.

Roti®-Load DNAstain 3 contains: Tris, EDTA, orange G, EvaGreen®.
Recommended for staining of dsDNA- and dsRNA-fragments of under 500 bp.

6472.1	1 ml	plastic	37,55 €
6472.2	5 x 1,0 ml	plastic	114,95 €

For UV- and blue light

Eva Green® Fluorescent Dye

for electrophoresis, 100x concentrated

For fluorescent staining of nucleic acids in agarose- and polyacrylamide gels.
Storage temp.: -20 °C • Transport temp.: room temp.

- Direct addition to DNA sample
- For excitation with UV light and blue light
- Non-toxic alternative for ethidium bromide

EvaGreen® is a staining reagent for detection of double stranded nucleic acid in agarose- and polyacrylamide gels. The dye is added directly to the DNA/Loading buffer mixture and then loaded onto the gel. EvaGreen® bounds to nucleic acids emitting a brightly coloured fluorescence.
The sensitivity reaches up to 0,2 ng per band.
EvaGreen® is an intercalating fluorescent dye, but due to its low membrane permeability it is non mutagenic, non-toxic, and environment friendly.
EvaGreen® has been developed specifically for gentle DNA analysis. DNA integrity is not influenced; hence, gel eluted DNA may directly be applied to standard down-stream applications, like, e.g., ligations, PCR, transformation, transfection etc. without interfering effects.
EvaGreen® can be excited by UV- and blue light, making it fully compatible with standard UV-transilluminators as well as with modern blue-light illumination (see also Roti®-PROfessional runVIEW, Art. No. 4849.1). The gels may be documented by all usual broadband ethidium bromide- or SYBR® Green foto filters.
Excitation maximum (bound to DNA): approx. 320 nm and 470-500 nm
Emission maximum (bound to DNA): 525 nm
500 µl is sufficient for running and staining of approx. 500 lanes.

Roti®-Load-DNAstain / EvaGreen®
Data on mutagenicity and environmental safety

Please note our **Technical Information Brochure** on the Internet next to the products:

Gel staining of nucleic acids
Background and mechanisms of the various stains

Ethidium bromide is a strong mutagenic and toxic substance. For your own safety, always wear gloves and respiratory protection to prevent contamination when working with this substance. After use, dispose of solutions correctly. They may not be discarded into the environment.

The following procedure is recommended (acc. to INSERM, Dossier prevention, Number 2, 2nd Ed., September 88):

1. Collect and dispose of as hazardous waste.
2. Break down EtBr with potassium permanganate and HCl (P. Quillardet, M. Hofnung, *Trends Genet.* 4,89 [1988]).
3. Break down EtBr with hypophosphoric acid and sodium nitrite (Lunn and Sansone; *Analyt. Biochem.* 162, 453-458 [1987]).
4. Absorption of EtBr with Amberlite® XAD-16 (Lunn and Sansone) or with activated carbon (Bensaude, O. Method, *Trends Genet.* 4, 89-90 [1988]) from the solution.

We recommend disposure by **Sekuroka® Decon-Bags** (Art. No. T856)

Ethidium bromide

For UV- and blue light

In spite of newly developed fluorescent staining reagents ethidium bromide remains the standard staining technic for nucleic acid in electrophoresis. Ethidium bromide is a carcinogenic substance which shouldn't come in contact with skin.
In order to minimise this danger we offer ready-to-use ethidium bromide solution in dropper bottles for easy handling and maximum safety.

Excitation maxima (unbound):
210 nm, 285 nm, 470 nm
Excitation maxima (bound to DNA):
330 nm, 500 nm
Excitation possible via DNA at 254 nm
Emission maximum: 605 nm

Sekuroka® Decon-Bags

Absorber bags for removing ethidium bromide from liquids.

Sekuroka® Decon-Bags are a simple method for removal of ethidium bromide from solutions. The bags contain a special type of activated carbon which absorbs ethidium bromide effectively and safely. One bag can absorb 2.5 mg ethidium bromide. Efficiency is >99 %. The application is extremely simple: Place the absorber bag in the ethidium bromide solution, incubate for 24 hours under stirring and dispose of the bag as hazardous waste in accordance with local regulations.
Bag size: 6 x 2.5 cm.
Also suitable for absorption of propidium iodide, PicoGreen® and SYBR® Green!

Horizontal Electrophoresis: Systems & Modules

A large range of different electrophoresis chambers for agarose or acrylamide gel electrophoresis is available.

- Corrosion-free, gold-plated contacts. Conducting cables are linked directly to the safety lid, current flow is automatically stopped by opening the lid.
- The safety lid can only be closed in one direction, a mix-up of orientation is excluded
- The platinum electrodes are protected by a special construction
- Our entire range of electrophoresis chambers is CE-certified
- For all chambers a wide range of accessories is available, such as combs, spacers and gel casting trays
- All gel casting trays are **UV-transparent**

Depending on the model, the gels can be cast directly in the chamber or on a special gel casting tray. The different combs can be adjusted in height and are available in three or four colour-coded thicknesses.

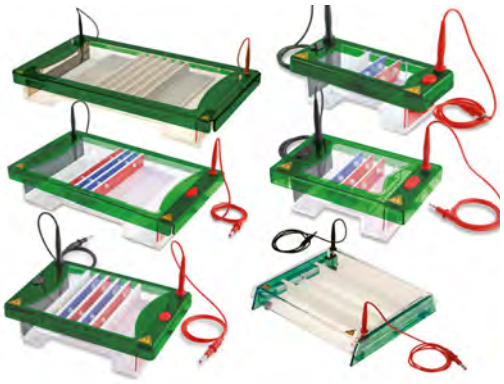
Rotiphorese®-PROfessional - Product Line for Lab Bench and Student´s Courses

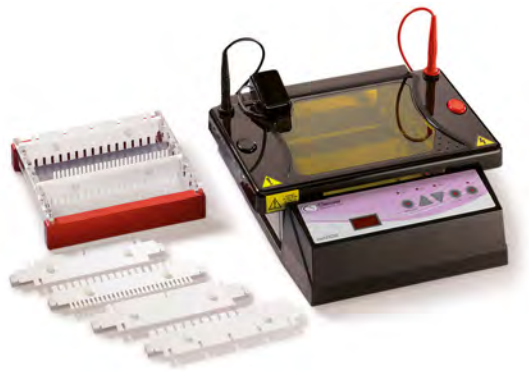


- Made of robust acrylic glass
- High-grade quality
- Injection moulded without bonding
- Absolutely leak proof
- Extremely easy to operate
- Wide range of accessories
- Easily replaceable electrodes
- Excellent value for money
- UV-transparent gel trays

TIP

- **PROfessional runVIEW real-time Electrophoresis**

PROfessional runVIEW
Real-time Electrophoresis under Blue Light



Rotiphorese® Unit PROfessional runVIEW

Gel size (w x l): 15 x 15 cm
Dimensions gel unit (w x l x h): 26.5 x 17.5 x 9 cm
Number of samples: max. 210 samples (using 6 comb slots)
Buffer volume: 500 ml

- **All-in-one system for real-time electrophoresis:** unit, power supply and illuminator combined
- Watch your bands migrate through the gel in blue light - without mutagen or retina damaging effects
- Recommended for use with Roti®-Load DNAStain (green), compatible with ethidium bromide (red) and SYBR® Green (green)
- First choice for rapid gel analysis, gel elution and all control gels
- The unit Rotiphorese® PROfessional III (Art. No. 2850.1) may be customised by the runView Base station (Art. No. 4850.1)

Innovative, new all-in-one system for electrophoresis - with integrated Power Supply and illuminator. Stained DNA is made visible during the run by excitation with blue light of 470 nm wave length and a special lid with integrated emission filter for green fluorescence. Another special lid with an intergrated ethidium bromide filter is available as accessory (Art. No 8549.1). DNA stained during the run by Roti®-Load DNAStain (green), ethidium bromide (red), or SYBR® Green (green), can be watched in real-time without having damaging effects caused by short wave lengths.

Unit under blue light, without lid

Unit under blue light, with green-filtering lid

Delivery incl. Rotiphorese® PROfessional runVIEW Base (base station with integrated blue light and power supply), horizontal gel unit Rotiphorese® PROfessional III, special lid for blue light with integrated spectral emission filter (green filter) and electrophoresis power leads (4 mm plugs), 1 UV-transparent gel casting tray (15 x 15 cm) with gel casting gates, and eight double sided combs: 2x 4-sample / 16-sample (1 mm); 4x 20- / 28-sample (1 mm, multichannel compatible); 1x 4- / 16-sample (3 mm); 1x 20- / 28-sample (3 mm, multichannel compatible).

PROfessional Standard Units

Rotiphorese® Unit PROfessional I

Gel size (w x l): 7 x 7 cm
Unit dimensions (w x l x h): 21 x 9 x 9 cm
Number of samples: max. 32 samples (using 2 comb slots)
Buffer volume: 225 ml

- First choice for rapid single-bench analyses
- Seven different combs available in four thicknesses, including preparative combs with broad wells
- Gel trays with 7 and 10 cm length available
- Compatible with multi-channel pipettors (see table)
- For real-time electrophoresis upgradeable with Rotiphorese® PROfessional runVIEW Base MINI (Art. No. 9958.1)

Delivery incl. horizontal gel chamber, safety lid with integral power leads (4 mm plugs), 1 UV-transparent gel casting tray (7 x 7 cm) with gel casting gates, and two combs (1 mm, 8 teeth).

TIP

Rotiphorese® Unit PROfessional Acetate

Max size of analysis (w x l): 24 x 20 cm
Unit dimensions (w x l): 30 x 30 cm

- Compact high resolution system for electrophoresis of acetate strips and membranes
- Suitable for both standard and wet cellulose acetate electrophoresis
- For high flexibility in application

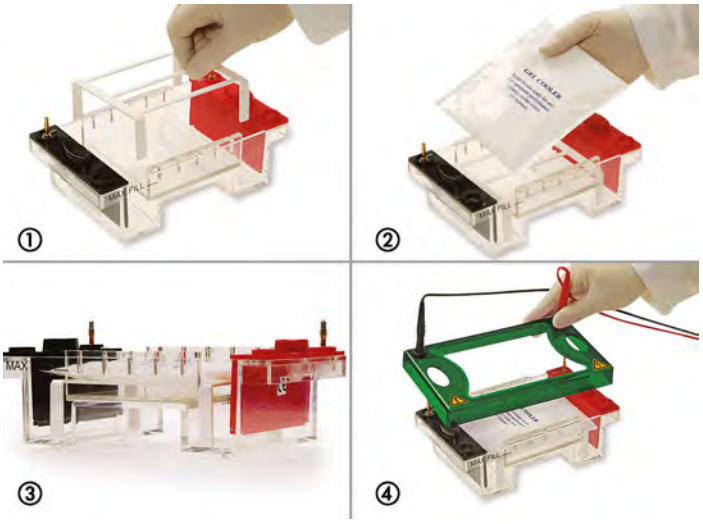
Delivery incl. horizontal gel chamber, safety lid with integral power leads (4 mm plugs), adjustable support for different lengths of membrane strips.

Art. No.	Pack Qty	€
3099.1	1 unit	650,40

PROfessional gel casting dams (example)

Convenient Gel Cooling System

Larger Rotiphorese®-PROfessional units may be cooled by a highly efficient and very easy to applicate cooling system via precooled pads.



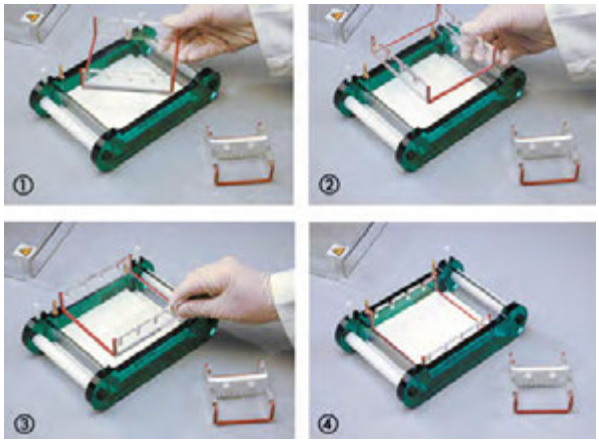
① Set cooling frame into buffer-filled chamber covering the gel
② Load gel and carefully apply precooled cool pack
③ Side view
④ Add lid and start gel run

The Classic Line - Compact Horizontal Electrophoresis Chambers

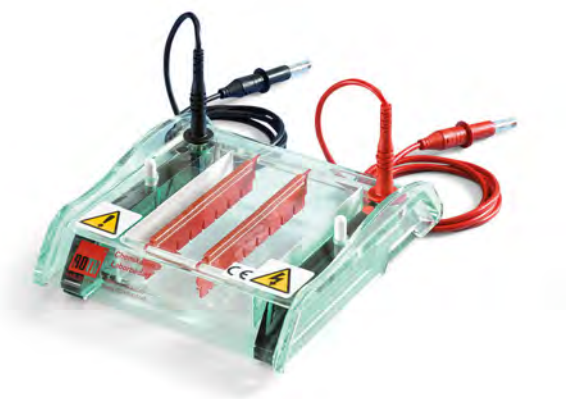
- High-grade quality
- Firmly standing
- Robust construction made of acrylic glass
- Chemically bonded contact points
- Platinum electrodes are protected by a special construction
- Wide range of accessories
- UV-transparent gel trays

Convenient in-Tank Gel Pouring

Big benefit: Several instruments of the classic line allow very convenient in-tank gel pouring - fast and definitely leak-proof.



① Remove the gel tray from the chamber. Turn the tray by 90°.
② Press the tray carefully into the chamber so that the silicone rubber forms a tight, leak-free seal with the walls of the chamber. Pour slightly precooled agarose into the tray.
③ Allow the agarose to polymerise, then lift the tray from the chamber and insert it back by positioning it in the direction of the run.
④ The gel is ready for sample loading and for electrophoresis.



MINI*easy* Electrophoresis Unit

Gel size (w x l): 8 x 10 cm
Unit dimensions (w x l x h): 13.5 x 15 x 3 cm
Number of samples: max. 32 samples (using 2 comb slots)
Buffer volume: 50 ml

- Complete gel chamber for speedy analysis
- The entire chamber can be placed on a UV-transilluminator
- Low buffer quantity needed
- Tank-gel casting (casting tray cannot be removed)

Delivery incl. horizontal gel chamber, safety lid with integral power leads (4 mm plugs), two gel casting gates and two combs (1.5 mm; 8 teeth).

- Eight different combs available in three thicknesses, including preparative combs with broad wells
- Compatible with multi-channel pipettors (see table)
- Gold standard for all routine gels in the lab

Delivery incl. horizontal gel chamber, safety lid with integral power leads (4 mm plugs), two connections for buffer recirculation, removable gel casting tray with gel casting gates, and two combs (1 mm, 16 teeth).

VARIA 1 Electrophoresis Unit

Gel size (w x l): variable, 15 x 7 to 15 x 20 cm
Unit dimensions (w x l x h): 31.5 x 19 x 7 cm
Number of samples: max. 60/90/120/180 samples (using 2/3/4/6 comb slots in a 7/10/15/20 cm long gel tray)
Buffer volume: 700 ml

- Superior flexibility in one chamber through 4 gel trays of different lengths
- Convenient in buffer recirculation
- Asymmetric electrode offset preventing accidental polarity reversal
- Colour coded combs with five different tooth sizes
- Developed by Scientists for Scientists

Delivery incl. horizontal gel tank, safety lid with integral power leads (4 mm plugs), two connections for buffer circulation, two gel casting gates, four removable gel casting trays of 7, 10, 15 and 20 cm length, respectively, two combs (1 mm, 15 teeth).

MIDI 2 Electrophoresis Unit

Gel size (w x l): 20 x 20 cm
Unit dimensions (w x l x h): 27 x 47.5 x 8 cm
Number of samples: max. 160 samples (using 4 comb slots)
Buffer volume: 2200 ml

- Platinum electrodes are protected from damage by a special construction
- Convenient in buffer recirculation
- Four different combs available in three thicknesses
- Compatible with multi-channel pipettors (see table)
- Very robust unit, optimised for large standard gels
- Available with cooled base plate

Delivery incl. horizontal gel tank, safety lid with integral power leads (4 mm plugs), two connections for buffer recirculation, removable gel casting tray, two gel casting gates and two combs (1 mm, 16 teeth).

MAXI Electrophoresis Unit

Gel size (w x l): 25 x 30 cm
Unit dimensions (w x l x h): 33 x 56 x 9 cm
Number of samples: max. 624 samples (using 12 comb slots)
Buffer volume: 3000 ml

- Platinum electrodes are protected from damage by a special construction
- Convenient in buffer recirculation
- Two different combs available in three thicknesses
- Compatible with multi-channel pipettors (see table)
- Optimised for very high sample numbers and for long separation distance
- Available with cooled base plate

Delivery incl. horizontal gel tank, safety lid with integral power leads (4 mm plugs), two connections for buffer recirculation, removable gel casting tray, two gel casting gates and six combs (1 mm, 26 teeth).

Flat Bed Electrophoresis Unit MULTI

For all precast horizontal gels and for Iso Electric Focussing
Gel size (w x l): max. 25 x 25 cm
Unit dimensions (w x l x h): 46 x 41 x 11.5 cm
Number of samples: variable

- For high voltage electrophoresis up to 5000 Volt
- Variable applications using tank mounted electrodes or adjustable electrodes for wicked horizontal gels/IEF
- Including cooling unit and buffer drainage system
- Superior separation quality and robust construction

Technical data:
Length 46 cm, width tank only 34 cm, width incl. cooling connectors 43 cm, height 11.5 cm, weight 9.6 kg.
We recommend using Circulation Cooler Accel 250 (Art. No. PE51.1) and Power Supply EV 233 (Art. No. A541.1).

Delivery incl. horizontal flat bed electrophoresis chamber with buffer chambers and integral electrodes, safety lid, one removable ceramic cooling plate (27 cm width x 27 cm length), one glass electrode frame, one adjustable anode- and cathode electrode, glass electrode weight, drainage tubing (outer ∅ 12 mm), cable set (2 mm plug) and adapter pair for 4 mm socket.

Art. No.	Pack Qty	€

Glass electrode frame	**CP55.1**	1 frame	317,15
Anode electrode	**CP52.1**	1 electr.	241,90
Cathode electrode	**CP53.1**	1 electr.	241,90

▶ Agaroses, gel buffer solutions and markers for horizontal electrophoresis see page 1193

Vertical Electrophoresis Systems & Modules

- Simultaneous electrophoresis of minimum two gels
- Inner buffer volume ensures even distribution of heat in gel and prevents "smiling"
- Gel casting module enables speedy and simultaneous casting of two gels
- **Suitable for standard ready-to-use gels**

Wide field of application
- Separation of proteins, nucleic acids and peptides
- Isoelectric focussing
- Electro-transfer of proteins and nucleic acids

Safety lid with integral power leads
Orientation cannot be mixed up as the lid can only be closed if properly used. Power supply is automatically interrupted when lid is opened.

Platinum electrodes - gold-plated, corrosion-free contacts
Electrodes are made of pure platinum. They are protected by a special construction and can be replaced easily by the user.

Colour coding of spacers and combs
Regular colour coding of spacers and combs facilitates selection of the right tool during gel preparation, preventing assembly of wrong components.

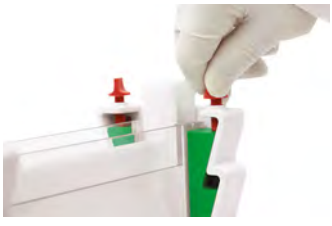
Colour	Thickness	Application
violet	0.5 mm	for ultra finely resolved bands
black	0.75 mm	for finely resolved bands
white	1.0 mm	standard
red	1.5 mm	for bigger sample volumina and gels of 2nd dimension
blue	2.0 mm	for big sample volumina and preparative gels

Rotiphorese®-PROclamp - Units with Clamping System for Vertical Electrophoresis

- Double electrophoresis unit - **for running of up to 4 gels in parallel**
- With fast-clamping technique - for rapid and easy-to-handle insertion of glass plates and gels
- MINI: Compatible with all major brands of 10 x 10 to 8 x 10 cm precast gels
- Effective buffer cooling independent of running water or chillers
- Colour coded spacers and combs in 5 thicknesses available - 0,5 up to 2 mm
- Extensive range of accessories available incl. glass plates with fixed spacers and blotting modules
- Compatible with multi-channel pipettors (combs are marked *)
- Version MINI for 10 x 10 cm gels, version MAXI for 20 x 20 cm gels

Tight and leak-proof insertion of glass plates in seconds - by modern **fast-clamping techniques:** (MINI: clamps, MAXI: waves):

① Position running module on bench surface
② Insert glass plates (incl. spacers) from above
③ Tighten clamps - Ready-to-go!



Rotiphorese® Units PROclamp MINI

Glass plates: 10 x 10 cm
Max. sample capacity per gel: 20
Buffer volume (upper / lower tank): 100 ml/300 ml
Unit dimensions (w x l x h): 19 x 13 x 15 cm

- Double electrophoresis unit - **for running of up to 4 gels in parallel**
- With fast-clamping technique - for rapid and easy-to-handle insertion of glass plates and gels
- Compatible with all major brands of 10 x 10 cm to 8 x 10 cm precast gels
- Effective buffer cooling independent of running water or chillers
- Colour coded spacers and combs in 5 thicknesses available - 0.5 up to 2 mm
- Extensive range of accessories available incl. glass plates with fixed spacers and blotting module (Art. No. 3517.1)
- Compatible with multi-channel pipettors (combs are marked *)

Delivery incl. (basic equipment):
1 vertical electrophoresis chamber incl. buffer tank, safety lid incl. cable (4 mm plugs) and 1 running module for electrophoresis of up to 4 gels in parallel, dummy plate for run of one gel only and gel cooling set. For run of 3 or 4 gels, please additionally order PROclamp MINI notched glass plates with fixed spacers (thickness 1 mm: Art. No. 3563.1) and suitable combs, e. g. Art. No. 3638.1.

Complete Set with accessories and gel casting module
Additionally included: 2 glass plates with fixed spacers (thickness 1 mm), 2 notched glass plates, 2 combs (thickness 1 mm, 12 wells), gel opener and 1 gel casting module for rapid and leak-proof gel casting.

Rotiphorese® Unit PROclamp MINI Wide

Glass plates (w x l): 20 x 10 cm
Max. sample capacity per gel: 48
Buffer volume (upper / lower tank): 250 / 600 ml
Unit dimensions (w x l x h): 26 x 16 x 16 cm

- For vertical electrophoresis of wide mini gels (20 x 10 cm)
- Double electrophoresis unit - **for running of 4 gels in parallel**
- Up to 48 samples per gel (capacity equivalent to 2 mini gels)
- Innovative new wave-screw-clamp technology
- Effective buffer cooling independent of running water or chillers
- Extensive range of accessories available, combs of the PROclamp MAXI and spacers of the PROclamp MINI unit are compatible

Delivery incl.: 1 vertical electrophoresis unit consisting of buffer tank, safety lid incl. 2 cables (4 mm plugs), running module, gel cooling pack. For the run of 3 or 4 gels, please additionally order PROclamp MINI Wide notched glass plates with fixed spacers, thickness 1 mm (Art. No. 1427.1) and suitable combs, e.g. Art. No. 5957.1.

Additionally included: 2 standard glass plates with fixed spacers (thickness 1 mm), 2 notched glass plates, 1 dummy plate (for run of one gel only), 2 combs (thickness 1 mm, 24 wells), 4 yellow wave-clamps for electrophoresis of 3 or 4 gels (substitute green clamps), 1 gel casting module.

Rotiphorese® Unit PROclamp MAXI

Glass plates: 20 x 20 cm
Max. sample capacity per gel: 48
Buffer volume (upper/lower tank): 640 ml/1000 ml
Unit dimensions (w x l x h): 30 x 18 x 27 cm

- For large-format vertical gel electrophoresis (20 x 20 cm)
- Double electrophoresis unit - **for running of up to 4 gels in parallel**
- Innovative new wave-screw-clamp technology
- Detachable inner cooling coil for optional cooling
- Spacers and combs in 4 thicknesses available - 0,75 up to 2 mm
- Compatible with multi-channel pipettors (combs are marked *)
- Extensive range of accessories available incl. glass plates with fixed spacers and blotting module (5816.1)

Delivery incl.: 1 vertical electrophoresis chamber incl. buffer tank, safety lid incl. 2 cables (4 mm plugs), detachable cooling coil, and 1 running module for running of up to 4 gels in parallel. For run of 3 or 4 gels, please additionally order PROclamp MAXI notched glass plates with fixed spacers (thickness 1 mm: Art. No. 5906.1) and suitable combs, for example Art. No. 5957.1.

Accessories included: 2 standard glass plates with fixed spacers (thickness 1 mm), 2 notched glass plates, 1 dummy plate (for run of one gel only), 2 combs (thickness 1 mm, 24 wells), 4 yellow wave-clamps for electrophoresis with 3 or 4 gels (substitute green clamps), and 1 gel casting module for rapid and leak-proof gel casting.

The Classic Line -
Compact Vertical Electrophoresis Chambers with Glass Plate Stops

- Double electrophoresis unit - **for running of up to 2 gels in parallel**
- High-grade quality and robust, made of acrylic glass
- With glass plate stops
- MINI: compatible with most 10 x 10 cm ready made gels (max. width 10,0 cm)
- Chemically bonded contact points
- Wide range of accessories
- Coolable versions with reliable water cooled system
- Version MINI for 10 x 10 cm gels, version MAXI for 20 x 20 cm gels, and 33 x 45 cm unit for sequencing gels

Modular system

Tanks are compatible with different electrophoresis modules, keeping costs and space to a minimum. The electrophoresis units are available as *standard* and as *coolable* device.

Different versions of MINI and MAXI vertical dual plate electrophoresis chambers are available.
The **full version** includes the buffer tank (*standard* or *coolable*), the running module for gel run and a gel casting module including glass plates and combs for immediate electrophoresis.

▶ GoPAGE™ ready-made gels, compatible with Roth' vertical units, see page 1185

MINI Vertical Dual Plate Electrophoresis Units

Glass plates: 10 x 10 cm
Max. sample capacity per gel: 20
Buffer volume (upper/lower tank): 100 ml/300 ml
Unit dimensions (w x l x h): 20 x 15 x 14 cm

With glass plate stops – for reliable pouring of gels and optimised results

- Double electrophoresis unit - **for running of up to 2 gels in parallel**
- High-grade quality and robust, made of acrylic glass
- With glass plate stops
- Compatible with most 10 x 10 cm to 8 x 10 cm ready made gels (max. width 10,0 cm)
- Chemically bonded contact points
- Wide range of accessories
- Coolable versions with reliable water cooled system

Delivery incl. 1 vertical electrophoresis chamber with buffer tank, lid and cables (4 mm plugs), 1 running module for simultaneous electrophoresis of two gels. The chamber is available as *standard* and as *coolable* device.
Accessories included:
2 glass plates, 2 separate spacer pairs (spacer thickness 1 mm), 2 notched glass plates, 1 dummy plate (for electrophoresis of one gel only), 2 combs (12 teeth, 1 mm thick).

Y001.1 and Y002.1: With additional gel casting module.

Standard, with buffer tank, running module, gel casting module and accessories

Art. No.	Pack Qty	€
Y001.1	1 unit	912,70

Coolable, with buffer tank, running module, gel casting module and accessories

Art. No.	Pack Qty	€
Y002.1	1 unit	1101,90

Standard, without gel casting module, with buffer tank, running module and accessories

Capillary Running Modules

For Isoelectric Focussing (IEF) during 2D-gel electrophoresis and for preparative capillary protein gels

Capillary length: max. 8 or 17 cm, resp.
Max. sample capacity per gel: 10

- Versatile - for 1 to 10 capillary gels in parallel
- Applicable for capillaries of 1 mm and 4 mm internal diameter
- Protected and highly resistant platinum electrodes
- Easy handling and reliable, distinct separation

Moduls for Vertical Double Electrophoresis Units of the classical line. Easy-to-use, modular system compatible with the vertical electrophoresis systems MINI (Art. No. Y001-Y004) and MAXI (Art. No. X950-X953).
Delivery incl. capillary running module. Please order glass capillaries, blanking ports, and gel extraction platform separately.

MINI Capillary Running Module, capillary length max. 8 cm

Art. No.	Pack Qty.	€
2811.1	1	600,95

MAXI Capillary Running Module, capillary length max. 17 cm

Art. No.	Pack Qty.	€
2816.1	1	934,20

Blanking Ports

Made of silicone, suitable for MINI and MAXI Capillary Running Modules.

Art. No.	Pack Qty.	€
2815.1	10	37,00

Glass Capillaries for Electrophoresis

Glass capillaries for capillary protein electrophoresis.

Type	Length (cm)	Inner ∅ (mm)	Art. No.	Pack Qty.	€
MINI	8	1	**2812.1**	10	96,55
MAXI	17	1	**2817.1**	10	102,45

Gel Extraction Platforms

Preformed platforms for safe and easy collection, cutting, and transfer of fragile capillary gels. Please order blanking ports separately.

Type	For gels of	Art. No.	Pack Qty.	€
MINI	max. 8 cm	**2814.1**	1	50,20
MAXI	max. 17 cm	**2819.1**	1	81,20

Recommended Combination for 2D-Gel Electrophoresis:

Unit	MINI (Art. No.)	MAXI (Art. No.)
Vertical electrophoresis unit	Y001.1	X950.1
Capillary running module	2811.1	2816.1
Blanking ports	2815.1	2815.1
Glass capillaries	2812.1	2817.1
Gel extraction platform	2814.1	2819.1
Power Supply EV3150	A542.1	A542.1
1 pair of spacers, 1.5 mm thick (2. dimension)	3579.1	5921.1
1+1 comb, 1.5 mm thick (2. dimension)	3642.1	5962.1

Sequencing Electrophoresis Unit

Glass plates (w x l): 33 x 45 cm
Max. sample capacity per gel: 96
Buffer volume (upper/lower tank): 500 ml/500 ml
Unit dimensions (w x l x h): 50 x 21,5 x 63 cm

- Robust construction made of acrylic glass
- Safety cover with integral connectors
- User-replaceable electrodes made of pure platinum
- Removable lower buffer tank for easy cleaning
- Optional thermostatic fan kit
- Accessories may be bought separately
- Heavy duty aluminium back plate helps disperse heat evenly
- CE certified
- For SSCP-gels, DDRT-PCR analyses, and extra long protein gels

Delivery incl. chamber with safety lid and integral power leads (2 mm plugs), one set of glass plates (1x plain, 1x notched) one pair of spacers (0,35 mm), one sharktooth comb (0,35 mm, 48 teeth).

Power Supplies

CONSORT
Well-known Power Supplies in new outfit

Power Supply Series EV

Low cost power supplies for all applications

The upgraded Consort series with new design - powerful, easy to operate and low priced.

- Small and compact devices
- On screen help in 4 languages for application and for solving errors
- Automatic cross-over to show which of the 3 parameters (V, mA, W) is kept constant during the run
- Automatic recovery after power failure
- Connection of up to 4 units possible (4 mm sockets)
- Password protection
- High safety standard
- 3 years warranty

Further properties of the devices (except EV0220):

- Storing of up to 9 methods possible
- Setting of a voltage gradient (Voltage Ramp Mode)
- Timer Mode
- Data logging of electrophoresis runs (of about 100 hours)
- Firmware updates via USB interface possible
- Remote control by PC possible

Technical specifications:
Units in the small and medium performance range

Model	EV0220	EV1450	EV2310	EV2650	EV2230	EV2320
Formerly known as	-	EV245	EV231	EV265	-	-

Roth Power Supplies

The Roth series - upgraded version and new design

Three units for all applications in electrophoresis:
Roth MINI, STANDARD and BLOT.

- Compact and easy to operate
- Constant parameters
- Timer with alarm function
- Comply to all relevant safety standards
- 1 year warranty

Models Power Pro (Roth STANDARD and BLOT):
- Up to 30 individual protocols with 1-6 steps savable
- Pre-programmed options for special applications
- Connection with up to 5 units possible

Technical specifications:

Type	① MINI	② STANDARD	② BLOT
Model	nanoPAC-300P	PowerPro300	PowerPro3AMP
Voltage (V)	10-300	5-300	5-300
Max. intensity of current	1-400 mA	1-700 mA	10-3000 mA
Max. output	60 W	150 W	300 W
Timer	1-999 mins	1-999 mins	1-999 mins

1428.1	1 electr. (500 mm)	99,35

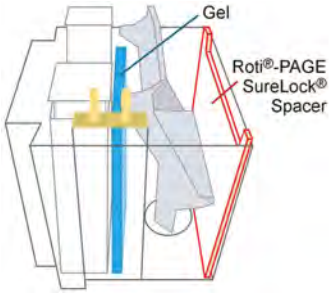
Roti®-PAGE buffer dam TIP

Special buffer dams made for electrophoresis of longer precast gels in **PROTEAN®** units made by BioRad®.
Roti®-PAGE buffer dams are approx. 1 cm longer than the original buffer dams from BioRad®, providing the full height needed for building the inner buffer reservoir even for runs of single 9x10 cm precast gels.
Suitable for BioRad® Mini PROTEAN® I, II, III, Tetra and Ready Gel® Cell.
Dimensions (WxHxD): 10.1 x 9.3 x 0.4 cm.

Art. No.	Material	Pack Qty.	€
4715.1	Acrylic glass	1	25,30

Roti®-PAGE-Spacer TIP

Spacer for insertion into **Novex® XCell SureLock®** Mini-Cell units made by Invitrogen™.
The spacer is suitable for approx. 5 mm thick precast gels. It compensates the slightly smaller thickness of the gels, enabling the simultaneous run of two 5 mm precast gels in Novex units. For this purpose, the SureLock® Spacer is simply inserted into the tank (see figure).
Size: Width 10 cm, thickness 0.2 cm, height 9 cm (notch) and 10 cm (full heigth).



Art. No.	Material	Pack Qty.	€
4731.1	Acrylic glass	1	21,00

Glass Plate Racks

ROTH MINI and MAXI glass plate racks for safe drying and storage of glass plates for vertical gel electrophoresis. Black acrylic glass.

Type	Dimensions L x W x H (cm)	for max.	Art. No.	Pack Qty.	€
Mini	27 x 8 x 9	20 glass plates (up to 2 mm thick)	**N860.1**	1	57,85
Maxi	17 x 17 x 17	10 glass plates (up to 5 mm thick)	**N861.1**	1	85,95

MINI and MIDI Gradient Mixer

For preparing polyacrylic amide gel gradients or centrifugation gradients (sucrose or caesium chloride gradients).
The mixers are manufactured from one acrylic block. They consist of two chambers, a storage area and a mixing chamber with a connecting valve. A second valve regulates the discharge from the chamber. A magnetic follower placed into the mixing chamber enables a steady and constant gradient to be produced with the magnetic stirrer. The mixers have a flat bottom and come with a rod on the back which can be attached to a holder. Connection for 4 mm FEP- tubes.

Type	Total filling volume (ml)	Art. No.	Pack Qty.	€
MINI	30	**N857.1**	1	543,95
MIDI	100	**N858.1**	1	628,90

▶ Tube Pump Sci-Q 323 for gradient mixers see page 367
▶ Rotilabo®-FEP-hoses see page 385

Levelling Table

ROTH levelling tables enable casting of horizontal gels of equal thickness, featuring easy-to-turn rotating feet on the corners. Tables also have an air bubble in the centre for precise horizontal alignment.

Table surface: 20 x 30 cm.

Art. No.	Pack Qty.	€
N854.1	1	213,95

Gel Multi Caster

Multiple gel casting system, tailored for use with Rotiphorese® PROclamp vertical electrophoresis units (10 x 10 cm gel glass plates). The number or the thickness of gels being poured is variable. After pouring the glass plates can be easily separated by the included separation sheets. With level bubble for optimal levelling of gels.

Delivery incl. gel casting chamber, 1 bottom silicone gasket for top filling, 1 level bubble, 1 clip, 12 separation sheets, 9 spacer plates with different diameters: 1 x 12 mm, 5 x 5 mm, 3 x 3 mm

Type	for max. gels	Art. No.	Pack Qty.	€
Multi Caster 12 x	12	**3118.1**	1	613,85

Gel Handler®

Flexible UV transparent sheets for supporting, manipulating and photographing gels

Made of polyolefin material. Gel Handler® sheets are slid under gels in solution for easy lifting and moving.

Properties:

- **Cuttable** - may be cut with scissors into convenient pieces
- **Chemically inert** - autoclaving and washing with diluted acids and bases is possible
- **UV-transparent** - higher transparency than UV-transparent acrylic material
- **Very flexible** - slide easily under the gel and eliminate air bubbles when placed on a transilluminator
- **Resistant** - the surface of the transilluminator is protected from scratching when excising segments of a gel with a razor or spatula

Technical specifications:

Optical density 3896.1	
254 nm emission wave length	0.14 OD
300 nm emission wave length	0.04 OD

Dimensions L x W (cm)	Thickness (mm)	Art. No.	Pack Qty.	€
21 x 28	0,13	**3896.1**	10	69,05
21 x 28	0,26	**3897.1**	5	69,05

Gel Scoops

ROTH gel scoops enable easy transport of gels in staining solutions or to a transilluminator. Even low concentrated agarose gels are protected against breaking.

ROTH gel scoops are UV-transparent.

Type	Overall length (mm)	Scoop width (mm)	Length of scooping surface (mm)	Art. No.	Pack Qty.	€
MINI	235	60	82	**N850.1**	1	68,80

MAXI	520	250	330	**N853.1**	1	98,40

Blot incubation trays

121 °C reusable

Compatible with Western- and Southern blotting methods

Developed for incubation of filter membranes during signal detection after Western- and Southern blotting. The incubation trays can safely be stacked, and, due to the tightly sealing lids, evaporation of solution is prevented even during long incubation periods. The size, adapted to typical membrane sheets, reduces the amount of buffer needed during incubation. In case of version MINI, the 5 trays may be used separately as well as in uniform. Stabile, autoclavable, and reusable.

Made from polypropylene.

Model	Material	Dimensions W x L (mm)	Art. No.	Pack Qty.	€
MINI	PP	16 x 115	**4810.1**	5	57,65
MIDI	PP	90 x 90	**4811.1**	5	85,50
MAXI	PP	165 x 165	**4812.1**	5	186,00

Staining chamber

By Nalgene®. Made of **PMP** for staining, fixing, and bleaching membranes, electrophoresis gels etc. With lid made of **PP**-copolymer and leakproof drain plug made of **LDPE** for problem-free draining of liquid without gel manipulation. Chamber with handles on both side for easy transport. Capacity with gel under shaking conditions: 500 to 750 ml. Temperature stable from -70 to +70 °C.

Not UV-transparent.

L x W x H (mm)	Art. No.	Pack Qty.	€
125 x 125 x 50	**H591.1**	1	34,00

FlowMesh™

Permeable support mesh for gels and filter membranes. Sturdy, versatile, and convenient. Re-usable and easily cut to size.

FlowMesh™ max be used for the following applications (e.g.):

Gel support - Place FlowMesh™ above or below a gel to protect from tearing, bending, or folding. May be used during gel staining, destaining, probing, equilibration etc.

Spacing - Use FlowMesh™ as permeable spacer for separation of gels and membranes during stacking.

Membrane stabilisation - Use on one or both sides of membranes during storage or hybridisation, while keeping the membrane fully accessible for blocking, probing and washing.

FlowMesh™ is made of polypropylene mesh approximately 0,3 mm thick with 1 mm strand spacings and approx. 70 % void volume. Between two flat sheets separated by FlowMesh™ is 2,7 ml/100 cm² void volume. Size: 27,8 cm x 21,7 cm.

Art. No.	Pack Qty.	€
2796.1	20	73,65

Gel Documentation System for runVIEW

Rotiphorese® runDOC gel documentation system

By Cleaver Scientific. Gel documentation system for the Professional runVIEW real-time electrophoresis system.
It consists of
- Darkroom hood
- Digital camera (18.0 MP)
- One filter for green and one for red fluorescence

The darkroom hood fits exactly to the runVIEW gel unit. After excitation by the blue light illuminator of the runVIEW base station the fluorescent gel bands are made visible by the filter slide integrated in the darkroom hood. Subsequently, they can be documented by the integrated camera.

Technical data camera:

Type	Canon EOS 1300 D
Effective pixels	18.0 MP
Image resolution	720 x 480 up to 5184 x 3456
Sensor	CMOS
File format	RAW, JEPG / DCF 2.0
Computer interface	USB 2.0 Hi-speed (Mini-B-jack)
Video out	NTSC / PAL

Technical data filters:

Filter type	Colour filter	Use
Green filter	yellow	EvaGreen, Roti®-Load DNAstain, green fluorescence
Red filter	orange	Roti®Gelstain Red, ethidium bromide, red fluorescence

Delivery incl. darkroom hood with integrated camera (18.0 MP), green filter for blue light, red filter for blue light.

Art. No.	Pack Qty.	€
1315.1	1	2147,85

Rotiphorese® runDOC gel documentation system accessories

Rotiphorese® PROfessional runVIEW darkroom hood

By Cleaver Scientific.
The runVIEW darkroom hood is a portable, lightweight hood designed exclusively for use with the runVIEW system. It aids viewing the samples in bright lit areas during the run and has no further functions. For complete gel documentation please order the runDOC system (Art. No. 1315.1).

The hood is placed directly over the runVIEW unit, which includes an integrated power supply and a blue light illuminator. The illuminator provides the excitation source for the DNA and the special lid of the unit makes the gel bands visible.

Art. No.	Pack Qty.	€
1348.1	1 piece	220,40

for real-time electrophoresis under blue light see page 1224

Felix Gel Documentation Systems

By Biostep

PC-controlled imaging system, e.g. for recording DNA/RNA bands in agarose gels or protein bands in polyacrylamide gels. **Camera control using the biostep argusX1 control and documentation software**. Minimum requirements for PC: Pentium/AMD 1,8 GHz, 4 GB, Win 7/8/10, 2-3 free USB connections. There are 2 different documentation systems available (Felix 1000 and Felix 2000), which differ only in the equipment of the camera (different lens types). Both systems are suitable for a maximum sample size of 20 x 20 cm.

① 
The following components are included:
- High-resolution reflex camera
- biostep argusX1 recording software (incl. database)
- Filter (green light/red light)
- UV transilluminator
- Dark hood - 2 different types available
  ① Dark hood DH-10: attachment hood with UV protective shield, footprint (W x D): 30 x 25 cm
  ② Dark hood DH-20: stationary dark hood with sliding door, mounting on transilluminator with four tensions locks, footprint (W x D): 32,5 x 32,2 cm, dimmable white top light with LEDs, automatic UV shut-off upon opening door (no UV protective shield necessary)

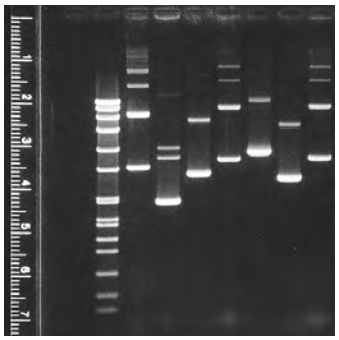
Paper K91HG		**1759.1**	4	85,70

Gel Drying



Fluorescent Rulers TIP

For documentation of DNA fragments in agarose gels. Rulers fluoresce within the same range as EtBr-DNA complexes, are clearly visible on both types of transilluminators (300 nm and 350 nm) and are therefore an excellent aid when photographing agarose gels.
Rulers are only 7 mm wide and therefore fit into one lane of the gel.
The kit contains 4 rulers:
2 x 20 cm for long gels and 2 x 10 cm for mini gels.

Art. No.	Pack Qty. (Kit)	€
K162.1	1	50,50

Gel Drying Frames

For easy drying of gels between 2 cellophane papers. Enables drying of gels without heat or vacuum. The cellophane sheets (spare packs) may also be used for drying of gels on vacuum gel dryers (60 °C). Cellophane sheets (cell glass) are uncoated. Each set contains 2 frames, 2 backs, 8 clamps and 50 cellophane sheets.

MINI gel drying frames,
size 14 x 14 cm (overall), 11,7 x 11,7 cm (cutout)

Vacuum Gel Dryer

- Heatable
- For fast and even gel drying
- For drying protein and sequencing gels
- Particularly even distribution of temperature over entire drying surface
- Precise adjustment of temperature of up to 80 °C
- Digital display of temperature
- Timer for heating element and vacuum pump (1-minute increments)
- Very robust construction
- All accessories are also available individually

Technical Specifications:

Model	MIDI	MAXI
Drying surface	44 x 34 cm	49 x 41 cm
Measurements (H x W x D)	85 x 550 x 435 mm	85 x 680 x 480 mm
Weight	8 kg	13 kg
Heating element	800 W	
Vacuum timer	0-10 h	
Temperature timer	0-10 h	
Digital display	40-80 °C	
Accuracy	±2 %	
Mains connection	220-240 V, 50-60 Hz	

IMPORTANT:
In order to achieve efficient drying, the vacuum pump should achieve a flow rate of 1000-6000 l/h (equals 1-6 m^3/h). We recommend use of the Membrane Vacuum Pump (Art. No. T789.1) and the Rotilabo® vacuum silicone tube (Art. No. 9746.1).

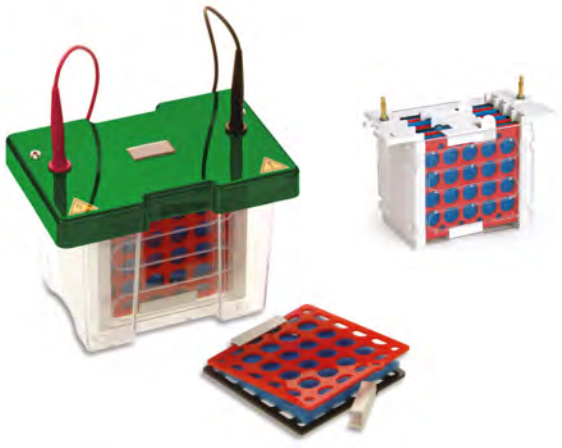
Blotting Units

Tank Blotting

- Electro tank blotting system for blotting of up to 4 gels in parallel
- For transferring proteins and nucleic acids
- Ideal for large and temperature-sensitive proteins
- The short distance between the electrodes guarantees an evenly high current strength across the blotting area and reduces the amount of heat generated
- Hinged cassettes – for most easy handling and rapid blot set up
- Open design, rigid cassettes for maximum current transfer and even blotting contact
- Colour coded cassettes and asymmetrical lid ensure correct blot set up and blotting direction
- **Modules fit the vertical electrophoresis system Rotiphorese® PROclamp (see page 1235)**



Rotiphorese® PROclamp MINI Tank Blotting System

Maximum blotting area: 4 gels of up to 10 x 10 cm

- Can be used with all gels of 10 x 10 cm in maximum
- Compatible with the Rotiphorese® PROclamp MINI unit for vertical electrophoresis (Art. Nos. 3501.1-3503.1)

Delivery incl. 1 Rotiphorese® PROclamp MINI buffer tank, safety lid with cables and 1 PROclamp MINI blotting module for max. 4 gels, incl. 4 cassettes and 4 pairs of fibre blotting mats.

Art. No.	Pack Qty	€
3513.1	1 unit	700,90

Rotiphorese® PROclamp MAXI Tank Blotting System

Maximum Blotting area: 4 gels of up to 20 x 20 cm

- Can be used with all gels of 20 x 20 cm in maximum
- Compatible with the Rotiphorese® Unit PROclamp MAXI for vertical electrophoresis (Art. No. 5769.1)

Delivery incl. 1 Rotiphorese® PROclamp MAXI buffer tank, safety lid with cables, removable cooling coil, and 1 PROclamp MAXI blotting module for max. 4 gels, incl. 4 cassettes and 18 fibre blotting mats.

Art. No.	Pack Qty	€
5814.1	1 unit	1127,70

Rotiphorese® PROclamp MINI Tank Blotting Module

Rotiphorese® PROclamp MINI Tank Blotting Module

Blotting insert compatible with the Rotiphorese® PROclamp MINI system for vertical electrophoresis (Art. Nos. 3501.1-3503.1). Blotting module for max. 4 gels, incl. 4 cassettes and 4 pairs of fibre blotting mats.

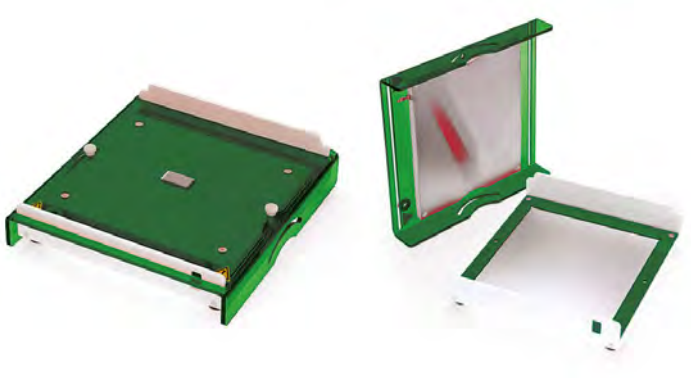
Semi-Dry-Blotting



Semi Dry Blotters

For transfer of proteins and nucleic acids.

- Durable, corrosion-free electrodes
- Fast, steady transfer
- Minimum heat development
- Low buffer use

As the electrodes are made of high-grade steel (cathode, lid) and platinised titanium (anode, base), they will last indefinitely if used correctly. There is no build-up of deposits on the transfer surface, the buffers cannot penetrate into the electrodes. The extremely constant electric field over the entire transfer surface guarantees optimal results with all transfer membranes.

MINI Semi-dry-blotter, transfer surface 10 x 10 cm

T787.1	1	655,75

MAXI Semi-dry-blotter, transfer surface 20 x 20 cm

Art. No.	Pack Qty.	€
T788.1	1	1316,90

Semi Dry Blotters PROfessional

For transfer of proteins and nucleic acids.

- Fast transfer with uniform heat dispersion
- Superior blotting quality due to screw down lid and long life electrodes
- Minimum heat development and buffer use

Semi Dry Blotters PROfessional offer rapid transfer times for blotting of proteins, as well as nucleic acids, being compatible with gel thicknesses from 0,25 up to 10 mm.

Semi Dry Blotters PROfessional utilise a screw down lid, which secures the blot sandwich (optionally) and allows complete control of pressure ensuring even transfer. Uniform heat dispersion across the transfer surface ensures stable blotting parameters and no heat induced sample loss or transfer distortions. The electrodes (platinum coated anode, base, and stainless steel cathode, lid) will exhibit no corrosion when used with accurately prepared transfer buffers, and provide many years of trouble free use.

Unit dimensions (w x h x d): 16,5 x 15 x 5,5 cm (MINI)
and 26 x 26 x 7 cm (MAXI)

Buffers recommended for Tank blotting

Acc. to **Towbin** *et al.*, 1997: 25 mM Tris, 192 mM glycin, 20 % methanol. Optional: 0-0,1 % SDS.

Acc. to **Bjerrum und Schaefer-Nielsen**, 1986: 48 mM Tris, 39 mM glycin, 0-20 % methanol. Optional: 0-0.1 % SDS.

Acc. to **Dunn**, 1986: 10 mM $NaHCO_3$, 3 mM $NaCO_3$, 20 % methanol.

Buffers recommended for Semy Dry blotting

Discontinuous buffer system: Roti®-Blot 1 - for standard proteins or Roti®-Blot 2 - for hydrophobic proteins.

Continuous **Tris-glycin buffer** acc. to Bjerrum and Schaefer-Nielsen, 1986: 48 mM Tris, 39 mM glycin, 0-20 % methanol. Optional: 0,01-0,1 % (usually 0,0375 %) SDS.

Continuous **CAPS buffer** for blotting of basic proteins and prior to N-terminal sequencing: 0,22 % CAPS (pH 10,5-11,0), 10 % methanol.

Do not adjust pH of the buffer (exception: CAPS stock solution). Adding acid or base to the buffer will result in higher conductivity, leading to increased formation of heat as well as ions. Subsequently, this results in brown, "burnt" looking blotting paper and damage to the electrode plates.

Methanol prevents the gel from swelling during transfer (mandatory for gradient gels!) and improves the absorption of proteins to NC membranes. For transfer of native or big proteins, reduce or omit methanol.

SDS improves transfer efficiency of large proteins and protein binding to PVDF membranes, however increasing relative current, power and temperature. Don't use SDS for Semi-Dry blotting of small proteins to NC membranes. For tank blotting use 0,02 % SDS in minimum.

For **blotting of native proteins** use buffer acc to Bjerrum and Schaefer-Nielsen with 0,04 % SDS and 0-10 % methanol.

Rotilabo®-sealing roller

Frame made of **metal**, with **rubber** roller. For more effective sealing of microtest-, PCR- and Deep-Well-plates with sealing foil or sealing mats because the roller presses them on more evenly. Also usable for evenly smoothing out gel, transfer membrane and blotting-paper during blot-assembly. Roll width: 100 mm, ∅ roll: 30 mm.

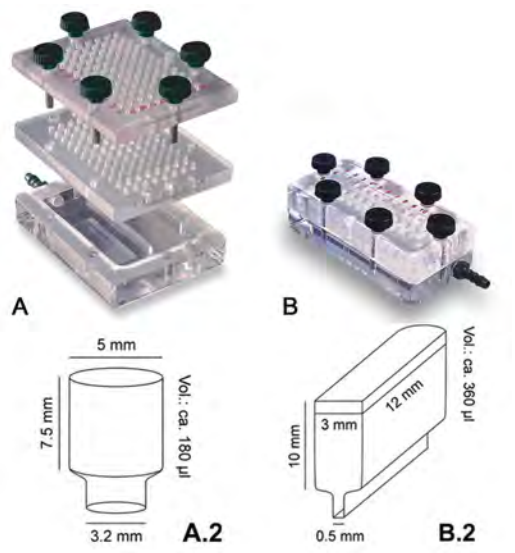
Transfer Buffers
Tips and protocols



Dot Blotter and Slot Blotter

For rapid transfer of DNA,
RNA and immunological antibody screening methods.

- Robust acrylic construction
- Precision lapped mating surfaces prevent sample leakage
- Steady transfer
- Very simple assembly
- Alpha-numeric sample identification

A permanent filter template is provided with each manifold to simplify the cutting of filters to exact size.
A vacuum of approximately 600 mm Hg (0,8 Bar, relative pressure) is required during sample application. We recommend LABOPORT®-Membrane vacuum pump (Art. No. Y371.1) with hose stems for hose inner ∅ 8 mm (Art. No. EL44.1) and the following hoses: Rotilabo®-Vacuum-Silicone hose, inner ∅ 8 mm (Art. No. 9746.1) or Rotilabo®-Vacuum-Rubber hose, inner ∅ 8 mm (Art. No. 0680.1).

Dot-blotter (A)

Max. sample capacity: 96 per transfer

NEW

UV-Crosslinker

- Programmable microprocessor control
- UV energy monitored automatically
- Compact footprint with large interior
- Observation window - UV blocking
- Membrane keypad operation
- Clear LED display
- Safety interlocked

The UV crosslinker provides a compact unit occupying minimum bench space with a footprint of only 350 x 360 mm and a spacious interior chamber of 260 x 330 x 145 mm. As with all our products, safety is a major consideration so the door of the crosslinker is safety interlocked against opening during operation and the observation window in the door is ultraviolet blocking.

The ultraviolet energy is continuously monitored by an accurate microprocessor controlled photo feedback system which compensates for variation in output from the UV sources. In this way consistency of operation and maximum efficiency are maintained.

Applications include:
- Fixing of nucleic acids to nylon or nitrocellulose membranes
- Southern or Northern blotting, dot blotting and colony or plaque lifts
- Elimination or reduction of PCR contamination
- Nicking ethidium bromide stained DNA in agarose gels
- Creation of restriction cleavage inhibiting thymine dimers
- Screening RecA mutation
- Ultraviolet curing of polymers, adhesives and inks
- Ultraviolet sterilization

Technical specifications:

UV Source	5 x 8 W UV bulbs (365, 312 or 254 nm)
Exposure Time	0-999,9 minutes
Energy Ranges	0-99,99 J or 0-9,999 J
Inner dimensions	26 x 33 x 14,5 cm (w x d x h)
Footprint	35 x 36 x 30,5 cm (w x d x h)
Weight	10,5 kg
Controls	9 preset ultraviolet energy levels 9 preset exposure times manual UV energy level setting manual exposure setting

Transfer Filter Membranes

Transfer Membranes Made of Nitrocellulose

Pure nitrocellulose membranes for reliable protein standard applications

- Free of cellulose acetate
- High absorption capacity
- Very low background
- 0,2 µm or 0,45 µm pore size
- Easy to block
- For all standard detection systems

Please note: Membranes made of nitrocellulose age and should be replaced anually!

Roti®-NC

Transfer membrane for protein analyses, colony- and plaque-lifts
Binding capacity for proteins: 125-200 µg/cm²
Made of 100 % nitrocellulose

Warning H228

High-quality transfer membrane for all detection systems - extremely suitable for all protein transfer and detection methods. The membrane stands out for its particularly high mechanical stability. The pure 100 % nitrocellulose quality membrane is easy to block and allows for background-free blots with perfect bands. The pore size of 0,2 µm is suitable for proteins and peptides of all sizes. The best retention rate is achieved when blotting proteins of up to 70 kDa. Its excellent protein binding capacity not only efficiently prevents the blot from going through during transfer, but also guarantees highly sensitive detection of even low protein amounts.

Membrane thickness: 0,15 ± 0,05 mm

Pore size: 0,2 µm

Applications: Optimised for proteins of ≤70 kDa. Western- and far-western-blot, colony- and plaque-lifting of nucleic acids and proteins, immunoblots, dot-blots.

Pore size	Dimensions W x L (cm)	Art. No.	Pack Qty	€

Blotting Membranes

Roti®-NC 0.45

Transfer membrane for protein analyses, Southern- und Northern-Blots

Binding capacity for proteins: ≥125 µg/cm²

Made of 100 % nitrocellulose

Warning H228

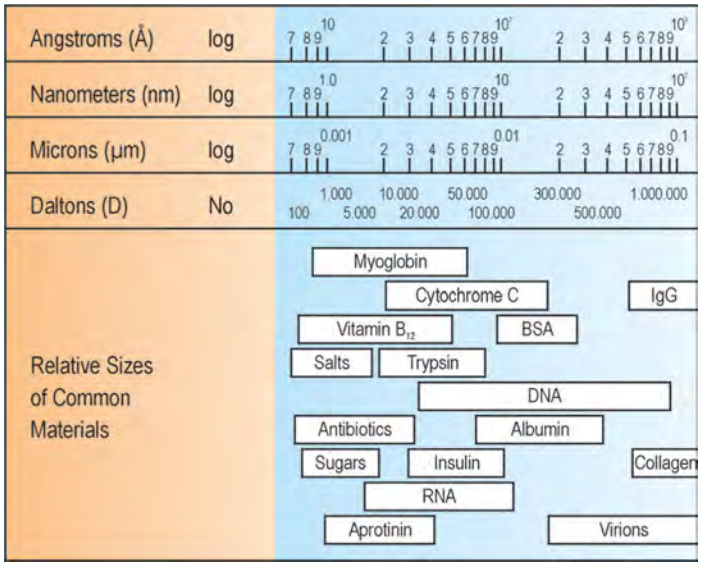
High-quality transfer membrane for all detection systems - extremely suitable for all protein transfer and detection methods. The Roti®-NC 0.45 membrane offers very good mechanical stability, standing out for its particularly smooth structure and even membrane thickness. The pure 100 % nitrocellulose quality membrane is easy to block and allows for background-free blots with perfect bands. The pore size of 0,45 µm is suitable for proteins and peptides of all sizes. The best retention rate is achieved when blotting proteins of ≥20 kDa. Having a high protein binding capacity, the membrane not only efficiently prevents protein loss during transfer, but also guarantees very sensitive detection of even low protein amounts.

Membrane thickness: 0,15 ± 0,01 mm

Pore size: 0,45 µm

Applications: Optimised for proteins ≥20 kDa. Western- and far-Western-blots, Southern- and Northern blots, colony- and plaque-lifting of nucleic acids and proteins, dot- and slot blots.

Pore size	Dimensions W x L (cm)	Art. No.	Pack Qty	€
0,45 µm	30 x 400	**9201.1**	1 roll	396,70
0,45 µm	30 x 300	**9200.1**	1 roll	299,95



Amersham™ Protran®

Transfer membrane for most nucleic acid and protein immobilising techniques

Binding capacity: 80-90 µg/cm² (0,2 µm) or 75-85 µg/cm² (0,45 µm)

Made from 100 % nitrocellulose.

Warning H228

Multiple use - ideal for most nucleic acid and protein immobilising techniques. Pure nitro-cellulose, free from cellulose acetate and triton. They have a high binding capacity and low background. The fibre-reinforced version allows extensive handling of membrane, easier cutting, repeated hybridisation and automated immobilising.

Applications: Southern, Northern, Western transfer, colony and plaque hybridisation, immunoblots, nucleic acid and protein dot-blot, slot-blot, electrophoretic transfer of proteins. (Nitrocellulose should only conditionally be used for electrophoretic transfer of nucleic acids, because of the high salt concentrations required for the transfer).

Membranes of 0,45 µm pore size allow for DNA transfer (minimum 300 bp) and protein transfer (minimum 20 kD).

Amersham™ Protran® 0.2 µm NC

Replaces Protran® BA 83 from Whatman®

Ideal for all protein and nucleic acid transfers.

Pore size 0.2 µm

Pore size	Dimensions W x L (cm)	Art. No.	Pack Qty	€

0,45 µm	30 x 400	**4705.1**	1 roll	550,40

Transfer Membranes Made of PVDF

For optimal results with all protein transfer techniques

- Well suited for all protein blots
- Best signal-to-noise ratio
- Very robust
- 0,2 µm or 0,45 µm pore size
- Suitable for long-term exposition
- Suitable for all detection systems
- May be used for peptide sequencing

Roti®-PVDF 0.2

PVDF membrane with 0,2 µm pore size

Binding capacity for proteins: ≥125 µg/cm²

Roti®-PVDF 0.2 is a hydrophobic, microporous polyvinylidene membrane, free from adjuvants and detergents. It has been optimised for transfer and highly sensitive detection of proteins of up to 70 kDa, but is also perfectly suited for blotting of bigger proteins. The membrane shows superior protein binding parameters and stands out for its particularly low background. It may also be used very well after repeated stripping and harsh washing processes.

This mechanically rigid transfer membrane can be easily cut to the desired gel size and it remains flexible and tear-proof even when dry.

Briefly immerse Roti®-PVDF 0.2 membrane in 100 % methanol prior to transfer until no more white areas are visible. This transfer membrane is then compatible with every blotting system.

Membrane thickness: 140 ± 20 µm

Pore size: 0,2 µm

Due to production processes, the membrane shows two different sides - one smooth and one raw. For optimally distinct bands, please use the smooth side for protein binding.

Applications: Optimised for proteins of ≤70 kDa. Western-blot, Dot-blot, lipopolysaccharide- and amino acid analysis, bindings assays, N-terminal peptide sequencing.

Detection systems: Chemoluminescence, radioactivity, colour

Pore size	Binding	Dimensions W x L (cm)	Art. No.	Pack Qty	€
0,2 µm	hydrophobic	30 x 300	**8989.1**	1 roll	349,40

Roti®-Fluoro PVDF

Premium PVDF membrane from ROTH, suitable for direct fluorescence detection

Roti®-Fluoro PVDF is a white, microporous membrane made from naturally hydrophobic polyvinylidene fluoride. The membrane is of superior protein binding capacity, making it perfectly suited for all standard and special applications in the field of protein analysis.

Roti®-Fluoro PVDF is of 0.2 µm pore size and binds proteins tenaciously via hydrophobic interactions. It enables very sensitive protein detection by keeping the background very low, resulting in a good signal-to-noise ratio with all standard detection systems. The mechanically rigid membrane is of high tensile strength and tear-proof, and does not crack or curl during handling. Therefore, signals remain clear and distinct, and are undisturbed by false-positive signals caused by membranes crinkles.

Roti®-Fluoro PVDF has been **specially optimised for direct detection via fluorescence.**

Briefly immerse Roti®-Fluoro PVDF membrane in 100 % methanol prior to transfer until no more white areas are visible. This transfer membrane is then compatible with every aqueous blot system.

Applications: Western- and Far-Western-Blot, analysis of small peptides, Immunoblot, Dot-blot, binding assays, N-terminal sequencing

Detection systems: Fluorescence, radioactivity, colour

Pore size	Binding	Dimensions W x L (cm)	Art. No.	Pack Qty	€
0,2 µm	hydrophobic	13 x 20	**2831.1**	2 sheets	33,00
0,2 µm	hydrophobic	26 x 330	**2803.1**	1 roll	335,40

Blotting Membranes

Roti®-PVDF

PVDF membrane from ROTH.

Roti®-PVDF is a hydrophobic, microporous polyvinylidene membrane. It is free from adjuvants and detergents. This membrane enables efficient transfer of proteins over a wide molecular weight range.

This mechanically rigid transfer membrane can be easily cut to the desired gel size and it remains flexible and tear-proof even when dry.

Briefly immerse Roti®-PVDF membrane in 100 % methanol prior to transfer until no more white areas are visible. This transfer membrane is then compatible with every aqueous blot system.

Membrane thickness: 125 ± 25 µm

Pore size: 0,45 µm

Applications: Optimised for proteins ≥20 kDa. Western-blot, Dot-blot, lipopolysaccharide- and amino acid analysis, binding assays, N-terminal peptide sequencing.

Detection systems: Chemoluminescence, radioactivity, colour

Not suitable for use with infrared densitometers (700 nm/800 nm).

Pore size	Binding	Dimensions W x L (cm)	Art. No.	Pack Qty	€
0,45 µm	hydrophobic	26,5 x 375	**T830.1**	1 roll	350,45

Immobilon-P

Original PVDF membrane from Millipore, for outstanding Western Blots.

The Immobilon-P membrane consists of microporous polyvinylidene fluoride (PVDF) with a high binding capacity for all biomolecules, particularly for proteins, independently of the transfer method or gel used. The efficient signal-to-noise ratio allows long exposure times and provides a high sensitivity during detection even when working with low protein amounts.

Membrane thickness: 100-145 µm

Pore size: 0,45 µm

Instructions for use: Compared to nitrocellulose the Immobilon-P membrane is much easier to handle and much better to stain, and shows superior resistance to organic solvents. Furthermore, the open pore structure provides easy access of antibodies or other peptides used for detection to bound protein, and enables efficient removal of unbound molecules, efficiently reducing the background.

Immobilon-PVDF membrane is ideal when performing immunodetection. The rapid immunodetection method additionally provides a tool to reduce the time span needed for the process by several hours. During Western Blot, the superior qualities of the PVDF membrane not only supersede a blocking step, but also reduce number and time span of washing steps considerably without compromising on specificity or sensitivity.

Applications: Western-blot, Dot- and Slot-blot, amino acid analysis, binding assays, detection of glycoproteins, N-terminal peptide sequencing.

Detection systems: Radioactivity, chemoluminescence, colour

Pore size	Binding	Dimensions W x L (cm)	Art. No.	Pack Qty	€

Transfer Membranes Made of Nylon

For perfect Southern- and Northern-Blots

- Very low background
- Suitable for all staining techniques
- Superior performance in nucleic acid absorption
- Available as roll, easy-to-use pre-cut membranes and disks – the perfect size for each application

Roti®-Nylon plus

Ideal for DNA/RNA-transfers.

Roti®-Nylon plus is a cationic, einforced nylon 6.6-membrane with 0.45 µm pore size and extremely high tensile strength. The positively charged membrane surface guarantees rapid and efficient binding of DNA and RNA. May be steam sterilised.

Also available in convenient pre-cut sheets of standard gel size.

Membrane thickness: 150 ± 20 µm

Instructions for use: Nucleic acids can be cross-linked to the membrane by baking (80 °C, 15 min) or through UV exposure. No cross-linking is required for alkaline transfer as the negatively charged DNA forms a very stable complex with the positively charged Roti®-Nylon membrane.

Applications: Southern- and Northern-blot, Dot-blot, DNA fingerprinting, macro- and microarrays

Detection systems: Radioactivity, chemoluminescence, fluorescence

Roti®-Nylon 0.2

Ideal for DNA/RNA transfer, particularly for colony- and plaque-lifting, as well as for all multiple rehybridisations.

Especially recommended for Northern-blots.

Roti®-Nylon 0.2 is a neutral, enhanced Nylon membrane. Based on the material it provides a superior tensile strength and is extremely resistant against alcohol, acetone, and many other organic solvents. In a buffer pH of 6,5 Roti®-Nylon 0.2 is uncharged and by means of the surface-standing amino- and carboxy-groups has superior hydrophilic qualities. The charge of the membrane (ζ-potential) may be altered through the pH of the buffer - the membrane is positively charged at pH <6,5 and negatively charged at pH >6,5.

Membrane of particulary high DNA-binding capacity. Available as roll (pore size 0,2 µm) for high-flexible usage, and as disks (pore size 0,45 µm) for colony- and plaque-lifting. May be steam sterilised.

Membrane thickness: 150 ± 20 µm

Instructions for use: Covalent bondage of transferred nucleic acids is achieved by cross linking (baking for 15 min at 80 °C or UV-cross linking for 20 sec at 260 nm). Due to the excellent signal-to-noise ratio of the membrane, very sensitive detection (single copy-gene detection) and multiple rehybridisation is possible without loosing sensitivity.

Applications: Southern- and Northern blot, Dot blot, DNA fingerprinting, ELISA, colony- and plaque lifting, macro- and microarrays

Detection systems: Radioactivity, chemoluminescence, fluorescence

Pore size	Load	Dimensions W x L (cm)	Art. No.	Pack Qty	€

Roti®fair TG-Western

for electrophoresis

Buffer for protein electrophoresis and transfer.

TG buffer powder (pouch), Tris-glycine buffer

Warning H315-H319-H335

Exactly pre-weighed pouches for convenient and rapid preparation of TG-Western solution.
SDS-free running buffer for native protein gel electrophoresis. Optimum base for preparation of Western blot transfer buffer by addition of 5-20 % methanol (Blotting-Grade, Art. No. 0082).
Prepared solution may be sterilized by filtration (0,22 µm). For long-term storage, buffer solution should be kept at room temperature.
1x TG-Western solution is prepared by dissolution of 1 pouch in 1000 ml respectively 5000 ml highly pure water.

Formulation:

Prepared 1x TG-Western solution contains: 25 mM Tris, 0,192 M glycine, pH-value 8,3 ±0,05, when prepared in deionized or distilled water.

For 1000 ml/pouch

1269.1	10 pouches	box	82,70 €

For 5000 ml/pouch

1276.1	10 pouches	box	177,40 €

Roti®-Stock 20 % SDS

ready-to-use S

BioScience-Grade, ready-to-use, 0,2 µm filtered

For molecular biology and electrophoresis.

SDS 20 % ready-to-use solution

Danger H318-H315-H335

20 % stock solution sodium dodecyl sulphate. Store the solution away from light in a dry place. SDS-stock solution and other solutions containing SDS should not be cooled below 24 °C otherwise the SDS may precipitate. The crystals can be easily resolubilised by heating them between 30 to 50 °C.
With original seal.

Composition:

20 % SDS in deionised water, 0,2 µm filtered

1057.1	1 l	glass	143,55 €
Original pack 6 x 1 l			136,37/1 l

Ponceau S (C.I. 27195)

for histology and electrophoresis

For reversible protein staining on membranes and for microscopy.

Scarlet red

Warning H315-H319-H335

Compatible with PVDF and NC membranes.
Staining of NC membranes: 0.2-2 % Ponceau S in 3 % trichloroacetic acid (Art. No. 8789.1) + 3 % sulphosalicylic acid (Art. No. 4119.1), incubate for 1-5 mins. at room temperature. Enhance contrast by incubation in water acidified by a few drops acetic acid.
Staining of PVDF membranes: 0.1-1 % Ponceau S in 10 % acetic acid (Art. No. 6755.1), incubate 1-5 mins. at room temperature. Ponceau S stained bands on PVDF only appear bright and distinct after drying (not recommended if Western blotting shall be performed).
Prior to Western blot analysis decolourise in PBS (Art. No. 1058.1) or TBS (Art. No. 1060) for 10-20 mins. at room temperature.

5938.2	10 g	glass	26,80 €
5938.1	25 g	glass	53,65 €

Roti®-Blot 1 ready-to-use

Discontinuous transfer buffer for semi dry blotting.

Storage temp.: +20 °C

Warning H315-H319

- Optimised for semi dry blotting
- Superior blotting results for peptides and proteins of every size
- Special formulation with reduced acid formation - for optimal electrode protection

Roti®-Blot has a much better transfer efficiency than a tris-glycine buffer. Roti®-Blot also enables proteins >100 kD to be transferred completely by simply extending the transfer time.
A kit consists of:
Anode buffer Roti®-Blot A, 1 l (10 x concentration) (Art. No. L510)
Cathode buffer Roti®-Blot K, 1 l (10 x concentration) (Art. No. L511)
Both solutions may be bought separately.

L509.1	1 Set	glass	103,10 €

Roti®-Blot A ready-to-use

anode buffer to Roti®-Blot 1, 10x conc.

Storage temp.: +20 °C

Warning H315-H319

L510.1	1 l	glass	62,25 €
Original pack 6 x 1 l			59,14/1 l

Roti®-Blot K ready-to-use

cathode buffer to Roti®-Blot 1, 10x conc.

Storage temp.: +20 °C

L511.1	1 l	glass	64,40 €
Original pack 6 x 1 l			61,18/1 l

Amido black 10 B (C.I. 20470)

p.a.

For irreversible staining of proteins on membranes and for quantification of proteins in detergent containing solutions.

Naphthol blue black

Compatible with PVDF and NC membranes.
Staining solution: 0.5 % amido black in 50 % methanol (Art. No. 4627.1) / 10 % acetic acid (Art. No. 3738.1). Stain for 1-5 min at room temperature. Reduce background in 50 % methanol at room temperature.

9590.1	25 g	glass	39,25 €

Roti®fair SSPE

for 200 ml/tablet, for molecular biology

Buffer solution for DNA- and RNA hybridisation.

Sodium sodium phosphate EDTA, SSPE buffer (tablets)

Exactly pre-weighed tablets for convenient and rapid preparation of phosphate buffered salt solution (SSPE).
SSPE is frequently used for Southern- and Northern hybridisations, as well as for washing steps during Microarray techniques. Roti®fair SSPE may also be used very well in imunocytochemistry and for cell suspension prior to FACS analyses.
Prepared solution may be sterilized by filtration (0,22 µm). For long-term storage, buffer solution should be kept at +4 °C.
1x SSPE solution is prepared by dissolution of 1 tablet in 200 ml highly pure water.

Formulation:

Prepared 1x SSPE solution contains: 0,15 M NaCl, 1 mM EDTA, 10 mM Na-phosphate, pH-value 7,4 ±0,05, when prepared in deionized or distilled water.

1233.1	100 tablets	plastic	103,75 €

Roti®fair 20x SSC

for 1000 ml/pouch, for molecular biology

Concentrated buffer solution for Southern- and Northern transfer.

SSC buffer powder (pouch), Sodium sodium citrate

Exactly pre-weighed pouches for convenient and rapid preparation of SSC solution.
Prepared solution may be sterilized by filtration (0,22 µm) or autoclaving. For long-term storage, buffer solution should be kept at +4 °C.
20x SSC solution is prepared by dissolution of 1 pouch in 1000 ml highly pure water.

Formulation:

Prepared 20x SSC solution contains: 3,0 M NaCl, 0,3 M Na-Citrat, pH-value 7,0 ±0,05, when prepared in deionized or distilled water.

1232.1	5 pouches	box	158,60 €

Roti®-Stock 20x SSC ready-to-use S

BioScience-Grade, ready-to-use, steam sterilised

For molecular biology.

SSC 20x ready-to-use solution

20fold stock solution sodium/sodiumcitrate. Undiluted or after dilution with sterile water to 10x, 6x, 1x or 0,1x SSC one receives a versatile buffer for blotting, hybridising or washing of Southern- or Dot/Slot-Blots of DNA as well as for *in situ* hybridisation. Undiluted buffer is also suitable for neutral transfer of RNA onto unloaded membranes (e.g. Roti®-Nylon 0.2, Art. No. AE50.1).
With original seal.

Composition:

3 M NaCl, 300 mM sodium citrate in deionised water, pH-value 7.0, steam sterilised

1054.1	1 l	glass	68,70 €

DNA-/RNA Isolation

Roti®-Phenol

Roti®-Phenol solutions for DNA- and RNA extraction

- Reduce exposure to toxic chemicals
- Prepared from phenol of highest purity
- Packed under argon for maximum stability
- Successfully tried and tested in many research laboratories

ready-to-use

Mechanism

Phenol and chloroform lead to denaturation of proteins which accumulate in the interphase. Isoamyl alcohol prevents foaming and very efficiently inhibits RNAses.

For distinct phase separation, Roti®-Aqua-Phenol needs a pH of ≤4.0 in the aqueous upper phase. If needed, the upper phase may be acidified by adding 1-2 drops of 1 N HCl. Draw solution from lower phase. Do not shake before use!

Roti®-Phenol

for extraction of nucleic acids

Redistilled, in TE buffer equilibrated phenol, pH 7,5-8,0.

Storage temp.: +4 °C

Danger H301+H311+H331-H314-H341-H373-H411

Phenol solutions for nucleic acid isolation must be buffered and adjusted to the correct pH-value prior to use. Roti®-Phenol is a redistilled, in TE-buffer equilibrated ready-to-use phenol. Roti®-Phenol has been successfully tried and tested for isolating nucleic acids in many research laboratories. This quality product for molecular biology replaces the time consuming preparation of phenol and subsequently any exposure to toxic vapours.
Covered with buffer and packed under argon. Store in the dark!
Draw solution from lower phase. Do not shake before use!

0038.1	100 ml	glass	26,80 €
0038.2	250 ml	glass	52,60 €
0038.3	500 ml	glass	80,10 €

Roti®-Phenol/Chloroform/Isoamyl alcohol

for extraction of nucleic acids

Redistilled, in TE-buffer equilibrated phenol, chloroform and isoamyl alcohol at a ratio of 25:24:1, pH 7,5-8,0.

Storage temp.: +4 °C

Danger H301+H331-H312-H314-H341-H351-H361d-H372-H411

Ready-to-use solution for extraction of nucleic acids. Covered with buffer and packed under argon. Store in the dark!
Draw solution from lower phase. Do not shake before use!

A156.3	100 ml	glass	37,55 €
A156.1	250 ml	glass	75,15 €
A156.2	500 ml	glass	125,25 €

Roti®-C/I

for extraction of nucleic acids

Chloroform/Isoamyl alcohol at a ratio of 24:1.

Storage temp.: +20 °C

Danger H331-H372-H351-H361d-H302-H315-H319

Mixture of chloroform and isoamyl alcohol of highest purity.
Ideal for extraction of DNA/RNA in combination with Roti®-Phenol.

X984.3	100 ml	glass	11,30 €
X984.1	250 ml	glass	17,10 €
X984.2	500 ml	glass	26,80 €

Roti®-Aqua-Phenol

for RNA extraction

Redistilled, in water saturated phenol, pH 4,5-5.

Storage temp.: +4 °C

Danger H301+H311+H331-H314-H341-H373-H411

Optimal for RNA-isolation and other procedures, requiring a low phenol pH-value. The low pH results in interphase-enrichment of the DNA, reducing DNA-contamination in the RNA-eluate.
Also ideal for self-adjustment of pH-value. If required, buffer solution (e.g. TE buffer) may be added directly into the bottle, as Roti®-Aqua-Phenol comes in the following bottle sizes:
A980.2 - 100 ml in a 250 ml bottle
A980.1 - 250 ml in a 500 ml bottle
A980.3 - 500 ml in a 1 l bottle

Packed under argon for protection. Store in the dark!
Draw solution from lower phase. Do not shake before use!

A980.2	100 ml	glass	22,05 €
A980.1	250 ml	glass	43,55 €
A980.3	500 ml	glass	65,50 €

Roti®-Aqua-P/C/I

for RNA extraction

Redistilled, in water saturated phenol, chloroform and isoamyl alcohol at a ratio of 25:24:1, pH 4,5-5.

Storage temp.: +4 °C

Danger H301+H331-H312-H314-H341-H351-H361d-H372-H411

Optimal for RNA-isolation and other procedures where a low phenol pH-value is desired. The low pH results in interphase-enrichment of the DNA, reducing DNA-contamination in the RNA-eluate.
Packed under argon for protection. Store in the dark!

X985.3	100 ml	glass	28,95 €
X985.1	250 ml	glass	51,10 €
X985.2	500 ml	glass	77,30 €

Extraction Systems & -Kits

Roti®-Prep Plasmid MINI-XL

for molecular biology

For easy isolation of plasmids from up to 15 ml bacterial culture.

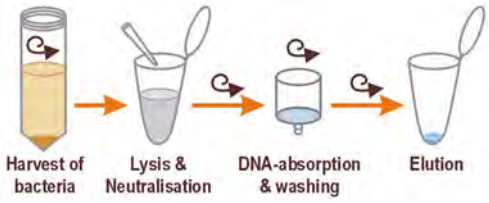
Storage temp.: +20 °C

Danger H225-H290-H302-H315-H318-H336

- Preparation by well-known mini spin-column system
- Fast, easy and efficient
- Preparation from 5-15 ml bacteria culture
- Preparation within approx. 20 minutes
- Yield 60-70 µg (on average)

MIDI preps in MINI size-fomat

Roti®-Prep Plasmid MINI-XL is a further development of the classical Plasmid Mini extraction kit, which is based on an alkaline lysis and binding of the plasmid to the spin filter.
The binding capacity of the spin filter has been, compared to usual plasmid mini kits, considerably increased (approx. 80 µg plasmid DNA) and allows now a plasmid extraction from 5-15 ml bacteria culture. Since filter dimensions correspond to the usual miniprep spin filters, its application differs only slightly from other plasmid mini kits. Most significant difference is the afore done convenient lysis in a 15 ml tube.
The elution resulting in highly concentrated pure DNA in 100 µl, takes then place in a 1,5 ml tube, like in standard mini kits. Isolated DNA is free of RNA or protein contamination and can be directly applied to all standard down-stream applications like restriction digest, sequencing, *in vitro* transcription, transfection etc.



The kit contains:
Resuspension Buffer RB, Lysis Buffer LS, Neutralisation Buffer NB, Washing Buffer PA, Washing Solution PB, Elution Buffer XEB, spin columns, collection tubes, elution tubes, detailed instructions-for-use. Contents of this Kit may not be bought separately.

Please order ethanol 96-99,8 % (p.a., Art. No. 9065) separately.

Roti®-Prep Plasmid MINI Columns

DNA-extraction columns for the Roti®-Prep Plasmid Kit

Replacement columns and 2 ml tubes for additional DNA-extractions using the buffers of the Roti®-Prep Plasmid MINI Kit (Art. No. HP29). Detailed instructions-for-use can be found there.

Not suited for Roti®-Prep Plasmid MINI-XL (Art. No. 8546).

Roti®-Prep Plasmid MINI

for molecular biology

For fast and easy isolation of plasmid and cosmid DNA from recombinant bacteria.

Storage temp.: +20 °C

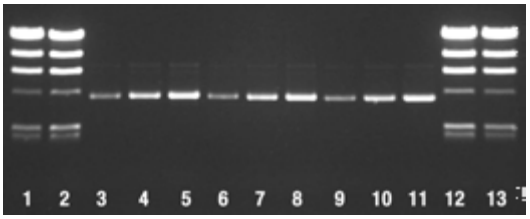
Danger H290-H302-H314

- Preparation by well-known mini spin-column system
- Fast, easy and efficient
- For all plasmids and cosmids of up to 10 kb length
- Up to 20 µg highly pure DNA, directly applicable to restriction digest, sequencing etc.
- 12 preparations in approx. 30 minutes

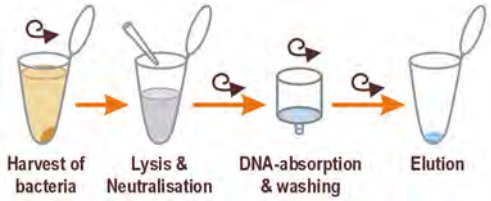
Coloured tracer for ideal DNA/membrane binding included.

Designed for the isolation of high-purity plasmid or cosmid DNA from bacteria, Roti®-Prep Plasmid MINI Kit is based on the well-known "mini-prep" method, an alkaline lysis of bacteria followed by purification of the DNA from the cell debris, RNA and genomic DNA. The kit uses the easy-to-handle spin column technique, eliminating the need for time-consuming techniques like phenol-chloroform extraction and alcohol precipitation. The highly efficient and DNA-specific silica-gel membrane DNA absorption provides reliably high amounts of DNA, independently from vectors or bacterial strains used.

Up to 20 µg DNA can be isolated from up to 10 ml bacterial culture (5 preparations per column). DNA is free of RNA or protein contamination and can be directly applied to all standard down-stream applications like restriction digest, sequencing, *in vitro* transcription, transfection etc.



The **figure** depicts DNA of a 4 kb plasmid isolated by three equivalent kits Lane 6, 7, 8: Roti®-Prep Plasmid MINI, 3 / 6 / 9 µl (1:10 dilution)



The kit contains:
RNAse A (Art. No. 3953), Lysis buffer (Art. No. 3970), Neutralisation buffer (Art. No. 3971), Washing buffer (Art. No. 3975), Elution buffer (Art. No. 3978), Column activation buffer (Art. No. 3980), Mini spin columns (10/50/250), 2 ml Collection tubes (10/50/250), detailed instructions-for-use. Excluding the columns, contents of this Kit may not be bought separately.

Roti®-Prep Genomic DNA MINI

for molecular biology

For isolation of genomic DNA from tissues, rodent tails, FFPE tissues, buccal swabs, cell cultures.

Storage temp.: +20 °C

Danger H225-H315-H317-H318-H334-H335-H336-H411

- Preparation by well-known mini spin-column system
- Fast, easy and efficient
- Preparation in approx. 15 minutes (excluding lysis)
- Yield up to 65 µg gDNA, depending on source material

Roti®-Prep Genomic DNA MINI has been developed for the isolation of genomic DNA from various sources.
The isolation is carried out through the proven and reliable spin column technique, which is very easy to handle and needs only few steps.

In addition to the especially on proteinase K adapted lysis buffer, the filtration spin column has been optimised, permitting particularly high extraction rates. Extraction from up to 40 mg tissue, therefore, allows a yield of up to 65 µg DNA. The thereby extracted DNA is free of RNA and proteins, and can directly be stored or used for downstream applications.

Suitable source material:
- Tissue (up to 40 mg)
- Rodent tails (0,5-1 cm)
- FFPE tissue (formalin-fixed, paraffin-embedded)
- Buccal swabs
- Cell culture (up to 5x10^6 cells)

The kit contains:
Lysis Buffer LSA, Binding Buffer BSN, Proteinase K, Washing Buffer WST, Elution Buffer EB, spin columns, collection tubes, elution tubes, detailed instructions-for-use. Contents of this Kit may not be bought separately.

Please order ethanol 99,8 % (p.a., Art. No. 9065), RNase A (Art. No. 7156, not for FFPE tissue), and for FFPE tissue xylole (Art. No. 4436) or octane separately.

Roti®-Prep Blood Genomic DNA MINI

for molecular biology

For isolation of DNA from whole blood

Storage temp.: +20 °C

Danger H225-H317-H319-H315-H334-H335-H336-H400

- Preparation by well-known mini spin-column system
- Fast, easy and efficient
- Preparation in approx. 25 minutes
- Yield up to 30 µg gDNA

Roti®-Prep Blood Genomic DNA MINI has been specially designed for the isolation of high purity genomic DNA from blood samples.
The isolation is carried out through the proven and reliable spin column technique, which is very easy to handle and needs only few steps.

The Roti®-Prep Blood Genomic DNA MINI kit has been adapted to gain high purity DNA from fresh or frozen blood (EDTA or citrate stabilised) or whole blood, respectively. In order to get optimal results, two protocols, depending on sample amount, are provided. Furthermore, the properties of the binding buffer have been optimised to reach highest binding capacity with blood samples, permitting a yield of up to 30 µg gDNA out of 400 µl blood. Utilisation is uncomplicated and fast to achieve (approx. 25 minutes, lysis included), and offers best conditions for following downstream applications.

Isolated gDNA is free of EDTA, RNA, or proteins, and may directly be applied to all standard downstream applications like, for instance, restriction digest, PCR etc.

The kit contains:
Lysis Buffer LSN, Binding Buffer BR, Proteinase K, Washing Solution WSO, Washing Buffer WSH, Elution Buffer EB, spin columns, collection tubes, elution tubes, detailed instructions-for-use. Contents of this Kit may not be bought separately.

Please order ethanol 99,8 % (p.a., Art. No. 9065) and RNase A (optional, Art. No. 7156) separately.

Roti®-Prep RNA MINI

for molecular biology

For RNA isolation from eukaryotic cells, tissues, bacteria, biopsies.

Storage temp.: +20 °C

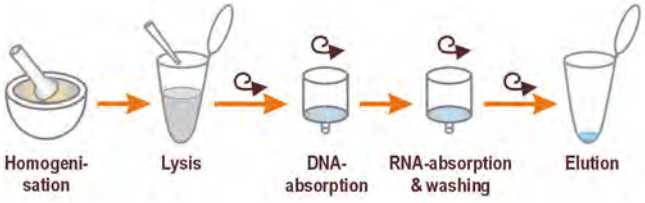
Warning H302+H312-H412-EUH032

- Preparation by well-known mini spin-column system
- Fast, easy and efficient
- Use of DNase not necessary
- Preparation in approx. 15 to 40 minutes
- Yields up to 100 µg RNA, depending on source material
- Elution in 30-80 µl

Roti®-Prep RNA MINI has been developed for the isolation of total RNA from various sources.
The isolation is carried out through the proven and reliable spin column technique, which is very easy to handle and needs only few steps.

One of the critical points in RNA extraction is the presence of endogenous RNases, which can lead to high losses very early in extraction of the (in comparison to DNA) very sensitive RNA. Therefores the lysis buffer has been specially optimised to inactivate RNases, with highest efficiency, already at the early stage of the extraction.
Furthermore, in order to get a high-pure total RNA, one particularly for this purpose developed prefilter is used. This filter exclusively serves for binding and targeted removal of DNA impurities, and is discarded after use with the bound DNA. Thus, it is possible to omit application of DNase I.
Total RNA is then obtained from the DNA-free eluate through a simple "Binding-Washing-Elution" process.
In each preparation, up to 100 µg highly pure total RNA may be isolated.
One preparation takes (excluding lysis) approx. 10 mins.
Isolated RNA is free of DNA and enzyme inhibitors, and may directly be applied to RT-PCR or other downstream applications.

Suitable source material:
- Tissues (up to 20 mg)
- Eukaryotic cells (up to $5x10^6$)
- Bacteria Gram + and Gram - (up to $1x10^9$)
- Biopsies



The kit contains:
Lysis Buffer LSR, Washing Buffer WSA, Washing Solution WSL, RNase-free Water, spin filters (blue), spin columns (violet), collection tubes, elution tubes, detailed instructions-for-use. Contents of this Kit may not be bought separately.

Please order ethanol 99,8 % (p.a., Art. No. 9065) and 70 % (p.a., Art. No. T868) separately.

Roti®ZOL RNA

ready-to-use | RNAse-free

for molecular biology

Ready-made solution with green dye for isolation of total RNA

RNA isolation reagent

Storage temp.: +4 °C

Danger H290-H302+H312+H332-H314-H341-H373-EUH032

- Easy and very rapid two-step RNA isolation
- High recovery rates of intact, very pure total RNA
- Applicable on a broad range of tissues and cell types
- The purified RNA is ready for use in standard downstream applications such as RT-PCR

Roti®ZOL RNA is a ready-to-use, green-coloured solution for isolating total RNA from biological samples such as cells or tissue.
Roti®ZOL RNA is based on the phenolic isolation procedure known from Chomczynski and Sacchi (*Anal. Biochem.* (1987) 162:156-9). Due to the advanced and optimized formulation, Roti®ZOL RNA results in very high recovery rates of highly pure total RNA. Application is very convenient and preparation of several samples in parallel is finished in less than one hour. Additionally, the green colour significantly simplifies the separation of the RNA containing aqueous phase, the DNA containig interphase, and the protein containing phenolic phase during the process.

Typical RNA yield from $5x10^6$ cells: 30-35 µg
Typical purity of RNA prepared from $5x10^6$ cells: 2,08 (A_{260}/A_{280})

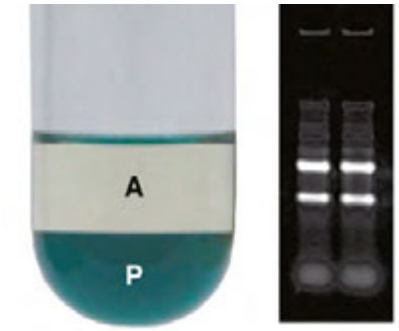

Figure 1 and 2:
Isolation of totalRNA by Roti®ZOL RNA.
Left: Tube after centrifugation.
A: Aqueous phase - RNA containig, P: Phenolic phase - protein containing. DNA accumulates in the A/P interphase.
Right: Typical gel of total RNA isolated by Roti®ZOL RNA (extracted from $5x10^6$ HL-60 cells).

1 ml Roti®ZOL RNA is used for RNA isolation from 100 mg tissue or 10^7 cells, respectively.

9319.1	100 ml	plastic	231,70 €
9319.2	200 ml	plastic	407,45 €

Roti®-Quick kit ready-to-use

for molecular biology

For RNA-isolation from cells and tissues.

Storage temp.: +4 °C

Danger

H225-H314-H301+H311-H330-H341-H351-H373-H336-H412-EUH032

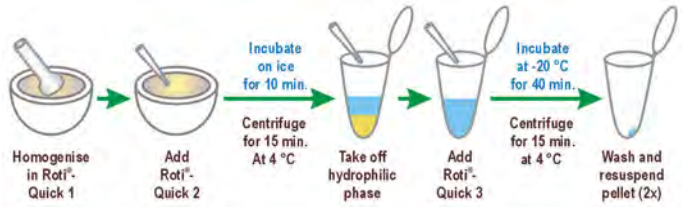
- Easy, most versatile application
- High recovery rate of intact, very pure total RNA
- Column-free two-step isolation
- Applicable on nearly any tissue type

Column-free, ultra-flexible isolation system designed for reliable isolation of total RNA from almost any tissue. The Roti®-Quick Kit is suitable for use with cell culture material, biopsies, high-fat or high-protein tissue, blood (Üçeyler *et al. Neurology* (2007) 69:42-9), solid plant material, mitochondria (Backert *et al. Plant Molecular Biology* (1997) 33:1037-50), mycoplasms (Weiner *et al. Nucleic Acids Res.* (2000) 28:4488-96) and many more. The kit can be used for both fresh tissue and frozen material.

The Roti®-Quick Kit is based on the GITC isolation method by Chomczynski and Sacchi (Chomczynski and Sacchi. (1987) *Anal. Biochem.* 162:156) and includes three optimised ready-to-use solutions that were developed by molecular biologists and have proven effective for many years.

After the tissue has been homogenised, the RNA is purified in a single step and isolated by precipitation. Each isolation takes approximately 2,5 hours, and multiple isolations can easily be performed simultaneously. The incubation and centrifuging steps take about 2 hours. Preparation as given in the instruction-for-use is optimised for RNA isolation from approx. 0,2 g of tissue or cell material. The amount of material isolated per batch may easily be up- or downscaled to larger or smaller amounts of tissue.

The isolated total RNA is highly pure and may be used directly for all common down-stream applications, such as RT-PCR, Northern blotting and reverse transcription. Detailed instructions-for-use are enclosed with each kit.



This Kit contains:
Roti®-Quick Kit 1 (Art. No. A976), Roti®-Quick Kit 2 (Art. No. A977), and Roti®-Quick Kit 3 (Art. No. A978). Contents of this Kit may not be bought separately.

The Roti®-Quick Kit is sufficient for 20 isolations from 0,2 g tissue each.

A979.1	1 kit	cardboard	91,30 €

Roti®-Prep Viral RNA/DNA MINI

for molecular biology

For isolation of viral DNA and RNA

Storage temp.: +20 °C

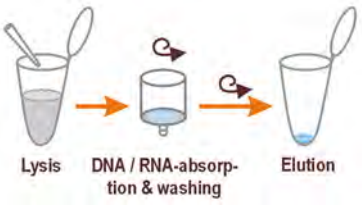
Danger H225-H315-H317-H319-H334-H335-H336-H411-EUH032

- Preparation by well-known mini spin-column system
- Fast, easy and efficient
- Preparation within approx. 25 minutes
- Elution in 60 µl

Roti®-Prep Viral RNA/DNA MINI has been developed for the isolation of viral DNA and RNA from various kinds of source material.
The isolation is carried out via the proven and reliable spin column technique, which is very easy to handle and needs only few steps.

The kit enables the simultaneous extraction of viral ssDNA, dsDNA and ssRNA. The purification happens by using a carrier RNA, which engenders a higher binding of the nucleic acid (resp. its complex with the carrier RNA) on the spin filter and thus a higher recovery rate.
Furthermore, in order to achieve a maximum of nucleic acid purity for each source material, 5 specifically optimised protocols are provided.
Thus, within approx. 25 mins high-pure viral nucleic acid is eluted, free from inhibitors. This nucleic acid may directly be applied to further downstream applications, like RT-PCR, PCR, packaging etc.

Suitable source material:
- Tissues and biopsies (up to 20 mg)
- Cell culture supernatants, serum, plasma, cell-free body fluids (up to 400 µl)
- Swabs



The kit contains:
Lysis Buffer LSV, Binding Buffer BSN, Carrier CS, RNase-free Water, Proteinase K, Washing Buffer WSA, Washing Solution WSL, spin columns, collection tubes, elution tubes, detailed instructions-for-use. Contents of this Kit may not be bought separately.

Please order ethanol 99,8 % (p.a., Art.-No. 9065) separately.

Roti®-Prep PCR Purification

for molecular biology

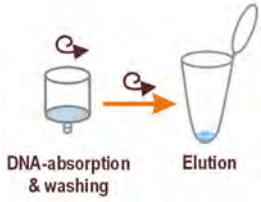
For concentration and purification of PCR products.
Storage temp.: +20 °C

Danger H225-H319-H336

- Preparation by well-known mini spin-column system
- Fast, easy and efficient
- Purification in approx. 3 minutes
- For fragment length of 60 bp-30 kb
- Recovery rate up to 95 %
- Elution in 10 µl

Very fast purification and/or concentration of PCR products, between 60 bp and 30 kb length, through simple but effective spin column technique.

The high performance membrane used for the Roti®-Prep PCR Purification columns, allows purification or concentration of PCR products within approx. 3 minutes. The PCR product to be extracted (50 µl in maximum) is first mixed with binding buffer, which can be done separately or directly in the spin filter column. The nucleic acid is then eluted by centrifugation, without any additional washing step, in a minimum of 10 µl of water or buffer. Isolated DNA is free of residual nucleotides or PCR additives, and may directly be applied to all standard downstream applications like cloning or sequencing.



The kit contains:
Binding Buffer, Elution Buffer EB, spin columns, collection tubes, elution tubes, detailed instructions-for-use. Contents of this Kit may not be bought separately.

Roti®-Prep Gel Extraction

for molecular biology

For DNA extraction from agarose gels.
Storage temp.: +20 °C

Warning H290-H302+H312+H332-H315-H319-H412-EUH032

- Preparation by well-known mini spin-column system
- Fast, easy and efficient
- Extraction within approx. 20 minutes
- For fragment length of 100 bp-30 kb
- Recovery rate up to 90 %

DNA extraction from agarose gels through incubation and subsequent spin column process.
The gel slice to be extracted (up to 300 mg) is first solubilised in a lysis buffer through a simple 10 minute incubation.
After that, DNA is elutied via convenient spin filter centrifugation in approx. 10 mins.
A specially developed Binding Enhancer is admixed in order to enhance binding efficiency of the DNA to the filter, and thus yield and purity of the isolated DNA.
Furthermore, the Roti®-Prep Gel Extraction kit allows, if needed, to reduce elution volume down to 10 µl in order to obtain particularly highly concentrated DNA.

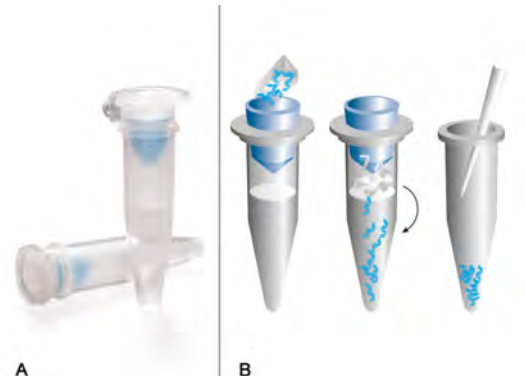
For gel runs both, TAE and TBE may be used. The kit is compatible with all standard gel loading buffers and gel staining reagents, even non-toxic ethidium bromide replacements like, for instance, Roti®-GelStain.

Isolated DNA is free of residual agarose, PCR- and ligase inhibitors, and cytotoxic reagents, and can directly be applied to all standard downstream applications like cloning, PCR, transformation and transfection.

The kit contains:
Binding Enhancer, Gel Solubizer, Washing Solution WSL, Elution Buffer EB, spin columns, collection tubes, elution tubes, detailed instructions-for-use. Contents of this Kit may not be bought separately.

Please order ethanol 96-99,8 % (p.a., Art. No. 9065) separately.

8510.1	10 prep.	21,00 €
8510.2	50 prep.	78,40 €
8510.3	250 prep.	304,15 €



Ultrafree®-DA gel extraction kit

Made by MERCK MILLIPORE
for molecular biology

For easy and speedy extraction of DNA fragments from agarose or polyacryl amide gels.

- Extraction in 10 minutes
- High recovery of fully intact DNA
- Highly efficient with all gel running buffers
- Easy application - even during student courses
- Convenient handling even of large sample numbers

Recovery of functionally intact DNA in one spin-step. The agarose slice is placed directly into the pre-assembled device and centrifuged for 10 minutes (fig. B). Melting or enzymatic digestion is not required. The agarose slice is nebulised and the DNA is filtered and purified during centrifugation. The eluate may simply be stored away in the extraction tube or collected from the tube in order to apply the DNA to subsequent analyses.

Application:

Compatible with all agaroses with standard gelling temperature (not compatible with Low-Melting agarose). Suitable for fragments of 100 bp up to 10,000 bp. Ideal also for labelled DNA, e.g. after fluorescence- or radioactive labelling. Reliable recovery rates for fragments of 100 bp up to 2,000 bp. The gel extraction units may be used with all standard gel running buffers. Following elution from gels run with Rotiphorese® 10 x TAE buffer *light* (Art. No. 0122.1), the DNA may be applied **directly** to cloning or sequencing.

One extraction unit consists of a 1,5 ml standard reaction tube and a removable nebuliser/filter unit.

Compatible with all standard Mini-centrifuges.

Art. No.	Pack Qty	€
AE86.1	1 kit (50 extraction units)	143,00

Roti®-Elution Tubes

DNAse-/RNAse-/Protease-free

RNase-free, DNase-free and proteinase-free, free of PCR products. For gel elution and purification of DNA/RNA and proteins.

- Ultrapure
- Easy-to-handle
- Very gentle process
- Typical recovery rate of >95 %
- Suitable for elution from agarose and PAGE
- Suitable for dialysis of biomolecules
- Suitable for oligoncleotides, dsDNA, ssDNA, RNA, proteins and protein/ nucleic acid complexes
- Compatibel with all popular electrophoresis units

Easy-to-handle system for gel elution and purification of DNA/RNA and proteins in solution (electro elution).

This very gentle method guarantees the non-disruptive purification of high-molecular or genomic DNA as well as of native protein complexes and long peptides. Using membranes of low MWCO, elution of very small DNA fragments is possible, making the tubes a very useful tool for the efficient desalting of primers within 60-100 min as well as for purification of siRNA (ss or duplexes).

Roti® elution tubes are suitable for elution of ssDNA (≥20 nt), dsDNA (15 bp-100 kb), RNA of each size, proteins of each size, and of protein/ nucleic acid complexes. The tubes may be applied to elution procedures from agarose- and polyacrylamide gels, as well as to all popular electrophoresis units. Used in floating racks, they are ideal for the purification of DNA, RNA or proteins by means of dialysis.

All Roti® Elutions Tubes are free of DNase, RNase, Proteinase and PCR products. All membranes are made from regenerated cellulose and can thus be exposed to a pH range of 2-12, to a temperature of +60 °C, and also to a variety of organic solvents. Additionally, the membranes are free of sulphate and heavy metals and were treated with EDTA. Hence, macromolecules (like proteins or nucleic acids) or other biological particles may be eluted and dialysed in native conformation, and are very well suited for subsequent activity tests.

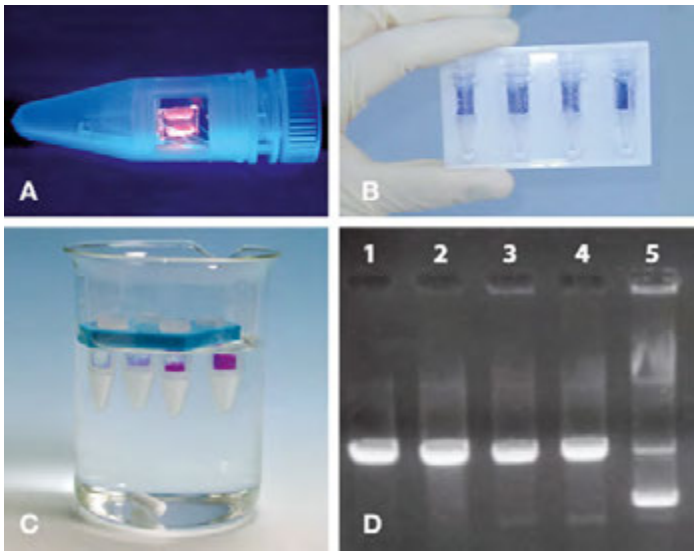
Application: Roti® elution tubes are very easy to handle, and therefore can be used in both individual tests and high-throughput applications. Thanks to the screw cap, the vials are easy to open, can easily be filled with gel slices and buffer and can be securely sealed.

The practical elution vial holder has sufficient stability for safe use in electrophoresis cell. Under current flow, the DNA/RNA/protein molecules initially migrate from the gel slice until they are halted by the dialysis membrane. By briefly reversing the polarity of the electrical field, the molecules can be separated from the membrane and pipetted out of the tube together with the buffer. By carefully selecting the tube and the amount of buffer, it is in many cases possible to achieve a high concentration directly within the elution buffer. The buffer can then easily be concentrated by using the usual methods (e.g. precipitation).

Roti® elution tubes with MWCO 1, 25 and 50 kDa are wet packed in stabilising solution (25 % ethanol, 2 mM EDTA) and should stored under refrigeration. All other elution vials are dry packed and can be stored at room temperature.

Colour code of the Roti®-Elution Tubes MEGA

Colour	MWCO	Application
Blue	3,5 kDa	Nucleic acids from 50 nt or 25 bp, proteines from 10 kDa
Red	8 kDa	Nucleic acids from 250 nt or 100 bp,proteines from 25 kDa
Green	14 kDa	Nucleic acids from 1000 nt or 500 bp,proteines from 45 kDa



Figures:
A: Roti®-Elution Tube under UV-light with a DNA containing agarose slice stained by ethidium bromide
B: Roti®-Elution Tubes MIDI positioned in Roti® Elution Tube Tray
C: Dialysis of the restriction enzyme *Pst*I in enzyme buffer/8 M urea against pure enzyme buffer
D: Detection of enzymatic activity after dialysis by digestion on plasmid DNA (1-4). Untreated control (5).

Typical applications: Purification of DNA and proteins from gels, elution of genomic DNA or total RNA, preparation of DNA fragments prior to cloning, purification of siRNA for RNAi assays, purification/desalting of oligonucleotides/primers, purification of RNA or DNA for transfection or transformation, desalting or buffer change of protein solutions.

Recommended choice of MWCO:

MWCO (kDa)	RNA/ssDNA	dsDNA	Proteins
1	20-50 nt	15-25 bp	3-15 kDa
3,5	50-250 nt	25-100 bp	10-30 kDa
8	250-1000 nt	100-500 bp	25-50 kDa
14	1-5 knt	0,5-2 kb	45-100 kDa
25	5-30 knt	2-10 kb	80-200 kDa
50	>30 knt	10-100 kb	>150 kDa

Magnetic Beads - Kits for DNA isolation NEW

MagSi-DNA Vegetal NEW

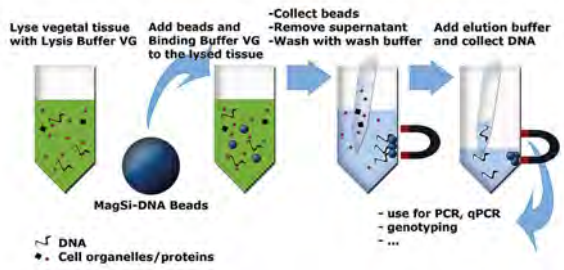
magtivio for molecular biology

Magnetic beads for nucleic acid isolation from plant tissue.
Storage temp.: +20 °C

Danger H225-H302-H319-H336

- Cost-effective - Low price per sample
- Superior lysis - Lysis Buffer VG is specially designed for lysis of vegetal tissues
- Flexible protocol - Kit components can be individually adjusted in volume
- Easy to automate - Designed for highthroughput, robotic, liquid handling processes
- Good yields and recovery - Very well suited for typical downstream applications (PCR, qPCR, NGS, Genotyping)
- Excellent DNA purity, $A_{260/280}$ = 1.7-2.0

The MagSi-DNA Vegetal kit allows for extraction of genomic DNA from plant tissue. It has a very flexible setup, as the volume of each of its components can be adjusted to facilitate your specific extraction protocol requirements. Lysis Buffer VG is designed for extremely good breakdown of the tough components in vegetal materials, allowing optimal release of the DNA to be isolated. The extraction itself is based on the binding of DNA to MagSi-VG I magnetic beads, and works in combination with the proprietary Binding Buffer VG. After a series of washing steps in which the magnetic beads (with DNA) are held by the magnet, the DNA is eventually released in an elution step.



MagSi-DNA Vegetal helps you extract DNA from seeds but also from leaves of e.g. cucumber, bell pepper, tomato, wheat, flowers, sugar beet, potato, chicory or maize.
Bigger packages available on request.

The kit contains:
Magnetic beads MagSi-VG I, Lysis Buffer VG, Binding Buffer VG, Wash Buffer I, Wash Buffer II, Elution Buffer. Contents of this Kit may not be bought separately.

1624.2	960 prep.	cardboard	1897,40 €

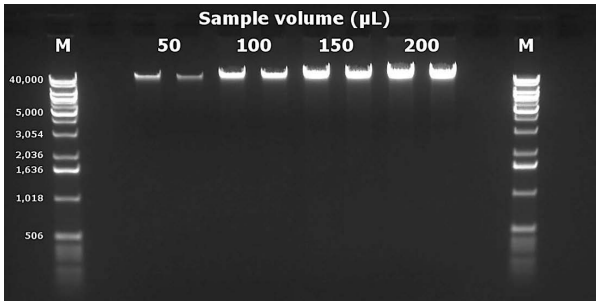

Figure 1: Gel electrophoresis of genomic DNA extracted from 50-200 µl fresh whole blood.

MagSi-gDNA blood NEW

magtivio for molecular biology

Magnetic beads for isolation of genomic DNA from whole blood.
Storage temp.: +4 °C

Danger H225-H302-H319-H336

- Suitable for whole blood, drawn in Citrate-, EDTA- or Heparin tubes
- Reproducible, high yield of DNA - 3-15 µg from 200 µl fresh or frozen whole blood
- Excellent DNA purity, $A_{260/280}$ = 1.7-2.0
- Preparation time: 20-25 mins. (after lysis)
- Suitable for many genomic applications including PCR, DNA sequencing and Southern blotting
- Simple bind-wash-elute procedure
- Protocol easily adjustable for different sample volumes
- Suitable for manual and automated use
- Safe sample handling with minimal user input
- Also suitable for isolation of DNA from saliva, serum/plasma and cultured cells

MagSi-gDNA blood kit allows fast and cost-effective extraction of genomic DNA from a wide range of sample volumes. The paramagnetic bead-based kit can be used on whole blood samples drawn in EDTA-, citrate- or heparin tubes. Due to the ready to use reagents and simple protocol the kit is easy to use and easy to automate. As a linear volume to volume ratio is used between whole blood sample and reagents, it is possible to use the kit in any situation where genomic DNA out of blood is needed.
MagSi-gDNA blood kit is easy to automate. It is compatible with many different automated liquid handling systems (e.g KingFisher™, PrimaRWS®, PIPETMAX® and JANUS®). Furthermore, it is performed with short and easy protocols and suitable for small, medium and high-throughput automation using variable volume sample input.

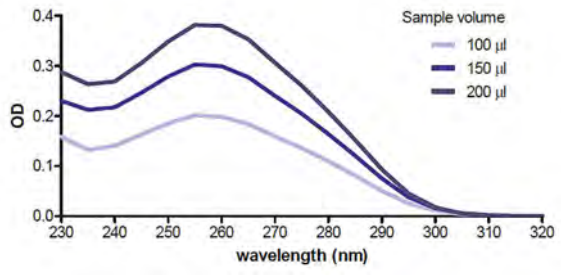

Figure 2: UV-VIS Absorbance spectrum of DNA isolated from 100, 150 and 200 µl fresh whole blood

The kit contains:
Magnetic beads MagSi-DNA 3.0 COOH, Proteinase K, Lysis Buffer, Binding Buffer, Wash Buffer I, Wash Buffer II, Elution Buffer.
Contents of this Kit may not be bought separately.

MagSi-DNA saliva

NEW

magtivio for molecular biology

Magnetic beads for isolation of genomic DNA from saliva or buccal swabs.
Storage temp.: +4 °C

Danger H225-H302-H319-H336

- Fast and easy processing using magnetic beads
- Suitable for automated liquid handlers
- Yields high quality genomic DNA of excellent purity, $A_{260/280}$ = 1.7-2.0
- Compatible with fresh saliva samples as well as sample collection and preservation kits
- Sample collection is non-invasive, risk free, and painless
- More affordable than blood testing

The MagSi-DNA saliva kit provides a fast and simple procedure for DNA extraction from saliva. The kit is compatible with fresh saliva samples as well as saliva preserved in standard saliva sample collection kits. Genomic DNA obtained with MagSi-DNA saliva is of the highest quality and is compatible with applications like PCR, Southern Blotting, genetic typing or mutation analysis.
MagSi-DNA saliva is based on magnetic bead technology, and is suitable for extraction of DNA from human saliva or buccal swabs in research.
The kit includes magnetic beads, buffers and Proteinase K, and is easy to automate for high-throughput processing.
Saliva is rapidly becoming an attractive alternative source of DNA for genetics testing in research. Unlike blood or tissues, saliva can be collected non-invasive by individuals with little training, and without the need for expensive equipment. Saliva preserved in collection kits is stable for years at room temperature, facilitating easy transportation and storage.
Bigger packages available on request.

The kit contains:
Magnetic beads MagSi-DNA 3.0 COOH, Proteinase K, Lysis Buffer, Binding Buffer, Wash Buffer I, Wash Buffer II, Elution Buffer. Contents of this Kit may not be bought separately.

MagSi-Wash Buffer III

NEW

magtivio for molecular biology

Solution for optimising DNA isolation using MagSi-DNA Kits.
Magnetic beads
Storage temp.: +4 °C
Additional Washing Buffer which may be used with the kits MagSi-gDNA blood-, -saliva- or -Vegetal kit. It is not included in the three kits, but may be bought separately.
Wash Buffer III eliminates the need for a drying step to remove traces of ethanol, resulting in faster protocols and DNA with higher purity.

For use with MagSi-gDNA blood-, -saliva- or -Vegetal kit.

Type analysis:
pH value. 6,0-6,5

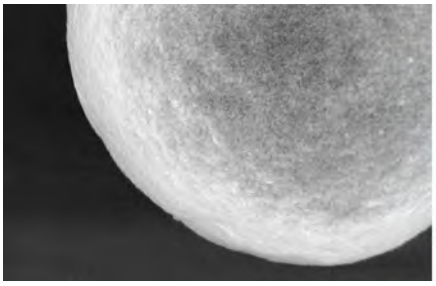
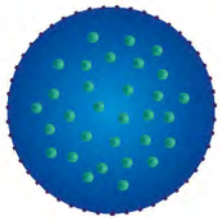
Bead solutions for DNA isolation

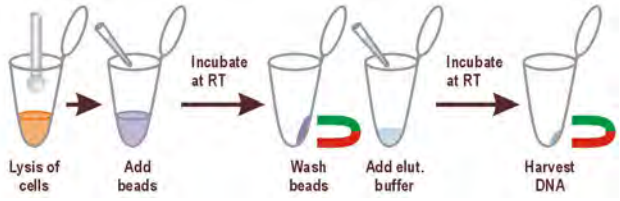
NEW





Magnetic beads can be used as solid support phase in DNA extraction and purification protocols by a simple bind/wash/elute principle. The products in this category are intended for own development of protocols and are suitable for various sample sources and buffer systems. MagSi-beads for genomic applications are available with a range of physical properties and a silica or carboxyl modified surface.

DNA yield (20 µl beads): >3 µg



MagSi-DNA trial kit

NEW

magtivio for molecular biology

Magnetic beads for nucleic acid isolation from various sources.
Storage temp.: +4 °C
A complete set of the 8 types of MagSi beads for genomic applications, offered in a single kit for trial purposes in development of new assays. Intended for nucleic acid isolation from various sources (blood, cells, bacteria etc.) for manual and automated work-flow.

The kit contains:
2 ml each of MagSi-DNA, MagSi-DNA COOH, MagSi-DNA allround, MagSi-DNA allround COOH, MagSi-DNA 600, MagSi-DNA 600 COOH, MagSi-DNA 3.0 and MagSi-DNA 3.0 COOH.

1560.1	1 kit	cardboard	183,75 €

Bead surface	Compatible Buffer Systems	Binding Mechanism	Elution	Recommended use
Silica Beads	Chaotropic buffers	Precipitation with chaotropic salts	Low salt conditions	Recommended in case chaotropic conditions can be applied.
Carboxylierte Beads	PEG-based, low pH or chaotropic buffers	Precipitation by polymers like PEG, divalent cations (e.g. Mg2+) or chaotropic salts	Low salt conditions or pH shift from acidic to alkaline conditions	Recommended if flexibility in buffer systems is necessary or if non-chaotropic conditions have to be applied. Results in **higher purity and recovery rate** under **non-chaotropic conditions.**

MagSi-DNA

magtivio 300 mg/ml, for molecular biology NEW

Magnetic beads for nucleic acid isolation from various sources.
Storage temp.: +4 °C
Magnetic silica beads of 300 nm size with optimized magnetic content and long suspension time. Ultra-fast ferromagnetic silica particles with instant magnetic separation. Intended for nucleic acid isolation from various sources (blood, cells, bacteria etc.) for manual and automated work-flow.

MagSi beads and -kits

MagSi-DNA COOH

magtivio 300 mg/ml, for molecular biology NEW

Magnetic beads for nucleic acid isolation from various sources.
Storage temp.: +4 °C
Carboxylated magnetic silica beads of 300 nm size with optimized magnetic content and long suspension time. Ultra-fast ferromagnetic silica particles with instant magnetic separation. Intended for nucleic acid isolation from various sources (blood, cells, bacteria etc.) for manual and automated work-flow. Under specific conditions, the carboxylated surface enables higher yield and purity from samples.

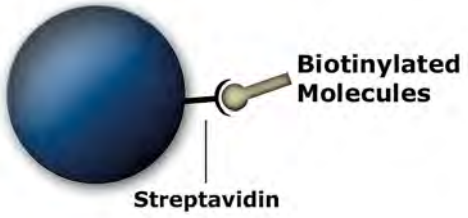
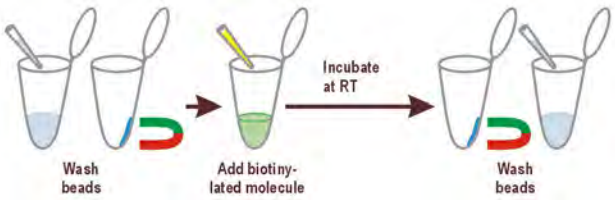
Magnetic Beads for isolation of biotinylated nucleic acids

NEW



Various types of this product are available, with different mean size, streptavidin coating chemistry, and binding capacity.



MagSi-STA Trial kit

NEW

magtivio for protein biochemistry and molecular biology

Magnetic beads for capture or purification of biotinylated molecules.

Storage temp.: +4 °C

Magnetic silica particles with high quality streptavidin covalently attached to the bead surface. Applications include immunoassays and capture or purification of biotinylated molecules. The MagSi-STA Trial kit allows the screening of different types of streptavidin in parallel. The kit is especially useful when required specifications for magnetic beads are not known. This kit includes 1 mL of the 8 different MagSi-STA products and is intended for evaluation purposes during trial phase of developing new assays, or bead replacement in existing assays.

The kit contains:
1 ml each of MagSi-STA 600, -STA 600 BI, -STA 1.0 L, -STA 1.0, -STA 1.0 TL, -STA 1.0 TS, -STA 3.0 L, -STA 3.0 TL.

Formulation:
1 ml M each of MagSi-STA 600, -STA 600 BI, -STA 1.0 L, -STA 1.0, -STA 1.0 TL, -STA 1.0 TS, -STA 3.0 L, -STA 3.0 TL.

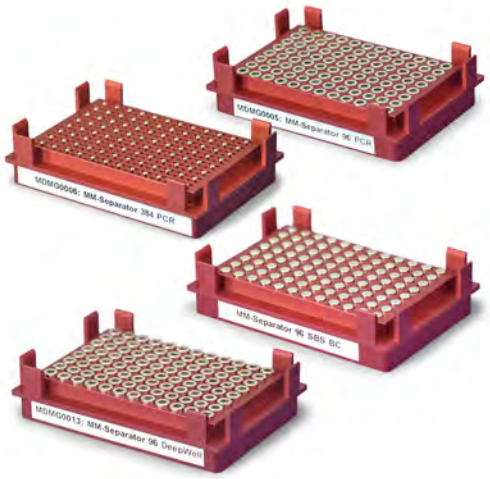
Separators



NEW

MM-Separators for automated processing

By magtivio. Made from **aluminum**.

These MM-Separator are designed for fast and efficient collection of magnetic beads in a variety of microplates. Its SBS footprint allows placement on standard automated liquid handling workstations. Small skirts on each side of the aluminium block ensure correct and stable placement of microplates onto the separators. Compatible with 8- or 12-channel multi-pipettes.

Recommended for:

Type 96 PCR: PCR plates, U- and V-bottom microplates

Type 384 PCR: PCR microplates only. For 384 V-bottom plates, use MM-Separator 384 DeepWell

Type 96 SBS BC: U- and V-bottom microplates

Type 96 DeepWell: DeepWell microplates

Length: 133,7 cm, Breadth: 91,5 cm, Height: 3,4 cm

Type	Max. sample number	Max. volume	Min. elution volume
96 PCR	96	300 µl	20 µl
384 PCR	384	40 µl	10 µl
96 SBS BC	96	400 µl	5 µl
96 DeepWell	96	1,2 ml	5 µl

Type	Art. No.	Pack Qty.	€
96 PCR	**2162.1**	1 pieces	1548,00
384 PCR	**2166.1**	1 pieces	2386,50
96 SBS BC	**2167.1**	1 pieces	1784,50
96 DeepWell	**2169.1**	1 pieces	1548,00

MM-Separators

NEW

By magtivio. Made from acrylic glas for optimal visual inspection needs, and from chemically resistant polyoxymethylene (POM) (versions 'P') for routine use of organic solvents.

Usage:

MM-Separators M12+12 - manual use with 1.5 and 2 mL microtubes.

MM-Separators M96 - manual use with 96 well microplates and PCR plates.

PCR Strip Adapters - manual use with 8- and 12-tube PCR strips, complementary to MM-Separators M96.

MM-Separators M12+12 enable easy separation of beads from liquids for processing low amounts of samples with working volumes from 10 µl to 2 ml. In the centre, 12 magnets allow accommodation of up to 24 centrifuge tubes.

MM-Separators M96 enable easy separation of beads from liquids for multiple sample processing with 8- or 12-channel pipettes. The separators hold 24 magnets that are placed for magnetic separation of beads in 96 wells. MM-Separators M96 allow magnetic particles to be pulled to the side of wells for optimal access to the bottom and easy supernatant removal. The product is suitable for U- and V-bottom shaped 96 well microplates and for most PCR plates, skirted or semi- and non-skirted.

The PCR Strip Adapters have to be placed onto the MM-Separators M96 and are suitable for users with smaller sample throughputs, preferring use of PCR tube strips over PCR plates. These separators are suitable for use with U- or V-shaped 96 well microplates and for 96- well PCR plates in various formats, and 8- and 12-tube PCR strips. Compatible with 8- or 12-channel multi-pipettes.

Type	Length (cm)	Breadth (cm)	Heigth (cm)	Weight (kg)	Max. sample number

FTA® Technology

Collect, transport, archive and isolate nucleic acids - all at room temperature.

FTA® Cards utilize patented Whatman FTA® Technology that simplifies the handling and processing of nucleic acids. The cards contain chemicals that lyse cells, denature proteins and protect nucleic acids from nucleases, oxidative and UV damage.

FTA® Cards rapidly inactivate organisms, including blood-borne pathogens, and prevent the growth of bacteria and other microorganisms. Capture of nucleic acid is a most simple and highly rapid process which can be performed quite easily also by untrained personal. The captured DNA is stable for years at room temperature.

Indicating FTA® Cards change colour upon sample application to facilitate handling of colourless samples. Since FTA® Cards are suitable for virtually any cell type, this is a very versatile, ready-to-use and easy-to-handle tool for storage and isolation of genomic DNA.

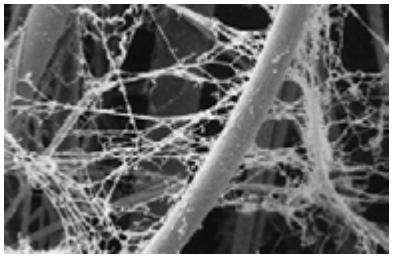

Figure:
Electron micrograph showing DNA entrapped within the FTA Matrix (magnification x 10,000).

Instructions for use
can be found on the Internet next to the product description.

FTA® Cards

Made by GE Healthcare.
Speciality cards for space- and time-saving collection, archival storage, and isolation of genomic DNA from a variety of sample material. Originally Whatman.

- Capture nucleic acid in one easy step - simply apply blood or tissue material to the card
- Captured nucleic acid is ready for downstream applications in less than 30 mins.
- Genomic DNA collected on FTA® Cards is stable for years at room temperature
- Suitable for virtually any cell type
- Indicating FTA® Cards change colour upon sample application in order to facilitate handling of colourless samples

Simply apply your sample to the FTA® Card. Liquids are pipetted or trickled, tissue samples are pressed onto the surface. Cell membranes and organelles are automatically lysed and the released nucleic acids are entrapped in the fibres of the matrix (see figure). The nucleic acids remain immobilized and are stabilized for transport, immediate processing or long-term storage. Libraries and species DNA collections can be stored simply in a folder; single DNA samples can be filed in your lab manual. FTA® Cards facilitate sample collection in remote locations and simplify sample transport, thus, you can collect samples in the field without worrying about refrigeration.
Captured nucleic acids are used for downstream experiments by simply taking a small punch from the FTA® Card, wash with FTA® Purification Reagent and rinse with TE buffer (Roti®-Stock 100 x TE Buffer, Art. No. 1052.1). DNA on the washed punch is ready for use in a variety of applications given below. Genomic DNA stored on FTA® Cards at room temperature for over 14 years (and counting) has been successfully amplified by PCR. For RNA, being more sensitive than DNA, we recommend rapid analysis after only few weeks' storage at room temperature.

FTA® Cards contain chemicals that lyse cells, denature proteins and protect nucleic acids from nucleases, oxidative and UV damage. FTA® Cards rapidly inactivate organisms, including blood borne pathogens, and prevent the growth of bacteria and other microorganisms. Each card can be used for archival storage or multiple downstream applications of 1-2 (MINI) and 1-4 (CLASSIC) independent samples.

Suitable for blood, cultivated cells, buccal cells, plant material, bacteria, microorganisms, tissue and tissue homogenisations, virions, M13 plaques and more.

Applications: Storage of genomic DNA samples and libraries, collection of nucleic acid from animal tissue or cell cultures, or from plants or microorganisms during in-field-experiments.

Downstream-Experiments: E. g. PCR, real-time PCR, SNP and STR analysis, transgenetic identification, whole genome amplification, HLA typing, and genotyping **in** forensics, molecular biology, food and agriculture testing, drug discovery, genomics, species identification, and more.

FTA® CloneSaver Cards

Made by GE Healthcare.
Speciality cards for space- and time-saving archival storage and isolation of Plasmid and BAC DNA. Originally Whatman.

- Capture DNA in one easy step by simply applying the samples (recombinant bacteria, glycerol stocks etc.) to the card
- Captured nucleic acid is easily accessible for downstream applications
- DNA collected on FTA® CloneSaver Cards is stable for years at room temperature
- Store up to 96 clones on each card
- Standard 96well plate format and compatible with multi-channel pipettors

Apply few µl bacterial culture, resuspended colony or glycerol stock. Cells are lysed and plasmid or BAC DNA is stabilized for long-term storage or immediate processing. Captured nucleic acids are used for downstream experiments without the need for culture regrowth and plasmid purification. Simply take a small punch from the FTA® Card and wash with TE buffer (Roti®-Stock 100x TE Buffer, Art. No. 1052.1). DNA on the washed punch is ready for elution or for direct use in PCR, transformation, amplification by rolling circle followed by sequencing, and so on.
WGK 2

FTA® Purification Reagent ready-to-use

ready-to-use, for molecular biology

For purification of nucleic acids stored on FTA® Cards. Originally Whatman.
Simple and rapid purification of nucleic acids stored on FTA® Cards.
Ensures superior quality DNA for PCR or SNP analysis.
Removes heme, PCR inhibitors and other potential contaminants.
WGK 2

CL99.1	500 ml	plastic	379,00 €

Harris Uni-Core Punches

Made by GE Healthcare.
GE Healthcare's disposable Uni-Core Punch addresses your laboratory's manual punching requirements. Designed for use with Whatman FTA® Cards, FTA® Elute Cards, and EasiCollect device.

Uni-Core Punch is a disposable punch which has a polished steel tip that is case-hardened and can be sterilized. Each tip provides up to 500 punches before disposal. Uni-Core Punch is available in diameters from 1,0 to 6,0 mm for a variety of sampling needs. It is housed in a plastic handle and disposable for contamination control. Stainless steel cutting edges enable manual coring, retrieval, and controlled ejection of the FTA punch. Manual punching is preferred for laboratories with low sample volumes punching 1 to 50 samples per day.

Very easy application: By pressing the Micro tip down a tiny slice is punched from the FTA® card. This DNA containing sample is then washed and directly applied to downstream experiments.

Two cutting mats are included in the small packages (4 punches). Colour of the punches supplied may differ to that shown in the picture.

FTA® Foam Tip Applicator S

Made by GE Healthcare.
For application of saliva and buccal cells to FTA® Cards. Originally Whatman.

Sterile. Non-abrasive foam head is same size as sample area on FTA® Cards and is, therefore, best suited for application of buccal samples. The oral mucosa is grazed with the foam head, which is then pressed onto the card field. We recommend the use of FTA® Cards with colour indicator (CLASSIC Art. No. CL 91.1 and MINI Art. No. CL94.1) for buccal and saliva samples.

Art. No.	Pack Qty	€
HP14.1	100	94,50

FTA® Pouches

Made by GE Healthcare.
For transporting or storing FTA® Cards. Originally Whatman.

Seven laminated layers protect the card from exposure to gas or liquid contamination. Tamper-evident seal maintains sample security. Outer paper surface for labelling or writing.
CloneSaver pouches only: with additional resealable zip-lock closure.

Enzymes

Ribonuclease A

DNAse-free | Protease-free

90 U/mg (Kunitz), BioScience-Grade, free from salt

Acc. to Hirs, extracted from bovine pancreas.

RNase A

M ~13 700 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

Extracted from bovine pancreas for RNA separation, especially when isolating RNAfree DNA. The enzyme cleaves RNA and produces 3' terminal nucleoside phosphates. This quality product for molecular biology is free from salt, without proteases and is chromatographically homogeneous.
Unit definition acc. to Kunitz.
DNAse content of the RNAse powder ist below detection limit. However, we nevertheless recommend pretreatment of the ribonuclease prior to using it for DNA isolation. DNAse free RNAse ist prepared by cooking the water-solubilised ribonuclease aliquots for 15 min.
Let cool to room temperature on bench top.

Application:
Stock solution: 10 mg/ml in water (pH ≤6,0) or 0,01 M sodium acetate (pH 5,2). Do not heat RNAse prepared in sodium acetate.
Working solution: 2-10 µg/ml in 10 mM Tris (pH 7,5), 15 mM NaCl.
Note: RNAse precipitates when concentrated solutions are heated/cooked at pH ≥7,0.
Store in aliquots at -20 °C.

7156.1	100 mg	glass	75,80 €
7156.2	500 mg	glass	335,95 €
7156.3	1 g	glass	553,65 €

Ribonuclease

>70 U/mg (Kunitz), free from salt and protease

Purified by chromatography, for biochemistry.

RNase

Storage temp.: -20 °C • Transport temp.: room temp.

Extracted from bovine pancreas; free from salt, without proteases and chromatographically cleaned with specific activity of 70 U/mg (Kunitz). RNAse mixture containing approx. 70-80 % RNAse A.

Application:
Stock solution: 10 mg/ml in water
Working solution: 5-20 µg/ml in 10 mM Tris (pH 7,5), 15 mM NaCl.
DNAse free RNAse ist prepared by cooking the solubilised ribonuclease aliquots for 15 min. Let cool to room temperature on bench top and store in aliquots at -20 °C.

7164.1	100 mg	glass	31,10 €
7164.2	1 g	glass	213,95 €

Lysozyme

≥35000 FIP U/mg, BioScience-Grade, lyophilised

From chicken egg white, free from albumin.

M ~14000 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

Danger H334

Salt and albumin free lyophilised powder. Quality product for molecular biology. Ideal for lysis of bacteria for preparing DNA.
1 FIP-Unit equals the amount of enzyme which reduces the absorbance by 0.001 per min. at 450 nm, 25 °C, pH 7.00 using a suspension of FIP *Micrococcus lysodeikticus* as substrate (acc. to *Pharmaceutical Enzymes* 1997).
1 FIP-Unit resembles approximately 1 Shugar-Unit.

8259.3	25 g	glass	321,45 €
8259.2	10 g	glass	170,95 €

▶ For further information on these enzymes see chapter Biochemistry!

Zymolyase® 20T

≥20 U/mg, for biochemistry and molecular biology

For lysis of yeast cells. Isolated from *Arthrobacter luteus*.

Lyticase, β-1,3-glucan laminaripentaohydrolase

Storage temp.: +4 °C • Transport temp.: cooled

Zymolyase® 20T, produced by a submerged culture of *Arthrobacter luteus,* has strong lytic activity against living cell walls of various strains of yeast cells. Hence, it is frequently used in order to produce protoplasts or spheroplasts.
The essential enzyme for the lytic activity of Zymolyase®20T is β-1,3-glucan laminaripentaohydrolase. It hydrolyzes linear glucose polymers with β-1,3-linkages and releases specifically laminaripentaose as the main and minimum product unit. Zymolyase® 20T is prepared by ammonium sulfate precipitatation.
One unit of lytic activity is defined as the enzyme amount causing a decrease of 30 % in absorbance at 800 nm using 6 mg Brewer's yeast as substrate in Phosphate buffer (pH 7,5) at 25 °C. Lytic activity varies depending on the particular yeast strain, the growth stage of the yeast, and cultural conditions.

Application:
Other enzymatic activities contained: β-1,3-glucanase, protease, mannanase. Trace amounts of amylase, xylanase, phosphatase.
Stability: At 30 °C 70 % of the lytic activity is lost after 3 months.
Optimum temperature and pH: at pH 7,5 - 35 °C for lysis of viable yeast cells, at pH 6,5 - 45 °C for hydrolysis of yeast glucan.
Specificity (lytic spectrum): *Ashbya, Candida, Debaryomyces, Eremothecium, Endomyces, Hansenula, Hanseniaspora, Kloeckera, Kluyveromyces, Lipomyces, Metschnikowia, Pichia, Pullularia, Torulopsis, Saccharomyces, Saccharomycopsis, Saccharomycodes, Schwanniomyces*, etc.

Precipitation & Concentration

Glycogen DNA-free

lyophilised, from oysters

For molecular biology and biochemistry.

Glycogen type 2.
Long-chain polysaccharide made of glucose. Most frequently used in biochemistry and as 'carrier' during precipitation of nucleic acids.
Recovery of precipitated DNA is significantly enhanced by addition of 50 µg/ml glycogen; even starting from solutions with very low DNA concentrations, efficient precipitation can be performed.
Contains no nucleic acid and doesn't hinder enzymatic *down-stream* applications.
Glycogen contains a central protein and should not be applied if DNA is to be used in protein binding-assays following precipitation. In these cases we recommend to use our glycogen-free coprecipitants.
Stock solution: 5 mg/ml in distilled, sterile water
Working concentration: 50 µg/ml

Type analysis:

Appearance. ..... bright powder
Origin. ..... oysters
Solubility (0,25 %, 1 M NaCl). ..... complies
Loss on drying. ..... ≤15 %

Tips for Application of Precipitation Salts

Precipitation Salts	Stock solution	Amount applied	Recommended for	Not recommended for
Ammonium acetate	7.5 M	1/2 volume	Removal of nucleotides or other contaminants	Kinase downstream experiments (phosphorylation)
Lithium chloride	8.0 M	1/10 volume	RNA precipitation	Very small RNA
Sodium acetate	3.0 M (pH 5.2)	1/10 volume	Routine DNA precipitation	Removal of nucleotides or other contaminants
Sodium chloride	5.0 M	1/20 volume	SDS containing solutions	Routine precipitations

Roti®-PinkDNA ready-to-use

for molecular biology

Synthetic co-precipitant with dye for efficient precipitation of nucleic acids.
Storage temp.: +4 °C

- **Visible pellet due to included pink dye**
- **Recovery rates of up to 99 %**
- Simply add to ethanolic nucleic acid precipitation
- Recovered DNA is immediately applicable to all standard applications
- Ready-to-use

Stained precipitation additive for recovery of DNA from all solutions by ethanolic precipitation. Recovery rates of up to 99 % can be attained even from solutions with very weak nucleic acid concentration. The incorporated dye stains the DNA (reversibly) pink and facilitates location and lossless washing of pellets. Roti®-PinkDNA is produced synthetically and is free from nucleic acids. DNA or dsRNA precipitated with Roti®-PinkDNA is highly pure and can be used directly in all standard applications such as transformation, restriction digestion, cloning, sequencing, *in vitro* transcription etc.

Suitable for all nucleic acid fragments, cyclic, and genomic DNA. Not compatible with photometric concentration measurement at 260-280 nm.

Roti®-Spin Centrifugal Devices

For purification and concentration of biomolecules and for purification of solutions.

- Applicable for nucleic acids, proteins/peptides, other biomolecules >6 kD and very small bioparticles
- Can be used to replace standard techniques like precipitation, dialysis, gel filtration, gel purification, column chromatography, gradient centrifugation etc.
- Gentle: No shearing of DNA of up to 100 kb, proteins remain native and enzymatically active
- Applicable for purification of all labelled probes (isotope-, fluorescent-, chromogenic labelling)
- Very high recovery rates of >90 % (when using devices of appropriate MWCO)

Centrifugal devices for ultrafiltration of biomolecules. The membranes made of highly chemical-resistant polyethersulfone have been tightly sealed to prevent leakage and loss of samples. Furthermore, the membranes underwent special treatment minimising the binding of biomolecules, in order to optimise sample recovery-rates.

Roti®-Spin Centrifugal Devices can be applied to a variety of applications and can be used to replace tedious and labour-intensive methods like gel filtration, gel purification or precipitation. Application is time-saving and very simple - only few centrifugal steps are necessary to concentrate and recover your sample. During this, the sample remains untouched in the upper reservoir, and cross-contamination is efficiently prevented even when large numbers of samples are handled. Centrifugation can easily be performed in the cold room or at specially designated benches like isotope laboratories or in laminar flow hoods.

MWCO:

For convenient and successful application, centrifugal devices with membranes in 4 colour-coded molecular weight cut-offs (MWCO) are available. In order to choose the appropriate MWCO please use the following thumb-rule:
Centrifugation of proteins/peptides: MWCO ≤1/3 of sample molecule size.
Centrifugation of nucleic acids: MWCO ≤ ½ sample molecule size.

Overview for selection the right pore size

MWCO	Molec. size	DNA size
3 kD	10 - 20 kD	<50 bp
10 kD	30 - 90 kD	50 - 200 bp
30 kD	90 - 180 kD	200 bp - 1 kb
100 kD	>300 kD	>1 kb

Sample volumes:

Maximum sample volume: Roti®-Spin MINI 50-500 µl
Final concentrate volume: Roti®-Spin MINI 15-20 µl

Applications (examples):

Desalting or buffer exchange following restriction digest, PCR or such; separation of free nucleotides and polymerised DNA; removal of contaminating compounds (like DNA) from stock solutions (e.g. PCR-buffers); concentration of DNA or proteins; separation of proteins of different size; sample preparation prior to HPLC.

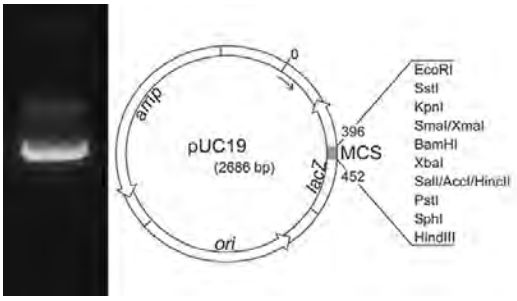
Instructions for use
can be found on the Internet next to the product description.

Plasmid DNA

The following plasmid DNA was prepared in low nuclease host bacteria and isolated through ion exchange chromatography. It is available in super-coiled form (ccc-form >95%) and, as a high-purity DNA ($OD_{260/280}$ > 1,70), it is ideal for different applications:

- Controlling transformation efficiency
- Comparison with plasmid ccc-forms of unknown size
- Cloning DNA-fragments
- Restriction (Preparing DNA-length markers)
- Calibrating DNA-separating or DNA-preparing processes or equipment
- Blocking DNA-chips with plasmid DNA of a defined sequence



Plasmid DNA pUC19

High-purity plasmid-DNA of pUC19 (pUC19c, Acc. No. L09137) with a overall length of 2686 base pairs. Lyophilised.

Storage temp.: -20 °C • Transport temp.: room temp.

$OD_{260/280}$: >1.70
genomic DNA: <2 %
oc-form: <3 %
ccc-form: >95 %
baise pairs: 2686

pUC19 is a standard high-copy cloning vector for *E. coli* recombinants. The position of the Multi Cloning Site (MCS), which is inserted in frame into the LacZ-gene, enables a blue-white selection of insert containing plasmid DNA by α-complementation. The copy number of plasmids per cell depends on the temperature and is approx. 70-80 at 37 °C and over 200 at 42 °C.

X911.1	50 µg	plastic	51,10 €

Plasmid DNA pBR322

High-purity plasmid-DNA of pBR322 (Acc. No. V01119) with a overall lenght of 4361 base pairs. Lyophilised.

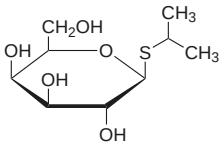
Storage temp.: -20 °C • Transport temp.: room temp.

$OD_{260/280}$: >1.70
genomic DNA: <2 %
oc-form: <3 %
ccc-form: >95 %
base pairs: 4361

The circular sequence was numbered in such a way that 0 lies in the middle of the singular *EcoR* I restriction site. The copy number of pBR322 is limited by the gene product of *rop* to 20 copies per cell. However, by adding chloroamphenicol (final concentration 170 µg/ml) to log-phase cultures and then incubating for 8 hours, the copy number can be increased considerably.

X912.1	50 µg	plastic	60,10 €

Blue-/White Selection



IPTG

≥99 %, BioScience-Grade, dioxane free, animal free

For molecular biology.

Isopropyl-β-D-thiogalactopyranoside

$C_9H_{18}O_5S$

M 238,30 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

Lactose analogon. Glucose-galactose-disaccharide. *lac*-promotor is induced by IPTG via inhibition of *lac*-repressor. Recommended for induction of *lac*-regulated vectors in expression assays, for instance blue-/white selection of recombinant *E. coli*, in bench-top as well as in production scale.

Application:
Stock solution: 0,5 M (1 g / 8,4 ml) in water (sterilise through 0,2 µm filter).
Final concentration in agar plates: 0,2 mM (add after autoclaving and cooling medium).
Final concentration in induction medium: 2 mM.

X-β-Gal

DNAse-/RNAse-/Protease-free

≥99 %, BioScience-Grade

Colorimetric substrate of β-galactosidase.
For biochemistry and molecular biology.

5-Bromo-4-chloro-3-indoxyl-β-D-galactoside

$C_{14}H_{15}BrClNO_6$

M 408,6 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

Ideal for colorimetric detection of β-galactosidase activity, for instance during blue-/white selection.

Application:
Stock solution: 100 mg/ml (240 mM) in DMF, store at -20 °C in the dark.
Working solution: For blue/white selection of recombinant clones on agar plates use 0,3 µl stock solution per ml broth/agar.

α-Complementation (blue-white selection)

Being a galacto pyranoside, IPTG inhibits the *lac* repressor, therefore leading to the induction the *lac* promotor. Subsequently, using the plasmid as matrix the C-terminal 146 amino acid fragment of the bacterial β-galactosidase is expressed, which functions as so called α-donor and complements the C-terminally deleted bacterial β-galactosidase. The then functional β-galactosidase restricts the galactoside X-Gal, resulting in a blue-coloured dye - therefore, these *lac*$^+$ clones are coloured dark blue. Since the C-terminal part of the α-donor is located **upstream** and the N-terminal part is located **downstream** of the multi cloning site of the plasmid, inserted DNA normally leads to frame shift or at least to major chain elongation, resulting in an unfunctional α-donor and no functional galactosidase - recombinant clones are white. The appearance of light blue clones either results form very short insertions or from the fact that in some plasmids the C-terminal fragment cloned upstream of the MCS is sufficient for α-complementation and restriction of a small amount of X-Gal.

α-Complementation - protocol

Stock solution

IPTG: 0.5 M (1 g /8.4 ml) in water, freeze sterile filtered and aliquoted

X-β-Gal: 100 mg/ml (240 mM) in DMF, store aliquoted and in the dark at -20 °C

Approach

Add 10 µl IPTG solution + 10 µl X-β-Gal solution per 25 ml autoclaved, cooled Agar and pour plates.

Alternatively, mix 10 µl IPTG and X-β-Gal solution with approx.100 µl sterile water and plate onto a hardened 9 cm agar petri dish.

Hybridisation

DNA Labelling

Roti®kits for DNA labelling

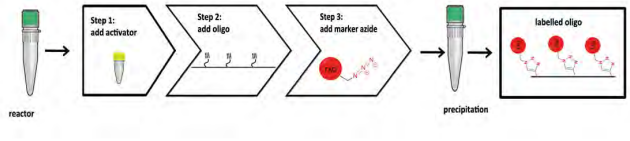
ready-to-use

For DNA labelling assays.
Transport temp.: cooled

Warning H226-H319

- Highly reliable
- Easy to perform
- Fast detection procedure (only 30 min)
- Mild conditions (no DNA denaturation required)
- Modular system due to click chemistry
- Compatible with various dyes and readouts

The ROTI®kits for DNA labelling provide an easy-to-use tool for quick labelling of oligonucleotides. For this purpose, fluorescent dyes are coupled via click reaction with uracil derivatives (mostly ethynyldeoxyuridine, EdU) which are present in the DNA. This fast and elegant approach allows for direct labelling of DNA fragments with the desired fluorescent dye. Thus, the assay is perfectly adaptable to the present facilities and to the assay situation (e.g. for double or triple detection). The protocol includes only three steps and is quick and easy to perform:



Oligonucleotides not included.

The end of the product name specifies the included fluorescent marker.

Components:

Azide. ..... 1 mg
Activator. ..... 10 µl
Reactor S..... 7 x 2,5 mg
Solvent..... 1 ml
Store at -20 °C (Azide, Activator); room temp. (Reactor S, Solvent)

Tip:
The ending of the product name specifies the included marker:

- 488: 6-FAM-Azide
- 555: 5-TAMRA-Azide
- Biotin: Biotin Azide
- Reload: no marker included

Ready-Made Buffers & Supplements

Roti®-Hybri-Quick

ready-to-use

BioScience-Grade, ready-to-use, for molecular biology

Ready-made buffer for DNA- and RNA hybridisation.

- Suitable for prehybridisation, hybridisation and washing
- For Southern- and Northern-hybridisations
- Suitable for all membrane types

Roti®-Hybri-Quick ready-to-use solution is an all-purpose solution for DNA-hybridisation experiments.
Optimised sodiumphosphate buffer with superior signal-to-noise ratio. Compatible with all Southern- and Northern-hybridisations, all labelling and detection methods, and all types of membranes. Improved buffer formulation based on the hybridisation solution published by Church & Gilbert (*PNAS USA*, 81:1991-95).

A981.1	1 l	glass	52,15 €

Roti®fair 20x SSC

for 1000 ml/pouch, for molecular biology

Concentrated buffer solution for Southern- and Northern transfer.

SSC buffer powder (pouch), Sodium sodium citrate

Exactly pre-weighed pouches for convenient and rapid preparation of SSC solution.
Prepared solution may be sterilized by filtration (0,22 µm) or autoclaving.
For long-term storage, buffer solution should be kept at +4 °C.
20x SSC solution is prepared by dissolution of 1 pouch in 1000 ml highly pure water.

Formulation:

Prepared 20x SSC solution contains: 3,0 M NaCl, 0,3 M Na-Citrat, pH-value 7,0 ±0,05, when prepared in deionized or distilled water.

1232.1	5 pouches	box	158,60 €

Roti®-Stock 20x SSC ready-to-use S

BioScience-Grade, ready-to-use, steam sterilised

For molecular biology.

SSC 20x ready-to-use solution

20fold stock solution sodium/sodiumcitrate. Undiluted or after dilution with sterile water to 10x, 6x, 1x or 0,1x SSC one receives a versatile buffer for blotting, hybridising or washing of Southern- or Dot/Slot-Blots of DNA as well as for *in situ* hybridisation. Undiluted buffer is also suitable for neutral transfer of RNA onto unloaded membranes (e.g. Roti®-Nylon 0.2, Art. No. AE50.1).
With original seal.

Composition:

3 M NaCl, 300 mM sodium citrate in deionised water, pH-value 7.0, steam sterilised

1054.1	1 l	glass	68,70 €
Original pack 6 x 1 l			65,27/1 l

Roti®fair SSPE

for 200 ml/tablet, for molecular biology

Buffer solution for DNA- and RNA hybridisation.

Sodium sodium phosphate EDTA, SSPE buffer (tablets)

Exactly pre-weighed tablets for convenient and rapid preparation of phosphate buffered salt solution (SSPE).
SSPE is frequently used for Southern- and Northern hybridisations, as well as for washing steps during Microarray techniques. Roti®fair SSPE may also be used very well in imunocytochemistry and for cell suspension prior to FACS analyses.
Prepared solution may be sterilized by filtration (0,22 µm). For long-term storage, buffer solution should be kept at +4 °C.
1x SSPE solution is prepared by dissolution of 1 tablet in 200 ml highly pure water.

Formulation:

Prepared 1x SSPE solution contains: 0,15 M NaCl, 1 mM EDTA, 10 mM Na-phosphate, pH-value 7,4 ±0,05, when prepared in deionized or distilled water.

Dextran sulphate 500 sodium salt

for biochemistry and molecular biology

Dextranhydrogensulphate 500 sodium salt

M ~500 000 g/mol

Dextran sulphate is a polyanion produced by esterification of dextran with chlorosulphonic acid. The standard product is based on dextran with a mean molecular weight of approx. 500.000 Dalton. Anionic dextrans such as dextran sulphate (10 % in hybridisation buffer) accelerate the hybridisation of nucleic acids by approx. 10fold.

Blocking Reagents

Denhardt's solution, lyophilised powder (50x)

BioScience-Grade, for molecular biology

Blocking reagent for hybridisation and stripping.

Storage temp.: +4 °C

Denhardt's lyophilised powder contains a mixture of different blocking agents that is used for nuclear acid hybridisation (Northern and Southern Blot) as well as for stripping of hybridised membranes. By prehybridisation the filter membranes with Denhardt's solution unspecific binding of DNA to the membrane is avoided.

Application: The bottle contains powder mix for 50 ml 50x stock solution. Add 48,8 ml water to gain exactly 50 ml stock solution. Sterilise stock solution by filtration (0,2 µm) and store in aliquots of 10 ml at -20 °C .
For hybridisation use 10x Denhardt's solution with 6x SSC (Roti®-Stock 20x SSC, Art. No. 1054.1) supplemented with 100 µg/ml denatured salmon sperm DNA and 1 % SDS (Roti®-Stock 20 % SDS, Art. No. 1057.1).

Roti®fair reagents

High-pure reagents and buffer mixes in pouches or as tablets.

Roti®-fair - the new range of user-friendly reagent formulations.
For simplest application, optimal quality and reproducible results.

One tablet or the content of one pouch is simply dissolved in the respective amount of water - the desired solution is ready for use. Simply adapt the amount of water in order to vary the concentration, for instance for preparation of a higher concentrated stock solution.

- **Easy-to-use**
  Simply dissolve contents of one pouch or one tablet in water
- **Timesaving**
  No need for weighing of several reagents or adjustment of pH
- **Convenient**
  Dry reagents for direct use spare preparation of long-term stored stock solutions
- **Reliable**
  Stringent quality control ensures high lot-to-lot consistency

Good's Buffer Reagents for Application in Molecular Biology

In order to compensate for the low Tris buffering capacity at pH levels below 7,5, Good and colleagues 1966 developed a new reagent group as a buffer for this range: N-substituted amino sulphonic acids[1]. Amino sulphonic acids behave like strong hybrid ions at physiological pH levels (approx. 7,0) and facilitate a large spectrum of molecular biological processes by virtue of their high buffering capacity.
The group of 'Good's buffers' also includes sulphonic acids and reagents such as bicine, tricine and AMP with higher pK_a values, thus providing buffer substances for the entire pH range between 5,5 and 11.

[1]Good *et al.* (1966) *Biochemistry* 5:467-477.

Tris Buffers

Tris (hydroxymethyl) aminomethane (or 'Tris' for short) was first described[1] in 1897 and then proposed as a pH-stabilising reagent for biological systems[2] in 1946. On account of its high water solubility, its very large buffering capacity and the fact that it behaves inertly in a large number of enzymatic reactions, it has been used for many years as a base reagent for standard buffers in all fields of molecular biology.

[1]Piloty *et* Ruff (1897) *Proc. Soc. Exp. Biol. Med.* 6:233-234.

[2]Gomori (1946) *Ber. Dtsch. Chem. Ges.* 30:1656-1665.

In addition to the original, alkaline Tris, the pre-buffered Tris hydrochloride (Tris-HCl) is also available today. 1 M Tris buffer can be manufactured directly with a defined pH buffering range through skilful mixing of Tris (alkaline) and Tris-HCl. The following table specifies the mixing ratio for each Tris.

Please note: the pH buffered by the Tris mixture depends heavily on the temperature. The values found is the literature always refer to a temperature of 25 °C (unless specified otherwise).

Biological Buffers

Roti®-Stock 100x TE

ready-to-use S

BioScience-Grade, ready-to-use, steam sterilised

For molecular biology.

TE 100x ready-to-use solution

Warning H315-H319

100fold stock solution Tris/EDTA. The most popular solution and storage buffer for DNA can be obtained by diluting 1:100 with sterile water. The accompanying EDTA inhibits traces of DNAses and therefore protects your valuable nucleic acids from degradation. However, many other enyzmes such as ligases will also be inhibited through the complexation of bivalent cations, therefore TE-buffer should not be used as a solution buffer for cloning.
With original seal.

Composition:

1 M Tris (pH 8,0), 100 mM EDTA (pH 8,0) in deionised water, steam sterilised

1052.1	1 l	glass	84,85 €
Original pack 6 x 1 l			80,61/1 l

Roti®fair 10x TE

for 1000 ml/pouch, for molecular biology

Concentrated buffer solution for solubilisation and dilution of nucleic acids.

TE buffer powder (pouch), Tris EDTA

Warning H315-H319-H335-H373

Exactly pre-weighed pouches for convenient and rapid preparation of TE solution.
Prepared solution may be sterilized by filtration (0,22 µm) or autoclaving.
For long-term storage, buffer solution should be kept at +4 °C.
1x TE solution is prepared by dissolution of 1 pouch in 1000 ml highly pure water.

Formulation:

Prepared 10x TE solution contains: 0,1 M Tris-HCl, 10 mM EDTA, pH-value 7,4 ±0,05, when prepared in deionized or distilled water.

1268.1	10 pouches	box	221,35 €

Roti®-Stock 20 % SDS

BioScience-Grade, ready-to-use, 0,2 µm filtered

For molecular biology and electrophoresis.

SDS 20 % ready-to-use solution

Danger H318-H315-H335

20 % stock solution sodium dodecyl sulphate. Store the solution away from light in a dry place. SDS-stock solution and other solutions containing SDS should not be cooled below 24 °C otherwise the SDS may precipitate. The crystals can be easily resolubilised by heating them between 30 to 50 °C.
With original seal.

Composition:

20 % SDS in deionised water, 0,2 µm filtered

1057.1	1 l	glass	143,55 €
Original pack 6 x 1 l			136,37/1 l

Water

ready-to-use | S | RNAse-/DNAse-free

BioScience Grade, nuclease-free, steam sterilised, DEPC treated water

For molecular biology.

H_2O

M 18,02 g/mol

Distilled water mixed with DEPC and steam sterilised. By DEPC Histidin residues in proteins are modified to N-carbethoxy histidin, resulting in inhibition of RNases and DNases. DEPC decomposes to CO_2 and ethanol during sterilisation.
Also available as 50 reaction tubes or as 50 glass ampoules with 1 ml each nuclease free water in a tube rack.
After autoclaving, each lot is photometrically tested for optimal purity in the wave length range relevant for nucleic acid research.

Decontamination & Purification

Roti® Nucleic Acid-free ready-to-use

ready-to-use solution for removal of nucleic acid contaminations from surfaces

Warning H315-H319

Roti®-Nucleic Acid-free was specifically designed for extensive removal of nucleic acid contaminations. Being a mild reagent, Roti®-Nucleic Acid-free may be used on tables, laboratory devices, as well as on glass and plastic wares. By incubation or by wiping, laboratory benches, heating blocks, thermocyclers, pipettor shafts, reaction tubes a.s.o. can easily be cleaned. Contamination with foreign DNA or RNA, which may heavily interfere with sensitive assays like PCR, reverse transcription or sequencing, is hence efficiently eliminated.

Roti® Nucleic Acid-free eXtra ready-to-use

ready-to-use

Gentle solution for removal of nucleic acid contaminations from surfaces.

Roti®-Nucleic Acid-free eXtra is a very gently and highly efficient solution that has been designed as nonhazardous alternative to our top-selling Roti®-Nucleic Acid-free.
The ready-to-use solution or spray may be used for fast elimination of all kinds of contaminating nucleic acids (e.g. gDNA, amplicons, plasmids, RNA) from surfaces without the need to handle dangerous liquids. By incubation or by wiping, laboratory benches, heating blocks, thermal cyclers, pipettor shafts, reaction tubes etc. can easily be cleaned.
Roti®-Nucleic Acid-free eXtra is suitable for use on a broad variety of materials for instance glass, ceramic, plastic, rubber, steel and precious metal, with the exception of light or non-ferrous metals. Contamination with foreign DNA or RNA, which may heavily interfere with sensitive assays like PCR, reverse transcription or sequencing, is hence efficiently eliminated.

DNA AWAY® ready-to-use

ready-to-use solution for removal of DNA-contaminations

Danger H314

Suitable for PCR-applications. DNA AWAY® enables speedy and safe removal of DNA-contaminations, e.g. to prevent false-positive PCR results. For decontamination of surfaces as well as of lab ware like pipettors, thermocyclers, and reaction tubes.

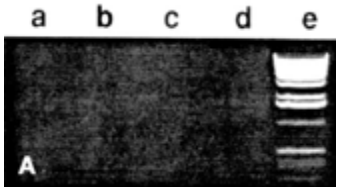

Figure A: Full removal of DNA surface contaminations after 5 minutes (1 µg dried DNA each, a-d).

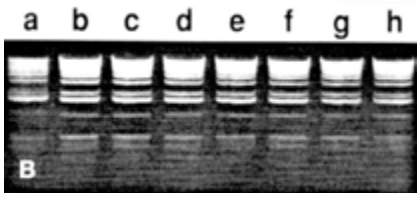

Figure B: No removal of solubilised DNA - for protection of your sample-DNA (1 µg DNA each, 5 minutes incubation).

RNase AWAY® ready-to-use

ready-to-use solution for removal of RNAse-contaminations from surfaces

Danger H314

Quick and safe removal of RNases from labware made of plastic or glass, e.g. pipettes, gel chambers, glass discs, etc.
A safe alternative to DEPC. Reduces the use of carcinogenic DEPC in the laboratory considerably. RNase AWAY® does not corrode the surface and is not carcinogenic. Creates and preserves RNase-free surfaces. No mixing, baking or time-consuming waiting. RNase AWAY® is chemically stable and requires no special storing.

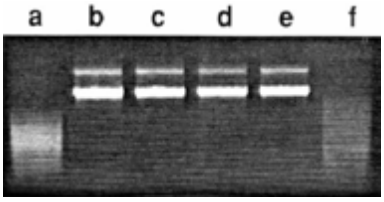

Figure: RNase-digestion of RNA (a, f), and removal of RNase by RNase AWAY® (d-e: undamaged RNA, 1µg poly(A)-RNA each).

Apply RNase AWAY® directly to surface, allow to work in, then rinse with water or dry with an RNase-free tissue cloth. For effective removing of RNases without influencing your DNA samples.

Thermal Cyclers

licenced

Thermal Cycler ³PRIME

Compact, easy-to-handle thermal cyclers for each work bench. Made by TECHNE.

- Licensed for PCR
- New, upgraded generation
- Fast heating and cooling rates
- High temperature homogeneity
- Simple, intuitive programming
- 3,5˝ colour touch screen
- USB port
- Cost-efficient
- 4 years warranty on cyclers and blocks

New generation of reliable, inexpensive thermal cyclers specially developed for use on the individual bench, for student's courses and schools.

In order to enable very rapid heating and cooling rates at extremely low temperature variations in the block, an advanced block algorithm has been implemented, regulating the modern Peltier technology. The mono-tube blocks were specially designed to provide optimal contact between the PCR-vials and the block bore hole and are cut, with the most modern of technologies, out of high-grade material. In most ³PRIME instruments, the heated lid can be adjusted to the height of the PCR-vials, thus optimising the temperature and volume constancy in the sample. Intuitive programming and the newly designed colour touch screen with very easy handling, enable both simple as well as complex cycle protocols to be entered very easily and quickly. All thermal cycler models have 1000 program slots available. With Gradient Thermal Cycler a temperature gradient may be added freely to every temperature step of the program. Further data may be found online in our detailed product instruction manual or by calling one of our staff on the service hotline.

Purchase of this instrument conveys a limited non-transferable immunity from suit for the purchaser's own internal research and development and applied fields other than human *in vitro* diagnostics under non-real-time thermal cycler patents of Applied Biosystems LLC.

Thermal Cycler PRIME

Versatile, easy-to-handle thermal cyclers for each laboratory. Made by TECHNE.

- Licensed for PCR
- New, upgraded generation
- Fast heating and cooling rates
- High temperature homogeneity
- Simple, intuitive programming
- 5,7″ colour touch screen
- 8 Peltier elements per block
- USB port
- Cost-efficient
- 4 years warranty on cyclers and blocks

New generation of versatile, inexpensive thermal cyclers for use in the laboratory.

In order to enable very rapid heating and cooling rates at extremely low temperature variations in the block, an advanced block algorithm has been implemented, regulating the modern Peltier technology. The mono-tube blocks were specially designed to provide optimal contact between the PCR-vials and can be exchanged in a matter of seconds without the need of tools. The heated lid can be adjusted to the height of the PCR-vials, thus optimising the temperature and volume constancy in the sample. The modern, intuitive programming, and the newly designed colour touch screen with very easy handling, enable both simple as well as complex cycle protocols to be entered very easily and quickly. All thermal cycler models have 1000 program slots available. With Thermal Cycler Gradient a temperature gradient may be added freely to every temperature step of the program. Further data may be found online in our detailed product instruction manual or by calling one of our staff on the service hotline.

Purchase of this instrument conveys a limited non-transferable immunity from suit for the purchaser's own internal research and development and applied fields other than human *in vitro* diagnostics under non-real-time thermal cycler patents of Applied Biosystems LLC.

Roti®-Pol DNA Polymerases

For PCR. Recombinant, heat stable DNA polymerases from the thermophilic bacteria *Thermus aquaticus* or *Pyrococcus furiosus*.

Roti®-Pol, the new series of DNA polymerases is the optimal choice for all PCR cycling protocols, as being performed in, for instance, analysis of cloning efficiency, for gene fishing, in routine screening processes, educational assays and much more. In combination with our specially designed buffers, the Roti®-Pol DNA polymerases deliver specific and reproducible PCR amplification with a wide range of PCR templates.

In addition to the **standard** Taq polymerase for PCR assays in general, the range also includes the antibody blocked **hot-start** version of the enzyme, which is recommended for particularly sequence specific approaches. This inhibited Taq polymerase is getting active only after the initial denaturation step, resulting in amplification of the target sequence without production of unwanted side products. Both Taq polymerases are available as **set of enzyme and buffer solutions** as well as premixed, 2x concentrated **master mixes**. The sets contain the DNA polymerase plus two 10x concentrated reaction buffers with $MgCl_2$, one of which has been specially designed for direct gel loading following the PCR reaction. Besides the DNA polymerase, the master mixes include dNTPs, $MgCl_2$, and all other components required for PCR except primers and template DNA, and are available in a colourless version for PCR only, plus a red ready-to-load version for subsequent direct gel electrophoresis.

With the **TaqHY** DNA polymerase we provide a modified Taq polymerase outstanding in robust performance, fast polymerisation rate and high yield of amplicons. Combining the benefits of both techniques, the **Hot-TaqHY** DNA polymerase has been designed by increasing the PCR sequence specificity of a quick and high yield modified Taq polymerase by antibody mediated inhibition.

In combination with the attached specially adjusted high fidelity buffer, the **ProofRead** polymerase delivers highly sequence-true PCR amplicons and is recommended for amplification of target sequences of high GC content, or with complex secondary structures.

All **TaqUltra** DNA polymerase are being tested on absence of DNA (bacterial genomic DNA) which makes them particularly suitable for amplification of bacterial DNA. This polymerase is also available in standard version as well as the hot-start type **Hot-TaqUltra**.

Contents

Product	Polymerase	Master mix (2x)	Reaction buffer	Art.-No.
Roti®-Pol TaqS	Standard Taq polymerase	-	colourless + red (ready to load)	9223
Roti®-Pol TaqS Mix (2x)	Standard Taq polymerase	colourless	-	9239

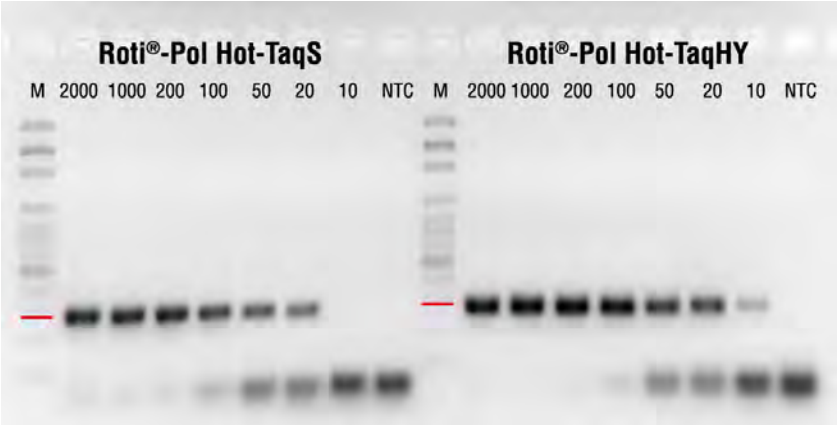
Roti®-Pol Hot-TaqUltra	DNA free, ultra pure hot start Taq polymerase	-	-	9350

Figure:
Sensitivity assay using Roti®-Pol Hot-TaqS and Hot-TaqHY, 1 U/reaction each (20 µl). 300 bp β-Actin fragment, 40 cycles. Template: 10 to 2000 pg human gDNA. Gel loading 10 µl each. M: 100 bp-DNA Ladder extended. NTC: no template control.



Roti®-Pol DNA polymerases are able to amplify PCR products up to 5 kb with genomic, viral, cDNA and plasmid DNA as template. The Taq DNA polymerases possess a 5' → 3' polymerase- as well as a 5'-flap endonuclease activity, generating amplicons with a 3'dA (adenine)-overhang which may well be used for TA-cloning purposes. In addition to the 5' → 3' polymerase activity, the Pfu DNA polymerase possesses a 3' → 5' (proof reading) exonuclease activity, rapidly substituting misincorporated bases during polymerization. These DNA fragments are blunt-ended.

For easy handling, all solutions are filled in tubes with **colour coded lids**. The red dye for direct gel loading, included in buffers and master mixes, migrates approx. as fast as a 1 kb DNA fragment in 1 % agarose gels.

Product	Purity	Application	Amplicon Ends	Art. No.	Pack Qty.	€

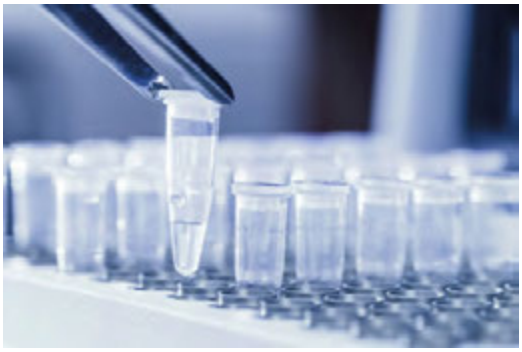
For research use only. Not approved for use in clinical or *in vitro* diagnostics.

Store at -20 °C • Transport temp.: cooled

Instructions for use
can be found on the Internet next to the product description.



Nucleotides

- Available as ready-to-use set or mix, for contamination-free applications
- Purity ≥98 % (HPLC-tested)
- Tested for “long-run-PCR“ of up to 30 kb
- DNAse-, RNAse-, Protease- and Phosphatase-free
- Free of PCR inhibitors like modified bases and tetra-pyrophosphate
- Adjusted to pH 8,5 for superior stability even during larger numbers of freeze-and-thaw cycles
- Also available adjusted to pH 7,0 for special applications (see below)
- Highly efficient enzymatic fabrication*

Applicable to
PCR, light-cycling, cDNA synthesis, labelling and primer-extension, mutagenesis-assays, sequencing reactions and *in vitro* transcription.

*of dATP, dGTP, dCTP and dUTP. dTTP ist synthesized chemically.

All Roth nucleotides are manufactured from highest-quality reagents and are most thoroughly tested for quality. This testing procedure not only includes standard-PCR (fig. 1) but also ‘longrange-PCR’ of up to 30 kb, repeated quantitative light-cycling reactions (fig. 2), and tests for physical stability (fig. 3).

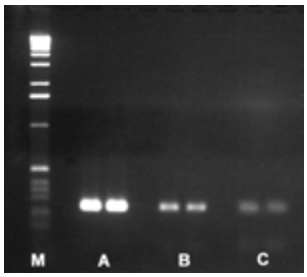


Fig. 1
Sensitivity assay I: Amplification of a 260 bp fragment of human genomic DNA with (left to right) 250 ng (A), 25 ng (B) and 2,5 ng (C) DNA as template (two replicates).

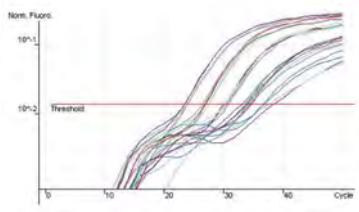

Fig. 2
Sensitivity assay II: Quantitative light-cycling-PCR on recombinant DNA with (left to right) 10 ng, 1 ng, 100 pg, 10 pg, 1 pg DNA as template (six replicates).

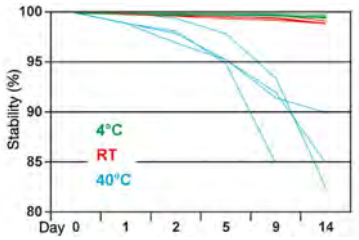

Fig. 3
Stability testing: HPLC analysis of all four dNTPs following incubation periodes of 1-14 days at different temperatures (4 °C - green; room temperature - red; 40 °C - blue). Stability of nucleotides is >99 % even after 14 days incubation at room temperature. Even after an incubation period of 9 days at 40 °C, 85 % of all nucleotide molecules are still intact.

dNTP Sets

Free of RNAses, DNAses Proteases, Phosphatases, PCR inhibitors

dNTP-Set 1
≥99 %, dATP, dTTP, dGTP, dCTP
dNTP-Set 1, composed of the nucleotide-single solutions: dATP, dTTP, dGTP, dCTP.
Concentration: 100 mM per dNTP.
Deoxynucleoside triphosphate set
Storage temp.: -20 °C • Transport temp.: cooled

K039.1	4 x 25 µmol (250 µl), 100 mM	102,05 €
K039.2	5 x 4 x 25 µmol (250 µl), 100 mM	421,95 €

dNTP-Set 1 (pH 7)
≥99 %, dATP, dTTP, dGTP, dCTP
dNTP-Set 1 (pH 7), composed of the nucleotide-single solutions: dATP, dTTP, dGTP, dCTP.
Concentration: 100 mM per dNTP, **pH 7,0 ±0,1**
Deoxynucleoside triphosphate set
Storage temp.: -20 °C • Transport temp.: cooled

0178.1	4 x 25 µmol (250 µl), 100 mM	102,05 €
0178.2	5 x 4 x 25 µmol (250 µl), 100 mM	421,95 €

dNTP-Set 2
≥99 %, dATP, dUTP, dGTP, dCTP
dNTP-Set 2, composed of the nucleotide-single solutions: dATP, dUTP, dGTP, dCTP.
Concentration: 100 mM per dNTP.
Deoxynucleoside triphosphate set
Storage temp.: -20 °C • Transport temp.: cooled

L540.1	4 x 25 µmol (250 µl), 100 mM	102,05 €
L540.2	5 x 4 x 25 µmol (250 µl), 100 mM	424,65 €

dNTP-Set 3
≥99 %, dATP, dTTP, dITP, dCTP
dNTP-Set 3, composed of the nucleotide-single solutions: dATP, dTTP, dITP, dCTP.
Concentration: 100 mM per dNTP.
Deoxynucleoside triphosphate set
Storage temp.: -20 °C • Transport temp.: cooled

P731.1	4 x 25 µmol (250 µl), 100 mM	102,05 €
P731.2	5 x 4 x 25 µmol (250 µl), 100 mM	424,65 €

Valid for all nucleotides:
Storage temp.: -20 °C
Transport temp.: cooled

dNTP Mixes ready-to-use

Roti®-Mix PCR 1

2 mM (per dNTP) dATP, dTTP, dGTP, dCTP

Roti®-Mix PCR 1, nucleotide-mixture containing dATP, dTTP, dGTP, dCTP.
Concentration: 2 mM per dNTP.
Storage temp.: -20 °C • Transport temp.: cooled

L541.1	1 ml	plastic	24,65 €
L541.2	5 x 1 ml	plastic	96,65 €

Roti®-Mix PCR 2

2 mM (per dNTP) dATP, dUTP, dGTP, dCTP

Roti®-Mix PCR 2, nucleotide-mixture containing dATP, dUTP, dGTP, dCTP.
Concentration: 2 mM per dNTP.
Storage temp.: -20 °C • Transport temp.: cooled

L542.1	1 ml	plastic	24,65 €
L542.2	5 x 1 ml	plastic	96,65 €

Roti®-Mix PCR 3

10 mM (per dNTP) dATP, dTTP, dGTP, dCTP

Roti®-Mix PCR 3, nucleotide-mixture containing dATP, dTTP, dGTP, dCTP.
Concentration: 10 mM per dNTP.
Storage temp.: -20 °C • Transport temp.: cooled

L785.1	0,2 ml	plastic	24,65 €
L785.2	5 x 0,2 ml	plastic	96,65 €
L785.3	5 x 1 ml	plastic	396,70 €

Roti®-Mix PCR 3 (pH 7)

10 mM (pro dNTP) dATP, dTTP, dGTP, dCTP

Roti®-Mix PCR 3 (pH 7), nucleotide-mixture containing dATP, dTTP, dGTP, dCTP.
Concentration: 10 mM per dNTP, **pH 7,0 ±0,1**
Storage temp.: -20 °C • Transport temp.: cooled

0179.1	0,2 ml	plastic	24,65 €
0179.2	5 x 0,2 ml	plastic	96,65 €

Roti®-Mix PCR 4

10 mM (per dNTP) dATP, dUTP, dGTP, dCTP

Roti®-Mix PCR 4, nucleotide-mixture containing dATP, dUTP,dGTP, dCTP.
Concentration: 10 mM per dNTP.
Storage temp.: -20 °C • Transport temp.: cooled

L786.1	0,2 ml	plastic	24,65 €
L786.2	5 x 0,2 ml	plastic	96,65 €

*For highly efficient Reverse Transcription

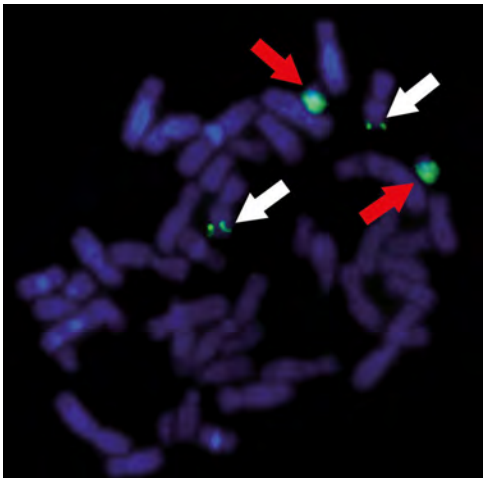

Figure:
Detection of chromosome wcp21q (whole chromosome paint, red arrows) and band 11q23 (BAC, bacterial artificial chromosome, white arrows) by FISH, labelling with fluorescein-12-dUTP.
With kind permission of PD Dr. Thomas Liehr, Institute of Human Genetics and Anthropology, Friedrich-Schiller University, Jena.

Labelled dNTPs

- Ultra pure
- Stabile
- pH 7.5
- Tested for the lack of endo- and exonucleases, ribonucleases, and phosphatases

Applications:
Non-radioactive labelling of DNA via enzymatic reactions like e.g. PCR, reverse transcription, nick-end-translation, end-labelling, or random-priming. Can be incorporated by all standard DNA-polymerases (Taq-polymerase, T4 DNA-polymerase, Klenow fragment and so on).

Biotin-11-dUTP

≥95 %, 1 mM solution

For non-radioactive, enzymatic labelling of DNA.

Biotin-aminocaproyl-[5-(3-aminoallyl)-2'-deoxyuridine-5'-triphosphate]

$C_{28}H_{42}N_6O_{17}P_3S$

M 859,65 g/mol

Storage temp.: -20 °C • Transport temp.: cooled

ε_{240} = 10.7 E x mmol^{-1} x cm^{-1}; ε_{289} = 7.1 E x mmol^{-1} x cm^{-1}; pH: 7.5 ±0.2

Biotin-11-dUTP is able to replace dTTP in growing DNA-strands and is used for efficient non-radioactive DNA-labelling. As a general rule, the labelled DNA is then detected using streptavidin-conjugates by colorimetric (e.g. streptavidin-AP) or fluorometric (e.g. fluorescein-streptavidin) assays. Biotin-11-dUTP can be used for double staining techniques in combination with rhodamine-12-dUTP or fluorescein-12-dUTP and corresponding antibodies.

1047.1	25 nmol (25 µl)	plastic	120,30 €
1047.2	50 nmol (50 µl)	plastic	202,00 €

Fluorescein-12-dUTP

≥95 %, 1 mM solution

For non-radioactive, enzymatic labelling of DNA.

Fluorescein-6-carboxyaminocaproyl-[5-(3-aminoallyl)-2'-deoxyuridine-5'-triphosphate]

$C_{39}H_{38}N_4O_{21}P_3$

M 991,66 g/mol

Storage temp.: -20 °C • Transport temp.: cooled

ε_{495} (pH 9) = 70.0 E x mmol^{-1} x cm^{-1}; pH: 7.5 ±0.2

Fluorescein-12-dUTP is able to replace dTTP in growing DNA-strands and is used for efficient non-radioactive DNA-labelling. Detection of labelled nucleic acids can be done by direct analysis of fluorescent signals (e.g. by fluorescence microscopy) or by incubation with AP-coupled anti-fluorescein antibodies.
Fluorescein-12-dUTP can also be used for double staining techniques in combination with rhodamine-12-dUTP or biotin-11-dUTP and corresponding antibodies or streptavidin-complexes, respectively.
Excitation: 494 nm
Emission: 520 nm

1048.2	50 nmol (50 µl)	plastic	328,85 €

Rhodamine-12-dUTP

≥95 %, 1 mM solution

For non-radioactive, enzymatic labelling of DNA.

Rhodamine-6-carboxyaminocaproyl-[5-(3-aminoallyl)-2'-desoxyuridine-5'-triphosphate]

$C_{39}H_{41}N_6O_{19}P_3$

M 990,7 g/mol

Storage temp.: -20 °C • Transport temp.: cooled

ε_{505} (pH 7) = 8.5 E x mmol^{-1} x cm^{-1}; pH: 7.5 ±0.2

Rhodamine-12-dUTP is able to replace dTTP in growing DNA-strands and is used for efficient non-radioactive DNA-labelling. Detection of labelled nucleic acids can easily be done by direct analysis of fluorescent signals (e.g. by fluorescence microscopy).
Rhodamine-12-dUTP can also be used for double staining techniques in combination with fluorescein-12-dUTP or biotin-11-dUTP and corresponding antibodies or streptavidin-complexes, respectively.
Rhodamine Green, mixture of 5/6 isomeres
Excitation: 505 nm
Emission: 530 nm (red)

Important information on refrigerated transports

All products identified as being particularly temperature-sensitive are shipped in **special ice boxes with freezer packs or in dry ice.**
Additional costs resulting from such, **will be invoiced** (further information on request).

Please note:
In order to guarantee optimum product quality, the dispatch of refrigerated transport products will be carried out **on Mon and Tue only outside Germany!**
Slight delays in delivery are therefore possible.

K056.5	10 g	plastic	955,70 €

UTP

≥90 %, lyophilised
Uridine-5'-triphosphate tri-sodium salt
$C_9H_{12}N_2O_{15}P_3Na_3 \cdot 3\ H_2O$
M 604,12 g/mol
Storage temp.: -20 °C • Transport temp.: cooled
ε_{262} = 10.0 E x mmol^{-1} x cm^{-1}

K055.1	100 mg	plastic	59,70 €
K055.3	1 g	plastic	239,20 €

ddNTP Set

ddNTP-Set

≥98 %, ddATP, ddCTP, ddGTP, ddTTP
ddNTP-set, composed of the nucleotid-single solutions ddATP, ddCTP, ddGTP, ddTTP.
Concentration: 10 mM per ddNTP.
Dideoxynucleoside triphosphate set
Storage temp.: -20 °C • Transport temp.: cooled
pH 8.0 ±0.5

K044.1	4 x 1 µmol (100 µl), 10 mM	plastic	155,90 €

ddNTP Solutions

ddATP solution

≥98 %, 10 mM solution
2',3'-Dideoxyadenosine-5'-triphosphate
$C_{10}H_{13}N_5O_{11}P_3$
M 472,16 g/mol
Storage temp.: -20 °C • Transport temp.: cooled
ε_{272} = 9.6 E x mmol^{-1} x cm^{-1}; pH 8.0 ±0.5

K040.1	1 µmol (100 µl)	plastic	47,85 €

ddCTP solution

≥98 %, 10 mM solution
2',3'-Dideoxycytidine-5'-triphosphate
$C_9H_{13}N_3O_{12}P_3$
M 448,13 g/mol
Storage temp.: -20 °C • Transport temp.: cooled
ε_{272} = 9.6 E x mmol^{-1} x cm^{-1}; pH 8.0 ±0.5

K043.1	1 µmol (100 µl)	plastic	47,85 €

ddGTP solution

≥98 %, 10 mM solution
2',3'-Dideoxyguanosine-5'-triphosphate
$C_{10}H_{13}N_5O_{12}P_3$
M 488,16 g/mol
Storage temp.: -20 °C • Transport temp.: cooled
ε_{252} = 13.7 E x mmol^{-1} x cm^{-1}; pH 8.0 ±0.5

K042.1	1 µmol (100 µl)	plastic	47,85 €

ddTTP solution

≥98 %, 10 mM solution
2',3'-Dideoxythymidine-5'-triphosphate
$C_{10}H_{14}N_2O_{13}P_3$
M 463,14 g/mol
Storage temp.: -20 °C • Transport temp.: cooled
ε_{267} = 9.5 E x mmol^{-1} x cm^{-1}; pH 8.0 ±0.5

K041.1	1 µmol (100 µl)	plastic	47,85 €

Reagents for PCR

Mineral Oil ready-to-use

for molecular biology

For overlaying PCR and other enzymatic reactions.

H413

Light, colourless oil, particularly suitable for overlaying PCR and other enzymatic reactions such as restriction digestion, priming reactions or whole-mount *in situ* reactions incubated in warm temperatures.
Prevents fluid loss and reduces any danger of cross-contamination.

Each batch is functionally tested for its suitability in PCR.

Type analysis:

Colour.....clear, colourless
Density (25 °C).....0,818-0,880
Viscosity (40 °C).....≤33,5 cSt
Readily carbonizable substances.....complies
Solid paraffin.....complies
Suitable for PCR.....complies

HP50.1	10 ml	glass		14,55 €
HP50.4	15 ml	dropp. bottle	TIP	24,20 €
HP50.2	50 ml	plastic		28,95 €
HP50.3	250 ml	plastic		85,90 €

Water

ROTIPURAN® Low organic

High-purity water for sample preparation in organic trace analysis and for molecular biology.

H_2O

M 18,02 g/mol

Guarantee analysis:

TOC (Total Organic Carbon).....≤20 ppb
Fluorescence (as quinine).....≤100 ppt
Optical absorbance:
200 nm.....≤0,01
254 nm.....≤0,005
300 nm.....≤0,005
400 nm.....≤0,005

HN57.1	1 l	glass	69,35 €
Original pack 6 x 1 l			65,88/1 l
HN57.2	4 l	glass	113,85 €

▶ RNAse-/DNAse free water
for molecular biology see page 1291

Ready-Made Primers

- Superior purity
- Standardised quality
- Immediately available

Roth poly d(T)$_{12-18}$ Primer

HPLC-purified, lyophilised

For sequence unspecific priming during reverse transcription.
Mix of d(T) 12 to 18mers. 5 OD_{260} units.
Storage temp.: -20 °C • Transport temp.: room temp.
Delivery includes 5 x 1 OD_{260} units (31.2 µg or 7.3 nmol DNA each) poly d(T)$_{12-18}$ Primer in one vial each and 1 ml DEPC-treated water for molecular biology (DNAse-free, RNAse-free).

HP27.1	5 tubes	53,25 €

Roth Hexanucleotide Random-Primer Mix

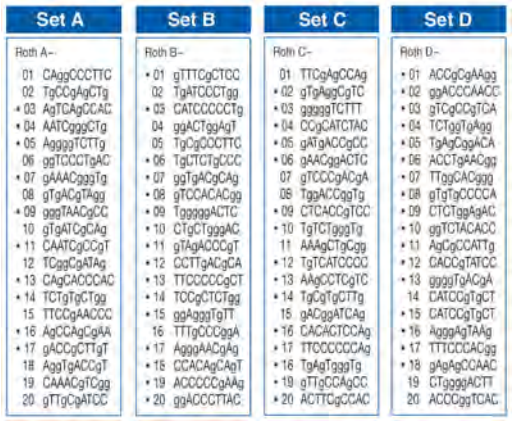
HPLC-purified, lyophilised

For random priming during probe generation or during total genome-amplification.
N_6 mix (N for A, G, C, T). 10 OD_{260} units.
Storage temp.: -20 °C • Transport temp.: room temp.
Delivery includes 10 x 1 OD_{260} units (27.4 µg or 15.3 nmol DNA each) of hexanucleotide mixture in one vial each and 1 ml DEPC-treated water for molecularbiology (DNAse-free, RNAse-free).

HP28.1	10 tubes	70,45 €

Roth Random-Primer sets for RAPD-PCR

20 x 10mer/kit. 2.0 OD_{260} units per primer, aliquoted in 2 vials each. Desalted and lyophilised.
Storage temp.: -20 °C • Transport temp.: room temp.
Primer set for rapid amplification of polymorphic DNA (RAPD)-PCR. For analysing DNA-polymorphisms or the change in genetic expression samples.
20 x 10mers with 60-80 % GC-assay.



HP22.1	1 set	Set A	206,95 €
HP23.1	1 set	Set B	206,95 €
HP24.1	1 set	Set C	206,95 €
HP25.1	1 set	Set D	206,95 €

1 OD DNA is defined as the amount of DNA recieved by lyophilisation of 1 ml solution containing DNA-concentrations of 1 OD.

Roti®fair Reagents

High-pure reagents and buffer mixes in pouches or as tablets.

Roti®fair - the new range of user-friendly reagent formulations.
For simplest application, optimal quality and reproducible results.

One tablet or the content of one pouch is simply dissolved in the respective amount of water - the desired solution is ready for use. Simply adapt the amount of water in order to vary the concentration, for instance for preparation of a higher concentrated stock solution.

- **Easy-to-use** - simply dissolve contents of one pouch or one tablet in water
- **Timesaving** - no need for weighing of several reagents or adjustment of pH
- **Convenient** - dry reagents for direct use spare preparation of long-term stored stock solutions
- **Reliable** - stringent quality control ensures high lot-to-lot consistency

Product	Buffer/solution	Use	Final conc.	pH value	Preparation scale	Art. No.	Pack Qty	€
Roti®fair BBS	Borate Buffered Saline	Coating of ELISA plates and blocking supplement	1x	8,2 ±0,05	500 ml/tablet	**1005.1**	100 tablets	265,00

For additional product data and safety information, see chapter Chemicals A-Z.

Biological Buffer Reagents

PUFFERAN® - for biochemistry, bioinorganic chemistry and molecular genetics
CELLPURE® - especially for cell culture

- Very high purity
- Dissolve easily in water and aqueous media
- No penetration or dissolution of membranes
- Low UV absorption
- No or only very weak complexing with cations
- Chemically stable
- No inhibition or activation of biological or biochemical reactions
- Minimal alteration of pH-value by temperature changes

For additional product data and safety information, see chapter Chemicals A-Z.

Please note our **Technical Information Brochure** on the Internet next to the products:

Biological Buffers

Detergents

The dissolving power of detergents is utilised to deal with a number of molecular-biological and biochemical problems.
For additional data see chapter Chemicals A-Z.

Brij® 35

for biochemisty

Non-ionic detergent.

Polyoxyethylene lauryl ether, Polyethylene glycol lauryl ether

$C_{58}H_{118}O_{24}$

M 1198,57 g/mol

Copolymer and non-ionoic detergent with polyoxyethylen goup. Highly resistant against acids and bases. Particularly suited for emulgation of fats at high or low pH values. Also well suited for protein analysis, since Brij® 35 does neither denature nor dissociate proteins.

Application:

0.5 % solution: Solubilize 0.5 g Brij® 35 in 100 ml hot water.
Tip: In case some detergent precipitates during cooling, dilute to 150 ml (0.34 % solution) and use 1.5 vol. in the assay.

Digitonin

Ultra Quality

Water soluble quality, for biochemistry. Non-ionic detergent.

$C_{56}H_{92}O_{29}$

M 1229,32 g/mol

Danger H301+H311+H331

Steroid glycoside and non-ionic detergent with high binding capacity for cholesterol. Digitonin is used for permeabilisation of plasma membranes as well as for mild solubilisation of membrane-bound proteins.
Application: Use 10 -100 µg/ml for selective permeabilisation of plasma membranes via binding of cholesterol (Mooney, R.A. (1988). *Methods Enzymol.* 159:193-2).

Enzymes

Alkaline phosphatase

≥2000 Glycine U/mg protein (approx. 6000 DEA U/mg protein)

From bovine intestinal mucosa. Solution in 50 % glycerol, 5 mM Tris/HCl, 5 mM $MgCl_2$ and 0,1 mM $ZnCl_2$, pH approx. 7,0.

Phosphatase, alkaline; ALP; AP

M ~120 000 g/mol

Storage temp.: +4 °C

One glycine unit (U) is defined as the amount of enzyme that catalyzes the hydrolysis of one µmole of p-nitrophenyl phosphate per min at pH 9.6 and 25 °C (glycine buffer).

6024.1	10 KU	plastic	375,20 €

β-Amylase

16-24 U/mg, lyophil.

Made from barley malt.

Storage temp.: +4 °C

Danger H334

1 Unit enzyme acc. to Zulkowsky releases 1 µmol maltose per minute at 25 °C (pH 4.8).

8717.1	100 mg	glass	53,65 €

Bromelain

~1200 GDU/g, for biochemistry

Made from stems of young pineapple *(Bromeliaceae)*.

Bromelin

Storage temp.: +4 °C

Danger H334-H335-H315-H319

Highly active thiol proteinase (non-specific cystein protease), glycoprotein. Enzyme from *Bromeliaceae*, used in biochemistry and for meat tenderising. Preferable digestion at lysin, alanin, tyrosin and glycin. Degrades hemoglobin, gluten, collagen, globulin, casein and gelatin at pH 4-9. Cream-coloured, hygroscopic powder. Bromelain is activated by cystein, bisufite salts, NaCN, Na_2S, H_2S and benzoate. The definite pH optimum depends on substrate and reaction parameters. pH stability of bromelain increases drastically after binding to the substrate.
One GDU (gelatin digestion unit) will hydrolyse 1.0 mg of amino nitrogen from gelatin in 20 minutes at pH 4.5 at 45 °C. One bromelain tyrosine unit (BTU) corresponds to 1.1 GDU. 1200 GDU/g correspond to approx. 2.4 FIP-units/mg.

Applications:
pH working range: 4.0-8.0
pH optimum: 5-6. Stabile at pH 3.0-6.5
Temperature optimum: 50-65 °C
Inhibitors: Hg^{++}, Ag^{++}, Cu^{++}, antitrypsin, estatin, iodacetate, TLCK, TPCK, and temperatures of over 70 °C
Stock solution: 10 mg/ml in H_2O
Unsoluble in organic solvents (acetone, ethanol, methanol etc.)
Working concentration: substrate dependent

Lysozyme

≥35000 FIP U/mg, BioScience-Grade, lyophilised

From chicken egg white, free from albumin.

M ~14000 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

Danger H334

Salt and albumin free lyophilised powder. Quality product for molecular biology. Ideal for lysis of bacteria for preparing DNA.
1 FIP-Unit equals the amount of enzyme which reduces the absorbance by 0.001 per min. at 450 nm, 25 °C, pH 7.00 using a suspension of FIP *Micrococcus luteus* as substrate (acc. to *Pharmaceutical Enzymes* 1997). 1 FIP-Unit resembles approximately 1 Shugar-Unit.

Application:
pH optimum: 6.0-7.0
Inhibitors: imidazole, indole, N-acetyl glucosamine
Working solution: 5-10 mg/ml (bacteria), 1-2 mg/ml (euk. cells)
Buffer: salt solution without detegents (0.1 M potassium phosphate buffer, 50 mM Tris buffer, 1x PBS etc.)
Temperature optimum: 37 °C
Isoelectric point: approx. 11
Lysozyme solution should be frozen only once.

Malate dehydrogenase (MDH)

≥1250 U/mg protein

From porcine heart, freeze-dried

MDH

Storage temp.: -20 °C • Transport temp.: room temp.

One unit (U) is defined as the amount of enzyme that oxidizes one µmole of NADH per min at pH 7.4 and 25 °C.

6062.1	0,05 MU	glass	146,75 €

Papain

>30 000 USP-U/mg, for biochemistry

Made from *Carica papaya.*

Storage temp.: +4 °C

Danger H334-H335-H315-H319

A non-specific endopeptidase from Papaya latex. Has a very wide substrate range and cleaves proteins more efficiently than trypsin, for example. Is capable of not only hydrolysing peptide bonds, but also acts effectively as an esterase and thiol-esterase.
30.000 USP (Casein) Units is approx. 2 FIP-Units (BAEE-Units). One USP Unit of Papain activity releases the equivalent of 1 µg tyrosine form a specified casein substrate under assay conditions specified by the USP. DTT can be used to increase the activity.

8933.1	25 g	plastic	52,15 €
8933.2	100 g	plastic	142,90 €

Pepsin

≥2000 FIP-U/g, for biochemistry

From porcine gastric mucosa. For detection of trichina in meat.
M 35000 g/mol • Storage temp.: +4 °C

Danger H334-H335-H315-H319

Acidic endopeptidase, the inactive precursor of which, pepsinogen, is produced in the stomach mucosa. Pepsin cleaves proteins preferentially at carboxylic groups of aromatic amino acids such as phenylalanine and tyrosine. Highly active pepsine is preferably used for detection of trichina in pre-digested muscle meat of animals.
1 FIP unit (≈Ph. Eur. unit) of Pepsin activity will, during incubation at 25±0.1 °C for one minute, cause decomposition of haemoglobin to an extent comparable with the colour caused by reaction of 1 micromole of tyrosine with the same dye. 2 000 FIP-Units correspond to 1: 10 000 NF-U and 1: 12 500 BP-U.

Application:
Well soluble in water, stable in aqueous solutions of pH up to 5.5, unstable above pH 6.0. Irreversible inactivated in alkaline medium. Solution is stable in temperatures of up to 60 °C, and also in higher concentrations of urea and guanidine.
pH optimum: 1-2
Isoelectric point: 1.0

Peroxidase

≥250 U/mg material

From horseradish, freeze-dried
HRP, Horseradish peroxidase
Storage temp.: -20 °C • Transport temp.: room temp.

Danger H317-H334

One unit (U) is defined as the amount of enzyme that catalyzes the production of 1 mg of purpurogallin from pyrogallol in 20 seconds at pH 6.0 and 20 °C.

6055.1	0,05 g	plastic	125,70 €

Enzyme: a neoclassical, Greek artificial word ενζυμου, *énzymon*, derived from εν-, *en-* (in-) and ζυμη, *zýmé* (yeast, sourdough, archaic)
Ferments: comes from the Latin *fermentum* (ferments, sourdough)

There are six **classes** in which all enzymes are classified according to the particular reaction they catalyse:

- *Oxidoreductases* (catalyse redox reactions)
- *Transferases* (transfer functional groups among substrates)
- *Hydrolases* (cleave bonds via addition of water)
- *Lyases/Synthases* (cleave or synthesise complex products out of basic substrates without cleavage of ATP)
- *Isomerases* (transform chemical isomers)
- *Ligases/Synthetases* (cleave or synthesise complex products out of basic substrates via cleavage of ATP)

Proteinase K

RNAse-/DNAse-free

lyophil., ≥30 mAnson U/mg

Isolated from fungi (*Tritirachium album*).
Storage temp.: +4 °C

Danger H315-H319-H334-H317-H335

A non-specific protease with strong proteolytic activity for degrading proteins in biological samples. A quality product for molecular biology with a broad scope of application.

Suitable for:
- Preparing chromosomal DNA for PFGE
- Degrading nucleases during preparation of nucleic acids (includes preparation of native RNA)

Activity: (Haemoglobin, pH 7.5; 25 °C) 30 mAnson-U/mg
Foreign activity: RNase and DNase not detectable
Optimum temperature: +65 °C.
Activity at +65 °C is ca. 12 x higher than at +25 °C.
Over +65 °C, inactivation due to denaturation.
Stability: pH 4.0-12.5.
Also stable even when denaturing agents, e.g. SDS and urea are present.
Activators: Denaturating agents (SDS, urea).
Inhibitors: Inhibition with Hg^{2+}-ions, DFP, PMSF and phenol.
Not inhibited by EDTA, sulfhydryl reagents and trypsin or chymotryps ininhibitors.
Stabilisers: Ca^{2+}-ions (1-5 mM) prevent autolysis.

Application:
Reaction buffer: 50 mM Tris-HCl; pH 7.5; 5 mM $CaCl_2$; 0.5 % SDS
Stock solution: 20 mg/ml in water
Storage temperature (stock solution): -20 °C
Working solution: 50 µg/ml
Art. No. 7528.3: A stock solution with a concentration of 20 mg/ml can be prepared directly by adding 25 ml buffer or water.

Trypsin TSE-/BSE-free

5000 USP-U/mg

Isolated from porcine pancreas, lyophilised.

M ~24000 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

Danger H334-H335-H315-H319

A pancreatic serine protease with a specificity for peptide bonds between basic amino acids arginine or lysine and another non-specific amino acid. Trypsin is frequently used to suspend cells which grow as monolayers on surfaces. Longer exposure to trypsin can damage cells, so that an inhibitor (serum or trypsin inhibitor from soya beans) should be added upon completion.
One USP Unit will cause an increase in absorption (253 nm) per minute of 0,003 at 25 °C and pH 7,6 using BAEE as substrate.
One (international) Unit (U, 255 nm, BAEE, pH 8) is approx. 90 USP U.
One TAME Unit is approx. 20 USP Units. One NF Unit is one USP Unit.
Ten „BAEE Units" are approx. 3,3 USP Units.

Application: pH optimum 7,2-8,5.

2193.1	100 mg	glass	30,00 €
2193.2	500 mg	glass	93,00 €

Trypsin

Urease

≥220 Nessler U/mg material

From jack bean, freeze-dried

M ~480000 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

One unit (U) is defined as the amount of enzyme that catalyzes the liberation of 1 µmole of NH_3 per min at pH 7.0 and 25 °C.

6065.1	0,25 MU	plastic	166,65 €

Urease

~1 U/mg, for biochemistry

From jack beans *Canavalia ensiformis*.

M ~480000 • Storage temp.: -20 °C • Transport temp.: room temp.

Hydrolase belonging to the Amidases. Metallo-enzyme. Urease hydrolasis urea, resulting in ammonia and carbon dioxide, or in ammonia- and carbonate ions, respectively. The molecule isolated from Jack beans is composed of 6 subunits of approx. 91 kD each with an overall size of approx. 544 kD. Nickel is the cofactor. Using high amounts of urea as substrate (200 mM), urease is applied for visualisation of the connection between reaction rate and time. Detection is carried out via measurement of conductivity, or, photometrically, via colour change of bromothymol blue. Furthermore, model system for catalytic activation of carbon dioxide in metallo-organic chemistry.
1 Unit enzyme hydrolyses 1 µmol urea per minute at 25 °C (pH 8.0).

Application:
pH optimum: 7.4.
Recommended reaction buffer system is 40 mM potassium phosphate buffer, pH 7.4. Heavy metals (e.g. lead) are inhibitory.

7537.1	5 g	plastic	134,40 €

Zymolyase® 100T

≥100 U/mg, for biochemistry and molecular biology

For lysis of yeast cells. Isolated from *Arthrobacter luteus*.

Lyticase, β-1,3-glucan laminaripentaohydrolase

Storage temp.: +4 °C • Transport temp.: cooled

Zymolyase® 100T, produced by a submerged culture of *Arthrobacter luteus*, has strong lytic activity against living cell walls of various strains of yeast cells. Hence, it is frequently used in order to produce protoplast or spheroplast.
The essential enzyme for the lytic activity of Zymolyase® 100T is β-1,3-glucan laminaripentaohydrolase. It hydrolyzes linear glucose polymers with β-1,3-linkages and releases specifically laminaripentaose as the main and minimum product unit. Zymolyase® 100T is prepared by ammonium sulphate precipitatation, and is further purified by affinity chromatography.
One unit of lytic activity is defined as the enzyme amount causing a decrease of 30 % in absorbance at 800 nm using 6 mg Brewer's yeast as substrate in Phosphate buffer (pH 7,5) at 25 °C. Lytic activity varies depending on the particular yeast strain, the growth stage of the yeast, and cultural conditions.

Application:
As stock solution, a 2 to 10 % (20 or 100 mg/ml) Zymolyase® solution may be prepared, solubilizing the enzyme in water, 10 mM sodiumphosphate buffer (pH 7,4) or 50 mM Tris-Cl (pH 7,5), respectively, according to the buffer system to be used downstream and containing 5 % glucose and 50 % glycerol each. The Zymolyase® tends to not dissolve completely. Do not heat for solubilization, but rather use the Zymolyase® as suspension. The suspension may be stored in aliquots at -20 °C. For use in the respective buffer system, dilute the stock solution to the working concentration of 2-5 mg/ml and optionally sterilize by filtration (0,2 µm).
In most cases, however, Zymolyase® is solubilized in freshly prepared working buffer (for instance rescue buffer 50 mM Tris-Cl, pH 7,5, 10 mM EDTA, 0,3 % β-Mercaptoethanol) in the required working concentration directly prior to use.
Avoid using nitrocellulose filters when sterilizing - Zymolyase® may be adsorbed to nitrocellulose membranes.

Other enzymatic activities contained: β-1,3-glucanase, protease, mannanase. Trace amounts of amylase, xylanase, phosphatase.
Stability: at 30 °C 70 % of the lytic activity is lost after 3 months.
Optimum temperature and pH: at pH 7,5 - 35 °C for lysis of viable yeast cells, at pH 6,5 - 45 °C for hydrolysis of yeast glucan
Specificity (lytic spectrum): *Ashbya, Candida, Debaryomyces, Eremothecium, Endomyces, Hansenula, Hanseniaspora, Kloeckera, Kluyveromyces, Lipomyces, Metschnikowia, Pichia, Pullularia, Torulopsis, Saccharomyces, Saccharomycopsis, Saccharomycodes, Schwanniomyces,* etc.

Coenzymes

Adenosin-5'-triphosphate disodium salt (ATP)

≥98 %, for biochemisty

Coenzyme of kinases.

ATP disodium salt

$C_{10}H_{14}N_5Na_2O_{13}P_3$ • M 551,10 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

Discovered in 1929 by Karl Lohmann. Main molecular currency of energy in all cells and highly important regulator of energy providing processes. During hydrolysis of phospho-anhydride bonds, energy of 30.5 kJ/mol (ADP) or 45.6 kJ/Mol (AMP), respectively, is released. Ligand of purinergic receptors and intercellular signalling molecule. Additionally, ATP is coenzyme of phosphate-transferring kinases like proteine kinases A, proteine kinases C, calmodulin-dependent kinases, and substrate of adenylate cyclases, which synthesize the second-messenger molecule cAMP.

Coenzyme Q 10

≥98 %, for biochemisty

Ubiquinone 50

$C_{59}H_{90}O_4$ • M 863,37 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

Ubiquinones represent a vital component in electron transport of the mitochondrial respiratory chain (hydrogen/electron and oxygen carriers). They, therefore, are almost ubiquitously distributed through the species, with the only exclusion of gram positive bacteria and cyanobacteria. Coenzyme Q functions as electron carrier between flavoproteins and cytochrome molecules of the respiratory chain.
Well soluble in organic solvents (e. g. acetone, diethyl ether, chloroform) and fats. Virtually insoluble in water.

Inhibitors

Enzyme inhibitors are molecules that bind to enzymes and decrease their activity. The classification of inhibitors, which can stem from various substance classes, results from the type of inhibition (reversible with subclasses, or irreversible) or the target molecule (e.g. serine protease inhibitors).
Generally, for inhibition of specific proteins in biochemical assays single specific inhibitors are used, while a suitable inhibitor cocktail is recommended for work on protein mixtures such as cellular or tissue extracts.
At Roth you will find both inhibitor cocktails for all common extracts, as well as the most important individual inhibitors.

Protease Inhibitor Cocktails
Overview and recommendations for application

Inhibitor Cocktail Standard

for biochemistry

General cocktail of protease inhibitors.
Storage temp.: -20 °C • Transport temp.: room temp.

Danger H314-H332-H373

Inhibitor cocktail for inhibition of standard proteases. Inhibits serine proteases, metalloproteases, cysteine proteases, trypsin-like proteases, and aspartic proteases.
Recommended as cocktail for protease inhibition during standard extraction without presence of special proteases, or as basic solution for supplementation with own inhibitors.

Well water-soluble. The premixed powder may easily be reconstituted in 100 ml distilled water or extraction buffer to form a 1x inhibitor solution.
End concentrations in 1x solution are:
AEBSF: 1.67 mM
EDTA: 13.44 mM
Leupeptin: 2.1 µM
Pepstatin A: 1.46 µM
Storage of inhibitor solution: 4 °C max. 90 days
Do not freeze the solution!

3743.1	1 vial	plastic	128,90 €

Inhibitor Cocktail BroadRange

for biochemistry

Broad range cocktail of protease inhibitors.
Storage temp.: -20 °C • Transport temp.: room temp.

Danger H314-H332-H373

Inhibitor cocktail for inhibition of a broad range of proteases. Inhibits serine proteases, esterases, metalloproteases, cysteine proteases, and trypsin-like proteases.
Recommended as cocktail for protease inhibition during tissue extraction.
1 vial is prepared for the inhibition of proteases from 1-2 g material.

Well water-soluble. The premixed powder may easily be reconstituted in 1 ml distilled water to form a approx. 100x inhibitor stock-solution.
Concentrations in stock-solution are:
AEBSF: 50 mM
Aprotinin: 15 µM
E-64: 100 µM
EDTA: 50 mM
Leupeptin: 100 µM
Storage of aliquoted inhibitor solution: -20 °C max. 1 month

3749.1	1 vial	plastic	55,40 €

Inhibitor Cocktail Plus

ready-to-use

ready-to-use, for biochemistry

Broad range cocktail of protease inhibitors for extracts of mammalian cells or tissue.

Storage temp.: -20 °C • Transport temp.: cooled

Warning H315-H319

Inhibitor cocktail for inhibition of a broad range of proteases. Inhibits serine proteases, esterases, aminopeptidase B, leucine-aminopeptidases, cysteine proteases, trypsin-like proteases, and aspartic proteases.
Recommended as cocktail for protease inhibition particularly in extracts from mammalian cells or tissue. 1 ml is prepared for the inhibition of proteases from 20 g cells or tissue.

Provided as stock-solution in DMSO.
Concentrations per vial are:
AEBSF: 100 mM
Aprotinin: 80 µM
Bestatin: 5 mM
E-64: 1.5 mM
Leupeptin: 2 mM
Pepstatin A: 1 mM
Storage of inhibitor solution: -20 °C max. 6 months

3751.1	1 ml	plastic	89,15 €

Inhibitor Cocktail His-tag

ready-to-use

ready-to-use, for biochemistry

Broad range cocktail of protease inhibitors for extraction of His-tagged proteins.

Storage temp.: -20 °C • Transport temp.: cooled

Danger H318-H315

Inhibitor cocktail for inhibition of a broad range of proteases. Inhibits serine proteases, aminopeptidase B, leucine-aminopeptidases, cysteine proteases, aspartic proteases, and metalloendopeptidases.
Recommended as cocktail for protease inhibition particularly for extraction of His-tagged proteins from bacterial extracts. 1 ml is prepared for the inhibition of proteases in extracts from 10 g bacterial cells. Recommended dilution approx. 1:100.

Provided as stock-solution in DMSO.
Concentrations per vial are:
AEBSF: 100 mM
Bestatin: 5 mM
E-64: 1.5 mM
Pepstatin A: 0.2 mM
Phosphoamidon: 2 mM
Storage of inhibitor solution: -20 °C max. 6 months

3760.1	1 ml	plastic	97,75 €

Inhibitor Cocktail Tissue

for biochemistry

Cocktail of protease inhibitors for extracts of mammalian cells or tissue.

Storage temp.: -20 °C • Transport temp.: room temp.

Danger H314

Inhibitor cocktail. Inhibits serine proteases, esterases, cysteine proteases, and trypsin-like proteases.
Recommended as cocktail for protease inhibition particularly in extracts from mammalian cells or tissue.

Well water-soluble and hygroscopic. The premixed powder may easily be reconstituted in 1 ml distilled water to form an inhibitor stock-solution. 1 vial is prepared for the inhibition of proteases from approx. 2 g cells or tissue. Recommended dilution is 1:100. End concentration for the respective extract has to be optimized.
Concentrations in stock-solution are:
AEBSF: 50 mM
Aprotinin: 15 µM
E-64: 100 µM
Leupeptin: 100 µM
Storage of aliquoted inhibitor solution: -20 °C max. 6 months

3755.1	1 vial	plastic	47,85 €

Inhibitor Cocktail Bacteria

for biochemistry

Broad range cocktail of protease inhibitors for extracts from bacteria.

Storage temp.: -20 °C • Transport temp.: room temp.

Danger H314

Inhibitor cocktail for inhibition of standard proteases. Inhibits serine proteases, aminopeptidase B, leucine-aminopeptidases, metalloproteases, cysteine proteases, and aspartic proteases.
Recommended as cocktail for protease inhibition in extracts from bacteria.

Well soluble in DMSO and hygroscopic. The premixed powder (Art. No. 3947) may easily be reconstituted in 1 ml DMSO and may then be diluted with 4 ml distilled water to form a slightly opaque inhibitor stock-solution. 1 vial is prepared for the inhibition of proteases from approx. 20 g *E. coli*. Recommended dilution approx. 1:40.
Concentrations in stock-solution are:
AEBSF: 20 mM
Bestatin: 1.7 mM
E-64: 200 µM
EDTA: 85 mM
Pepstatin A: 2 mM
DMSO (1 ml) for reconstitution of the lyophilized inhibitor mix is included (Art. No. 3949).
Storage of aliquoted inhibitor solution: -20 °C max. 6 months.
Contents of this Kit may not be bought separately.

3758.1	1 set	plastic	98,80 €

Individual Inhibitors

AEBSF hydrochloride

≥98 %, for biochemistry

Inhibitor of serine proteases
4-(2-Aminoethyl)benzenesulfonyl fluoride hydrochloride
$C_8H_{10}FNO_2S \cdot HCl$
M 239,69 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

Danger H314

Serine protease inhibitor. Irreversible inhibition of trypsin, chymotrypsin, plasmin, kallikrein, thrombin by sulphurizing a functional group in the active centre of an enzyme. Due to its low toxicity, AEBSF is a good alternative to PMSF.

Application:
Easily water-soluble, resulting in an acidic pH-value. Optimal at pH 6.5, alkali-labile. Avoid pH-value 7 and do not exceed pH-value 9.
Stock solution: 5-50 mg/ml (20-200 mM) in H_2O
Storage of stock solution: at -20 °C max. 6 months

4-Aminobenzamidine dihydrochloride

≥98 %, for biochemistry

Potent inhibitor of serine proteases.

p-Aminobenzamidine dihydrochloride

$C_7H_9N_3 \cdot 2\ HCl$

M 208,09 g/mol

Storage temp.: +4 °C

Warning H315-H319-H335

Competitive inhibitor of trypsin and trypsin-like enzymes, thrombin and plasmin.

Application:
Stock solution: 100-200 mg/ml (0.5-1 M) in H_2O and alcohol
Storage of stock solution at -20 °C
Working concentration: 100-400 µg/ml (0.5-2 mM)
Aminobenzamidine is sensitive to oxidation. It is recommended to prepare fresh solutions each time for use. Stock solutions should only be stored for a short time.

Antipain dihydrochloride

≥30 U/mg, for biochemistry

Inhibitor of serine/cysteine proteases and trypsin-like serine proteases.

N-(Nα-Carbonyl-Arg-Val-Arg-al)-Phe dihydrochloride

$C_{27}H_{44}N_{10}O_6 \cdot 2\ HCl$

M 677,6 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

Serine/cysteine protease inhibitor and in general of proteases similar to trypsin. Antipain was isolated from streptomycin (actinomycetes). Reversible inhibition of papain (derivation of the name: anti-papain), trypsin, cathepsin A, B, D, plasmin, chymotrypsin, pepsin and calpain I. Antipain has a similar spectrum of activity to leupeptin.

Application:
Stock solution: 50 mg/ml (75 mM in H_2O, DMSO or ethanol
Storage of stock solution: at -20 °C max. 1 month
Working concentration: 10-50 µg/ml (15-75 µM)

2933.1	5 mg	plastic	55,40 €
2933.2	25 mg	plastic	198,90 €

Aprotinin

≥3,0 PEU/mg, for biochemistry

Inhibitor of serine proteases.

M 6500 g/mol

Storage temp.: +4 °C

Inhibitor for inhibition of serine proteases, lyophilized and made of beef lung. Aprotinin inhibits trypsin, chymotrypsin, plasmin and kallikrein with high activity.
Dissolves easily in water; pH-optimum: 7.0-8.0.
Specific Activity: ≥3.0 PEU/mg corresponding to ≥5400 KIU/mg
Activity: Kininogenase Inhibitor Units (KIU) = PEU x 1800
Kininogenase Inhibitor Units (KIU) correspond to Kallikrein Inhibitor Units.

Application:
Stock solution: 1.54 mM (10 mg/ml) in H_2O or buffer
Storage of stock solution: in aliquots at -20 °C
Recommended end concentration: 1.54 µM (10 µg/ml)

A162.1	10 mg	glass	38,20 €
A162.2	50 mg	glass	111,70 €

Bacitracin

≥60 IU/mg, Ph.Eur., for biochemistry

Peptide antibiotic and protease inhibitor.

$C_{66}H_{103}N_{17}O_{16}S$

M 1422,72 g/mol

Storage temp.: +4 °C

Inhibits cell wall biosynthesis in gram-positive bacteria and *Neisseria* by interaction with murein biosynthesis.
Also used as protease-inhibitor for inhibition of the gluthatione-insuline-transhydrogenase or some endopeptidases.

Application:
Stock solution: 100-1000 mg/ml in H_2O or ethanol
Storage of stock solution at -20 °C
Working concentration: 0.1-1 mg/ml (0.07-0.7 mM)
Bacitracin is very stable in a pH range of 4-5, but is rapidly inactivated in pH of over 5 at room temperature.
Do not use at a pH of over 8.

5655.1	5 g	glass	54,75 €
5655.2	25 g	plastic	224,70 €

Benzamidine hydrochloride monohydrate

≥98 %, for biochemistry

Inhibitor of serine proteases.

$C_7H_8N_2 \cdot HCl \cdot H_2O$

M 174,63 g/mol

Storage temp.: +4 °C

Warning H315-H319-H335

Competitive inhibitor of trypsin and trypsin-like enzymes, acrosin, thrombin and plasmin.

Application:
Stock solution: 100-150 mg/ml (0.65-1 M) in H_2O and alcohol
Storage of stock solution at -20 °C
Working concentration: 150-750 µg/ml (1-5 mM)
Benzamidine is sensitive to oxidation. It is recommended to prepare fresh solutions each time for use. Stock solutions should only be stored for a short time.

Bestatin hydrochloride

≥98 %, for biochemistry

Inhibitor of aminopeptidases

N-[(2S,3R)-3-Amino-2-hydroxy-4-phenyl-buturyl]-L-leucin hydrochloride

$C_{16}H_{24}N_2O_4 \cdot HCl$

M 344,84 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

Aminopeptidase inhibitor. Competitive and specific inhibition of aminopeptidase B, leucin-aminipeptidase and triaminopeptidase.
Does not inhibit aminopeptidase A, trypsin, chymotripyin, elastase, papain, pepsin, thermolysin. Bestatin does not have an antibacterial effect and is non-fungicidal, its low toxicity making it easy to use.

Application:
Stock solution: 1-15 mM (0.35-5mg/ml) in methanol
Storage of stock solution: at -20 °C max. 1 month
Working concentration: 10-100 µM

2937.1	5 mg	plastic	78,40 €
2937.2	25 mg	plastic	279,00 €

Safety data sheets
can be found on the Internet next to the product description.

E-64

≥99 %, for biochemistry

Inhibitor of cysteine proteases.

N-[N-(L-3-trans-Carboxyoxirane-2-carbonyl)-leucyl]-agmatine,

N-(trans-Epoxysuccinyl)-L-leucine-4-guanidinobutylamide

$C_{15}H_{27}N_5O_5 \cdot 0{,}5\ H_2O$

M 357,41 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

Irreversible, strong and highly selective inhibition of cysteine protease (e.g. papain, bromelain, ficin, cathepsin B, H and L, tumor-cathepsin, calpain etc.). Does not inhibit serine proteases except trypsin. Low toxicity, high cell permeability and stability against reducing reagents makes E-64 an excellent alternative to leupeptin or antipain.

Application:
Stock solution: 1 mM (360 µg/ml) in H_2O, DMSO or ethanol
Storage of stock solution: at -20 °C max. 3 months
Working concentration: 1-10 µM

2935.1	5 mg	plastic	91,30 €
2935.2	25 mg	plastic	325,20 €

EDTA disodium salt dihydrate

≥99 %, p.a., ACS

For molecular biology and biochemistry.

Ethylenediamine tetraacetic acid disodium salt dihydrate,

Titration complex III

$C_{10}H_{14}N_2Na_2O_8 \cdot 2\ H_2O$

M 372,24 g/mol

Warning H332-H373

EDTA forms chelate complexes with Mg^{2+}-ions and other bivalent metal cations. It can therefore be applied as a general inhibitor for all enzymes which require such metal cations to function (e.g. DNases and metal proteases).

Application:
Stock solution: 0.5 M in water, pH 8.5.
Recommended final concentration for enzyme inhibition 1-10 mM.
The disodium salt of EDTA only dissolves when the pH-value is around 8.0.

▶ Geldanamycine see page 1481

Genistein

≥98 %, for biochemistry

Inhibitor of tyrosine specific protein kinases.

Prunetol, Genisteol, 4',5,7-Trihydroxyisoflavone

$C_{15}H_{10}O_5$

M 270,24 g/mol

Storage temp.: +4 °C

Competitive inhibitor of ATP binding to the catalytic domain of tyrosin kinases. Exceptional are the insulin receptor tyrosin kinase and the serin-/threonin specific proteases, which will not be inhibited by genistein. An additional, tyrosin kinase independent, effect of genistein is the inhibition of topoisomerases I and II.

Application:
Stock solution: 100 mg/ml (370 mM) in DMSO
Storage of stock solution: +4 °C oder -20 °C
Working concentration: 10-100 µM

0716.1	25 mg	plastic	64,40 €
0716.2	50 mg	plastic	94,10 €
0716.3	100 mg	plastic	155,80 €

The Mechanisms of Enzyme Inhibition

Depending on the binding of the inhibitor, you may find both *reversible* and *irreversible inhibition*.

In **reversible enzyme inhibition** the inhibitor doesn't bind closely to the enzyme and can be separated or displaced in succession. It lowers its activity and/or the speed constant of the reaction of the substrate to the product. It also establishes a balance between the enzyme-inhibitor complexes with or without substrate. Metabolic processes are typical examples of this, which, depending on the physiological state of the cells, either are enhanced or inhibited.

Competitive inhibitors are reagents which compete with substrate (A) for the binding site in the enzyme's active center and increase the Michaelis Menten constant of the enzyme. They are either extremely similar to the substrate (but are not converted and can be displaced again by the substrate) or even represent a second substrate and thereby competitively inhibit the conversion of substrate A.

In *non-competitive inhibition* the inhibitor does not bind in the active center but through binding, it changes the enzyme's tertiary structure to such an extent that a product can no longer be produced/set free.

Uncompetitive inhibition is a special case where the inhibitor can only interact with the enzyme-substrate complex and it changes both the MM-constant as well as the maximum reaction speed.

In *partial-competitive inhibition*, binding of the inhibitor lowers the affinity of the enzyme to the substrate without influencing the speed constants.

In **irreversible inhibition**, the inhibitor binds so closely that it can no longer be separated from the enzyme and thus the activity of the enzyme is permanently reduced or destroyed. Typical examples of this are protein-synthesis inhibitive antibiotics or "suicide substrates" which bind covalently to the active center.

β-Glycerophosphate disodium salt pentahydrate

≥97 %, for biochemistry

Phosphatase inhibitor

$C_3H_7Na_2O_6P \cdot 5\ H_2O$

M 306,12 g/mol

Simple organic phosphate donor and substrate for phosphatase.
As additive for cell culture media and lysis buffer.

Application:
Stock solution: 1 M (306 mg/ml) in H_2O, aliquot in 1 ml reaction vials after 0.2 µm filtration
Storage of stock solution: at -20 °C
Working concentration: 10-50 mM

6847.1	50 g	glass	50,00 €
6847.2	100 g	glass	91,95 €

Original pack 6 x 500 g			376,87/500 g

Geldanamycin

≥98 %, for biochemistry

HSP90 inhibitor, tyrosine kinase inhibitor. Benzoquinone ansamycin antibiotic. Binds specifically to the heat shock protein HSP90.

$C_{29}H_{40}N_2O_9$
M 560,64 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

The specific binding of geldanamycin to heat shock protein 90 (HSP90) and its ER homologue GP96 leads to inhibition of the chaperone, results in degradation of Hsp90 substrates and, subsequently, to deregulation of central cell mechanisms - cell cycle, cell proliferation, apoptosis/cell vitality. Geldanamycin arrests cells in G_2 phase, thus interfering with angiogenesis and oncogenesis. Due to its antitumor potential it may be used as antibiotic against several eucaryotic carcinogenic cell lines. Additionally, geldanamycin is used as inhibitor of tyrosin-kinase and during analysis of several other physiological regulatory mechanisms.

Application:
Stock solution: 1000x in DMSO or methanol
Storage of stock solution at -20 °C, max. 2 weeks at 4 °C
Working concentration: 1-10 µg/ml
Photo sensitive! Store protected from light.

HN71.1	1 mg	glass	69,80 €
HN71.2	5 mg	glass	171,50 €
HN71.3	10 mg	glass	247,15 €

Leupeptin hemisulphate

≥96,5 %, for biochemistry

Reversible inhibitor of serine- and cysteine proteases.

Acetyl-Leu-Leu-argininal
$C_{20}H_{38}N_6O_4 \cdot 0{,}5\ H_2SO_4$
M 475,99 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

Leupeptin competitively inhibits calpain, cathepsin B, kallikrein, papain, plasmin and trypsin. Inhibition of thrombin is controversely discussed. Little or non-inhibiting for pepsin, cathepsin A and D and chymotrypsin.

Application:
Stock solution: 5 mg/ml (10 mM) in H_2O, ethanol, acetic acid and DMF.
Stock solution is stabile at +4 °C for approx. 7 days.
Recommended storage of stock solution at -20 °C (6 months).
Working concentration: 0.5-50 µg/ml (1-100 µM)
Working solutions are stabile only for few hours. Due to its aldehyde groups, leupeptin may interfere with protein detection assays (e. g. Bradford).

CN33.1	10 mg	glass	47,20 €
CN33.2	25 mg	glass	97,75 €

Please note our **Technical Information Brochure** on the Internet next to the products:

Protease Inhibitors
Overview and recommendations for application

Pefabloc® SC-Protease Inhibitor

≥95 %, for biochemistry

Irreversible inhibitor of serine proteases.

4-(2-Aminoethyl)-benzylsulphonyl fluoride hydrochloride
$C_8H_{10}NSO_2F \cdot HCl$
M 239,7 g/mol

Storage temp.: +4 °C

Danger H314

Broadband inhibitor for serine proteases. Reacts covalently with the serin of the active center. Alternative to PMSF and DFP with a great number of advantages to standard inhibitors:

- Extremely low toxicity (LD_{50} >2.800 mg/kg)
- Stability in neutral range
- High solubility in aqueous buffers
- Wide spectrum of specifity for serin protease
- Minimal reaction to cell growth

Application:
Stock solution 5-50 mg/ml in water; stable with neutral pH.
Working concentration: 1-5 mM.
Pefabloc® reacts with thiols. DTT and β-mercaptoethanol reduce the inhibitory effect.

®Registered trademark of Pentapharm AG, Basel.

A154.1	100 mg	glass	70,85 €
A154.2	500 mg	glass	295,65 €
A154.3	1 g	glass	521,40 €

Proteinase Inhibitor Cocktail - General Recommendation

We recommend using the following mixture as a standard cocktail for inhibiting proteases in protein solutions. Please note, however, that it may be necessary to adapt the concentration of individual inhibitors in your experiments if the inhibitory efficiency is not adequate.

Simple inhibitor cocktail for low-protease extracts

Inhibitor	Art. No.	Conc.	Amount	Inhibition of
Aprotinin	A162	1.54 µM	10 µg/ml	Serine proteases, esterases
EDTA*	8043	10 mM	3.7 mg/ml	Metalloproteases
PMSF	6367	1 mM	147 µg/ml	Serine- and cysteine proteases
Trypsin-Inhibitor	5279	-	10 µg/ml	Trypsin and trypsin-like proteases

Broadband inhibitor cocktail for tissue extracts

Inhibitor	Art. No.	Conc.	Amount	Inhibition of
AEBSF	2931	1 mM	0.25 mg/ml	Serine proteases
Aprotinin	A162	1.54 µM	10 µg/ml	Serine proteases, esterases
Bestatin	2937	50 µM	17.5 µg/ml	Amino peptidases
E-64	2935	5 µM	1.8 µg/ml	Cysteine proteases
EDTA*	8043	10 mM	3.7 mg/ml	Metalloproteases
Leupeptin	CN33	50 µM	25 µg/ml	Serine- and cysteine proteases, trypsin-like proteases
Pepstatin A	2936	1 µM	0.7 µg/ml	Acidic proteases, aspartat proteases

*EDTA-concentration can be reduced to 0.2 mM because of downstream assays.

The inhibitors may be prepared in each case as a 100x or 1000x stock solution (see individual products for further information). Aprotinin, DTT, EDTA and the trypsin inhibitor may be mixed to a ready-to-use cocktail and aliquoted frozen at -80 °C. PMSF is not water-soluble and should be added separately to the protein solution.

Pepstatin A

≥98 %, for biochemistry

Inhibitor of acidic/aspartic proteases

Iva-Val-Val-Sta-Ala-Sta

$C_{34}H_{63}N_5O_9$

M 685,91 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

Inhibits acidic proteases (aspartat proteases). Isolated from streptomycin and other actinomycetes. Strong, highly selective inhibition of pepsin, renin, cathepsin D, chymosin, protease B and also of retroviral proteases. No inhibitive effect on thiolproteases, neutral proteases and serine proteases. Hardly toxic.

Application:
Stock solution: 1 mM (685 µg/ml) in DMSO or methanol
Storage of stock solution: at -20 °C max. 1 month, at +4 °C max. 1 week
Working concentration: 0.5-1 µM
It may be necessary to add 10-50 % acetic acid to completely dissolve pepstatin A.

2936.1	5 mg	plastic	31,10 €
2936.2	25 mg	plastic	91,95 €
2936.3	100 mg	plastic	289,20 €

Phenylmethyl sulphonyl fluoride (PMSF)

≥99 %, for biochemistry

Irreversible inhibitor of serine- and cysteine proteases.

α-Toluene sulphonyl fluoride, PMSF

$C_7H_7FO_2S$

M 174,2 g/mol

Danger H301-H314

General, irreversible inhibitor of serin proteases (chymotrypsin, trypsin and thrombin) and for the dystin-protease papain. Inhibiton by sulphonation of the serine localised in the enzymatic active site.
Reversible inhibitor of cysteine-proteases. K_i = 0.91 ±0.01 mM

Application:
Dissolves easily in isopropanol, ethanol and methanol. Not stable in aqueous solution.
Stock solution: 17.4 mg/ml (100 mM) in isopropanol, ethanol or methanol. For stock solutions of 200-250 mM heat shortly (approx. 30 mins) to 30 °C. Stock solutions should be stored at -20 °C. Short term storage of few weeks may be done at +4 °C in the dark.
Working concentration: 17-174 µg/ml (0.1-1 mM). Not stable in aqueous solutions (half-life value of 1 h at pH 7.5/RT).

At every stage of isolating or purifying the proteins, PMSF should be added fresh from the stock solution. PMSF is often not sufficient as the only protease inhibitor in the preparation to protect against decomposition processes, as for example high salt concentration (3.0 M) impairs the inhibitory effect of PMSF.
PMSF reacts with thiols. DTT and β-mercaptoethanol reduce the inhibitory effect.

For your convenience, Art. No. 6367.4 comes packed in a 30 ml brown glass bottle. Addition of 20 ml 2-propanol results in a 100 mM stock solution.

6367.1	5 g	plastic	31,10 €
6367.2	25 g	plastic	103,10 €
6367.3	100 g	plastic	289,20 €
6367.4	348 mg, in 30 ml glass bottle	TIP	14,55 €

Safety data sheets
can be found on the Internet next to the product description.

Radicicol

≥98 %, for biochemistry

Strong HSP90 inhibitor, macrolactone antibiotic. Binds specifically to the heat shock protein HSP90.

$C_{18}H_{17}ClO_6$

M 364,79 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

Danger H301-H315-H319-H335

The strong specific binding of radicicol to heat shock protein 90 (HSP90) leads to deregulation of its target mechanisms: cell cycle, cell proliferation, apoptosis/cell vitality. Also binds to yeast HSP90, *E.coli* HtpG and TRAP-1. Antifungal effects are probably caused by inactivation of chitin synthase in fungal cells.

Application:
Stock solution: 10 mg/ml (27 mM) in ethanol or DMSO
Storage of stock solution at -20 °C, max. 2 weeks at 4 °C
Working concentration: 5-300 µM
Photo sensitive! Store protected from light.

HN72.1	1 mg	glass	98,80 €
HN72.2	5 mg	glass	396,70 €
HN72.3	10 mg	glass	628,90 €

Trypsin inhibitor

≥10000 BAEE U/mg

Made from soybeans. High-activity inhibitor of trypsin, chymotrypsin, and other proteolytic enzymes.

Storage temp.: +4 °C

Trypsin inhibitor inhibits Trypsin with high effiency, and, to a lesser extent, chymotrypsin. Additionally, there is a light inhibiting effect on plasmin, kallikrein, thrombin and a few other proteolytic enzymes.
1 mg of lyophilisate inhibits at minimum 10.000 BAEE Units of trypsin.
Application in cell culture (stock solution 1 mg/ml): Following trypsination, add the same volume inhibitor solution as was used for trypsin. Zentrifuge cells (5 mins, 1000 rpm), and remove supernatant. Resuspend cells in medium and cultivate further.

Application:
Stock solution: 1-10 mg/ml in H_2O, PBS or other phosphate-buffers. Solutions of higher concentration may be hazy and slightly yellow-coloured.
Storage of stock solution: in aliquots at -20 °C.
Recommended end concentration: 1-100 µg/ml.
pH optimum: pH 7.6 - 8.0.

BCIP-p-toluidine salt / X-Phos

≥99 %, BioScience-Grade

Histochemical substrate for phosphatase.
5-Bromo-4-chloro-3-indolyl phosphate p-toluidine salt, X-Phos
$C_{15}H_{15}N_2O_4BrClP$
M 433,63 g/mol
Storage temp.: -20 °C • Transport temp.: room temp.

Warning H371

In combination with NBT ideal for colorimetric detection of alkaline phosphatase activity, in immunohistochemical procedures.
By enzymatic dephosphorylation BCIP is converted to indoxyl which subsequently tautomerizes to the ketone. In basic pH values, this ketone dimerizes and, in doing so, releases H^+ ions. The dye precipitates in the direct vicinity of the phosphatase, hence staining this site in a weak blue colour. Enhencement and darkening of this colour is achieved by adding NBT (Art. No. 4421).
Dissolves easily in dimethylformamide (20 mg/ml), hardly soluble in water.
Protect from light and humidity.

3,3',4,4'-Tetra-aminobiphenyl tetrahydrochloride,3,3'-Diaminobenzidine tetrahydrochloride
$C_{12}H_{14}N_4 \cdot 4\ HCl$
M 360,10 g/mol
Storage temp.: +4 °C

Warning H315-H319-H341-H351-H335

Popular substrate of peroxidases. DAB is used for biochemical and histological detection of endogenous peroxidases like catalase and cytochome oxidase. Additionally, it is the most common substrate for horseradish peroxidase (HRP) in histochemical and cytological assays. DAB is oxidised by HRP, forming a brown precipitate, which is unsoluble in aqueous and organic solvents. This precipitate can be detected in visible light and does not bleach during long-term storage.

Application:
Stock solution: 1-2 % (10-20 mg/ml) in 50 mM Tris buffer, pH 7.3
Storage of stock solution in aliquots at -20 °C
Working concentration: 0.05-0.1 % (0.5-1 mg/ml) DAB in buffer (PBS, TBS, pH 7.0-7.6) containing 0.01 % hydrogen peroxide
Always use freshly prepared working solution. For oxidation high concentrations of fresh hydrogen peroxide are needed.

Roti®-DAB Kit

RNAse-/DNAse-free

for immunochemistry

Substrate kit for detection of
HRP activity on blot membranes and slides.

DAB substrate kit, HRP substrate kit

Storage temp.: +4 °C • Transport temp.: cooled

Danger H302-H341-H351-H360D-H373

DAB substrate kit for detection of peroxidase (HRP) activity on immunoblots, immunohisto- and cytochemical slides and during *in situ* hybridization.
Roti®-DAB Kit contains substrate, buffer solution and activation reagent, therefore including all three solutions necessary for HRP detection reaction. Application is very simple - all three kit solutions are diluted equally in water, and the blotting filter membrane, or the slides, are then incubated in this substrate solution. Since the solutions are delivered in drop dispensers, dosing is most convenient.
DAB is oxidized by HRP, forming a brown precipitate, which is insoluble in aqueous and organic solvents. This precipitate can be detected in visible light and does not bleach during long-term storage. Addition of the DAB Metal Enhancer (Art. No. 9204) doubles the signal strength. Slides may be permanently mounted in hydrophilic, or, after dehydration, in hydrophobic mounting medium.

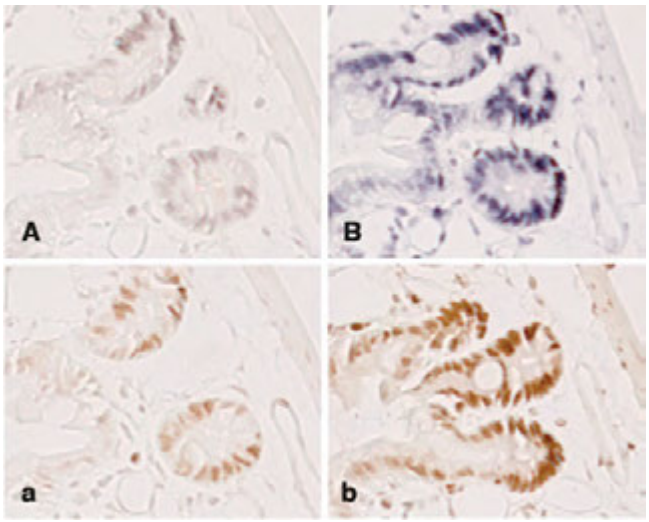

Figure 1:
Immunohistochemical staining of mouse small intestines with an anti-PCNA antibody. Minuscules: pure DAB substrate, capitals: detection supplemented by DAB enhancer (A: $NiCl_2$, B: DAB Metal Enhancer,Art. No. 9204).
A/a: Basic method using 0.6 mg/ml DAB in Tris-buffer
B/b: Detection performed with the Roti®-DAB Kit

The kit contains:
DAB solution (Art. No. 9869), DAB buffer (Art. No. 9870), and Activation reagent (Art. No. 9871) in dropper bottles. Contents of this Kit may not be bought separately.

One kit is sufficient for staining of approx. 44 minigel blot membranes or 500 slides.

Type analysis:

Application test (Blotting)	complies
RNAse	≤1 ppb
DNAse	≤1 ppm

9202.1	1 kit	cardboard	188,70 €

▶ DAB metal enhancer see page 1366

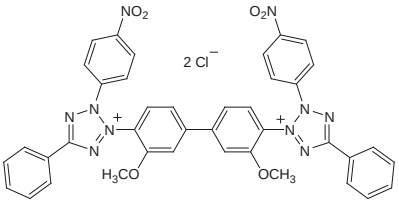
MUG

≥99 %, p.a.

Substrate for β-glucuronidase. For detection of *E. coli*.
4-Methylumbelliferyl-β-D-glucuronide dihydrate
$C_{16}H_{16}O_9 \cdot 2\ H_2O$
M 388,33 g/mol
Storage temp.: -20 °C • Transport temp.: room temp.
Ideal for fluorometric detection of β-glucoronidase hydrolysed by MUG to 4-methylumbelliferone. Detection occurs via long wave UV light (366 nm).

6394.1	50 mg	glass	23,55 €
6394.2	250 mg	glass	64,40 €
6394.3	1 g	glass	198,90 €



NBT

≥98 %, p.a.

Nitro-BT, Nitroblue tetrazolium chloride
$C_{40}H_{30}Cl_2N_{10}O_6$
M 817,65 g/mol
Storage temp.: +4 °C
Used in combination with BCIP-toluidine salt (X-phosphate) for detection of alkaline phosphatase activity by producing an indigo dye precipitate. Colour enhancer for staining with alkalic phosphatase. During dimerisation of ketonized X-Phos, H^+ ions are set free which reduce NBT to purple-coloured diformazan. Both dyes precipitate in the direct vicinity of the phosphatase, hence staining this site in a dark violet.
Store at +4 °C. Please also see assay protocol for use of BCIP/NBT in immunoblot procedures.

Application:
Stock solution: 0.5 g NBT in 10 ml 70 % dimethylformamide.
Protect from light and humidity.

4421.1	100 mg	glass	17,75 €
4421.2	500 mg	glass	44,65 €
4421.3	1 g	glass	84,85 €
4421.4	5 g	glass	306,40 €

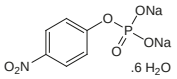
Assay protocol for use of BCIP/NBT in immunoblot procedures:

Stock solutions (All solutions are stable for at least 1 year at 4 °C):
0.5 g NBT in 10 ml 70 % dimethylformamide;
0.5 g BCIP (p-toluidine salt) in 10 ml 100 % dimethylformamide.
Incubation buffer for alkaline phosphatase:
100 mM NaCl, 5 mM $MgCl_2$,100 mM Tris (pH 9.5).

Fresh substrate solution:
66 µl NBT stock solution + 10 ml incubation buffer, mix well, add 33 µl BCIP stock solution. Use within 1 hour.

Blot development:
Approx. 10 ml substrate solution per 15 x 15 cm^2 membrane surface. Develop at room temperature until bands become visible (approx. 30 mins).

Reaction stop: Rinse with PBS/20 mM EDTA.



pNPP

≥99 %, p.a.

Substrate for alkaline phosphatase, particularly for ELISA.

p-Nitrophenyl phosphate, 4-Nitrophenyl phosphate disodium salt hexahydrate

$C_6H_4NNa_2O_6P \cdot 6\ H_2O$

M 371,12 g/mol

Storage temp.: +4 °C

Substrate of the alkaline phosphatase for use in ELISAs. Durin reaction of the substrate, a soluble, yellow product is formed that is detected photometrically at 405 nm wave length.

Application:
Working solution: 1 mg/ml in diethanolamine substrate buffer (10 mM diethanolamine, 0.5 mM $MgCl_2$, pH 9.5).
For endpoint analysis the reaction may be stopped via addition of 2-3 M NaOH.

Roti®-Lumin ultra

ready-to-use

ready-to-use, spray

Superior chemoluminescence substrate for HRP-mediated Western-Blot detection systems.

Storage temp.: +4 °C • Transport temp.: cooled

- Very easy to use
- Spray-and-go or mix by pipetting
- Superior performance for detections in lower femtogram range
- Perfectly suited for all exposition times
- Suitable for NC membranes, optimised for PVDF membranes

Significantly enhanced Western-Blot substrate based on luminol, for chemoluminescent detection of horseradish peroxidase (HRP) on membranes. Through a special, optimised composition, a particularly high signal strength is achieved for over 30 mins. with a second increase at 10 to 15 mins. after application. Roti®-Lumin ultra is, therefore, one of the most sensitive HRP-Chemoluminescence substrate available.

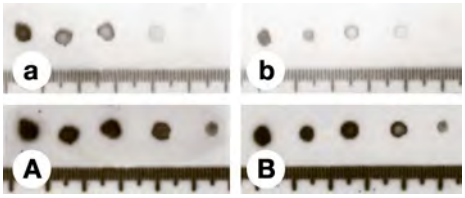

Figure:
Superior sensitivity of Roti®-Lumin ultra even with a very short exposition of 10 seconds. Detection of 2 µl each of a HRP complex in dilution series 1:1 to 1:10.
a/A: Roti®-Lumin ultra; b/B: Product of a competitor, recommended for femtogram range.
a/b: 10 sec. exposition, A/B: 5 mins. exposition.

By using pump spray bottles no time-consuming pre-mixing of solutions is required - substrate solution 1 and enhancer solution 2 are simply sprayed onto the membranes. Hereby, the spray technique guarantees a very smooth and regular distribution of the substrate on the membrane surface, hence avoiding artefacts caused by uneven distribution of pipetted substrate. The superior signal strength allows detection of proteins in single femtograms, as well as significant reduction of concentrations of expensive antibodies.

Application notes:
For a mini blot of 7 x 8 cm size 3-4 pump strokes are necessary.
- Spray the membrane with solution 1
- Afterwards spray membrane with solution 2
- Incubate approx. 1 min (wrap membrane in saran foil etc.)
- Exposition

In case passed down protocols are to be used the spray-bottles may easily be unscrewed, mixing and applying the solutions by pipetting.

A kit consists of:
20 ml (100 ml) solution 1 (Art. No. 3990) and 20 ml (100 ml) solution 2 (Art. No. 3991) in pump spray bottles. 2 x 100 ml is sufficient for approx. 10.000 cm^2 membrane (approx. 150 minigel blots).
Contents of this Kit may not be bought separately.

3734.1	1 mini kit (spray)	239,20 €
3734.2	1 kit (spray)	955,70 €

Roti®-Lumin plus ready-to-use

ready-to-use, spray

Highly efficient chemoluminescence substrate for HRP-mediated Western-Blot detection systems.

Storage temp.: +4 °C • Transport temp.: cooled

- Very easy to use
- Spray-and-go or mix by pipetting
- Optimised signal strength for detections in upper femtogram range
- Well suited for medium- and long-term exposition
- Suitable for NC membranes, optimised for PVDF membranes

Efficient Western-Blot substrate based on luminol, for chemoluminescent detection of horseradish peroxidase (HRP) on membranes. Through an optimised composition, high signal strength is achieved over a very stable plateau of over 30 mins.

By using pump spray bottles no time-consuming pre-mixing of solutions is required - substrate solution 1 and enhancer solution 2 are simply sprayed onto the membranes. Hereby, the spray technique guarantees a very smooth and regular distribution of the substrate on the membrane surface, hence avoiding artefacts caused by uneven distribution of pipetted substrate. Through the high signal strength, proteins in the upper femtogram range may be detected, while concentrations of the antibodies used may be reduced.

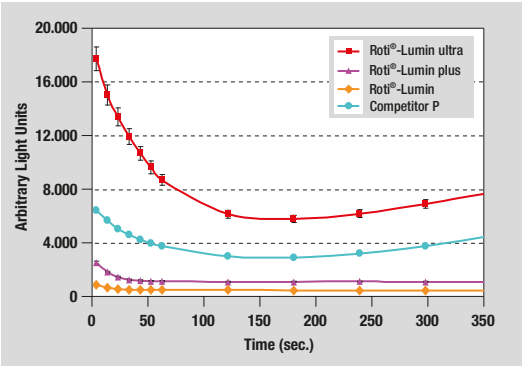

Figure:
Typical course of light emission of the Roti®-Lumins 0-5 mins. post mixing/spraying. Competitor P: Product of a competitor, recommended for femtogram range. For medium or long-term exposure we recommend use of Roti®-Lumin plus.

Application notes: see Roti®-Lumin ultra (Art. No. 3734.1).

A kit consists of:
20 ml (100 ml) solution 1 (Art. No. 3936) and 20 ml (100 ml) solution 2 (Art. No. 3937) in pump spray bottles, or of 250 ml solution 1 (Art. No. 3936) and 250 ml solution 2 (Art. No. 3937) in refill-bottles. 2 x 100 ml is sufficient for approx. 10.000 cm² membrane (approx. 150 minigel blots).
Contents of this Kit may not be bought separately.

3692.1	1 mini kit (spray)	134,95 €
3692.2	1 kit (spray)	278,45 €
3692.3	1 kit (bottles)	450,45 €

Roti®-Lumin ready-to-use

ready-to-use

Chemoluminescence substrate for peroxidase mediated detection systems.HRP substrate

Storage temp.: +4 °C

- Sensitive and reliable
- For all standard membrane types
- Low background
- No cumbersome preparation of peroxidase buffers
- Suitable for multiple stripping and reprobing

Roti®-Lumin is a kit for chemoluminescent detection of peroxidase-linked reporters (e.g. HRP-antibodies), as can be found in Western-Blot assays. In comparison to chromogen substrates, Roti®-Lumin displays increased sensitivity and reduced background reaction.

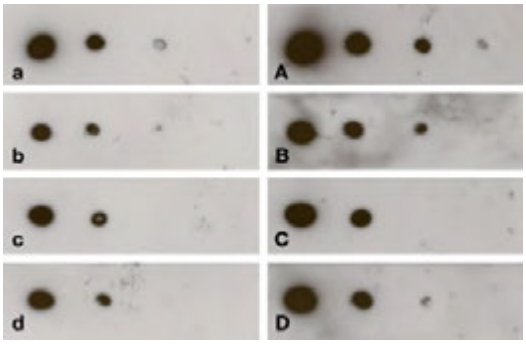

Figure:
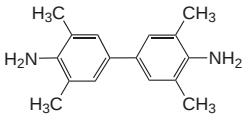
Sensitivity of Roti®-Lumins. Detection of a polyclonal antibody (left to right 4 pg, 400 fg, 40 fg, 4 fg) on Roti®-PVDF (Art. No. T830.1). Staining in PBST via a HRP-conjugated anti-rabbit antibody (1:2000).
a/A: Roti®-Lumin ultra; b/B: Roti®-Lumin plus; c/C: Roti®-Lumin;
d/D: Product of a competitor, recommended for femtogram range.
a/b/c/d: 10 sec. exposition, A/B/C/D: 1 min. exposition.

Mechanism:
Roti®-Lumin is transformed by the HRP into an excited dianion in the presence of hydrogen peroxide. When the dianion is reversed back to its normal state, light is emitted. The light emission of Roti®-Lumin reaches its maximum within 5 minutes and remains at the maximum level for approx. 1-2 hours.

Applications notes:
Roti®-Lumin consists of two solutions, which should be mixed at a 1:1 ratio before use. It can be used with nitrocellulose, nylon and PVDF membranes. Optimal results can be achieved with Immobilon-P® or Roti®-PVDF. Can be used for Western-Blotting, ELISA, Southern- Blotting, Dot-Blotting and colony hybridisation. Membranes may be stripped from bound probes using Roti®-Free stripping buffer, and may thus undergo multiple reprobing.

A kit consists of:
120 ml (25 ml) Roti®-Lumin 1 (Art. No. P079) and 120 ml (25 ml) Roti®-Lumin 2 (Art. No. P080).
Sufficient for approx. 2400 cm² (500 cm²) membrane.
Contents of this Kit may not be bought separately.

P078.2	1 mini kit	plastic	78,40 €
P078.1	1 kit	plastic	278,45 €



TMB

≥98 %, p.a.

3,3',5,5'-Tetramethylbenzidine

$C_{16}H_{20}N_2$

M 240,35 g/mol

Storage temp.: +4 °C

Used as a highly sensitive substrate for peroxidases, particularly in ELISA procedures. Can replace carcinogenic benzidine.
Dissolves easily in acetone, chloroform and ethanol.

Application:
Working solution: 1 mg TMB in 0.1 ml dimethyl sulfoxide, add 9.9 ml 0.1 M sodium acetate (pH 6). Filter and add H_2O_2 ad 0.01 %. Always prepare freshly!
Application: approx. 50 µl per 96well, incubate for 10-30 mins. at room temperature. Add 50 µl 1 M H_2SO_4 and quantitate photometrically at 450 nm (acc. to: Bos *et. al.* (1981) *J. Immunoassay* 2:187).
Protect from light.

6350.1	1 g		glass	54,75 €
6350.2	5 g		plastic	167,20 €
6350.3	25 g	BIG PACK	plastic	768,65 €

Detection of peroxidase activity (Immunoassay):

Dissolve 1 mg TMB in 0.1 ml dimethylsulfoxide (Art. No. 4720); add 9.9 ml of a 0.1 M sodium acetate solution (pH 6.0) (Powder: Art. No. 6779), filter and add H_2O_2 (Art. No. 8070) (final concentration 0.01 %).

Always prepare freshly!

Incubation 10-30 mins at room temperature (approx. 50 µl per microtitre well; finally add 50 µl 1 M H_2SO_4, Art. No. X873, per well).

Photometric quantitation at 450 nm.

TMB dihydrochloride

≥99 %, for biochemistry

Water-soluble peroxidase substrate

3,3',5,5'-Tetramethylbenzidine dihydrochloride, TMB · 2 HCl

$C_{16}H_{20}N_2 \cdot 2\ HCl$

M 313,27 g/mol

Storage temp.: +4 °C

Tetramethylbenzidine dihydrochloride is used as highly sensitive substrate for detection of horseradish peroxidase labelled probes, particularly in solution-based assays like ELISA techniques. It produces a soluble, blue-coloured end product, which can be read spectrophotometrically.
The dihydrochloride form is well water-soluble, making it a versatile tool in laborartory science.

Application:
Stock solution: 0.1 mg/ml in 50 % acetic acid or phosphate citrate buffer (50 mM NaH_2PO_4, 25 mM citric acid, pH 5.0). For solubilisation, heat to 45 °C and sonicate. Colourless.
Storage of stock sol.: At +4 °C if tightly sealed. Oxidation can be seen by colour-shift to a faint blue.
Working solution: Immediately prior to use add 2 µl / 10 ml of 30 % hydrogen peroxide. (Liem *et al.* (1979) *Anal Biochem*, 98:388-93)

X-Gluc

≥99 %, for microbiology

Glucuronidase substrate

5-Bromo-4-chloro-3-indolyl-β-D-glucuronide cyclohexyl ammonium salt monohydrate, X-GlcA

$C_{20}H_{26}N_2O_7ClBr \cdot H_2O$

M 539,81 g/mol

Storage temp.: -20 °C • Transport temp.: room temp.

For colorimetric detection of glucuronidase activity. During hydrolysis of X-gluc two molecules are formed, glucuronic acid and 5-bromo-4-chloro-indoxyle, which is then being oxidized to a deep-blue indigo-dye.
X-Gluc is used for detection of contaminations by *E. coli* bacteria in food, waters and feeds. In molecular genetics, it is widely used as marker for expression analysis of target genes.

For additional product data and safety information, see chapter Chemicals A-Z.

Albumins / BSA (Bovine Serum Albumin)

BSA are proteins yielded from blood, which function as binding and transport proteins in blood circulation. Depending on the preparation process, the albumins contain different quality and quantities of metabolic products, enzymes, peptides, fatty acids, vitamines, etc. and are suitable for different applications.

TSE-/BSE-free

Albumin Fraction V

≥98 %, powdered, for molecular biology

Wide range of applications, e.g. as protein standard or blocking reagent.

BSA

M ~66 000 g/mol

Storage temp.: +4 °C

BSA made of fresh bovine plasma by fractionation (Cohn method) and subsequent crystallisation from alcohol solution at a low temperature.

(acc. to 0.667 x cm^{-1} for a 0.1 % solution).

▶ Detailed specifications see chapter Chemicals A-Z!

Albumin Fraction V, US-Origin

≥98 %, powdered, for molecular biology and biochemistry

Suitable as blocking or stabilising reagent in all general assays. Recommended if BSA with US-Origin is required.

BSA

M ~66 000 g/mol

Storage temp.: +4 °C

Highly pure albumin of Cohn's Fraction, prepared from blood of cattle certified for US-origin. Albumin Fraction V, US-Origin may well be used for all standard assays where blocking with BSA is necessary, as well as for stabilisation of antibodies or enzymes. Many lots show exceedingly low content of protease and IgGs. BSA, US-Origin is particularly recommended if the use of albumin with certified US-Origin is dictated by process regulations. Available in large bulk format on request.
BSA made of fresh bovine plasma by fractionation (Cohn method) and subsequent crystallisation from alcohol solution at a low temperature.

Albumin Fraction V, protease-free

Protease-free

≥98 %, protease-free, for molecular biology

For all sensitive enzymatic assays.

BSA

M ~66 000 g/mol

Storage temp.: +4 °C

Excellent in sensitive immuno assays, as a stabilising reagent for proteins, enzymes and antibodies and also suitable as a blocking reagent in hybridisation techniques.
BSA produced from fresh beef plasma by fractionating in acc. with Cohn and subsequent crystallisation at low temperatures from the alcoholic solution.

Protease (hemoglobine hydrolysis) ..... **none detected**

Albumins (BSA)

Albumin Fraction V, pH 5,2

>97 %, powdered, for protein analysis

Non-neutralized albumin. Suitable as protein standard or hapten carrier, recommmended for use in ELISA and Western-Blotting.

BSA

M ~66 000 g/mol

Storage temp.: +4 °C

Albumin Fraction V, pH 5.2 is basically suitable for all applications using albumin of Cohn-fraction V, e.g. for stabilisation of enzymes and antibodies, or as hapten carrier in immunoassays. The pH value of albumin pH 5.2 is close to its pI and the protein is only weakly charged. It is, therefore, particularly recommended for use in ELISA and Western blotting, since it may help in further reducing background signals.
Manufactured from fresh beef plasma by fractionating in accordance with Cohn and subsequent crystallisation at low temperatures from the alcoholic solution.

Albumin Fraction V, biotin-free

≥98 %, biotin-free, for molecular biology

Excellent as blocking and stabilising reagent in all biotin/streptavidin-mediated detection systems.

BSA

M ~66 000 g/mol

Storage temp.: +4 °C

Tried and tested albumin preparation, suitable for all immunoassays, for stabilising proteins, enzymes and antibodies and as a blocking-reagent in hybridisation. Tested for its absence of biotin. Manufactured from fresh beef plasma by fractionating in accordance with Cohn and subsequent crystallisation at low temperatures from the alcohol solution.

Albumin Fraction V, fatty acid-free

≥98 %, fatty acid-free, for molecular biology

Excellent when working with membrane-associated proteins.

BSA

M ~66 000 g/mol

Storage temp.: +4 °C

Suitable for all immunoassays, for stabilising proteins, enzymes and antibodies and as a blocking-reagent during hybridisation. Manufactured from fresh beef plasma by fractionating in accordance with Cohn and subsequent crystallisation at low temperatures from the alcohol solution.

Albumin, fatty acid-free, US-Origin

≥98 %, fatty acid-free, for molecular biology

Suitable as blocking or stabilising reagent in all fatty acid-sensitive assays. Recommended if BSA with US-Origin is required.

BSA

M ~66 000 g/mol

Storage temp.: +4 °C

Highly pure albumin, prepared from blood of cattle certified for US-origin. Albumin, fatty acid-free, US-Origin, may well be used for blocking of all assays regarding membrane proteins, or other approaches aiming for fatty acid-associated proteins. It is also well suited for stabilisation of antibodies, enzymes or fatty acids. Albumin, fatty acid-free, US-Origin, shows exceedingly low content of endotoxins and IgGs, making it a useful reagent for cell biology also.
BSA, fatty acid-free, US-Origin is particularly recommended if the use of albumin with certified US-Origin is dictated by process regulations. Available in large bulk format on request.
For purification of Albumin, fatty acid-free, US-Origin, an extensive heat-shock/diafiltration method is used, which has been shown to bring more highly purified products than the standard process acc. to Cohn. The process is taking place in a closed system.

Albumin, IgG free

DNAse-/RNAse-/Protease-free

>98 %, IgG-free, for biochemistry and molecular biology

Recommended as blocking and stabilising reagent in all antibody-mediated detection systems.

BSA

M ~66 000 g/mol

Storage temp.: +4 °C

Albumin, highly purified and tested for presence of immunoglobulins (IgGs), proteases, RNAse, and DNAse. Albumin, IgG-free is particularly recommended for use as stabilising reagent in antibody solutions, and as blocking reagent in all assays using detection systems via antibodies. Also very well suited for stabilising of hot-start-PCRs mediated by antibodies, or as blocking reagent in antibody-detected hybridisations.

For purification of Albumin, IgG-free, an extensive heat-shock/diafiltration method is used, which has been shown to bring more highly purified products than the standard process acc. to Cohn. The process is taking place in a closed system.

Albumins (BSA)

Albumin Fraction V, endotoxin-tested

CELLPURE® >98 %, low endotoxin

With low endotoxin content. Recommended for culturing of cell lines.
BSA
M ~66 000 g/mol
Storage temp.: +4 °C
Albumin Fraction V, low endotoxin is recommended for use during culturing of eukaryotic cells.
Bovine serum albumin is basically suitable for stabilisation of all enzymes and antibodies, as well as for blocking of hybridisations and immunoassays.
Manufactured from fresh beef plasma by fractionating in accordance with Cohn and subsequent crystallisation at low temperatures from the alcohol solution.

Endotoxin content..... <15 E.U./mg

Albumin Fraction V, very low endotoxin

CELLPURE® >98 %, very low endotoxin

With extremely low endotoxin content. Recommended for the culture of primary cells and cell lines, as well as for sensitive cell culture assays.
BSA
M ~66 000 g/mol
Storage temp.: +4 °C
Albumin Fraction V, very low endotoxin is particularly recommended for use during culturing of eukaryotic cells and in cell culture assays. This albumin of superior quality is thoroughly tested for its very low endotoxin content, therefore providing trouble-free cell culture assays and reliable results even when handling primary cells or stem cells.
Bovine serum albumin is basically suitable for stabilisation of all enzymes and antibodies, as well as for blocking of hybridisations and immunoassays.
Manufactured from fresh beef plasma by fractionating in accordance with Cohn and subsequent crystallisation at low temperatures from the alcohol solution.

Lactalbumin

for microbiology

Storage temp.: +20 °C
Lactalbumin is produced by enzymatic hydrolysis of milk whey. It consists of peptides, amino acids and carbohydrates, simple and complex.
It is used in media for culturing of bacterial cells (e.g. *lactobacilli*), for tissue culture, production of vaccines and in fermentation procedures.

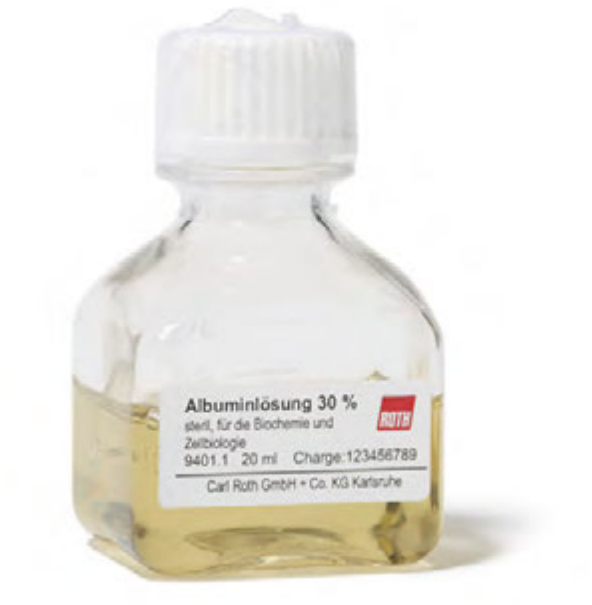
Biochemistry

Recommended Application of Albumins

Albumin	Art. No.	Recommended Application
Fraction V	8076	Stabilisation of proteins and blocking reagent in protein biochemical detection systems. Basically suitable for all assays unless specific requirements apply (see below-listed albumins).
Albumin solution 20 %	9400	Wide range of applications, e.g. as protein standard or blocking reagent. NEW
Albumin solution 30 %	9401	Wide range of applications, e.g. as protein standard or blocking reagent. NEW
Fraction V, US-Origin	3854	Stabilisation of proteins and blocking reagent in all standard biochemical detection systems. Recommended if albumin with certified origin USA has to be used.
Albumin solution 30 %, with azide, US-Origin	9414	Suitable as blocking or stabilising reagent in all general assays. Recommended if BSA with US-Origin is required. NEW
Fraction V, pH 5.2	2834	Stabilisation of proteins and blocking reagent. Particularly recommended for Western-Blotting and ELISAs.
Fraction V, protease-free	T844	Stabilisation of proteins and blocking reagent in sensitive enzymatic detection systems, activity tests or protein/protein-interaction assays. Also recommended for stabilisation of antibodies.
Fraction V, biotin-free	0163	Stabilisation of proteins and blocking reagent in all biotin / streptavidin-mediated detection systems (membrane-bound- or coating-plate-assays, as well as soluble assays).
Fraction V, fatty acid-free	0052	Stabilisation of proteins and blocking reagent in detection systems. Particularly recommended for experiments on metabolism proteins, membrane-associated proteins and cell surface proteins.
Albumin, fatty acid-free, US-Origin	9638	Stabilisation of proteins and blocking reagent, particularly for experiments on metabolism proteins, membrane-associated proteins and cell surface proteins. Also well suited for cell biology and all antibody-mediated detection systems. Recommended if albumin with certified origin USA has to be used.
Albumin, IgG-free	3737	Stabilisation of antibodies. Blocking reagent in all antibody-mediated detection systems and Radio-Immuno Assays (RIAs). Reduces false-positive signals.
Fraction V, endotoxin-tested	CP84	Cell culture, standard cell lineages, cell sorting, short-term assays.
Fraction V, very low endotoxin	CP77	Cell culture. Superior quality and purity, suitable for sensitive cells like primary cells, stem cells, cloning and 3D-cultures. Also recommended for cell stressing assays like transfections, in vitro infections, or cell fusion.
Lactalbumin	7597	Cell culture, fermentation procedures, tissue culture.

Albumin / BSA Solutions



Albumin solution 30 %

NEW ready-to-use S

30 %, sterile, for biochemistry and cell biology

Albumin fraction V. Wide range of applications, e.g. as protein standard or blocking reagent.

BSA solution

Storage temp.: +4 °C • Transport temp.: cooled

This albumin is made of fresh bovine plasma, using an extensive heat-shock/diafiltration method.

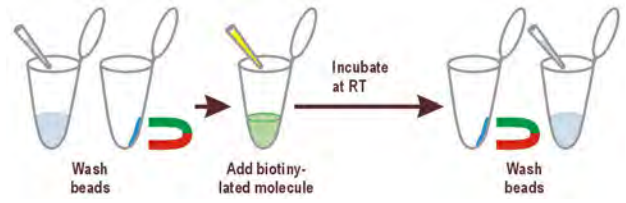
Protein Isolation

Magnetic beads for Isolation of Biotinylated Proteins

NEW

Various types of this product are available, with different mean size, streptavidin coating chemistry, and binding capacity.



MagSi-STA Trial kit

NEW

magtivio for protein biochemistry and molecular biology

Magnetic beads for capture or purification of biotinylated molecules.

Storage temp.: +4 °C

Magnetic silica particles with high quality streptavidin covalently attached to the bead surface. Applications include immunoassays and capture or purification of biotinylated molecules. The MagSi-STA Trial kit allows the screening of different types of streptavidin in parallel. The kit is especially useful when required specifications for magnetic beads are not known. This kit includes 1 mL of the 8 different MagSi-STA products and is intended for evaluation purposes during trial phase of developing new assays, or bead replacement in existing assays.

Various types of this product are available, with different mean size, streptavidin coating chemistry, and binding capacity.

Formulation:

1 ml M each of MagSi-STA 600, -STA 600 BI, -STA 1.0 L, -STA 1.0, -STA 1.0 TL, -STA 1.0 TS, -STA 3.0 L, -STA 3.0 TL.

Instructions for use

can be found on the Internet next to the product description.

Magnetic Bead Kits for individual applications

- Paramagnetic beads and surface coating reagents for custom functionalization
- Efficient and delicate coupling for many sensitive targets
- Binding only takes a few minutes
- Produces non-covalent binding that is strong even under extreme conditions
- Maximum binding interaction with large biomolecules
- Functionalized beads can be stored ready-to-use in various aqueous buffers

MagSi-Direct includes easy-to-use MagSi beads and coating solutions enabling the immobilization of your specific biological molecule to a magnetic support. With MagSi-Direct you can turn ANY molecule that interacts with a specific partner into a powerful new biomagnetic reagent. Just magnetize your molecule to unleash the power of magnetic bead technology in your research or project.
The coating of MagSi-Direct acts as a nanoglue, using non-specific electron donation from electron-rich groups of the target biomolecule including -COOH, -CONH-, -NH2, -NHR-, -NR2, -OH, -SH, -X. As a result, MagSi-Direct allows coupling of a wide variety of medium-large biological molecules, ranging from proteins such as antibodies, cell receptor proteins, lectins, peptide aptamers and enzymes to non-protein molecules. MagSi-Direct can be used in many applications, for instance in cell therapy research, in flow cytometry, in protein chemistry.
Bigger packages available on request.

MagSi-Direct 1.0 NEW

magtivio for protein biochemistry and molecular biology
Magnetic beads for covalent coupling of chosen ligands.
Storage temp.: +4 °C
Kit with magnetic silica beads of 1 µm size for covalent coupling of chosen ligands. With a mean bead diameter of 1.0 µm, MagSi-Direct 1.0 is especially suitable for immunoassays and capture reactions in volumes ≤1000 µl.

The kit contains:
Ready-to-use MagSi-Direct 1.0 beads, 10X Immobilization Buffer and Blocking Buffer. Contents of this Kit may not be bought separately.

1615.1	1 kit (2 ml beads)	cardboard	465,40 €
1615.2	1 kit (10 ml beads)	cardboard	1794,20 €

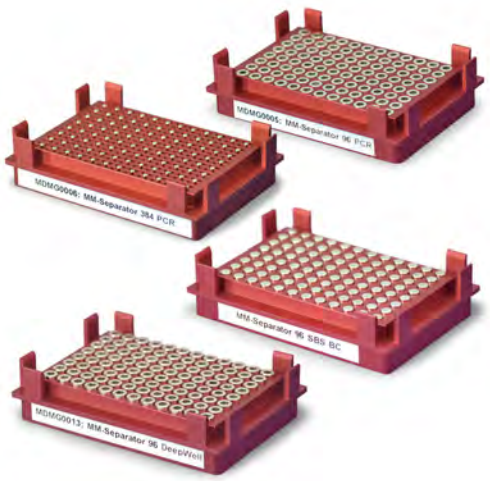
MagSi-Direct 3.0 NEW

magtivio for protein biochemistry and molecular biology
Magnetic beads for covalent coupling of chosen ligands.
Storage temp.: +4 °C
Kit with magnetic silica beads of 3 µm size for covalent coupling of chosen ligands. With a mean bead diameter of 3.0 µm, MagSi-Direct 3.0 is especially suitable for cell capture applications and capture reactions in high volumes or viscous samples.

The kit contains:
Ready-to-use MagSi-Direct 3.0 beads, 10X Immobilization Buffer and Blocking Buffer. Contents of this Kit may not be bought separately.

1620.1	1 kit (2 ml beads)	cardboard	465,40 €
1620.2	1 kit (10 ml beads)	cardboard	1794,20 €

Separators



NEW

MM-Separators for automated processing

By magtivio. Made from **aluminum**.
These MM-Separator are designed for fast and efficient collection of magnetic beads in a variety of microplates. Its SBS footprint allows placement on standard automated liquid handling workstations. Small skirts on each side of the aluminium block ensure correct and stable placement of microplates onto the separators. Compatible with 8- or 12-channel multi-pipettes.

Recommended for:
Type 96 PCR: PCR plates, U- and V-bottom microplates
Type 384 PCR: PCR microplates only. For 384 V-bottom plates, use MM-Separator 384 DeepWell
Type 96 SBS BC: U- and V-bottom microplates
Type 96 DeepWell: DeepWell microplates

Length: 133,7 cm, Breadth: 91,5 cm, Height: 3,4 cm

Type	Max. sample number	Max. volume	Min. elution volume
96 PCR	96	300 µl	20 µl
384 PCR	384	40 µl	10 µl
96 SBS BC	96	400 µl	5 µl
96 DeepWell	96	1,2 ml	5 µl

Type	Art. No.	Pack Qty.	€
96 PCR	**2162.1**	1 pieces	1548,00
384 PCR	**2166.1**	1 pieces	2386,50
96 SBS BC	**2167.1**	1 pieces	1784,50
96 DeepWell	**2169.1**	1 pieces	1548,00

MM-Separators

NEW

By magtivio. Made from acrylic glas for optimal visual inspection needs, and from chemically resistant polyoxymethylene (POM) (versions 'P') for routine use of organic solvents.

magtivio's MM-Separators are intended for magnetic separation of MagSi beads from liquid samples for isolation and purification of nucleic acids and proteins, immunoprecipitation, immunoassays (ELISA), cell sorting, and purification of biomolecules. MM-Separators are designed for optimal magnetic bead separation in terms of speed and bead pellet positioning, as well as stability and user-friendliness.

Usage:

MM-Separators M12+12 - manual use with 1.5 and 2 mL microtubes.

MM-Separators M96 - manual use with 96 well microplates and PCR plates.

MM-Separators M12+12 enable easy separation of beads from liquids for processing low amounts of samples with working volumes from 10 µl to 2 ml. In the centre, 12 magnets allow accommodation of up to 24 centrifuge tubes.

MM-Separators M96 enable easy separation of beads from liquids for multiple sample processing with 8- or 12-channel pipettes. The separators hold 24 magnets that are placed for magnetic separation of beads in 96 wells. MM-Separators M96 allow magnetic particles to be pulled to the side of wells for optimal access to the bottom and easy supernatant removal. The product is suitable for U- and V-bottom shaped 96 well microplates and for most PCR plates, skirted or semi- and non-skirted.

Type	Length (cm)	Breadth (cm)	Heigth (cm)	Weight (kg)	Max. sample number
M12+12 (P)	21,7	11,0	2,5	approx. 0,7	24
M96 (P)	12,8	8,6	2,5	approx. 0,4	96

M96 P	4	**2154.1**	1 pieces	394,55

Ultra filtration

Roti®-Spin Centrifugal Devices

For purification and concentration of biomolecules and for purification of solutions.

- Applicable for nucleic acids, proteins/peptides, other biomolecules >6 kD and very small bioparticles
- Can be used to replace standard techniques like precipitation, dialysis, gel filtration, gel purification, column chromatography, gradient centrifugation etc.
- Gentle: No shearing of DNA of up to 100 kb, proteins remain native and enzymatically active
- Applicable for purification of all labelled probes (isotope-, fluorescent-, chromogenic labelling)
- Very high recovery rates of >90 % (when using devices of appropriate MWCO)

Centrifugal devices for ultrafiltration of biomolecules. The membranes made of highly chemical-resistant polyethersulfone have been tightly sealed to prevent leakage and loss of samples. Furthermore, the membranes underwent special treatment minimising the binding of biomolecules, in order to optimise sample recovery rates.

Roti®-Spin Centrifugal Devices can be applied to a variety of applications and can be used to replace tedious and labour-intensive methods like gel filtration, gel purification or precipitation. Application is time-saving and very simple - only few centrifugal steps are necessary to concentrate and recover your sample. During this, the sample remains untouched in the upper reservoir, and cross-contamination is efficiently prevented even when large numbers of samples are handled. Centrifugation can easily be performed in the cold room or at specially designated benches like isotope laboratories or in laminar flow hoods.

MWCO:

For convenient and successful application, centrifugal devices with membranes in 4 colour-coded molecular weight cut-offs (MWCO) are available. In order to choose the appropriate MWCO please use the following thumb-rule:
Centrifugation of proteins/peptides:
MWCO ≤1/3 of sample molecule size.
Centrifugation of nucleic acids:
MWCO ≤ ½ sample molecule size.

Overview for selecting the right pore size

MWCO	Molec. size	DNA size
3 kD	10 - 20 kD	<50 bp
10 kD	30 - 90 kD	50 - 200 bp
30 kD	90 - 180 kD	200 bp - 1 kb
100 kD	>300 kD	>1 kb

Sample volumes:

Maximum sample volume: Roti®-Spin MINI 50-500 µl
Final concentrate volume: Roti®-Spin MINI 15-20 µl

Applications (examples):

Desalting or buffer exchange following restriction digest, PCR or such; separation of free nucleotides and polymerised DNA; removal of contaminating compounds (like DNA) from stock solutions (e.g. PCR-buffers); concentration of DNA or proteins; separation of proteins of different size; sample preparation prior to HPLC.

Roti®-Spin MINI

Type	MWCO (kD)	Colour	Art. No.	Pack Qty.	€

Affinity Chromatography

Roti®garose Beads and Columns for Isolation of His-tag Proteins

Ion charged agarose beads for low pressure affinity chromatography. IMAC matrix.

Immobilized metal ion affinity chromatography (IMAC) still is the most widely used method to obtain high yield of very pure proteins with reasonable effort. Roti®garose His Beads offer the perfect solution for your specific application of low flow column chromatography or protein isolation in batch mode.
The matrix of Roti®garose His Beads consists of crosslinked and beaded 6 % agarose, IDA- or NTA- conjugated and charged with divalent ions. Roti®garose His beads result in eluates with considerably low metal contamination.
Roti®garose Beads may repeatedly be regenerated, making them very cost-effective.
The matrix is stable in all commonly used reagents including denaturing and reducing reagents (like 8 M urea, 6 M guanidinium hydrochloride, 5 mM DTT).

- Simple and rapid one-step purification of His-tagged proteins from total lysates
- High recovery rate of very pure proteins
- Superior binding capacity
- Easy elution and regeneration
- Very low ion leaching
- Compatible with denaturing and reducing reagents

Nickel chelates recognize two exposed histidine tags with good specificity and very high affinity, making the Ni^{2+} charged matrix the first choice for all **standard applications**. Roti®garose His/Ni beads give **very high yields of pure proteins** with considerably low metal contamination.

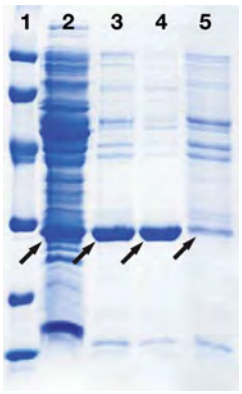

Figure: SDS-PAGE of 6xHis-fuculose aldolase, 28 kDa (arrows). Very high yield of well purified proteins.
1: Marker, 2: Protein raw extract, 3,4: 6xHis target protein purified with Roti®garose His/Ni Beads or Column, respectively, 5: 6xHis target protein purified by competitor product.

Cobalt chelates recognize two exposed, vicinal histidins with superior specificity and good affinity, resulting in acceptable to **good recovery rates, yielding proteins of superior purity**. This matrix is, therefore, the perfect choice if extremely pure proteins are required, or if hard-to-separate proteins shall be isolated.

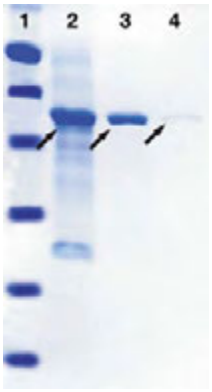

Figure: SDS-PAGE of highly expressed 6xHis-glutaryl acylase, 58 kDa (arrows). Good yield of extremely pure proteins.
1: Marker, 2: Protein raw extract, 3: 6xHis target protein purified with Roti®garose His/Co Beads, 4: 6xHis target protein purified by competitor product.

Instructions for use
can be found on the Internet next to the product description.

Nickel Charged IMAC Beads and Columns – IDA Linker

Roti®garose-His/Ni HPCartridges ready-to-use

for biochemistry

For isolation of His-tagged proteins by high pressure affinity chromatography.

Affinity chromatography colums/nickel charged, IMAC columns

Storage temp.: +4 °C

Danger H225

Prepacked cartridges with Nickel charged IDA-agarose bead matrix for medium pressure affinity chromatography (MPLC).
Optimal for automated liquid chromatography, or if proteins shall be isolated under pressure.
Suitable for ÄKTA™FPLC™ and for sample application via peristaltic pump or syringe.

- Very fast and simple purification of His-tagged proteins from total lysates
- Superior recovery rate of pure His-tagged proteins
- Binding capacity (purified 6xHis protein) of 110 mg per ml matrix
- Recommended flow rate 5 ml/min.
- Recommended pressure 5 bar [0,5 MPa] (70 psi)
- Standard ports (10-32)
- Very versatile. Applicable with ÄKTA™FPLC™, pump and syringe.
- Easy elution and regeneration
- Very low Nickel leaching
- Compatible with denaturing and reducing reagents
- For medium pressure flow chromatography

Roti®garose His/Ni HPCartridges are prepacked and may be used directly. The Matrix is stable in all commonly used reagents including denaturing and reducing reagents (like 8 M urea, 6 M guanidinium hydrochloride, 5 mM DTT). Slurry in 20 % ethanol.
Column material made from polypropylene and polyethylene (frit).
Matrix volume 5 ml, whole volume 10 ml.
For approx. 500 mg His labelled protein.

Type analysis:

Particle size.	20-50 µm
Beads (cross-linked agarose).	6 %
Ligand.	IDA
Metal ion.	nickel
Binding capacity (DHAK-6xHis).	110 mg/ml
Stabilizer.	20 % ethanol

1318.2	5x5 ml	805,20 €

Roti®garose-His/Ni Columns ready-to-use

for biochemistry

For isolation of His-tagged proteins by affinity chromatography.

Affinity chromatography colums/nickel charged, IMAC columns

Storage temp.: +4 °C

Danger H225

Prepacked columns with Nickel charged IDA-agarose bead matrix for low pressure affinity chromatography.
Suitable for all general applications, or if proteins of very small amount shall be isolated without loss.

Matrix volume 1 or 5 ml, whole volume 12 or 35 ml, respectively.
For approx. 100 and 500 mg His labelled protein.

- Fast and simple purification of His-tagged proteins from total lysates
- Superior recovery rate of pure His-tagged proteins
- Binding capacity (purified 6xHis protein) of 117 mg per ml matrix
- Easy elution and regeneration
- Very low Nickel leaching
- Compatible with denaturing and reducing reagents
- **For gravity flow chromatography**

Roti®garose His/Ni Columns are prepacked and may be used directly. The Matrix is stable in all commonly used reagents including denaturing and reducing reagents (like 8 M urea, 6 M guanidinium hydrochloride, 5 mM DTT). Slurry in 20 % ethanol.
Column material made from polypropylene and polyethylene (frit).
May be autoclaved at 121 °C for 30 mins.

Type analysis:

Particle size.	50-150 µm
Beads (cross-linked agarose).	6 %
Ligand.	IDA
Metal ion.	nickel
Binding capacity (DHAK-6xHis).	117 mg/ml
Activating agent.	Epichlorohydrin
Stabilizer.	20 % ethanol

Roti®garose-His/Ni HPBeads plus NEW

for biochemistry

For isolation of His-tagged proteins by fast or large scale affinity chromatography under presence of EDTA or DTT.

Agarose beads "high pressure" for affinity chromatography, IMAC matrix/nickel charged, Column matrix for protein isolation

Storage temp.: +4 °C

Warning H226-H319

Nickel charged agarose beads for affinity chromatography under presence of EDTA or DTT. The matrix of choice for applications under low or medium pressure, and applicable for every required sample and/or matrix volume. 50 % bead slurry in 20 % ethanol.
In Roti®garose His/Ni HPBeads plus, the advantages of the highly efficient Nickel-His binding have been combined with a bead technology allowing a very rapid flow rate. The **specially developed polychelating ligand** forms highly stabile nickel chelates, which are able to isolate His-tagged proteins even from solutions containing 20 mM EDTA or DTT - reliably and without undesired nickel stripping.
Suitable for MPLC and FPLC, or if His-tag proteins shall be isolated either in particularly short time or in big amounts from reducing solutions.

- Rapid one-step purification of very pure His-tagged proteins from total lysates
- High binding capacity for 6xHis-tagged protein
- Reliably elution and regeneration
- Minimized Nickel leaching
- Compatible with 20 mM EDTA and DTT
- For batch mode, gravity flow, MPLC und FPLC
- **Recommended for all matrix volumes**

Roti®garose His/Ni HPBeads plus may not be regenerated.
The matrix is very stabile and may generally be used with buffers including the following reagents: ≤20 mM EDTA, ≤20 mM DTT, ≤8 M urea, ≤6 M guanidinium hydrochloride, ≤100 % methanol, ≤100 % ethanol, ≤30 % acetonitrile, pH range 4-9. May be autoclaved at 121 °C for 30 mins.
Suitable for LPLC, FPLC and MPLC and big matrix volumes.

Type analysis:

Particle size.	50-150 µm
Beads (cross-linked agarose).	6 %
Ligand.	Polychelator
Metal ion.	nickel
Binding capacity (gel) (GFPuv-6xHis).	≥80 mg/ml
Ethanol.	20 %

Nickel Charged IMAC Beads and Columns – NTA Linker

NEW ready-to-use

Roti®garose-His/Ni NTA-Cartridges

for biochemistry

For isolation of His-tagged proteins by high pressure affinity chromatography under reducing conditions.

Affinity chromatography colums/nickel charged, IMAC columns

Storage temp.: +4 °C

Warning H226-H319

Prepacked cartridges with Nickel charged NTA-agarose bead matrix for medium pressure affinity chromatography (MPLC) under reducing conditions. Prepacked matrix, stabilised with 15 % ethanol.
Optimal for automated liquid chromatography, or if proteins shall be isolated under pressure. **Suitable for ÄKTA™ FPLC™** and for sample application via peristaltic pump or syringe.
The matrix of choice if His-tagged proteins shall be isolated from reducing buffer solutions without loss.

- Very fast and simple purification of His-tagged proteins from total lysates
- Superior recovery rate of pure His-tagged proteins
- High binding capacity for 6xHis-tagged protein
- Recommended flow rate 5 ml/min.
- Standard ports (10-32)
- Very versatile. Applicable with ÄKTA™ FPLC™, pump and syringe
- Reliable elution and regeneration
- Minimized Nickel leaching
- Compatible with denaturing and reducing reagents
- For medium pressure flow chromatography

Immobilized metal ion affinity chromatography (IMAC) under medium pressure is the prefect method to obtain high yield of very pure proteins in minimum time. Roti®garose His/Ni NTA-Cartridges offer the perfect solution for fast and simple isolation of His-tagged proteins from total lysates in reducing buffer solutions.
Roti®garose His/Ni NTA-Cartridges may be regenerated, making them very cost-effective.
The Matrix is stable in all commonly used reagents including denaturing reagents (like 8 M urea, 6 M guanidinium hydrochloride) and (dependent on the respective buffer) reducing substances (for instance ≤30 mM glutathion, ≤10 mM DTT, ≤10 mM DTE, ≤20 mM ß-mercaptoethanol and ≤0,3 % SDS.
Column material made from polypropylene and polyethylene (frit).
For MPLC, FPLC, ÄKTA™ and peristaltic pump.

Uncharged IMAC Beads

Roti®garose-His uncharged HPBeads NEW

for biochemistry

For isolation of His-tagged proteins by fast or large scale affinity chromatography.

Agarose beads "high pressure" for affinity chromatography, IMAC matrix/uncharged, Column matrix for protein isolation

Storage temp.: +4 °C

Warning H226-H319

Uncharged IDA-agarose beads for affinity chromatography under medium pressure, with high flow rate or with big sample-/matrix volume.
50 % bead slurry in 20 % ethanol.
In Roti®garose His uncharged HPBeads, the advantages of the efficient metal ion/His binding have been combined with a bead technology allowing a very rapid flow rate. Suitable for MPLC and FPLC, or if His-tag proteins shall be isolated either in particularly short time or in big amounts. In one step, the beads can be loaded safely and rapidly with all standard bivalent metal cations (Ni^{2+}, Co^{2+}, Zn^{2+}, Cu^{2+}).

- Rapid one-step purification of His-tagged proteins from total lysates
- High binding capacity for standard me^{2+} ions under rapid one-step loading
- Easy elution and regeneration
- Very low metal leaching
- Compatible with denaturing reagents
- For batch mode, gravity flow, MPLC und FPLC
- Recommended for big matrix volumes

Immobilized metal ion affinity chromatography (IMAC) still is the most widely used method to obtain high yield of very pure proteins with reasonable effort. Roti®garose His uncharged HPBeads offer the perfect solution for your specific application under medium pressure (MPLC, FPLC), if rapid flow rates are desired or if big samples volumes have to be purified.
The matrix of Roti®garose His uncharged HPBeads consists of crosslinked and beaded 6 % agarose, IDA-conjugated. Roti®garose His uncharged HPBeads result in eluates with considerably low metal contamination.
The tridentate IDA cross-linker provides easy elution with low amounts of imidazole. Additionally, Roti®garose His uncharged HPBeads may repeatedly be regenerated, making them very cost-effective.
The Matrix is stable in all commonly used reagents including denaturing and reducing reagents (like 8 M urea, 6 M guanidinium hydrochloride, 5 mM DTT). May be autoclaved at 121 °C for 30 mins.
Suitable for LPLC, FPLC and MPLC and big matrix volumes.

Empty cartridges FPLC NEW

Empty cartridges for protein isolation by FPLC.

Chemically stable in all commonly used reagents. The FPLC cartridges combine the easy handling of a small column with a robust construction allowing application of higher pressures. The cartridges are simply and reproducibly to pack, offer 4 sizes in identical design and may be stored very easily. Compatible with common chromatography instruments like ÄKTA™FPLC™.

Max. pressure: 200 psi / 14 bar / 1,38 MPa

Pore size: 10 µm

Column material: Polypropylene, Material column frit: Polyethylene.

Delivery includes empty cartridges, 3 frits each and 2 end plugs each.

Standard connections are usually supplied with the common FPLC instruments.

Technical specifications:

Type	Vol. (ml packed column matrix)*	Cartridges (no.)	Frits (no.)	End caps (no.)	Ø (mm)	Height (mm)

Roti®garose Beads and Columns for Isolation of GST-tag Proteins

NEW ready-to-use

Roti®garose-Glu/GST Cartridges

for biochemistry

For isolation of GST-tagged proteins by high pressure affinity chromatography.
Affinity chromatography columns with glutathione-agarose,
Column for protein isolation, GST agarose beads
Storage temp.: +4 °C

Warning H226-H319

Glutathione coupled agarose beads for medium pressure affinity chromatography (MPLC). Prepacked matrix, stabilised with 20 % ethanol. Optimal for isolation of glutathione-S-transferase (GST) or GST fusion proteins via automated liquid chromatography, or if proteins shall be isolated under pressure. Suitable for ÄKTA™FPLC™ and for sample application via peristaltic pump or syringe.

- Easy isolation of GST-tagged proteins from total lysates
- Rapid, mild and highly specific purification
- Suitable for isolation of GST-peptides and protein complexes of all sizes
- High binding capacity
- Easy elution and regeneration
- Recommended flow rate 0,5-5 ml/min.
- Standard ports (10-32)
- For medium pressure flow chromatography
- Very versatile. Applicable with ÄKTA™FPLC™, pump and syringe.

Efficient and highly specific isolation of GST-tagged proteins via affinity chromatography is based on the affinity of the glutathion-S-transferase to it's substrate glutathione. Merely no unspecific binding of proteins without GST-tag takes place, even during purification from raw extracts, while the biological activity of the purified proteins is preserved by chromatography conditions.
Roti®garose Glu/GST Cartridges offer the perfect solution for your specific application of chromatography under medium pressure (MPLC, FPLC). Roti®garose Glu/GST Cartridges are prepacked and may be used directly. The matrix of Roti®garose Glu/GST Cartridges consists of beaded 4 % agarose without crosslinking, coupled with glutathione. Elution is carried out via a mild Tris/glutathione buffer, enabling even recovery of native protein complexes. Roti®garose Glu/GST Cartridges may be regenerated, making them very cost-effective.
Column material made from polypropylene and polyethylene (frit).
For MPLC, FPLC, ÄKTA™ and peristaltic pump.

Type analysis:

Roti®garose-Glu/GST Beads NEW

for biochemistry

For isolation of GST-tagged proteins by affinity chromatography.
Agarose beads for affinity chromatography, glutathione-agarose beads,
Column matrix for protein isolation, GST agarose beads
Storage temp.: +4 °C

Warning H226-H319

Glutathione coupled agarose beads for affinity chromatography.
75 % bead slurry in 20 % ethanol.
Recommended for isolation of glutathione-S-transferase (GST) or GST fusion proteins in batch mode or via columns. Suitable for low to medium pressure, FPLC, or if GST-tag proteins shall be isolated either in particularly short time or in big amounts.

- One-step isolation of GST-tagged proteins from total lysates
- Rapid, mild and highly specific purification
- Suitable for isolation of GST-peptides and protein complexes of all sizes
- High binding capacity
- Easy elution and regeneration
- For batch mode, gravity flow, MPLC and FPLC
- Suitable for big matrix volumes

Efficient and highly specific isolation of GST-tagged proteins via affinity chromatography is based on the affinity of the glutathion-S-transferase to it's substrate glutathione. Merely no unspecific binding of proteins without GST-tag takes place, even during purification from raw extracts, while the biological activity of the purified proteins is preserved by chromatography conditions.
Roti®garose Glu/GST Beads offer the perfect solution for your specific application of low flow column chromatography or protein isolation in batch mode, under medium pressure (MPLC, FPLC), if rapid flow rates are desired or if big samples volumes have to be purified.
The matrix of Roti®garose Glu/GST Beads consists of beaded 4 % agarose without crosslinking, coupled with glutathione. The matrix is easy to pack and results in very evenly packed columns. Elution is carried out via a mild Tris/glutathione buffer, enabling even recovery of native protein complexes. Roti®garose Glu/GST Beads may be regenerated, making them very cost-effective.
Slurry in 20 % ethanol.
Suitable for batch mode, LPLC, FPLC and MPLC and big matrix volumes.

Roti®garose Beads for Isolation of Biotinylated or Streptavidinated Proteins

Roti®garose-Streptavidin Beads NEW

for biochemistry

For isolation of biotin-coupled molecules by affinity chromatography.
Agarose beads for affinity chromatography, Streptavidin-agarose beads,
Column matrix for protein isolation
Storage temp.: +4 °C

Warning H226-H319

Streptavidin coupled agarose beads for affinity chromatography.
50 % bead slurry in 20 % ethanol.
Recommended for isolation of biotinylated molecules in batch mode or via columns via low pressure affinity chromatography.

- **One-step isolation of biotinylated molecules from total lysates**
- Rapid, mild and highly specific purification
- Suitable for isolation of DNA, proteins and other molecules of all sizes
- High binding capacity
- High recovery rates
- For batch mode and gravity flow

Between molecules, with a value of K_a~10^{-14}/M the binding of biotin to avidin and streptavidin is the strongest non-covalent binding known in biochemistry. Efficient and highly specific isolation of biotinylated molecules via affinity chromatography is based on this particular affinity.
Streptavidin is immobilised to the beads through a spacer arm, not only minimizing streptavidin leakage during elution, but also enhancing the binding capacity by reduction of steric effects. Merely no unspecific binding of unlabelled molecules takes place, even during purification from raw extracts.
Roti®garose-Streptavidin Beads offer the perfect solution for your specific application of low flow column chromatography or isolation in batch mode.
The matrix of Roti®garose-Streptavidin Beads consists of beaded 6 % highly cross-linked agarose. The matrix is easy to pack and results in very evenly packed columns. Elution is carried out via 8 M guanidine-HCl or prior to gel loading during heating in gel loading buffer. Elution of imminobiotinylated molecules is performed by 50 mM NH_4 acetate buffer. Isolation of antigens via biotinylated antibodies can be done with 0,1 M glycin.
May be autoclaved at 121 °C for 30 mins.

Type analysis:

Particle size.	50-150 µm
Beads (cross-linked agarose).	6 %
Ligand.	Streptavidin
Binding capacity (gel) (free biotin).	≥120 nmol/ml
Ethanol.	20 %

Roti®garose-Biotin Beads NEW

for biochemistry

For isolation of avidin/streptavidin-coupled molecules by affinity chromatography.
Agarose beads for affinity chromatography, Biotin-agarose beads,
Column matrix for protein isolation
Storage temp.: +4 °C

Warning H226-H319

Biotin coupled agarose beads for affinity chromatography. 50 % bead slurry in water stabilised with 0,02 % sodium azide.
Recommended for isolation of avidin- or streptavidin labelled molecules in batch mode or via columns via low pressure affinity chromatography.

- **One-step isolation of avidin/streptavidin-tagged molecules from total lysates**
- Rapid, mild and highly specific purification
- Suitable for isolation of DNA, proteins and other molecules of all sizes
- High binding capacity
- High recovery rates
- For batch mode and gravity flow

Between molecules, with a value of K_a~10^{-14}/M the binding of avidin and streptavidin to biotin is the strongest non-covalent binding known in biochemistry. Efficient and highly specific isolation of avidin/streptavidin-tagged molecules via affinity chromatography is based on this particular affinity.
Biotin is immobilised to the beads through a spacer arm and covalent carboxy/amide linkage, not only minimizing biotin leakage during elution, but also enhancing the binding capacity by reduction of steric effects. Merely no unspecific binding of unlabelled molecules takes place, even during purification from raw extracts.
Roti®garose-Biotin Beads offer the perfect solution for your specific application of low flow column chromatography or isolation in batch mode.
The matrix of Roti®garose-Biotin Beads consists of beaded 4 % cross-linked agarose. The matrix is easy to pack and results in very evenly packed columns. Elution is carried out via 8 M guanidine-HCl or prior to gel loading during heating in gel loading buffer.

Protein A and G Coated Agarose Beads for Antibody Purification

For rapid and simple purification of antibodies with reasonable effort, affinity chromatography still is the first choice in most cases. Roti®garose Protein A and G Beads offer the perfect solution for isolation of your specific antibodies, either in low flow column chromatography or in batch mode.
The matrix of Roti®garose Beads consists of cross-linked and beaded 4 % agarose, coated and covalently coupled with protein A from *Staphylococcus aureus* or protein G from *Streptococcus*. The recombinant protein A has high affinity for IgG from a variety of different mammalian species, also binding some populations of IgA and IgM. *rec*Protein A shares IgG binding properties with natural protein A of *S. aureus* Cowan strain I.
The recombinant protein G binds IgG3 with high affinity.
Most immunoglobulins may be eluted in 100 mM glycin or citric acid buffer (pH 3,0).

- One-Step purification of immunoglobulins from cell lysates and biological solutions
- Binding capacity (human IgG) of approx. 25 mg per ml matrix
- Superior affinity for IgG from various mammalian species
- High yield of very pure immunoglobulins
- Covalent binding of protein A or G in high ligand density
- For batch mode and gravity flow

Type analysis:

Particle size	50-150 µm
Beads (cross-linked agarose)	4 %
Chemical bonding	covalent
Binding capacity (humane IgG)	approx. 25 mg/ml
Stabilizer	20 % ethanol

Roti®garose-Protein G HPBeads NEW

for biochemistry

For purification of immunoglobulins by affinity chromatography.
Agarose beads "high pressure" for affinity chromatography, Column matrix for protein isolation, Protein G conjugated agarose beads
Storage temp.: +4 °C

Warning H226-H319

Protein G coated agarose beads for affinity chromatography under medium pressure, with high flow rate or with big sample-/matrix volume. High-performance affinity resin for antibody purification.
50 % bead slurry in 20 % ethanol.
In Roti®garose-Protein G HPBeads, the advantages of the highly efficient protein G/antibody binding have been combined with a bead technology allowing a very rapid flow rate. Suitable for all small-scale applications, for MPLC and FPLC, or if antibodies shall be isolated either in short time or in big amounts.

- Rapid one-step purification of immunoglobulins from cell lysates and biological solutions
- **High binding capacity for IgG-antibodies of a variety of species**
- High yield of very pure immunoglobulins
- Easy elution and regeneration
- Covalent binding of protein G in high ligand density
- For batch mode, gravity flow, MPLC und FPLC
- Recommended for big matrix volumes

For rapid and simple purification of antibodies with reasonable effort, affinity chromatography still is the first choice in most cases. Roti®garose-Protein G HPBeads offer the perfect solution for your specific application in small-scale on the bench, under medium pressure (MPLC, FPLC), if rapid flow rates are desired or if big samples volumes have to be purified.
The matrix of Roti®garose-Protein G HPBeads consists of crosslinked and beaded 4 % agarose, coated and covalently coupled with protein G from *Streptococcus*. Binding domains specific for albumin as well as cell walls and cell membranes have been removed in the recombinant protein G, in order to ensure the maximum specific IgG binding capacity.

The recombinant protein G has high affinity for IgG from a variety of different mammalian species, unlike protein A also binding IgG3 with high affinity. Protein G is also recommended for use in isolation of rat IgGs. Other immunoglobulin populations, like for instance, IgA, IgE or IgM, are bound with particularly low affinity.
Most immunoglobulins may be eluted in 100 mM glycin or citric acid buffer (pH 3,0). Roti®garose-Protein G HPBeads may be regenerated, making them very cost-effective. May not be autoclaved.

Suitable for LPLC, FPLC and MPLC and big matrix volumes.

Type analysis:

Particle size.	50-150 µm
Beads (cross-linked agarose).	4 %
Ligand.	recombinant protein G
Chemical bonding.	covalent
Binding capacity (humane IgG).	~20 mg/ml
Ethanol.	20 %

0808.1	5 ml	plastic	612,75 €

Spectra/Gel™ Absorbent

For concentration of dialysed proteins and microparticles.

Warning H319

- Most easy to handle
- Compatible with all types of dialysis membranes and -systems (MWCO: 100 up to 300 000 D)
- Suitable for concentration of very small molecules
- Contamination of samples excluded
- Cost efficient

Easy and cost efficient concentration of proteins, microparticles and other macromolecules.

Application:
After dialysis, the dialysis tubing containing the sample is simply coated with Spectra/Gel™ Absorbent. Made of polyacrylate-polyalcohol, Spectra/Gel™ removes water and small molecules like salt ions from the sample by absorption through the membrane without affecting or contaminating the biomolecules. Grain size 100-850 µm.
The duration of the process depends on the desired final concentration, the MWCO of the dialysis membrane, and the surface to volume ratio of the tubing. E.g. concentration of 5 ml sample through a MWCO of 15 kD results in a final volume of 0.5 ml in approx. 60 min. The wet granulate may be easily wiped off and the concentrated sample be removed from the opened dialysis tubing.
One package (500 g) suffices for up to 50 applications.

Scintillation Cocktail

Rotiszint® eco plus ready-to-use

LSC-universal cocktail

For hydrophilic and lipophilic samples.

Danger H318-H315-H412-H302

- Very high sample acceptance capacity
- High counting efficiency
- Low photo- and chemoluminescence
- Very good colour- and chemical quench resistance
- Environmentally safe and non-carcinogenic
- Virtually odor- and colourless
- High flash point
- No permeation through plastic vials

Multi-purpose, ready-to-use scintillation cocktail for Liquid Scintillation Counting (LSC) of β radiators (e.g. ^{3}H, ^{14}C, ^{32}P). Excellent sample acceptance capacity for all aqueous and organic samples, optimally suited for solutions with high ionic strength. Rotiszint®-eco plus may be used in general in all biological, biochemical and chemical areas, contemporary typical applications are e.g. measurement of cell culture supernatants, routine analyses, and enzymatic assays. Also well suitable for filter plates.

In Rotiszint®-eco plus, di-isopropyl naphthalene is the base reagent of primary scintillators. The cocktail is free of carcinogenic or environmentally dangerous reagents.

Rotiszint®-eco plus is perfectly suited for measurement of solutions, showing a counting efficiency of 47 % (^{3}H). Through its emulsifying character, Rotiszint®-eco plus elutes samples from filter plates, thus making it also suitable for counting of filter samples. For reliable quantitative elution we recommend addition of a sample specific elution buffer. Note: Use of alkylating elution buffers may cause chemoluminescence.

We recommend the use of Rotilabo®-dispensers (Art. No. HAC6.1-HAC9.1, HAE0.1 or HAE1.1) and telescopic suction pipe (Art. No. AA92.1).

0016.4	100 ml	glass	18,85 €
0016.3	5 l	plastic	268,25 €
Original pack 2 x 5 l			254,84/5 l

▶ Scintillation vials see page 77

▶ Dispensers see page 407

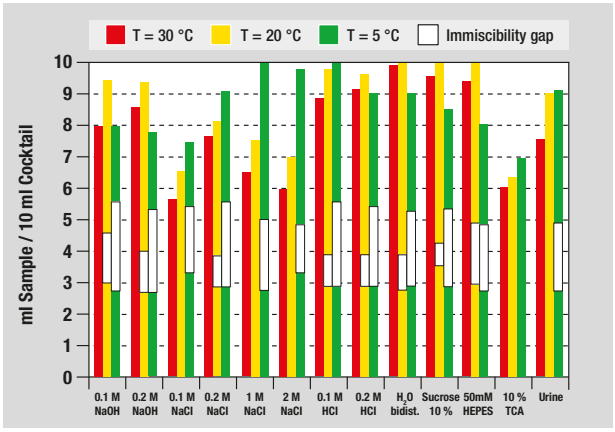

Fig.: Typical sample acceptance capacity
The immiscibility gap is characterized by two phases and may not be used for measurement. By increasing or reducing sample amount in relation to scintillation cocktail, the immiscibility gap may be avoided. Sample acceptance capacities of PBS, TBS etc. equal this of 0.1 M NaCl. Sample acceptance capacities of BSA solutions, cell culture supernatants etc. equal this of HEPES.

Application and quench of Rotiszint® eco plus

Rotiszint® eco plus: Efficiency in solution (^{3}H) 47 %, (^{14}C) 90 %

Ideal for measuring **solutions**.

Please note when measuring **filter discs**:
Rotiszint® eco plus contains emulsifying components and elutes the samples from the discs. This increases measuring efficiency, however involves the risk of nonquantitative elution, so that the measurements may not be reproduced as reliably in some cases. The rate of yield when eluting from filter discs can be increased by adding tissue solutizers, whereby the chemical and color quench are also increased. It must be determined for each individual experiment which mixture is suitable.

Advantages of Rotiszint® eco plus

Rotiszint® eco plus is based on the solvent di-isopropyl naphthaline (DIN), which due to its environmental friendliness is easy to handle, store and ship. It also fulfills all the measuring demands required of efficient scintillation cocktails.

Rotiszint® eco plus is produced without benzene, toluene, xylene and pseudocumene. The solvent has low vapour pressure, therefore there is no irritation caused by a bad odour. The solution is hardly flammable and economical in use. It is also biodegradable. Rotiszint® eco plus has high counting efficiency, excellent quench resistance, good sample stability, no chemoluminescence and no diffusion through plastic vials.

Rotiszint® eco plus comes in black 5 l plastic bottles, which can be used as storage containers. They enable easy, safe and place-saving storage.

A practical dispenser helps to remove the required amount of cocktail easily and safely. We recommend the Rotilabo®-dispenser (Art. No. Y837.1 - Y842.1). In order to completely remove all the liquid, the inner withdrawal tube may be replaced with a longer Teflon® or polyethylene tube (6 mm inner Ø), or by the telescope suction tube (Art. No. AA92.1).

Protein Quantitation

Roti®-Quant ready-to-use

5x conc.

For protein quantitation acc. to Bradford.

Storage temp.: +4 °C

Danger H226-H290-H314

- Reproducible
- Fast
- Low price

Further characteristics:

- 1 measurement per sample (OD_{595})
- Linearity of measuring results to a great extent
- Sensitivity to 2 µg
- Functional range: 2-100 µg

50 ml Roti®-Quant is sufficient for more than 200 macroassays (1 ml-cuvette) or more than 900 assays when using microtiter plates.

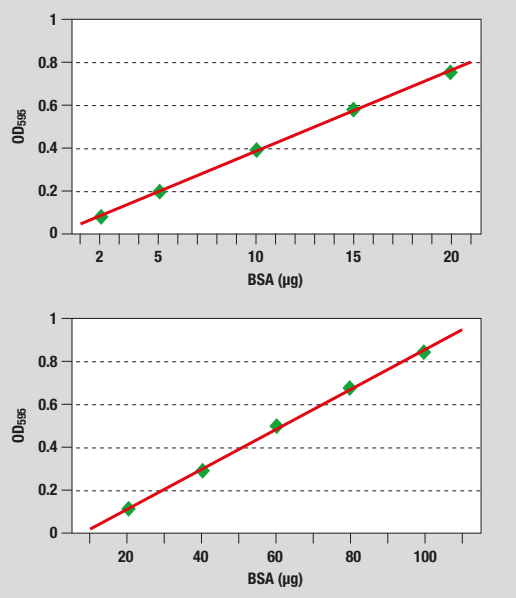

Fig.: Typical standard curve with Roti®-Quant and BSA (Art. No. 8076.1) as calibrating protein.

K015.1	500 ml	plastic	96,65 €

Roti®-Nanoquant ready-to-use

5x conc.

For protein quantitation acc. to Bradford, for extremely small protein amounts.

Storage temp.: +4 °C

Danger H226-H290-H314

- Reproducible
- Low-priced
- For very low protein amounts

Further characteristics:

- Double measurement per sample (OD_{450}/OD_{590})
- Perfect linearity of measuring results
- Sensitivity: up to 200 ng
- Broad functional range of 200 ng to 25 µg

50 ml Roti®-Nanoquant is sufficient for more than 200 macroassays (1 ml-cuvette) or more than 900 assays when using micro-titer plates.

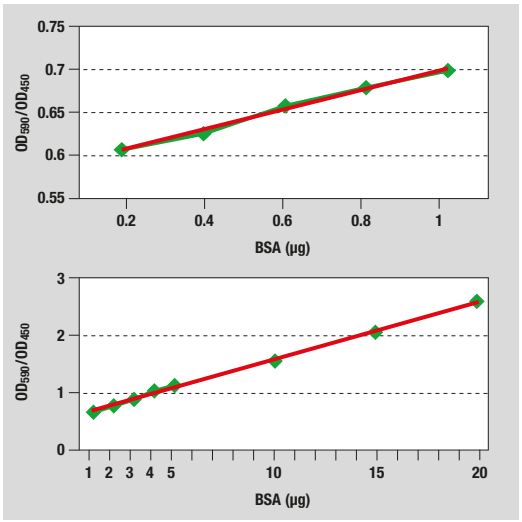

Fig.: Typical calibration line with Roti®-Nanoquant and BSA (Art. No. 8076.1) as calibrating protein.

Roti®-Quant universal

For protein quantitation (PCA enhanced Biuret reaction). High tolerance against detergents, salts and alcohols.

Storage temp.: +20 °C

Danger H315-H318-H411

- **Equals the well-known BCA assay**
- Very easy to handle
- Highly sensitive measurement up to 0.5 µg protein
- Linear measuring range from 0.5 to 200 µg protein
- Can be used in 1-ml-scales and in microtiter plates (can be automated)
- Measurement with standard filters (492 nm wave length) or at 503 nm wave length
- Accelerated reaction and increased sensitivity in mild heat

Colorimetric test for detecting and quantifying soluble proteins. The special reagent formula effects a high tolerance against interfering factors such as detergents, alcohol and buffer salts, thus making the kit a universal tool for measuring proteins in almost every solution.
The basic mechanism, a PCA enhanced Biuret reaction, is identical with the one used for the well known BCA protein assay. Its result, however, is a bright blue colour which may be measured with standard filters of approx. 500 nm wave length.

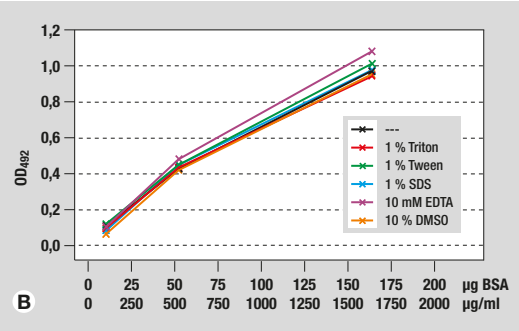

Fig. B: Independence of Roti®-Quant-universal-assay of detergents and other additives, examples. Blank-value corrected. Measurement of 100 µl each protein solution.

(With kind permission of Dr. Angelika Böttger, Zoological Institute, Ludwig-Maximilians-University Munich)

The kit contains:
500/200 ml Roti®-Quant universal reagent 1 (Art. No. 0118) and 40/16 ml Roti®-Quant universal reagent 2 (Art. No. 0119), adequate for 500/200 preparations in photometer cuvettes or 5000/2000 preparations in microtiter plates.

Contents of this Kit may not be bought separately.

0120.2	1 kit (200 assays)	89,80 €
0120.1	1 kit (500 assays)	188,15 €

Instructions for use
can be found on the Internet next to the product description.

Rotilabo®-single-use cuvettes

Made of **PS**, **PPMA** or special plastic.
- Two optical windows
- Extremely low deviation in absorbance values
- Outstanding optical transmission values
- Cavity-sorted production

Layer thickness 10 mm. Dimensions: L 12.5 x W 12.5 x H 45 mm.

Polystyrene (PS)
Range of application: 340 to 900 nm.

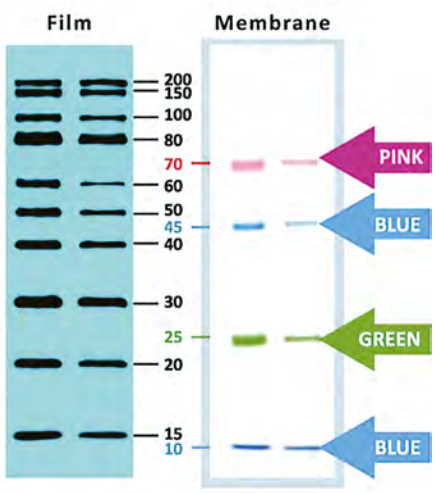
Western-Blot & ELISA

Western-Blot Marker

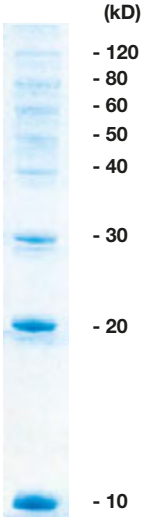


Roti®-Mark WESTERN PLUS NEW ready-to-use

Protein marker, prestained
Size range: 15-200 kD
Number of protein bands: 14
· 10 IgG binding
· 4 prestained (tricolour)
Number of lanes/ml: approx. 200 (mini gels)
Storage temp.: -20 °C • Transport temp.: room temp.

The Roti®-Mark WESTERN PLUS protein marker covers a wide range of molecular weights from 15 to 200 kD. It consists of 10 IgG binding proteins with two in their mass enhanced reference bands (30 kD and 80 kD).
For the most common type of primary antibodies are IgG type antibodies the Roti®-Mark WESTERN PLUS marker can be used in almost any situation of Western Blot. Appropriate detection methods are fluorescence, chemoluminescence, colour or other systems.
For controlling the gel run during SDS-PAGE and for reliable evaluation of transfer efficiency during Western Blot the marker additionally contains four prestained proteins: 10 kD (blue), 25 kD (green), 45 kD (blue) and 70 kD (red).
Please note: Reliable size determination of proteins cannot be performed using prestained markers.

2245.1	250 µl	plastic	195,55 €
2245.2	2 x 250 µl	plastic	370,90 €



Roti®-Mark WESTERN-Marker ready-to-use

Protein marker, not prestained
Size range: 10-120 kD
Number of protein bands: 8
Number of lanes/ml: approx. 200 (mini gels)
Storage temp.: -20 °C • Transport temp.: room temp.

Warning H319

Finely graded protein marker for medium size range. The unstained proteins enable correct size evaluation in gel. Roti®-Mark WESTERN-Marker has been assembled from a set of **His-tagged, recombinant proteins** and can be detected directly in Western-Blot using anti-His antibodies. Subsequently, staining through chemoluminescence or colour reaction is possible. Consequently you will obtain the ladder size directly on your printout, X-ray film or membrane - this rules out the possibility of any errors through inaccurate transfer of the bands. Marker proteins are solubilised in a non-reducing buffer acc. to Laemmli.
Fig.: 12 % SDS-PAGE (Tris), 10 µl marker solution.

9401.3	500 ml	plastic	241,90 €

Albumin Fraction V, pH 5,2

>97 %, powdered, for protein analysis

Non-neutralized albumin. Suitable as protein standard or hapten carrier, recommmended for use in ELISA and Western-Blotting.

BSA

M ~66 000 g/mol

Storage temp.: +4 °C

Albumin Fraction V, pH 5.2 is basically suitable for all applications using albumin of Cohn-fraction V, e.g. for stabilisation of enzymes and antibodies, or as hapten carrier in immunoassays. The pH value of albumin pH 5.2 is close to its pI and the protein is only weakly charged. It is, therefore, particularly recommended for use in ELISA and Western blotting, since it may help in further reducing background signals. Manufactured from fresh beef plasma by fractionating in accordance with Cohn and subsequent crystallisation at low temperatures from the alcoholic solution.

pH value (10 % solution). ..... 5,2 ±0,4

Albumin, IgG free

DNAse-/RNAse-/Protease-free

>98 %, IgG-free, for biochemistry and molecular biology

Recommended as blocking and stabilising reagent in all antibody-mediated detection systems.

BSA

M ~66 000 g/mol

Storage temp.: +4 °C

Albumin, highly purified and tested for presence of immunoglobulins (IgGs), proteases, RNAse, and DNAse. Albumin, IgG-free is particularly recommended for use as stabilising reagent in antibody solutions, and as blocking reagent in all assays using detection systems via antibodies. Also very well suited for stabilising of hot-start-PCRs mediated by antibodies, or as blocking reagent in antibody-detected hybridisations.

For purification of Albumin, IgG-free, an extensive heat-shock/diafiltration method is used, which has been shown to bring more highly purified products than the standard process acc. to Cohn. The process is taking place in a closed system.

IgG (HPLC)..... none detected
Protease..... none detected
DNAse..... none detected

Sodium-Casein

≥89 % lactoprotein

Casein-sodium

Blocking reagent from milk protein, suitable for Western and ELISA. High blocking efficiency based on the amount of small protein and peptide species (<10 kD). Can be used with PBS/PBST and TBS/TBST as well as all standard colorimetric and fluorescent detection systems. Not suitable for PVDF-membranes, biotin/streptavidin mediated labelling (milk contains biotin), and detection of phospho-proteins.
Tip: Prepare stock solution in 0.3 M NaOH (37 °C), titrate to pH 7.4 (HCl).

Roti®-Block ready-to-use

ready-to-use, 10x conc.

Protein free blocking solution. Contains Tween® 20.

Storage temp.: +20 °C

Suitable for

- Western- and Far Western Analysis
- Southern- and Northern-Blots
- Dot-Blots
- ELISA- and Sandwich-Assays
- Precoating of ELISA-plates (incl. drying)
- *in situ* hybridisation
- Microarray hybridisation

In order to obtain high signal intensity, nonspecific antibody binding sites must be blocked. Whilst detergents are not effective as blocking agents, the addition of proteins such as BSA may mask specific binding sites. Roti®-Block is an innovative, polymer-based blocking reagent which solves such problems. With Roti®-Block, the specific binding sites remain accessible while nonspecific reactions are suppressed, thus leading to an increase in signal intensity.

Included you will find a detailed instruction manual with protocols, e.g. for stripping PVDF-membranes from bound probes without destabilising the blocking, which enables fast rescreening of the filter.
Roti®-Block also enables the blot to be Ponceau stained even after blocking.
For detection systems using antibodies specifically directed against protein-phosphorylations we recommend to test and optimise the blocking efficiency prior to assaying your samples.

Instructions for use
can be found on the Internet next to the product description.

Roti®-ImmunoBlock

ready-to-use, 10x conc.

Protein free blocking reagent for immunocytological assays.
Without detergent.

Storage temp.: +20 °C

Suitable for

- Immunocytological assays
- Immunohistological assays
- Paraffin- and cryosections
- *in situ* hybridisation
- Cell culture samples
- Whole mount samples

Roti®-ImmunoBlock is an innovative blocking reagent on a polymer base without detergents and proteins.

No contamination of your detection system through foreign proteins, reducing background and false-positive signals. Specific binding signals are preserved whilst non-specific interaction is impeded, increasing the signal-to-noise ratio. Ready-to-use solution for fast and easy applications.

Roti®fair BBS

for 500 ml/tablet, for biochemistry and molecular biology

Coating of ELISA plates and blocking supplement.

Borate Buffered Saline (tablets)

Danger H360FD

Exactly pre-weighed tablets for convenient and rapid preparation of Borate Buffered Saline solution (BBS).
BBS is commonly used for coating of ELISA plates and for blocking-enhancement of Western- or Southern blot membranes.
The buffer can also be used as a sample diluent in biological studies and for various applications within biology and biochemistry in order to stabilize the pH value.
Prepared solution may be sterilized by filtration (0,22 µm) or autoclaving.
Buffer solution has to be stored at +4 °C.

1x BBS solution is prepared by solubilization of 1 tablet in 500 ml highly pure water.

Composition:

Prepared 1x BBS solution contains: 0,15 M NaCl, 10 mM borate buffer, pH-value 8,2 ±0,05, when prepared in deionized or distilled water.

1005.1	100 tablets	plastic	265,00 €

Antibodies

Primary Antibodies ready-to-use

Polyclonal sera and pABs for detection and isolation of labelled proteins

Raised in: Rabbit
Conjugation: None or Horse Radish Peroxidase (HRP)
Application: Immuno blotting (Western-, dot blotting), ELISA, protein isolation and -purification

Purification and specificity sera: None.
Tested for Western Blot and ELISA.
Purification and specificity pAB and Anti His-HRP: Purified from monospecific antiserum by affinity chromatography on immobilised tag/anchor sequence. Tested for Western Blot and ELISA.

Storage temperature: -20 °C
Transport temperature: cooled (freezer packs)

Primary antibody	Concentration and purification	Target	Storage buffer	Recommended dilution	Art. No.	Pack Qty.	€
Anti DYKDDDDK pAB	1 mg/ml, polyclonal, affinity purified	DYKDDDDK*-anchor sequence	1x PBS, pH 7,4	1:1000	**4665.1**	100 µl	253,20
Anti DYKDDDDK Serum	polyclonal	DYKDDDDK*-anchor sequence	x	1:1000	**4664.1**	100 µl	206,95

Anti His Serum	polyclonal	His-tag**	x	1:1000	**3735.1**	100 µl	206,95
Anti Myc pAB	1 mg/ml, polyclonal, affinity purified	Myc-anchor sequence	1x PBS, pH 7,4	1:1000	**4667.1**	100 µl	253,20
Anti Myc Serum	polyclonal	Myc-anchor sequence	x	1:1000	**4666.1**	100 µl	206,95

For additional product data and safety information, see chapter Chemicals A-Z.

* Sequence identical with FLAG® sequence by Sigma-Aldrich
** C-terminal or N-terminal

▶ Antibody Diluents see page 1366

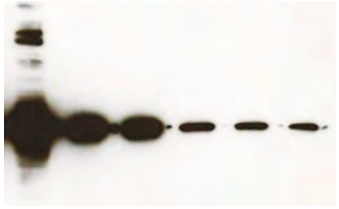

Figure: Western blotting of decreasing amounts (50 ng - 17 pg) of a bacterial extract including a 40 kDa protein. Probed by Anti His Serum (1:1.000) and Roth Anti Rabbit-HRP. Detection via chemoluminescence.

Instructions for use
can be found on the Internet next to the product description.

MultiTag-Protein ready-to-use

0,1 mg/ml, affinity purified
Recombinant protein with His-tag, GST-tag, Myc- and DYKDDDDK anchor sequence.
M 31,6 g/mol
Storage temp.: -20 °C • Transport temp.: cooled
Labelling: His-tag, GST-tag, DYKDDDDK anchor sequence*, Myc anchor sequence
Application: Immuno blotting (Western-, dot blotting), ELISA, protein isolation
Purification and specificity: Affinity purified, recombinant protein. Tested for affinity chromatography, Western blot and ELISA.
Storage Buffer: 1x PBS, pH 7.4
Stabiliser: 0.1 % SDS
Recommended application: 100 ng / lane (Western blotting), dilution 1:100 (ELISA)

3999.1	100 µl	plastic	250,40 €

Secondary Antibodies ready-to-use

Polyclonal antibodies for detection of primary IgG in immuno assays

Concentration: 1 mg / ml
Raised in: Goat
Conjugation: Horse Radish Peroxidase (HRP), Alkaline Phosphatase (AP) or Fluorescein isothiocyanate, Isomer I (FITC)
Application: Immuno blotting (Western-, dot blotting), ELISA, immunohistochemistry and -cytology, immonofluorescence, FACS analysis

Purification and specificity: Purified from monospecific antiserum by affinity chromatography on immobilised, species specific IgG. Tested for Western Blot and ELISA.

Storage temperature: -20 °C
Transport temperature: cooled (freezer packs)

Secondary antibody	Labelling	Target	Art. No.	Pack Qty.	€
Anti Human-AP	Alkaline Phosphatase (AP)	Human IgG	**4754.1**	1 ml	196,20
Anti Human-HRP	Horse Raddish Peroxidase (HRP)	Human IgG	**4753.1**	2 ml	160,75

For additional product data and safety information, see chapter Chemicals A-Z.

Storage buffer:
AP-conjugated antibodies: 1x PBS, pH 7,4 (stabilisation: 40 % glycerol, 0,8 mM $MgCl_2$, 0,8 mM $ZnCl_2$)
HRP-conjugated antibodies: 150 mM NaCl, 100 mM sodium-/potassium phosphate buffer, pH 6,5 (stabilisation: 27 % glycerol, 4,5 % BSA, 0,09 % thimerosal)
FITC-conjugated antibodies: 1x PBS, pH 7,4 (stabilisation: none)

Recommended Dilution:
AP-conjugated antibodies: 1:1000 - 1:10000 (Western), 1:1000 - 1:20000 (ELISA)
HRP-conjugated antibodies: 1:1000 - 1:10000 (Western), 1:1000 - 1:20000 (ELISA)
FITC-conjugated antibodies: 1:1000 - 1:20000 (immuno fluorescence and FACS)

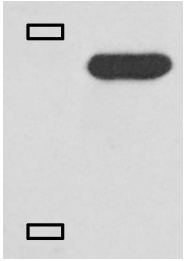

Figure: Western blotting of a HEK293 cell extrakt. Probing of Actin (42 kDa) by protein-specific primary antibody (mouse) and Anti Mouse-HRP (1:5.000). Detection via chemoluminescence.
Blank box: Protein marker in the gel.

Important information on refrigerated transports

All products identified as being particularly temperature-sensitive are shipped in **special ice boxes with freezer packs or in dry ice.**
Additional costs resulting from such, **will be invoiced** (further information on request).

Please note:
In order to guarantee optimum product quality, the dispatch of refrigerated transport products will be carried out **on Mon and Tue only outside Germany!**
Slight delays in delivery are therefore possible.

Ready-Made Solutions, Pre-Mixes, Tablets and Pouches

Roti®-PreMix PBS

for biochemistry and molecular biology

General solution for assays in molecular biology and biochemistry.

PBS powder, Phosphate buffered saline

1x PBS solution is prepared by dissolution of 9.55 g/l in highly pure water.

Formulation:

Prepared 1x PBS solution contains: 0,14 M NaCl, 2,7 mM KCl, 10 mM phosphate, pH-value 7,4 ±0,2, when prepared in deionized or distilled water.

0890.1	250 g	plastic	77,30 €
0890.2	1,25 kg	plastic	213,40 €

Roti®-PreMix PBST

for biochemistry and molecular biology

General solution for assays in molecular biology and biochemistry.

1x PBS solution is prepared by dissolution of 10.05 g/l in highly pure water.

Formulation:

Prepared 1x PBST solution contains: 0,14 M NaCl, 2,7 mM KCl, 10 mM phosphate, 0,05 % Tween® 20, pH-value 7,4 ±0,2, when prepared in deionized or distilled water.

0987.1	250 g	plastic	77,30 €
0987.2	1,25 kg	plastic	213,40 €

Roti®-Stock 10x PBS

BioScience-Grade, ready-to-use, filtered and steam sterilised

For protein biochemistry, cytology, and molecular biology.

PBS 10x ready-to-use solution

10fold stock solution phosphate buffered saline. Very versatile standard solution for detection systems in protein biochemistry, cytological stainings and molecular biological assays. Thus, 1 x PBS is used as basic solution for Western-Blot analyses, ELISAs and other enzymatic assays, for solving and dilution of proteins, for immunocytological and immunohistological assays, as well as for *in situ* hybridisations, apoptosis detection systems and staining of nuclei.
Recommended for HRP-mediated detection systems.
With original seal.

Composition:

1.37 M NaCl, 27 mM KCl, 100 mM Na_2HPO_4, 20 mM KH_2PO_4 in deionised water, pH-value 7.4, 0.2 µm filtered and steam sterilised

1058.1	1 l	glass	119,90 €
Original pack 6 x 1 l			113,91/1 l

▶ Complete range of Roti®-Stock solutions see Chapter Chemicals A-Z!

Roti®-Stock 10x PBST ready-to-use S

BioScience-Grade, ready-to-use, filtered and steam sterilised

For protein biochemistry, cytology, and molecular biology.

PBST 10x ready-to-use solution

10fold stock solution phosphate buffered saline with Tween 20. Extremely versatile standard solution for protein biochemical detection systems, cytological staining and molecular-biological assays with similar fields of application as Roti®-Stock PBS. Roti®-Stock PBST can be used directly instead of PBS when the presence of Tween 20 is required in the detection system.
Recommended for HRP-mediated detection systems.
With original seal.

Composition:

1,37 M NaCl, 27 mM KCl, 100 mM Na_2HPO_4, 20 mM KH_2PO_4, 0,5 % Tween® 20 in deionised water, pH value 7,4, 0,2 µm filtered and steam sterilised

1059.1	1 l	glass	125,25 €
Original pack 6 x 1 l			118,99/1 l

Roti®-Stock 10x TBS

BioScience-Grade, ready-to-use, filtered and steam sterilised

For protein biochemistry, cytology, and molecular biology.

TBS 10x ready-to-use solution

10fold stock solution tris buffered saline. Very versatile standard solution for detection systems in protein biochemistry, cytological stainings and molecular biological assays. Thus, 1 x TBS is used as basic solution for protein detection systems like Western-Blot analyses and Far-Western assays, for immunocytological and immunohistological assays, as well as for whole mount *in situ* hybridisations, apoptosis detection systems and staining of nuclei.
Recommended for AP-mediated detection systems.
With original seal.

Composition:

1.5 M NaCl, 30 mM KCl, 250 mM Tris in deionised water, pH value 7.4, 0.2 µm filtered and steam sterilised

1060.1	1 l	glass	126,35 €
Original pack 6 x 1 l			120,03/1 l

Roti®-Stock 10x TBST

BioScience-Grade, ready-to-use, filtered and steam sterilised

For protein biochemistry, cytology, and molecular biology.

TBST 10x ready-to-use solution

10fold stock solution tris buffered saline with Tween 20. Extremely versatile standard solution for protein biochemical detection systems, cytological staining and molecular-biological assays with similar fields of application as Roti®-Stock TBS. Roti®-Stock TBST can be used directly instead of TBS when the presence of Tween 20 is required in the detection system.
Recommended for AP-mediated detection systems.
With original seal.

Composition:

1.5 M NaCl, 30 mM KCl, 250 mM Tris, 0.5 % Tween® 20 in deionised water, pH value 7.4, 0.2 µm filtered and steam sterilised

1061.1	1 l	glass	126,35 €
Original pack 6 x 1 l			120,03/1 l

Roti®fair-PBS/PBST and -TBS/TBST

High-pure reagents and buffer mixes in pouches or as tablets.

One tablet or the content of one pouch is simply dissolved in the respective amount of water - the desired solution is ready for use. Simply adapt the amount of water in order to vary the concentration, for instance for preparation of a higher concentrated stock solution.

- **Easy-to-use** - simply dissolve contents of one pouch or one tablet in water
- **Timesaving** - no need for weighing of several reagents or adjustment of pH
- **Convenient** - dry reagents for direct use spare preparation of long-term stored stock solutions
- **Reliable** - stringent quality control ensures high lot-to-lot consistency

▶ Many further Roti®fair tablets and pouches at the beginning of chapter Biochemistry!

Roti®fair BBS

for 500 ml/tablet, for biochemistry and molecular biology

Coating of ELISA plates and blocking supplement.

Borate Buffered Saline (tablets)

Danger H360FD

Exactly pre-weighed tablets for convenient and rapid preparation of Borate Buffered Saline solution (BBS).
Prepared solution may be sterilized by filtration (0,22 µm) or autoclaving.
Buffer solution has to be stored at +4 °C.

Composition:

Prepared 1x BBS solution contains: 0,15 M NaCl, 10 mM borate buffer, pH-value 8,2 ±0,05, when prepared in deionized or distilled water.

1005.1	100 tablets	plastic	265,00 €

Roti®fair CBB

for 100 ml/tablet, for biochemistry and molecular biology

Coating of microtiter plates and tubes for immunoassays.

Carbonate bicarbonate buffer (tablets)

Warning H319

Exactly pre-weighed tablets for convenient and rapid preparation of a Carbonate bicarbonate buffer (CCB).
Due to its high efficiency to mediate protein binding to surfaces, carbonate bicarbonate buffer (CBB) is used as coating buffer on plates and tubes. CBB, therfore, is the optimum base solution to prepare microtiter plates or reaction tube prior to ELISA, RIA or EIA.
Prepared solution may be sterilized by filtration (0,22 µm). For long-term storage, buffer solution should be kept at +4 °C.

Formulation:

Prepared 1x CBB solution contains: 50 mM sodium carbonate bicarbonate buffer, pH-value 9,6 ±0,05, when prepared in deionized or distilled water.

1027.2	24 tablets	blister	71,50 €
1027.3	100 tablets	plastic	113,85 €

Roti®-Free Stripping Buffer ready-to-use

ready-to-use

Premixed buffer for stripping of Western-Blot membranes.

Storage temp.: +20 °C

Warning H317-H319-H412

- Efficient
- Well-tried formulation
- With β-mercaptoethanol
- For stripping under heating
- Low-priced

The buffer offers a simple tool for removing antibodies and chemo-luminescence staining from Western blot membranes, allowing the valuable membranes to be analysed several times. Excellent when several proteins are to be detected in the same extract, or e.g. when in addition to a specific analysis, proteins in the respective lanes have to be semi-quantified (Kaufmann *et. al.* (1987) *Anal. Biochem.* 161:89-95).
Suitable for nitrocellulose and PVDF-membranes.

0083.2	250 ml	glass	19,90 €
0083.1	1 l	glass	60,10 €
Original pack 6 x 1 l			57,10/1 l
0083.3	2,5 l	glass	107,40 €
Original pack 4 x 2,5 l			102,03/2,5 l

Safety data sheets
can be found on the Internet next to the product description.

Roti®-Free Stripping Buffer 2.2 plus ready-to-use

ready-to-use

Premixed buffer for efficient stripping of Western-Blot membranes after Chemoluminescence detection, even with hard-to-remove antibodies.

Storage temp.: +20 °C

- Very effective
- Gentle
- Odour-free
- Simple application
- Also suitable for high-affinity antibodies

Stripping buffer for removal of high-affinity antibodies, as well as chemo-luminescence staining, from Western blot membranes. Due to the low pH of the buffer, the antibody conformation is altered, therefore gently removing all molecules bound to the epitopes (Legocki *et. al.* (1981) *Analyt. Biochem.* 111:385-92). Specially designed additives enhance the efficiency in removing those antibodies requiring long stripping times or high incubation temperatures with standard stripping buffer systems. Advanced formulation without β-mercapto ethanol or DTT for use at room temperature or heated. Suitable for nitrocellulose and PVDF membranes.

Applications: Following rinsing steps in PBST- or TBST buffer, the membrane is incubated in Roti®-Free Stripping-Puffer 2.2 plus for 30-60 mins. at room temperature. In case of very persistent antibodies incubation in heated buffer is allowed. After washing it again, the membrane may be blocked and probed anew. The particular time needed for complete stripping depends on the respective antibody/epitope pairing.

3337.1	250 ml	glass	48,95 €
3337.2	1 l	glass	121,40 €
Original pack 6 x 1 l			115,33/1 l

Roti®-Free Stripping Buffer 2.0 ready-to-use

ready-to-use

Premixed buffer for gentle stripping of Western-Blot membranes after Chemoluminescence detection.

Storage temp.: +20 °C

Warning H319

- Effective
- Gentle
- Odour-free
- Simple application w/o heating
- Cost-efficient

Stripping buffer for efficient removal of primary and secondary antibodies, as well as chemoluminescence staining, from Western blot membranes. Due to the low pH of the buffer, the antibody conformation is altered, therefore gently removing all molecules bound to the epitopes (Legocki *et. al.* (1981) *Analyt. Biochem.* 111:385-92). Robust formulation without β-mercapto ethanol or DTT for use at room temperature. Suitable for nitrocellulose and PVDF membranes.

Applications: Following rinsing steps in PBST- or TBST buffer, the membrane is incubated in Roti®-Free Stripping-Puffer 2.0 for 15-60 mins. at room temperature. After washing it again, the membrane may be blocked and probed anew. The particular time needed for complete stripping depends on the respective antibody/epitope pairing.

Substrates

Carl Roth offers you a wide range of substrates for biochemistry, cellular biology and microbiology. The key substrates for Western Blot and ELISA are summarised here.

For detailed information regarding usage, chemical details, safety instructions and further package sizes for these and many other substrates, refer to **"Substrates"** earlier in this chapter on biochemistry or to Chemicals A-Z.

Roti®-DAB Kit

RNAse-/DNAse-free

for immunochemistry

Substrate kit for detection of HRP activity on blot membranes and slides.
DAB substrate kit, HRP substrate kit
Storage temp.: +4 °C • Transport temp.: cooled

Danger H302-H341-H351-H360D-H373

DAB substrate kit for detection of peroxidase (HRP) activity on immunoblots, immunohisto- and cytochemical slides and during *in situ* hybridization.
Roti®-DAB Kit contains substrate, buffer solution and activation reagent, therefore including all three solutions necessary for HRP detection reaction. Application is very simple - all three kit solutions are diluted equally in water, and the blotting filter membrane, or the slides, are then incubated in this substrate solution. Since the solutions are delivered in drop dispensers, dosing is most convenient.

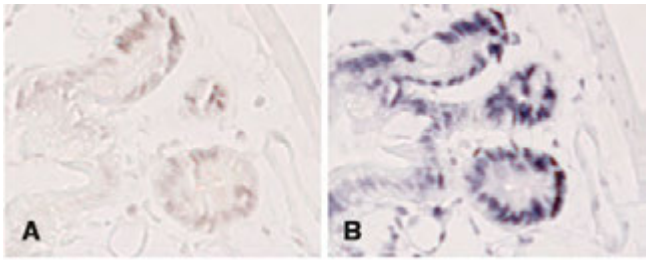

Figure 1:
Immunohistochemical staining of mouse small intestines with an anti-PCNA antibody. Minuscules: pure DAB substrate, capitals: detection supplemented by DAB enhancer (A: $NiCl_2$, B: DAB Metal Enhancer, Art. No. 9204).
A: Basic method using 0.6 mg/ml DAB in Tris-buffer
B: Detection performed with the Roti®-DAB Kit

The kit contains:
DAB solution (Art. No. 9869), DAB buffer (Art. No. 9870), and Activation reagent (Art. No. 9871) in dropper bottles. Contents of this Kit may not be bought separately.

One kit is sufficient for staining of approx. 44 minigel blot membranes or 500 slides.

9202.1	1 kit	cardboard	188,70 €

Roti®fair pNPP

for biochemistry

For preparation of pNPP substrate solution for alkaline phosphatase.
pNPP (tablet), p-Nitrophenyl phosphate
Storage temp.: -20 °C • Transport temp.: room temp.
Exactly pre-weighed tablets for convenient and rapid preparation of pNPP solution.
Prepared solution may be sterilized by filtration.
The solution has to be stored at -20 °C in aliquots.

Roti®fair pNPP 5mg

5 mg/tablet

Formulation:
Prepared solution contains 1 mg/ml pNPP, when 1 tablet is dissolved in 5 ml substrate buffer or deionized, or distilled, water.

Enhancers

Antibody Diluents ready-to-use

ready-to-use, for immunohistochemistry

For optimisation of immunohistochemical detection signals.

Enhancer solution

Storage temp.: +4 °C • Transport temp.: cooled

- Enhances signal strength
- Reduces background
- Very easy application
- Compatible with paraffin- and cryo sections

Due to the particularly designed formulation, antigen/antibody binding is enhanced, while reducing background signals in parallel (Grube (2004) *Arch Histol Cytol.* 67:115-34 and Buchwalow *et al.* (2011) *Sci Rep.* 1:28). Stability of the antibodies is significantly enhanced. The buffer solution is suitable for dilution of all primary and secondary antibodies, all mono- and polyclonals, as well as for all labelled as well as non-labelled antibodies.

Application is most simple: The antibodies are just diluted in the ready-to-use diluent and applied to the slides after blocking. For reduction of the amount needed and for optimised use of high-priced antibodies we recommend to use the Roti®-Liquid Barrier Marker (red, Art. No. AN92, or colourless, Art. No. AN91), in order to prepare tiny incubation chambers on top of the slides.
One bottle for 125 ml is sufficient for enhancement of approx. 125 slides.

Antibody Diluent green

Buffer solution for preparation of antibody incubation solutions.
With green dye for easy handling.

0509.2	4 x 125 ml	plastic	193,40 €

Instructions for use
can be found on the Internet next to the product description.

DAB Metal Enhancer RNAse-/DNAse-free

for immunochemistry

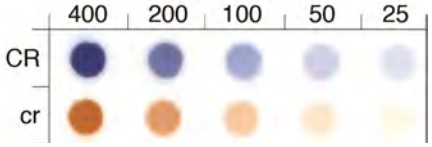
For enhancement of HRP signals
on blot membranes and slides.

Enhancer solution

Storage temp.: +20 °C

Danger H317-H334-H341-H350i-H360D-H372-H412

DAB metal enhancer is used to enhance the signal strength in peroxidase (HRP) detections and to modify the signal colour from brown to purplish gray. Applications include all immunochemical assays like immunohisto-chemistry and -cytochemistry as well as Western blotting, but DAB metal enhancer may also well be used during *in situ* hybridization.
When the DAB metal enhancer is applied, the sensitivity of DAB staining is about two times higher than with DAB alone. For application, the DAB substrate components and buffer reagents (for instance Roti®-DAB-Kit, Art. No. 9202) are simply diluted in DAB metal enhancer instead of water. The purplish gray precipitate resulting from the staining reaction can be detected in visible light and does not bleach during long-term storage. Since it is insoluble in aqueous and organic solvents, slides may be permanently mounted in hydrophilic, or, after dehydration, in hydrophobic mounting medium.



One bottle of 100 ml is sufficient for enhancement of approx. 10 minigel blots or 100 slides.

9204.1	100 ml	plastic	97,75 €

Roti®-Strept/HRP-Kit

for immunochemistry

HRP-kit for highly sensitive detection of
biotinylated molecules on slides.

HRP detection kit with biotin and streptavidine

Storage temp.: +4 °C • Transport temp.: cooled

EUH208

Roti®- Strept/HRP kit is a peroxidase kit for very sensitive detection of biotinylated molecules on slides, for instance in immunohistochemical or -cytochemical assays. Sensitivity of colour staining is hence increased to the level known from chemoluminescence.
Roti®- Strept/HRP kit contains streptavidine and a biotin-coupled peroxidase, which are combined in order to increase the sensitivity of the detection method significantly. Application is very simple - both kit solutions are diluted equally in PBS, and the slides are incubated in this substrate solution after second antibody. Since the solutions are delivered in drop dispensers, dosing is most convenient. The HRP is then stained by common substrates like DAB (Roti®-DAB kit Art. No. 9202).
Following staining, the slides may be permanently mounted in hydrophilic, or, after dehydration, in hydrophobic mounting medium.

This Kit contains:
Streptavidin solution (Art. No. 0941), biotin peroxidase solution (Art. No. 0946) and an empty bottle for mixture. Contents of this Kit may not be bought separately.

One kit is sufficient for incubation of approx. 200 slides.

9206.1	1 kit	cardboard	332,20 €

▶ DAB substrate kit see page 1365

Signal Enhancer Western/ELISA Set

for immunochemistry

For enhancement of immunochemical detection signals on blot membranes and in ELISA.

Enhancer solution

Storage temp.: +4 °C • Transport temp.: cooled

- Strong enhancement of signal strength
- Most easy application
- Compatible with
  Western and ELISA
  HRP and AP
  all common membranes
  all common substrates

The Signal Enhancer Western/ELISA enhances antigen-antibody reactions in a variety of immunoassays such as Western blotting, dot blotting and ELISA. It can significantly enhance detection of weak immunoreactive and low abundance target proteins and is well compatible with all common assay versions, membranes and ELISA plates.
Signal enhancement is dependent on several parameters such as the particular antigen/antibody pair, the particular detection enzyme, the substrate chosen and so on. In most cases, however, the signal strength is about 5 to 10fold higher than with the substrate alone. For application, the two solutions Signal Enhancer Western/ELISA-1 and -2 are simply used as buffer solutions for preparation of the primary- and secondary antibody incubation solutions. Following incubation and washing, all common detection procedures may be applied, for instance colour staining with Roti®-DAB-Kit (Art. No. 9202) or chemoluminescent staining with Roti®-Lumin plus (Art. No. 3692).

This Kit contains:
Signal Enhancer Western/ELISA-1 (Art. No. 9213) and Signal Enhancer Western/ELISA-2 (Art. No. 9214). 1 Mini-Set: 2 x 50 ml, 1 Set: 2 x 250 ml.

One set with 250 ml each is sufficient for optimization of approx. 25 minigel blots.

9211.2	1 Mini-Set	plastic	139,25 €
9211.1	1 Set	plastic	413,90 €

Signal Enhancer Western/ELISA-1

for immunochemistry

For optimisation of primary antibody binding in immunochemical assays.

Storage temp.: +4 °C • Transport temp.: cooled

The solution Signal Enhancer Western/ELISA-1 enhances reaction between antigens and their corresponding **primary** antibodies in a variety of immunoassays such as Western blotting, dot blotting and ELISA.

One bottle with 250 ml is sufficient for approx. 25 assays.

9213.1	250 ml	plastic	239,20 €

Signal Enhancer Western/ELISA-2

for immunochemistry

For optimisation of binding of primary and labelled antibodies in immunochemical assays.

Storage temp.: +4 °C • Transport temp.: cooled

The solution Signal Enhancer Western/ELISA-2 enhances binding of **secondary** antibodies in a variety of immunoassays such as Western blotting, dot blotting and ELISA. The solution is well compatible with all common assay versions, membranes and ELISA plates.

Recommended for performance of assays using one antibody only, which is labelled.

One bottle with 250 ml is sufficient for approx. 25 assays.

9214.1	250 ml	plastic	239,20 €

Roti®-Free Slide Enhancer

RNAse-/DNAse-free

10x conc., BioScience-Grade

Concentrated buffer for enhancement of detection signals in immunohistochemistry and *in situ* hybridization.

Storage temp.: +20 °C

- Very effective
- Gentle
- Odour-free
- Simple application
- Suitable for formaline- and paraffin fixed samples and cryo sections

Efficient stripping buffer for removal of antibodies, probes, and corresponding stains from immunohisto- and -cytochemical samples, as well as from *in situ* hybridizations.
Due to the particularly adjusted formulation of the Roti®-Free Slide Stripping Buffer, antigens and hybridization partners are retrieved very gently, but quantitatively, enabling the samples to be assayed repeatedly. Suitable for all common samples like formaline- and paraffin fixed tissue and cells, or cryo sections.

Applications: The slides are incubated in Roti®-Free Slide Stripping Buffer for 20-40 min at 70-95 °C. After repeated washing steps, the samples may be assayed again with antibodies or probes. The particular parameters necessary for complete stripping depend on the respective samples, fixing-, and detection systems.

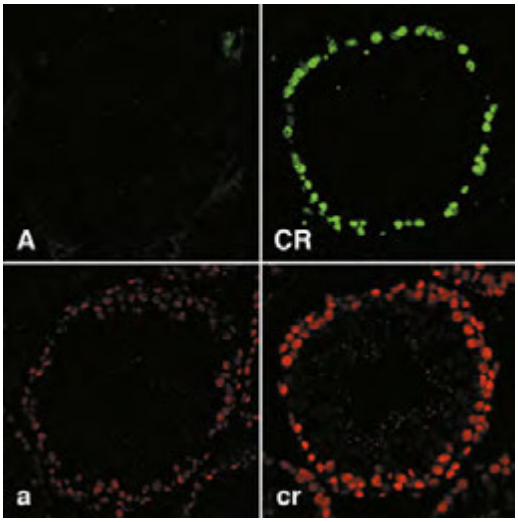


Figure 2:
Detection of proliferation by fluorescent immunohistochemical assay on tissue cryo-sections.
Capitals: Detection of integrated BrdU, minuscules: Immunohistochemical PCNA detection with red flourescence dye.
CR/cr: Detection after pretreatment with Roti®-Free Slide Enhancer.
A/a: Standard detection in 1 % triton-PBS buffer, w/o pretreatment.

With kind permission of the RIKEN Brain Science Institute (BSI), Development Research Group, Hirosawa Wako City, Saitama, Japan.

One bottle with 500 ml is sufficient for approx. 500 slides.

9330.1	500 ml	plastic	206,95 €

Immunostaining by HRP and AP
Protocols

Accessories

Western Incubation Trays

reusable

Compatible with all standard Western-staining methods.

Western incubation trays have been specially developed for staining Western-blots. The sizes adapted to suit typical Western-blots, reduce the required quantity of antibodies and staining reagents. The trays are compatible with all standard staining methods and can easily be stacked. The airtight lids effectively prevent the solution from evaporating even during longer incubation periods.

Type	Dimensions L x W (mm)	Typical incubation vol. (ml)	Material	Max. Temp. (°C)
MINI	91 x 66	5 - 10	PS	80
MIDI	117 x 89	10 - 20	PS	80
MIDI-XL	120 x 120	20 - 30	Acrylic glass	60
MAXI	200 x 165	30 - 60	Acrylic glass	60

Four different sizes for perfect fit to your respective blot membrane. Stabile and frequently reusable.

Type	Dimensions L x W (mm)	Art. No.	Pack Qty.	€
MINI	91 x 66	**8862.1**	10 pieces	147,30
MIDI	117 x 89	**8870.1**	10 pieces	163,40

MAXI	200 x 165	**8876.1**	1 pieces	235,45

Blot incubation trays

121 °C reusable

Compatible with Western- and Southern blotting methods

Developed for incubation of filter membranes during signal detection after Western- and Southern blotting. The incubation trays can safely be stacked, and, due to the tightly sealing lids, evaporation of solution is prevented even during long incubation periods. The size, adapted to typical membrane sheets, reduces the amount of buffer needed during incubation. In case of version MINI, the 5 trays may be used separately as well as in uniform. Stabile, autoclavable, and reusable.

Made from polypropylene.

Model	Material	Dimensions W x L (mm)	Art. No.	Pack Qty.	€

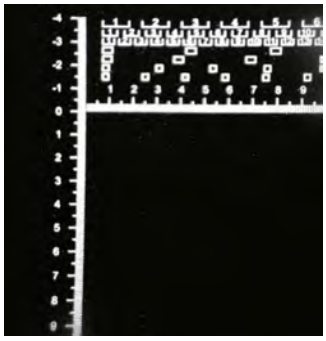
Radtape®

Phosphorescent labels for permanent labelling of autorads through exposure.

Radtape® are rectangular adhesive sheets made from phosphorescent material. The sheets may be cut easily to labels of needed size and shape and may be marked with an ordinary pen. The custom label may be peeled from its backing and affixed to membrane or gel, or directly to the cassette foil. Before exposure of an x-ray film, the label has to be activated with bright light for 10 seconds. The markings on the label appear as negative image on the autorad. Suitable for use with enhancer foils.

- No overexposure, even after long exposure times
- Sharp and clear images, cannot be smeared

Type	Dimensions L x W (cm)	Art. No.	Pack Qty.	€
Radtape®	10 x 15	**3900.1**	10	77,95



Luminous stencil

reusable

Orienting and measuring aid for detection of blot membranes.

Stencil with phosphorescent ordinate system and a pattern of different sized electrophoresis comb wells. When activated, stencils fluoresce for approx. 15 minutes. Are ideal for controlling and measuring during chemoluminescence detection of blots. Stencil can be activated by exposure to daylight or to artificial light.

Art. No.	Pack Qty.	€
X981.1	1	26,55

Autoradiography Pen

For marking of chemoluminescent or isotope labelled sheets prior to autoradiographic detection.

Danger H225-H304-H372-EUH031

Pen with phosphorous ink for easy marking of those membranes ready for exposure. The fine tip of the pen also allows individual bands and gel tracks to be marked simply and easily. The marking is activated by the light in the room prior to exposure. The ink illuminates the X-ray film during exposure and the letters are visible in black ink. The letters are easy to read even after short exposure time. In the event of long exposure, the short half-life value of 2-3 minutes effectively prevents overexposure. The writing is therefore easy to make out after virtually all exposure times. Through the replacement nibs the pen can be reused even after a number of months or after drying out.

Suitable for chemoluminescence and isotope-radiography.
Ideal for marking paper, plastic foil and dried polyacrylamide gels.

Delivery incl. 1 pen + 4 replacement nibs

EMEM ready-to-use S

Roti®-CELL Eagle's MEM / Earle's

CELLPURE® ready-to-use, sterile

Medium for a wide range of mammalian cell culture applications.

Minimum Essential Medium acc. to Eagle with Earle's salts

Storage temp.: +4 °C

Minimum Essential Medium is a commonly used modification of the Basal Medium acc. to Eagle, having been developed in 1959 for culturing of HeLa cells. EMEM contains high concentration of amino acids, which conform closely to the protein composition of human cells. Concentration of vitamins, and other essential nutrients, is enhanced, allowing longer cultivation periods between feedings. EMEM is well suited for culturing of a wide range of mammalian cell lines and primary cells, also including transfected cells.

Roti®-CELL Eagle's MEM / Hanks'

CELLPURE® ready-to-use, sterile

Medium for a wide range of mammalian cell culture applications.

Minimum Essential Medium acc. to Eagle with Hanks' salts

Storage temp.: +4 °C

EMEM is well suited for culturing of a wide range of mammalian cell lines and primary cells, also including transfected cells. Due to supplementation with Hanks' salts, cell cultivation in EMEM-Hanks' does not require CO_2 enriched atmosphere.

w/o glutamine

9056.1	500 ml	plastic	16,70 €

Roti®-CELL Eagle's MEM-Alpha

CELLPURE® ready-to-use, sterile

Medium for culturing of bone marrow and amniotic cells.

Minimum Essential Medium acc. to Eagle, Alpha modification

Storage temp.: +4 °C

Alpha-Eagle's Minimum Essential Medium is based on EMEM, containing the following unique components: Vitamin B_{12}, ascorbic acid, non-essential amino acids, sodium pyruvate, lipoic acid, and D-biotin. It has been optimised for culturing of bone marrow cells and amniotic cells for chromosome analysis.

w/o glutamine, w/o nucleosides

RPMI ready-to-use S

Roti®-CELL RPMI-1640

CELLPURE® ready-to-use, sterile, with glutamine

Medium for a wide range of mammalian cell culture applications, mainly of leucocytes

RPMI cell culture medium

Storage temp.: +4 °C

RPMI-1640 has been developed for culturing of normal and neoplastic human leucocytes. It is based on a bicarbonate buffering system with modified amounts of amino acids and vitamins. RPMI-1640 Medium is very well suited for culturing of a wide range of mammalian suspension cell lines and primary lymphocytes, all leucocytes, B- and T-lymphocytes, as well as myeloma- and hybridoma cells.

Special Media ready-to-use S

Roti®-CELL Ham's F12

CELLPURE® ready-to-use, sterile

Medium for culturing of a variety of mammalian- and hybridoma cells, especially CHO cells.

Ham's F12 cell culture medium

Storage temp.: +4 °C

Ham's F12 Medium was originally optimized for serum-free, clonal culturing of CHO cells (Chinese Hamster Ovary). Ham's F12 Medium is the medium of choice for culturing cells of rodent orgin, particularly from rabbit and rat. Additionally, it is increasingly used as general purpose medium for culturing mammalian and hybridoma cells, particularly when supplemented with sera, hormones, and transferrin.

with glutamine, with pyruvate

9108.1	500 ml	plastic	14,95 €

Roti®-CELL Leibovitz's L15

CELLPURE® ready-to-use, sterile

Medium for culture of mammalian cells without CO_2 atmosphere.

Leibovitz's cell culture medium

Storage temp.: +4 °C

Leibovitz's L15 Medium was developed for culturing of eukaryotic cells without CO_2 enriched atmosphere. Its unique components include the use of galactose instead of glucose, omittance of bicarbonate, addition of free base forms of arginine, cysteine, and histidine, as well as elevated levels of tyrosine. Leibovitz's L15 Medium is still used to grow cell lines in the absence of CO_2.

w/o glutamine, with galactose

9109.1	500 ml	plastic	24,20 €

Roti®-CELL McCoy's 5A

CELLPURE® ready-to-use, sterile

Medium for culturing of a variety of mammalian cell lines and primary cells.

McCoys 5A cell culture medium

Storage temp.: +4 °C

McCoy's 5A Medium was optimized for culturing of Walker 256 carcinoma cells. Its unique components include asparagine, amino acids (all L-isomers), and elevated levels of glucose and folic acid. Due to its richness, McCoy's 5A Medium is increasingly used as general purpose medium for primary cells and established cell lines.

with glutamine

9111.1	500 ml	plastic	22,50 €

Roti®-CELL Medium 199 / Earle's

CELLPURE® ready-to-use, sterile

Medium for cell culture in virology and vaccine production.

Medium 199 with Earle's salts

Storage temp.: +4 °C

Medium 199 was developed for nutritional studies on cultured chick embryo muscle fibroblasts. Its unique components include purines, pyrimidines, and fat soluble components. Medium 199 requires a CO_2 enriched atmosphere and is mainly used for virological studies and vaccine production.

with glutamine, with HEPES

9112.1	500 ml	plastic	19,25 €

Roti®-CELL TC100

CELLPURE® ready-to-use, sterile

Medium for culture of Sf9 cells.

TC100 cell culture medium; BML-TC/100

Storage temp.: +4 °C

TC100 is based on the Grace's Insect Medium, optimizing the expression of baculovirus grown in cultured cells derived from ovaries of the fall army worm, *Spodoptera frugiperda*.

with glutamine

9114.1	500 ml	plastic	27,45 €

Roti®-CELL William's E

CELLPURE® ready-to-use, sterile

Medium for long-term culturing of adult, primary liver epithelial cells.

William's E cell culture medium

Storage temp.: +4 °C

William's E Medium is based on the Minimal Essential Medium (MEM), containing besides pyruvate higher concentrations of glucose, amino acids and sodium bicarbonate. William's E Medium has been optimized for long-term culturing of polygonal, epithelia cells from adult liver of mammals.

w/o glutamine, with pyruvate

9116.1	500 ml	plastic	22,50 €

Cell Culture Media Additives S

Roti®-CELL Bicarbonate solution

CELLPURE® sterile, 7,5 %

For cell culture

Sodium bicarbonate solution in water

Due to it being the main physiological buffer system, sodium bicarbonate still is the most commonly used buffer in cell culture media. For media with Hanks' Salts (HBSS) add a low concentration of Roti®-CELL Bicarbonate solution (350 mg/l = 0,035 % end concentration) and incubate in closed culture vessels. For media with Earle's Salts (EBSS) add a higher concentration of Roti®-CELL Bicarbonate solution (2.200 mg/l = 0,22 % end concentration) and incubate in an open vessel, in an atmosphere supplied with 5 % CO_2 in air.

9165.1	100 ml	plastic	13,45 €

Roti®-CELL Glutamine solution

CELLPURE® sterile, 200 mM

Temperature-stable. For cell culture

Alanyl-L-glutamine solution in 145 mM NaCl

L-glutamine is an essential amino acid required for cell culture growth and is normally present in media in a concentration of 29 mg/l or 2 mM. While standard L-glutamine is temperature-sensitive and thus not stable for longer periods, the L-Glutamine form used for this Roti®-CELL Glutamine solution extends by temperature stability and may be stored at room temperature for years, making it a highly valuable tool for cell culture media. Stable L-glutamine is used in the same concentration as standard, temperature-sensitive L-glutamine.

9183.1	100 ml	plastic	17,75 €

Roti®-CELL HEPES solution

CELLPURE® sterile, 1 M

For cell culture

HEPES solution in 145 mM NaCl

Roti®-CELL HEPES solution has been designed for use in open vessels incubated under atmospheric conditions. The sodium chloride concentration of Roti®-CELL HEPES solution has been adapted to the Osmolality found in standard cell culture media formulations, in order to maintain physiological Osmolality in culture.

Roti®-CELL MEM-AA solution NEW

CELLPURE® sterile, 50x conc., w/o glutamine

For cell culture.

Essential amino acids, solution in water

Storage temp.: +4 °C • Transport temp.: cooled

Roti®-CELL MEM-AA solution consists of a mixture of 12 essential amino acids in water. Since cells are not able to synthesize essential amino acids by themselves, those have to be externally supplemented. By enrichment of cell culture media with Roti®-CELL MEM-AA, the culture medium is supplemented with a preformulated mixture of essential amino acids perfectly suited for culturing of most eukaryotic cells. For each amino acid, dilution by 1:50 of Roti®-CELL MEM-AA solution yields the final concentration known from Eagle's Minimum Essential Medium.

0647.1	100 ml	plastic	23,15 €

Roti®-CELL MEM-NEAA solution

CELLPURE® sterile, 100x conc., 10 mM each

For cell culture

Non essential amino acids, solution in water

Storage temp.: +4 °C

Roti®-CELL MEM-NEAA solution consists of a mixture of 7 non-essential amino acids in water. Enrichment of Roti®-CELL Eagle's MEM Medium (with Earle's or Hanks' salts) with non-essential amino acids enables culturing of fastidious cells and cell lines, hereby broadening the utility of this medium. Dilution by 1:100 of Roti®-CELL MEM-NEAA solution yields a final concentration 0.1 mM of each component.

Type analysis:

L-Alanine. ..... 0,89 g/l
L-Asparagine. ..... 1,321 g/l

L-Serine..... 1,05 g/l

9185.1	100 ml	plastic	17,75 €

Roti®-CELL Pyruvate solution

CELLPURE® sterile, 100 mM

For cell culture

Sodium pyruvate solution in water

Storage temp.: +4 °C

Sodium Pyruvate is a key intermediate in the ATP production within the cell and is sometimes added to cell culture media as an additional source of energy. Additional pyruvate may help cells deficient in one of the enzymes involved in glucose metabolism, and may kick-start cells in the citric acid cycle, thus supporting growth of low density cells.
Concentration in standard media is 1 mM; special media like Leibovitz's medium are supplemented with up to 5 mM pyruvate.

Reagents for Cell Culture
General Reagents

Albumin Fraction V, endotoxin-tested
>98 %, low endotoxin, CELLPURE®

With low endotoxin content. Recommended for culturing of cell lines.
BSA
M ~66 000 g/mol
Storage temp.: +4 °C
Albumin Fraction V, low endotoxin is recommended for use during culturing of eukaryotic cells.
Bovine serum albumin is basically suitable for stabilisation of all enzymes and antibodies, as well as for blocking of hybridisations and immunoassays.
Manufactured from fresh beef plasma by fractionating in accordance with Cohn and subsequent crystallisation at low temperatures from the alcohol solution.
Molar extinction coefficient: 44.020 · M^{-1} · cm^{-1}
(acc. to 0.667 x cm^{-1} for a 0.1 % solution).

Endotoxin content: <15 E.U./mg

Albumin Fraction V, very low endotoxin
>98 %, very low endotoxin, CELLPURE®

With extremely low endotoxin content. Recommended for the culture of primary cells and cell lines, as well as for sensitive cell culture assays.
BSA
M ~66 000 g/mol
Storage temp.: +4 °C
Albumin Fraction V, very low endotoxin is particularly recommended for use during culturing of eukaryotic cells and in cell culture assays. This albumin of superior quality is thoroughly tested for its very low endotoxin content, therefore providing trouble-free cell culture assays and reliable results even when handling primary cells or stem cells.
Bovine serum albumin is basically suitable for stabilisation of all enzymes and antibodies, as well as for blocking of hybridisations and immunoassays.
Manufactured from fresh beef plasma by fractionating in accordance with Cohn and subsequent crystallisation at low temperatures from the alcohol solution.

Endotoxin content: < 2,0 E.U./mg

HEPES
DNAse-/RNAse-/Protease-free

PUFFERAN® CELLPURE® ≥99,5 %

For cell culture, tissue culture and biotechnology.
N-2-Hydroxyethyl piperazine-N'-2-ethane sulphonic acid, Good's buffer
$C_8H_{18}N_2O_4S$ • M 238,31 g/mol
Extremely versatile buffer. Excellent for cell and tissue cultures and for analysis of biological systems.

Endotoxins: approx. 0.025 E.U./mg

Applications:
- Combined with bicarbonate, HEPES is an excellent medium for human lymphocytoidal cell lines
- HEPES is more effective than $NaHCO_3$ when controlling the pH value in tissue and organ culture
- HEPES-buffered media for chicken and human lung fibroblasts
- Can be used to replace a bicarbonate buffered medium containing serum with a serum-free HEPES-buffered medium for mouse fibroblasts

Recommended Application of Albumins

Albumin	Art. No.	Recommended Application
Fraction V, endotoxin-tested	CP84	Cell culture, standard cell lineages, cell sorting, short-term assays.
Fraction V, very low endotoxin	CP77	Cell culture. Superior quality and purity, suitable for sensitive cells like primary cells, stem cells, cloning and 3D-cultures. Also recommended for cell stressing assays like transfections, *in vitro* infections, or cell fusion.
Lactalbumin	7597	Cell culture, fermentation procedures, tissue culture.

Lactalbumin
for microbiology

Storage temp.: +20 °C

Lactalbumin is produced by enzymatic hydrolysis of milk whey. It consists of peptides, amino acids and carbohydrates, simple and complex.
It is used in media for culturing of bacterial cells (e.g. *lactobacilli*), for tissue culture, production of vaccines and in fermentation procedures.

Roti®fair 0.9 % NaCl
for biochemistry and molecular biology

For preparation of salt solutions and buffer concoctions.

Sodium chloride (tablet)

Exactly pre-weighed tablets for convenient and rapid preparation of sodium chloride solution.
Sodium chloride solution is generally used in many routine processes in Life Science laboratories, for instance preparation of salt solutions or composing of special buffer concoctions. In order to alleviate the effort involved, preparation of salt solutions using the Roti®fair salt tablets is most convenient.
Prepared solution may be sterilized by filtration (0,22 µm) or autoclaving.
For long-term storage, salt solution should be kept at +4 °C.
0,9 % NaCl solution is prepared by dissolution of 1 tablet in 1000 ml or 100 ml highly pure water, respectively.

For research use only. Not approved for human or veterinary use, for application to humans or animals, or for use in clinical or *in vitro* diagnostics.

Roti®-CELL 0.1% Gelatine solution
NEW S

sterile, 0,1 % conc., in PBS w/o Ca/Mg

From porcine skin, for cell culture, protein biochemistry and molecular biology.

Gelatine solution

Storage temp.: +4 °C • Transport temp.: cooled

Roti®-CELL 0.1% Gelatine solution may be used in a variety of applications in Life Science research in general. The following applications, however, are amongst the most popular: coating of cell culture wells in order to improve cell adhesion of various cell types, stabilizing of DNA polymerases, blocking additive in immunochemical assays, and species differentiation processes in microbiology.
Gelatine is a heterogeneous mixture of water-soluble proteins of high average molecular masses, present in collagen.

Recommended use of Roti®-CELL 0.1% Gelatine solution for cell culture coating: 100-200 µg (0,1-0,2 ml)/cm². Hence, we recommend to use the following amounts per well/plate in ml: 0,1-0,2(48well), 0,2-0,4(24well), 0,4-0,8(12well), 1-1,9(6well), 2,8-5,7(6 cm plate), 8-15,7(10 cm plate). The optimal amount depends on the cell type and specific assay parameters and has to be evaluated. Coat by incubation at 37 °C for 30 mins in minimum.

For research use only. Not approved for human or veterinary use, for application to humans or animals, or for use in clinical or *in vitro* diagnostics.

0621.1	500 ml	plastic	31,75 €

Roti®-CELL 2% Gelatine solution
NEW S

sterile, 2 % conc., in PBS w/o Ca/Mg

From porcine skin, for cell culture, protein biochemistry and molecular biology.

Gelatine solution

Storage temp.: +4 °C • Transport temp.: cooled

Roti®-CELL 2% Gelatine solution may be used in a variety of applications in Life Science research in general. The following applications, however, are amongst the most popular: coating of cell culture wells in order to improve cell adhesion of various cell types, stabilizing of DNA polymerases, blocking additive in immunochemical assays, and species differentiation processes in microbiology.
Gelatine is a heterogeneous mixture of water-soluble proteins of high average molecular masses, present in collagen.

Recommended use of Roti®-CELL 2% Gelatine solution for cell culture coating: 100-200 µg (5-10 µl)/cm². Hence, we recommend to use the following amounts per well/plate in ml: 5-10 µl(48well), 10-20 µl(24well), 20-40 µl(12well), 42-85 µl(6well), 0,12-0,24 ml(6 cm plate), 0,31-0,63 ml(10 cm plate). The optimal amount depends on the cell type and specific assay parameters and has to be evaluated. Coat by incubation at 37 °C for 30 mins in minimum.

Endotoxins (greek ἐndo [endo]=inner, within; τοξίνη [toxin]=poison, toxic substance).

Largest subgroup of **pyrogens** (greek πψροσ [pyros]=fire; γενναν [gennan]=to produce).

The terms **endotoxin** and **pyrogen** are often used synonymously.

Lipopoly saccharides from the outer cell membrane of gram-negative bacteria or blue-green algae. The pathological effects of **endotoxins** are microbial poisoning, septicaemia and lung disease. The lipid A contained in endotoxins is toxic to eukaryotic cells since it interacts with the cell membrane and affects the transcription of many proteins (e.g. tumour necrosis factor). It is, therefore, important to use reagents that are to a large degree free of endotoxins / pyrogens in the **cell culture.**

This can be verified by older test methods such as induction of fever in rabbits, the LAL test (the haemolymph of the horseshoe crab *limulus polyphemus* coagulates in the presence of endotoxins) or by using modern and animal-friendly methods such as monocyte activation or ELISA.

1 E.U. (Endotoxin Unit) = 1 I.U. (International Unit) = 1 USP.U. (United States Pharmocopeia Unit)

1 E.U. = approx. 0,1 ng endotoxin

Antibiotics for Cell Culture

Contamination of a cell culture by bacteria or yeasts almost always results in loss of the cell lines and assays, which means that the use of antibiotics has an important role to play in addition to working in sterile conditions. Antibiotics which are predominantly used for prophylactic purposes are ampicillin, streptomycin and penicillin, while ciprofloxacin and nystatin are used for the eradication of mycoplasma and mould/yeasts.
In molecular biology, antibiotics – particularly G418, hygromycin and neomycin – were established in combination with appropriate resistance genes as selection markers for successfully transfected cells.
Reaction mechanisms of antibiotics used in cell culture mainly involve interference with membrane biosynthesis, membrane integrity or the ribosomal processes in protein biosynthesis.

Roti®-CELL Myco-Free ready-to-use S

CELLPURE® 50x conc., ready-to-use, sterile

For elimination of mycoplasm contamination in cell culture.
Mycoplasm eradication solution
Storage temp.: -20 °C • Transport temp.: cooled

Application: Culture media are supplemented by the Roti®-CELL Myco-Free stock solution diluted by 1:50. Mycoplasms and bacteria are reliably and efficiently eliminated.

- Simple Application
- Reliable eradication
- Effective against all mycoplasms and bacteria
- Not cytotoxic

Roti®-CELL Myco-Free is a reliable, rapidly effective reagent for eradication of contaminations by mycoplasms and other bacteria in cell culture.
The sterile solution Roti®-CELL Myco-Free is composed of a mixture of specially selected antibiotics in PBS, which are known to be highly potent, even in very low concentrations. The effect is due to a specific interaction with prokaryotic protein biosynthesis by inhibition of translation and of the transcription complex located gyrase. Eukaryotic cells are not affected.

One bottle of 100 ml is sufficient for approx. 300 applications.

9830.1	100 ml	plastic	228,45 €

▶ Detailed information on these antibiotics and their application, see page 1479

Amino Acids for Cell Culture

In addition to containing a defined amount of L-glutamine and other essential amino acids, cells in culture media require a series of other amino acids, such as additives to Iscove's Modified Dulbecco Media or nonessential amino acid mixtures to Minimum Essential Media (MEM). Only highly pure reagents tested for the absence of pyrogens/endotoxins can be used for the cell culture.
ROTH offers CELLPURE® grade amino acids with high purity and a guaranteed low endotoxin content.

Product	Purity	Art. No.	Pack Qty	€
L-Alanyl-L-glutamine	≥99 %, CELLPURE®	**6831.1**	5 g	32,15
